The Mooring Master will not transmit any loading instructions to the shore until the officer-in-charge of the deck is satisfied that the hoses are connected correctly and that all valves have been set for receiving cargo.

While in berth, ships should be ready to move under their own power in the event of their breaking adrift, catching fire, fire in adjacent berths or other emergency. No repairs should be carried out while in berth which would immobilise the ship or impair her fire-fighting efficiency.

The Mooring Master will instruct the Master of the vessel as to any signals needed for local requirements.

The Mooring Master brings a portable radio to the ship. The radio may not be used for private conversation. The use of the ship's radio (including the VHF radio, except in an emergency) during loading is strictly prohibited. Portable intrinsically safe radios used by ship's personnel to control loading procedures is permitted, however, provided such use does not interfere with ship/shore communications.

When loading is completed, hoses will be disconnected and lowered, under the supervision of the Mooring Master.

Ships will then proceed to an anchorage allocated by the Mooring Master or direct to sea.

L.N.G. Jetty: This is a 'T' type jetty with breasting dolphins flanked either side by 2 mooring dolphins. Water depth at the berth is 42 ft. Chart Datum.

Suitable for berthing vessels of approximate dimensions LOA 550 ft. (168 m.) to LOA 950 ft. (290 m.)

CARGO HANDLING FACILITIES: Government Pilots provide berthing assistance. See "Doha".

Max. draft permissible at any state of the tide – 33 ft.
Max. draft permissible at High Water – 39 ft.
Max. LOA – 850 ft.

QAFCO N	212	700	11.8	39.0	Ammonia
QAFCO S	212	700	12.0	40.0	Urea

1. *Urea Fertiliser Export:*

Qatar Fertiliser Company – QAFCO Qatar Government joint venture with Norske Hydro who manage the project.

Fertiliser is in polythene bags of 50 kg. nett each.

Loading is by two independent loading towers. Depending on ease of access to ships' holds a 24-hour loading rate of 700 tonnes is given by the loading equipment.

The pile construction jetty lays at right angles to the shore line and along direction 310°–130°.

Urea loading equipment is on the S.W. face of the jetty. Jetty face length between extreme end bollards is 800 ft. (244 m.).

2. *Ammonia Export:*

The N.E. face of jetty laying 310°–130° of length 800 ft. (244 m.) has three functions, one of them being for Ammonia loading. The pipe-line is 8 in. (203.2 mm.) dia.

3. *Bulk Grain Import:*

QAFCO Jetty N.E. face is also used as the Bulk Grain Discharge berth, to the Qatar Flour Mill company situated at the shore end of the jetty.

Discharge Gear: Consists of portable grain suction/blown discharge units placed aboard vessel.

Also see "Terminal Information – L.N.G. Jetty" and "Developments".

CARGO:

1. Flash Point. Flash point of Qatar crude is below 32° Fahrenheit.

2. H_2S Content. Qatar crude contains concentrations of H_2S (sulphuretted hydrogen). This is an evil-smelling poisonous gas which can be lethal depending on concentration of gas in the air inhaled. It can be detected normally by smell, but a high concentration of the gas rapidly paralyses sense of smell and may lead to a false sense of security. It is, therefore, important that when the presence of the gas is detected the area or compartment concerned must be left with all possible despatch until adequate ventilation can be carried out. *The explosimeter will not detect this type of gas.* The foregoing should be dealt with in the light of experience where large quantities of crudes of this type have been carried without accident and we do not wish to exaggerate the dangers. The under-noted precautions have been evolved as necessary to provide against a possible accident.

(a) During loading gas, should only be allowed to escape via the agreed venting arrangements.

(b) When ullaging tanks, personnel should keep windward of the, tank opening and avoid breathing fumes as much as possible. If H_2S is inadvertently inhaled the man should leave the area and not return until his sense of smell has been restored.

(c) No one should enter any pump room or any compartment where gas could collect unless another person is standing by.

(d) Lifelines, breathing apparatus and resuscitator should be readily available.

(e) As a precautionary measure, the gas ejector for the pump room should be put into operation at any time entry is made into this space whilst the possibility of H_2S gas entering pump room from cargo or empty tanks exists.

LOADING:
Readiness. Notice of Readiness will be received by Authority Representative provided vessel ready to load. Lay time will commence as stipulated in the export agreement between purchasers and vendors. A full cargo is deemed to be the maximum cargo which can be loaded in your ship at Umm Said consistent with safe underkeel clearance on sailing, as advised by Mooring Master.

The Authority will make every effort to load tanker on arrival provided berth available and weather permitting.

Advice from vessel which states she is ready to receive cargo is considered as final, and as indicating that every operation necessary aboard vessel has been completed. As soon as possible after such a signal has been received, and without further advice, loading will commence.

Full cargo is deemed to be the maximum cargo which can safely be loaded in the vessel at Umm Said. Completion of loading is subject to the normally accepted tolerances above or below the required cargo.

Tank Dips. During loading, hourly checks of vessel's tanks shall be made by ship personnel to determine cargo loaded for comparison with shore figures if required. This is to prevent loss of oil through a leaking hose and particularly applies at night when seepage of oil can remain unobserved.

Inspection of vessel's tanks will be made by a ship's officer before loading and, if required, by a Q.P.P.A. Representative. Opening dips and closing ullages will be taken by ship's personnel and the quantity of cargo calculated.

Particular care must be exercised by ship's personnel, towards completion of loading, in the "Topping off" of tanks to ensure that the Terminal is given timely advice of any decrease in pumping rate required. Adequate "Stand-by" notice should be given before the final "Stop".

Loading Pumps. Two 1,200 h.p. pumps are used to load crude oil and it is important to note that any rapid changes in the oil velocity may cause pressure surges in the loading system. A pressure surge may rupture the flexible hoses connected to your vessel spilling dangerous quantities of crude oil onto the decks or surrounding areas and may also cause excessive damage to the Terminal installations. To avoid these risks, valve operations and tank switching should be done with extreme care. Please ensure that 15 minutes notice is given for "Slow Speed" and/or "Stop" instructions. A letter of protest will be issued by the Shore Representative/Mooring Master on any occasion a pressure surge is generated, whether Terminal installations have been damage or not.

BALLAST: When a vessel enters Port waters in ballast, the ballast water for overside discharge *must be clean* and a declaration signed by the Master and delivered to the representative of the Terminal to this effect. Oily wastes, oily water or other refuse must not be discharged overboard in Port waters. Vessel's scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard whilst in Port waters.

The attention of Masters is drawn to the volume entitled "International Conference on Prevention of Pollution of the Sea by Oil" 1962 and subsequent publications issued by the International Maritime Consultative Organisation.

Vessels are subject to heavy fines and liabilities for claims arising from pollution of the sea and shore areas.

In Umm Said the "load on top" system is normal procedure and Masters of all tankers are required to certify quantity of slops on board and their intention of "loading on top". If "load on top" system is not used the Master will be required to certify adequate reasons for not doing so, e.g., vessel drydocked in last port, etc.

(a) Essential that vessel is adequately ballasted to ensure safe handling and manoeuvring. Please comply with Mooring Master's requests as to ballast quantity and disposition.

(b) Umm Said is an open roadstead and subject to sudden changes in weather. Large tankers will be required to maintain a minimum of 20% of SDWT ballast/load condition at all times and maintain an even trim. Masters of all vessels should note that should a situation arise that a vessel has to vacate the berth due to adverse weather or for any other reason, the vessel will be required to have on board sufficient ballast/cargo to enable it to manoeuvre with safety; thus it is of great advantage to commence loading whilst discharging ballast or prior to completely deballasting to avoid leaving the vessel in a flying light condition.

(c) All pumproom seacocks must be closed and lashed before commencement of loading unless loading is commenced prior to deballasting, when they will be closed and lashed after deballasting is completed.

FUEL: Only MDO available in an emergency if advance request made. Not available at S.B.M., C.B.M. or L.N.G. Berth.

FRESH WATER: Available at cargo berths but not at S.B.M., C.B.M. or L.N.G. Berth.

CUSTOMS ALLOWANCE: The State Laws of Qatar are very strict about the import of liquor and its consumption both on the mainland and on vessels in the harbour. No employee, whether senior or junior, is permitted to import any liquor direct or to bring any liquor ashore from vessels, and under no circumstances should liquor be offered for consumption on your vessel to any Q.P.P.A. employee unless he is of senior staff status. At the present time vessels enjoy the privilege of not having to seal their liquor stocks whilst in port, but you will readily appreciate that this privilege would be withdrawn if the above rules are not strictly observed whilst vessel is at Umm Said.

REPATRIATION: Immigration/Transit facilities for arriving or departing ship personnel are good. Ample notice should be given on passport details to ensure minimum delay to travelling personnel.

DERATISATION: No facilities.

DISCHARGE CERTIFICATE: The Master of every vessel loading at Umm Said is handed a Discharge Certificate for completion by the Customs or Port Authority at port of discharge and return by air mail to Qatar General Petroleum Corp., P.O. Box 3212, Doha, Qatar within 40 days of sailing from Umm Said.

Instructions regarding the cable to be sent after discharging a cargo loaded at Umm Said must be strictly followed.

It must be emphasised that failure to comply with this requirement may result in delay or even boycott of the vessel upon return to Qatar.

It is therefore in best interest to ensure that Agent at port of discharge attends to despatch of this certificate and the cable with least possible delay. Airmail should be used for Certificate posting.

N.B. If the cargo is destined for onward transit, the final destination of the cargo must be advised on the Certificate.

SECURITY: The Government of Qatar and the Authority are anxious to ensure that unauthorised persons do not board vessels loading at Umm Said. Vessel's co-operation is requested in checking the identity of all persons boarding.

Vessels are particularly advised to keep all points of access to vessel under surveillance at all times, and to provide maximum night illumination of vessel insofar as the safety regulations permit.

A State Police Launch is present in the area and may be available for assistance if required.

GENERAL: *Stores and Provisions:* At Umm Said there are no facilities for the supply of stores.

Q.P.P.A. Light Dues: A charge is made to cover the provision and maintenance of light buoys in the Approach Channel to Umm Said. This covers one visit to this port, both inward and outward passage.

Qatar Port Dues: The State of Qatar impose Port Dues on all petroleum carrying vessels which load hydrocarbon substances in one or more of the oil loading ports located in the State of Qatar which includes islands and offshore areas belonging to the State of Qatar.

Note: The G.R.T. for purposes of these calculations will be that shown on the Arrival Report signed by the Master.

M.E.N.A.S. Light Dues: M.E.N.A.S. Light Dues at rates fixed by the Middle East Navigation Aids Service are payable at Umm Said to cover both inward and outward passage through the Gulf.

DEVELOPMENTS: The new Umm Said port, opened in 1977, has a total water frontage of 4.5 km. of which 2.5 km. has been developed to provide deep-water berths and a harbour for small craft. Three berths at the Northern end having 15.5 m. minimum depth of water at MLLW are reserved mainly for the requirements of Qatar Steel Company and two berths at its Southern end having 13.0 m. minimum depth of water are reserved mainly for the requirements of Qatar Petrochemical Company. Three additional berths having 13.0 m. and two berths having 10.0 m. minimum depth of water at MLLW are available for specialised and general cargoes.

Inner approach channels and manoeuvring areas have been dredged to serve all berths in the new Port.

In addition there are wharves under construction which will be used by general cargo vessels, Ro/Ro vessels, car carriers and container vessels.

A chemical plant is also being constructed.

SHIPMASTER'S REPORT: October, 1980.

Vessel: 210,000 tonnes d.w.

Pilotage: This is now compulsory for the inward passage too for tankers. The Pilot/Mooring Master boards by boat from Doha at Mishut Buoy in position 25° 16′ N., 41° 47′ E.

Agents/Operators: Qatar Petroleum Producing Authority has now been renamed Qatar General Petroleum Corporation and Notices of Readiness, etc., should be addressed accordingly. Cable address unchanged: PETROQAT.

Documents: No papers at all required from ship.

Radio: A7S was heard after contact had been established on VHF. The Mooring Master did not know of any ships ever using this station. The following Standard message was received after the first ETA (72 hours) had been sent over Bahrain Radio:

"Advise your ETA at pilot station Mishut (M) Buoy in GMT 72 hours and confirm 24 hours before arrival. Pilotage is compulsory rig combination accommodation/pilot ladder preferably port side before arrival. Pilot hoist and weighted heaving lines must not be used. You will load at North Berth SBM and require to have one 3 in. messenger rope and one good mooring rope forward in readiness for picking up moorings, derrick rigged starboard side for lifting mooring and hose connecting equipment and two starboard manifolds fitted with flanges to take 12 in. Class 150 ASA hose flanges. Please confirm your derrick has SWL 10 tons and you are able to comply with foregoing requirements. Advise deballasting time and whether able to load/discharge ballast concurrently. Your attention is drawn to the Prohibited Anchorage (Latitude 25° 10′ N.) safeguarding the submarine pipe-lines laid in the vicinity of Wakrah (W) Buoy.

PETROQAT UMMSAID"

AGENT:
(A) *Tankers:*

Qatar Petroleum Producing Authority (Onshore Operations), P.O. Box 10070, Umm Said, Qatar. Telex: 4050 DH QPAUSD. Cable: PETROQAT, Umm Said. Terminal Tel. No.: 322569, 771219, 771371.

(B) *Other vessels:*

Qatar National Navigation and Transport Co. Ltd., P.O. Box – 153, Doha – Qatar. Telex: 4206 MELAHA DH. Cable: NAVIGATION. Tel: 321175/9, 23684, 21213.

Reunion Island

POINTE DES GALETS: 20.55 S. 55.17 E.

(See Plan Book)

FLAG: French flag.
PILOTAGE: Compulsory for all vessels of over 50.0 m. LOA. Pilot is normally ordered by ship's Agent, or in particular cases by the Harbour Master if contacted by VHF beforehand. Pilot launch carries regulation pilot signals. Pilot boards at the entrance to the port about 1 mile from the breakwaters. Pilot on VHF Channel 16, it is recommended that a watch be kept and ETA confirmed.
APPROACHES: *Channel and Buoyage:* The leading line 102° 30′ for entry is determined by day, by 2 rectangular white signs, bordered in red with a thick black line denoting the centre line. At night the leading line is 2 red lights. In the channel the depth is 10 m., 70 m. wide and is buoyed by 4 spars, 2 on each side.

The leading marks for access to the North Port, South and Fishing Port, respectively 009°, 189° and 260°, are marked as shown below:–

North Port:– by day, 2 red rectangular signs, with a thick white line marking the centre line, at night, 2 fixed red lights.

South Port and Fishing Port:– 2 rectangular white signs with a black vertical line marking the centre line by day. 2 fixed green lights by night.
ANCHORAGE: There are 2 anchorages in the roads near the port.
(a) In Baie de St. Paul in depths of about 40 m., well marked and safe except in very strong swell. Mooring buoy available in bay.
(b) In Roads of La Possession unmarked anchorage and little used.

If vessel requires a Pilot for anchoring, then anchorage dues are incurred. Vessels anchoring by their own means do not incur charges.
RESTRICTIONS: Manoeuvring is best done in the early morning or day break because during the day a wind can make movement difficult. The current in the channel varies in strength (between 1 and 2 knots) and direction. Its direction can only be determined by careful observation during the approach. As a consequence ships should be ready to anchor on instruction from the Pilot while transitting the channel. Vessels swing in the outer port using a long headline.

Berth No. 8 unsafe during swell periods.
MAX. SIZE: Under certain conditions, the topography of the port and jetties access is limited to the sizes below:–

North Port: length 160 m., beam 22.0 m., draft for entry 7.5 m. Greater with preliminary agreement of the Port Authorities. Departure draft fixed by the Port Authorities. (Length 160 m. if draft less than 8.50 m.).

South Port: length 180 m. if draft less than 7.50 m.
175 m. if draft less than 8.00 m.
170 m. if draft less than 8.25 m.
(On departure only)

Fishing Basin: length 55 m. draft 4.50 m.

Otherwise entry or departure will depend on the Pilot's advice. Normally entry only occurs at the following times depending on the season.

Maximum daylight 0445 hrs. – 1845 hrs.
RADIO: Saint Lys or Saint Denis Radio.
VHF: Harbour Master's Office equipped with VHF. Call on Channel 16 daytime only (0700–1100 hrs. and 1300–1700 hrs.).
TUGS: Only used to assist vessel manoeuvring in the port. Tug joins vessel in outer harbour. Ship's lines always used. Tug will also assist on roads (deliveries of mail).
BERTHING: Berth assigned by Harbour Master, basis vessel's length and draft. Tankers berth in the outer harbour at dolphin berth. No slop facilities.

Fore Port: (Channel: 70 m. usable width. Turning circle 300 m. Dredged to 10 m. Berth H, 175 m. long, dredged to 10 m.).

North Port: Access lock: 30 m. width, 10 m. depth.
Berth 1: 160 m. length, 8.50 m. depth.
Berths 2, 3, 4: total length 366 m., 9.00 m. depth. For 2 or 3 vessels.
Berth 5: 150 m. length, 8.5 m. depth. Quay is narrow due to cargo collection (mainly bagged cargoes).
Berth 6: (French Navy) 140 m. length, 6 m. depth.
Berth 7: 210 m. length, 9 m. depth. Bulk sugar loading berth.

South Port: Berths 8, 9: Each 190 m. length, 10 m. depth.
Berth S: 120 m. length, 10 m. depth.

Fishing Basin: 6 berths, 70 m. length, 5 m. depth.

The depths above are dredged depths.

Forklifts for handling 22 ton containers at certain berths.
TANKERS: Discharge at Berth Nos. 8 and 9.
CRANES: No shore cranes. Floating crane with 80 tons capacity available.
STEVEDORES: Normal working hours 0700–1700 hrs. Possible to work in meal hours 1100–1230 hrs. and 1700–1800 hrs.

Handling Rates: General cargo: 80/100 tons per day per gang. Bagged cargo: 2,500 bags (less than 80 kilos each) per gang per day.
DENSITY: 1025.
FRESH WATER: Available at all times by pipe-line at the quays. Rate 10 t.p.h. (min.).
FUEL: Fuel and marine diesel available at berths Nos. 8 and 9.
MEDICAL: Doctor and hospital facilities available.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Normally performed by ship's crew who also unlash and hook containers at the 3rd height.
REPAIRS: Repairs can be effected by S.M.A.G. Tel. 42.09.24.
REPATRIATION: All facilities available for crew change and repatriation.
AIRPORT: 30 km. away, daily connections world-wide (Air France, Air Mauritius, S.A.A. and Air Madagascar).
TIME: GMT plus 4 hours. No alterations during the year.
HOLIDAYS: No cargo work on May 1st or November 1st. Possible to work at overtime rates on January 1st, Easter Monday, Whitsun, July 14th, August 15th, December 25th and other holidays.
TELEPHONES: Police 42.00.17 and 42.15.80. Ambulances 18 or 42.06.53 (Private), Fire 18, Harbour Master 42.09.12. Telephones can be placed onboard at all berths.
IDENTIFICATION CARDS: Seaman's Book compulsory, to avoid visa problems.
DELAYS: General cargo rates 500–1,000 tons per day depending on category and conditions.
SHORE LEAVE: Crew are allowed to go ashore.
SHIPMASTER'S REPORT: 1978.
Documents: 3 Crew personal effects lists, 3 Crew lists, 3 Bonded stores lists. Declaration of Health (Supplied on arrival).
Pilotage: Pilotage compulsory. Pilot boards 1 mile off breakwater, minimum of 12 hours notice required.
Anchorage: At Saint Pauls Bay, 5 cables offshore in depth of 20 fathoms – the water is too deep further offshore.
Restrictions: Vessels can enter and leave at any stage of the tide during daytime. Max. beam for North Port 22 m.
Max. Size: Length 180 m. with draft 7.50 m., length 175 m. with draft 8.0 m. and length 160 m. with draft 8.5 m.
Tugs: 1 tug available and required for berthing and unberthing in the North and South Port.
Radio: Radio station – Saint Dennis Radio "FFD".
VHF: Pilot and Port Authority Channel 16.
Special Bulk Facilities: Bulk sugar berth – rate 450 t.p.h. No quay cranes – no Ro/Ro facilities. Facilities for handling containers and storage space for containers in North and South Port.
Fresh Water: Available.
Repairs: Facilities available.
Services: Provisions, Bunker fuel, diesel available.
SERVICES: Harold J. Thomson – P&I Club representative (Oceanus, Strike, London Mutual and others). Speaks excellent English, will assist with any shipping services or supplies. Tel. 42.03.10. Telex: 016252.
DEVELOPMENTS: Facilities for vessels up to 220 m. LOA approved. A second tug will soon be available.
AUTHORITY: Capitainerie du Port.

AGENT: SCAC La Reunion P.O. Box 705, 97474 Saint Denis De la Reunion, Tel. 21.01.32., Telex 096137.

NOTES

Please also advise Shipping Guides Ltd.

Romania

CONSTANTZA: 44.12 N. 28.41 E. (See Plan Book)

DOCUMENTS: As soon as vessel is boarded by the border control commission, the Master fills in a form of declaration in 4 copies, which together with Stowage Plan, Cargo Manifests, Sanitary Certificates, is handed to representative of the Agency. Also following documents are to be handed over at Harbour Master's Office:

Derating Certificate.
Certificate of Nationality.
Tonnage Certificate.
Safety Equipment Certificate.
Load Line Certificate.
Safety Radio-telegraph Equipment Certificate.
Ship's Register.
Safety Construction Certificate.

N.B. These documents will not be returned to the vessel until suffficent funds, in U.S. dollars, have been deposited by Owners to cover all vessel's disbursements.

Crew Lists and Passenger Lists must be typed in several copies (up to 7).

Purser's Report: 1976.

The Authorities require all the ship's certificates, discharge books, health declaration, and vaccination certificates. At least 10 copies of crew list, personal declaration and 2 copies of stores list containing all items of foodstuff, bonded goods and canteen.

PILOTAGE: Upon arrival in roads, a cable must be sent through radio coast station to Agent, stating hour of arrival and asking for Pilot. If entrance is not possible immediately due congestion Agent will call back the vessel advising when Pilot may board near the port entrance in order to berth vessel.

A pilot is required for shifting in port, even for warping along the quay. Pilot-boat has black hull with "Pilot" in white on sides, and white upperworks. Pilots operate 24 hours a day on VHF Channel 14 only.

MINEFIELDS: Danger Area No. 3B (Constantza South). The area enclosed by the coast and by lines joining the following positions:

(a)	44° 09.81′ N.	28° 38.25′ E.	*(b)*	44° 08.99′ N.	28° 39.96′ E.
(c)	44° 08.50′ N.	28° 39.96′ E.	*(d)*	44° 08.50′ N.	28° 54.01′ E.
(e)	44° 00.17′ N.	28° 54.01′ E.	*(f)*	44° 00.17′ N.	28° 39.88′ E.

Danger Area No. 3A (Constantza North). The area enclosed by the coast and by lines joining the following positions:

(a)	44° 21.79′ N.	28° 41.19′ E.	*(b)*	44° 21.79′ N.	28° 52.69′ E.
(c)	44° 21.14′ N.	28° 54.01′ E.	*(d)*	44° 10.19′ N.	28° 54.01′ E.
(e)	44° 10.19′ N.	28° 42.18′ E.	*(f)*	44° 10.48′ N.	28° 42.16′ E.
(g)	44° 10.99′ N.	28° 40.76′ E.	*(h)*	44° 09.77′ N.	28° 39.55′ E.

ANCHORAGE: Anchorage areas in Constantza roads are just near the new port works in an area up to 44 ft. depth. Length and breadth have no special restrictions. Actual official permitted draft for tankers 30.6 ft. will be soon improved in new tanker berths. Constantza anchorage – East approach Nr. 2. Approach is between limits of Danger Areas Nos. 3B and 3A. Width 1.7 miles, length 15.3 miles, direction 270°–090°. Centre line joins following positions.

C1: 44° 09.35′ N. 29° 02.20′ E. At 17.5 miles on bearing 091° 12′ from Constantza main lighthouse (nr. 1.5).

C2: 44° 09.35′ N. 28° 41.00′ E. At 2.25 miles on bearing 099° 12′ from Constantza main lighthouse (nr. 1.5).

On this approach non-degaussed vessels with a max. draft 12 m. may navigate.

MAX. SIZE: Vessels up to a max. draft 35 to 36 ft. may berth in Constantza. See "Tankers".

TUGS: Tugs normally join vessel near port entrance assisting them until berthing.

RADIO: Constantza coast radio station, call sign YQ1, frequency 462 kc/s. Operation – daily starting at 0650, 1250 and 1850 hrs. GMT.

VHF: Navlomar Office keeps watch on Channel 10 from 0800–1300 hrs. and 1800–2000 hrs. They listen to vessels in the harbour and in the roads.

TANKERS: 5 oil wharfs under construction capable of berthing tankers up to 80,000 d.w.t.

MEDICAL: Crew members are offered medical assistance on all working days between the hours of 0900–1200 and 1300–1700 hrs.

FUEL: *Navlomar Bunkering Service: m.t. "Moreni" and m.t. "Zemes".* With the growth of shipping traffic and the need for greater speed in the bunkering of ships, Navlomar considered it essential to provide a more efficient service. A decision was therefore taken to replace the barge by new self-propelled bunkering vessels built in a Romanian yard using improved cago handling equipment.

The new tankers are equipped to receive gas oil, fuel oil, or a blend of both, and carries a variety of marine lubricants and other petroleum products. Its wide capacity and powerful pumps ensure speedy supplying with Romanian petroleum products of the best quality.

Characteristics: Owners, Navlomar Constantza; length, 54.2 m.; breadth, 10 m.; draft, 3.63 m.; displacement, 442 tons; speed, 6.7 knots; propulsion, 2 engines, "23 August" Bucharest; pumping rates, fuel oil 180 t.p.h., gas oil 190 t.p.h.; cargo capacity, fuel oil 747 tons, gas oil 401 tons, mixture 72 tons, oil in drums 30 tons; metering, fuel oil and oil meter fitted with temperature compensator and direct volume/weight conversion.

GANGWAY/DECK WATCHMEN: Watchmen recommended for special general cargoes. Cost will be arranged through Agent.

CUSTOMS ALLOWANCE: Small quantity permitted for each crew member out of bond but may be renewed if vessel stays longer in port.

REPAIRS: Largest dry dock in Constantza has 15,000 tons lifting capacity, second dock up to 8,000 tons.

TIME: Local time is GMT plus 2 hours. In Summer GMT plus 3 hours.

HOLIDAYS: Official holidays in Romania: New Year's Days (1st and 2nd January); Easter Orthodox Monday (April); Labourer's Days (1st and 2nd May); Liberation Days (23rd and 24th August); Anniversary of Socialist Revolution (7th and 8th November); Christmas (25th and 26th December); Proclamation of the Republic (30th December).

STEVEDORES: Working hours 0800–1700 and 2000–0500 hrs. Saturday afternoons, afternoon of days before holidays, Monday mornings and days after holidays until 0800 hrs. usually exempted in C/P although work may be effected. Loading and discharging are generally effected by shippers and receivers, respectively at their own expense and they may work also on holidays, Sundays and Saturday afternoons, no overtime expenses being charged to the vessels for shore labourers but without payment of overtime to vessel's crew and without counting the time.

SHORE LEAVE: On completion of border inspection, crew can go ashore taking their Seaman's Books (or Passports) and the permits they receive from the soldier at the gangway. The permits must be returned to soldier upon coming back on board. In the event that crew members desire to visit another place outside Constantza they must inform Agent.

GENERAL: From the time a vessel enters the territorial waters of Romania until she leaves the respective zone, i.e. 12 miles, it is compulsory to fly the Romanian flag. Ships that call at Constantza for the first time and have not got the Romanian flag on board must have it ordered through the Agent immediately upon berthing.

Following is an extract from "Notice to Sailors" issued by authorities at Constantza:

1. Crew members are required to observe international rules covering work protection, port sanitation and customs regulations, and in addition, Romanian law, both within the port and outside that area.
2. In order to avoid accidents concerned with port equipment, cranes, trucks, tractors and trains etc., crew members walking inside the port area are permitted to walk only on the main streets and between the berths where their vessels are moored, and/or to entrance/exit No. 1, the Navlomar Agency, the Harbour Station, the Navlomar tax-free shop or the Seamen's clinic.
3. Crew members are required to enter or leave the port area at gate No. 1.
4. Crew members are required to be back aboard their vessels by 0400 hrs.
5. Crew members wishing to visit other zones in the country are required to obtain a visa from the ship's Agent.
6. Transportation with the port by motor-boat which leaves the Harbour Station every fifteen minutes and calls at all berths in the port, is available subject to crew members being in possession of the proscribed ticket issued by ship's Agent and duly signed and stamped by the ship's Master.
7. The tax-free shop is located next to the Harbour Station. All purchases must be retained aboard under customs control until the vessel has sailed.
8. It is forbidden, either to bring-in or to take-out Romanian currency. Such currency is obtainable from Navlomar Agency at Master's request and for Owner's account. All Romanian currency remaining in crew members possession must be returned to the Master before sailing, and the Master is required to return the currency to Navlomar.
9. The port Polyclinic is available for medical attention to crew members at the following times: Monday, Wednesday and Friday, between 1300 and 1600 hrs. Tuesday, Thursday and Saturday, between 0800 and 1300 hrs. In cases of emergency, assistance is obtainable by telephoning 16528.
10. Crew mail and messages are delivered daily by ship's Agents, and outgoing crew mail is collected for despatch at the same time.

SHIPMASTER'S REPORT: Rate of exchange is "Tourist Rate" which is approximately 3 times official rate. It is illegal to take Romanian money into or out of the country, any money which has not been spent must be returned to Agent in front of Customs when clearance is being given.

Any stages, gantlines or painting scows must be taken inboard at night. First opening and closing of hatches are for ship's account. Motor-boats operate a "taxi" service in harbour at a cost of 8 Lei per person per trip.

Bunkering barge *nr Monteoru* delivers oil at approximately 60 metric t.p.h. Control will only issue clearance after all cargo work, bunkering, etc., is completed.

At Mineral Berth iron ore is discharged by 2 large Gantry Cranes operating grabs, each working at approximately 200 t.p.h. Rate of discharge is frequently disrupted by shunting of railway trucks – 2 tracks serve 5 berths.

AGENT: Navlomar Shipping Agencies, Telex 014-259. Cables "Navlomar Constantza".

SULINA (including Galatz and Braila): 45.09 N. 29.39 E.

DOCUMENTS: Within maximum 1 hour from fulfilment of arrival formalities the Master or Chief Mate reports at the Harbour Master's Office where he hands the following documents:

Certificate of Nationality.
Tonnage Certificate.
Safety Equipment Certificate.
Load Line Certificate.
Safety Radio-telegraphy Equipment Certificate.
Safety Construction Certificate.
Cargo Gear Certificate.

The above certificates are to be valid and not to expire before ship's sailing the port, Load Line Certificate and Cargo Gear Certificate not to be older than 12 months, and same remain with the Harbour Master until ship's departure when returned through the representative of the Agency that accompanies the Control Commission on departure.

PILOTAGE: Notice of arrival to Pilot station at Sulina is to be sent in due time through Navlomar Sulina.

Sulina – S.E. approach nr. 5. Width 1.6 miles. Length 7 miles. Direction 146°–326°. Centre line joins the following positions:

S1: 45° 03.01′ N., 29° 53.4′ E. At 11.5 miles on bearing 124° 24′ from Sulina lighthouse (nr. 1.20).

S2: 45° 08.9′ N., 29° 47.9′ E. At 5.75 miles on bearing 095° 42′ from Sulina lighthouse (nr. 1.20).

Thence on the No. 01 Sulina black light and whistle buoy, and afterwards on the line of Sulina Entrance leading lights (301° 12′) into Sulina Channel and so to harbour. On this approach non-degaussed vessels with max. draft 7 m. may navigate.

The port of Galatz is situated on the left side of the Danube 79 miles from the Black Sea.

RESTRICTIONS: Vessels calling at Danube ports are obliged to wait in roadstead of Sulina, at least 1 mile away from the black buoy (a black floating cylinder marked "01" in white, which is lighted at night by green flashing light). All vessels both entering and going out of Sulina channel as well as during navigation in the channel and Danube, are obliged to have on board a Danube Administration Pilot. As a rule, entering and leaving the Sulina channel, as well as navigation in the channel, is prohibited after night-fall.

MAX. SIZE: The draft at Sulina bar is 23 ft. passable. Any other changes of official draft are broadcast daily, at 1150 hrs. on 1935 m. long wave. Galatz: Max. passable draft on River Danube is 23 ft. (7.01 m.) for vessels up to 180 m. LOA.

MINEFIELD: Danger Area nr. 7 A (Sulina). The area enclosed by the coast and by lines joining the following positions:

(a) 45° 13.27′ N. 29° 40.42′ E. *(b)* 45° 11.77′ N. 29° 41.42′ E.
(c) 45° 09.17′ N. 29° 57.22′ E. *(d)* 45° 07.37′ N. 29° 57.22′ E.
(e) 40° 03.07′ N. 29° 54.82′ E. *(f)* 45° 03.07′ N. 29° 39.34′ E.

CLEARANCE: On arrival in Sulina harbour vessel has to stop to complete border and sanitary formalities and after vessel has completed same, with Danube Administration Pilot on board, proceed to destination. After the vessel has completed manoeuvring to come alongside berth, she is boarded by the sanitary commission. If the vessel has passed the sanitary inspection she is boarded by border control commission which includes a representative of the Agency, the latter assisting the Master in fulfilling arrival formalities and facilitating meeting of any requirements on ship's part. The Master fills in a form of declaration in 3 copies which together with the Stowage, Plan, Cargo Manifest, etc., are handed to representative of the Agency upon his leaving ship. A supplementary declaration is to be completed by the Master, stating: 1. Who supports disbursements expenses (name, mail address, telegraphic address, number of telex). 2. Who supports the supplies of bunkers, provisions other services, etc. (name, mail address, telegraphic address, number of telex).

RADIO: Constantza – coast radio station. Call signal YQ1, frequency 462 kc/s. Operation daily, starting with 0650, 1250 and 1850 hrs. GMT. Contents of transmission: meteorological and navigation notices. Weather forecasts are broadcast in clear English or codified; radio notices to mariners and navigation warnings are broadcast in Romanian, Russian and English.

BERTHING: After arrival in Galatz roads and port Pilot boarded, the berthing of the vessel is done as ordered by the Port Authorities according to the possibilities of operation (loading/discharging) and to the availability of berths.

MEDICAL: Crew members are offered medical assistance if necessary when the Master requests, and they have to come to the Agency Office between 0800 and 0900 hrs. every day, except Sundays and holidays.

STEVEDORES: Working hours: 0700–1500 and 1500–2300 hrs.

CUSTOMS ALLOWANCE: For releasing cigarettes from Customs seal it is necessary to notify the Agent who, in turn, will arrange with the Customs House. Attention is drawn to the fact that bringing into or taking Romanian currency out of the country is prohibited. According to requirements of crew, the Master gets from Agent any sum of Romanian currency. The respective sum is charged in the disbursements account at official exchange rate +200% premium granted to seamen. Before departure from port the Master is obliged to return to Agent the sums of Romanian currency unspent against receipt. The sums are returned in front of the representative of the Customs during the control for departure.

OPENING/CLOSING HATCHES: Opening and closing of the hatches is to be performed by crew whenever requested due to weather conditions.

CARGO GEAR: Rigging of derricks, the good working condition of the winches and derricks, are permanent obligations of the vessel according to requirements of working gangs. The hatch ways must be opened or closed to their full size. The removable beams or covers shall always be stowed on deck on the side where work is not being carried on, so that they may not hinder working gangs or cause accidents. During operations, the vessel is recommended to close the hatches with rain tents, ship's property, if bad weather. If cargo handling gear gets out of order during operations, the waiting time of workers is charged against vessel and such time lost for breakdown of winches not to count as laytime.

SHORE LEAVE: On completion of border inspection crew can go ashore taking their Seamen's Books (or Passports) and the permits they receive from the soldier at the gangway. The permits must be returned to the soldier upon coming back on board. In the event that Crew members desire to visit another place of Galatz they shall inform the Agent.

GENERAL: From the time a vessel enters the territorial waters of Romania until she leaves the respective zone, i.e. 12 miles, it is compulsory to fly the Romanian flag. Ships that call at Galatz for the first time and have not got the Romanian flag on board must have it ordered through the Agent immediately upon berthing at Sulina Harbour. Throwing garbage overboard or pumping out dirty ballast or bilge water is allowed only beyond the territorial waters of Romania. Non-observance of these rules may result in fines varying between 3,000 and 10,000 lei imposed by the Harbour Master.

AGENT: Navlomar Shipping Agency.
Galatz: 20, 13 Junie. Telex 225. Cables "Navlomar Galatz".
Braila: 2 Imparatul Traian. Telex 10. Cables "Navlomar Braila".

St. Lawrence Seaway

ST. LAWRENCE SEAWAY (See Plan Book)

DOCUMENTS: For Agent in Montreal, 3 unfreighted copies of Complete Manifest for Seaway Toll purposes covering all cargo to be discharged in the Great Lakes.

The St. Lawrence Seaway Authority requires one Transit Declaration Form. Also for cargo to or from overseas one unfreighted copy of the complete Manifest is required.

In first U.S. port, a "Traveller" is made up by the Customs Inspector with the following documents:

2 complete sets of U.S. Cargo Manifests, plus 6 copies for Agents.
1 set Manifest of Cargo for first U.S. port.
4 Stores Lists.
4 Personal Effects Lists.
4 Firearms and Ammunition Lists.
4 Crew Lists, Form 1–418.
4 Narcotics Lists.
4 Vessel's Itinerary Lists.
Vessel's Registry and copies of Paid Tonnage Tax Certificates.
Health Pratique.
Clearance from previous port.
2 sets Bills of Lading.
3 copies Stowage Plan.

In subsequent U.S. ports the following are required:

5 sets Manifest of Cargo for that port.
The Traveller and Permit to Proceed issued in previous port.
2 Stores Lists.
2 Personal Effects Lists.
2 Firearms and Ammunition Lists.
2 Crew Lists.
2 Narcotics Lists.
2 Sets Bills of Lading.
3 copies Stowage Plan.

Vessels navigating St. Lawrence Seaway are required to complete applications for:

(1) Certificate of financial responsibility.
(2) Certificate of Insurance, form FMC 225,
(3) Oil discharge Assurity Bond, form FMC 226,
(4) Guarantee in respect of liability for discharging oil, form FMC 227.

These applications have to be filed with the Secretary of the Federal Maritime Commission before a certificate is issued. The oil pollution liability certificate should be retained aboard the vessel.

ICE ADVISORY SERVICE: Ships inbound from seaward between December 15th and April 15th should advise the Ice Information Officer, Sydney, 36 hours prior to entering Cabot Strait, stating their position, destination, whether loaded or in bulk. This procedure will facilitate the passing of ice information to the ship as necessary. Ice information is also available from radio stations at Halifax, Seven Islands, Wirringate and Grindstone. The Canadian Broadcasting Corporation Maritime Network also broadcasts ice information daily during the winter navigation season. Supplementary ice information may also be obtained from the Canadian Marine Service Icebreakers.

During the ice season, radio broadcasts of ice information are made twice daily from Marine radio stations as follows: Cape Race, Newfoundland; Fox River, Quebec; Mont-Joli, Quebec; Halifax, Nova Scotia.

PILOTAGE: The first Pilot station when entering the St. Lawrence River is at Les Escoumins, 80 miles West of Father Point. This Pilot will take the ship to the Quebec Pilot station 121 miles to the West. Off Quebec a new Pilot boards to take the ship to Trois Rivieres, where there is another change of Pilot for the remaining trip to Montreal.

Pre-clearance: Vessels intending to transit the St. Lawrence Seaway must be pre-cleared by a representative who shall assume responsibility to the authority for payment of all tolls and charges to be incurred.

Application for pre-clearance Form SLS 429 may be obtained from the St. Lawrence Seaway Authority, Cornwall, Ontario, or from the St. Lawrence Seaway Development Corp., Massena, New York.

RESTRICTIONS: The average navigation season in the Montreal–Lake Ontario section of the St. Lawrence River is from April 1st to December 15th.

Locks Nos. 1 to 7: length 262.13 m., width 24.38 m., depth 9.14 m., channel depth 8.23 m.

Welland Canal Locks: No. 1: length 263.65 m., width, 24.38 m. Nos. 2 to 7: length 261.82 m.; width, 24.38 m. No. 8: length, 420.62 m.; width, 24.38 m.; channel depth 8.23 m.

St. Mary's River Locks: MacArthur: length, 243.84 m.; width, 24.38 m. Poe: length, 365.76 m.; width, 33.53 m.; depth, 9.75 m. Davis: length, 411.48 m.; width, 24.38 m. Sadin: length, 411.48 m.; width, 24.38 m. Canadian: length, 274.32 m.; width, 17.98 m. The channel depth (lower end) to the Canadian Lock is 6.10 m., with a normal depth of 5.56 m. over the sill. As Easterly gales raise, and Westerly gales lower the water levels below the Lock temporarily, it is recommended that Masters of larger vessels ascertain the available depth from the canal office prior to locking.

Speed Limits: 8.6 knots upbound, 10.4 knots downbound in the Beauharnois Canal; 6.1 knots Port Weller Harbour and Welland By-Pass Channel and in all other canals. The speed limits vary from 8.6 knots to 15.5 knots in most remaining sections of the St. Lawrence River; Lower Detroit River 10.4 knots; St. Clair River 7.7 knots to 10.4 knots, St. Mary's River 8.6 knots to 13.0 knots. Speed limits are detailed in a seaway notice issued early in the year.

MAX. SIZE: Length 222.5 m., beam 23.16 m., draft 7.92 m. Masts must not exceed 35.5 m. above water level. Other limiting dimensions are obtained in the Seaway Regulations.

HEALTH: All ocean-going vessels must obtain a free pratique before entering the Seaway. Vessels entering the Seaway direct may receive quarantine inspection and clearance from the Canadian authorities at Montreal while at anchor awaiting entrance to the Seaway.

RADIO: *Notice of Arrival.* Master must give at least 24 hours notice to commander, 9th Coast Guard District, Cleveland, Ohio, of the vessel's ETA at Snell Lock. Also at least 24 hours notice of ETA at first U.S. discharge port is required.

St. Lawrence Seaway Authority: Every vessel shall provide at least 24 hours notice of arrival to the nearest Seaway Station, prior to an initial transit or in case reinspection of the vessel is required.

Calling In requirements are detailed in the Seaway Regulations.

Great Lakes: It is recommended that vessels within a radius of 30 nautical miles of a shore station use their FM transmitting and receiving equipment to ensure better connections. This pertains especially to vessels at anchor or in the proximity of a port or berth.

Radio Stations: Buffalo, New York, marine operator. Port Burwell, Ontario, marine operator. Geneva, Ohio, marine operator. Loraine, Ohio, marine operator. Rogers City, Michigan, marine operator.

IDENTIFICATION CARDS: In the first U.S. port, the immigration officer requires an alphabetical crew list made up on Form 1–418 and visaed by the American consul in the last overseas port. This crew list should contain the name of every crew member on board. Also needed are 3 copies of this crew list on the same form. The Immigration Officer will require all seamen's books and passports, to issue the completed crew landing permits made out on Form 1–95A. The Master will be given a crew list receipt which will indicate the names of crew members detained on board, if any. In case a crew member is detained on board, he cannot go ashore, and at irregular times an officer of the Immigration Service will check if the crew member is on board. A fine of $1,000.00 will be imposed on the vessel for each detained Crew member who is not on board.

TUGS: Whistle signals differ from those in international usage and are as follows:

1. Ship to Tug: 1 Long and 1 short (—.) = ship ready to proceed, O.K. or all right. 1 Long and 2 Short (—..) = let go the bow tow-line. 1 Long and 3 Short (—...) = let go the stern tow-line.
2. Both Ship to Tug and Tug to Ship: 1 Short(.) = work propeller ahead when stopped, *or,* stop propeller when working, either ahead or astern. 2 Short (..) = work propeller astern. 3 Short (...) = slow down or check. 4 Short (....) = work propeller strong in the same direction it is working at the time the signal is blown. 5 or more Short blasts (.....) = the standard danger signal.

SEAWAY EQUIPMENT: *Radio-telephone Equipment:* All vessels, other than pleasure craft of less than 19.81 m. in overall length, must be equipped with VHF radio telephone equipment, in addition to the FM equipment otherwise required. The radio transmitters must have sufficient power output to enable the vessels to communicate with Authority Stations from a distance of 26 nautical miles and must be fitted to operate from the wheelhouse and to communicate on 156.55, 156.6, 156.65, 156.7 and 156.8 mc/s.

Stern Anchors: Every vessel of more than 106.68 m., the keel of which was laid after January 1, 1975 is required to be equipped with a stern anchor.

Propeller Direction Alarms: Every vessel of 1,600 g.r.t. or more shall be equipped with

(a) propeller direction and shaft r.p.m. indicators located in the wheelhouse and the engine room; and

(b) visible and audible wrong-way propeller direction alarms located in the wheelhouse and the engine room, unless the vessel is fitted with a device which renders it impossible to operate engines against orders from the bridge telegraph.

Sewage and Galley Waste Disposal Systems: Sewage retention tanks and galley waste grease traps are required for vessels not otherwise equipped with containers for ordures. At Montreal, or at Port Colborne, vessels without retention tanks intending to call at Chicago must put on board chemical toilets which are offered for rental by 2 chemical companies. 2 to 10 chemical toilets are required for each ship at a rental charge of $75.00 each per trip into the Lakes.

Oily Water separators: Vessels which cannot contain waste oil products are required to be equipped with oily water separators or other such equipment for the extraction of oil products from waste water before discharge.

Vessels not fitted for the Seaway as prescribed above, will incur expenses for the rental, installation and removal of compulsory fittings.

POLLUTION:

1. No vessel shall
   (a) omit sparks or excessive smoke; or
   (b) blow boiler tubes.
2. No vessel shall discharge into Seaway waters any substances not in conformity with applicable United States Federal Regulations and Canadian Regulations with the exception of the waters of the Welland Canal where two specific zones are established in which no substances shall be discharged, namely:
   (a) from lock 7 to mile 17; and
   (b) from lock 8 to the outer Port Colborne piers.

REGULATIONS: For additional information on regulations and procedures, Masters and Owners are urged to refer to the Seaway Handbook and Seaway Notices.

AUTHORITY: The St. Lawrence Seaway Authority.

St. Pierre and Miquelon

ST. PIERRE: 46.47 N. 56.10 W. (See Plan Book)

DOCUMENTS: Formalities completed on arrival. Advise Port Service beforehand of vessels ETA, length, tonnage and draft 24 hrs. before arrival.

Declaration of Health.
Derat Certificate.
2 Crew Lists.
2 Passenger Lists.
2 Cargo Manifests of any cargo to be discharged.
2 Crew Declarations (tobacco, liquor, souvenirs).
Certificate of Registry.

PILOTAGE: Contact Pilot 1 hour before arrival calling TXU by radio telephone on 2182 kc/s. or VHF Channel 16. Permanent watch kept. Pilot boats equipped with VHF Channel 12, radar, and radio-telephone. Pilot launch available at entrance to N.E. channel in position 46° 48′ N. 56° 08′ W. in the vicinity of the Land Fall Buoy.

Pilot launch named *Radar*, length 45 ft. The hull is black and superstructure white with "Pilote" painted on each side. Pilot launch carries the International Signals for pilot launch day and night.

When the weather is bad contact Pilot on Channel 12 for instructions.

Pilot is compulsory for vessel of 150 g.r.t. and over.

ANCHORAGE: In the roads, depth 13 m., not secure in strong East winds.

Shipmaster's Report: The anchorage in the roads where fish is loaded ex-trawlers is absolutely not secure, even with moderate winds from any direction, and engines should be on stand-by continuously. Several ships have gone on the rocks in a matter of minutes.

MAX. SIZE: Max. draft 8 m. New Port: max. length 110 m. Old Port: max. length 70 m. Channel depth 5 m. below chart datum.

HEALTH: If suspected disease on board contact St. Pierre Health Service, tel. 41.21.11.

Masters of vessels arriving at St. Pierre may obtain free pratique via TXU. Message to be sent to Harbour Master Saint Pierre 24 hours before arrival.

In the message the Master has to specify name of vessel, total number of crew member,. where ship coming from, and if everybody on board healthy; in these conditions flag "Q" is not necessary on arrival, but if any suspected disease or fever on board, advise Health Authority as well as Agent, and stand by instructions for berthing. Flag "Q" has to be flown on arrival in the roads.

RADIO: St. Pierre Radio, call sign TXU, receiving on 2182 kc/s. transmitting on 2410 kc/s.

Masters of vessels arriving are requested to send their ETA to Harbour Master Saint Pierre 24 hours before arrival and corrected by a further message if necessary. The ETA should be GMT. Also advise maximum draft and length.

Saint Pierre Radio is equipped with VHF Channels 16 and 25 and maintains permanent watch on Channel 16.

TUGS: No tugs available but the pilot launch (230 h.p.) will assist on Master's request.

BERTHING: Mole du Commerce; length 170 m., depth alongside 8.50 m.

Quai de Peche: length 135 m., depth alongside 6 to 7 m. Roll-on/Roll-off terminal, one ramp, max. capacity 50 tons, one shed 1,000 sq.m. for empty containers.

Mole Frigorifique: 3 berths, No. 1; 120 m. length, 7 m. depth. No. 2; 85 m. length, 6 m. depth. No. 3; 120 m. length, 5.5 m. depth.

Old Port: Quai de la Douane: length 123 m., depth 6 m.

Quai de l'Alysse: length 50 m., depth, 6 m.

Pilot will inform Master of berthing prospects and any special requirements.

STEVEDORES: ETA notices are to be sent to Agent 24 hours prior arrival. Stevedore in Saint Pierre is Paturel Freres (tel. 41.32.95 and 41.32.96). Cable Address "Reltupa Saint Pierre". Telex Reltupa 20 QN.

Approximately 60 men are available for working on board vessels when loading/discharging or transhipping in the port. Crew are allowed to work only when no gangs are available.

One normal shift 0730 to 1600 hrs. every week-day, Saturday 0730 to 1200 hrs.:

Day overtime, every day 1600 hrs. to 1900 hrs. Saturday 1200 to 1600 hrs.

Work done with ship's derricks.

It is requested that a net be put under the gangway before starting work.

Pallets, slings, fork-lift and crane (5 tons) available at a charge.

TANKERS: 1 berth alongside dolphins in depth of 8.50 m.

MEDICAL: All facilities available.

FRESH WATER: Available at berths. Supplied by hoses, rate 25 cu.m./hr.

FUEL: Only diesel oil SG 825/840 at 15° C available at all berths.

OPENING/CLOSING HATCHES: Normally carried out by crew.

IDENTIFICATION CARDS: Each man to carry passport or seamen's book.

CONSULS: Local representatives for Canada, Netherlands, Norway, Portugal and Spain.

REPAIRS: Small repairs can be effected. Floating dock, capacity 550 tons, for vessels up to 13 ft. 6 in. draft.

REPATRIATION: Can be arranged.

TIME: GMT minus 3 hours all the year round.

AMBULANCE: Telephone: 41.21.11 and 41.21.12.

AIRPORTS: Connections from St. Pierre to Sydney (Nova Scotia) International Airport.

TELEPHONES: Not possible to place telephones on board. It is possible to contact the shore on Channel 16 via Saint Pierre Radio.

SERVICES: Compass adjusting, radar repairs, radio, Decca, Loran and gyro-compass repairs and maintenance possible.

AUTHORITY: Officier de Port.

Saudi Arabia

GENERAL

TRAVEL FROM BAHRAIN: Travel is permitted from Bahrain to Saudi Arabia, *provided* travellers *(a)* hold a valid International Vaccination Certificate showing that the holder was immunised at least 5 days before travelling to Saudi Arabia, but not more than 3 months previously; *(b)* that any traveller proceeding to Saudi Arabia from Bahrain should have taken the prescribed doses of Tetracycline over the 48-hour period immediately before travelling. The fact that the passenger has taken the Tetracycline should be certified by the Bahrain Health Department.

AUTHORITY: The Ports Authority of the Kingdom of Saudi Arabia formulates policy for and supervises the management and operation of the following ports:

West Coast:	
Main Ports:	
Jeddah Islamic Port	21° 28′ N., 39° 10′ E.
Yanbu Commercial Port	24° 05′ N., 38° 03′ E.
Gizan	16° 54′ N., 42° 29′ E.
Minor Ports:	
Haql	29° 15′ N., 34° 56′ E.
Al-Khuraibah	28° 04′ N., 35° 10′ E.
Dhuba	27° 20′ N., 35° 45′ E.
Al Wajh	26° 18′ N., 36° 24′ E.
Umm Lajj	25° 05′ N., 37° 15′ E.
Rabigh	22° 48′ N., 39° 01′ E.
Al Laith	20° 09′ N., 40° 16′ E.
Al Qunfudah	19° 08′ N., 41° 04′ E.
Al Qahmah	18° 01′ N., 41° 41′ E.
Farasan	16° 43′ N., 42° 00′ E.
East Coast:	
Main Ports:	
King Abdul Aziz Port, Dammam	26° 30′ N., 50° 12′ E.
Jubail, Commercial and Industrial Ports	27° 01′ N., 49° 40′ E.
Minor Ports:	
Qatif	26° 34′ N., 50° 00′ E.
Darin	26° 32′ N., 50° 04′ E.
Al Khobar	26° 17′ N., 50° 13′ E.
Al Ugayr	25° 39′ N., 50° 13′ E.

RULES/REGULATIONS: The Saudi Ports Authority has issued a set of rules and regulations for Saudi Arabian seaports. These rules and regulations became effective on September 10th, 1980.

Every vessel arriving in a port of the Kingdom must have a copy of these on board or must obtain one immediately on first arrival.

Hereunder follows an extract from these rules and regulations:

General Regulations for Cargo Stowage and Handling:

1. The stowage of cargo bound for ports in the Kingdom of Saudi Arabia must be arranged to ensure simultaneous and optimum rate of discharge from the maximum number of hatches compatible with the requirements of seaworthiness.

2. Where practicable all general and bagged cargo of uniform type and size is to be stacked and secured on pallets to facilitate quick discharge when shipped to the Kingdom of Saudi Arabia in conventional vessels.

3. Exceptions to palletisation:
   a. Bagged cargoes may be pre-slung.
   b. Bagged cargoes arriving in full ship loads may be discharged loose provided that such cargo is taken by direct delivery and a minimum discharge rate of 1,200 tons per 24 hours is guaranteed.
      Bagged cargoes arriving in part ship loads may be discharged loose provided that such cargoes are taken by direct delivery and a minimum discharge rate of 250 tons per hook per 24 hours is guaranteed.
   c. Foodstuffs, if palletisation would adversely affect the total distribution costs, but the stowage must be arranged to obtain optimum discharge rates.
   d. Cargo carried on schooners and small craft of less than 70 m. in length which are engaged in coastal trade within the Arabian Gulf, the Red Sea and to/from Somali ports.

The weight per bag shall not exceed 50 kg.

4. Tyres should be in bundles of appropriate size or pre-slung.

5. Bundled steel, profile iron, rebars etc., shall be fitted with slings or lifting points suitable for multiple handling.

6. Steel sheets shall be strapped and stacked in bundles of approximately 2 tonnes each. Wooden bearers and/or spacers shall be used in loading the bundles to facilitate discharge.

7. Pallets must be stowed in a ship's hold in a manner to facilitate discharge and make the best use of cargo handling equipment within the holds.

8. All cargo listed on the dangerous cargo list according to IMCO rules must be stowed and handled as prescribed.

9. Masters and shipping Agents are to instruct their stevedoring contractors at loading ports to execute complete separation in accordance with bills of lading and the manifest, and will be held responsible for non-compliance with this regulation.

10. Comprehensive regulations govern the carriage of livestock by sea and their handling at ports in the Kingdom of Saudi Arabia, also the carriage and handling of bagged oil cake and scrap.

Unitisation of Timber:

11. Sawn timber, plywood and veneer is to be unitised. Timber cargoes shall be properly strapped to withstand multiple handling. Bundles shall be separated by skids or dunnage to facilitate lifting or handling by forklifts. Each bundle should weigh between 2 and 3 tonnes.

Bagged Cement, Lime, Gypsum and Similarly Packed Cargo:

12. Bagged cement in paper bags must be packed in 5-ply strengthened paper supported by an inner skin of polythene or similar waterproof material. If there is no synthetic layer, the bag must be made of extra-strengthened paper (minimum 6-ply), or of materials whose proven strength is at least equivalent to the above.

In the square of each workable hatch opening within the plumb of the ship's discharging gear, a block of bagged cement must be left in pre-slung form in flat straps capable of lifting the bagged cement in safe working loads without damaging the packaging. This block must have dimensions of at least 6 m. × 9 m. horizontally and these dimensions must be maintained down to the bottom layer.

(Additional regulations apply.)

13. The Master of any vessel carrying grain to a port in the Kingdom of Saudi Arabia, whether in bulk or in bags, shall present an official certificate from the country of origin stating that the cargo is free from infestation and that it has been fumigated either before or after loading, in addition to a certificate stating that the vessel was free of infestation prior to commencement of loading.

14. The discharge of cargo for transhipment to another port, whether in or outside the Kingdom is strictly forbidden.

The transfer of cargo from one vessel to another at anchorage or alongside berths at any Saudi port is strictly forbidden.

PORT REGULATIONS:
ARRIVAL:

1. Notification to the Port Management

1.1 The Owners of vessels bound for a port in the Kingdom of Saudi Arabia with cargo must give preliminary notice of the vessel's intended arrival to the Port Management of the discharge port or ports by telex or cable either directly or through the vessel's Agents on arrival at the first or sole loading port, before loading commences. Estimated time of arrival and estimated quantity of cargo by type must be given with the preliminary notice.

1.2 On completion of loading cargo for Saudi ports the following information must be sent to the Port Management of the discharge port or ports by telex or cable either directly or through the vessel's Agents:

a. Vessel's name and former names, if any.
b. Flag, port of registry and call sign.
c. Length overall, g.r.t., n.r.t. and d.w.t.
d. Expected draft on arrival.
e. Expected time of arrival.
f. Cargo particulars, including nature, weight, tonnage and stowage by hatches, car carriers, ro/ro and container vessels to give both number and weight in tonnes of each type of unit.
g. Any other cargo being carried for other destinations.
h. If dangerous cargo is being carried, the quantity and class must be indicated in accordance with the IMDG code and it must be stated whether this cargo is to be discharged or is in transit.
i. Number, position and S.W.L. of derricks and/or cranes, and particulars and positions of ramps.
j. The number and nationalities of passengers to be disembarked or in transit.
k. Expected requirements for bunkers and water.
l. Name of vessel's Agent.

1.3 A vessel bound for a port in the Kingdom of Saudi Arabia for loading or bunkering must notify the Port Management immediately orders have been received to proceed to Saudi Arabia giving the information as in 1.2 above but relevant for loading or bunkering

1.4 A further notice of ETA is to be sent 5 days, 2 days and 1 day prior to arrival at the port.

2. Vessels Failing to Give Required Notifications

2.1 Any vessel failing to comply with the requirements under section 1 above or arriving later than expected under the revised ETA, may lose its berthing registration and will be held responsible for all expenses incurred by the Port Management.

2.2 Exemption from the requirements listed under paragraph 1 above may be granted by the Port Management to vessels engaged in coastal trading or which have departed from a neighbouring country, depending on the possibilities of proper communication between the relevant ports, and the duration of the vessel's voyage.

3. Permission to Enter Port

3.1 The Master of a seagoing vessel must have prior permission of the Port Management to enter the port. Such permission may be subject to special restrictions or conditions if:

a. The vessel arrives before or after the given ETA;
b. The vessel is in danger of sinking;
c. The vessel or the cargo is on fire or if there is the possibility of a fire, or if after a fire, it is uncertain whether it is completely extinguished;
d. The vessel is a tanker;
e. On account of the vessel's size or construction its movements or that of any other vessels or the port operations are endangered, hindered or impeded;
f. On account of the condition of the cargo, the vessel is dangerous;
g. The vessel arrives under tow;
h. The vessel is over-loaded;
i. The vessel has any person or animal on board suffering from an infectious or contagious disease, or if the presence of such infection, contagious or epidemic disease is suspected on board;
j. The vessel is powered by nuclear energy, the arrival of such a vessel must be notified in accordance with the requirements as prescribed in section 1;
k. If the vessel carries deck cargo which extends beyond her side.

4. Registration for Berthing

4.1 Vessels will be registered for berthing in accordance with the time given for arrival in the revised ETA. The Port Management reserves the right to refuse registration or to cancel the registration of any vessel already registered if required by port operations or for any infringement of these regulations by the vessel.

Sambuks, schooners or yachts without radio transmitting equipment shall register at the port control signal station (Harbour Master) immediately after berthing.

5. Priority for Berthing

5.1 Allocation of berths shall be under the control of the Port Management who, in case of excess demand on facilities, shall have the power to use their discretion to give priority to:

a. Vessels carrying passengers or pilgrims;
b. Vessels carrying livestock;
c. Vessels carrying essential or perishable foodstuffs;
d. Vessels carrying refrigerated cargo;
e. Any other vessel for special reasons.

6. Papers and Documents Required (see also special requirements for Jeddah Islamic Port and King Abdul Aziz Port Dammam).

6.1 *Vessel's Papers and Documents*

6.1.1 On arrival at any port in the Kingdom of Saudi Arabia the Master of each vessel shall present or make available for inspection the following papers and documents:

a. Log Books;
b. Registration Certificate;
c. Classification Certificate;
d. Load-line Certificate;
e. Building Safety Certificate;
f. Safety Equipment Certificate;
g. Radio and Wireless Certificate;
h. Cargo Gear Certificate;
i. Marine Health Declaration;
j. Vaccination Certificate;
k. Rat-free Certificate;
l. Clearance from the Last Port of Call;
m. Israel Boycott Declaration;
n. Ships Stores List;
o. Grain Shipping Certificate if the vessel is carrying a grain shipment;
p. Mail Transport documents in accordance with the "International Postal Treaty" if any mail is carried aboard;
q. 5 Copies Crew List including name, nationality, date and place of birth, passport number and rank;
r. 5 Copies of the Passenger List including name, nationality, date and place of birth, passport number, port of embarkation, port of disembarkation;
s. 2 Copies of the List of Personal Effects of Crew and Passengers.

6.1.2 To obtain port clearance the Master of the vessel shall present or make available for inspection the following papers and documents to Port Management:

a. Log Book;
b. Registration Certificate;
c. Classification Certificate;
d. Load-line Certificate;
e. Building Safety Certificate;
f. Safety Equipment Certificate;
g. Radio and Wireless Certificate;
h. Port Stevedore Outturn Reports;
i. Receipt for Payment of Custom's Duties;
j. Shipping Note and Cargo Manifest for any cargo loaded.

6.2 *Cargo Papers and Documents*

6.2.1 The following papers and documents must be submitted to the Port Management not later than 48 hours prior to arrival (exemptions may be granted under certain circumstances at the discretion of the Port Management):

a. 5 Copies of the Cargo Manifests for Discharge; including any additions or amendments in English; 10 Copies of the original manifests accurately translated into Arabic;
b. 2 Copies of the Cargo Stowage Plan;
c. 2 Copies of the Hatch List or Bay Plan;
d. 2 Copies of the List of Dangerous/Hazardous Cargo for Discharge;
e. 2 Copies of the List of Dangerous/Hazardous Cargo in Transit;
f. 2 Copies of the List of Heavy and/or Awkward Cargo which requires special equipment;
g. 2 Copies of the List of any Wine, Spirits and Narcotics or Cargo of such nature on the vessel and its location or, in the absence of which, a nil return;
h. A Declaration of type of reefer cargo;
i. An Application for discharge permit.

6.2.2 *Specifications*

a. All copies of the manifests must be taken from the Master Manifest.
b. The consignee column in all cargo manifests shall include the full name and address of the consignee. If for legal/commercial reasons a bank or financial institution appears as consignee in the cargo manifest, the name of the final consignee, if known, has to be shown beside the name of the bank.
c. In case of transhipped cargo, the cargo manifest must show the name of the pre-carrying vessel, the port of transhipment and the bill of lading number for each consignment.
d. The List of Dangerous/Hazardous Cargo must show:
   (i) The technical name;
   (ii) The IMDG code class and UN number;
   (iii) The Quantity of each consignment;
   (iv) The location on board and bay number, if stowed in containers, or lash barges or on trailers.

6.2.3 *Exceptions*

a. Vessels will be allowed to produce the aforementioned papers on arrival, provided the Port Management has received the following details by telex not less than 24 hours prior to arrival:
   (i) Name and flag of vessel;
   (ii) Port(s) of loading;
   (iii) Bill of lading numbers;
   (iv) Marks and numbers as per bills of lading;
   (v) List of dangerous/hazardous cargo;
   (vi) List of heavy packages above 3 tonnes and/or awkward cargo lifts;
   (vii) Total number of bills of lading. LASH operators shall relate bills of lading to specific barge numbers;
   (viii) Statement of wine and spirit shipments for other ports showing where stowed or in the absence of which a nil return.
b. A vessel carrying more than 200 bills of lading consignments for discharge in any one Saudi port is requested to submit cargo manifests not later than 72 hours prior to arrival.

7. Exempted Vessels

Exempted from the provision of regulations 1, 2 and 4 are vessels entering in case of:

a. Distress;
b. Emergency refuge;
c. Force majeure;
d. Need of medical assistance.

8. Signals and Approach

8.1 Every vessel approaching the limits of a port must hoist the following flags:

a. Ship's signal letters (in case of VHF failure);
b. International code 'Q'-flag(s) in accordance with international health and safety regulations;
c. International code 'B'-flag if the vessel is carrying dangerous goods or hazardous materials;
d. The national flag of the country to which the vessel belongs.

9. The Flag of the Kingdom of Saudi Arabia

9.1 Every vessel entering a Saudi port must hoist the flag of the Kingdom of Saudi Arabia and keep it flying at all times throughout the stay in the port.

10. Pilotage

Pilotage is compulsory for all vessels entering or navigating within or leaving the pilot zones in the Kingdom of Saudi Arabia.

10.1 *Exempted Vessels*

The following vessels are exempted from the provisions of compulsory pilotage:

a. Saudi Warships;
b. Vessels of the government of the Kingdom of Saudi Arabia not designated for commercial use;
c. Vessels under 150 net registered tons;
d. Craft employed solely within port limits;
e. Yachts and pleasure craft;
f. Vessels operated by Port Management;

10.2 *Pilot Signals*

Every vessel subject to compulsory pilotage as above and which requires a Pilot shall:

a. From sunrise to sunset hoist the international code flag "G";
b. From sunset to sunrise give the letter "G"(– – ·) by a signal lamp;
c. In the event of poor visibility caused by rain, fog or dust, sound the signal "G" (– – ·).

Vessels equipped with VHF should call the Port Control Signal Station on frequencies published by the port as soon as the vessel enters within VHF range.

Vessels having a Pilot on board must hoist the international code flag "H".

11. Valid Cargo Gear Certificate

All vessels must have a valid Cargo Gear Certificate issued by one of the following societies approved by the Ports Authority:

1. American Bureau of Shipping.
2. Bureau Veritas.
3. Det Norske Veritas.
4. Germanischer Lloyd.
5. Lloyd's Register of Shipping.
6. Nippon Kaiji Kyokai.
7. Polski Rejestr Statkow.
8. International Cargo Gear Bureau Inc.

or any other competent authority recognised by the Government of the country in which the certificates are issued.

12. Rates and Charges

Some rates and charges are currently under revision and might be changed in the near future.

AL KHOBAR: 26.17 N. 50.13 E.

Also see "General" before first port.

PORT LIMITS:

Harbour Boundaries:

All shore-based port property enclosed by a fence following the shore line extending seawards to a line running between the following points:

Latitude: 26° 16′ 12″ N.	Longitude: 50° 12′ 54″ E.
Latitude: 26° 16′ 12″ N.	Longitude: 50° 13′ 18″ E.
Latitude: 26° 12′ 00″ N.	Longitude: 50° 13′ 36″ E.
Latitude: 26° 12′ 00″ N.	Longitude: 50° 19′ 20″ E.
Latitude: 26° 17′ 12″ N.	Longitude: 50° 19′ 20″ E.
Latitude: 26° 17′ 12″ N.	Longitude: 50° 13′ 06″ E.

PILOTAGE/ANCHORAGE/RADIO: There are no official anchorages, Pilots or radio facilities at Al-Khobar port, which is only used by small craft.

BERTHING:

Berth	*Length (m.)*	*Depth (m.)*	*Remarks*
Total	500	3.4	General cargo and passenger, including a 10 m. wide quay ramp.

Total shed area (3 sheds): 8,200 sq.m.
Total open storage area: 6,900 sq.m.
Vehicle parking area: 6,900 sq.m. (inside security).
11,400 sq.m. (outside security).
Passenger terminal: 750 sq.m.

EQUIPMENT:
Forklifts: A fleet of 5 and 10 ton units.
Mobile cranes: A fleet of 15 and 30 ton hydraulic units.

AUTHORITY: Al-Khobar Port Management.

AGENT: See "Dammam".

DAMMAM: 26.30 N. 50.12 E. (See Plan Book)

Also see "General" before first port.

LOCATION: Situated approximately mid way along the Eastern coast. It is the principal Port of Saudi Arabia in the Arabian Gulf.

PORT LIMITS: The Seaward Limits of the Port of Dammam are bounded by a line joining the following positions:

26° 28′ 34″ North	50° 10′ 48″ East
26° 29′ 06″ North	50° 09′ 00″ East
26° 34′ 00″ North	50° 09′ 00″ East
26° 34′ 00″ North	50° 10′ 00″ East
26° 34′ 20″ North	50° 10′ 44″ East
26° 37′ 45″ North	50° 14′ 42″ East
26° 37′ 45″ North	50° 16′ 00″ East
26° 26′ 30″ North	50° 16′ 00″ East
26° 26′ 30″ North	50° 11′ 48″ East

and thence a line 2,000 m. distant from the Causeway.

Within the Port Limits the Dammam approach channel is marked by buoys in accordance with IALA "system A". Depth of the approach is 15 m.

IMPORTANT RULES:
The most important rules are summarised below:–

(i) Every vessel calling at Dammam must make an appointment (See "Vessel Appointments").
(ii) Every vessel (or Agent) must submit appropriate documentation prior to arrival (See "Documents").
(iii) Any vessel over 15 years old shall obtain and submit a certificate issued by a competent and approved authority that her cargo gear is in good working order before being allowed to discharge.
(iv) All cargo that is suitable shall be presented in unit loads on pallets or pre-slung.
(v) No cargo shall be received into Port premises in a damaged condition.
(vi) Every vessel shall be ready to discharge upon berthing. She shall continue discharging uninterrupted until all Dammam cargo is completed, whereupon she shall leave the berth without delay.
(vii) Overstowing Dammam cargo with cargo destined for another Port is prohibited.
(viii) Transhipping cargo in Dammam for other Ports is not allowed.
(ix) Cargo which is not removed from the Port by Consignees within 15 days is liable to be auctioned and sold.

FLAG: In addition to the quarantine signals which are to be shown until pratique is granted, the Saudi Arabian Flag must be flown from vessel's foremast while in port of Dammam. Saudi flags can be hired or purchased locally.

DOCUMENTS: Also see "Health", and "General" before first port.

In order to cope with Port, Customs and Agent's requirements, following documents should be submitted to the Port Management via the Agent, at least 48 hours prior to arrival of vessel at Dammam port:
15 copies of Cargo Manifest for each port of loading (which must include four copies in Arabic), all typed, stamped and signed.
4 copies of Freight Manifest.
4 copies of Hatch List.
4 copies of Stowage Plan.
Copy of each Bills of Lading.
List of Heavy Lifts.
List of Long Length Cargo.
List of Dangerous Cargo on board, if any.

The particulars of the certificates required by the SOLAS regulations are entered on the Ports Form on the arrival of the vessel at the anchorage and the certificates are sighted after berthing.

PILOTAGE: Pilotage is compulsory at Dammam Port, except for:
Saudi Warships.
Vessels of Saudi Arabian Government which are not assigned for commercial use.
Ships whose net tonnage is less than 150 tonnes.
Marine Craft belonging to the Port.
Pleasure Yachts.

Pilot Boarding Area: The Pilot boarding area is normally in the vicinity of Buoys "D39" and "D40".

Vessels must not proceed inward past buoy "D39" without the services of a Pilot.

Port Radio Control: (Also see "VHF"). Dammam Port VHF radio station operates on International Channels 12, 13, 16, 19 and 22. Vessels requiring a Pilot should call "Dammam Port Control" on Channel 16.

Regulations for vessels entering or leaving the Port:

(i) Prior to vessels entering the Ras Tanura channel they must contact "Ras Tanura Radar Control" on VHF Channel 10. Identify themselves and state where bound. This will automatically lock them into the computerised radar identification and advisory system. Normal listening watch should then be maintained on Channel 16.
(ii) Vessels bound for Dammam must call "Dammam Port Control" 1 hour before the vessel's arrival at Buoy "D27" and give the following information:–
Vessel's name.
Length overall.
Max. draft.
Cargo tonnage and main commodity.
Hazardous cargo, if any.
Has the vessel a list?
Has the vessel any mechanical defects?
(iii) Vessels must not enter or navigate within the Port Limits without the permission of Dammam Port Control. Inward vessels shall report the time of passing Buoy "D27" and shall keep a listening watch on Channel 16.
(iv) The speed of vessels within the buoyed channel is limited to 8 knots and overtaking other vessels within the channel is prohibited.
(v) The Compulsory Pilotage Zone commences at Buoy "D39" and vessels must not proceed inwards past Buoy "D39" without the services of a Pilot.
(vi) Anchoring within the buoyed channel is prohibited.

ANCHORAGE: The following anchorages are allocated as necessary for vessels:

(i) *Holding Anchorage:* (Depth 15m.) bounded by a line joining the following positions:

26° 31′ 42″ North	50° 11′ 29″ East
26° 31′ 52″ North	50° 10′ 00″ East
26° 33′ 24″ North	50° 10′ 00″ East
26° 33′ 46″ North	50° 10′ 47″ East
26° 32′ 29″ North	50° 10′ 43″ East

(ii) *Working Anchorage:* (Depth 10 m.) bounded by a line joining the following positions:

26° 32′ 11″ North	50° 11′ 33″ East
26° 32′ 27″ North	50° 12′ 03″ East
26° 31′ 27″ North	50° 12′ 58″ East
26° 31′ 00″ North	50° 12′ 43″ East

(iii) *Explosive Anchorage:* (Depth 8 m.) bounded by a line joining the following positions:

26° 30′ 53″ North	50° 12′ 55″ East
26° 31′ 23″ North	50° 13′ 05″ East
26° 31′ 18″ North	50° 13′ 33″ East
26° 30′ 53″ North	50° 13′ 33″ East

(iv) *Small Craft Anchorage:* (Depth 6.5 m.) bounded by a line joining the following positions:

26° 30′ 00″ North	50° 13′ 33″ East
26° 30′ 45″ North	50° 12′ 50″ East
26° 30′ 45″ North	50° 14′ 00″ East
26° 30′ 00″ North	50° 14′ 00″ East

WEATHER: The peninsula of Saudi Arabia is almost of an equatorial climate. In Winter the temperature is rather low but in Summertime it rises to over 50 degrees Centigrade. Rain is generally scarce. During major part of year, but especially during Summer, the relative humidity is high. From July to September it frequently exceeds 85%.

Winds in this area are not predictable for more than a few hours. They vary in strength and direction, although prevailing winds are from N.W.

TIDE: The Diurnal tide range at Dammam Port is approximately 2.45 m. at Springs, and 1.52 m. at Neaps. The flood tide sets to the S.E. across the harbour entrance and the ebb tide sets to the N.W. The rate of flow is very much dependent on the wind force and direction but seldom exceeds 2 knots.

MAX. SIZE: See "Berthing".

HEALTH: In accordance with international practice, quarantine signals must be displayed by all vessels approaching Dammam port. These signals shall be displayed continuously until pratique granted. Such signals are the following: Sunrise to sunset – Quarantine Flag; Sunset to sunrise – Signal Lights – red over white.

The Quarantine Officer will board the vessel either at anchorage or at pier.

Documents required for immediate inspection are the following:
International Maritime Health Certificate (from the last port).
Valid Deratisation or Deratisation Exemption Certificate.
Crew List (3 copies).
Passenger List, if any.
Valid Cholera Certificates (of a date not exceeding 3 months) for all crew members and passengers.
Valid Yellow Fever Certificates for all crew members and passengers.
Certificates of Inoculation against any communicable diseases prevailing at the ports of departure.
Ship's Log Books.

RADIO: (Also see "Agents", "Pilotage" and "Vessel Appointments").

Dammam Port has now established a modern radio communications system as follows:

(i) *VHF* – (Call sign "Dammam Port Control") maintains a continuous listening watch on Channel 16.
Working Channels are: Channels 12, 13, 19 and 22.
(ii) *H.F.* – (Call sign "Dammam Port Radio") maintains a continuous listening watch on 2182 kHz.
Working frequencies are: 2670, 2694 and 2775 kHz.
(iii) *Radio Telephone* – Facilities are available.

Note: International VHF Channels 68, 69, 71 and 73 are used for port Pilotage operations. Vessels must NOT use these Channels when in the vicinity of Dammam Port.

Telex: Dammam Port is connected to the International Telex network. The telex address is 601138 or 39 DAMPA SJ.

Information is available from "Dammam Port Control" covering local weather conditions and any local hazards to navigation that may be appropriate from time to time. For the future, it is planned to give assistance to shipping, navigating locally, by providing radar coverage and assistance.

VESSEL APPOINTMENTS: (See also "Radio").

It is a pre-requisite for all vessels trading to any Saudi Arabian Port to give the following information by telex:

(a) As soon as possible after leaving the final Port of Loading bound for Saudi Arabia:

1. Radio code (Call sign).
2. Vessel's name.
3. Owner/Line.
4. Nationality.
5. Agent.
6. Length overall (metres).
7. Maximum draft (metres).
8. Number of hatches.
9. Gross registered tonnage.
10. Nett registered tonnage.
11. Deadweight tonnage.
12. Previous name (if any).
13. Type of vessel.
14. Type of cargo.
15. Total cargo weight tons.
16. Total cargo freight tons.
17. Number of containers/units (where applicable).
18. Number of livestock (where applicable).
19. Estimated time of arrival.
20. Actual arrival draft.
21. Tonnage to hatch.

The name of vessel *and radio code* should be given in every subsequent telex for reference.

The absence of any of the above information may delay the granting of any entry date to the subject vessel.

(b) The above information must be backed up by further confirmation of ETA at 5 days, 2 days and 1 day prior to arrival at each port of call in Saudi Arabia.

Note: Penalties may be imposed by the Saudi Ports Authority if the above rules are not strictly adhered to.

VHF: See "Radio".

TUGS: Dammam Port has a large and varied fleet of Marine Craft to cover all the needs of marine operations, as follows:–

Tugs (Total 14):

2 × 2,800 h.p.	3 × 950 h.p.
2 × 1,450 h.p.	4 × 800 h.p.
1 × 1,350 h.p.	1 × 460 h.p.
1 × 1,300 h.p.	

Launches for handling mooring ropes	4
Pilot launches	2
Fire fighting vessel	1
Inspection launch	1
Survey launch (fitted with latest Computerised survey equipment)	1
On order for delivery in 1980:	
Buoyage Tender	1
Floating Incinerator	1

The Port's tugs are available to assist vessels in mooring or unmooring.

BERTHING: (Also see "Vessel Appointments"). The Port has 38 working berths for deep-sea vessels. They are located on 4 quays as follows:–

Berth Nos. 1 – 13: (King Abdul Aziz Pier) (Total length 2,500 m approx.)		
Nos. 1, 2 and 3	Each length 240 m.	Depth alongside 14 m.
Nos. 4, 5, 11, 12 and 13	Each length 180 m.	Depth alongside 12 m.
Nos. 6, 7 and 8	Each length 150 m.	Depth alongside 9 m.
No. 9	Length 179 m.	Depth alongside 9 m.
No. 10	Length 215 m.	Depth alongside 11 m.
Berth Nos. 14 – 22: (East Port) (Total length 1,750 m. approx.).		
Nos. 14 – 20	Each length 180 m.	Depth alongside 12 m.
Nos. 21 – 22	Each length 240 m.	Depth alongside 14 m.
Berth Nos. 23 – 35: (West Port) (Total length 2,800 m. approx.)		
Nos. 23 – 29	Each length 240 m.	Depth alongside 14 m.
Nos. 30 – 35	Each length 180 m.	Depth alongside 12 m.
Berth Nos. 36 – 38: (West Port) (Total length 550 m. approx.)		
Nos. 36 – 38	Each length 180 m.	Depth alongside 12 m.

Note:– This quay can be extended by a further 3,400 m. approximately when additional berths are required in the future.

To the South of the East Port quay a Small Craft Harbour is situated for handling small vessels and a considerable amount of barge traffic (mainly LASH). Depth of water varies from 6 m. to 4.5 m. The purpose built facilities provide in excess of 1,600 m. of quay, large back-up areas and covered storage.

Specialised Berths: Nos. 14, 22, 23, 35, and 36 are equipped with ro/ro ramps to accommodate vessels with stern or bow access.

Container Terminals: 2 are currently located, firstly at Berth Nos. 22, Dammam Container Terminal East (DCTE) and, secondly, at Berth Nos. 23, 24 and 25, Dammam Container Terminal West (DCTW). However, in mid-1980 the DCTE operation will transfer to DCTW and the latter Terminal will be extended to include Berth No. 26 together with the back-up areas of Berth Nos. 26 and 27.

Consideration is being given to opening a Container Freight Station for the handling of LCL shipments.

Bulk Grain:– Berth No. 1 has facilities for the discharge of various types of grain in bulk. Grain can either be transferred for Silo storage (80,000 tons) or direct for processing by the adjacent Flour Mill. The facility is rail connected. Discharge rate, 480 t.p.h. (2 unloaders).

Export of Urea: (Fertiliser) – Berth No. 10 is allocated for this purpose. Bagged fertiliser is transported by rail cars to the berth where it is loaded directly into the vessels by their own cargo handling gear.

Bulk Cement: The Port currently has 2 terminals – Berth Nos. 21 and 36 for the handling of this commodity. Each is operated by a different private company who have leased the berths from the Ports Authority. Each berth has a silo vessel moored permanently alongside the quay, into which the sea-going vessel discharges. During 1980 the Berth No. 21 operation will be transferred to Berth No. 37 and it is planned to locate a third bulk cement terminal at Berth No. 38. Bagged cement shipments, currently handled at Berth Nos. 37 and 38, will then be handled elsewhere in the Port.

Other classes of cargo: These are handled at the remaining berths not mentioned previously.

The Port Management employs 3 stevedoring contractors to perform all cargo handling operations on all berths other than the container, bulk cement and grain terminals. The 3 contractors are permanently allocated to groups of berths. (Also see "Stevedores").

Vessels are allocated berths, dependent upon the type of cargo carried, prior to arrival, based on the information supplied under the requirements of the "Appointments" system. Providing the rules have been complied with, vessels are berthed immediately upon arrival, weather permitting.

Rail connected berths: Currently Berth Nos. 6 to 10 inclusive have rail facilities. It is planned to extend the rail system to Berth Nos. 2 to 5, also to the Bulk Cement Terminals in the West Port.

CRANES: *Berths equipped with Shore Cranes:* Currently Berth Nos. 6 to 9 inclusive have 14 electrical quay cranes available with lifting capacities varying from 3 – 6 tonnes. A further 6 are installed on the East Port quay. Ultimately, this number will be increased by a further 41 with lifting capacities between 6 – 15 tonnes. These will be available on berths Nos. 2 to 22 inclusive.

Container Cranes: DCTE and DCTW are both equipped with container handling gantry cranes as follows:–

Terminal	*No.*	*Mft.*	*Capacity tonnes*	*Out reach m.*
DCTE	2	Krupp	35	33
DCTW	4	M.A.N.	40	32

STORAGE AREAS: *Covered:* There are currently 17 transit sheds provided on Berth Nos. 4, 5, 6, 7, 8, 9, 12, 13, 14, 15, 16, 18, 20, 30, 31, 33 and 34. The total area thus provided is 96,700 sq.m. In addition to this Berth Nos. 2, 3, 14, 15, 16, 18, 20, 30, 31, 33 and 34 have open-sided sheds to the rear of the respective berth areas. The total area is thus increased by 64,900 sq.m. A further open-sided shed (total 9,400 sq.m.) is currently under construction to the rear of Berth No. 26. (This is for Customs Inspection of containers).

Open: Now that the current main development phases are virtually complete, all the berths in the main port and Small Craft Harbour have large back-up areas for open storage, as follows:–

	Total sq.m.
Berth Nos. 2 – 13	364,500
Berth Nos. 14 – 21	228,900
DCTE No. 22	222,000
DCTW Nos. 23 – 25	250,000
Berth Nos. 26 – 35	770,700
Berth Nos. 36 – 38	435,300
North Small Craft Harbour	40,000
West Small Craft Harbour	75,000
South Small Craft Harbour	200,000
Total:	2,586,400

Inland Yards: Situated at the landward end of the causeway are the 2 Inland Yards. These were originally extensively used for the storage of cargo from the Port, but now the emphasis has changed and one of them (630,800 sq.m.) is designated by the Port as an Empty Container Receiving Depot for storing empty containers for export. The other (520,200 sq.m.), is used by the Port for materials storage, etc.

DISCHARGING RATES: A strong and positive set of Port Rules is in operation. This guarantees high discharge rates and high standards of efficiency. Co-operation in observance of these rules by Shipowners and Agents makes a substantial contribution to the Port's effectiveness.

HANDLING RATES: *Handling Rates of Main Commodities during the year 1979:*

Type of cargo	*Weight Tonnes per Gang per day*	
	Gross	*Nett.*
Bulk Grain	3,370	3,370
Bulk Cement	3,740	3,740
Bagged Cement	480	780
Other Bagged Cargoes	230	340
Steel and Pipes	500	740
General Cargo	260	400

STEVEDORES: Stevedoring operations on all berths except bulk grain, bulk cement, container operations and Berth Nos. 37 and 38 are performed by 3 contracted stevedoring companies:–

(i) Saudi Korean Stevedoring Co. – SAKOS.
(ii) International Chemical Co. (Transport Co.) – ICC(TC).
(iii) Barge Company Overseas – BCO.

Charges are levied on a weight/measurement basis, in accordance with the current tariff.

CARGO HANDLING EQUIPMENT: Dammam Port has an extensive and modern fleet of equipment. A proportion of the fleet has been allocated to each of the Stevedoring Companies, Terminals and the nearby port of Alkhobar, for which Dammam Port Authority is responsible. The total present fleet (April 1980) and future additions are set out below:–

Equipment Type	Capacity	Availability Present	Future
Forklift Trucks	0 – 4 tons	291	26
	5 – 10 tons	89	36
	11 – 25 tons	44	13
	Over 25 tons	12	4
	Total:	436	79
Mobile Cranes	0 – 20 tons	65	19
	21 – 40 tons	57	5
	41 – 90 tons	1	–
	Over 90 tons	2	–
	Total:	125	24
Straddle Carriers	–	15	8
Gantry Cranes	40 tons	4	–
	35 tons	2	–
	Total:	6	–
Portal Cranes	3 tons	11	–
	6 tons	7	19
	15 tons	3	21
	Total:	21	40
Mercedes Heads	–	23	–
Terminal Tractors	–	38	21
Floating Crane	200 tonnes	(Self propelled)	
Trailers G.S.	–	121	–
G.S./Container	–	20	–
Roll	–	77	–
Container	–	26	–
	Total:	244	–

MEDICAL: Masters may obtain medical attention for ship's personnel from Port Doctor who may, in case of serious illness or injury recommend treatment to a local hospital. The Port Doctor ordinarily will treat minor illness or injuries on board ship.

Urgent hospitalisation can also be arranged via the ship's Agent. Masters of vessels at sea may use services of Dammam Port Radio on HF or VHF to obtain medical advice at any time.

DENSITY: The average density (salinity) of the sea-water in the Port of Dammam is 1030.

WATER: Well water is available at certain berths. Water is also available from a private water barge. Vessels requiring a supply of water should make arrangements via their Agent.

FUEL: There are several private Bunkering companies who operate in Dammam Port. By arrangement through the ship's Agent, bunkers can be supplied by barge at anchorage or alongside vessel at her berth. Various grades of fuel are available. Strict rules apply and severe penalties will be imposed should any oil spillages occur during bunkering operations or from any other cause. Anti-oil pollution equipment and dispersants are available.

Also see "Ras Tanura".

CUSTOMS: All materials to be either exported from or imported into Saudi Arabia are subject to examination by Customs Authorities. The importation of the following articles is completely banned.

(a) Alcoholic beverages, including beer and wines.
(b) Narcotics.

Trafficking of the above items between ship and shore is strictly prohibited, regardless of whether they are alongside the piers or at anchor. Consumption of alcoholic beverages is prohibited during a ship's stay in port.

The following articles can be imported after obtaining permission from the authorities concerned.

(1) Explosives
(2) Fire Arms
(3) Antiques
(4) Religious material not pertaining to the Muslim faith.

CONSULS: The U.S. Consulate General resides at Dhahran (approximately 20 km. inland from Dammam). A British Consular Official visits Dammam area twice per month.

REPAIRS: Ship repair services are not available from Dammam Port Authority. However, it may be possible to arrange for minor repairs to be performed by local private companies or the supply of a limited number of spares, purchased locally, via the ship's Agent.

Deep sea divers, operating from modern and well equipped diving boats, are available at Dammam.

Representatives are available at Dammam for Lloyds and Germanische Lloyd.

The Port offers repair/service facilities to vessels for all types of marine electronic equipment. Also see "Developments".

AIRPORT: Very good airlines facilities are available from Dhahran Airport. Daily departures take place for any part of the world.

REPATRIATION: This is generally not encouraged but consideration will be given to urgent cases. Details should be verified through ship's Agent.

TIME: GMT plus 3 hours all year round.

HOLIDAYS: Dammam Port offers continuous cargo handling operations through the year and sufficient manpower is always available.

All ships must be dressed if they are in port, or entering port, on the following official holidays or events:

1. Eid Al-Fitr.
2. Eid Al-Adha.
3. Saudi Arabian National Day.
4. Royal visits to the port.

Port staff will advise vessels in port prior to any forthcoming event, and vessels approaching port will be advised by the Port Radio Control.

POLICE/AMBULANCE/FIRE: (Emergency Telephone Numbers):

Dammam Port		83-32500
Police	Extension	2717
Ambulance	,,	2221
Fire Service	,,	2222
Coastguard	,,	2608
Customs	,,	2182

TELEPHONE: the Port's telephone number is 83-32500 and is open for 24 hours. Expansion is planned which will include ship to shore communications at all berths.

SHORE LEAVE: Ship's personnel and passengers are not permitted ashore until permission is granted by immigration and police authorities. The necessary arrangements can be made by ship's Agent on Master's request. While in port, the vessel's personnel is under jurisdiction of the Law of Saudi Arabia.

DEVELOPMENTS: A ship repair yard is planned consisting of 2 floating docks of 22,000 tonnes and 10,000 tonnes lifting capacity, an outfitting quay of 392 m. length with a total area of 200,000 sq. m.

A shiplift of 1,500 tonnes lifting capacity is under construction.

SHIPMASTER'S REPORT: September 1980.

Berthing: The port has 34 working berths (vessel made fast at berth No. 29).

Fuel: After discharging we dropped anchor at Dammam Anchorage near buoy No. 41 and a small tanker ship "Tara Tifany" with special rubber fenders came alongside.

Shore Leave: No shore leave allowed.

Notes:

1. If vessels are coasting i.e. Ras Al Mishab to Dammam they are not allowed to use Rast Tanura's traffic lanes.

2. Before entering East Channel and near buoy No. RTE 2 to proceed to Dammam, vessel must make contact with Rast Tanura Radar Control on VHF Channel 10 and report their route.

AUTHORITY: Port Director General, Dammam Port Management.

AGENT: Gulf Agency Company, Saudi Arabia, POB 86, Airport Post Office, Dhahran, Saudi Arabia, Cables "Confidence Dammam". Telex: 601069 ("GAC SJ") and 601016 ("AGSHIP SJ"). Telephone: Normal working hours 8323427, 8322861, 8328761-4, 8323425; After office hours 8332077 (ext. 231), 8323526, 8326759.

Vessels equipped with VHF, can communicate, when within range, with Agent on stand-by Channel 16 by calling "Confidence Dammam". Voice contacts may be also established via VHF, on the same channel as above, with Ras Tanura office, by calling "Confidence Ras Tanura". Once contact is established on Channel 16, communication will continue by switching on available working Channels as directed.

GIZAN (Jizan): 16.54 N. 42.29 E. **(See Plan Book)**

Also see "General" before first port.

PORT LIMITS:

Harbour Boundaries:

All shore-based port property enclosed by a fence following the shore line extending seawards to line running between the following points:

	Latitude	Longitude
Qarn Ash Shurra	16° 50′ 36″ N.	42° 33′ 00″ E.
Um al Kuthib	16° 48′ 30″ N.	42° 27′ 12″ E.
Jazirat Hibar	16° 54′ 12″ N.	42° 22′ 42″ E.
Ferafer Island	17° 00′ 00″ N.	42° 23′ 36″ E.
Qarn al Wada	17° 02′ 24″ N.	42° 28′ 18″ E.

PILOTAGE: *Pilot Boarding Position:*

Latitude: 16° 53′ 48″ N. Longitude: 42° 27′ 00″ E.

The pilot station can be called on Channel 16 VHF "Gizan Port Control".

ANCHORAGES: *Anchorages within the harbour boundaries:*

Anchorage A.

Latitude: 16° 56′ 00″ N.	Longitude: 42° 27′ 00″ E.
Latitude: 16° 54′ 30″ N.	Longitude: 42° 27′ 00″ E.
Latitude: 16° 54′ 30″ N.	Longitude: 42° 25′ 48″ E.
Latitude: 16° 56′ 00″ N.	Longitude: 42° 25′ 48″ E.

Anchorage B.

Latitude: 16° 53′ 00″ N.	Longitude: 42° 27′ 42″ E.
Latitude: 16° 51′ 30″ N.	Longitude: 42° 27′ 42″ E.
Latitude: 16° 51′ 00″ N.	Longitude: 42° 26′ 12″ E.
Latitude: 16° 53′ 00″ N.	Longitude: 42° 26′ 12″ E.

There are no anchorages outside the harbour boundaries.

ARRIVAL ADVICE: Send ETA's to Agents at Jeddah, also to Jeddah Port Management or Saudi Ports Authority in Riyadh stating "Please forward to Gizan Port Management immediately".

MAX. SIZE: Max. draft alongside 19 ft. Max. draft at anchorage 26 ft. Roll-on/Roll-off vessels accepted up to a length of 140 m.

BERTHING:

Berth	Length (m.)	Depth (m.)	Remarks
1	122	10	General Cargo
2	175	10	General Cargo and Ro-Ro
3	175	10	Cement vessels
Under Construction:			
4	143	10	Container Terminal
5 & 6	434	12	Container terminal, Berth No. 6 Ro-Ro ramp.
7	209	8	General Cargo
8	184	10	General Cargo
9 & 10	342	10	General Cargo
11 & 12	353	12	General Cargo
13	205	12	General Cargo

Total Shed Area: 12,000 sq.m.
Total Open Storage Area: 140,000 sq.m.
Weighbridges: 1×60 tonnes.

BULK HANDLING FACILITIES: *Bulk Cement Terminal:*

Silo vessel at Berth No. 3.
Storage capacity: 50,000 tonnes.
Handling capacity: 10,000 tonnes per day; 750,000 tonnes per year

EQUIPMENT: *Marine Equipment:*
3 tugs: 2×980 h.p. (Voith Schneider); 1×1,310 h.p. (Voith Schneider). 2 towing launches, 4 launches, 1 fire fighting launch, 10 self-propelled barges of 400 tons.
Cargo Handling Equipment: Tractors 6. Tugmasters 2. Forklifts 4×3 ton, 22×3.5 ton, 6×6 ton, 2×25 ton. Cranes 5×5 ton, 4×16.3 ton, 1×30 ton, 1×40 ton. Trailers 15.
STEVEDORES: Working hours 0700 hrs – 1500 hrs.
FRESH WATER: Available.
FUEL: Diesel oil available.
REPAIRS: Minor repairs possible.
SHORE LEAVE: Possible during daylight hours.
DEVELOPMENTS: See "Berthing".
SHIPMASTER'S REPORT: 1979.
Recommended track from sea to Gizan.

On BA Chart No. 141 from position off Jabel at Tair set course to a Position on 100 fathom line with Seil Makawa Island (16° 57′ N., 41° 20′ E.) bearing 083° (T) × 12 miles.

Alter course to 064°(T) to a position on BA Chart No. 15 with conspic. wreck (17° 0.8′ N., 41° 20′ E.) bearing 180°(T) × 8 cables.

Alter course to 090°(T) for a position 1.8 miles due South of East tip of Mudhan Island (17° 03′ N., 41° 30.5′ E.).

Alter course to 059°(T) to pass 3 miles off Jabal Muhammad Island on BA Chart No. 141 and continue on this course to a position on 20 fathoms line at 17° 10.5′ N., 41° 46.6′ E.

Alter course to 110°(T) to pass 1.5 miles off North Ghurab Island. Continue on this course to pass 2.6 miles off Ras Turfa on BA Chart No. 15 and when N.W. corner of Ferafer Island is abeam by 2.6 miles alter course to 140°(T).

This course leads towards the anchorage area off Gizan. There are no known VHF facilities.

It is suggested that the arrival off Seil Makawa Island is made at first light to allow the maximum daylight for the 87 mile run to the anchorage.
AUTHORITY: Gizan Port Management.

AGENT: See "Jeddah".

JEDDAH: 21.28 N. 39.10 E.

Also see "General" before first port.
LOCATION: The port stands to S.W. of the city, on an island called Jazirat al Mafsaka approximately 600 acres in area. The island is connected with mainland by a causeway.

The harbour is sheltered by several long lines of coral reefs and islands. The access is through 2 narrow channels.
PORT LIMITS: *Port Boundaries:* The boundaries of the harbour of the Islamic Port of Jeddah are given below and include the tanker terminals and the adjacent waters between Ras al Jahhas and Ras al Aswad.
Harbour Boundaries:

From an onshore position on Ras al Jahhas:

to	Lat. 21° 31′ 36″ N.	Long. 39° 07′ 54″ E.
	Lat. 21° 31′ 36″ N.	Long. 39° 06′ 00″ E.
	Lat. 21° 22′ 00″ N.	Long. 39° 06′ 00″ E.

To an onshore position on Ras al Aswad:

Lat. 21° 22′ 00″ N.	Long. 39° 07′ 50″ E.

CLIMATE: Tropical desert, hot climate. Humidity very high during Summer months, but Winter is mild and pleasant. Rainfall is negligible and does not exceed more than 3 to 4 in. per annum.

General direction of wind is mostly N.W., mild in intensity. Winds of gale force occur very rarely. The effect of high winds when they do occur in the harbour is not felt due to barrier reefs breaking force of waves. Waves inside harbour not generally above 1 to 2 m., although waves up to 6 m. may sometimes occur beyond outer reef.

Tides of Indian Ocean do not affect Red Sea due to construction of the Bab-el-Mandab. There is, however, a local semi-diurnal tidal oscillatory motion of the sea along its length, giving a high tide at one end and at the same time a low tide at the other. Jeddah Port is hardly affected by these tides and there are almost no currents produced by these movements.

The variation between Summer and Winter water levels is approximately 50/60 cm. only.

Visibility in the port area is generally good, occasionally obstruction to vision occurs due to dust, but such occurrences are seldom of long duration.
DOCUMENTS: Also see "General" before first port.
Cargo papers and documents for Jeddah Islamic Port:

Submission of manifests and stowage plans.

1. Vessels calling from Red Sea and Somali ports – English manifests to be submitted immediately on arrival (5 copies). The Customs will give a rotation number and discharge permission. Delivery orders should not be issued prior to submission of the Arabic manifest.
2. Vessels calling from European, Mediterranean, American and Far East ports – English manifests in respect of these vessels to be presented 48 hours prior to arrival, *or* contents to be telexed 24 hours prior to arrival of the vessel, and a minimum of five copies of the English manifest immediately on arrival of the vessel. If the manifest contains cargo subject to special restrictions, Agents should note and advise Customs accordingly. The Arabic version of the manifest is to be submitted within 24 hours of the arrival of the vessel, and the Customs will issue a rotation number and discharge permission of the English manifest. Delivery orders should not be issued until after submission of the Arabic manifest to the Customs for checking.
3. Vessels calling from ports shown in 1 and 2 above and carrying direct delivery cargo or direct delivery with general cargo, should be treated as stipulated in those paragraphs, subject to the following considerations:
    a) Direct delivery vessel's manifest in Arabic to be submitted to the Customs within a maximum period of six hours after the arrival of the vessel;
    b) Submission of two copies (one for direct delivery and the other for general cargo) to the Customs. The direct delivery extraction should not be considered supplementary.
    c) Delivery order for direct delivery should be issued on presentation of the Arabic version, so as to complete release formalities by the time the vessel has berthed.
    d) Guarantees of direct delivery, written on an approved form, are required in respect of direct delivery cargoes prior to berth allocation.

PILOTAGE: *Pilot Boarding Position:* Vessels calling at Jeddah shall pick up the Pilot at position: Lat. 21° 28′ 00″ N., Long. 39° 06′ 00″ E.

Pilotage is compulsory and available 24 hours a day. Pilots do not usually keep station unless expecting a vessel.

Also see "General" before first port.
ANCHORAGE: *Anchorage within the harbour boundaries:*

Except in emergency or if an arriving vessel's radio equipment has broken down, the following anchorages may not be used without advance authorisation of the Port Management:

Anchorage A:

From	Lat. 21° 29′ 13″ N.	Long. 39° 08′ 40″ E.
To	Lat. 21° 28′ 18″ N.	Long. 39° 08′ 40″ E.
	Lat. 21° 28′ 18″ N.	Long. 39° 08′ 02″ E.
	Lat. 21° 29′ 13″ N.	Long. 39° 08′ 40″ E.

Anchorage B:

From	Lat. 21° 27′ 39″ N.	Long. 39° 06′ 54″ E.
To	Lat. 21° 27′ 39″ N.	Long. 39° 07′ 26″ E.
	Lat. 21° 26′ 04″ N.	Long. 39° 07′ 26″ E.
	Lat. 21° 26′ 04″ N.	Long. 39° 06′ 54″ E.
	Lat. 21° 27′ 39″ N.	Long. 39° 06′ 54″ E.

Anchorage W1 (Working Anchorage):

From	Lat. 21° 27′ 46″ N.	Long. 39° 08′ 10″ E.
To	Lat. 21° 27′ 46″ N.	Long. 39° 08′ 42″ E.
	Lat. 21° 26′ 45″ N.	Long. 39° 08′ 42″ E.
	Lat. 21° 26′ 45″ N.	Long. 39° 08′ 22″ E.
	Lat. 21° 27′ 46″ N.	Long. 39° 08′ 10″ E.

Anchorage W2 (Working Anchorage for explosive cargoes, one vessel only)

From	Lat. 21° 29′ 04″ N.	Long. 39° 07′ 16″ E.
To	Lat. 21° 29′ 04″ N.	Long. 39° 07′ 34″ E.
	Lat. 21° 28′ 27″ N.	Long. 39° 07′ 46″ E.
	Lat. 21° 28′ 27″ N.	Long. 39° 07′ 22″ E.
	Lat. 21° 29′ 04″ N.	Long. 39° 07′ 16″ E.

Anchorages outside the harbour boundaries:

Anchorage C (Anchorage for vessels with dangerous cargoes):

From	Lat. 21° 28′ 00″ N.	Long. 39° 03′ 46″ E.
To	Lat. 21° 27′ 46″ N.	Long. 39° 04′ 40″ E.
	Lat. 21° 26′ 47″ N.	Long. 39° 04′ 22″ E.
	Lat. 21° 27′ 02″ N.	Long. 39° 03′ 28″ E.
	Lat. 21° 28′ 00″ N.	Long. 39° 03′ 46″ E.

Anchorage D (Anchorage for dry cargo vessels):

From	Lat. 21° 28′ 16″ N.	Long. 39° 04′ 50″ E.
To	Lat. 21° 27′ 28″ N.	Long. 39° 05′ 58″ E.
	Lat. 21° 26′ 10″ N.	Long. 39° 04′ 29″ E.
	Lat. 21° 26′ 24″ N.	Long. 39° 04′ 15″ E.
	Lat. 21° 28′ 16″ N.	Long. 39° 04′ 50″ E.

Anchorage E (Tanker and overflow anchorage):

From	Lat. 21° 23′ 19″ N.	Long. 39° 05′ 50″ E.
To	Lat. 21° 23′ 53″ N.	Long. 39° 05′ 56″ E.
	Lat. 21° 24′ 50″ N.	Long. 39° 04′ 53″ E.
	Lat. 21° 23′ 18″ N.	Long. 39° 04′ 01″ E.

RESTRICTIONS: No navigational aids marking approaches to port, and therefore there is no night navigation. A lighthouse and lighted marker buoys are scheduled for positioning in the development of the new port.

Only Saudi nationals are allowed to board vessel.
HEALTH: Doctor boards vessel before arrival at berth and grants free pratique.

(a) Cholera: All arrivals from infected or endemic areas are required to possess a certificate showing 2 injections made not less than 7 days and not more than 30 days before arrival. For re-vaccination carried out within 6 months of a recorded vaccination or re-vaccination, a single injection renders the certificate valid for a further 6 months.

In addition, arrivals must submit a certificate dated not more than 7 days before their departure recording the negative results of stool culture. This certificate must be delivered by a licensed laboratory and attested by the Health Authority.

(b) Smallpox: All arrivals are required to submit a valid vaccination certificate in accordance with International Sanitary Regulations.

(c) Yellow Fever: All arrivals from infected or endemic areas are required to submit a valid vaccination certificate in accordance with International Sanitary Regulations.

(d) Mecca: All Muslim crew members who wish to visit Mecca and Medina should have in their possession 2 recent passport-size photos. These should bear the crew member's name and C.D.C. number to enable Agent to obtain permission for the pilgrimage. Crew members must also have in their possession the above-mentioned medical certificates, otherwise permission may not be granted to them to visit Mecca and Medina.
RADIO: Masters should give their Agents an ETA not later than 48 hours before arrival. Jeddah Radio "HZH" operates on 500 kc/s. with limited working hours. Also see "General" before first port.
TUGS: See "Equipment".

BERTHING: Tidal range: 0.6 m.

Berth	*Length (m.)*	*Depth (m.)*	*Remarks*
1	180	11	General cargo, pilgrims and passengers
2	200	11	General cargo, pilgrims and passengers
3–6	720	11	General cargo
7 & 8	380	11	General cargo
9	180	12	General cargo, bulk grain
10–15	1,080	12	General cargo, (Berths 13–14 planned multi-purpose fruit terminal)
16	180	12	Container terminal
17	180	12	Planned livestock terminal
18 & 19	500	12	Bulk cement (silo vessels)
20–28	1,620	12	General cargo
29 & 30	360	12	General cargo
31	220	14	General cargo
32–34	750	14	Container terminal (under construction)
35–37	750	14	Container terminal (No. 37 Ro-Ro under construction)
38–41	720	8	General cargo
42 & 43	360	11	General cargo (No. 43 planned sugar berth)
Ro-Ro	320	8	Ro-Ro (can accommodate 5 stern ramp vessels simultaneously)

Total shed area: Approx. 293,000 sq.m. including 8,000 sq.m. for dangerous cargo.

Total open storage area: 1,804,060 sq.m. Including Ro-Ro back-up.

Ro-Ro area: 37,000 sq.m.

Cold store: 2,550 sq.m.

Container terminal area: 380,000 sq.m.

Weighbridges: 1×80 tonnes, 8×60 tonnes, 2×30 tonnes.

CONTAINER FACILITIES: The terminals are common-user facilities. A container freight station is under consideration.

1. *Jeddah Container Terminal East*
Berth 16
Operator: Marine Transport International Co. Ltd.
Length of quay: 180 m.
Depth alongside quay: 12 m.
Terminal area: 130,000 sq.m.
Container cranes: Two (2) of 30.5 tons with an outreach from quay wall of 25.90 m./28.95 m.
Straddle carriers: Eight (8)
Head trucks: Four (4)
Trailers/chassis: Eight (8)
Electrical supplies ("plug in") for 192 reefer containers.

2. *Jeddah Container Terminal West*
Berths 35 and 36
Operator: Marine Transport International Co. Ltd.
Length of quay: 500 m.
Depth alongside quay: 14 m.
Terminal area: 250,000 sq.m.
Container cranes: Four (4) of 30.5 tons with an outreach from quay wall of 34.50 m.
Straddle carriers: Thirty (30)
Head trucks: Six (6)
Trailers/chassis: Twelve (12)
Electrical supplies ("plug in") for 192 reefer containers.

3. (Under construction)
Berth 37
Operator: (To be nominated)
Length of quay: 250 m.
Depth alongside quay: 14 m.
Terminal area: 75,000 sq.m.
Container cranes: Two (2) of 40 tons under spreader with an outreach from quay wall of 34.40 m. with rotating spreaders (operational end 1981).

4. (Under construction)
Berths 32 to 34
Operator: (To be nominated)
Length of quay: 745 m.
Depth alongside quay: 14 m.
Terminal area: 375,000 sq.m.

BULK HANDLING FACILITIES:

Bulk Cement Facilities:
Two silo vessels at Berths 18 and 19 with bagging plants
Storage capacity: 90,000 tons.
Handling capacity: 17,000 tons per day. 4,000,000 tons per annum.

Bulk Grain Silo:
Berth 9
Storage capacity: 120,000 tons.
Discharge capacity 500 t.p.h.

STEVEDORES: *Working Hours:* Normally every day except Friday, first shift 0700–1600 hrs., second shift 1800–2400 hrs. Arrangements can be made to work overtime outside these periods. Discharging on barges can be continuous.

EQUIPMENT:

Cargo Handling Equipment:

Forklifts:	247 between 1.2 and 4 t. 125 between 5 and 10 t. 83 between 11 and 25 t. 28 between 26 and 35 t.
Mobile Cranes:	35 between 11 and 20 t. 49 between 26 and 50 t. 1 of 75 t. 5 of 90 t. 1 of 125 t. 2 of 150 t. 3 of 200 t.
Mobile Tower Cranes:	4 of 15 t. 2 of 36 t.
Port Quay Cranes:	12 of 3 t 21 of 6 t. 9 of 15 t.
Container Gantry Cranes:	6 of 30.5/31 t.
Head Trucks:	160
Trailers	259
Straddle Carriers	32

Marine Equipment:
9 tugs
4 of 800 h.p. (Voith Schneider)
2 of 1,000 h.p.
2 of 1,960 h.p. (Voith Schneider)
1 of 3,700 h.p. (Voith Schneider)
1 Floating crane of 200 t. lifting capacity
1 Fire fighting launch, 26 m. long
4 Self-propelled barges
22 Flat top barges of 400 t.
5 Pilot boats
6 Service launches
7 Towing launches
1 Waste incinerating vessel with 2 collecting launches
4 Mooring launches
1 Buoy laying vessel
Oil pollution combatting equipment on order.

TANKERS: The Petromin Jetty can take 2 vessels at its floating pipe-lines. Vessels moor to 2 anchors with stern moorings to buoys. This is solely an oil berth used for discharging/loading tankers and bunkering other vessels.

Also see "Shipmaster's Report No. 2".

MEDICAL: Doctors, dentists, eye specialists and hospitals are available.

FRESH WATER: Available at Berths (Nos. 11-23), by barge and by road tankers.

FUEL: Diesel available by barge. Fuel oil also available.

Also see "Shipmaster's Report No. 3 and No. 4".

FIRE PRECAUTIONS: A fire-float is available.

REPAIRS: Minor repairs by local contractors.

DRY DOCKS: Slipway up to 1,000 tonnes. Dry docks and shipyard complex under construction. (Completion October 1981).

GANGWAY/DECK WATCHMEN: 2 coastguards are stationed permanently on board and require accommodation and food. Coastguards keep constant check on liquor seals and may search personnel going ashore.

CUSTOMS ALLOWANCE: The consumption of alcohol including beer is prohibited. Ship's bonded stores are sealed by the Coastguard after the vessel has been granted free pratique. Any alcohol found after this will be confiscated and a fine imposed of Riyals 1,000.00 per bottle and possible imprisonment for the offender(s).

REPATRIATION: Several flights daily from Jeddah. A visa is required for entering or leaving the country.

AIRPORT: Situated close to the city. A new airport is under construction about 40 km. to the North.

TIME: GMT plus 3 hours.

HOLIDAYS: Every Friday is a holiday, although vessels can be worked from 0700 to 1000 hrs. to finish, at overtime rates.

SERVICES: Good laundry and ship-chandlering facilities.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Discharge books or passports must be left at the gate, and collected when re-entering the port area.

GENERAL: The Saudi Arabian flag (in good condition) must be flown from 0600 hrs. to sunset.

Communications by cable are lengthy, and about 3 days should be allowed to receive a reply to a cable. Exterior telephone calls require 1 day's notice.

Vessels carrying explosives for discharge Jeddah or any other port are not permitted to berth inside harbour. Such vessels will be discharged at the Outer Anchorage and must be capable of discharging all cargo with ship's gear.

DEVELOPMENTS: Container freight station; cold storage complex; container terminal berths 32-34.

At Northern Extension:

Multi-purpose terminal, pilgrim and passenger terminal, ship repair yard with 45,000 d.w.t. floating dock and 16,000 d.w.t floating dock. Completion in 1981.

SHIPMASTER'S REPORT No. 1: 1975

Berths: These are good, well fendered, and have depths of 33 ft alongside most of them.

Anchorages: These are both protected and restricted by the series of coral reefs off the port. Due to congestion, the anchorages are very crowded and it is necessary for ships to moor rather than lie to single anchor. Holding ground is not good and when the afternoon breezes blow strongly it is sometimes prudent to have engines on stand by. At night it is frequently calm and fenders are required as ships make contact.

Bunkers: Bunkers are available by barge. On this vessel's last call ships calling at Jeddah for bunkers only were waiting up to 3 days. On our first call, although bunkers were ordered in good time, they were not delivered at all.

Tugs: There seems to be 2 harbour tugs and a number of smaller ones for towing lighters etc. They seldom appear when ordered, this was confirmed by the Pilots.

On our last call, although ship was manoeuvring with difficulty, tugs were not available either for entering port or berthing.

Pilots: Pilots are excellent. Pilot boat waits in El Hariq, North of Qaram Reef. Under no circumstances will Pilot meet ships further out. Departing, Pilot leaves in "Middle Gateway" or before.

Navigation Aids: Port only operates in daylight and there are no lights. The airport radio beacon is very useful especially as in the reduced visibility so often encountered in the Red Sea, nothing is seen visually until the ship is inside the outer dangers.

There are a number of chimneys and water towers visible to the North of the port, but these are not marked on the charts.

The radar picture can be misleading when compared with the coastline on the chart. The strongest echo is given by the anchored ships.

Qaram beacon is lying on its side at present. The wreck on the next reef to the South, which looks like a small ship under way, is usually seen first.

Agency Service: All requests for water, cash, shore labour etc. must be made in good time. At anchor, Agent's launch visits only infrequently. On vessel's last call, Agents did not board ships in the anchorage at all, even though the ship was in a certain amount of trouble. The normal practice seems to be for the Master to go to the agency office himself to chase things up. The office staff are all most pleasant and helpful.

There is good telex communication, except on Fridays, but telephone calls to UK are all but impossible. By local custom, the agency closes at 1400 hrs., reopens at 1900 hrs. daily.

SHIPMASTER'S REPORT No. 2: 1976. Report on New Clean Oil Terminal.

Charts Required: BA 2599 Approaches to Jeddah BA 2577 Jeddah Harbour.

Pilot Station: Lat. 21° 27′ 15″ N. Long. 29° 06′ 00″ E.

Position of New Clean Oil Terminal:
Lat. 21° 26′ 55″ N. Long 39° 09′ 20″ E.

Approach to Terminal: Through Middle Gateway, Inner Gateway then South for 10.5 cables.

Depths: Least depth in approach channel 50 ft. and at berth 40 ft.

Moorings at Berth: Both anchors down with 6 shackles of cable on each. 8 Stern lines to buoys, viz 2 lines on each quarter to stern buoys. 2 Quarter lines on Starboard side to Starboard Quarter buoy. 1 line from main deck to Starboard Quarter buoy. 1 line from main deck to Port Quarter buoy.

Cargo Hoses: 3×8 in. Floating cargo hoses connected to Port side manifolds, viz, one for Mogas/Jet fuel, one for A.D.O./Kero and one for Fuel oil. Shore ends of hoses connected to manifolds on causeway. Shore line sizes given as Mogas/Jet Fuel 8 in. A.D.O./Kero 12 in. and Fuel Oil 12 in.

Back Pressure: Back pressure allowed 100/115 p.s.i. giving the following discharge rates. Mogas/Jet Fuel 160 m/t.p.h., A.D.O. 320 m/t.p.h., Kero 340 m/t.p.h. Fuel Oil 300 m/t.p.h.

Bunkers: Fuel Oil and Diesel Oil are shipped at berth after discharge of cargo.

Fresh Water: Not available at berth.

Accommodation Ladder: Rigged on Port side.

Shore Leave: By boat, takes 20 mins to cover the 1 mile distance. No one is allowed to land on the causeway.

Seamens' Identification: To leave dock area seamen must deposit their Seamans I.D. Card, C.D.C. Book or passport at the dock gate. Documents are picked up on return to dock gate.

Communications: Jeddah Radio H.Z.H. can be contacted on 500 kHz. and no traffic lists are sent.

Jeddah Port is now operating a VHF Station "Jeddah Signal Station" which can be contacted on VHF Channel 16, but meantime is only concerned with berthing of dry cargo ships. This VHF station is British manned, but is not in contact with Pilots by radio or telephone.

Tanker Operations Communications: Jeddah Oil Refinery can be contacted on VHF Channel 11 when approaching pilot station and will pass messages to Agent and inform Pilot when requested to do so. Unfortunately information supplied by using this method is not always reliable as sometimes they don't know what tanker movements are scheduled. Usually Pilot will take vessel into anchorage if discharging berth is not available. No berthing operations are conducted in the Port of Jeddah between the hours of sunset and sunrise.

SHIPMASTER'S REPORT No. 3: July 1977. Bunkering Large Tankers:

The bunker vessel was calling us on Channel 16 as soon as we were clear of the Gulf of Suez. We contacted him about 300 miles away and gave an ETA. Despite these long ranges it was very difficult to contact him when we were approaching the port. The Master speaks reasonable English, and said he was coming out to us and would come alongside on our starboard side.

Our vessel was stopped in the water and the bunker vessel was soon sighted coming towards us. The "Al Jawhara" about 3,000 d.w.t. is registered at Jeddah and manned by South Koreans. They have air-fired heaving lines with soft padded weights at the end. They have adequate fenders and mooring lines and the berthing operation took only 15 minutes. The weather conditions were ideal with no wind or swell. They advised their maximum pumping rate was 800 long t.p.h. During the 8 hours we were bunkering we did not drift any appreciable amount, despite a force 3 wind blowing most of the afternoon from the N.N.W.

The Master of the bunkering vessel intimated that he would not come outside in the future. A vessel of our size, LOA 886 ft. and draft 59 ft. would, in my opinion, have to anchor well South of Qaham beacon. The anchorage area to the West of Qaham beacon was fairly crowded although there were, apparently, fewer ships there than usual.

The Agent boards the vessel and requires a copy of the Crew list. No other officials boarded.

SHIPMASTER'S REPORT No. 4: May 1977.

Vessel anchored in the Outside anchorage (Qaham beacon bearing 137° True × 1.1′) brought up with 6 shackles on the port anchor in 35 fathoms of water, and in a stiff Northerly breeze this seemed to suffice.

Contact was made with the Jeddah signal station when about 30 miles away. Approaching from the South the high rise buildings of Jeddah show clearly at 48 miles on the radar screen. The first visual object sighted was the beacon on Mismari Reef. There is also a wreck on the reef which comes into view at the same time. On this passage along the coast we remained outside 100 fathoms at all times. The coastline South of Jeddah is very sandy and low and does not show readily on the radar. The aero beacon at Jeddah gives a strong signal on the D.F. and can be recommended for an approach bearing. The high rise buildings of the city came into view at about 20 miles.

We were ordered to anchor and await the Pilot outside Quham Reef. The Agents representative arrived unannounced at about 1500 hrs. by launch. He collected the papers for entry and brought with him copies of the papers in Arabic which are required for the Port Authority, Customs and Doctor. He explained that when he received the clearance he would inform the pilot station. It is necessary to have a Pilot to enter the outer gateway which lies between Jahan Reef to the North and Quham Reef to the South. There is no pilotage from 1800 hrs. to 0700 hrs. in the morning. Our Pilot arrived on board with very little notice at 1100 hrs. He took the ship to the S.W. anchorage and anchored her with Quham Reef beacon bearing 307°(T)×0.82 miles. He explained that with only 14 Pilots employed and with cargo vessels taking priority over bunkering vessels that would account for our delay in entering the harbour. We anchored in 18 fathoms with six shackles on the starboard anchor.

The bunker vessel "Vitoria" arrived alongside at 1515 hrs. with heavy oil only. She commenced bunkering at 1610 and completed at 2210 hrs. for 740 tonnes H.O. The "Vitoria" is quite a sizeable craft with the appearance of a small coaster. She has tyre fenders over the side and in the stiff Northerly breeze ranges freely, however with ample fuel hose there was no movement at the ship's fitting.

The diesel fuel was delivered by a small barge which tied up alongside our port side. The barge arrived at 1630 hrs. and commenced pumping at 1715 to 2030 hrs. for 132 tonnes. The barge then returned to base for a new load and returned to the vessel at 0635 hrs. He bunkered from 0705 to 0855 hrs. for 74 tonnes. His maximum lifting is 150 tonnes. This was not made clear to us by the Agent so any vessel requiring more than 150 tonnes of D.O. will require two lifts plus. The name of the bunkering firm was El Howi. We did not require any fresh water and as it costs 20 U.S. dollars a ton it is not recommended.

There was no shore leave from the anchorage and no cash was drawn. Bum boats are not allowed in the harbour by the Harbour Authorities. A providore called by in his boat but we required no stores.

The pilot boat is a large white craft with raised cabin three-quarter length and has "Pilots" written in black on the side of the cabin. A traffic list is broadcast at 0700 hrs. each morning for ship's berthing. They use Channel 16 for calling and Channel 12 for relaying messages. The Agent states they are not allowed to have a VHF Channel. It would be much better if they did have their own channel for direct communication. The ship's radio station must close when the papers are signed for entry. It is a very busy port with a lot of commercial traffic and also bunkering ships are increasing in number. There were approximately 65 ships at anchor and alongside. The Pilot informed me it was optional to have a Pilot for sailing and as it was very straight forward I sailed on completion of bunkering without having a Pilot. We were under way at 1000 hrs. for a total detention time of 44 hours 3 minutes.

Our vaccination certificates were all in date for three years. But we had no cholera or yellow fever certificates. With going to the outside anchorage I do not think they are too concerned but I think if the vessel had to go alongside for cargo work the authorities would be stricter about the certificates.

The Authorities normally call on board but with the wind blowing fresh they allowed the Agent to come out to collect the papers. The Agent's representative, spoke excellent English and was most helpful. He endeavoured to obtain a Pilot for us after clearing the ship inwards but was unable to do so in the time remaining before 1800 hrs. Therefore I think it is important to be off the port before 1000 hrs. if the vessel is to enter the port. The roadstead anchorage is about 4 miles from the piers and the launch that is used for transporting the Agent is slow. The Agent delivered the clearance before the bunkers were delivered and was in attendance prior to our departure.

ETA's and information sent via Aden Radio 72 hours in advance of arrival. Jeddah only has medium wave station and can be contacted 24 hours in advance of arrival.

Messages sent to Agent and Port Health Jeddah Port Administration: Sample message to Port Health: Vessels name, call letters, British ship ETA 1500 Saturday 7th for bunkers only gross tonnage 7,740 nett, 4234 Last port Lyttelton N.Z. Sailed 16th April Next port of call Patras Greece Crew 42 All well Doctor onboard All crew have smallpox vaccination certificates Stop Vessel has not called at any port infected with cholera or yellow fever.

Master

AUTHORITY: Jeddah Port Management.

AGENT: Gulf Agency Company Saudi Arabia, King Khaled Street, El Sailani Building (4th Floor), POB 2038, Jeddah, Saudi Arabia. Tel. 643-1481, 643-1423, after hours 39434. Telex: 401047 ("GACSHIP SJ"). Cables: "GULFAGENCY".

JU'AYMAH: 26.56 N. 50.03 W. (See Plan Book)

See "Ras Tanura" for Repatriation, Medical, Shore Leave, etc.

PLEASE BE ADVISED THAT THE FOLLOWING CHANNELS ARE DUE TO BE CHANGED TO I.A.L.A. SYSTEM A (RED TO PORT).
FEBRUARY 1981 – RAS TANURA EAST CHANNEL.
APRIL/MAY 1981 – RAS TANURA MAIN CHANNEL AND JU'AYMAH CHANNEL AND TERMINAL AREA.

(A) OIL TERMINAL. (B) RLPG LOADING TERMINAL.

(A) OIL TERMINAL.

OPERATORS: Arabian American Oil Co.

FLAG: In addition to the quarantine signals which are to be shown until pratique is granted, the Saudi Arabian flag must be flown from the vessel's foremast 24 hours a day while at Ju'aymah. Vessels should provide themselves with this flag before arrival but, if circumstances render this impossible, such flag may be purchased from the vessel's Agent.

The Saudi Arabian flag is properly displayed when the writing appears on top and the sword on the bottom.

CHARTS AND PUBLICATIONS: Surveys conducted by both American and British authorities in recent years have resulted in the publication of a number of charts of the Port of Ras Tanura and its approaches. The U.S. Defence Mapping Agency hydrographic charts are as follows:

No. 62414 – Approaches to Ras Tanura.
No. 62415 – Channels to Ras Tanura.
No. 62416 – Anchorages of Ras Tanura and Ad-Dammam.

Vessels making for Ras Tanura should be equipped with the latest issue of the above-mentioned charts or the corresponding British Admiralty charts. In addition, it is advisable to supplement the information shown on these charts with other charts of the Gulf and publications such as Sailing Directions and List of Lights.

Current hydrographic information may be obtained by radio from "Middle East Navigation Aid Service (MEGULITE), Bahrain".

IMPORTANT FEATURES:

Ras Tanura Port – General:

1. Aramco Harbour Pilots and Mooring Masters moor, unmoor and supervise the movement of all vessels in the vicinity of the piers, sea islands and buoy mooring berths. Normally, no charge is made for this service.

2. Safety rules are strictly enforced. Receipt of "Instructions to Vessels and Conditions of Use of Port" must be acknowledged before a vessel will be berthed. A thorough vessel inspection will be performed prior to loading to ensure conformity with safety requirements.

3. Aramco maintains a radio station (call letters HZY) for the exchange of messages with ships. All incoming tankers should establish early contact with this station, at least 72 hours before arrival, in order to exchange ETA data, traffic lists, weather advice, port closure advice, etc.

4. When a vessel is scheduled to load cargo at both the Ras Tanura Terminal and the Ju'aymah Terminal, Aramco reserves the right to advise the vessel at which berth the loading shall start and finish.

5. Display of quarantine signals on approach to Ras Tanura or Ju'aymah Terminal must be maintained until pratique has been granted. Ships cannot be berthed until the radio quarantine message has been received. The flag of Saudi Arabia must be flown both day and night throughout the vessel's stay in port.

6. To permit more rapid ship turnaround, an Early Departure Procedure is available. This service provides for a quick departure of the vessel after loading, without the necessity of waiting for the delivery of documents at anchorage. This special service should be requested from the ship's agent at the earliest opportunity.

7. The possession and/or consumption of alcoholic beverages is prohibited within the Kingdom of Saudi Arabia. All alcoholic beverages including beer, table wines and liquors are to be under lock and key during the vessel's stay. Vessels anchored at the anchorages or moored at the piers, sea islands or SPM's are considered to be in the Kingdom of Saudi Arabia. Local officials may carry out inspections to confirm that all alcoholic beverages are kept in locked ship's stores during the vessel's stay.

8. Saudi Arab Government regulations prohibit the taking of photographs of *any* installation at the Port of Ras Tanura. Considerable delay to vessels may be incurred due to governmental investigations of violations of this regulation.

9. No medical facilities are available at the Ju'aymah and Ras Tanura Terminals. Requirements for medical assistance or hospital service should be addressed to the ship's Agent. The Aramco radio station HZY may be used at any time, without charge by vessels at sea, to obtain medical advice.

Ju'aymah Terminal:

1. The Ju'aymah Terminal loading facilities are located approximately 20 miles N.N.W. of the Ras Tanura Terminal and 7 miles offshore in Saudi Arabian waters. These facilities consist of an oil metering and manifolding platform, a terminal control platform and 6 single point mooring berths.

2. Line handling during mooring and unmooring and connecting and disconnecting of the cargo and bunker hoses are to be performed by the crew of the loading tanker under instructions from the Pilot/Mooring Master.

3. Unless otherwise instructed, vessels must arrive at Ju'aymah with propellers almost covered, and trimmed not more than 8 ft. by the stern.

4. Water, galley fuel and diesel fuels are not available at the Ju'aymah Terminal loading buoys.

5. Small craft are not allowed in the vicinity of the tanker and no one is permitted to board or leave a tanker *while cargo loading operations are in progress.* Should it become urgent to board or leave a tanker for any reason during cargo loading, the Pilot/Mooring Master must be contacted to request permission to shut down the cargo loading operation while the small craft is alongside.

DOCUMENTS: Also see "Ras Tanura". Some of the tankers which will load at Ju'aymah will have called at Ras Tanura first and will have been cleared by Saudi Arabian Government authorities there. The Ras Tanura Quarantine, Customs and Coast Guard clearances will continue in effect at Ju'aymah and no further Government formalities will be required. *Seals placed on ships stores at Ras Tanura must remain intact until the tanker has completed loading at Ju'aymah and been completely cleared for departure.*

Those tankers which call only at Ju'aymah will require appropriate arrival clearances. After loading operations are completed at the time of unmooring the tanker must have on board port clearance documents, bill of lading and export manifest. (See "Ras Tanura").

To permit more rapid ship turnaround, an Early Departure Procedure is available by which a ship may clear the port and depart without the necessity of waiting for the delivery of documents at anchorage. Use of this special service is encouraged and it should be requested and arrangements with the Agent should be made at the earliest opportunity. *When operating under Early Departure Procedure, it is imperative that, after departure, HZY Traffic Lists be copied until cargo quantities are resolved and the ship's Agent is authorised to approve documents.*

Following telex received from a ship's Agent on January 1st, 1981. *New Coast Guard Regulations – Ju'aymah:* We have been instructed by Ju'aymah Coast Guard Authorities that effective immediately all vessels loading cargo and/or bunkers at Ju'aymah are to be cleared by the Authorities before they will be permitted to berth at the SBM's or NGL trestle. ARAMCO Pilots will only be permitted to board vessels either after completion of clearance formalities or with the authorities at time of clearance.

PILOTAGE/ANCHORAGE: The Northern Holding Anchorage and Ju'aymah Pilot Boarding Area have been laid out to expedite shipping and provide ready access to the Ju'aymah berths. The anchorage area varies in depth from 12 to 28 fathoms (72 to 168 ft.) and holding ground is only fair.

Arriving vessels which have anchored at the Northern Holding Anchorage should immediately advise Aramco, via radio HZY, of the following information:

(a) Time of arrival at the anchorage area (in GMT).
(b) Approximate position in the anchorage area.

They should then contact Aramco Terminal Planning office and Ras Tanura Pilot Office by VHF radio Channel 16 if vessel is equipped with VHF.

HELICOPTER SERVICE: In June, 1980, Pilot service by helicopter will be started at Ju'aymah and Ras Tanura on a limited basis. It is expected that this service will expand to total 24-hour service by January, 1981.

NAVIGATION AIDS:

Light Beacon: "J1" – black and white Gp. Fl. (3) every 8 secs. Radar reflector position: 27° 02.0′ N. 50° 07.8′ E.

"JD" (Departure buoy) – Can red – flash white every 4 sec. Position: 27° 10.5′ N. 50° 24.2′ E.

Red light float: marked "Ju'aymah"

Red – flash white every 10 sec. Racon x-bands (3 cm.) – code response Morse letter Zulu – response pulse length is 22 ml, sweep time is 48 sec. Position: 27° 10.5′ N. 50° 36.0′ E.

Ras Tanura Channel

Light buoy: (Mid-Channel Marker at Caution Area):

"RT 1" – Spherical black – intermittent quick flash white. Position: 26° 56.2′ N. 50° 12.6′ E.

A Northern holding anchorage: area bounded by:

	North	*East*
(a)	27° 08.5′	50° 13.5′
(b)	27° 08.0′	50° 20.0′
(c)	27° 02.05′	50° 17.0′
(d)	27° 03.0′	50° 11.5′

Ras Tanura channel caution area: area bounded by:

	North	*East*
(e)	26° 58.7′	50° 13.0′
(f)	26° 57.0′	50° 15.2′
(g)	26° 54.7′	50° 13.0′
(h)	26° 56.6′	50° 10.7′

Ju'aymah Pilot boarding area: area bounded by:

	North	*East*
(i)	26° 58.7′	50° 13.0′
(j)	26° 56.5′	50° 10.7′
(k)	26° 58.0′	50° 09.5′
(l)	27° 01.0′	50° 10.7′

INBOUND TRAFFIC PROCEDURES: Arriving tankers which will be loading at Ju'aymah, should proceed as follows:

(a) Vessel with no Special Instructions: The vessel should make for a position approximately 2 miles North of Ras Tanura Light Float position 27° 05.6′ N. 50° 57.5′ E. and then enter the inward channel. This will take the vessel past the Approach Buoy to the Entry Buoy. The vessel should then proceed to the Northern Holding Anchorage. The anchor time and position should be passed to the Aramco Terminal Planning Office and Ras Tanura Pilot Office.

(b) Vessel Proceeding to Ju'aymah: The vessel should make for a position approximately 2 miles North of the Ras Tanura Light Float position 27° 05.6′ N. 50° 57.5′ E. and enter the inbound channel. Proceed past the Approach Buoy and Entry Buoy and make for a point approximately 2.5 miles N.E. of Buoy 3A position 26° 56.3′ N. 50° 11.5′ E., and proceed into the Ju'aymah Pilot Boarding Area. The vessel should notify Ras Tanura Pilot Office on passing the Ras Tanura Light Float and will in turn be advised of berthing prospects. Should the Pilot not be boarding immediately on the vessel's arrival, the vessel may be instructed to anchor in the Pilot Boarding Area, and to pass the anchoring time and position to the Ras Tanura Pilot Office.

(c) Vessel Proceeding from Northern Holding Anchorage to Ju'aymah: On receiving instruction to proceed to Ju'aymah, the vessel should heave up anchor and re-enter the inbound channel making for a point approximately 2.5 miles N.E. of Buoy 3A position 26° 56.3′ N. 50° 11.5′ E. and proceed to the designated Ju'aymah Pilot Boarding Area. If the vessel has been advised that the Pilot will not board immediately on arrival, it may be instructed to anchor in the Pilot Boarding Area and await further instructions. The anchoring time and position should be passed to the Ras Tanura Pilot Office.

(d) Vessel Proceeding from Ras Tanura to Ju'aymah: The vessel should depart Ras Tanura and follow the departure channel towards the mid-channel marker buoy, R.T.1, position 26° 56.2′ N. 50° 12.6′ E. The vessel should proceed into the Ju'aymah Pilot Boarding Area, *exercising due diligence in this area.* If the vessel has been advised that the Pilot will not board immediately on arrival, it may be instructed to anchor in the Pilot Boarding Area and await further instructions. The vessel should inform Ras Tanura Pilot Office of its anchor time and position.

(e) Vessel Proceeding from Ras Tanura to Northern Holding Anchorage: The vessel should leave Ras Tanura and follow the departure channel observing the separation scheme to the Approach Buoy, 27° 06.5′ N. 50° 42.0′ E. and then proceed to the Northern Holding Anchorage. The vessel should inform Ras Tanura Pilot Office of its anchor time and position and await further instructions.

DEPARTURE FROM JU'AYMAH: A separate departure channel has been provided for all vessels using the Ju'aymah facilities. The Pilot will disembark and the vessel will proceed via the departure channel between Light Beacon J 1, 27° 02.0′ N. 50° 07.8′ E. and J 2 buoy 27° 01.9′ N. 50° 10.8′ E. The vessel should then proceed towards the exit buoy JE 27° 10.5′ N. 50° 12.6′ E. and from there set an Easterly course North of JD buoy 27° 10.5′ N. 50° 24.2′ E. to the Ju'aymah Light Float, 27° 10.5′ N. 50° 36.0′ E.

MAX. SIZE: 750,000 d.w.t.

HEALTH: In accordance with international practice, quarantine signals must be displayed by all vessels approaching Ju'aymah. The following signals must be displayed continuously until pratique is granted:

Sunrise to sunset – Quarantine flag
Sunset to sunrise – Signal lights, red over white

Radio Pratique: A modified radio pratique procedure is in use at Ju'aymah. Port conditions permitting, vessels supplying requested quarantine information (see "Radio" 50 word message) may be berthed on arrival and proceed with normal cargo loading operations prior to arrival on board of a Quarantine Officer. Extensive delay can be incurred by vessels failing to supply requested information promptly.

The Quarantine Officer may board vessels awaiting berth in the prescribed anchorage area; however, vessels proceeding directly to a berth will be boarded after being tied up.

Pier personnel are normally allowed on board prior to arrival of the Quarantine Officer.

Vessels at anchor awaiting berth should not rig an accommodation ladder, but instead should be prepared to provide, at short notice, an accommodation ladder rigged in conjunction with a pilot ladder. At night, adequate lighting must be provided.

RADIO: *Agents advice:* To be entered on ARAMCO's 7 days ETA computer list, a Master should cable ARAMCO his ETA at least 7 days in advance, stating name of Agent. It is essential this is done, otherwise the Agent will not have access to shippers instructions about nomination and other loading details, thus making it impossible for the Agent to provide the owners/charterers with useful information.

It is required that vessels contact "Aramco Ras Tanura" via HZY and provide a minimum of 3 notices of ETA information at about 72, 48 and 24 hours "steaming time" from the Northern Holding Anchorage. Shorter notices may result in delays and failure to give at least 24 hours notice will result in an addition to allowable laytime in the event a demurrage claim is filed against Aramco.

When it has been determined that a vessel will be loading at the Ju'aymah Terminal, the vessel may be contacted via HZY providing supplementary instructions and requesting any required additional information.

It is imperative that vessels departing under Early Departure Procedure monitor HZY and copy traffic lists after departure until cargo quantities are resolved and the Agent is authorized to approve documents.

Also see "Ras Tanura".

Radio Communications and Messages: The Arabian American Oil Company owns and operates a marine radio station whose call letters are HZY. Radio station HZY is maintained for the purpose of transacting Company business with "in-or-outbound vessels" and is open 24 hours daily. Station HZY will also accept and forward messages concerning ship's agency matters to Agents. However, agency messages to Masters are not permitted. There is no charge for either incoming or outgoing messages.

The marine transmitting antenna of HZY is located at:

Latitude – 26° 18′ 36″ N.
Longitude – 50° 07′ 12″ E.

Due to its inland location Masters are strongly advised NOT to use this antenna for radio direction finding purposes since inaccurate bearings will be obtained due to coastal refraction.

All vessels must endeavour to keep HZY fully advised regarding estimated times of arrival at Ras Tanura, as well as times of actual arrival and position in the anchorage. It is required that vessels provide HZY with a minimum of 3 notices of ETA information, at about 72, 48 and 24 hours "Steaming Time" from Ras Tanura. Shorter notices may result in berthing delay. If loading part cargoes at other Arabian Gulf ports prevents a vessel from furnishing an accurate ETA, steps should be taken to dispatch a message either direct or through the ship's Agent giving the best estimate possible at the time. This message should then be followed by an accurate ETA immediately upon departure for Ras Tanura. Failure to give at least 24 hours notice will result in an addition to allowable laytime in the event a demurrage claim is filed against Aramco.

Upon first contact with all inbound tankers HZY will transmit the following 2 standard messages of 188 and 50 words:

188 Word Message:

Master Rastanuraradio/HZY

Contact HZY soonest advising One ETA GMT Rastanura Two any later changes Three Agents name and requirements Four arrival departure draft fore and aft Five arrival displacement tonnage Six deballasting hours Seven maximum loading rate full-stop Vessel urged to accept highest possible loading rate stop Vessels loading cargo advise previous cargo and if cargo or residue aboard to be co-mingled with Rastanura cargo fullstop If VHF aboard call Aramco pilot station for anchoring, boarding and berthing instructions when 100 miles out on 156.8 Channel 16 or 156.7 Channel 14 stop If no VHF aboard contact HZY 500 kHz and copy traffic lists on odd hours for berthing instructions stop On arrival anchorage advise HZY official readiness time and anchored position stop Radio messages without charge fullstop Pilots require sufficient clean ballast for manoeuvring with propellors almost covered and trim limited to 15 feet for Ras Tanura terminal and 8 feet for Ju'aymah terminal stop Imperative all ships operating under early departure procedure copy Aramco HZY traffic list after departure until cargo quantities are resolved and Agent is Authorized to approve documents.

ARAMCO

50 Word Message

Master Rastanuraradio/HZY

Please advise any epidemic diseases or illness onboard and status of crews international certificates of immunization and all ports called past thirty days also destination stop Agent stop Flag stop Net registered tonnage stop Vessel will not be allowed to berth until this information is received.

ARAMCO

It is important that the Master send a reply to the above 2 messages soonest after receipt.

Traffic list transmitting times and frequencies of HZY are as follows:

Transmits on 12811.3 kHz on even-hours GMT from 0600 to 1400 GMT, and on 8480 kHz on even-hours GMT from 1600 to 0400 GMT.

Listens on 12 mHz common Channels 5 and 6 or 8 mHz common Channels 5 and 6 after traffic list transmissions, until all calls have been cleared. HZY then maintains watch on 12 or 8 mHz common Channel 5 until the next scheduled traffic list.

Transmits on 16960 kHz at 1000 GMT and picks up calls in the 16 mHz band until all traffic is cleared.

Transmits on 430 kHz on all odd-hours GMT after call-up is made on 500 kHz. An alternate working frequency of 521 kHz may also be used during busy periods.

Ras Tanura local time is GMT plus 3 hours.

Weather advice, port closure information, hydrographic notices and traffic lists are "dualled" on 430 kHz and 8480 kHz at 0430 GMT and at 1630 GMT. It is requested that all vessels forward their local weather observations to this station, either in code or plain language, to assist in preparation of the Arabian Gulf forecasts.

There is no charge for incoming traffic or for weather observations from vessels.

Messages to ship's Agents are handled by HZY, free of charge. However, the shipping Agents are not permitted to use HZY for outgoing traffic. Address the message to Aramco and indicate the Agent's name as the first word of the text.

There is an aircraft radio beacon, call sign RT, which transmits on 335 kHz and is located at:

Latitude – 26° 37′ 36″ North
Longitude – 50° 09′ 47″ East.

VHF radiotelephone Channel 10 for radar advisory service, and Channels 14 and 16 are available for ship-to-shore communication at Ras Tanura. Channels 14 and 16 are monitored 24-hours-a-day in the Aramco Terminal Planning Office which is located in Dhahran, approximately 25 miles South of Ras Tanura. Harbour Pilots can be contacted on Channels 14 and 16. VHF equipped vessels should try to contact the Aramco Terminal Planning Office when they are within 100 mile range of the port and while at anchor. Use of VHF while alongside the oil piers to contact the Aramco Terminal Planning Office, Pilots, or Agents is permitted.

To facilitate contacting a vessel after departure, it is important that vessels copy HZY traffic lists for several days after leaving Ras Tanura.

There is a Saudi Arabian wireless station located in Dammam; however, this station does not handle marine traffic.

Radio Silence at Piers: The main wireless and radar equipment of any ship must not be operated while the vessel is alongside the oil piers. Use of VHF while alongside the oil piers to contact the Aramco Terminal Planning Office, Pilots, or Agents is permitted.

VHF: See "Radio".

RADAR: *Radar Surveillance Advisory System.*

A Radar Surveillance Advisory System is available to provide informational assistance and to monitor the movements of all ships calling at the Port of Ras Tanura. All ships entering the Ras Tanura Traffic Separation Scheme shall contact the Ras Tanura Pilot Office on VHF Channel 16 and maintain continuous VHF watch on Channel 10 during their entire stay in the Ras Tanura Port and anchorage areas.

In addition to identifying, tracking and monitoring ship movements to and from the Ras Tanura and Ju'aymah Terminal areas, the following services may be provided to vessel's Masters:

(a) Advise upon channel and port conditions, congestion, weather, tides, navigational aides, etc.
(b) Advise upon the movement of other vessels, dangerous manoeuvring situations, and vessels violating port regulations.
(c) Advise upon port regulations pertaining to movement of deep draft departing vessels and priority of vessels movements. (It may be necessary for incoming vessels to reduce speed to permit safe passage of outgoing deep draft vessels.)
(d) Advise upon berthing prospects and anchoring conditions.

The Radar Surveillance Advisory System has been established in order to increase the safety of ships navigating in the Ras Tanura and Ju'aymah areas. However, it is an information and advisory service only, and in no way assumes control of or responsibility for ships navigating in the area.

TUGS: There are two mooring launches available.

BERTH DESCRIPTION AND FACILITIES: Ju'aymah is an Aramco crude oil and fuel bunker loading facility designed for loading and topping-off deep-draft tankers. The port area is located approximately 20 miles N.N.W. of Ras Tanura and 7 miles offshore in Saudi Arabian waters.

The offshore platforms consist of the following:

(a) An Oil Platform (130 ft. by 390 ft.) located in 50 ft. of water at Lat. 26° 54.8′ N. and Long. 50° 01.2′ E. This platform receives crude oil and fuel bunkers from the onshore storage tanks through 4×56 in. submarine crude pipe-lines and 2×24 in. submarine bunker pipe-lines, each being about 35,770 ft. long. The crude oil and bunkers are metered on this platform. The platform is well lighted with general purpose lighting. In addition, 1 fixed white light has been established on each corner of the platform, with a range of visibility of approximately 5 miles.

(b) A control platform (70 ft. by 70 ft.), located 150 ft. North of the Oil Platform and connected to it by a walkway bridge, houses the communications and radar equipment, testing laboratory, offices, control system and meteorological equipment. This platform is marked by a fixed red aircraft warning light.

6 single point mooring buoys have been established. Crude oil and bunkers are received at each buoy from the oil platform through 1 bunker and 2 crude oil submarine lines which are connected to the buoy by flexible submarine hoses. The floating hoses, which extend approximately 1,100 ft. from each buoy, consist of 2×24 in. crude loading hoses with 16 in. tail hoses, except for Berth No. 34 which has 20 in. tail hoses. Each berth has 1×12 in. bunker loading hose, each with ANSI flanges for connection to the ship's manifold. The max. loading rates through each buoy are 110,000 b.p.h. for crude oil and 5,000 b.p.h. for bunkers, except Berth No. 34 where the loading rate for crude is 130,000 b.p.h. Each buoy is marked by a flashing light with a range of visibility of approximately 5 miles.

The 6 mooring berths at Ju'aymah are as follows:

(a) Ju'aymah Berth No. 31 located at Lat. 26° 55.6′ N. and Long. 50° 02.4′ E. Min. water depth in the berth is 93 ft.

(b) Ju'aymah Berth No. 32 located at Lat. 26° 56.4′ N. and Long. 50° 02.1′ E. Min. water depth in the berth is 102 ft.

(c) Ju'aymah Berth No. 33 located at Lat. 26° 57.0′ N. and Long. 50° 02.7′ E. Min. water depth in the berth is 103 ft.

(d) Ju'aymah Berth No. 34 located at Latitude 26° 56.6′ N. and Longitude 50° 04.3′ E. Minimum water depth in the berth is 124 ft.

(e) Ju'aymah Berth No. 35 located at Latitude 26° 55.6′ N. and Longitude 50° 03.6′ E. Minimum water depth in the berth is 112 ft.

(f) Ju'aymah Berth No. 36 located at Latitude 26° 55.6′ N. and Longitude 50° 04.9′ E. Minimum water depth in the berth is 122 ft.

The tank farm with all its associated facilities is located along the coast of Ras Al Ju'aymah, 11 miles N.W. of the Ras Tanura Refinery. A small boat pier for the use of pilot boats, mooring launches and Agents' launches is located 8 miles N.W. of the Ju'aymah Tank Farm.

BERTHING PROCEDURE: A Pilot and a Mooring Master will board the arriving tanker assigned a berth at Ju'aymah at the Pilot Boarding Area located approximately 8 miles East of the Ju'aymah berths. They will carry portable VHF radio sets to be used while on board the tanker for communications with the Ju'aymah Control Platforrm and the mooring boats. They will advise the Master on all manoeuvres and operations relative to berthing, connecting and disconnecting the hoses and unberthing.

The services of the Pilot and Mooring Master and of the mooring launches and their crews are provided without charge and upon the express understanding that they become the Agents and servants of the Owners and/or charterers of the vessel in every respect. Aramco shall not be responsible and shall be held harmless from all liability for any damage resulting from or caused by any action taken, order given or decision made (or any omission thereof) by the Pilot, Mooring Master or launch crew, or in any respect to the handling of such vessel. Damage or injury to any Aramco facility, equipment or personnel by any vessel calling at any loading terminal of the Port of Ras Tanura shall be the responsibility and liability of the Owners and/or charterers of the vessel.

Mooring equipment and other equipment supplied at Ju'aymah will be lifted aboard the tanker from the mooring launch which transports the Pilot and Mooring Master to the Pilot Boarding Area. This equipment will include such things as special mooring gear to be used at the bow, various gaskets, bolts, tools, adapter spool pieces (when required); and portable radios to be used for communications with the Ju'aymah Control Platform during loading operations.

A number of forms related to the oil loading operation will be carried aboard the tanker by the Pilot and Mooring Master. These include a form for description of pertinent parts of the tanker's loading manifold, an ullage calculation sheet for use by the First Officer of the loading tanker and forms for maintaining a log of the berthing, loading and unberthing operations. One form entitled "Instructions to Vessels and Conditions of Use of Loading Facilities" outlines the conditions of the use of the loading facilities and must be signed by the Master of the tanker prior to the start of the berthing operation.

During the approach and while mooring, the tanker's anchors *must* be secured by stoppers to prevent accidental dropping with subsequent damage to the loading buoy mooring chains or the undersea pipe-lines. Mooring boats will normally assist in the berthing, mooring and hose handling operations. A boat will approach the tanker's bow, take the messenger line and secure it to the end of a 10 in. polypropylene "pickup" line from the mooring arrangement. The "pickup" line will be hove through the centre of port mooring chock until the chafing chain is in the chock. A 15 in. nylon strop which previously will have been secured to the tanker's bollards will then be secured to the chafing chain using a 3 in. bow shackle between the strop and the chafing chain. On tankers equipped with a Smit's towing bracket or brackets, the chafing chain will be secured to an open link in the bracket using a bow shackle. *Mooring and unmooring, connecting and disconnecting of the cargo and bunker hoses is to be performed by the crew of the loading tanker under the direction of the Pilot and Mooring Master.* Communications between the Pilot and the Mooring Master or the bridge and forecastle will be by means of portable VHF radio.

PRELOADING PROCEDURE: Upon completion of berthing, a Pilot/Mooring Master, who will remain on board throughout the loading and unberthing of the tanker, will carry out activities related to Aramco safety requirements and planning, and monitoring of the loading operation.

In order to avoid delays in connecting hoses, tankers scheduled to load cargo and bunkers at Ju'aymah should have an adequate number of reducing spools to fit 20 in., 16 in. and 12 in. standard 150 lb. ANSI flanges on the portside manifold.

Aramco is a member of the Oil Companies International Marine Forum and participates vigorously in a programme developed to ensure adequate safety aboard tankers during the time they are at Aramco piers or berths. A part of this programme involves use of a check list by the Mooring Master to make a thorough inspection of tankers both prior to and during loading operations. This programme is in effect at Ju'aymah, and Mooring Masters who board tankers will be making necessary inspections, posting authorised smoking locations, issuing letters of protest for violations, and shutting down loading or refusing to load a tanker if unsafe conditions are not adequately corrected.

BALLAST REQUIREMENTS: Due to the exposed location of the Ju'aymah berths, tankers scheduled to load crude at Ju'aymah should arrive with adequate clean ballast for safe handling having due regard for existing weather and sea conditions. Tankers will be required to arrive with propellers almost covered and sufficient clean ballast tanks available to allow a trim of 8 ft. by stern. Masters should contact Ras Tanura Pilot Office for weather conditions at the loading facilities.

Aramco is particularly interested in having vessels complete the deballasting operation promptly after berthing in order to minimise time at berth. Simultaneous loading and deballasting is encouraged on properly equipped vessels. Owners/operators or charterers of vessels requiring time to deballast in excess of what Aramco considers standard will be so notified by letter with a copy to the Master.

Discharge into the sea of oil or oil base products in combination with ballast water is not allowed. Since the Ju'aymah Terminal does not have facilities to receive any oil residues or oily ballast water, tankers arriving with such materials on board will be sent to anchorage to await further orders unless the vessel agrees to load on top of such material or unless the ship's Master agrees to segregate such materials in a separate tank. Ships which release oil or oil residues including oily ballast water in either berth or anchorage area will be held responsible for all clean up costs.

LOADING PROCEDURES: The oil loading operation will be controlled by VHF radio voice communications between the Mooring Master on the loading tanker and the Ju'aymah control platform. All operations including switching of tanks and topping off must be directly and personally supervised by a ship's officer. The max. crude loading rate at any of the berths will be 130,000 b.p.h.

Upon being informed by the loading tanker's personnel that the tanker is ready to start loading, the Mooring Master will request the loading operation to proceed according to previously agreed plan with respect to start-up rates, max. loading rates and topping off rates. Need for emergency shut down of loading aboard the tanker must be communicated via VHF from the loading tanker to the Ju'aymah control platform.

In the event of the failure of the VHF communications system, the tanker will sound 5 long blasts on the ship's whistle followed by 1, 2, 3, 4, 5, or 6 short blasts for a tanker at berth 31, 32, 33, 34, 35 and 36 respectively. Loading operations will be stopped and will not be resumed until communications have been re-established.

UNMOORING PROCEDURE AND DEPARTURE: Upon completion of loading, documentation procedures, disconnection and removal of hoses, the tanker will be unberthed by the Mooring Master. To unmoor from the buoy, the pickup rope is taken to the winch and the weight is taken off the chain. The chain is then unshackled and the rope is slacked as the tanker backs out of the berth. The end of the pickup rope is cast off and floats free.

Upon completion of unmooring, the tanker will make a lee, the mooring and hose connecting equipment will be transferred to the mooring launch and the Pilot/Mooring Master will disembark.

The tanker will then be free to leave the port via the Ju'aymah Departure Channel if the Early Departure Procedure is being followed and all cargo and port clearance documents are completed and on board. Otherwise, the tanker must proceed to the Northern Holding Anchorage to await port clearance and document delivery by ship's Agent.

FUEL: Bunkering facilities are operated by Aramco, and fuel bunkers are available at all berths at Ju'aymah Terminal. Vessels are expected to provide adequate advance notice of bunker requirements in order to avoid possible delays.

Vessels taking only bunkers are urged to call at Ras Tanura *prior* to loading cargo elsewhere to avoid delays caused by draft and berth assignment problems.

Masters employing the services of the various bunkering services from the Port of Dammam are not permitted to bunker their vessels within the operating area of the Port of Ras Tanura.

Also see "Ras Tanura".

DENSITY: 1025.

POLLUTION: Discharge into the sea of oil or oil base products either alone or in combination with ballast water is not allowed. Since the terminal does not have facilities to receive any significant amount of oil residues or oily ballast water, tankers arriving alongside with such materials on board will be sent to anchorage to await further orders unless the vessel has prior clearance to load on top of such material or unless the ship's Master agrees to segregate such materials in a separate tank. Ships which release oil or oil residues including oily ballast water in either berth or anchorage area will be held responsible for all clean-up costs. The ship's Master shall be expected to acknowledge by his signature receipt of a Pollution Letter of Protest, informing him that a pollution incident attributable to his ship has occurred and that clean-up cost will be billed to the ship Owners.

All incidents of oil discharge to the sea are investigated and documented and these reports are provided to the Saudi Arabian Government officials in accordance with their requirements.

GENERAL: *Oil Inspection:* Independent oil inspection service is available at Ras Tanura and Ju'aymah by the following agencies:

(a) B & R Redwood, Orchard Sea, Winkfield, Nr. Windsor, Berks., England.

(b) Caleb-Brett, c/o Kanoo, Ras Tanura

(c) E. W. Saybolt and Co., S.A., 400 Swenson Drive, Kenilworth, New Jersey 07033, U.S.A

(d) G. Watson Grey, Harrisons Wharf, London Road, Purfleet, Essex, England.

The American Bureau of Shipping, Norske Veritas, and Lloyds of London maintain a marine surveyor at Manama on Bahrain Island.

Ship Agencies: Vessels calling at Ju'aymah should address all ship's business messages to their Agent through "Aramco HZY". Matters concerning provision supply, minor repairs, local medical or hospital services, mail, crew changes, etc. are to be handled by the ship's Agent.

Time Zone: The company generally bases its local time on the 45th meridian (3 hours East of Greenwich). In order to avoid any confusion, all communications should be quoted in GMT.

Arab League Ban: All member states of the Arab League prohibit the export through their ports of any material consigned to Israel. Further, all ships having called at Israeli ports subsequent to April 25, 1952, are banned from Saudi Arabian ports.

Security Patrol Boat: An Aramco Security Patrol Boat will patrol the Ju'aymah offshore area.

Saudi Arabian Government Regulations: Saudi Arabian Government Regulations are strictly enforced, and Masters having any doubts concerning the interpretation of these regulations are urged to consult their Agent. While in port, whether at anchorage or at berth, the vessel's personnel are under the jurisdiction of Saudi Arabian laws.

The taking of photographs while the ship is in the Port of Ras Tanura is prohibited by the Saudi Arabian Government.

All alcoholic beverages, including beer, table wines and liquors are to be under lock and key during a vessel's stay in port. The possession and/or consumption of alcoholic beverages is prohibited in Saudi Arabia. Penalties are severe and major delays to vessels can be incurred by Government investigations of violations.

Port Officials: Saudi Arabian Government Authorities – Customs, Quarantine, Coast Guard, and Port Officials – have offices at various locations at the Ras Tanura Terminal, Ju'aymah Terminal and Rahima. The ship's Master shall make all necessary contact with the Saudi Arabian Government authorities through the ship's Agent.

A United States Consulate General is established near Dhahran, approximately 50 miles South of Ras Tanura.

A British Embassy is established on Bahrain. It is very difficult, however, to contact Bahrain by shore telephone from Ras Tanura or Ju'aymah, and Masters having business there usually arrange to call at the Port of Sitrah (sometimes spelt Sitra).

Inbound Clearance: The ship's Agent will develop information necessary to fill in clearance application and port clearance forms. Cargo requirements will be reconfirmed, and information required to expedite mooring, hose connection and other operational details will be exchanged with the Ras Tanura Pilot Office on VHF radio prior to the tanker's arrival at Ju'aymah.

Import – Export Customs: All materials to be either exported from or imported into Saudi Arabia are subject to examination by customs authorities. The importation of certain articles is strictly prohibited. Such articles include:

- Explosives and firearms, including air rifles.
- Implements of war of any kind, including antiques.
- Alcoholic beverages, including beer and wines.
- Religious matter not pertaining to the Moslem faith.
- Playing cards and gambling devices.
- Narcotics.

Trafficking in these items between ships also is strictly prohibited, whether the ships are at anchor or at berth. The Saudi Arabian Government forbids trafficking between ship crews and shore personnel.

Swimming: Or other activities involving life boats in the vicinity of a tanker are not permitted.

SAFETY REGULATIONS: *General:* The Port of Ras Tanura (including the Ju'aymah Loading Facilities) maintains a vigorous safety programme. Aramco is a member of the Oil Companies International Marine Forum and as such follows the procedures recommended by this organisation. As is done at other Gulf oil ports, the Pilot/Mooring Master as terminal safety representative will discuss in detail with the tanker Master, each item of the "Declaration by Master" which reviews safety requirements and procedures. Prior to start of loading cargo and at several times during the loading, the Pilot/Mooring Master, in company with one of the ship's officers, will check to ensure that safe loading practices are being observed.

Emergency Procedures: In the event of a fire or explosion on board a vessel which is berthed at a Ju'aymah buoy, the course of action to be followed will depend upon the particular facts and circumstances of the incident. It is impossible to indicate exactly what practices will be applied before an evaluation of the specific emergency situation can be made by the Pilot/Mooring Master. His decisions will be based on the following principles:

(*a*) An evaluation of the particular emergency will be made by the Pilot/Mooring Master. His decision as to course of action will be based on the location, type and extent of fire, or explosion, taking into account tide and wind conditions, buoy location and proximity of other vessels.

(*b*) Circumstances permitting, a burning vessel will not be permitted to remain moored to the buoy, and the Master will unmoor the vessel when directed to do so by the Pilot/Mooring Master.

(*c*) Assistance will be rendered by available launches, tugs and other craft to the extent possible, as requested by the Pilot/Mooring Master.

(*d*) Prime consideration governing action to be taken will be to protect personnel, terminal facilities and other vessels, and to contain and control the emergency.

Should a fire or explosion occur at a buoy mooring, the oil loading platform or control platform, all cargo operations will be stopped and all vessels should stand by to disconnect and unmoor when so instructed by the Mooring Master, or when the need to take such action becomes self evident.

The signals for emergency are a continuous ringing of the ship's alarm bells supplemented by 6 short blasts followed by 1 long blast of the ship's whistle or siren. Assistance may be summoned on VHF Channel 16. Location, nature of emergency and type of assistance required should be given.

It is the responsibility of the tanker's personnel to watch its tanks at all times and to give ample warning to reduce the loading rate or shut off the pumping.

Precautions Against Static Ignition: Tanks must be gas-free within 0.4 of the lower flammable limit before loading kerosene, kerosene-type jet fuel, and white diesel. Crude oil and all other products except RLPG may be loaded into tanks which are either gas-free or non-gas-free. Ships' tanks and lines must be free of water. Splash filling is prohibited. Loading rates for kerosene and kerosene-type jet fuel will be reduced as follows:

(a) Loading is commenced at a rate not to exceed 1,000 b.p.h. per cargo tank, until the liquid in each tank has reached a level of 20 ft.

(b) Above the liquid level of 20 ft., the loading rate is limited to 1,500 b.p.h. per cargo tank, maximum.

No ullage gauges, temperature readings or samples shall be taken until at least 30 minutes after loading has been stopped to that tank to allow static charges to dissipate. No loose floating objects are permitted in tanks to be loaded. Automatic tank gauges and non-conductive ullage sticks may be used at any time.

Under certain conditions, the above restrictions will also apply to loading of heavy naphtha and gasoline-type jet fuel (JP-4).

Hydrogen Sulphide Hazards: Aramco crudes may contain dissolved hydrogen sulphide (H_2S) in concentrations which would cause the gases vented during tanker loading to be hazardous if inhaled. We recommend that Masters review the instructions issued by the Owners/charterers about hydrogen sulphide hazards. If the loading of H_2S bearing crude oil is not covered by such instructions, Aramco has available, upon request, a list of recommendations to aid the Masters.

APPENDIX:
Appendix IV:

Arabian American Oil Company
Instructions to Vessels and Conditions of Use
of Ju'aymah Loading Facilities
Ras Tanura, Saudi Arabia

Master S/S – M/V:

1. Vessel will be moored at Ju'aymah Berth No......................
2. Discharge into the sea of oil or oil base products in combination with ballast water is not allowed. Ships which release oil or oily ballast water in either the berth or anchorage area will be held responsible for all clean-up costs.
3. Prior to loading, the Pilot/Mooring Master will inspect the vessel for conformity with safety requirements and will review in detail each item on Aramco Form 5626 "Declaration by Master". This form will be acknowledged and signed by the Master.

Mooring and Manoeuvring:

1. Full power must be available for manoeuvring in and out of the berth. Manoeuvres with other than full power available shall be performed only after the consent of both the Port Captain and Pilot/Mooring Master have been obtained.
2. The Pilot/Mooring Master will advise the Master during the mooring and unmooring of the tanker and will supervise the connecting and disconnecting of cargo and bunker hoses by the tanker's crew. The loading operation will be performed to the complete satisfaction of the Pilot/Mooring Master.
3. Mooring will be accomplished with the assistance of marine craft assigned to the vessel by Aramco.
4. All tank tops, ullage plugs and sighting ports shall be closed before berthing.
5. The vessel's Master shall notify the Mooring Master of any special conditions, difficulties, defective equipment or gear which could impose special hazards when mooring, unmooring or loading cargo.
6. All navigational equipment such as the engine, telegraph, whistle, steering gear, etc., shall be tested prior to getting underway to moor and unmoor. Testing of the tanker's engine when berthed shall be done only after the Pilot/Master has been duly informed and his consent has been obtained.
7. The Mooring Master may decline to moor a vessel with unsatisfactory mooring equipment.
8. No repairs are permitted while the vessel is berthed. The engine and deck machinery will be kept ready to permit the vessel to get underway on an emergency basis.
9. Any vessel delay resulting from failure to comply with any of the provisions of this document shall be for the vessel's account.
10. Upon completion of loading and the disconnection of hoses, the vessel will be unmoored and, if using Early Departure Procedures, the Master should make ready to depart as soon as possible. Otherwise, vessels are to await cargo and port clearance documents while lying in stream.

Saudi Arabian Government Port Regulations:

1. Quarantine signals must be displayed upon entering the coastal waters of Saudi Arabia and approaching Ju'aymah in accordance with international practice and shall be continuously displayed until pratique is granted. These signals shall be as follows:
   Sunrise to Sunset – Quarantine Flag.
   Sunset to Sunrise – Quarantine Signal Lights
   (Red over White).
2. The Saudi Arabian flag must be flown from the foremast while your vessel is in the coastal waters of Saudi Arabia. Such flags are available from the ship's Agent. The Saudi Arabian flag is properly displayed when the writing appears on top and the sword on the bottom.
3. Importation and/or use of liquor or contraband items, or trafficking in such items, is absolutely prohibited. The Saudi Arabian Government rigidly enforces these regulations and penalties are severe. In the event of violation considerable delay to the vessel involved could occur.
4. Ship's personnel are not permitted to leave their vessel.

Conditions of use of port.

1. The Master of the vessel shall remain solely responsible for the safety and proper operation of the vessel at all times. Neither Aramco nor its personnel shall be responsible for any loss or damage arising in consequence of any assistance, instructions or advice given or tendered in respect to the vessel.
2. The use of Aramco premises, facilities and equipment is subject to the express understanding and condition that Aramco and its personnel shall be held harmless from all liability, loss or claim thereof arising out of such use.
3. The Pilot/Mooring Master is supplied upon the condition that when boarding or assisting the vessel he becomes the Agent and servant of the Owners and/or charterers of the vessel in every respect. Aramco shall not be responsible and shall be held harmless from all liability for any damage resulting from or caused by any action taken, order given, or decision made (or any omission thereof) by the Pilot/Mooring Master or in respect to his handling of the mooring or cargo loading operations.
4. When the assistance of small craft is supplied (mooring launches and/or a utility boat), the craft, Master and crew thereof shall, in the performance of such services as they render to the vessel, become and be deemed to be the Agents and servants of the Owners and/or charterers of the vessel assisted. Aramco shall not be responsible and shall be held harmless from all liability for any damage that may be done by or to the craft or their crews while assisting the vessel, whether occasioned by any act of omission of the crafts or their crews or by any defect or inadequacy of the craft or the craft's machinery or gear. This shall not give the tanker's Master the right to detain such craft for duties other than mooring, unmooring or hose work nor shall this prevent the craft from being reassigned during mooring, unmooring or hose work.
5. No vessel may berth without an Aramco Pilot/Mooring Master on board.
6. Pilots/Mooring Masters will not assist in the mooring of any vessel unless they have the Master's signature on the acknowledgement below.

Master's Acknowledgement.

I hereby acknowledge receipt of a copy of this document and agree to the Instructions and conditions set forth therein.

(B) *RLPG LOADING TERMINAL*

TERMINAL: The Ju'aymah LPG Terminal is an Aramco-operated facility designed to load refrigerated liquid petroleum gas (RLPG) aboard LPG carriers ranging in size from approximately 25,000 cu.m. to 200,000 cu.m. The terminal area is located approximately 18 miles North-Northwest of Ras Tanura, just South of the Ju'aymah crude oil terminal.

The onshore complex consists of fractionation, refrigeration, compression and storage facilities. Product storage consists of seven insulated dome-roof tanks of 600,000 barrel capacity each – four in propane (A-140) service and three in butane (A-160) service. Booster and shipper pumps are located in the onshore tankage area. In addition to the LPG product tanks, there are two 50,000 barrel bunker fuel oil tanks and one 30,000 barrel black diesel tank.

A trestle, approximately six miles long, connects the onshore facilities to a two berth, offshore loading platform. The trestle consists of an access roadway and a pipeway for the product and bunker lines.

The two loading berths are situated on opposite sides of a platform located at Latitude 26° 52.0′ N. and Longitude 50° 02.9′ E. Berth alignment is 335° True, Berth 51 being the East berth and Berth 52 being the West berth. Minimum water depth at berth is approximately 78 ft. (23.8 m.) at ISLW (Indian Spring Low Water). There are 4 breasting dolphins at each berth and 6 mooring dolphins for safely securing a ship at berth. A tower crane is located in the middle of the platform. Loading facilities at each berth consist of four 16 in. LPG loading arms, all capable of either propane or butane loading service or vapour return. Bunker fuel or black diesel can be loaded through both of the 8 in. loading arms located on either side of the LPG loading station.

Loading Rates:	Propane/Butane	30,000 b.p.h.
	Bunker/Fuel	5,000 b.p.h.
	Black Diesel	600 b.p.h.

DOCUMENTS: *Inbound Clearance:* The ship's Agent will develop information necessary to fill in clearance application and port clearance forms. Cargo requirements will be reconfirmed, and information required to expedite mooring, loading arm connection and other operations details will be exchanged with the Ras Tanura Pilot Office on VHF radio prior to the tanker's arrival at Ju'aymah.

See Section (A) "Documents" for a listing of the documents required for immediate inspection by Saudi Arab Government officials upon arrival.

Documentation Procedures: Upon completion of loading at the time of unmooring, the tanker must have on board port clearance documents, bill of lading and export manifest, see Section (A) "Documents". Close coordination with the ship's Agent is required in order to expedite the issuance of these documents and their delivery to the ship.

To permit more rapid ship turnaround, an Early Departure Procedure (EDP) is available by which a ship may clear the port and depart without the necessity of waiting for the delivery of documents at anchorage. Use of this special service is encouraged, and it should be requested and arrangements with the Agent at the earliest opportunity. When operating under Early Departure Procedure, it is imperative that, after departure, HZY Traffic Lists be copied until cargo quantities are resolved and the ship's Agent is authorized to approve documents.

PILOTAGE/TUGS: In addition to radar advisory assistance which is available on request on VHF Channel 10, the channels of the Ras Tanura Separation Scheme are well marked by lighted, radar-reflective beacons and buoys. Presently, for this reason, Channel Pilots are not provided.

The use of Harbour Pilots, however, is compulsory for all vessels calling at the Port of Ras Tanura to use any of the terminal facilities. The Harbour Pilots moor, unmoor and supervise the movements of all vessels in the vicinity of the piers. Aramco Harbour Pilots are on duty continuously and at present their services are provided without charge, although Aramco reserves the right to charge for these services.

Mooring and unmooring assistance is provided by Aramco tugs and their use is also mandatory. The use of both Harbour Pilots and tugs is subject to the conditions detailed in Appendix III, "Instructions to Vessels and Conditions of Use of Port". (See "Ras Tanura").

INBOUND TRAFFIC PROCEDURES: Dependent on port conditions and other factors, arriving tankers which will load cargo at the Ju'aymah LPG Terminal may be directed to proceed according to one of the following procedures:

a) Vessel with No Special Instructions: The vessel should make for a position approximately 2 miles North of Ras Tanura Light Float in position 27° 05.6′ N. 50° 57.5′ E. and then enter the inbound channel. This will take the vessel past the Approach Buoy to the Entry Buoy. The vessel should then proceed to the Northern Holding Anchorage. The anchor time and position should then be passed to the Aramco Terminal Planning Office and Ras Tanura Pilot Office.

b) Vessel Proceeding to Ju'aymah LPG Terminal: The vessel should make for a position approximately two miles North of the Ras Tanura

Light Float in position 27° 05.6′ N. 50° 57.5′ E. and enter the inbound channel. The vessel should notify Ras Tanura Pilot Office on passing the Ras Tanura Light Float and will be in turn be advised of berth prospects. Proceed past the Approach Buoy and Entry Buoy and make for a point approximately 2.5 miles N.E. of Buoy 3A in position 26° 56.3′ N. 50° 11.5′ E. and proceed to the Ju'aymah Pilot Boarding Area. Should the Pilot not be boarding immediately on the vessel's arrival, the vessel may be instructed to anchor in the Pilot Boarding Area and to pass the anchoring time and position to the Ras Tanura Pilot Office.

c) Vessel Proceeding from Northern Holding Anchorage to Ju'aymah LPG Terminal: On receiving instruction to proceed to Ju'aymah LPG Terminal, the vessel should heave up anchor and re-enter the inbound channel making for a point approximately 2.5 miles Northeast of Buoy 3A in position 26° 56.3′ N. 50° 11.5′ E. and proceed to the designated Ju'aymah Pilot Boarding Area. If the vessel has been advised that the Pilot will not board immediately on arrival, it may be instructed to anchor in the Pilot Boarding Area and await further instructions. The anchoring time and position should be passed to the Ras Tanura Pilot Office.

d) Vessel Proceeding from Ras Tanura to Ju'aymah LPG Terminal: The vessel should depart Ras Tanura and follow the departure channel towards the mid-channel marker buoy, R.T.1, in position 26° 56.2′ N. 50° 12.6′ E. The vessel should proceed through the caution area, *exercising due diligence in this area,* and thence continue to the Ju'aymah LPG Terminal. If the vessel has been advised that the Pilot will not board immediately on arrival, it may be instructed to anchor in the Ju'aymah Pilot Boarding Area and await further instructions. The vessel should inform Ras Tanura Pilot Office of its anchor time and position.

ANCHORAGE: *Ju'aymah LPG Terminal Anchorage:* See "Plan".

The Ju'aymah LPG Terminal Anchorage has been laid out approximately 2.5 miles N.E. of the loading pier to provide quick access to the Ju'aymah LPG berths. The depth of water in this anchorage varies from 16.3 m. to 30.0 m. (53 ft. to 98 ft.) and holding ground is fair.

All inbound vessels shall have established early radio contact with ARAMCO RAS TANURA via Station HZY for the exchange of information, berthing prospects and arrival instructions. In addition, contact with the Aramco Terminal Planning Office and the Ras Tanura Pilot Office shall be made by VHF radio Channel 16 if the vessel is equipped with VHF. In accordance with the instructions received from these offices, the vessel may be instructed to proceed to the Northern Holding Anchorage if there are no prospects for immediate berthing. However, as soon as port conditions permit and a vessel is scheduled to berth and load at the Ju'aymah LPG Terminal, the Master will be advised by the Pilot's Office to proceed to the Ju'aymah Pilot Boarding Area for pilot boarding and berthing.

RADIO: For information relating to communications and the exchange of radio messages with inbound tankers, see Section (A) "Radio".

It is required that vessels contact "Aramco Ras Tanura" via HZY and provide a minimum of three notices of ETA information at about 72, 48 and 24 hours "steaming time" from the Northern Holding Anchorage. Shorter ETA notices may result in delays and failure to give at least 24 hours notice will result in an addition to allowable laytime.

It is imperative that vessels departing under Early Departure Procedure monitor HZY and copy traffic lists after departure, until cargo quantities are resolved and the Agent is authorized to approve documents.

BERTHING: *Berthing and Preloading Procedures:* Tankers calling at the Port of Ras Tanura are assigned to berths based on various factors including but not limited to the following: nomination date, time of arrival, product to be loaded, vessel size, available berths and loaded draft.

Whenever possible, endeavours are made to berth vessels immediately upon arrival, and to this end the Master should establish early contact with station HZY and maintain VHF radio contact with the Aramco Terminal Planning Office on the listed frequencies. (See Section (A) "Radio"). If there are no immediate berthing prospects, vessels will be directed to proceed to and anchor in the "Northern Holding Anchorage" and maintain radio contact with the Ras Tanura Pilots' Office and the Aramco Terminal Planning Office by VHF radio.

If a berth is available and the vessel's quarantine message and notice of arrival and readiness have been received by radio, the vessel will be instructed to proceed toward the Ju'aymah Pilot Boarding Area for boarding by the Harbour Pilot and immediate berthing. The Harbour Pilot will supervise the manoeuvring of the vessel to the assigned berth.

In order to ensure the safety of personnel, tankers and loading facilities and to prevent accidental spillages, Ras Tanura Port Authorities strongly recommend the use of wire mooring lines in accordance with the schedule. (See Ras Tanura – "Berthing"). For vessels equipped with both wire and synthetic lines, mixing types must be avoided to the extent possible, thereby keeping the same type lines in the same service.

During periods of unsettled weather, arriving vessels fitted with sufficient wires are preferentially berthed whereas vessels equipped with synthetic lines or two few wire lines are held out in stream until the weather improves and it is safe to moor them. If a ship with synthetic lines is already moored and squall conditions arise, loading to that vessel will be stopped and the loading arms disconnected until weather conditions improve and it is judged safe to resume the loading operating. The use of nylon or other highly elastic line is prohibited.

At the piers, vessels must be moored to the entire satisfaction of the Harbour Pilot. Vessels must be ready at all times to put out more lines as requested by the Harbour Pilot or pier personnel, or as dictated by weather changes. All vessels moored at the piers must have deck winches in readiness for immediate use. All vessels moored with automatic tension winches shall set the manual brakes on these winches.

Pier crews are on duty continuously to handle loading arms and mooring lines. Mooring lines on board vessels will not be handled by Aramco personnel.

All loading connections are equipped with electrical insulating flanges. Therefore, ship to shore bonding cables are not required.

PROCEDURES/REGULATIONS FOR LPG LOADING: Tankers which are to load LPG at Ju'aymah will be berthed at either Berth 51 or Berth 52, both of which have a water depth of approximately 78 ft. (23.8 m.) at ISLW (Indian Spring Low Water). Both butane and propane are loaded through 16 inch arms which are fitted with Quick Connect/Disconnect Couplers (QCDC). These arms can also be used for vapour return during loading operations.

The Ju'aymah facilities for loading LPG are not designed for loading pressurized cargoes and LPG will not be loaded onto a tanker which does not have adequate shipboard refrigeration capacity and chilled tanks. Ship tank bottoms must be cooled to minus 38 degrees Fahrenheit (−38° F) maximum for A-140 propane loading, and to plus 32 degrees Fahrenheit (+32° F) maximum for A-160 butane loading. Tank top temperatures should be within 20 to 25 degrees Fahrenheit of the tank bottom temperature. Tank pressure is not to exceed 1.0 PSIG (0.07 kg/cm^2).

After a tanker is secured at berth and prior to the beginning of any loading operation, the Master or a ship officer designated by him will meet with the Ju'aymah LPG Terminal Senior Shift Operations Representative in order to discuss and develop the vessel's loading plan. Items to be discussed will include, but not be limited to, the following:

a) Temperature and pressure of each ship's tanks.

b) Product to be loaded in each tank and the sequence of tank loading.

c) Quantity and type of product, if any, in each ship tank and whether it is a part cargo or residue required for tank cooling.

d) Loading rates of each product.

e) Safety procedures and safe loading practices.

All excess vapours which cannot be handled by the tanker's vapour recovery equipment will be metered to the flare.

Appendix VIII, (which see) entitled "Special Regulations for Loading Refrigerated LPG (RLPG) at Ju'aymah" provides detailed information on requirements and procedures for loading LPG at the Ju'aymah Terminal.

UNMOORING PROCEDURES AND DEPARTURE: Upon completion of loading, documentation procedures and un-hooking of loading arms, the tanker will be unmoored and the Harbour Pilot will disembark. The tanker will then be free to leave the port via the Ju'aymah Departure Channel if the Early Departure Procedure is being followed and all cargo and port clearance documents are completed and on board. Otherwise, the tanker shall proceed to the Ju'aymah LPG Terminal Anchorage to await port clearance and document delivery by the ship's Agent.

EMERGENCY PROCEDURES: In the event of a fire or explosion at the pier, or on board a vessel which is berthed alongside at the terminal, the alarm signal will be a one minute continuous blast of the siren. The course of action to be followed by Aramco Terminal personnel will be dictated by the particular facts and circumstances of the incident. Although it is impossible to indicate exactly and completely what practices will be applied during an emergency before an evaluation of the specific situation can be made by the responsible Terminal representative, his decisions will be based on the following principles:

1. An evaluation of the particular emergency will be made by the responsible Terminal Representative to determine the immediate course of action to be taken. His decision as to the course of action will take into account the location, type and extent of fire or explosion, the berth location, proximity of other vessels, and the tidal and wind conditions.

2. A burning vessel will not be permitted to remain alongside the berth. If possible, the fire will be fought with available berth fire-fighting facilities until the arrival of tugs. After hook-up of the tugs to the vessel's fire wires, if the fire is not controllable or extinguished, the vessel will be released or cut free and removed from berth under controlled conditions.

3. When communication facilities permit, the Master or responsible ship's officer, will be advised prior to releasing or cutting free a vessel from berth. The Master should designate a responsible senior ship's officer with whom the senior Terminal Representative present can communicate in case of a fire or explosion aboard the vessel. When possible, this officer will be advised of the actions to be taken in releasing or cutting the vessel free from berth.

4. Although a vessel may have no power, it may be released or cut free from berth prior to the arrival of the tugs and hook-up to the vessel's fire wires, if in the opinion of the senior Terminal Representative present it is a greater hazard at the berth than drifting free. Normally, however, a burning vessel will be removed by tug boats under controlled conditions.

Note: The above mentioned Principles are intended to provide the guidelines of action to protect terminal personnel and facilities, and other vessels at the Aramco loading piers.

APPENDIX: Appendix 8

REGULATIONS: *For Loading Refrigerated LPG (RLPG) at Ju'aymah:*

THE MASTER . . .

Refrigerated LPG is loaded at Ju'aymah RLPG Terminal on Berths 51 and 52.

The water depth at ISLW is approximately 80 ft. at each berth.

RLPG is loaded via 16 in. loading arms. The maximum loading rate for each product is 30,000 b.p.h. Each berth is equipped with 4 LPG loading arms which may be used for butane liquid, propane liquid or vapour return to flare. All 8 LPG loading arms are fitted with quick connect/disconnect couplets (QCDC). Each LPG loading line has an associated circulation return line. Loading lines must be on circulation at least 4 hours prior to commencement of loading. No two ships are loaded from one loading line simultaneously.

Vapour line *must* be connected prior to loading LPG cargo. This also includes those vessels loading coolant.

Before being transferred from the loading line to the loading barrel and arms, the propane and butane products are metered. The metering system is designed for loading rates between 100 and 30,000 b.p.h. for each product.

Turbine type meters are provided ranging from 3 in. to 12 in.

The meters provided are as follows:

1-3 in. meter for low capacity such as cool down and topping off.
2-6 in. meters for intermediate flow rates.
3-12 in. meters (two operational and one spare) for full flow rates.

Meter Capacities

3 in. Meter: 79 – 929 b.p.h.
6 in. Meter: 343 – 4,140 b.p.h.
12 in. Meter: 1,900 – 17,100 b.p.h.

Butane and propane may be sub-cooled 5 degrees by means of Freon Chillers.

The following specific regulations will be followed for every LPG vessel loading at Ju'aymah.

1. Prior to starting any RLPG cargo loading the senior shift operations representative shall confer with the vessel's Master and/or Responsible Loading Officer to determine the following:

1.1 Quantity and type of product in each ship tank and whether it is part cargo or residue required for cooling.

1.2 Temperature and pressure of each ship tank.

1.3 Product to be loaded in each ship tank.

1.4 Residue in the ship tanks will be measured by the Independent Inspector assigned to the ship and witnessed by the Aramco senior shift operations representative.

2. Facilities at Ju'aymah *are not* designed for loading pressure LPG and *no* LPG will be loaded into ship's tanks that are not equipped with refrigeration facilities and are not adequately chilled.

2.1 Ship tank bottoms must be cooled to minus 38 degrees Fahrenheit maximum for A-140 propane loading and zero to plus 32 degrees Fahrenheit maximum for A-160 butane loading. Top temperatures should be within 20-25 degrees Fahrenheit of the bottom temperature.

2.2 Tank pressure is not to exceed 1.0 PSIG or 0.07 kg/cm^2.

3. Butane may be loaded into ship tanks containing residue up to 10% of the cargo to be loaded.

4. Propane may be loaded into ship tanks containing propane residue up to 10% of the cargo to be loaded.

5. Butane or propane may be loaded into ship tanks containing part cargo of the same grade only by authorization of the offtaker. This authorization shall be obtained through Manufacturing and Oil Supply Department of Aramco Services Company. Quantities of over 10% of the cargo to be loaded shall be considered part cargo.

5.1 Part cargo on board at the time of the vessel's arrival must be measured by the Independent Inspector and witnessed by Armaco senior shift operations representative regardless of whether Aramco cargo is to be loaded on top or not.

5.2 To confirm that the part cargo is the same as A-140 propane or A-160 butane, the vessel's propane part cargo must be (−38° F) maximum, and the butane part cargo must be (+32° F) maximum.

6. Should the vessel be unable to comply with the provisions of paragraphs 3 and 4, Aramco operations management representatives shall confer with the vessel's Master and/or responsible loading officer to develop a loading procedure for the safest possible loading for the tank(s) containing dissimilar residue. The procedure shall be in writing, agreed to by both parties and take into consideration loading rates, temperatures, pressures and all possible safeguards to ensure minimizing the dangers to ship and shore installations. It must be understood that this procedure will involve delays to the vessel and will impose additional workloads on both shore and ship personnel.

7. IN NO CASE WILL LOADING BE PERMITTED INTO SHIP TANKS CONTAINING LIQUID PRODUCT OF A DIFFERENT GRADE IN EXCESS OF TEN TONS.

8. When a vessel requires special handling, as described above, the vessel shall be given a letter of protest, with copies to owners and operators. The letter shall state that the vessel has been handled on a *one-time-only basis* and advise that upon its next arrival at Ju'aymah it will have disposed of any residual cargo or have a nomination which will preclude loading dissimilar products.

9. RLPG vessels with warm cargo tanks are not normally handled at Ju'aymah. When special circumstances warrant, new ship and other vessels with warm tanks may be accommodated under the following conditions:

9.1 Vessel's tanks must be inerted. A sample must be taken by Aramco personnel from each of the vessel's tanks to ensure that it has been properly inerted. Test must indicate a reading of 7.5% oxygen or lower taken by Orsat analysis or J-W oxygen indicator.

9.2 Vapour returned during chilling operations will be sent to the offshore flare system.

9.3 The loading rate during the chill down period will be kept low and may be reduced if deemed necessary to minimize the amount of vapour sent to the flare or otherwise lost.

9.4 The amount loaded for chilling purposes will be measured in the vessel's tanks by the independent inspector assigned and witnessed by an Aramco senior shift operations representative.

9.5 After cargo for chilling tanks has been loaded aboard, the vessel must proceed to anchorage and complete chilling of the other tanks before returning to berth to load cargo. No transfer of coolant from one tank to another shall be carried out at berth.

9.6.1 In case the cooling operation involves cooling of these additional tanks with an oxygen content (over 7.5%), the vessel must leave the port anchorage area.

9.6.2 Upon return to berth for continuation of RLPG cargo loading all tanks which are to receive cargo will be gauged by the independent inspector and witnessed by an Aramco senior shift operations representative.

10. During loading of refrigerated A-140 propane or A-160 butane shipboard reading of loading compartment temperatures and pressures by grade of cargo loaded shall be witnessed and recorded several times routinely by one of the shift operations staff to ensure that the vessel remains within the safe loading limits for temperature and pressure for each grade as listed in regulations 2.1 and 2.2.

11. At completion of loading, the designated independent inspector will measure all cargo tanks. These gauged measurements will be taken on all vessels tanks regardless of whether cargo was loaded into these tanks at Ju'aymah or not.

12. Vessels with part cargo on board of products other than A-140 propane or A-160 butane must be equipped to keep any liquid or vapour completely self-contained from those cargo parcels. There must be no return of non-compatible vapour to offshore flare nor any venting of such vapour to atmosphere while at berth. No mixing of dissimilar refrigerated liquid is allowed at berth.

13. Vessel loading either propane or butane are expected to use the appropriate vapour return line but only for *excess* vapour which the vessel's vapour recovery equipment cannot handle. Should excessive vapour be sent to the offshore flare, and the situation cannot be corrected promptly aboard ship, the loading plan has been reviewed with the Master or responsible loading officer by the senior shift operation representative and corrective action has been agreed upon.

THERE ARE NO FACILITIES AT JU'AYMAH FOR RECOVERING VAPOURS RETURNED DURING LOADING.

14. In the event of a spill of liquid propane or butane on board the vessel, shore loading shall be shut down until corrective action to clean up the spill and to avoid future reoccurrence has been agreed upon by the Master or responsible loading officer with shift operations staff.

15. There are no facilities at Ju'aymah for the return of either liquid propane or liquid butane cargo. Vessels must pay strict attention not to overload either of these grades.

ZULAYFAYN ANCHORAGE: *Instructions for discharging at Zulayfayn anchorage.*

Vessels for Discharge at Zulayfayn Anchorage, Ju'Aymah General Instructions and Communications Procedures:

(1) When carrying vessel leaves loading port, details of tonnage aboard for Zulayfayn discharge and tentative ETA at Ras Tanura should be cabled to Saudi Arabia telex 601220 (ARAMCO SJ) commencing message "DHAMDDSB/AOC TRAFFIC DH/MADANI".

(2) 10, 5 and 3 days and 1 day prior arrival; Master of carrying vessel must transmit updated ETA to DHAMDDSB/AOC TRAFFIC DH/MADANI via ARAMCO radio station, (call sign HZY) which operates the following receiving schedule:

Frequency (kHz)	*Approx. range (miles)*	*Daily Operating Time (GMT)*
500	500	Continuous
8480	2000	0400 – 1800
12811	2000	0600 – 1800
16960	2000	1000 – 1800

(3) Vessel must initially proceed to Ras Tanura for clearance and can only shift to Zulayfayn for discharge after this has been completed. (This applies even if the vessel has last called at Dammam). Instructions on communications with Pilots when entering and leaving Ras Tanura will be issued direct to the Master by his Agents when he reports his arrival to them. AOC Terminal Operations Section will liaise directly with the Agents to monitor vessel arrivals and clearance.

(4) When cleared from Ras Tanura, vessel must proceed to the Zulayfayn Anchorage, which is shown on the British Admiralty Chart 3788 or equivalent in other series. The anchorage is marked with buoys in the following positions.:

A.	Latitude 26° 53′ 48″ North	Longitude 49° 56′ 48″ East
B.	Latitude 26° 53′ 48″ North	Longitude 49° 55′ 18″ East
C.	Latitude 26° 56′ 00″ North	Longitude 49° 55′ 32″ East
D.	Latitude 26° 56′ 42″ North	Longitude 49° 56′ 48″ East

(5) On sailing from Ras Tanura for Zulayfayn the Master must make contact with control vessel, s.s. "Al Hasa" on VHF Channel 14 for Zulayfayn anchoring instructions.

SHIPMASTER'S REPORT: December 1979

The following is a radio message received by the Master from his Agent.

Important Notice Revised Government and Port Regulations Rastanura Please acknowledge your compliance.

Para One

Port Authorities now insist that all vessels are not to sail from Rastanura (Juaymah) until a port clearance (titled sailing report) has been delivered on board STOP Therefore vessels must have onboard both Port Clearance and P2/50 permit of departure before sailing STOP

Para Two

Anti Pollution regulations are now being strictly enforced by Saudi Arabian Government Authorities with heavy fines/delays to vessels/possible arrest for Masters of offending vessels therefore you are strongly advised to AAA Log and report to the Pilot Officer any oil slick P3/50 sightings BBB Closely monitor deballasting operations CCC Acknowledge receipt only of any protest letter submitted by ARAMCO for any alleged pollution incident DDD Advise us immediately a protest letter for an alleged pollution is received on board and name of your P and I Club EEE Issue P4/50 Arab with a separate counter protest letter as required copied to us STOP

Para Three

Please ensure all repeat all alcoholic beverages and pornographic material are removed from cabins/lounges and placed in bonded store for sealing STOP Stores and chillrooms must also be sealed if containing alcohol STOP Vessels are P 5/53 subject to search on arrival and penalties are severe for infringement of Saudi Regulations STOP

Para Four

On arrival Rastanura ensure you call this Office advising anchor time and most important advise when Pilot boards your vessel to proceed to berth/SBM in order to avoid delay in clearing your vessel STOP+

AGENT: Gulf Agency Company Saudi Arabia, Aramco Mail Box 621, Ras Tanura, via Dhahran. Cables: "Confidence" Ras Tanura, or, "Confidence", Bahrain, stating (for Ras Tanura). Telex: 651011, ("GAC RT SJ") or 8211 Bahrain (stating for Ras Tanura). Phone: 6733132, 6733171, 6670632, 6670636 (24 hour service). After office hours phone: 6733132, 6670644, 6733171.

N.B. Please address crew mail to Rahima P.O. Box 72, Ras Tanura, via Dhahran, Saudi Arabia.

Note: G.A.C. Ras Tanura are connected to the Bahrain Telex Bureau. Messages from ships to G.A.C. Ras Tanura may therefore be addressed "Bahtag 80-1450433 Confidence Ras Tanura" via Bahrain Radio, and they will then be relayed direct by telex to Ras Tanura.

Agent will be responsible for all ships business, which includes obtaining inward and outward clearance, pratique, medical facilities, provisions, repatriation, repairs and diving services.

JUBAIL: 27.01 N. 49.40 E. (See Plan Book)

Also see "General" before first port.

LOCATION: The Jubail Port Complex is located on the East Coast of the Kingdom of Saudi Arabia, approximately 80 km. North of Dammam. The Port Complex comprises 2 ultramodern facilities: The Commercial Harbour and The Industrial Harbour.

PORT LIMITS:

Harbour Boundaries: All shore-based port property enclosed by a fence following the shore line extending seawards to a line running between the following points:

Latitude 27° 00′ 00″ N., Longitude 49° 40′ 00″ E.
Latitude 27° 00′ 00″ N., Longitude 49° 43′ 12″ E.
Latitude 27° 03′ 00″ N., Longitude 49° 44′ 00″ E.
Latitude 27° 04′ 10″ N., Longitude 49° 46′ 00″ E.
Latitude 27° 11′ 10″ N., Longitude 49° 53′ 45″ E.
Latitude 27° 14′ 10″ N., Longitude 49° 59′ 00″ E.
Latitude 27° 16′ 00″ N., Longitude 49° 58′ 00″ E.
Latitude 27° 17′ 45″ N., Longitude 49° 55′ 30″ E.
Latitude 27° 15′ 20″ N., Longitude 49° 51′ 30″ E.
Latitude 27° 12′ 50″ N., Longitude 49° 52′ 30″ E.
Latitude 27° 09′ 00″ N., Longitude 49° 46′ 00″ E.
Latitude 27° 04′ 40″ N., Longitude 49° 44′ 00″ E.
Latitude 27° 07′ 00″ N., Longitude 49° 44′ 00″ E.
Latitude 27° 07′ 00″ N., Longitude 49° 41′ 00″ E.
Latitude 27° 05′ 43″ N., Longitude 49° 41′ 00″ E.
Latitude 27° 04′ 00″ N., Longitude 49° 36′ 30″ E.

PILOTAGE: Pilotage is compulsory. Vessels are to contact the Harbour Master on VHF Channel 16. It is recommended that the Agent keeps contact with the Harbour Master.

ARRIVAL/DOCUMENTS: Coast Guard boards the vessel at the Pilot Boarding Area. Customs, health, etc., will board the vessel when she is moored. See "Port Procedures".

ANCHORAGE: There is a safe approach from Al Jurayd (27° 12′ N, 49° 57′ E.) leading to the ports opening into the dredged approach channel which offers a depth of 14 m. Vessels' anchorage presently is situated at the Pilot Boarding Area and is bounded by the following co-ordinates:

27° 03′ N.	27° 04′ N.	27° 03′ N.	27° 02′ N.
49° 44′ E.	49° 45.5′ E.	49° 47.5′ E.	49° 45.5′ E.

RESTRICTIONS: The Port can be approached 24 hours daily.

TUGS: 4 tugs available at present (900 h.p., 1,300 h.p., 2,000 h.p. and 1 Voith Schneider Tug 1,200 h.p.).

At the end of 1981 7 new tugs of 1,500 to 5,500 h.p. will be delivered.

VHF: Tugs fitted with VHF and keep watch on Channel 16. "Jubail Port Control" may be contacted on Channel 16, working on Channels 9, 12 and 14.

BERTHING: Commercial Port:

Berths No. 1 to No. 8, general cargo berths; total length 1,700 m., depth 12 m. (allowable draft 11 m.). Berths No. 1 – 5 in operation.

Berths No. 9 and 10, multi-purpose berths; total length 600 m., depth 14 m. (allowable draft 13 m.). Berth No. 9 may be operational early 1981.

Berths No. 11 to No. 14, general cargo berths; total length 1,000 m., depth 14 m. Berths under construction.

Berths No. 15 and 16, container terminal; total length 520 m., depth 14 m. Equipped with 4 × 30.5 ton container cranes.

At the East end of Berth No. 16, 2 ro-ro ramps facilitate stern – and quarter ramp vessels.

All berths, transit sheds and open storage areas will be completely available the first quarter of 1981.

Bulk Cement Terminal: Silo vessel at anchorage. Storage capacity 30,000 tons. Handling capacity 5,000 t.p.d.

Services: 135,000 sq.m. area asphalted and flood-lighted offers sufficient space to meet the requirements of todays container and ro-ro traffic. Storage area is equipped with 120 plug-in facilities to accomodate reefer containers/trailers (480 V, 60 cycles) (Berths No. 15 and 16).

5 Transit Sheds offer 42,000 sq.m. of covered storage area.

185,000 sq.m. of asphalted and floodlighted open storage areas are available for intermediate storage of cargo (Berths No. 1 to 5).

The following services will be provided to all berths:
Electricity H.V. distribution 13.8 KVA.
M.V. distribution 460/277 volts.
Sea water fire main and hydrants.
Freshwater for ships' bunkering, buildings and ablutions.
Telephones for ship to shore connections and buildings.
Fire alarm systems.

CRANES: *Mobile Cranes:* 2 × 100 tonnes, 4 × 50 tonnes and 6 × 20 tonnes.

2 mobile tower cranes × 36 tons to be delivered June 1980, another 5 mobile tower cranes same size to be delivered beginning of 1981.

Forklifts: 20 × 2.5 tons, 25 × 3 tons, 25 × 5 tons, 5 × 20 tons, 5 × 35 tons.

Transtainers: 9 units × 30.5 tons.

Portainers: 4 × 30.5 tons.

STEVEDORES: 1st shift: 0700 – 1900 hrs. 2nd Shift: 1900 – 0700 hrs. 7 days a week. Sufficient gangs available to work 4 hatches on every vessel.

MEDICAL: Qualified doctors are available in Jubail; an ophthalmologist and a dentist are the available specialists; arranged by the Agents.

FRESH WATER: Limited fresh water supply is available from a private company outside the port and deliveries are made by water tank trucks to vessel. Arrangements in this regard to be made though ship's Agents at the request of the Master. Fresh water through port mains presently not available.

FUEL: Bunker fuel oil, marine diesel and marine gas oil are available; arranged by the Agents.

AIRPORT: Dhahran Airport 120 kms.

DEVELOPMENTS:

Industrial Port:

The Industrial Harbour will facilitate plants in the Jubail Industrial Complex regarding the import and export of raw materials, liquid and solid and semi-finished products respectively.

Industrial Harbour offers:

9 berths, total length 2,300 m., depth 14 m. 1 equipped with stern ramp facilities.

4 berths for ULCC's at the Open Sea Tanker Terminal, depth up to 30 m.

2 berths for barge and coaster traffic, total length 500 m., depth 6 m.

A special module discharge ramp will be completed August 1980. This can take loads up to 2,000 tonnes.

Further developments: Additional berths for liquid products with a depth of 18 m.

TELEPHONES: Available.

PORT PROCEDURES:

Notification to Jubail Port Management:

1. The owners/charterers of vessels bound for Jubail with cargo must give preliminary notice of the vessel's intended arrival to the Port Management by telex or cable either directly or through their Agents on arrival at the first or sole loading port, before loading commences. ETA and estimated quantity of cargo by type must be given with the preliminary notice.

2. On completion of loading cargo the following information must be sent to the Port Management by telex or by cable either directly or through the Agent.
   a. Vessel's name.
   b. Flag.
   c. Length overall.
   d. Expected draft on arrival.
   e. ETA.
   f. Cargo particulars, including nature, weight, tonnage and stowage by hatches.
   g. Any dangerous cargo being carried for other destinations.
   h. If dangerous cargo is being carried, the quantity and class in accordance with the IMDG Code whether to be discharged or in transit.
   i. Expected requirements for bunkers and water.
   j. Name of vessel's Agent.

3. A further notice of ETA is to be sent 5 days, 2 days and 1 day prior to arrival at the port.

Vessels failing to give required notification:

Any vessel failing to comply with the requirements under paragraph 1, above, or arriving later than expected under the revised ETA, may lose its berthing registration.

Cargo Papers and Documents:

1. The following papers and documents must be submitted to the Port Management no later than 72 hours (for vessels with more than 200 Bills of Lading) or 48 hours (other vessels).

Prior to arrival:
   a. 5 copies of the Cargo Manifests for discharge, including any additions or amendments in English:
      10 copies of the original Manifests translated into Arabic.
   b. 2 copies of the Cargo Stowage Plan.
   c. 2 copies of the Hatch List or Bay Plan.
   d. 2 copies of the List of Dangerous/Hazardous Cargo for discharge.
   e. 2 copies of the List of Dangerous/Hazardous Cargo in transit.
   f. 2 copies of the List of Heavy and/or Awkward Cargo which requires special equipment.
   g. 2 copies of the List of any Domestic Wine or Spirits or Cargo of such nature on the vessel and its location or, in the absence of which, a veil return.
   h. A Declaration of Type of Reefer Cargo.

2. All copies of the Manifests must be taken from the Master Manifest.

3. The List of Dangerous/Hazardous Cargo has to show:
   a. The technical name.
   b. The IMDG Class and UN number.
   c. The quantity of each consignment.
   d. The location on board respectively in each container or on each trailer or in each barge.

4. Non compliance will lead to penalties and/or fines.

General Regulations for cargo stowage and handling:

1. The stowage of cargo bound for ports in the Kingdom of Saudi Arabia must be arranged to ensure simultaneous and optimum rate of discharge from the maximum numbers of hatches compatible with the requirements of sea-worthiness.

2. Where practicable all general and bagged cargo of uniform type and size is to be stacked and secured on pallets to facilitate quick discharge.

3. Bundled steel, profile iron, rebars, etc. shall be fitted with slings or lifting points suitable for multiple handling.

4. Steel sheets shall be strapped and stacked in bundles of approx. 2 tonnes each. Wooden bearers and/or spacers shall be used in loading the bundles to facilitate discharge.

5. Masters and shipping Agents are to instruct their stevedoring contractors at loading port to execute complete separation by Bills of Lading and the manifest, and will be held responsible for non-compliance with this regulation.

6. No damaged package or item is to be discharged from any vessel, barge, pontoon or handling craft until it has been repaired or repacked in such a manner as to permit it to be handled without further loss or damage to contents of the package or the item itself.

a. Where the original outer carton, box or bag is replaced, the replacement carton, box or bag shall be made in the same manner to allow it to be identified with the Bill of Lading and the manifest.

b. The Port Management has the right, after notifying Customs, Authorities and ship's Agent concerned, to get rid of or destroy damaged good which may cause harm to installations or public health at the expense of the Owner of the goods or the ship's Agent.

Out-turn Report:

1. After completion of the discharging operation of a vessel the Port will furnish an out-turn report which shall indicate the cargo discharged. The out-turn report must be signed by the ship or ship's Agent. Refusal to sign does not invalidate the report.

2. The ship's Agent has the option of conducting his own counter-tally. Where this is not done, the Port tally must be accepted. If an independent counter-tally is undertaken by the shipowner/Agent, the Port tally supersedes.

3. The cargo handed over into the custody of the Port shall remain at the entire risk and responsibility of the shipowner or its Agents or owner of the goods while on the port premises. The Port Management shall not be responsible in any way for any damage or loss that may occur to goods while within the port premises, whether such damage or loss was the result of accident or negligence on the part of the Owner of the goods or not, except in the case of wilful or gross negligence of port employees.

Storage of goods:

1. The goods will be stored by the port in accordance with marks and numbers and in Bill of Lading lots in those areas stated in the out-turn report.

2. The Port may store suitable cargo in the open areas.

3. The Port may refuse the storage of goods if:

a. There is insufficient space in the Port.

b. The inherent properties of the goods render it dangerous or impossible.

4. Except for Customs purposes, no goods or materials stored in the Port are to be unpacked on Port premises without the special permission of the Port Management and Customs.

5. Consignees or their Agents shall remove their goods from the Port within 15 days of completion of discharge of the carrying ship or such period as may be announced by the Port Authority.

6. All cargo, irrespective of whether it has been cleared through Customs or not, which has not been removed from the Port within 15 days of completion of discharge of the carrying vessel may be moved to a special area. All such cargo may be sold by public auction 21 days after completion of discharge of the carrying vessel. These periods may be changed by an announcement of the Port Authority.

GENERAL:

Rubbish: It is strictly prohibited to throw any garbage, rubbish or food leftovers into the port and territorial waters of the Kingdom.

Every violation of the provision of this article shall cause the ship's Master to be penalized with a fine of up to 10,000 Saudi Riyals.

Vessels calling at Jubail Port will be supplied with plastic bags for garbage disposal.

The stevedore's ship superintendent must be contacted before the vessel has finished loading/discharging operations to take care of disposal of the bags.

The charge for the garbage disposal service will be SR. 300 – per vessel.

Documentation: Jubail Port Management will not permit any vessel to berth if documents have not been submitted as follows:

1. Manifest for vessels with more than 200 Bills of Lading at least 72 hours before arrival.

2. Manifest for all other vessels, Stowage Plans, Hatch List etc., at least 48 hours before arrival.

Jubail Port Management will grant berthing permission subsequently not earlier than 72 hours after receipt of documents as per case 1 and not earlier than 48 hours as per case 2.

Vessels discharging cargo to Aramco Overseas Company (AOC) at the Commercial Port:

General instructions and communications procedures.

1. When carrying vessel leaves loading port, details of tonnage aboard for discharge to AOC and tentative ETA at Jubail should be cabled/telexed to Saudi Arabia telex 601220 (ARAMCO SJ) commencing message "DHAMDDSB/AOC TRAFFIC DHAHRAN".

2. 10, 5, 3 days and 1 day prior to arrival, Master of carrying vessel must transmit updated ETA to "DHAMDDSB/AOC TRAFFIC DHAHRAN" via ARAMCO radio station. (call sign HZY) which operates the following receiving schedules:

Frequency (kHz)	Approx. Range (miles)	Daily Operating Time (GMT)
500	500	Continuous
8480	2,000	0400 – 1800
12811	2,000	0600 – 1800
16960	2,000	1000 – 1100

3. Vessel must proceed initially to Jubail Pilot Boarding Anchorage, contacting the Jubail Harbour Master on VHF Channel 16 upon arrival. The anchorage is approached from Al-Jurayed (Latitude 27° 12′ N., Longitude 49° 57′ E.) and is bounded by the following co-ordinates:

Latitude: 27° 03′ N., Longitude: 49° 44.0′ E.
Latitude: 27° 04′ N., Longitude: 49° 45.5′ E.
Latitude: 27° 03′ N., Longitude: 49° 47.5′ E.
Latitude: 27° 02′ N., Longitude: 49° 45.5′ E.

4. Pilotage is compulsory. Coast Guard officials will normally board with the Pilot to commence initial clearance procedures. Customs and Health Authority will complete clearance once the vessel is alongside berth. For guidance the Port currently offers 14 m. water depth in the approach channel and 12 m. alongside the berths (by prior arrangement, it may be possible to utilise the container berths which offer a depth of 14 m. alongside).

5. The AOC Port Master at Jubail, or his authorised representative, will attend on board alongside berth, once clearance has been completed, in order to accept Notice of Readiness for the vessel. AOC staff will be available on board or at shipside throughout the discharge period to protect the safe discharge of AOC cargo and the AOC Port Master, or his representative, will again attend on board prior to sailing in order to countersign the Statement of Facts for the discharge.

6. AOC discharges at Jubail will generally be on a "free-out" basis but will be accomplished by the Ports Authority stevedores. Charges for stevedoring on AOC free-out cargo will be settled directly between AOC and Saudi Ports Authority. Agents must nevertheless notify the Ports Authority of expected vessel arrivals, booking berth space and stevedoring in accordance with the normal customs of the Port. In submitting manifests for AOC cargo to be the Ports Authority, however, Agents should attach to each manifest written advice that stevedoring charges will be settled by AOC.

7. Certain material to be discharged by AOC at Jubail will have been ordered from Saudi vendors and will be consigned "C&F Jubail Commercial Port Free-Out Discharge" with "Ultimate Consignee ARAMCO" included in the body of the Bill of Lading. Such cargo will be accepted by AOC at Jubail in exactly the same way as cargo consigned directly to AOC and Bills of Lading duly endorsed by the original consignee will be presented.

8. In addition to the normal tallying of cargo by the Ports Authority stevedores, AOC will be carrying out a counter-tallying operation in their own interest. This will be aimed at eliminating the possibility of shortlanding, and recording the factual circumstances of cargo damage and at prompt and accurate reconciliation of discharged and manifested quantities. The co-operation of all Masters and Agents is sought in this activity, particularly in the countersigning of any relevant damage or out-turn reports.

9. All requirements stated in this Notice are those of AOC and are in *addition* to any other procedures required by the Saudi Ports Authority. Any Saudi Ports Authority requirements mentioned herein are for guidance only and should be verified with Saudi Ports Authority.

10. Direct enquiries on operational matters to the Terminal Operations Co-ordination Desk or, failing a reply, to the Assistant Superintendent. Address enquiries on policy matters to the Assistant Superintendent or, in his absence, to the Superintendent. Local liaison at Jubail Commercial Port will be handled by the AOC Port Master or his deputy who will also handle all *urgent* enquiries at night, weekends and holiday periods. Telephone connection to the AOC Port Office is expected in the near future.

11. Until further notice, AOC will be handling only duty exempt cargo through Jubail. Cargo which is dutiable, or subject to import permit restrictions, will normally be routed to Dammam. Exceptionally, if isolated dutiable consignments are inadvertently laden to Jubail instead of Dammam, they will generally be handled at Jubail. Similarly small shipments of duty exempt cargo consigned in error to Dammam will generally be handled at that port. It should no longer be necessary under normal circumstances, therefore, for any cargo to be diverted for discharge to a port other than the one to which it was originally laden.

AUTHORITY: Jubail Port Management, Saudi Arabia Ports Authority.

AGENT: See "Dammam".

RABIGH (Sherm Rabegh): 22.45 N. 38.58 E.

A new port is under construction about 100 miles North of Jeddah in position 22° 45′ N., 38° 58′ E. Excavation by dredgers for the construction of the Oil Port, Pioneer Port and Dry Cargo Port with depths ranging from 12 to 25 m. are in progress. All vessels proceeding to Rabigh should first call at Jeddah in order to obtain Quarantine, Immigration, Customs Clearance and Coast Guard permission. On arrival at the port the Coast Guard Authority visits the vessel. Pilotage is compulsory. There are 5 tugs with a further 2 expected shortly.

Note: The Ports Authority of Saudi Arabia state that the port serves coastal traffic only and that there are no facilities available to receive and handle ocean-going vessels.

RAS-AL-KHAFJI: 28.25 N. 48.32 E.

THE PORT IS CHANGING TO THE "IALA SYSTEM A" BUOYAGE (RED TO PORT) EARLY IN 1981.

Ras-al-Khafji is situated in divided Neutral Zone approximately 60 miles South of Kuwait, this area is under joint jurisdiction of the Saudi Arabian and Kuwaiti authorities; vessels are therefore required to fly the flags of both Governments from the foremast, Saudi Arabia starboard side, Kuwait port side of mast. Onshore base situated in approximately 28° 25′ N., 43° 31′ E., and within a distance of 7.2 miles (13.34 km.) offshore, the Company has laid 2 conventional sea-berths and 2 single-buoy moorings for loading tankers and also an anchorage area for cargo ships working cargo. Outside this distance is an anchorage area for tankers.

In addition to exporting crude oil, fuel oil and naphtha are also exported.

OPERATORS: Arabian Oil Co. Ltd.

APPROACHES: Approaches to Ras-al-Khafji marked on appropriate U.S.H.O. and British Admiralty Charts, and are deep enough for majority of vessels using the port to proceed with normal caution using the buoys as centreline markers. A single patch with a depth of 56 ft. (17.07 m.) exists North of courseline between Buoys Nos. 2 and 3, and this necessitates caution on the part of large tankers leaving Ras-al-Khafji in loaded condition.

For tankers arriving Ras-al-Khafji without necessary charts, the full information will be given by telegram if request is sent to "Arabia-oil Kuwait" (via "9KK", Kuwait Radio Station) a few days before arrival. Alternatively, if vessel has VHF, the buoy positions will be given to them upon request to "Ras-al-Khafji" as the vessel approaches, but prior notice of requiring this service should be given in vessel's arrival message.

NAVIGATIONAL AIDS: All geographical positions given although approximately correct, are intended for reference purposes only as certain differences are known to exist between these positions and those shown on the U.S.H.O. and British Admiralty Charts of the area.

Conspicuous Marks. Flare stacks in offshore field and ashore normally visible at a great distance, but may occasionally be extinguished.

No. 1 Flare	Lat. 28° 28.3′ N.	Long. 48° 57.0′ E.
No. 2 Flare	28° 27.0′ N.	48° 54.8′ E.
No. 3 Flare	28° 29.8′ N.	48° 56.0′ E.
No. 4 Flare	28° 30.3′ N.	48° 58.0′ E.
Onshore Flare	28° 24.5′ N.	48° 32.4′ E.

Aids to Navigation:

11.	B.	6.0	7.0	
12.	R.	4.0	4.0	Shoal

All buoys have radar reflectors.

Khafji Channel:

With the installation of No. 4 sea berth, Khafji Channel for ocean tankers entering to and leaving from AOC berths has been established in a water area North side of the old channel which was removed. The channel area Eastward of Light Buoy No. 2 has never been changed.

For the purpose of securing safe navigation of 250,000 ton tankers with normal caution using the above aids to navigation, sufficient depth of water, 73 ft. at least, and passable channel breadth, 2,100 ft. as minimum corresponding to two times overall length of the mammoth tanker, are allowed.

A "Z" formed patch with the least depth of 70 ft. (21.30 m.) exists at the centre of the channel S.S.E. of Light buoy No. 8, hence deep tankers sailing from berth No. 4, especially under the condition of prevailing tide current, should take caution to the shoal.

If required, a Mooring Master on duty will guide a deep tanker to the favourable position in the channel.

DOCUMENTS: *(a)* Clearance. Master should submit following documents to Saudi Arabian Government through Agent (2 copies each):

Maritime Declaration of Health.
Health Condition of Crew.
Details of Air-conditioning.
Crew List.
Vaccination List.
Passenger List (if any).

Note Forms 1–3 are supplied by the Agent.

(b) Cargo. All cargo documents and shore figures are usually prepared on shore, and this takes about 1.5 hours with a further 30 minutes before the documents arrive at the ship. Ship's Statement of Cargo is, however, prepared on board. Wherever necessary Mooring-Master will sign documents on behalf of the Company.

Following cargo documents are to be completed after loading:

Notice of Readiness.
Bill of Lading.
Time Sheet.
Ship's Statement of Cargo*.
Certificate of Delivery‡.

Note: *Ship's Statement of Cargo includes the items for "clean ballast declaration" and "dry inspection" altogether in one form.

‡Certificate of Delivery should be handed to ship's Agent at port of discharge for certification by Customs Authorities. Agent should then return Certificates to the Company as soon as possible. Non-compliance with this requirement could involve vessel in serious difficulty. Masters therefore advised to ensure that their Agents at each discharging port return the Certificates at the earliest possible moment.

All certificates are to be sent direct to Arabian Oil Company and the Agents should be notified accordingly. It is understood that Arabian Oil Co. do not require legalised certificates and only certificates attested by the Customs at discharging ports will suffice.

The following is a copy of a letter to a ship's Agent from the Chief of Ras Al Khafji Port. Dated September 1980.

We would like to advise you that effective 1st of Dhul-qadah, 1400 (September 10, 1980) in case you need a port clearance for any vessel under your agency please ensure that ship's crew list consists of name, nationality, date of birth, place of birth, passport/seaman book number and rank. In the absence of this information we are unable to provide you with departure port clearance and you will be held responsible for ship departure delays.

EARLY DEPARTURE DOCUMENTATION: This documentation system aims to assist ships to depart early from this port after they complete loading by saving time awaiting documents. For this reason, relevant tanker documents will be signed previously by ship's Master or signed by their Agents at this port, depending on Master's choice on the request sheet. Completed tanker documents, therefore, will not be despatched to ships after completion of loading.

It must be noted that this system is not compulsory at this port, but it is at Master's option on condition that ships can communicate on Harbour Service VHF Radio or Marine Communication Band 2150 mc/s. to receive shore figures and time after departure.

READINESS: Master should present Notice of Readiness to load to Company's Mooring Master who will sign it on behalf of the Company. The Notice should be tendered as the time of the vessel's arrival at tanker anchorage area, which is, in principle, understood to be either time of dropping anchor in anchorage, or if vessel does not anchor, the time that Mooring Master boards to commence berthing.

MOORING MASTER: Compulsory for berthing and unberthing at Ras-al-Khafji, and Company's Mooring Masters will board vessels at anchorage area to take them to allocated berths. After berthing, Mooring Master will remain on board vessel until it is unberthed and cargo documents are completed. During this time he will act as the Company's representative in charge of all operations and shore personnel where the Company is concerned.

Notwithstanding presence of Company's Mooring Master on board, the Master of the vessel remains responsible for his vessel at all times and in all respects. In event of any emergency, however, the necessary steps should be taken by joint action between the Master and the Mooring Master.

The Master of each vessel shall give to Mooring Master all information necessary for safe handling and safe operation of vessel while it is in berth.

BALLAST: All vessels required to have on board sufficient clean ballast to give safe draft for manoeuvring purposes. Vessel arriving with too little ballast may be required to increase quantity, should Mooring Master feel that it would not be safe to berth vessel in its arrived condition. Recommended arrival condition is with propeller completely or almost completely immersed and vessel trimmed not more than 10 ft. (3.05 m.) by stern.

In good weather conditions, Mooring Masters will normally permit vessels to start deballasting as they approach the berth in order to save ship's time.

BOARDING: All vessels required to provide safe means of access for personnel boarding and leaving and should have accommodation ladder rigged on port side. In the case of vessels assigned to Berth No. 3, an accommodation ladder which leads down forwards is liable to be blocked by floating hoses, and in such cases the ladder should be rigged on starboard side. A ladder aft is always suitable on the port side.

For the benefit of people boarding at the anchorage area, vessels should provide a safe means of access on the lee side.

ANCHORAGE: *(a) Tankers:* Within 1 mile radius of position 28° 29.5′ N. 48° 39.0′ E. The Western extremity of tanker anchorage is marked by No. 10 Lighted Buoy. The depth of water varies from 65 ft. (19.81 m.) to 79 ft. (24.08 m.), the major depth of water is more than 70 ft. (21.33 m.), with a generally good anchor holding ground of clay mud. Vessels should anchor as close as possible to this lightbuoy to await berthing.

(b) Dry-cargo. Anchorage for dry-cargo ships located about 4 miles to West of tanker anchorage, and is centred in position 28° 26′ 08″ N., 48° 33′ 04″ E. and marked by a flashing white buoy. Cargo ships should anchor within 0.5 miles radius of this buoy, where depths are between 36 ft. (10.97 m.) to 50 ft. (15.24 m.) in good holding ground of clayey mud.

(c) Prohibited Area. An area bounded by straight lines joining following points is prohibited to anchoring and fishing due to presence of well-heads, Flow Stations, Gathering Station, etc. and numerous pipe-lines and power transmission cables on the sea bed. Additionally, the area bounded by 5 light-buoys is prohibited to navigation by all vessels or craft except those operating on direct instructions from the Company.

MAX. SIZE:

Berth	*Depth of water at ISLW* (ft.)	*Max. Permitted draft* (ft.)	*Designed tanker size* (d.w.t.)
No. 1	53	47	100,000
No. 2	56	50	100,000
No. 3	59–64	54*	165,000
No. 4	69–73	64‡	250,000

*56 ft. permissible using rise of tide.

‡66 ft. permissible using rise of tide.

Largest tanker so far handled at Ras al Khafji Port:

"Maasbracht" (313,755 d.w.t.) loaded some 224,000 long tons of crude oil at Berth No. 4.

HEALTH: No radio pratique will be given. Vessels must be cleared by quarantine office on arrival. (In the past, tankers were given free pratique at the request of Agents and on the production of the copy of telegrams from vessels confirming that all crew members possess valid cholera and vaccination certificates and that there is no sickness on board. This procedure has changed recently and all vessels are boarded by quarantine officer and pratique is given only after checking the documents concerned.)

RADIO: (Also see "Approaches"). Advise ETA Khafji at least 4 days, and again 1 day, before arrival through normal radio services. As an alternative to the route through Kuwait Radio Station (call sign: 9KK), vessels may send their first message through Singapore, Bombay or Bahrain Radios. Confirmation of ETA should be made a few hours before arrival by calling "Ras-al-Khafji" on Channel 16 VHF. All cables should be addressed to "Arabia-oil Kuwait".

The first message should be sent according to following form, but any items which are the same as a recent previous voyage to this port may be omitted.

(1) ETA Ras-al-Khafji
(2) Last port
(3) Deballasting time
(4) Quantity and type of cargo and bunkers required
(5) Maximum loading rate
(6) Diameter of cargo and bunker connections
(7) Distance from manifold to ship's side
(8) Derrick capacity
(9) Whether Ras-al-Khafji is first or second port (when taking part cargo)

Note: Item (9) should only be answered in cases where vessels are taking part cargo at Ras-al-Khafji. If second port, the first loading port should be mentioned.

Communications between shore and loading berth mainly sent and received by means of FM wireless telephone, which is brought on board tankers at time of arrival.

VHF: Short-range communication can be made with Terminal Office by calling "Ras-al-Khafji" on VHF Channel 16. Working Channels are 9, 11, 12, 13 and 14. Vessels should call Ras-al-Khafji several hours before arrival to confirm ETA and receive berthing instructions. After anchoring they should advise their anchoring time and then maintain watch on Channel 16 until the Mooring Master boards. Terminal VHF normally operative between 0400–1400 hrs. GMT, and is used outside these hours by special arrangements with individual ships.

TUGS: The undermentioned tug-boats are available for mooring and unmooring purposes: "Chiyoda Maru No. 2" 200 g.r.t., 1,320 b.h.p.; "Chiyoda Maru No. 3" 175 g.r.t., 1,320 b.h.p.; "Chiyoda Maru No. 4" 236 g.r.t., 2,200 b.h.p.; "Shark" 360 g.r.t., 4,200 b.h.p.

One of these tugs stands by near the berths as long as any vessel remains moored. Two mooring boats are used for handling ropes and hoses.

BERTHING: 1. Personnel. After vessels berthed, Company's Loading Operator and Mooring Crew will board. Loading Operators work shifts and there will always be one on board vessel while in berth. This man acts as assistant to Mooring Master, and should be treated as such at all times. In particular he will carry out Safety Inspections and handle communications between ship and shore, particularly those communications regarding cargo.

Ship's personnel requested to give Loading Operator all required information and necessary assistance to allow him to do his job properly. Any disputes arising from his actions should be referred to Mooring-Master for final decision.

Mooring Crew will connect and disconnect hoses as required, but may at any time be transferred to another vessel for the same purpose. While they remain on board, vessels are requested to provide them with following: use of Smoking Room, toilet and washing facilities; hot and cold drinking water; utensils for eating and drinking (it is not normally necessary to supply food).

2. Description of berths.

(a) Sea-Berth No. 1

Position: 28° 26′ 10″ N., 48° 34′ 57″ E.

Depth: 53 ft. (16.15 m.) at ISLW.

Permitted draft: 47 ft. (14.33 m.) max.

Type of berth: conventional 4-buoy system where vessel moors to 2 anchors and 1 buoy forward and to 3 buoys aft.

Length: Designed for tankers of 800 ft. (245 m.) length but can be used by tankers of any size, although tankers of less than 650 ft. (200 m.) overall length sometimes experience difficulty in mooring if their lines are less than a full 720 ft. (220 m.).

Submarine Pipe-lines and Hoses: From the ex-Loading Dock one 26 in. crude oil line and 1×18 in. fuel oil line have been laid to the manifold position. 2×10 in. rubber hoses for crude oil and 1×12 in. rubber hose for fuel oils are connected to ship's manifold. These hoses approximately 225 ft. (69 m.) long and maximum lifting weight of the 2 crude oil hoses together is 4.5–5 tons. For bunkering purposes 1 section of 6in. hose is attached to the end of the 12 in. fuel oil hose.

(b) Sea-Berth No. 2

Position: 28° 25′ 55″ N., 48° 35′ 28″ E.

Depth: 56 ft. (17.07 m.) at ISLW.

Permitted draft: 50 ft. (15.24 m.) max.

Type of berth: As Berth No. 1.

Length of berth: As Berth No. 1.

Submarine Pipe-lines and Hoses: From the ex-Loading Dock 1×26 in. crude oil line, 1×10 in. bunker line and 1×4 in. marine diesel line have been laid to the manifold position. 2×10 in. rubber hoses for crude oil, 1×6 in. rubber hose for bunkers and 1×4 in. rubber hose for marine diesel oil are connected to ship's manifold. All these hoses approximately 225 ft. (69 m.) in length, and the maximum lifting weight of 2 crude oil hoses together is 4.5–5 tons.

(c) Loading Rates at Berths No. 1 and No. 2

Crude oil rate is 30,000 bbls/hr. or 4,000 tons/hr.

Fuel oil loading rate at Berth No. 1 is 7,000 bbls/hr. or 1,000 tons/hr.

(d) Preparation on board before Berthing at Berths No. 1 and No. 2

Vessels should have ready:

(i) Both anchors.
(ii) 3 ropes forward and 9 ropes aft.
Some wires are acceptable in place of equivalent number of ropes. No shore wires used from buoys to ship. All ropes and wires should be in good condition and preferably without splices.
(iii) Port derrick rigged for minimum lift of 5 tons, using a wire runner and a hook.
(iv) 2×10 in. ASA 150 hose connections for crude oil, and 1×12 in. ASA 150 for fuel oil cargo (at Berth No. 1 only), at the ship's port side manifold.
If ASA 150 is not available, the Company should be advised before arrival.

(e) Mooring and Unmooring at Berths No. 1 and No. 2

On approaching berth a ship's line is passed to one tug from centre fairlead aft. This line should be of good strength and well made fast on board.

When in position off berth, starboard anchor is let go and slacked away easily to about 9 or 10 shackles on deck. Port anchor is then let go and paid out easily as vessel swings round into berth using tugs and engines as required. At same time, starboard anchor is hove-in to about 6 or 7 shackles on deck and then made ready for slacking away again.

As vessel backs down berth the anchors are slacked away as necessary, and ropes sent to forward (No. 4) buoy. When stern passes close to starboard quarter (No. 1) buoy, ropes are sent away to this buoy, hove-in tight and put on bitts ready for slacking if necessary. Ropes then run to port quarter (No. 3) buoy, hove tight, and lateral position in berth adjusted between port and starboard quarter buoys. Lastly, ropes are run to the stern (No. 2) buoy and tug line also passed to this buoy. The fore-and-aft position is then adjusted between the anchors and the sternlines. A second tug is used to assist in lateral positioning of the vessel, and 2 mooring boats are used for running lines to buoys, normally taking 2 ropes at a time.

In Wintertime 3 ropes are used to each buoy, but in Summer 2 of these may be dispensed with at Mooring Master's discretion.

When properly positioned in berth, distance from ship's side to manifold marker buoy should be about 50-66 ft. (15–20 m.).

When hose disconnection completed, vessel unmoors by letting go all lines on buoys No. 3 and No. 4, followed by those on buoy No. 2 and lastly those on buoy No. 1. Vessel then heaves both anchors as necessary until they are up and clear, and vessel can leave berth.

Tugs used as required to keep vessel away from manifold marker and mooring buoys.

Mooring-Master may vary this procedure according to prevailing weather.

(f) Hose Connection and Disconnection at Berths No. 1 and No. 2 After completion of mooring, mooring boat will pull hose marker buoys to ship, and connect to ship's port derrick runner. The 2 crude oil hoses are lifted together from seabed by ship's derrick, and connected directly to manifold by Company's Crew.

Fuel oil hose at Berth No. 1 is lifted separately and connected in similar manner.

Time taken for hose connection about 1–1.5 hours depending on number of hoses connected. Hose disconnection takes about 1 hour, and is done in reverse manner to connection.

(g) Loading Restriction at Berths No. 1 and No. 2

Due to there being only 1 cargo pipe-line between ex-Loading Dock and the shore, it is not possible to load vessels in berths No. 1 and No. 2 simultaneously. Therefore, when these berths both occupied, 1 vessel will be loading while the other is deballasting; the latter arranging to finish ballast about 1 hour before the other vessel finishes cargo.

(h) General Description of Berth No. 3

Position: 28° 27′ 06″ N., 48° 36′ 28″ E.

Depth: 62–64 ft. (18.90–19.51 m.), but 59 ft. (17.98 m.) over pipe-lines, at ISLW.

Permitted draft: Normally 54 ft. (16.46 m.), but 56 ft. (17.07 m.) permissible using rise of tide.

Type of berth: Single-buoy-mooring system consisting of a buoy 30 ft. (9.14 m.) in diameter, moored to 8 pendant legs of 3.5 in. high strength chain shackled to anchor piles at a radius of 575 ft. (175 m.), and having a rotating deck carrying pipe-line and mooring connections.

Moorings: Attached to mooring connections on the buoy are 2×12 in. nylon ropes (97 mm. dia., breaking strain 150 tons). These ropes are 120 ft. (37 m.) long, and have at their free end a length of stud link chain which includes a "sister-plate" for receiving the shackles used on deck of tanker. From outer end of this chain is connected a 10 in. polypropylene "pick-up" rope about 180 ft. (55 m.) in length. Rope supported by "doughnut" floats, and chain hung by large plastic buoys 5 ft. in diameter, coloured red and green.

Submarine pipe-lines and hoses: 1×36 in. crude oil line and 2×12 in. fuel oil lines have been laid approximately 30,000 ft. (9 km.) from shore to position close under buoy. From underwater manifold the crude oil goes to the buoy through 20 in. underwater hose; fuel oil lines joined at manifold and fuel oil led to buoy through 1×10 in. submarine hose. From deck to buoy 20 in. crude oil hose and 10 in. fuel oil hose are supported by floats, and have a length of 690 ft. (210 m.) to a hose raft, at which position the 20 in. hose is divided into 3 strings of 12 in. floating hose. These, together with the 10 in. fuel oil hose, extended for a further 180 ft. (55 m) making a total length of 870 ft. (265 m.) including the raft. At their free end the hoses are paired and connected to 2 large plastic buoys each 4 ft. in diameter.

Loading Rate: Maximum loading rate of crude oil is 45,000 b.p.h. or 6,200 t.p.h. The fuel oil loading rate is 5,000 b.p.h. or 700 t.p.h.

(i) Preparation on Board before Berthing at Berth No. 3

Before arriving at anchorage, vessels assigned to Berth No. 3 should have ready:

(a) 2 mooring ropes forward, together with rope stoppers, and also 1 or 2 steel crowbars.

(b) Port derrick rigged for 10 tons, or maximum lift if 5–10 tons.

(c) 3×12 in. ASA 150 hose connections for crude oil, and 1×10 in. ASA 150 for fuel oil cargo, at the port side manifold. If ASA 150 is not available, the Company should be advised before arrival.

(j) Mooring at Berth No. 3

Mooring Master will board from tug which carries mooring and hose connection materials. Vessels should have crew standing-by ready to receive these materials, and should maintain a lee until this is completed.

Mooring Master will instruct crew in setting-up of forward mooring, where 2×12 in. nylon ropes are made fast round port and starboard bitts with their attached shackles about 12 ft. (3.66 m.) inboard from the fairleads of panama leads as far forward as possible. Size of fairlead opening should be at least 12 in. to prevent chain jamming in fairleads.

Approaching berth, tanker should lower a mooring rope from each bow as a messenger. Mooring boat will take port rope first, and connect it to the port "pick-up" rope which should then be hove-in while the boat returns to take the starboard rope for connection to its "pick-up" rope. These two ropes are then hove-in until the chains come into the fairleads, and the shackles can be made fast in the "sister-plates". The "pick-up" ropes are then slacked back until the nylon ropes have the weight.

Usual time from sending away first line until all fast is about 20 minutes.

(k) Unmooring from Berth No. 3

After hose disconnection completed, the weight is taken on "pick-up" ropes, nylon ropes are unshackled, and as vessel backs off berth the "pick-up" ropes are slacked off and then dropped into the water. The tug will come alongside either before or after vessel backs off berth, whichever is convenient, and the nylon ropes and the 2 big shackles are passed to the tug. Unmooring time usually 10 minutes.

(l) Hose Connection and Disconnection at Berth No. 3

After completion of mooring, the mooring boat which has been holding the hoses clear during berthing, will bring the hoses to the ship and connect the derrick runner to the buoy having 2×12 in. crude oil hoses. These are usually lifted aboard together and connected directly to ship's manifold, making any necessary separation of hoses as may be required according to lifting capacity of ship's derrick.

The hoses are hung off on 2 in. diameter nylon ropes and lashed to the rail to prevent shock loads due to wave action being transmitted to manifold flanges.

After the first pair of hoses have been connected, the second buoy is lifted and the remaining crude oil hose and the fuel oil hose connected in similar manner to the first 2 hoses. If a vessel requires a loading rate of 5,000 t.p.h. or less, only 2 crude oil hoses are connected. According to the number of hoses to be connected, connection takes 1.5–2.5 hours.

Hose disconnection is done in a reverse manner to connection, and takes about 1–1.5 hours.

(m) Berth No. 4 (S.B.M.).

The S.B.M. is located in a position Lat. 28° 27.9′ N. Long. 48° 38.6′ E., approx. 12,300 ft. E.N.E. of Berth No. 3.

Tanker manoeuvring area is designated within 2,000 ft. (609 m.) radius from the S.B.M. Since 2 loading pipe-lines are trenched under sea bed, the area is imposed on prohibition of vessels' anchoring.

The water depth in the area has been recorded 70 – 73 ft. (21.33 – 22.25 m.) except 69.5 ft. (21.18 m.) above the pipe-lines by precise echo-sounding.

The deepest draft of tanker is normally 64 ft. (19.50 m.), but 66 ft. (20.10 m.) is permittable using rise of tide.

Berth Loading Control Platform: An oil-well jacket type Berth Loading Control Platform with a rotating light-beacon, typical of an offshore valve station, is located in a position Lat. 28° 27.0′ N., Long. 48° 35.8′ E., about 3,600 ft. (1,500 m.) Westward of Berth No. 3. The light, Fl. R. ev. 10 sec. 16 M. (Ra. Ref.), is visible at a great distance.

Crude floating hose: From S.B.M. to floating manifold length 810 ft., diameter 24 in., test pressure 200 p.s.i., 1 line weight 3,460 kg.

From floating manifold to hose line close to tanker: Number of hoses 3. Nominal size 14 in., length 150 ft. Test pressure 200 p.s.i., weight 2,080 kg.

Floating Bunker Hose: One line of 10 in. diameter. Length 260 ft., test pressure 200 p.s.i., weight 1,210 kg.

Loading rate: Crude 40,000 – 60,000 b.p.h. Bunker light fuel min. 1,860 b.p.h., heavy fuel min. 2,000 b.p.h.

Weight of Hose Lines:

Height of Loading Deck above sea surface	*Hose Length*	*Weight 1×14 in. Hose Line (kg.)*	*1×14 in. + 1×10 in. Hose Lines (kg.)*
30 ft. (9.14 m.)	40 ft. (12.2 m.)	3,600	5,500
40 ft. (12.20 m.)	50 ft. (15.2 m.)	4,600	6,100
50 ft. (15.24 m.)	60 ft. (18.3 m.)	5,600	6,700
60 ft. (18.29 m.)	70 ft. (21.3 m.)	6,600	7,300

Note: The above figures include the weight of crude oil, marker buoy, lifting chains and fittings.

LOADING: Loading crude cargo on top of oily residue is acceptable.

(a) Dry Inspection. Upon completion of deballasting the Mooring-Master will inspect the tanks.

If the tanks are not satisfactory, he may require further pumping until such time as they reach the required standard.

(b) Loading Operations. When ship is ready for loading, ship's officer must inform Loading Operator who will transmit necessary orders to Control Room on shore.

Loading is started by booster pump, and after everything has been checked and found satisfactory on board loading rate will be gradually increased by starting further booster pumps and then main pumps in sequence until the required loading rate is reached; provided always that required rate is within capacity of the pumps.

Loading rates can be varied at any time during loading upon 5-10 minutes notice to the Mooring-Master or Loading Operator on board.

In emergency, the immediate stopping of all loading can be accomplished.

When loading is completing, the rate is gradually reduced first by stopping the main pumps and latterly the booster pumps, one by one according to the request of the ship's officer. At the final stage of loading only booster pumps should be on the line, and the ship's officer should tell the Loading Operator to "Stand-by" at least 5-10 minutes before finishing cargo.

Shore pumps will stop about 15 seconds after their control buttons are pressed, but the oil will continue to flow for several minutes, depending on amount of time since main pumps were stopped.

All stops for cargo completion must be given by the ship, as "shore-stop" is *NOT* practised at this port.

(c) Overflows and Spillage. In the event of overflow or spillage during loading, cargo will be stopped immediately and will remain stopped until such time as Mooring Master considers it safe to resume loading. This will normally be when all the overflowed oil has been cleared off the deck and there is no longer any unusual danger involved. It is ship's responsibility to clear oil away as soon as possible after occurrence.

(d) Ullaging and Gauging. After loading completed, Mooring Master will witness final ullaging on board so that ship's figures can be calculated.

On shore a group of Government and Company gaugers will take manual gauges of the shore tanks before and after loading, and from these gauges the Bill of Lading figures will be calculated.

(e) Saybolt Inspection. The oil inspectors of E.W. Saybolt & Co., S.A., based in Mina Abdullah, Kuwait, are available at this port upon consignee's special request. They will carry out or witness gauging of the shore tanks, dry inspection and ullaging of the ship's tanks, calculation of shore and ship's figures, analysis of oils, etc., issuing the necessary certificates according to consignee's requirements.

STEVEDORES: Dry-cargo vessels calling Ras-al-Khafji to give at least 72 hours notice to Agents to arrange labourers. Stevedores will be arranged from Kuwait. Ship's gear used for discharging which takes place at anchorage into barges.

MEDICAL: Company operates a clinic and a hospital at Ras-al-Khafji. Medical and dental treatment can be given in cases of emergency or serious illness or injury. Epidemic diseases or cases of serious injury or disease requiring operations, etc. are normally transferred to State hospitals in Kuwait. Company's doctor will not normally attend on board unless patient is incapable of attending clinic. Requests for medical attention should be given to ship's Agent as early as possible before arrival.

FRESH WATER: Not available except in cases of extreme emergency.

FUEL: (Also see "Berthing").

(a) Grades. Marine diesel oil (MDO), light bunker oil (LBO) and heavy bunker oil (HBO) are supplied. Each loading berth has pipe-line which can deliver light and heavy bunker oils, but only Berth No. 2 has marine diesel line. At Berths No. 1 and No. 3, marine diesel oil supplied from barge for which no extra charge made.

"Bunkering Information" booklet, which gives full details of bunkering services at this port, is available from the Company upon request.

(b) Bunker Nomination. Owners, Operators or Charterers should nominate their vessels' bunker requirements *to the Company's Head Office in Tokyo.*

Vessels requested confirm grade and quantity of bunkers required *direct to "Arabia-oil Kuwait"* (via "9KK") through normal radio services at least 4 days before arrival; or in cases where vessels receive instructions less than 4 days away, they should advise bunker requirements as soon as possible.

(c) Bunkering Operation. Bunkers normally supplied to vessels in berths while they are discharging ballast or loading crude oil. At Berths No. 1 and No. 3 MDO supply from a barge will be done usually before loading cargo.

Except in special circumstances when previously agreed, bunker supply is Stopped Onshore when requested quantity has been pumped according to shore tank gauging.

Berth	*Marine diesel oil*	*Light and heavy bunker oils*
No. 1	4″ 80 t.p.h.*	6″ 400/300 t.p.h.
No. 2	4″ 40	6″ 400/300
No. 3	4″ 80*	10″ 400/300

Note: *(a)* *Supply from a barge with 4″ rubber hose.
(b) In Winter time the rates for light and heavy bunker oils decrease due to the low sea-water temperature increasing the viscosity of these oils.

Bunkering for Cargo Vessels.

Bunker supply to cargo ships from a barge or a coastal tanker is available.

CUSTOMS: Upon arrival Master required submit to Customs a manifest of any cargo to be landed at Ras-al-Khafji and to sign a declaration that no intoxicating liquors or drugs will be landed. After loading completed, Customs will sign an Outward Manifest and issue Port Clearance. These will be handed to Master by Agent.

In normal circumstances Customs Officers do not board tankers, but board cargo ships and leave a Customs Guard on board throughout vessel's stay.

Import of following articles forbidden:

- Alcoholic beverages.
- Pornographic literature, photographs, pictures and films.
- Explosives.
- Firearms or implements of war of any kind.
- Religious matters not pertaining to the Moslem faith.
- Playing cards and other gambling devices.

REPAIRS: Some minor repairs may be made on board using shore assistance in case of extreme emergency, but such repairs must be made only with prior permission of Company's Terminal Office should it be required to do them in berth. Preferably all repairs should be carried out at anchorage. In all cases when shore assistance is required Master should notify ship's Agent well in advance.

DRY DOCKS: None.

REPATRIATION: May be accomplished by making special arrangement through the ship's Agent, well in advance of vessels arrival.

Marine Superintendent of Owners, or Owners Representatives and businessmen visiting Kuwait must have valid visas. Such visas can be obtained from Kuwait Government's diplomatic missions abroad.

AIRPORT: Crew joining must be routed through Dhahran. Kuwait Airport 110 km. Dammam 325 km.

TIME: GMT plus 3 hours throughout year.

TELEPHONES: No facilities for placing on board.

SERVICES: Swedish Welfare for Seamen, Lloyd's Surveyor, Butterworth Tank Cleaning Machines and Equipment and Under-water cleaning.

Provisions and deck stores are available from ship chandlers in Kuwait in limited kinds and quantities. Prices at Khafji may be a little more expensive than in Kuwait due to the transportation charges made. In all cases the ship's Agent should be advised of the requests at the earliest possible time before arrival.

SHORE LEAVE: Not normally permitted by Authorities except by arrangement through the ship's Agent.

AUTHORITY: Arabian Oil Co. Ltd.

AGENT: See "Ras Tanura".

RAS AL MISHAB: 28.13 N. 48.43 E.

PILOTAGE: Pilotage is compulsory and only available in daylight hours (0600 to 1700 hrs.) 7 days a week with short notice prior to vessels arrival.

Vessels calling at Ras Al Mishab are requested to contact Ras Al Mishab harbour office on VHF – Channel 16 prior to arrival at pilot buoy, (buoy No. 5 of Ras Al Mishab approach channel) which is located at 28° 13′ N and 48° 43′ E., do not proceed beyond this point before consulting with Ras Al Mishab harbour office. Which is available from 0600 to 1700 hrs. every day except Friday.

APPROACHES: Do not use the old recommended track to Bandar Mishab shown on British Admiralty Chart No. 3774 and U.S. Hydrographic Chart 62422 unless corrected. Ships arriving should follow Ras al Khafji approach channel Buoy No. 1 (Lat. 28° 36′ N. and Long. 49° 10′ E.) and Buoy No. 2 (Lat. 28° 36′ N. and Long. 49° 00′ E.). From Light Buoy No. 2 proceed on a course of 253°(T) for approximately 5 miles and the following is the new approach channel to the anchorage and entrance channel of Ras al Mishab.

The dredged channel of 4 miles is well marked by the buoys and 2 pairs of ranges that lead vessels in and out of the port.

Buoy No. 1C – 28° 34.7′ N. 48° 55′ E. Characteristic – Quick Flashing White.

Buoy No. 2D – 28° 30.0′ N. 48° 49.0′ E. Characteristic – Flashing White 10 Sec.

Buoy No. 3F – 28° 25.0′ N. 48° 47.2′ E. Characteristic – Flashing White 15 Sec.

Buoy No. 4F – 28° 19.0′ N. 48° 45.2′ E. Characteristic – Flashing White 5 Sec.

Buoy No. 5G – 28° 13.0′ N. 48° 43.0′ Characteristic – Quick Flashing White.

ANCHORAGE: Anchorage area is between Buoy Nos. 4 and 5.

RESTRICTIONS: Daylight berthing and unberthing only.

MAX. SIZE: Max. allowed draft at present time is 33 ft., however, after completion of works on expansion of the port, which is under way, port expected to accommodate vessels up to 35 ft. draft regardless of length and/or tonnage.

TUGS: The port has 2 tugboats available to assist vessels in docking and undocking as well as any other service to be rendered in case of need for assistance. Each tugboat is capable of generating 2,000 h.p.

VHF: See "Pilotage".

BERTHING: Ras Al Mishab is a new deep water sea port with 2,400 ft. of berthing space.

The turning basin of 1,250 ft. radius provides safe manoeuvring for any size of the vessel not exceeding 34 ft. draft which shall lie alongside the pier.

The pier is 18 ft. high above the water and accordingly not suitable for ro/ro cargo operation, however, the harbour is well equipped for receiving any type and size of cargo including heavy lifts and bulk cement up to 24,000 tons.

The harbour is fully equipped with forklifts, discharging gear, spreaders for 20 ft. and 40 ft. containers. portable cranes up to 300 tons capacity, all handled by professional stevedores.

FRESH WATER: Not available.

FUEL: Not available.

GENERAL: Provision not available at this port, and it is suggested that vessels calling to Ras Al Mishab, secure their needs at other ports. Only emergency medical attention shall be provided if requested by Master.

No shore leave is permitted in this port except for the Master for business purposes, the Port Regulations are to be strictly observed by all vessels.

Any other matters such as crew changes, emergency repairs provisions, etc., shall be handled through local Agent.

SHIPMASTER'S REPORT: September 1980.

Pilotage: Pilot boards 3 miles South of buoy No. 5G.

Berthing: A new berth built 2 years ago at right angles to land with dimensions about 1,000 m. length and 250 m. wide, accommodating 8 ships, 4 on each side. 1 berth is for cement in bulk, having silo. (Sea Island berth is severely damaged and abandoned).

Stevedores: Working day and night in 3 shifts.

Clearance: Vessels are cleared any time during day whilst alongside. (We arrived alongside Thursday 1600 hrs. and we were cleared).

Tugs: 2 tugboats available.

Port facilities: 1 mobile crane 300 tons and 1 mobile crane 50 tons.

Agent: On VHF Channel 16.

AGENT: See "Dammam".

RAS TANURA: 26.38 N. 50.10 E. **(See Plan Book)**

PLEASE BE ADVISED THAT THE FOLLOWING CHANNELS ARE DUE TO BE CHANGED TO I.A.L.A. SYSTEM A (RED TO PORT).
FEBRUARY 1981 – RAS TANURA EAST CHANNEL.
APRIL/MAY 1981 – RAS TANURA MAIN CHANNEL AND JU'AYMAH CHANNEL AND TERMINAL AREA.

ALSO SEE "JU'AYMAH" SECTIONS A and B.

OPERATORS: Arabian American Oil Company ("Aramco")

FLAG: The Saudi Arabian flag must be flown 24 hours a day from the vessel's foremast while in the Port of Ras Tanura. Masters should obtain this flag before arrival but, if circumstances render this impossible, a flag may be purchased from the vessel's Agent.

The Saudi Arabian flag is properly displayed when the Arabic writing appears on top and the Sword on the bottom.

DESCRIPTION OF TERMINAL: Ras Tanura Terminal, which consists of 2 piers, and 4 sea islands, has a total of 18 loading berths. Crude oil and product cargoes may be loaded in smaller tankers with drafts up to a max. of 33 ft. at the South Pier's 4 berths. At the North Pier, in addition to crude and products, RLPG is available and water depths at these 6 berths range from 40 to 49 ft. at ISLW. 4 Sea Islands, each consisting of 2 berths, are located approximately 5,600 ft. N.E. of the North Pier. The Sea Islands are inter connected with a walkway and are equipped with breasting and mooring dolphins. Water depth at the 8 Sea Island berths is 85 ft. at ISLW.

IMPORTANT FEATURES:

Ras Tanura Port:

1. Aramco harbour Pilots and Mooring Masters moor, unmoor and supervise the movement of all vessels in the vicinity of the piers, sea islands and buoy mooring berths. Normally, no charge is made for this service.

2. Safety rules are strictly enforced. Receipt of "Instructions to Vessels and Conditions of Use of Port" must be acknowledged before a vessel will be berthed. A thorough vessel inspection will be performed prior to loading to ensure conformity with safety requirements.

3. Aramco maintains a radio station (call letters HZY) for the exchange of messages with ships. All incoming tankers should establish early contact with this station, at least 72 hours before arrival, in order to exchange ETA data, traffic lists, weather advice, port closure advice, etc.

4. When a vessel is scheduled to load cargo at both the Ras Tanura Terminal and the Ju'aymah Terminal, Aramco reserves the right to advise the vessel at which berth the loading shall start and finish.

5. Display of quarantine signals on approach to Ras Tanura or Ju'aymah Terminal must be maintained until pratique has been granted. Ships cannot be berthed until the radio quarantine message has been received. The flag of Saudi Arabia must be flown both day and night throughout the vessel's stay in port.

6. To permit more rapid turnaround, an early departure procedure is available. This service provides for a quick departure of the vessel after loading, without the necessity of waiting for the delivery of documents at anchorage. This special service should be requested from the ship's Agent at the earliest opportunity.

7. The possession and/or consumption of alcoholic beverages is prohibited within the Kingdom of Saudi Arabia. All alcoholic beverages including beer, table wines and liquors are to be under lock and key during the vessel's stay. Vessels anchored at the anchorages or moored at the piers, sea islands or SPM's are considered to be in the Kingdom of Saudi Arabia. Local officials may carry out inspections to confirm that all alcoholic beverages are kept in locked ship's stores during the vessel's stay.

8. Saudi Arabia Government regulations prohibit the taking of photographs of *any* installation at the Port of Ras Tanura. Considerable delay to vessels may be incurred due to governmental investigations of violations of this regulation.

9. No medical facilities are available at the Ju'aymah and Ras Tanura Terminals. Requirements for medical assistance or hospital service should be addressed to the ship's Agent. The Aramco radio station HZY may be used at any time, without charge by vessels at sea, to obtain medical advice.

Ras Tanura Terminal:

1. The Ras Tanura Terminal facilities consist of 2 T-head piers and a Sea Island complex of 4 individual sea islands providing a total of 18 berths. In addition, a small single-berth pier used by small craft and coastal tankers is located on the West side of the Ras Tanura peninsula.

2. Vessels arriving at the Ras Tanura Terminal shall retain sufficient clean water ballast on board to permit safe handling of the vessel from the anchorage area to the berths in the prevailing weather conditions. Every effort should be made to reduce the quantity of ballast on board to a minimum and to have the ballast in as few tanks as practical in order to reduce time spent deballasting. Ballast pumping equipment should be ready to commence discharging ballast as soon as the vessel is secured in berth.

3. The "Deep Water Departure Channel"has a clear swept depth of 69 ft. at ISLW. A minimum 5 ft. keel clearance is required for all vessels transitting this channel during departure.

LOCATION: Aramco's crude and products shipping terminals at Ras Tanura and Ju'aymah comprise the Port of Ras Tanura, which is located on the Saudi Arabian coast of the Arabian Gulf. The *Ras Tanura Terminal and Refinery* are located on a 13 mile long peninsula known as Ras Tanura. On the sand spit at the Southern extremity of the Terminal are located the Company's piers, export tank farm and terminal offices.

There is a survey reference point located at the Southern tip of the peninsula, over which a beacon tower has been erected. The exact position of this beacon is:

Latitude: 26° 37′ 25″ North Longitude: 50° 09′ 5″ East.

All bearings are referenced to this point, which is officially known as Ra's at Tannurah. The name "Ra's at Tannurah" (variously spelled) appears on most charts and publications.

The Ras Tanura Refinery and its storage tanks are located about 7 miles to the North.

The *Ju'aymah Terminal* tank farm is located on the coast approximately 20 miles to the North of the Ras Tanura Terminal. The metering and manifolding platform and the single point mooring berths are situated approximately 7 miles offshore

Loading Island – Ju'aymah RLPG Loading Terminal: Based on the bathymetric survey data, the Loading Island site has been determined so as to accommodate a loaded vessel draft of 55 ft., plus a 5 ft. min. ISLW keel clearance, both at the berths and for a safe distance from the berths for vessel manoeuvring. The selected location has sea bottom contour lines of −75 to −80 ft. The −60 ft. contour line is approximately 2,500 ft. from the Southern-most mooring dolphin, and 1,000 ft. from the breasting line of the inner berth. The −50 ft. contour line is approximately 2,000 ft. from the inner berth breasting line. There is also adequate manoeuvring area North of the T-head junction at the location intended for the future addition of another two-berth Loading Island.

The alignment of the Island is 335°, which has been determined on the basis of available sea current data, the wind direction, the ship-handling experience in the area. The Loading Island consists of a centrally located Loading Platform, mooring dolphins, breasting dolphins, interconnecting walkways and pipeways, and the operating marine equipment.

Overall, the Loading Island is 1,380 ft. long, extending from Mooring Dolphin No. 1 to Mooring Dolphin No. 6. In addition, a concrete pipeway extends 400 ft. South from the trestle T-head junction to Mooring Dolphin No. 1. The 400 ft. pipeway distance provides manoeuvring clearance between the trestle and the inner berth. A width of 300 ft. between the breasting lines of the 2 berths has been selected to limit vertical angles on mooring lines, and to provide sufficient Loading Platform area for the piping manifolds, meters, and various structures. The overall length of 1,380 ft. results from providing 6 mooring dolphins in order to accommodate all sizes of ships expected at the berths. The 6 mooring dolphins are arranged along the center-line of the Loading Island.

For further details of the RLPG Terminal at Ju'aymah – See "Ju'aymah" Section (B).

The port of Ras Tanura is a roadstead and there are only open anchorage areas for oil tankers and other vessels. Some protection is afforded by the land on the West and the shoals to the North, East and South. These shoals tend to keep the sea down to such an extent that vessels do not ordinarily register heavy movement.

An anchorage – "Northern Holding Anchorage" – has been established at approximately Lat. 27° 03′ N. and Long. 50° 15′ E. and is shown on U.S. D.M.A. No. 62415 and B.A. 3777. During periods of port congestion, arriving vessels may be requested via VHF radio to anchor in the holding anchorage. Vessels waiting in the holding anchorage shall continuously monitor VHF Channel 16 to receive instructions concerning berthing.

DOCUMENTS:

Arrival Documentation: Arrival documents consist of two groups; documents to be shown by the Master, and documents to be signed or filled in by the Master.

I. Arrival documents required: The following documents are required for immediate inspection by the boarding Saudi Arabian Government officials:

(a) Maritime International Declaration of Health (1 copy from last loading to be surrendered).
(b) Valid Deratisation or Deratisation Exemption Certificate.
(c) Crew List.
(d) Passenger List.
(e) Smallpox Vaccination Certificates, of a date not exceeding 3 years, for all passengers and Crew members.
(f) Certificates of Inoculation against any communicable diseases prevailing at the ports of departure.
(g) A complete set of log books covering the period since the vessel's last call at Ras Tanura. In the case of a first visit, Saudi Arabian Government officials may require that log books cover the period from the date of the vessel's first sailing or from April 25th, 1952, whichever date is most recent.

II. Arrival documents, to be filled in or signed:

(a) Permit of Departure. Will be filled in by Quarantine or Agent, on arrival, with facts supplied by the Master.
(b) Declaration of Health. Should be filled in by Master/Agent and signed by Master.
(c) Letter of Guarantee, Stores. No liquor guarantee, to be signed by Master, Agent and Coast Guard.
(d) Letter of Guarantee, radio silence. To be signed by Master.
(e) Arrival Report, Agent's. To be signed by Master and Agent. When signing, Master authorizes the Agent to sign B/L on his behalf, after acknowledgement of cargo figures cabled by ARAMCO (See EDP Procedure).
(f) ARAMCO Requirement. ARAMCO will produce the following to be acknowledged by the Master:
    Condition of use of Loading Facilities.
    Safety Declaration.
    Oil Pollution Guarantee, etc.

Cargo documents: Cargo documents are divided into two groups; documents originated by ARAMCO and documents not originated by ARAMCO.

I. Cargo Documents, originated by ARAMCO.

(a) Master's Receipt of Samples. Samples are delivered on board by the pier operator and receipt to be signed by ship's Officer.
(b) Master's Undertaking. Master guarantees that the vessel will not enter Israeli areas.
(c) Certificate of Oil Cargo Received. A Mates' receipt signed by the Master or Agent.
(d) Bill of Lading. This an an Aramco prepared document. After negotiations with ARAMCO Houston, carrier might get permission to use his own Bill of Lading forms. The required information, except for the cargo quantity, will be filled prior to the arrival of the tanker and a copy will be given to the Master by the Ship's Agent upon arrival. After completion of loading, Shipping and Documentation Unit will radio the cargo quantities to the Master who will fill in these quantities on the Bill of Lading and will instruct his Agent to sign, on the Master's behalf, the original Bill of Lading.
    The following instruction is given to the Master by ARAMCO. "We would like to remind you that additions or omissions on our documents are not allowed. If you want to add or delete, please write what you want on a separate paper and send them to us. We will notify the people concerned about them. If we receive their approval, we will prepare amended documents and distribute them to all parties involved".
    All changes in the Bill of Lading have to be referred to Houston. No changes can be decided in Ras Tanura.
(e) Tanker Time and Loading Report. ARAMCO computer sheets can differ from Statement of Facts.
(f) Certificate of Origin. Could be certified either by Consul of USA or Dammam Chamber of Commerce.
(g) ARAMCO Report of Cargo – Ship's Ullage. Nearly same as Certificate of Oil Cargo Received, but signed by ARAMCO and gives ship/shore comparison. The ullage report is made and signed by ship's Officer. If discrepancies too high, a new check will be made together with ARAMCO representative.
(h) ARAMCO Report of Laboratory Inspection. Will use order number, vessel's name, berth and quality as reference.
(i) Export Manifest, Shipper. Made by ARAMCO. Same figures as on Bill of Lading plus bunkers delivered, if any.
(j) Document Distribution. Under a Petromin contract.

II. Cargo Documents, Non ARAMCO Originated.

(a) Notice of Readiness. Should be tendered on arrival; will be acknowledged when Pilot is boarding if loading at Ju'aymah, and if at Ras Tanura when brought to the Shipping Department by the Agent.
(b) Export Manifest, SAG. Prepared by Agent, facts from Port Director's Manifest and Shipper's Export Manifest. Signed by SAG officials. Will be air mailed to receiver together with Shipper's Export Manifest. This is the so called Discharge Certificate. SAG Manifest should be returned to ARAMCO duly stamped by Customs or Port Office at discharging port. A statement indicating the type and quantity of cargo received and the port where received, should be returned together with the sealed SAF Manifest. A self-addressed envelope will simplify the return.
(c) Statement of Facts. Will be filled in by Master and Agent. Collected by Agent on departure or given to Pilot when leaving.

Early Departure Procedure.

This procedure is designed to allow vessels participating, to sail immediately after cargo release by ARAMCO, without the necessity of the vessel awaiting completion of cargo documents. The procedure will be followed on vessels when specifically requested by the Master. It should be kept in mind that on short voyages (India, Pakistan and Ceylon) the vessel could arrive before the air mailed documents. In general, for shipments past Suez and East of Calcutta, the air mail will arrive before the vessel.

Procedure:

1. The Master should notify ARAMCO or the ship's Agent at his earliest opportunity of his intention to use this "Early Departure" Procedure in order that there be no delays.

2. After the Master has advised the Agent of his intent to use the early departure procedure, the Agent will deliver to the Master the following documents, before the ship finishes loading:

(a) The Master's and consignee's via-vessel copies of the Bill of Lading completed except for the entry of cargo quantities.
(b) The Master's notice of readiness signed by ARAMCO.
(c) Ship's Port Clearance and Port Director's Manifest. The Port Director's Manifest will be complete except for the entry of loaded quantities.

(d) Other such documents as might be required to go with the vessel that do not have loaded quantities on the text of the form.

3. When the vessel finishes loading the ship's loading officer will supply ARAMCO with a copy of the ship's ullages and quantities as soon as possible. Simultaneously ARAMCO inspectors will expedite sample testing, gauging of shore tanks and the calculation of a total gross at 60°F quantity for each grade of petroleum loaded. This will be followed by computing a ship/shore comparison for cargo release according to standard practice.

4. If the release is completed before the vessel is moved from the pier, the Master will be notified verbally of the release and at the same time advised of the gross at 60°F shore quantities. With this notification the Master may then sail immediately after leaving berth unless he wishes to protest the shore quantity. In which case, he should notify ARAMCO immediately and *delay his departure* until ARAMCO has had time to investigate his protest.

5. If the cargo release has not been relayed to the Master before the vessel has been moved from the berth, the vessel must proceed to anchorage and *await cargo release* there by radio. At no time will a vessel sail unless it has received either a verbal or written cargo release from ARAMCO. After the vessel at anchorage has received a cargo release and a gross at 60°F shore quantity, it may then sail unless as in item 4 the Master wishes to protest the shore quantity. He would then notify ARAMCO immediately and delay his departure long enough for ARAMCO to investigate.

6. In case of large ship/shore difference or suspicion of contaminated cargo, ARAMCO will delay the vessel's cargo release and departure until the matter can be resolved.

7. After a vessel has received its cargo release and is under way, ARAMCO will transmit the complete and official Bill of Lading quantities as soon as possible by radio message.

8. The Master will then reply repeating all the quantities relayed to him and stating that he authorises the Agent to sign the shipping documents on his behalf on basis of those same figures.

9. The Master will then complete the documents going with the ship by filling in the quantities received by radio and entering the date. This would consist of the Master's and the via-vessel copies of the Bill of Lading only, unless the vessel transitted the Suez Canal, in which case he would also have to enter the shore quantities on his copy of the Port Director's Manifest.

10. All other documents will be completed by ARAMCO and signed by the ship's Agent on authorization of the Master.

11. The document distribution that would normally go as consignee-via-vessel distribution (except the Bills of Lading) will be sent out air mail by the ship's Agent to the consignee's address at the port of discharge as soon as possible. The foregoing would include the Export Goods Manifest issued by Saudi Customs Department.

Departure Documents:

Documents related to the vessel's departure could be divided into two groups, documents to be on board when sailing and documents left behind.

I. Departure Documents, not to be carried on board.

(a) *Port Clearance Application.* This form is filled with information from Permit of Departure and Arrival Report, signed by the Master and Agent, and is used for computing the Port Dues.

II. Departure Documents, to be on board when sailing.

(a) *Permit of Departure.* Must be on board before departure.

(b) *Port Clearance, SAG.* This Sailing Report is filled in by SAG officials with information from the Port Clearance Application. Must be on board before departure.

(c) *Port Director Export Manifest.* Filled in by Agent, signed by Port Director. Cargo figures not filled, given over radio by ARAMCO and to be filled in by Master. Needed for Suez Canal passage.

PILOTAGE: The channels of the Ras Tanura Separation Scheme are well marked by lighted, radar-reflecting beacons and buoys. Presently, for this reason, channel Pilots are not provided.

Pilotage is compulsory for all vessels calling at the Port of Ras Tanura to use the terminal facilities. Aramco Harbour Pilots moor, unmoor and supervise the movement of all vessels in the vicinity of the piers, subject to the conditions detailed in Appendix III, "Instructions to Vessels and Conditions of Use of Port", which see. Aramco Harbour Pilots are on duty continuously and at present their services are provided without charge although the Company reserves the right to charge for these services.

On departure from the Ras Tanura berths, Masters of VLCC vessels of 150,000 d.w.t. and above which have a draft of 60 ft. or more, may request additional pilotage assistance to line up to transit the "Deep Water Departure Channel". (Also see "Shipmaster's Report".) In such instances, the Harbour Pilot will remain on board until the vessel is aligned on a safe course with the departure channel, providing the Pilot can disembark safely. The additional pilotage is also available when it is necessary for a VLCC to proceed to anchor to await a favourable tide or make repairs. The Pilot will remain on board until the vessel arrives in the anchorage; however, the Master will be responsible for the actual anchoring of the vessel. During adverse sea and weather conditions, a proper lee shall be made so as to allow the Pilot to safely disembark. In order to permit the Harbour Pilot to safely embark and disembark from the vessel, a Pilot/accommodation ladder will be provided in accordance with the following requirements:

1. The ladder should be kept in good order and cleaned, and should be of adequate length and strength.

2. The vertical distance between steps should not exceed 15 in. The outboard edge of the step should project from 5 in. to 6 in. from the hull. Ladders must be so constructed that the steps will remain flat or at right angles to the hull while supporting the weight of a person.

3. Spreaders at suitable intervals should be provided to prevent the ladder twisting and the ladder should be properly secured with the steps level.

4. The deck in the vicinity of the ladder should be clean and free of oil and grease.

5. When possible, on vessels so equipped, the pilot ladder shall be made fast alongside of an area where there is a break in the rail or an opening in the bulwark. This allows a person to step directly on the deck and is considered most desirable. The boarding position should be as near midships as possible.

6. During the hours of darkness, it is necessary that the Pilot ladder be adequately lighted. It is emphasized that not only the ladder, but the deck area close by the head of the ladder should be illuminated.

7. A man rope or safety line should be rigged in the close proximity of the ladder.

8. Responsible deck department personnel are to be in attendance when the Pilot boards or leaves the ship.

Only double-drum, double-wire pilot hoists will be permitted on inspection and approval of Ras Tanura Pilots.

Aramco Harbour Pilots will pilot vessels to berth at all piers. All manoeuvring of vessels in the vicinity of or at the piers will be under the supervision of an Aramco Harbour Pilot.

Under normal operating conditions, no towboat or other craft is to come alongside any vessel before the Harbour Pilot boards the vessel. Should the Harbour Pilot deem the assistance of a tug to be necessary, he will then give the proper signal and secure same. Ship's personnel must not signal for tugs or boats to come alongside except as directed to do so by the Pilot.

Vessels will not be moored if they are not equipped with satisfactory mooring equipment, lines, gear, etc., or if they are not sufficiently ballasted. It is the responsibility of the Master to notify the Harbour Pilot of any special conditions, difficulties or peculiarities, such as engine or boiler deficiencies, defective navigational equipment, mooring lines, tackle, gear, or lack of necessary equipment, which might impose hazards in connection with the handling, mooring, unmooring, discharging or loading of the vessel.

Most vessels will be loaded using all-metal loading arms. The use of nylon or other highly elastic line is prohibited. Mooring lines should be checked frequently and kept tight to prevent excessive movement of the vessel in berth.

All vessels moored with automatic tension winches shall set the manual brakes on these winches.

The services of the Harbour Pilot and of the mooring tugs and their crews are provided without charge and upon the express understanding that they become the Agents and servants of the Owners and/or Charterers of the vessel in every respect. Aramco shall not be responsible and shall be held harmless from all liability for any damage whatsoever resulting from or caused by any action taken, order given or decision made (or any omission thereof) by the Pilot, or tug crew, or in any respect to the handling of such vessel. Damage or injury to any Aramco facility, equipment or personnel by any vessel calling at any loading terminal of the Port of Ras Tanura shall be the responsibility and liability of the Owners and/or Charterers of the vessel.

VHF radio contact may be made between ships and the Aramco Terminal Planning Office and Pilot's office at frequencies listed. See "VHF".

ARAMCO Sea Island Pilots: ARAMCO maintains a Pilot on continuous duty on the Sea Islands. The Pilots assigned this duty are men with VLCC experience and tanker backgrounds. They are stationed on the Sea Islands by ARAMCO to provide Marine Advice to the Loading Masters and to assist as necessary with any vessel-related problems.

The Sea Island Pilots are on the Sea Islands at all times to assist in the safe and efficient mooring and loading of vessels berthed at this facility. Masters of vessels may contact the Sea Island Pilot through the pier operator or by calling the Ras Tanura Pilot office on VHF.

Masters of all vessels berthing at the Sea Islands are encouraged to discuss any vessel-related problems with the Sea Island Pilot on duty.

Informing Pilots of Finishing Time: In order to expedite ships movements and avoid any delay to the ships moored alongside Ras Tanura berths, Masters are to inform Ras Tanura Pilots through VHF Channel 16 one hour before completion of loading.

HELICOPTER SERVICE: In June, 1980, Pilot service by helicopter will be started at Ju'aymah and Ras Tanura on a limited basis. It is expected that this service will expand to total 24 hour service by January, 1981.

ANCHORAGES: The anchorages in the Port of Ras Tanura have been laid out to facilitate shipping and expedite ship movements to and from the Ras Tanura and Ju'aymah Terminals.

The *Northern Holding Anchorage* is located on the Northern side of the Ras Tanura Separation Scheme, due West of the Entry Buoy. This anchorage is intended as an initial holding area for incoming vessels which, because of berthing prospects or other reasons, will not be brought to berth on arrival. This recommended anchorage covers an area of approximately 30 square miles and varies in depth from 12 to 28 fathoms (22 to 51 m.). Holding ground is only fair, and it is recommended that anchored vessels lie to a long scope of chain whenever the weather is unfavourable.

The *Tanker Anchorage* at the Ras Tanura Terminal lies approximately 2 miles due East of the Sea Islands and Piers. This anchorage is used as a final holding area for vessels which have immediate berthing prospects or for vessels awaiting cargo clearance, documents etc., and whose draft does not exceed 60 ft. Vessels whose draft exceeds 60 ft. and which are required to anchor upon completion of loading, must normally do so in the area approximately 0.7 miles North of the Sea Islands. This anchorage area ranges in depth from 8 to 17 fathoms (14.6 to 31 m.) and holding ground is only considered fair due to variations in character of the bottom. It is recommended that anchored vessels lie to a long scope of chain during adverse weather.

INBOUND TRAFFIC PROCEDURES: All inbound vessels shall establish early radio contact with Aramco Ras Tanura via station HZY for the exchange of information, berthing prospects and arrival instructions. Arriving vessels which will be loading at the Ras Tanura Terminal shall proceed as follows:

(a) Vessels Proceeding to the Northern Holding Anchorage

The vessel shall make for a position approximately 2 miles North of the Ras Tanura Light Float position 27° 05.6′ N., 50° 57.5′ E., and then enter the inward channel of the Ras Tanura Separation Scheme. This will take the vessel past the Approach Buoy to the Entry Buoy. The vessel shall then proceed to the Northern Holding Anchorage and anchor. After anchoring, vessel shall immediately advise Aramco, via Radio HZY, of the following:

(i) Time of arrival at the Northern Holding Anchorage (in GMT).
(ii) Approximate position in the anchorage area.

Vessel shall then contact Aramco Terminal Planning Office and Ras Tanura Pilot Office by VHF radio, Channel 16, if vessel is equipped with VHF.

(b) Vessels Proceeding to Ras Tanura Terminal

The vessel shall make for a position approximately 2 miles North of the Ras Tanura Light Float position 27° 05.6′ N. 50° 57.5′ E. and then enter the inward channel of the Ras Tanura Separation Scheme. The vessel shall continue in the inward channel, past the approach buoy, entry buoy and all channel marker buoys to the Ras Tanura Terminal area, just South of Buoys No. 17 and 18, and proceed according to instructions from Aramco Terminal Planning and Ras Tanura Pilot Officer either to the Tanker Anchorage or to prepare for berthing.

HEALTH: *Radio pratique and quarantine:* A modified radio pratique procedure is in use at the Port of Ras Tanura. Port conditions permitting, vessels supplying requested quarantine information (see "Radio" – "50 Word Message") may be berthed on arrival and proceed with normal cargo loading operations prior to arrival on board of the Quarantine Officer. Extensive delay may be incurred by vessels failing to supply requested information promptly.

In accordance with international practice, quarantine signals must be displayed by all ships approaching Ras Tanura Port. These signals must be displayed continuously until pratique is granted. These signals are:

Sunrise to sunset – Quarantine flag
Sunset to sunrise – Signal lights – red over white

The Quarantine Officer may board vessels awaiting berth in the prescribed anchorage area; however, vessels proceeding directly to a berth will be boarded after being tied up.

Pier personnel are normally allowed on board prior to arrival of the Quarantine Officer.

Vessels at anchor awaiting berth should not rig an accommodation ladder, but instead should be prepared to provide, at short notice, an accommodation ladder rigged in conjunction with a pilot ladder. At night, adequate lighting must be provided.

RADIO:

Agents Advice: To be entered on ARAMCO's 7 days ETA computer list, a Master should cable ARAMCO his ETA at least 7 days in advance, stating name of Agent. It is essential this is done, otherwise the Agent will no have access to shippers instructions about nomination and other loading details, thus making it impossible for the Agent to provide the owners/charterers with useful information.

It is required that vessels contact "Aramco Ras Tanura" via HZY and provide a minimum of 3 notices of ETA information at about 72, 48 and 24 hours "steaming time" from the Northern Holding Anchorage. Shorter notices may result in delays and failure to give at least 24 hours notice will result in an addition to allowable lay-time in the event of a demurrage claim is filed against Aramco.

It is imperative that vessels departing under Early Departure Procedure monitor HZY and copy traffic lists after departure until cargo quantities are resolved and the Agent is authorised to approve documents.

The Arabian American Oil Company owns and operates a marine radio station whose call letters are HZY. Radio station HZY is maintained for the purpose of transacting Company business with "in-or-outbound vessels" and is open 24 hours daily. Station HZY will also accept and forward messages concerning ship's agency matters to Agents. However, agency messages to Masters are not permitted. There is no charge for either incoming or outgoing messages.

The marine transmitting antenna of HZY is located at:

Latitude – 26° 18′ 36″ North
Longitude – 50° 07′ 12″ East

Due to its inland location Masters are strongly advised NOT to use this antenna for radio direction finding purposes since inaccurate bearings will be obtained due to coastal refraction.

All vessels must endeavour to keep HZY fully advised regarding estimated times of arrival at Ras Tanura, as well as times of actual arrival and position in the anchorage. It is required that vessels provide HZY with a minimum of three notices of ETA information, at about 72, 48 and 24 hours "steaming time" from Ras Tanura. Shorter notices may result in berthing delay. If loading part cargoes at other Arabian Gulf ports prevents a vessel from furnishing an accurate ETA, steps should be taken to dispatch a message either direct or through the ship's Agent giving the best estimate possible at the time. This message should then be followed by an accurate ETA immediately upon departure for Ras Tanura. Failure to give at least 24 hours notice will result in an addition to allowable laytime in the event a demurrage claim is filed against Aramco.

Upon first contact with all inbound tankers HZY will transmit the following two standard messages of 188 and 50 words:

188 Word Message

Master Rastanuraradio/HZY

Contact HZY soonest advising One ETA GMT Rastanura Two any later changes Three Agent's name and requirements Four arrival departure draft fore and aft Five arrival displacement tonnage Six deballasting hours Seven maximum loading rate full-stop Vessel urged to accept highest possible loading rate stop Vessels loading cargo advise previous cargo and if cargo or residue aboard to be commingled with Rastanura cargo fullstop If VHF aboard call Aramco pilot station for anchoring, boarding and berthing instructions when 100 miles out on 156.8 Channel 16 or 156.7 Channel 14 stop If no VHF aboard contact HZY 500 kHz and copy traffic lists on odd hours for berthing instructions stop On arrival anchorage advise HZY official readiness time and anchored position stop Radio messages without charge fullstop Pilots require sufficient clean ballast for manoeuvring with propellors almost covered and trim limited to 15 ft. for Ras Tanura terminal and 8 ft. for Juaymah terminal stop Imperative all ships operating under early departure procedure copy Aramco HZY traffic list after departure until cargo quantities are resolved and Agent is authorised to approve documents.

ARAMCO

50 Word Message

Master Rastanuraradio/HZY

Please advice any epidemic diseases or illness on-board and status of crews international certificates of immunisation and all ports called past thirty days also destination stop Agent stop Flag stop Net registered tonnage stop Vessel will not be allowed to berth until this information is received.

ARAMCO

It is important that the Master send a reply to the above two messages soonest after receipt.

Traffic list transmitting times and frequencies of HZY are as follows:

Transmits on 12811.3 kHz on even-hours GMT from 0600 to 1400 GMT, and on 8480 kHz on even-hours GMT from 1600 to 0400 GMT.

Listens on 12 mHz common Channels 5 and 6 or 8 mHz common Channels 5 and 6 after traffic list transmissions, until all calls have been cleared. HZY then maintains watch on 12 or 8 mHz common Channel 5 until the next scheduled traffic list.

Transmits on 16960 kHz at 1000 GMT and picks up calls in the 16 mHz band until all traffic is cleared.

Transmits on 430 kHz on all odd-hours GMT after call-up is made on 500 kHz. An alternate working frequency of 521 kHz may also be used during busy periods.

Ras Tanura local time is GMT plus 3 hours.

Weather advice, port closure information, hydrographic notices and traffic lists are "dualled" on 430 kHz and 8480 kHz at 0430 GMT and at 1630 GMT. It is requested that all vessels forward their local weather observations to this station, either in code or plain language, to assist in preparation of the Arabian Gulf forecasts.

There is no charge for incoming traffic or for weather observations from vessels.

Messages to ship's Agents are handled by HZY, free of charge, However, the shipping Agents are not permitted to use HZY for outgoing traffic. Address the message to Aramco and indicate the Agent's name as the first word of the text.

There is an aircraft radio beacon, call sign RT, which transmits on 335 kHz and is located at:

Latitude – 26° 37′ 36″ North Longitude – 50° 09′ 47″ East

To facilitate contacting a vessel after departure, it is important that vessels copy HZY traffic lists for several days after leaving Ras Tanura.

There is a Saudi Arabian wireless station located in Dammam; however, this station does not handle marine traffic.

Radio Silence at Piers: The main wireless and radar equipment of any ship must not be operated while the vessel is alongside the oil piers. Use of VHF while alongside the oil piers to contact the Aramco Terminal Planning Office, Pilots, or Agents is permitted.

VHF: VHF radiotelephone Channel 10 for radar advisory service, and Channels 14 and 16 are available for ship-to-shore communication at Ras Tanura. Channels 14 and 16 are monitored 24-hours-a-day in the Aramco Terminal Planning Office which is located in Dhahran, approximately 25 miles South of Ras Tanura. Harbour Pilots can be contacted on Channels 14 and 16. VHF equipped vessels should try to contact the Aramco Terminal Planning Office when they are within 100 mile range of the port and while at anchor. Use of VHF while alongside the oil piers to contact the Aramco Terminal Planning Office, Pilots, or Agents is permitted.

RADAR: *Radar Surveillance Advisory System:*

A Radar Surveillance Advisory System is available to provide informational assistance and to monitor the movements of all ships calling at the Port of Ras Tanura. All ships entering the Ras Tanura Traffic Separation Scheme shall contact the Ras Tanura Pilot Office on VHF Channel 16 and maintain continuous VHF watch on Channel 10 during their entire stay in the Ras Tanura Port and anchorage areas.

In addition to identifying, tracking and monitoring ship movements to and from the Ras Tanura and Ju'aymah Terminal areas, the following services may be provided to vessel's Masters:

(a) Advise upon channel and port conditions, congestion, weather, tides, navigational aides, etc.
(b) Advise upon the movement of other vessels, dangerous manoeuvring situations, and vessels violating port regulations.
(c) Advise upon port regulations pertaining to movement of deep draft departing vessels and priority of vessel movements. (It may be necessary for incoming vessels to reduce speed to permit safe passage of outgoing deep draft vessels.)
(d) Advise upon berthing and anchoring conditions.

The Radar Surveillance Advisory System has been established in order to increase the safety of ships navigating in the Ras Tanura and Ju'aymah areas. However, it is an information and advisory service only, and in no way assumes control of responsibility for ships navigating in the area.

TUGS: Aramco operates five 4,000 h.p. tugs, bollard pull capacity of 55 tons each, and one 6,000 h.p. tug with bollard pull capacity of 70 tons. Two pilot boats and 3 or 4 Pilots are on duty at all times.

Mooring and unmooring assistance is provided by these tugs, regularly stationed in the immediate vicinity of the piers. At present no charge is made for these tugs when employed in normal mooring and unmooring operations, but a charge is made for additional or unusual services. These tugs are fitted with fire-pumps and water/foam monitors to assist in fighting fires.

When the assistance of the tugs is provided, the Master and crews of the tugs shall, in the performance of such services as they render to the vessel, become and be deemed to be the Agents and servants of the owners and/or Charterers of the vessel assisted, and Aramco shall not be responsible and shall be held harmless from all liability whatsoever for any damage that may be done by the tugs or their crews while assisting the vessels, whether occasioned by any act or omission of the tug Master or crew or by any defect or inadequacy of the tug, machinery or gear.

BERTHING: Tankers calling at Ras Tanura are assigned berths based on various factors including, but not limited to, the following: nomination date, time of arrival, product to be loaded, vessel size, available berths and loaded draft.

Whenever possible, endeavours are made to berth vessels immediately upon arrival, and to this end the Master should establish early contact with station HZY and maintain VHF radio contact with the Aramco Terminal Planning Office on the frequencies listed. (See "Radio" and "VHF")

If there are no immediate berthing prospects, vessels will be directed to proceed to and anchor in the "Northern Holding Anchorage" and maintain radio contact with Station HZY or the Aramco Terminal Planning Office or the Ras Tanura Pilots' office by VHF radio.

If a berth is available, and the vessel's quarantine message and notice of arrival and readiness have been received by radio an Aramco Harbour Pilot will board the incoming vessel while it is underway. The point of boarding will be South of Buoys 17 and 18 and East of the Sea Island complex. The Harbour Pilot will direct the manoeuvring of the vessel to the assigned berth.

Gangways: All vessels are required to furnish their own gangway which should be made "ready" prior to berthing at the North or South Pier. At the Sea Islands, gangways are available at each berth.

Mooring Lines and Arrangements: Ships may use mooring lines other than wire, constructed of a substitute material, *provided* that the elongation of the substitute material does not exceed 3% at 55% breaking load. Nylon tails may be used provided these do not exceed 8 m. in length and have a breaking strength at least 25% greater than the minimum breaking load of the wire to which it is attached. The practice of using mixed moorings, however, is strongly discouraged by the Aramco Port Authority.

Effective *December 1st, 1981,* the following *minimum* requirements will be *mandatory* for all vessels permitted to use the Arabian American Oil Company's fixed berth loading facilities.

Ship Size	*Required*	*Recommended*
75 – 160 MDWT	8 Wire lines	12 Wire lines
161 – 250 MDWT	10 Wire lines	12 Wire lines
251 – 300 MDWT	12 Wire lines	14 Wire lines
301 – 350 MDWT	12 Wire lines	16 Wire lines
351 MDWT and above	14 Wire lines	16 Wire lines

The wire size, winch power and the winch braking power must, in all cases, be adequate for the size of the vessel. All lines must be properly reeled on to winch drums and the winch brakes should be set to hold to a minimum load of 60% of the minimum breaking load of the line.

For additional information, please refer to the manual:- "Guidelines and Recommendations for the Safe Mooring of Large Ships at Piers and Islands", as compiled by the Oil Companies International Marine Forum.

During periods of unsettled weather, arriving vessels fitted with sufficient wires are preferentially berthed whereas vessels equipped with synthetic lines or too few wire lines are held out in stream until the weather improves and it is safe to moor them. If a ship with synthetic lines is already moored and squall conditions arise, loading to that vessel will be stopped and the loading arms disconnected until weather conditions improve and it is judged safe to resume the loading operation. The use of nylon or other highly elastic line is prohibited.

At the piers, vessels must be moored to the entire satisfaction of the Harbour Pilot. When, in the Harbour Pilot's judgement, additional mooring lines are required and are not available on the vessel, such lines will be furnished by Aramco on a loan basis. Vessels must be ready at all times to put out more lines as requested by the pier personnel, or as indicated by weather changes. All vessels moored at the piers must have deck winches in readiness for immediate use. All vessels moored with automatic tension winches shall set the manual brakes on these winches.

Loading Arm Hook-up: Pier crews are on duty continuously to handle oil hoses/arms and mooring lines. Mooring lines on board vessels will not be handled by Aramco personnel.

All loading connections are equipped with electrical insulating flanges. Therefore ship to shore bonding cables are not required.

OIL LOADING PIERS AND SEA ISLANDS: There are 2 "T" head piers that accommodate oil tankers. These piers project from the Eastern face of the Ras Tanura peninsula and are commonly referred to as the South Pier and the North Pier.

South Pier: The South Pier is connected to the peninsula by a causeway and trestle, 2,300 ft. in length. This pier has 4 berths and is 1,200 ft. long and 105 ft. wide.

Depths at the South Pier are as follows:

Berth 1	33 ft. at ISLW
Berth 2	32 ft. at ISLW
Berth 3	32 ft. at ISLW
Berth 4	30 ft. at ISLW

North Pier: The North Pier is located about 0.75 miles to the North of the South Pier, and has a causeway and trestle that extends some 3,600 ft. from the peninsula. This pier is 2,645 ft. long and 110 ft. wide, and comprises 6 berths.

Depths at the North Pier are as follows:

Berth 6	45 ft. at ISLW
Berth 7	38 ft. at ISLW
Berth 8	49 ft. at ISLW
Berth 9	45 ft. at ISLW
Berth 10	49 ft. at ISLW
Berth 11	45 ft. at ISLW

Sea Islands: A complex of 4 sea islands interconnected by walkways is located approximately 5,600 ft. N.E. of the North Pier. Each of the 4 sea islands consists of 2 berths with a loading station on the platform and water depth at each berth is 85 ft. at ISLW.

Each of Sea Islands 1, 2 and 3 consists of 2 berths, 4 mooring dolphins, and a platform with a loading station and 4 bresting dolphins per berth. Sea Island 4 consist of 2 berths, 6 mooring dolphins, and a platform with a loading station and 2 breasting dolphins per berth. The length of the berths between outer mooring dolphins at Sea Island 1 (Berths 12 and 14) is 1,250 ft., at Sea Island 2 (Berths 15 and 16) and Sea Island 3 (Berths 17 and 18) is 1,400 ft. and at Sea Island 4 (Berths 19 and 20) is 1,750 ft.

The sea island loading facilities are serviced by 8 submarine loading lines which have a combined maximum rated capacity of 668,000 b.p.h. 1 bunker fuel oil line with a rated capacity of 12,000 b.p.h. and 1 black diesel bunker oil line with a rated capacity of 900 b.p.h.

The loading stations at each of the sea island berths are equipped with steel, hydraulically-operated loading arms as follows:

		Crude Arms		*Bunker Arms*	
Sea Island	*Berths*	*No.*	*Size*	*No.*	*Size*
1	12 & 14	3	16 in.	1	10 in.
2	15 & 16	4	16 in.	2	10 in.
3	17 & 18	4	16 in.	2	10 in.
4	19 & 20	4	24 in.	2	16 in.

All sea island berths are equipped with quick release hooks.

Vessel traffic in the vicinity of the sea island must pass to the East of the sea islands.

Refrigerated LPG Loading: Facilities for loading refrigerated LPG are located at the North Pier, Berths 6, 8 and 10. These facilities are not designed for loading pressurised cargoes and no LPG will be loaded onto a tanker which does not have adequate shipboard refrigeration capacity and chilled tanks. Ships arriving for refrigerated LPG cargo must have their tank bottoms cooled to minus 38°F. maximum for A-140 Propane loading, and plus 32°F. maximum for A-160 Butane loading. Tank top temperatures must be within 20° – 25°F. Of the bottom temperature and pressure must not exceed 1.0 p.s.i.g. Appendix V (which see), entitled "Special Regulations for Loading Refrigerated LPG (RLPG) at Ras Tanura", provides detailed information on requirements and procedures for loading LPG at Ras Tanura.

LPG is loaded through 12 in. loading arms at a maximum rate of 30,000 b.p.h. for Butane and 30,000 b.p.h. for Propane.

Safe Loading Depths: The diurnal tidal rise is approximately 8 ft. at Spring and 5 ft. at neaps. If at any time a ship's draft approaches to within about 3 ft. of the depth of water at the berth, loading will be suspended until an incoming tide increases the depth to permit resumption of loading and provide for safe draft of the fully loaded ship on departure.

The deep water departure channel has a clear swept depth of 69 ft. at ISLW.

A minimum 5 ft keel clearance on all vessels shall be kept when transitting this channel. This is an exercise of prudent judgement and seamanship that minimises the probabilities of groundings.

Loading Rates: The following table shows the products available at each berth and nominal loading rates:

Cargo	*Available at Berths*	*Barrels per Hour*
Crude Oil	12, 14, 15, 16, 17, 18, 19, 20	40,000 to 280,000
Crude Oil	6, 7, 8, 9, 10, 11	15,000 to 90,000
Crude Oil	1, 2, 3, 4	12,000
Fuel Oil	6, 7, 8, 9, 10, 11	12,000 to 22,000
Fuel Oil	1, 2, 3, 4	12,000 to 22,000
Black Diesel	1, 2, 3, 4	5,000
White Diesel	8, 9, 10	12,000
White Diesel	1, 2, 3, 4	8,500 to 15,000
Gasoline	1, 2, 3, 4	6,000
Kerosene (See Note)	1, 2, 3, 4, 8, 9, 10	6,500
Jet Fuel (See Note)	1, 2, 3, 4	10,000
Bunker Fuel Oil	1, 2, 3, 4	5,000
Bunker Fuel Oil	6, 7, 8, 9, 10, 11	5,000
Bunker Fuel Oil	12, 14, 15, 16, 17, 18, 19, 20	12,000
Bunker Diesel	1, 2, 3, 4	1,400
Bunker Diesel	6, 7, 8, 9, 10, 11	1,200
Bunker Diesel	12, 14, 15, 16, 17, 18, 19, 20	900
Refrigerated LPG	6, 8, 10	8,000 to 30,000
Naphtha	6, 7, 8, 9, 10	30,000

Note: See "Safety" — Precautions against static ignition.

Products can be loaded simultaneously at the respective berths if shown above as being available.

It is expected that most ships will be able to receive any cargo, except crude oil, as fast as it can be delivered. Officers in charge of loading must have due regard for all safety precautions as well as for individual ship hazards. If loading of crude oil or products is too slow, Aramco will so advise the vessel. Should a demurrage claim be filed against Aramco the slow loading may result in an addition to allowed lay time.

To prevent ignitions by static electricity the loading rates for kerosene, jet fuel and similar white products will be reduced.

Manifold Loading Connections: Cargo loading arms at the North Pier have 12 in. and 16 in. standard 150 lbs. ANSI raised face flanges.

The refrigerated LPG loading arms at North Pier Berths 6, 8 and 10 have 8 in. and 12 in. standard 150 lb. ANSI raised face flanges.

Cargo loading arms at the Sea Islands have 16 in. and 24 in. standard 150 lb. ANSI flanges.

Cargo loading hoses at the South Pier have 8 in. standard 150 lb. ANSI raised face flanges.

All vessels calling at Ras Tanura terminal should be equipped with reducing spools to fit these loading connections. These fittings should be in place prior to berthing to help expedite ship turnaround time.

Responsibility: All operations in connection with the starting of loading, discharging, switching of tanks and topping off must be directly and personally supervised by the ship's officer.

Upon completion of loading, the vessel will normally be required to leave the berth immediately after disconnecting hoses/arms to await clearance in the Tanker anchorage.

It is the responsibility of the vessel to advise the pier operators to shut down bunker delivery when the requirements of the vessel have been filled.

Emergency Procedures: The course of action to be followed by Aramco terminal personnel in the event of a fire or explosion on board a vessel while berthed alongside at this terminal will be dictated by the particular facts and circumstances of the incident. Although it is impossible to indicate exactly what practices will be applied during an emergency before an evaluation of the specific situation can be made by the responsible Terminal representative, his decisions will be based on the following principles:

(1) An evaluation of the particular emergency will be made by the responsible terminal representative to determine the course of action to be taken. His decision as to the course of action will take into account the location, type and extent of fire or explosion, the berth location and proximity of other vessels, and the tidal and wind conditions.

(2) A burning vessel will not be permitted to remain alongside the berth. Where possible, the fire will be fought with available berth fire-fighting facilities until the arrival of tugs. After hook-up of the tugs to the vessel's fire wires, if the fire is not controllable or extinguished, the vessel will be released or cut free and removed from berth under controlled conditions.

(3) Where communication facilities permit, the Master or responsible ship's officer, will be advised prior to releasing or cutting free a vessel from the berth. The Master should designate a responsible senior ship's officer with whom the senior terminal representative present can communicate in case of a fire or explosion aboard the vessel. Where possible, this officer will be advised of the actions to be taken in releasing or cutting the vessel free from the jetty.

(4) Although a vessel may have no power it may be released or cut free from the berth prior to arrival of the tugs and hook up to the vessel's fire wires, if in the opinion of the senior terminal representative present it is a greater hazard at the berth than drifting free. Normally, however, a burning vessel will be removed by tug boats under controlled conditions.

Note: The above mentioned Principles are intended to provide the guidelines of action to protect personnel and facilities, and other vessels at the Aramco loading piers.

EARLY DEPARTURE PROCEDURE: To permit more rapid ship turnaround an *Early Departure Procedure* is available. This service provides for a quick departure of the vessel after loading, without the necessity of waiting for delivery of documents at anchorage. This special service should be requested and arranged for with the Agent at the ship's earliest opportunity.

When the vessel is ready to leave the port, a Ministry of Health permit and required port clearance documents will be given to the Master by the ship's Agent.

BALLAST: Vessels should arrive at Ras Tanura with minimum clean ballast to enable manoeuvring under prevailing weather conditions.

Masters are encouraged to take advantage of the favourable weather which prevails much of the time, particularly during the Summer and fall months, to minimise ballast in order to reduce vessel turnaround time. Masters should maintain radio contact with HZY or ship-to-shore communication by voice radio in order to obtain latest weather information and advice on appropriate ballast.

Aramco is particularly interested in having vessels complete the deballasting operation promptly after berthing in order to minimise time at berth. Simultaneous loading and deballasting is encouraged on properly equipped vessels. Owners/operators or charterers of vessels requiring time to deballast in excess of what Aramco considers standard will be so notified by letter with a copy to the Master.

POLLUTION: Discharge into the sea of oil or oil base products either alone or in combination with ballast water is not allowed. Since the terminal does not have facilities to receive any significant amount of oil residues or oily ballast water, tankers arriving alongside with such materials on board will be sent to anchorage to await further orders unless the vessel has prior clearance to load on top of such material or unless the ship's Master agrees to segregate such materials in a separate tank. Ships which release oil or oil residues including oily ballast water in either berth or anchorage area will be held responsible for all clean-up costs. The ship's Master shall be expected to acknowledge by his signature receipt of a Pollution Letter of Protest, informing him that a pollution incident attributable to his ship has occurred and that clean-up cost will be billed to the ship Owners.

All incidents of oil discharge into the sea are investigated and documented and these reports are provided to th Saudi Arabian Government officials in accordance with their requirements.

MEDICAL: No medical services are available at the Ras Tanura or Ju'aymah terminals. Requirements for medical assistance or hospital service must be addressed to the ship's Agent.

When necessary, the Master may obtain medical attention for the ship's personnel from the port doctor (quarantine officer), who may, in the case of serious illness or injury, recommend treatment at the Dammam Government Hospital, government or private clinics in Rahima, or the Ash-Sharq Hospital in Al-Khobar. The port doctor ordinarily will treat minor illnesses or injuries on board ship. A charge is made for medical attention or supplies furnished by the port doctor or other private sources.

The medical facilities of Aramco are made available in emergencies only when referral is warranted medically. A charge is made for medical attention or supplies furnished by the Company. The Aramco radio station, HZY, may be used without charge by vessels at sea to obtain medical advice at any time.

FRESH WATER: Both natural well water and drinking water are available but *only* at the North and South Piers, Berths 1 to 11.

Natural well water is quite brackish and is used mainly for washing. Well water can be supplied at a rate of 50 t.p.h., up to a limit of 100 tons and at a cost of approximately U.S. $1.20 per ton.

The drinking water is treated by a membrane process and meets all the requirements of the U.S. Health Standards. However, due to the significant amounts of calcium, magnesium, carbonates, sulphates and silica, it is *not recommended* as feed to marine boilers. Drinking water is available at a rate of 20 t.p.h., up to a limit of 25 tons per vessel, at a cost of approximately U.S. $12.00 per ton.

FUEL: Bunkering facilities are operated by Aramco, and fuel bunkers are available at all berths at the Ras Tanura Terminal and Ju'aymah Terminal. Vessels are expected to provide adequate advance notice of bunker requirements in order to avoid possible delays.

Vessels taking only bunkers are urged to call at Ras Tanura *prior* to loading cargo elsewhere to avoid delays caused by draft and berth assignment problems.

Masters employing the services of the various bunkering services from the port of Dammam are not permitted to bunker their vessels within the operating area of the port of Ras Tanura.

Lubricating Oils: Lubricating oils are available in limited drum quantities if ordered in advance through the ship's Agent.

BUNKERING SERVICE PROCEDURES: Off Dammam – Ras Tanura.

Offshore suppliers can make deliveries at Dammam anchorage and South of Ras Tanura, off Aramco area, if nomination has been received at least 3 days in advance.

The supply tankers will not go alongside before the vessel is cleared.

All vessels approaching Ras Tanura/Dammam should contact Ras Tanura Port Radar on Channel 16.

A. Freighters with less than 35 ft. draft.

1. Vessels should receive the supply tanker at Dammam anchorage, after entering the channel S.E. of Ras Tanura.
2. Vessels to be cleared through Agent in Dammam.
3. Masters to give 5, 2 and 1 day's firm ETA to Dammam Port Authority, with copy to Agent in Dammam, mentioning vessels' call for bunker purposes only.
4. Upon arrival, Masters to contact port control/supplier and Agent in Dammam on VHF Channel 16.

B. Freighters, with more than 35 ft. draft.

1. Vessels should receive the supply tanker in an area enclosed by a line connecting following positions:

From	Lat. 26° 34.1′ North	Long. 50° 11.6′ East	(Buoy No. 1)
To	Lat. 26° 37.3′ North	Long. 50° 10.6′ East	(Buoy Fl. 5 sec.)
To	Lat. 26° 37.3′ North	Long. 50° 16.2′ East	(Buoy RTE 7)
To	Lat. 26° 36.6′ North	Long. 50° 15.8′ East	(Buoy RTE 8)
To	Lat. 26° 34.1′ North	Long. 50° 11.6′ East	(Buoy No. 1)

2. Follow procedures in A2-4 as above.

C. Tankers.

1. Vessels should be bunkered before loading.
2. Supply tanker should be received in area B1, or as advised by Ras Tanura port radar.
3. Vessels to be cleared through Agent in Ras Tanura.
4. Masters to give 72, 48 and 24 hours ETA cable to Aramco, Ras Tanura, "HZY" advising name of supplier, Agent and required quantities. Vessels loading after bunker supply should advise Aramco about the same.
5. Masters to cable Agent via Bahrain Radio "A9M" stating for Ras Tanura, ETA and requirements.
6. Vessels must on approach contact Aramco's Ras Tanura "Radar Surveillance Advisory System" by VHF Channel 10 or 16 for guidance.
7. Contact should, on arrival, be established on VHF Channel with Agent, Ras Tanura and/or supplier, Dammam.
8. Masters not following Aramco safety navigation rules, for example entering Ras Tanura Port/anchorage area without permission, will not be allowed to enter Ras Tanura again.

The following is a copy of a telex received from a ship's Agent in December 1980.

Quote:

Re. Vessels calling Ras Tanura for bunker delivery ex bunker barge.:

We would like to take this opportunity to confirm the Local Clearance Regulations governing delivery of bunkers by bunker barge at Ras Tanura/Ju'aymah/North Holding Anchorage stop

aaa) The receiving vessel must have appointed a recognised port Agent.

bbb) The receiving vessel must be cleared by the Authorities before the bunker barge is permitted alongside to deliver bunkers stop The usual inward clearance formalities are implemented by the Authorities stop

ccc) On completion of bunkering the receiving vessel is not (repeat) is not permitted to sail until a valid port clearance has been delivered by the Agent stop

Please note failure to comply with the regulations can result in heavy penalties being imposed on the receiving vessel and/or vessel's master and the bunker company concerned stop

We request that you advise all masters/vessels of the above regulations to avoid any possible infringement of them

Unquote.

Also see "Shipmasters Report" dated August 1979.

SURVEYORS: Independent oil inspection service is available at Ras Tanura by the following agencies:

(a) B & R Redwood, Orchard Sea, Winkfield, Nr. Windsor, Berks., England.
(b) Caleb-Brett, c/o Kanoo, Ras Tanura.
(c) E. W. Saybolt and Co., S.A., 400 Swenson Drive, Kenilworth, New Jersey 07033, U.S.A.

(d) G. Watson Grey, Harrisons Wharf, London Road, Purfleet, Essex, England.

The American Bureau of Shipping, Norske Veritas, and Lloyds of London maintain a marine surveyor at Manama on Bahrain Island.

REPAIRS: Relatively limited repair service is available from local business concerns. Aramco will assist in making emergency repairs on vessels only if approved by the Aramco Marine Department Manager and Port Captain. It is suggested that the Master discuss repair charges with the ship's Agent prior to authorizing or requesting any repair work.

TIME: Local time is based on the 45th meridian (3 hours East of Greenwich). In order to avoid any confusion, all communications references to time should be quoted in GMT.

AIRPORT: Ras Tanura terminal about 50 miles from Dhahran Airport. This airport is serviced by many international airlines.

REPATRIATION/SHORE LEAVE: All matters pertaining to crew changes, repatriation of crew personnel, or shore leave are to be arranged through the ship's Agent.

There is no Seamen's Recreation Centre at either terminal of the port of Ras Tanura.

SAFETY: *Tanker Loading Safety Regulations:* The port of Ras Tanura maintains a vigorous tanker loading safety programme. Aramco is a member of the Oil Companies International Marine Forum (O.C.I.M.F.) and as such follows the procedures and safety practices recommended by this International organization.

As is done in other Arabian Gulf ports, each ship's Master is presented with a form entitled "Declaration by Master" which lists the Aramco Safety Regulations. After a detailed review of each safety item with the pier safety representative, the Master must sign this form. Prior to start of loading and later at several times during the loading, the pier safety representative accompanied by one of the ship's officers will visit the vessel and check to ensure that safe loading practices are being observed by both the ship and the shore crews.

The following list of safety items contains the safety regulations and requirements of the port of Ras Tanura:

Smoking Regulations: No Smoking will be allowed on board while the vessel is at the berth except in places in the accommodation aft, which have been jointly approved in writing by the Master and the Representative of the terminal superintendent.

Galley Fires: No galley fires will be used unless permission has been obtained in writing, from a representative of the terminal superintendent.

Naked Lights: Only vapour-proof/explosion-proof electric lights will be used on deck during the loading.

Electric Cables: Portable electrical equipment on deck will be disconnected.

Radio/Radar Transmitters: Radar and radio transmitting aerials will be switched off and grounded. If servicing of radar and radio units is required when at berth concurrence of the terminal representative will be obtained.

Hand Torches: Hand torches will be of an approved type certified to be safe in hazardous locations.

Portable Radio Transceivers: Portable radio transceivers will not be permitted on deck while loading without a certificate from a recognised authority certifying that the radio is intrinsically safe.

Doors and Ports Amidship Accommodation: All external doors and ports in the amidships accommodation will be kept closed during loading and every effort will be made to prevent entry of gas into this accommodation.

Doors and Ports After Accommodation:

(a) All doors, ports and openings in the aft accommodation that overlook the cargo loading deck will be kept closed.

(b) Portholes and doors downwind of loading deck which might take in gas will be closed. If requested by terminal representative such other action as is necessary will be taken to ensure that no hydrocarbon vapour shall enter a normally non-hazardous area of the vessel where ignition sources could exist.

Ventilators: Ventilators will be kept suitably trimmed at all times with regard to tank vents and prevailing wind conditions to prevent entry of flammable vapours.

Central Air Conditioning Intakes: Any central air-conditioning or fresh air intakes which might take in gas will be closed. All intakes within a combined total of 100 ft. vertically and horizontally of cargo tank openings and/or venting points will be closed.

Window Type Air Conditioning Units: All window type air conditioning units will be kept disconnected when loading low flash oils.

Mooring Lines: Mooring lines must be tended to keep vessel in position and lines taut at all times. Tension winches will be on manual brake.

Cargo/Bunker Hoses: The Master will inspect and ensure to his satisfaction that cargo loading hoses or arms are in good condition.

Loading Connections: The Master will ensure that the oil loading line connections between the shore and ship will be inspected and will be made to his satisfaction.

Unused Cargo Connections: Unused cargo and bunker connections will be blanked and fully bolted.

Stern Discharge Line: The stern discharge line, if any, will be blanked and fully bolted, forward of the after accommodation if possible.

Sea Valves: All ship's sea and overboard discharge valves will be blank flanged or sealed closed.

Scuppers: Scuppers will be plugged and cemented, and plugs will not be removed until loading is completed.

Ship/Shore: A responsible member of the crew will be stationed on the loading deck and will maintain communications or remain in visual contact with the shore operator during loading. He will advise the operator when changes in loading rates are required. VHF radios are placed aboard ship at the loading manifold at North Pier and Sea Island berths.

Cargo Tank Lids:

(a) Before berthing all tank tops, ullage plugs, and sighting ports will be closed and dogged down unless vessel is certified by the Master to be gas-free and all ballast is clean.

(b) Cargo and bunker tank lids will be kept closed but not dogged down throughout the period of loading. This also applies to permanent ballast tanks.

Gas Venting:

(a) Agreement on Method of Venting: Unless specified otherwise on the "Agreement on Method of Venting" signed jointly by the Master and the Representative of the terminal superintendent, all ullage or sighting ports will be kept completely closed (not secured) throughout the loading except for intermittent periods for the purpose of ullaging or sighting ship's tanks.

(b) Flame Arrestors:
Whether open or closed, all ullage ports will be protected by clean, well-fitted flame arrestors of wire gauze screens of an approved type with no defects.

Fire Fighting Equipment: Fire and emergency equipment will be kept in readiness at all times while at berth. Ship's fire hose will be uncoiled and laid out, one forward and one aft, unless fire monitors can be substituted for this requirement.

Emergency Towing: Towing wire (fire wires) for emergency use will be lowered to the water's edge from the offshore bow and quarter bitts and will be tended to keep the eye above the water's edge during loading.

Engines: Engines will be kept ready and vessel kept trimmed so it can leave the piers under short notice.

Ballast: The water ballast which is to be discharged must be clean ballast as defined by current IMCO conventions, free from oil and other hydrocarbons which might pollute the local water of this port.

Gas Freeing: No gas freeing or tank washing will be done at berth.

Restrictions on Tankership Shut-off: Many new tankers are equipped with motor operated valves, some of which are operated from a central location. It is imperative that these devices never be operated to close off against full crude oil delivery rates unless the valve closure action takes at least 60 seconds. Closure times less than 60 seconds may result in surge and hammer of sufficient force to rupture the loading arm. This restriction does not apply to normal topping operations at reduced rates.

Gangways: Gangways will be tended and kept safely rigged as loading progresses.

Repairs: No repair or maintenance work of any kind involving the risk of sparks or other means of ignition shall be undertaken while at berth without written permission from a representative of the terminal superintendent.

Boiler Tube Cleaning: Boiler tubes must not be cleaned while the vessel is at berth, and every precaution must be taken so that sparks do not escape from the funnel.

Emergency Signal: In the event of fire or other emergency, the ship will sound a series of 10 short blasts on the vessel's whistle.

Suspension of Loading: Aramco's terminal personnel are authorized to suspend oil handling operations in the event any of the foregoing safety rules are not observed, or if any other danger is believed to exist, by Aramco personnel supervising loading operations. Tankers are expected to follow all safety regulations generally accepted and practised in the marine transport industry.

The Master has the right to shut down loading in the event that he feels shore operations are unsafe provided adequate advance notice is given to pier personnel.

Precautions against Static Ignition: Tanks must be gas-free within 0.4 of the lower flammable limit before loading kerosene, kerosene-type jet fuel, and white diesel. Crude oil and all other products except RLPG may be loaded into tanks which are either gas-free or non-gas-free. Ships' tanks and lines must be free of water. Splash filling is prohibited. Loading rates for kerosene and kerosene-type jet fuel will be reduced as follows:

(a) Loading is commenced at a rate not to exceed 1,000 bbls.p.h. per cargo tank, until the liquid in each tank has reached a level of 20 ft.

(b) Above the liquid level of 20 ft., the loading rate is limited to 1,500 bbbls.p.h. per cargo tank, maximum.

No ullage gauges, temperature readings or samples shall be taken until at least 30 minutes after loading has been stopped to that tank to allow static charges to dissipate. No loose floating objects are permitted in tanks to be loaded. Automatic tank gauges and non-conductive ullage sticks may be used at any time.

Under certain conditions, the above restrictions will also apply to loading of heavy naphtha and gasoline-type jet fuel (JP-4).

Hydrogen Sulphide Hazards: Aramco crudes may contain dissolved hydrogen sulphide (H_2S) in concentrations which would cause the gases vented during tanker loading to be hazardous if inhaled. We recommend that Masters review the instructions issued by the Owners/charterers about hydrogen sulphide hazards. If the loading of H_2S bearing crude oil is not covered by such instructions, Aramco has available, upon request, a list of recommendations to aid the Masters.

Action in Case of Oil Spills: In the event of an oil spill the vessel will notify the terminal operator on duty at the berth.

Penalty for Failure to Comply: Disregard of, or failure to fully comply with any of the Safety Regulations will result in stopping all loading operations and the vessel being ordered off the berth for appropriate action to be taken by the charterers and owners concerned.

APPENDICES:

Appendix III

Arabian American Oil Company
INSTRUCTIONS TO VESSELS AND CONDITIONS OF USE OF PORT
Ras Tanura, Saudi Arabia

Date:................ Time:..................GMT

THE MASTER S/S – M/V

Please have your vessel ready for berthing by Aramco Harbour Pilot at .... hours Greenwich Mean Time...............(Date).

1. Vessel will be moored to Berth No. ...... North/South Pier/Sea Island Port/Starboard side to the Wharf as shown on attached diagram.

2. The berth is presently occupied/unoccupied.
3. If a delay occurs, please maintain an alert watch and keep vessel in readiness to move as quickly as Pilot comes aboard.
4. Local Time is GMT plus ....hours.
5. Low Water will be at approximately .... Hours GMT and will be approximately ....feet above ISLW as indicated in U.S. Coast & Geodetic Tide Tables.
6. To avoid delay, please maintain minimum ballast for safe manoeuvring in prevailing weather.
7. Ballast water being discharged while in port MUST BE FREE OF OIL.
8. Immediately following completion of berthing and granting of pratique, an Aramco inspector will board your vessel with Form Aramco 3032-1 Declaration by Master and physically inspect the vessel for conformity to safety requirements and check off certain items required.

MOORING AND MANOEUVRING

1. Full Power must be available for manoeuvring to and from wharves.
2. An Aramco Pilot will pilot vessel to berth assigned.
3. All manoeuvring in vicinity of, or at piers, will be under supervision of an Aramco Pilot.
4. Aramco tugs will assist in mooring and unmooring.
5. All tank tops, ullage plugs and sighting ports will be closed before berthing.
6. Vessel's Master must notify the Pilot of any special conditions, difficulties or peculiarities such as defective equipment, lines or gear which might impose special hazards in connection with handling, mooring or loading of vessels.
7. Steering gear, engine room telegraph, whistle and all navigational equipment must be tested before any manoeuvring to or from piers is started.
8. Pilot will decline to moor vessel with unsatisfactory equipment, lines, gear, etc.
9. Aramco will loan additional mooring lines if Pilot deems them necessary.
10. Vessels must be moored to entire satisfaction of Pilot.
11. Vessels must be ready to put out more lines as required by weather changes or at request of Pilot or oil loading personnel.
12. Winches must be ready at all times for immediate use.
13. Except in emergency, no mooring lines will be let go without permission of the Pilot.
14. While alongside wharves, maintain engines and propulsive machinery ready at all times to leave wharf on short notice under full power.
15. No repairs are permitted that will delay or interfere with this manoeuvring.
16. Non-compliance with 13 and 14 constitutes a serious safety hazard. Any towage and delay resulting from non-compliance will be for vessel's account.
17. If fire or other grave emergency occurs or danger appears imminent on either the vessel or pier, do not await arrival of Pilot — immediately let go mooring lines and personally remove vessel from pier in such manner as to best avoid damage to pier of other vessels.
18. Upon completion of loading and/or bunkering and immediately after disconnection of hoses, vessel must leave berth and await clearance in stream.

SAUDI ARABIAN GOVERNMENT PORT REGULATIONS

1. Quarantine signals must be displayed upon entering the coastal waters of Saudi Arabia and approaching Ras Tanura, in accordance with international practice, and shall be continuously displayed until pratique is granted. These signals shall be as follows:
    Sunrise to Sunset — Quarantine Flag.
    Sunset to Sunrise — Quarantine Signal Lights (Red over White)
2. The Saudi Arabian flag must be flown from the foremast while your vessel is in the coastal waters of Saudi Arabia. Such flags are available for loan and may be obtained from the vessel's Agent.
3. Importation of liquor or contraband items, or trafficking in such items between vessels, is absolutely prohibited.
4. Ship's personnel are *NOT* permitted ashore nor on the wharves *FOR ANY PURPOSE WHATSOEVER* (this includes the reading of the ship's draft) until pratique is granted and then are allowed on the wharves only if actually engaged in duties in connection with operations of discharging ballast, or loading.
5. All shore leave is contingent upon compliance with Saudi Arabian Quarantine and Passport Regulations. For current details concerning these regulations and shore leave restrictions, ship's Agents must be consulted. Failure to comply with 4 and 5 may result in severe penalties.

CONDITIONS OF USE OF PORT

1. The Master of the vessel shall remain solely responsible for the safety and the proper operation of the vessel at all times. Neither Aramco nor its personnel shall be responsible for any loss or damage arising in consequence of any assistance, instructions or advice given or tendered in respect of the vessel.
2. The use of Aramco premises, facilities and equipment is subject to the express understanding and condition that Aramco and its personnel shall be held harmless from all liability, loss or claim thereof arising out of such use.
3. All vessels transiting the "DEEP WATER DEPARTURE CHANNEL" must maintain a minimum 5 ft. keel clearance.
4. The Harbour Pilot is supplied upon the condition that when boarding or assisting the vessel he becomes the Agent and servant of the Owner and/or Charterers of the vessel in every respect. Aramco shall not be responsible and shall be held harmless from all liability for any damage resulting from or caused by any action taken, order given, or decision made (or any omission thereof) by the Harbour Pilot or in respect to his handling of such vessel.
5. When the assistance of tugs is provided, the Master and crews of the tugs shall, in the performance of such services as they render to the vessel, become and be deemed to be the Agents and servants of the Owners and/or Charterers of the vessel assisted, and Aramco shall not be responsible and shall be held harmless from all liability for any damage that may be done by the tugs or their crews while assisting the vessel, whether occasioned by any act or omission of the tug Master or crew or by any defect or inadequacy of the tug, its machinery or gear.
6. Pilots will not moor any vessel to Aramco wharves unless they have the Masters signature on acknowledgment below.

MASTER'S ACKNOWLEDGMENT

I hereby acknowledge receipt of a copy of this document and agree to the instructions and conditions set forth therein.

Hour Vessel

Appendix V

SPECIAL REGULATIONS FOR LOADING REFRIGERATED LPG (RLPG) AT RAS TANURA

MASTER

Refrigerated LPG is loaded at Ras Tanura (North Pier) berths Nos. 6, 8 and 10. The water depth at ISLW in all 3 berths is 46, 49 and 49 ft. respectively.

RLPG is loaded via 12 in LPG loading arms. The maximum loading rate for butane is 30,000 b.p.h.; and for propane 30,000 b.p.h. Each berth is equipped with 4 LPG loading arms which may be used for butane liquid, propane liquid or vapour return. The LPG loading arms at berth No. 10 are fitted with Quick Connect/Disconnect Couplers (QCDC). Each LPG loading line has an associated pier circulation and vapour return line. Loading lines must be on circulation at least 4 hours prior to LPG ship start up. No 2 ships are loaded from 1 loading line simultaneously. Vapour line *must* be connected to the vessel before loading commences. This also includes those loading coolant.

Butane and propane may be sub-cooled at Plant 59 by means of Freon-Chillers.

The following specific regulations will be followed for every LPG vessel loading at North Pier:

1. Prior to starting any RLPG cargo loading, the NGL Shift Coordinator shall confer with the vessel's Master and/or Responsible Loading Officer to determine the following:
    1.1 Quantity and type of product in each ship tank and whether it is part cargo or residue required for cooling.
    1.2 Temperatures and pressure of each ship tank.
    1.3 Product to be loaded in each ship tank.
    1.4 Residue in the ship tanks will be measured by the Independent Inspector assigned to the ship and witnessed by an Aramco Inspector or NGL shift co-ordinator.
2. Facilities at Ras Tanura *are not* designed for loading pressure LPG and *no* LPG will be loaded into ships' tanks that are not equipped with refrigeration facilities and are not adequately chilled.
    2.1 Ship tank bottoms must be cooled to minus 38° F. maximum for A-140 propane loading and plus 32° F. maximum for A-160 butane loading. Top temperatures should be within 20-25° F. of the bottom temperature.
    2.2 Tank pressure is not to exceed 1.0 p.s.i.g. or 0.07 kg/cm^2.
3. Butane may be loaded into ship tanks containing butane residues up to 10% of the cargo to be loaded.
4. Propane may be loaded into ship tanks containing propane residues up to 10% of the cargo to be loaded.
5. Propane may be loaded into ship tanks containing part cargo of the same grade only by authorization of the off-taker. This authorization shall be obtained through Manufacturing and Oil Supply Department of Aramco Services Company. Quantities of over 10% of the cargo to be loaded shall be considered part cargo.
    5.1 Part cargo on board at the time of the ship arrival must be measured by the Independent Inspector and witnessed by an Aramco Inspector or NGL Shift Co-ordinator regardless of whether Aramco cargo is to be loaded on top or not.
    5.2 To confirm that the part cargo is the same as A-140 propane or A-160 butane, the ship's propane part cargo must be (−38°F) maximum and the ship's butane part cargo must be (+32°F) maximum.
6. Should the vessel be unable to comply with the provisions of paragraphs 3 and 4, Aramco operations and engineering management representatives shall confer with the vessel's Master and/or Responsible Loading Officer to develop a loading plan/procedure for the safest possible loading for the tanks containing dissimilar residue. The plan shall be in writing, agreed to by both parties and take into consideration loading rates, temperatures, pressures and all possible safeguards to ensure minimizing the dangers to ship and shore installations. It must be understood that this procedure will involve delays to the vessel and will impose additional workloads on both shore and ship personnel.
7. *In no case will loading be permitted into ship tanks containing liquid product of a different grade in excess of 10 tons.*
8. When a vessel requires special handling, as described above, the vessel shall be given a letter of protest, with copies to owners and operators. The letter shall state that the vessel has been handled on a *one-time only basis* and advise that upon its next arrival at Ras Tanura it will have disposed of any residual cargo or have a nomination which will preclude loading dissimilar products.
9. RLPG vessels with warm cargo tanks are not normally handled at Ras Tanura. When special circumstances warrant, new ships and

other vessels with warm tanks may be accommodated under the following conditions.

10. Ship tanks must be inerted. A sample must be taken by Aramco personnel from each of the vessel tanks to ensure that it has been properly inerted. Test must indicate a reading of 7.5% oxygen or lower taken by Orsat analysis or J-W oxygen indicator.

10.1 Vapour returned during chilling operations will be sent to the shore flare system.

10.2 The loading rate during the chill down period will be kept low and may be reduced if deemed necessary to minimize the amount of vapour sent to the flare or otherwise lost.

10.3 The amount loaded for chilling purposes will be measured in the ship tanks by the Independent Inspector assigned and witnessed by an Aramco Inspector or NGL Shift Co-ordinator.

10.4 After cargo for chilling tanks has been loaded aboard, the ship must proceed to anchorage and complete chilling of the other ship tanks before returning to berth to load cargo. No transfer of coolant from one tank to another shall be carried out at Berth.

10.4.1 In case the cooling operation involves cooling of these additional tanks with an oxygen content (over 7.5%), the vessel must leave the port anchorage area.

10.5 Upon return to berth for continuation of RLPG cargo loading, all tanks which are to receive cargo will be ullaged by the Independent Inspector and witnessed by an Aramco Inspector of NGL Shift Co-ordinator.

11. During loading of refrigerated A–140 propane or A–160 butane, shipboard readings of loading compartment temperatures and pressure by grade of cargo loaded shall be witnessed several times routinely by the NGL Shift Co-ordinator to ensure that the ship stays within the safe loading limits for temperature and pressure for each grade listed in regulations 2.1 and 2.2.
12. At completion of loading, the designated Independent Inspector will measure all cargo tanks. These ullage measurements will be taken on all ship tanks regardless of whether cargo was loaded into these tanks at Ras Tanura.
13. Vessels with part cargo on board of products other than A-140 propane or A-160 butane must be equipped to keep any liquid or vapour from those cargo parcels completely self-contained. There must be neither any return of non-compatible vapour to shore recovery system nor any venting of such vapour to atmosphere whilst at berth. No mixing of dissimilar refrigerated liquids is allowed at berth.
14. Vessels loading either propane or butane are expected to use the appropriate shore vapour return line, but only for *excess* vapour which the vessel's vapour recovery equipment cannot handle. Should excessive vapour be returned to shore and the situation cannot be corrected promptly aboard ship, the loading shall be shut down. Loading shall be resumed only after the loading plan has been reviewed with the Master or Responsible Loading Officer by the NGL Shift Co-ordinator and corrective action has been agreed upon.
15. In the event of a spill of liquid propane or butane on board the vessel, shore loading shall be shut down until proper corrective action to clean up the spill and to avoid future recurrence has been agreed upon by the Master or Responsible Loading Officer with the NGL Shift Co-ordinator.
16. There are no facilities at Ras Tanura for the return of either liquified propane or liquid butane cargo. Vessels must pay *strict* attention not to overload either of these grades.

Appendix VI

PORT REGULATIONS

The following regulations and special notes are promulgated for the use of ship's Master entering and leaving Ras Tanura and Dammam ports:

Inbound Vessels:

1. Vessels fitted with the appropriate VHF radio equipment are requested to monitor Channel 16 when in the vicinity of Ras Tanura channel and anchorage area.
2. Vessels shall report time of passing Beacon No. 3 to Ras Tanura Pilot Station.
3. Vessels shall report time of passing Buoy No. 7 to Ras Tanura Pilot Station.
4. Vessels proceeding within the area bound by Channel Buoy No. 9 and the Southern extremity of Ras Tanura anchorage should limit speed to a maximum of 5 knots.
5. No overtaking is permitted in the Ras Tanura arrival channel after passing Buoy No. 9.
6. A minimum distance of 1 mile shall be maintained between vessels proceeding in the same direction after passing Buoy No. 9.
7. Vessels passing Buoy No. 17 must navigate with extreme caution and give way to vessels departing from the berths.
8. Freighters transmitting the Ras Tanura port area, bound for Dammam, should alter course Eastward after passing clear of Buoy No. 17 and keep to the Eastern sector of the tanker anchorage.
9. Under no circumstances shall inbound vessels navigate in the buoyed deep water departure channel.
10. Vessels bound for and departing from Dammam are to use the East Channel which is marked with 8 light buoys fitted with radar reflectors. This channel is limited to ships not exceeding 35 ft. in draft.

Outbound Vessels:

1. All vessels are to monitor Channel 16 when in the vicinity of Ras Tanura channel and anchorage area.
2. Vessels departing from Ras Tanura anchorage must advise Ras Tanura Pilot Office of their intentions 30 minutes before departing.
3. Freighters outbound from Dammam shall, when passing Dammam Channel Beacon No. 1, alert Ras Tanura Pilot Office of their estimated time of arrival at the Southern extremity of the tanker anchorage. Vessels bound for and departing from Dammam are to use the East Channel which is marked with 8 light buoys fitted with radar reflectors. This channel is limited to ships not exceeding 35 ft. in draft.
4. Vessels manoeuvring within the area bound by the Southern extremity of the Ras Tanura anchorage and the entrance to the departure channel (Buoy 17 and 18) should limit speed to a maximum of 5 knots.
5. Any departing vessel shall not overtake any vessel ahead until both vessels have passed clear of Buoy No. 5.
6. A minimum distance of 1 mile is to be maintained between vessels proceeding in the same direction until clear of Buoy No. 5.
7. Under no circumstances shall outbound vessels navigate in the arrival channel.

Special Notes:

1. *Separation Zone (Arriving Vessels)*
   - a. All arriving vessels must stay within the IMCO designated arrival lane.
   - b. From the approach buoy, or entry Buoy No. 4, the width of separation zone is 0.75 mile.
   - c. From Buoy No. 4 to Buoy No. 5, the separation zone is 0.5 mile.
   - d. From Buoy No. 5 to Buoy No. 7, the separation zone decreases to nil.
   - e. From Buoy No. 7 to Buoy No. 17, all arriving vessels must keep to the West of Buoys Nos. 7, 9, 11, 13, 15 and 17.
2. *Separation Zone (Departing Vessels)*
   - a. All departing vessels must stay within the IMCO designated departure lane.
   - b. From Buoy No. 17 to Buoy No. 5 all departing vessels are to keep to the East of Buoy Nos. 17, 15, 13, 11, 9, 7 and 5.
   - c. The separation zone starts at Buoy No. 7 and increases to a width of 0.5 mile at Buoy No. 5.
   - d. From Buoy No. 5 to Buoy No. 4 the separation zone width is 0.5 mile.
   - e. From Buoy No. 4 to the entry buoy or approach buoy the separation zone width is 0.75 mile.
3. *Inner Channel*
   The inner channel at Ras Tanura Port has been buoyed for the safe navigation of deep draft outward-bound vessels where marine navigation aides have been installed in accordance with international standards. The channel has a certified depth of 69 ft. at ISLW.
4. **Keel Clearance.**
   No vessel may transit either channel unless it has at least 5 ft. of keel clearance.
5. **Communication – VHF Radio.**
   Maintaining a continuous radio watch aboard all vessels in the Ras Tanura vicinity cannot be over emphasized, particularly in the event of unforeseen circumstances developing in the port area. A two-way exchange of information is an essential pre-requisite to a safe, efficient port operation. Vessels in the Ras Tanura anchorage that are not fitted with VHF radio are requested to maintain a radio watch with the local station HZY.

GENERAL:

Charts and Publications:

Surveys conducted by both American and British authorities in recent years have resulted in the publication of a number of charts of the Port of Ras Tanura and its approaches. The U.S. Defence Mapping Agency hydrographic charts are as follows:

No. 62414 – Approaches to Ras Tanura
No. 62415 – Channels to Ras Tanura
No. 62416 – Anchorages of Ras Tanura and Ad-Dammam

Vessels making for Ras Tanura should be equipped with the latest issue of the above-mentioned charts or the corresponding British Admiralty charts. In addition, it is advisable to supplement the information shown on these charts with other charts of the Gulf and publications such as Sailing Directions and List of Lights.

Current hydrographic information may be obtained by radio from "Middle East Navigational Aid Service (MEGULITE), Bahrain".

Tides and Currents:

The depths quoted in "Sailing Directions" and those shown on charts of the Arabian Gulf are based on Indian Spring Low Water (ISLW).

Locally, the diurnal tide rise is approximately 8 ft. at Springs and 5 ft. at neaps. The "Sailing Directions" present a more detailed description of the tides and currents of the locality.

Due to the peculiar configuration of the coastline at the Port of Ras Tanura, a local system of tidal currents prevail in the vicinity of the berths.

Winds

The winds in this area are not predictable for more than a very few hours. Winds of varying strength may come from any quarter. The prevailing wind, however, is from the NNW.

Winds of any strength tend to create a sharp but short, choppy sea coming up very quickly and calming down just as rapidly. Easterly winds, however, may cause heavy seas and swells lasting for a considerable period.

For a more complete description of the winds in the Arabian Gulf, refer to the "Sailing Directions".

Visibility:

The visibility in this area of the Arabian Gulf is generally fair to excellent, but at times, fine dust is held in suspension in the atmosphere and visibility is reduced to a very short distance.

These phenomena are more deceptive than fog, in that mariners are apt to believe visibility to be greater that it actually is. Fogs, with or without sand or dust, may occur in the morning hours.

Weather:

The local weather of Ras Tanura is comparatively favourable for the Arabian Gulf. The exposed position of the port permits the winds to mitigate the heat of the Summer. Temperatures usually range from a low of 45°F in February to a high of 110°F in August.

During most of the year the relative humidity is high and during the late Summer and Fall it frequently exceeds 85%.

Proper precautions should be taken to avoid sunstroke and heat prostration, particularly during the Summer and early Fall months.

Provisions:

Ship's chandlers are available for provision resupply through the ship's Agent.

Divers:

Deep sea divers, operating from modern and well-equipped boats are available. Ship's Agent must be contacted for this service.

Galley Fuel:

Galley fuel is available only at the North and South Pier, Berths 1 to 11, at approximately U.S. $107.69 per metric tonne. No galley fuel or water is available at the Ras Tanura Sea Islands, Berths 12 to 20, nor at the Ju'aymah SPM's, Berths 31 to 36.

Dry Cargo and Freight:

All Aramco dry cargo is received either at the Saudi Arabian Government piers at Dammam, about 7 miles South of Ras Tanura, or is lightered from vessels at anchorage and transported to piers as designated by the Dammam Port Officials, The dry cargo and freight piers at Dammam are owned and operated by the Government of Saudi Arabia and are entirely independent of Aramco.

Currency:

The Saudi Arabian unit of currency is the Saudi Riyal (SR). As of October 1978 the official exchange rate was 3.300 Saudi Riyals to 1 U.S. Dollar, and 6.544 Saudi Riyals to 1 Pound Sterling.

Ship Agencies:

Vessels calling at either terminal of the Port of Ras Tanura should address all messages concerning ship's business to their Agents through °Aramco HZY". Matters concerning provision supply, minor repairs, local medical or hospital services, mail, crew changes, etc. are to be handled by the ship's Agent.

Import – Export Customs:

All materials to be either exported from or imported into Saudi Arabia are subject to examination by customs authorities. The importation of certain articles is strictly prohibited. Such articles include:

- Explosives and firearms, including air rifles
- Implements of war of any kind, including antiques
- Alcoholic beverages, including beer and wines
- Religious matter not pertaining to the Moslem faith
- Playing cards and gambling devices
- Narcotics

Trafficking in these items between ships also is strictly prohibited, whether the ships are at anchor or at berth. The Saudi Arabian Government forbids trafficking between ship crews and shore personnel.

Saudi Arabian Government Regulations:

Saudi Arabian Government Regulations are strictly enforced, and Masters having any doubts concerning the interpretation of these regulations are urged to consult their Agent. While in port, *whether at anchorage or at berth,* the vessel's personnel are under the jurisdiction of Saudi Arabian laws.

The taking of photographs while the ship is in the Port of Ras Tanura is prohibited by the Saudi Arabian Government.

All alcoholic beverages, including beer, table wines and liquors are to be under lock and key during a vessel's stay in port. The possession and/or consumption of alcoholic beverages is prohibited in Saudi Arabia. Penalties are severe and major delays to vessels can be incurred by Government investigations of violations.

Port Officials:

Saudi Arabian Government authorities – Customs, Quarantine, Coast Guard and Port Officials – have offices at various locations at the Ras Tanura Terminal, Ju'aymah Terminal and Rahima. The ship's Master shall make all necessary contact with the Saudi Arabian Government authorities through the ship's Agent.

A United States Consulate General is established near Dhahran, approximately 50 miles South of Ras Tanura.

A British Embassy is established on Bahrain. It is very difficult, however, to contact Bahrain by shore telephone from Ras Tanura or Ju'aymah, and Masters having business there usually arrange to call at the port of Sitrah (sometimes spelled Sitra).

SHIPMASTER'S REPORT: 1977.

I have just loaded at the above port on a 263,000 d.w.t. vessel to a draft of 67.5 ft. As the vessel was loading to a draft that meant navigating the departure channel on a rising tide, and also my first visit to the port, I requested the assistance of a Pilot for the departure channel.

I made this request 8 hours before departure to the port office and was informed it was not provided.

When the Berthing Master came to sail the ship he told me that Aramco did not provide this service irrespective of what was said in any publication and he left the vessel before it entered the departure channel.

Aramco's comment, June 1980: The above is an accurate statement! We do not supply channel pilots. However, we do supply pilot and tug assistance for lining up to enter the departure channel after loading at Ras Tanura. This assistance is for vessels with departure drafts over 60 ft. when requested by the Master. For vessels with draft of 68 ft. and over, the assistance of tugs and pilot is compulsory. There is no charge for this service.

SHIPMASTER'S REPORT: August 1979.

Bunkers: "Saudi Bunkers" have a tanker of about 15,000 d.w.t. moored on the East side of Dammam channel.

VHF: Channel 13 or 16. During office hours and not at meal times otherwise call Agent.

Barges: 3 – "Tarra Tiffany" – Panamanian registered. Purpose built Bunkering tanker, built Singapore in 1978. Capacity 1,700 tons H.O. and 200 tons D.O.

"Min Woo II" a coaster with capacity of about 2,500 tons H.O. and 500 tons D.O.

"Corrondel" capacity not known.

All have "Yokohama" fenders and are well equipped. They are very quick at connecting and give good co-operation.

Area: To South of Ras Tanura Tanker Inner Anchorage. We anchored just South of SE corner of anchorage near outer Dammam channel buoys.

The nearer South pier the better but it depends on number of vessels in anchorage and Ras Tanura Radar requirements. *Vessel must not anchor in tanker anchorage if for bunkers only.*

Connecting: 6 in. hose, no reducer. Barge generally comes on vessel's port side. Derrick required. Gangway to be turned in.

Payment: Vessel pays for amount supplied, not ordered, barge request vessel to check barge ullages.

It is possible that bunker operations may be moved to the "Northern Holding Anchorage".

SHIPMASTER'S REPORT: December 1979

The following is a radio message received by the Master from his Agent.

Important Notice Revised Government and Port Regulations Ras Tanura. Please acknowledge your compliance.

Para One

Port Authorities now insist that all vessels are not to sail from Rastanura (Ju'aymah) until a port clearance (titled sailing report) has been delivered on board STOP Therefore vessels must have onboard both Port Clearance and P 2/50 permit of departure before sailing STOP

Para Two

Anti Pollution regulations are now being strictly enforced by Saudi Arabian Government Authorities with heavy fines/delays to vessels/possible arrest for Masters of offending vessels therefore you are strongly advised to AAA Log and report to the Pilot Officer any oil slick P 3/50 sightings BBB Closely monitor deballasting operations CCC Acknowledge receipt only of any protest letter submitted by ARAMCO for any alleged pollution incident DDD Advise us immediately a protest letter for an alleged pollution is received on board and name of your P and I Club EEE Issue P 4/50 Arab with a separate counter protest letter as required copied to us STOP

Para Three

Please ensure all repeat all alcoholic beverages and pornographic material are removed from cabins/lounges and placed in bonded store for sealing STOP Stores and chillrooms must also be sealed if containing alcohol STOP Vessels are P 5/53 subject to search on arrival and penalties are severe for infringement of Saudi Regulations STOP

Para Four

On arrival Ras Tanura ensure you call this Office advising anchor time and most important advise when Pilot boards your vessel to proceed to berth/SBM in order to avoid delay in clearing your vessel STOP+

SHIPMASTER'S REPORT: February 1980. (LG as Carrier).

Approach:

Initial Contact: Contact "HZY" – Aramco, remember this station will accept messages to local Agents but not send to ship, these have to come through Bahrain, at least 48 hours beforehand to give time of arrival at Entry Buoy (RTE 2 Eastern channel) either Northern or Eastern or as soon as possible if coming from other Gulf port.

1. If you have no orders or a nomination but no firm date you will have to wait at Northern or Eastern holding anchorage. The Eastern is for ships below 250 m. in length and 10.7 m draft.

2. If for Bunkers you will be allowed to proceed to the bunker anchorage either by Northern (Main) or Eastern channel.

3. If you have a nomination and date near at hand you may be allowed to proceed to inner tanker anchorage off Sea Island.

Anchor/Proceed: If you have to wait, you select whichever holding anchorage is suitable. For Gas carriers I prefer the Eastern as the channel is easier to use on entry and the anchorage is quieter plus the distance is less if coming from the East. For larger ships you would have no option but to use the Northern.

If you are not sure whether you will have to anchor or not at the holding anchorages contact Ras Tanura Pilots Channel 16, working 14, as soon as possible before arrival for instructions.

Listen: Guard "HZY" well before arrival for standard messages, nomination and berthing instructions. A useful service is the Berthing Schedule given out twice daily at 0700 and 1900 hrs. GMT on 430 kHz after Traffic List.

Proceed: If you have firm instructions to proceed to Inner Tanker anchorage or if taking Bunkers, cable "HZY" for permission to use either Eastern or main channel at least 12 hours beforehand if possible or as soon as leaving port (Kharg or Mina) you will get no reply.

Call Pilots an hour before Entry Buoys for permission to proceed inwards and give time at Entry Buoys (RTE 2 East channel) and time off Sea Island.

Inwards: After contacting Pilot on Channel 14 you will be told to report at Entry Buoy. Then when passing this buoy told to report to 'Ras Tanura Radar' on Channel 10 on which close watch must be kept on as well as Channel 16.

Main Channel: Ras Tanura Radar will tell you when to report, remember they have you plotted.

A speed of about 12 knots down this channel is safe at manoeuvring full ahead.

At No. 9 buoy a speed reduction to 5 knots is required, before you do this check with radar – they may require you to continue at greater speed to clear channel.

East Channel: This channel is not so complicated or conjested and vessels keep to the starboard side of buoy line.

Radar will require reports at given intervals – usually RTE2 and RTE7, 12 knots can be maintained most of the way.

Proceeding from Head of Gulf: If coming from Kharg or Mina, etc., extra distance will be entailed by using Eastern Channel so use main channel but get permission first from Pilots and inform "HZY" well beforehand.

Inner Tanker Anchorage: The pilot book will tell you to haul round to East on leaving main channel to clear Tanker anchorage if proceeding to Dammam area.

You will have already told Radar Control where you are bound and they will probably let you cross the Tanker anchorage if reasonably empty and few ship movements off Sea Island.

Bunker Anchorage: On no account anchor in Tanker anchorage if taking on bunkers only but just South, generally where radar control tell you or if possible as near as South Pier as possible consistent with draft and other ships. The bunker barge can come out to Dammam channel outer buoys D27 and D28 near RTE 8.

Anchored: Ras Tanura Radar will require position at anchoring and to report before heaving up.

The Tanker anchorage area is not good holding ground particularly in Winter when strong winds are frequent, plenty of cable is required. During February at the Southern end of the anchorage, 9 shackles of cable have been used.

Pratique: Cable in usual form HZY for Free Pratique 24 hours beforehand or as early as possible before arrival. Not given till alongside and vessel cleared.

Departure: Depends on draft and destination. If under 10.7 m. and proceeding East use Eastern channel. Radar will require report at RTE 7 and RTE 3. Main channel report at Nos. 17 and 18 buoys and 2 Alpha buoy.

Berths: At present (2/80) there are 3 berths for Gas Carriers loading LPG Nos. 6, 8 and 10 on North Pier. No. 10 is the most modern, and the most Northerly.

Minimum draft on the berths is 46 ft. LW.

Always Port side too.

Chicksans: 12 in. loading × 2 each berth
8 in. VRL × 2 each berth

No. 10 has quick acting couplings to ships Manifold Nos. 6 and 8 have conventional spool pieces and bolts.

Moorings: Minimum always 3,3,2 crossed each end. If strong winds expected 4,4,2 crossed each end.

Mooring up can take time especially if ships mooring gear is slow – about 1.5 hours.

Very keen on moorings being kept tight.

Fire Wires must have eye each end with eye being hung off on light rope pennant – wire in a bight 1 m. above water.

Pilots: Board 1 mile East of the North Pier by tug or fast launch. Will use straight conventional ladder or gangway/ladder arrangement.

No berthing with wind over 25 knots.

On unberthing it is a regulation that the Pilot is on board and tugs standing by before Chicksan disconnecting can commence.

Tugs: Usually 2, approx, 4,000 h.p. There are 4 Aramco owned tugs plus 2 chartered US tugs and 2 Dutch tugs.

Tug's lines or wires, generally very heavy.

Join vessel off Sea Island.

Procedure: Shore gang connect and disconnect, generally takes 1.5 hours at Nos. 6 and 8, quicker at No. 10.

VRL: No meter is installed on this return and thus the terminal do not like its use. They can to a certain extent detect its use by line noise and the flare especially if you are the only LPG vessel alongside.

Loading Rate: Maximum loading rate is about 20,000 bbls.p.h. which roughly corresponds to 1,500 to 1,900 tonnes per hour depending on grade.

Generally only 1 ship at once on any of the 3 berths can take the same grade.

Pressure/Temp.: Regulations are 0.7 mbs max. tank pressure arrival alongside and a difference of 20° between top and bottom temps.

Maximum 10 tonnes of incompatible grade per tank on arrival. If the ship is in Inert Gas, Aramco Chemist will board on arrival alongside to check oxygen content max. 5%

Normally Aramco shift supervisor and loading Master board on arrival to check tank condition.

Cooling down: If vessel arrives with warm tanks – after drydock/repairs or if ammonia she will require coolant.

Aramco require ships to leave berth and cool down after taking sufficient quantity for this purpose. When cooled down the ship will be accepted back alongside and will be required to load at full rate without VRL.

From experience we have found about 1,500 tonnes per product or 3,000 tonnes if one grade can be obtained.

The VRL has to be used but the shift co-ordinators take a bit of convincing that you cannot compress I.G. Definitely no venting up riser.

Maximum rate on coolant usually obtainable is 3,000 bbls.p.h. Make sure you do not ask initially for too low a figure because it is quite a job to get it increased.

Loading Master: Will give you an Aramco VHF set for pier communications.

Water: Well water with a slight salt content is easily obtainable on North Pier. Rate about 30 t.p.h. It is far better than rationing. Dose with lime and softener. Price about $1.20 per tonne. Max. 200 tonnes.

Chits have to be obtained from the Agent before the Supervisor will let you connect. Connections are American type couplings:

Distilled water is very difficult to obtain.

Stores: Only at the anchorage by the Agents launch.

No stores are allowed to be loaded, carried (or landed) along piers. (Enforced 1.2.80).

In Winter and early Spring fresh provisions are reasonably good and moderately priced.

Airfreight: Takes about 2 days to clear through Customs at Dhahran.

Crew: Repatriation and joining is best arranged well beforehand. The Agent will require Discharge Books stamped and taken ashore the day before for crew members departing.

To U.K. the best flight is BA120 at 0130 hrs. arrriving London at 0530 hrs, for this you have to be off the ship not later than 1600 hrs. the day before, clearing formalities and then wait in a hotel at Dhahran.

Medical: Services available.

Bunkers: Obtainable from Aramco by Chicksan at all North Pier berths at the same time as loading. Aramco's price averages $0.04 higher than the bunkering barge companies.

If bunkering by barge you can only do it at the anchorage. If the vessel is at Ras Tanura for bunkers only she is not allowed to use the Tanker anchorage and must anchor South near Dammam outer buoys. The nearer the South Pier the better but Ras Tanura Radar will have a say in this.

Saudi Bunkers have on charter 3 to 4 coasters. Their fendering is quite good with two small 'Yokohamas' and many tyres.

You pay for what is supplied. At present (2.80). Koreans man the barges and their English is not good.

You can contact Saudi Bunkers on Channel 16 works 13. Only in office hours otherwise to barge direct.

Side alongside depends on barge – Check. Have gangways turned in. 6 in. hose no reducer. Derrick required.

Walport Films: This was stopped during 1979 due to Customs problems over local film shows.

Alcohol/Magazines: Definitely no alcohol – all to be sealed. Random checks made by Coastguard.

"Magazines" and "Calendars" to be put in store.

Mail: Best inwards via Bahrain. Takes about 7 to 10 days from U.K. and vice versa.

Surveyor/EDP: With Gas carriers Surveyor is allowed to complete his survey and check figures with Mate before Pilot will take ship off berth. Most Pilots know this but sometimes gentle persuading is required otherwise Surveyor will have to go off with Pilot.

Two main Survey Companies are Watson Gray and Redwood. Saybolt and Caleb Bret have only token representation. Aramco will cable you for figures about 18 hours after departure for insertion on Bill of Lading and authorisation to Agent. With Gas carriers due proper survey on departure and arrival generally figures are correct.

Formalities: Make sure you have correct clearance on departure. The Quarantine Clearance is not a clearance. Clearance must not be dated more than 24 hours. Often a check is made. 5 copies of the Standard Arrival Form and 5 copies of Standard Request for Clearance form must be given to Immigration and Clearance Officer on arrival. These forms are in the Agents own format and it is best to have a supply.

5 Crew Lists
2 Health Declarations
1 Vaccination
1 Store
1 Crew Declaration

The above varies, sometimes virtually no forms are required, other times the ship will be searched top to bottom and every possible form will be required.

'Q' flag and lights at night must be displayed until pratique given – *very important.*

Saudi flag must be flown in Saudi waters 24 hours a day – *very important.* Large fines imposed (2.80).

Immigration, Quarantine, Customs generally only board in daytime. If vessel berths at night Agent often clears the ship and you will have a visit during the day.

Gangway: This can be turned out prior to berthing. It can not be landed on any of the berths and must be slung and tended at all times.

New Facilities: A new LNG/LPG jetty at the Ras Tanura outport – 'Ju'aymah' has been established and should be ready to receive its first LPG carrier in late May 1980. The facility has its base just South of Ju'aymah tank farm in Latitude 26° 47.15′ North, 50° 01.15′ East and runs in direction of 021° 4.65 miles to 26° 51.5′ North, 50° 02.95′ East. A spur or 'L' shape then runs for 0.70 mile East. On each side of the spur is a berth with a minimum depth of 50 ft. LW.

Minimum size of vessel will be approx. 25,000 cu.m. and maximum designed size is 200,000 cu.m.

Chicksan – 20 in. lines × 2. VRL – 20 in. lines × 2 metered and charged.

It is expected for an initial trial period there will be no charge on the VRL.

2 × 4,000 h.p. tugs to be permanently stationed. Rate will be about 30,000 bbls.p.h

Anchorage/Pilotage are provisionally established 26° 51.6′ North, 50° 06.2′ East.

The approach has not been finally decided (February 1980), but likely to be down main channel turning at 5 Alpha buoy.

SHIPMASTER'S REPORT: March 1980 (Additional to report above).

Clearance: Make sure you have all clearances before departing from Saudi waters. Clearance is not given now until bunkering is completed.

Saudi flag: Must be displayed 24 hours a day and be visible, not obscured by other flags.

Stores: Moving stores between company vessels at the Inner anchorage is completely banned, this includes films.

AUTHORITIES: The Arabian American Oil Company, Dhahran, Saudi Arabia. Cable Address, Aramco, Dammam. Port Officials: Saudi Arabian Government Port Authorities located in Customs House, Port Office, and Quarantine Office at Ras Tanura.

AGENTS: Mail Address: Gulf Agency Company. Saudi Arabia, Aramco Mail Box 621, Ras Tanura, via Dhahran, Saudi Arabia. Cables: "Confidence", Ras Tanura, or "Confidence", Bahrain (stating for Ras Tanura). Telex: 651011, ("GAC RT SJ") or 8211 Bahrain (stating for Ras Tanura) Phone: 6733132, 6733171, 6670632, 6670636 (24 hour service). After office hours: Phone: 6733132, 6670644, 6733171.

Vessels can communicate with SSB radio station, frequencies 3539 and 6910, call-sign "Confidence Ras Tanura".

For ship to shore communication, Ras Tanura office is also equipped with VHF radio, call-sign "Confidence Ras Tanura", on Channel 16, switching to Channels 13, 6, 9 or 14 for communication.
Tanker Crew mail: To be directed to: c/o Gulf Agency Co. Saudi Arabia Rahima P.O. Box 72, Ras Tanura, via Dhahran, Saudi Arabia.
N.B. G.A.C. Ras Tanura are connected to the Bahrain Telex Bureau. Messages from ships to G.A.C. Ras Tanura may therefore be addressed "Bahtag 80-1450433 Confidence Ras Tanura" via Bahrain Radio, and they will then be relayed direct by telex to Ras Tanura.

YANBU (Yenbo): 24.05 N. 38.03 E.

Also see "General" before first port.
LOCATION: Yanbu commercial port is on Red Sea coast, about 218 nautical miles North of Jeddah.
PORT LIMITS:
Harbour Boundaries:
All shore-based port property enclosed by a fence following the shore line extending seawards to a line running between the following points:

Lat. 24° 06′ 00″ N.	Long. 38° 00′ 00″ E.
Lat. 24° 06′ 00″ N.	Long. 37° 57′ 30″ E.
Lat. 24° 03′ 30″ N.	Long. 37° 57′ 30″ E.
Lat. 24° 03′ 30″ N.	Long. 38° 05′ 30″ E.

CHANNEL: Ships entering port pass through a channel of the following measurement: Length 1647 m., width varying between 70 to 130 m., width at entrance between beacons 310 m.
BEACONS: 11 miles outside port, beacon at Al-Sharm. Height 23 ft. White flash every 10 seconds. At entrance of port channel 2 beacons, height 15 ft. Starboard-hand beacon (black), green flash every second. Port-hand beacon (red), red flash every second.

795 m. from channel entrance on port hand is another beacon, height 15 m. (black and white squares), white flash every second.
Note: A cement factory has been established in position 24° 16.1′ N., 37° 33.2′ E.

The factory provides a strong radar echo and emits a very bright glow at night.

It has been reported that this has confused seafarers who have taken it for the town of Yanbu.

Seafarers are strongly advised to amend their sea charts accordingly.
BUOYS: Channel is buoyed with red and green port and starboard-hand buoys.
PILOTAGE: Compulsory. Vessels requiring Pilot should exhibit code flag or International light signal.
Pilot Boarding Position:

Lat. 24° 04′ N.	Long. 38° 01′ E.

Approximately one nautical mile from Beacons Nos. 1 and 2. Ships for Yanbu Port should contact "Yanbu Port Control" on VHF Channel 16, two hours before arrival.
ANCHORAGES: There are no official anchorages. Areas S.E. of the entrance along the coast with 10–20 m. depth, and S.E. of Querera Reef with similar depths are commonly used as anchorages. However, these are unprotected.
MAX. SIZE: Max. draft 34 ft.
HEALTH: All incoming vessels should abide by health regulations and present necessary documents to the authorities in accordance with international laws, i.e. as under: Q if the health condition is clean. QQ if there is a suspicious case in the vessel. QL if there is an infectious or epidemic case on board.
RADIO: Until the implementation of a Beacon Station for navigation all ships entering port before passing the channel should contact Port Department by radio/telephone during following times: 0500 to 0600 hrs. GMT; 1000 to 1100 hrs. GMT; 1400 to 1500 hrs. GMT.

These are the decided times during normal days, but during the Hajj Season a new publication is issued to cover additional times.
TUGS: See "Equipment".
BERTHING:

Berth	*Length (m.)*	*Depth (m.)*	*Remarks*
1	170	10	General cargo; pilgrims' reception hall.
2	220	10	General cargo, livestock
3	300	11	Bulk cement terminal
4		11	General cargo
5 to 7	800	12	General cargo
8 & 9	440	12	General cargo

Note: Ro-Ro vessels berth stern-to on Berths 5 to 9.
Covered storage area: 43,000 sq.m.
Open storage area: 462,000 sq.m.
YANBU CONSTRUCTION PORT: Situated 18.5 miles S.E. of Yanbu Commercial Port in position 23° 55′ N., 38° 17′ E.
Port Facilities: The port consists of a finger pier with two berths (outer and inner) and two anchorage areas. The outer pier berth has a length of 270 m., and the inner berth 250 m. Depth alongside is 18 m., but max. draft allowed is 11.5 m.

Discharge is carried out using ship's gear, but some mobile cranes are available.

Two Ro/Ro berths for vessels of 4 m. draft are under construction. There are no facilities for fresh water or bunker fuel.

Also see "Developments".
BULK HANDLING FACILITIES:
Bulk Cement Terminals:
1. Berth 3
   Silos storage capacity: 40,000 tons.
   Handling capacity: 500 t.p.h. 1,000,000 tons per year.
2. Berth 9
   Proposed cement silo barge with bagging plant
   Storage capacity: about 41,000 tons.
   Handling capacity: about 1,000,000 tons per year.
   Operational: 1981.

EQUIPMENT:
Marine Equipment:
3 Tugs: 2 of 800 h.p. (Voith Schneider)
1 of 1,310 h.p. (Voith Schneider)
3 Pilot boats (2 of 23 knots).
4 Towing launches
Mooring launches
Cargo Handling Equipment:
Mobile cranes: 1 × 50 t.
2 × 45 t.
1 × 35 t.
1 × 15 t.
1 × 10 t.
Head trucks: 4
Trailers: 20×20 t.
Forklifts: 10×2.5 t.
3 × 5 t.
10 × 6 t.
2 × 10 t.
1 × 22 t.
STEVEDORES: Like Jeddah, stevedoring at Yanbu, is based on daily paid basis. There are no stevedoring companies and labour is engaged on day to day basis.

There is one Customs warehouse at the moment (at East berth) which can accommodate about 10,000 tons of cargo. This shed is near quay and can receive cargo direct into shed from vessel.
FRESH WATER: Available.
FUEL: Fuel oil available.
REPAIRS: Minor repairs possible.
CUSTOMS ALLOWANCE: Each crew member may have 200 cigarettes or 0.5 lb. tobacco, but all alcohol and wine, beer, etc., must be sealed. This applies to all persons on board. For each flask/glass/bottle containing alcohol found by the customs, there is a penalty of £100 sterling.
SHORE LEAVE: Passengers may only go ashore if they have a valid visa. Crew may go ashore if they have written permission from Master and leave their passports with passport office at the port.
DEVELOPMENTS: The new industrial berths will be located some 40 k/ms. South of Yanbu and stretching towards Yanbu City.

The pipe-line will be ready mid-1981. Simultaneously tanker and LPG berths will also be ready. Container and general cargo berths are not expected to be ready until 1983 and will then replace the present two industrial berths.

Plant for NGL and LPG: Min. depth 60 ft. Draft allowed 54 ft. Twin berths total 2,900 ft. can accommodate LPG tankers of up to 200,000 cu.m. will also accommodate natural gas tankers up to 140,000 d.w.t. and fully loaded or light loaded 280,000 d.w.t. vessels.

A causeway of 6,100 ft. and a 3,600 ft. trestle will carry separate 24 in. Propane and Butane pipe-lines, and a 30 in. natural gas pipe-line. The plant is scheduled for an average flow of 270,000 bbls. of Ethane and NGL per day. Can be increased by 50%. A max of 30,000 bbls.p.h. for each export product to loading ships.

This plant located in industrial area which will also house an oil export refinery, a crude oil transhipment terminal and domestic refinery and petrochemical facilities.

SHIPMASTER'S REPORT: January 1979.
Pilotage: Pilot boards 1 mile off harbour entrance. Pilot requires 4 days, 2 days and 24 hour notice of arrival. Pilotage compulsory.

The Pilot boards from one of 3 modern fast launches, painted white, with "Pilot" on the side. (Not to be confused with about 6 fast naval launches of similar size which are seen in the port.
Restrictions: Vessels may enter and leave at any stage of the tide during daytime only.
Max. Size: Length, no limit. Beam, no limit. Max. draft, 34 ft. Depths by echo sounder in the entrance channel indicate depths greater than 39 ft.
Tugs: Available. 3×1300 h.p. (Voith-Schneider type). Also 2 additional tugs available. Ships ropes used. No VHF facilities available.
Health: Quarantine formalities carried out alongside. Advise Jeddah Agents of quarantine particulars.
Consuls: In Jeddah.
Medical: Doctor and hospital available.
Fresh Water: Not available at time of visit.
Berthing: Berth located adjacent Yenbo town. Berth No. 1 is for small craft, berths Nos. 2–7 for large vessels and berths Nos. 8 and 9 in use but not yet completed. There is good rubber fendering on all berths.
Bulk Handling Facilities: Cement only.
Special Cargo Handling Facilities: None. However, Ro/Ro vessels with starboard quarter doors discharge at ordinary berths which are very low, being about 1 m. above the water. There is adequate storage space for handling breakbulk cargoes. Palletised cargoes handled. There is no equipment for handling containers. There are no lighters, however, native craft are reported to be available.
Density: 1025.
Anchorage: There is no anchor outside the port.
Harbour Plan: The plan in the corner of Chart 63 is quite accurate except that a beacon has been erected now on the N.W. side of the entrance. The S.W. beacon flashed green, and is good and bright. The N.W. beacon flashes red, and is poor and weak. The channel buoys are unlit.

Cargo sheds have now been erected at berths 2, 4, 5, 6 and 7. The conspicuous minaret to the N.E. and the Water Tower at the entrance were not seen. If in existence then they are not 'Conspic'. The land to the S.E. of the entrance channel has now been fully reclaimed, and the seaward corner of it is radar conspicuous. Reclamation work is still taking place on the other area to the N.E. and a narrow causeway has been built to join the 2 reclaimed areas.
The Town: The population is said to be 40,000. The town is being rebuilt. The surrounding land is utterly flat for many miles, and entirely destitute of vegetation. The port's chief activities are imports. No known exports.

Pilgrims land here to visit Medina. The port handles 25/30 ships a month, and 45 ships per month during the Pilgrim season. However, I only saw 3 ships in port. Fresh water cannot be obtained. However, if about 2 weeks notice is given water can be trucked in from about 50 km. distant.

Communications: It is 354 km. by road to Jeddah. There is no airport, or rail link. Telephone calls can be made to Jeddah with some difficulty. There is no telex link.

Name of Port: The correct spelling appears to be Yenbo, as used on the chart, and not Yanbu as used in the List of Radio Signals Vol. 6, or Yembo as used occasionally.

In furtherance of this please note that the tugboats are named Yenbo 1, 2 and 3.

Directions: Chart No. .63 is grossly inadequate for the approach to Yenbo. For call at Yenbo in January 1979 a home-made chart covering area from 23° 39′ N. to 24° 21′ N., and from 37° 28′ E. to 38° 06′ E. was made, at a scale of about 1:145,000 (i.e. 5 times larger scale than Chart No. 63).

Under no circumstances would I consider an approach to this port with the chart referred to (No. 63), which is to the scale of 1:750,000. No other Admiralty chart exists.

The Red Sea & Gulf of Aden Pilot, Supplement No. 7 – 1977 states that Ras Baridi may lie 3 miles to the North of Position charted. In fact I believe that it lies about 1.5 miles North only, but the point of land at the entrance of Sharm al Khaur (The West entrance) is correctly plotted as regards latitude, although the wrong shape.

The area of land from the entrance to Sharm Yenbo to a point about 5 miles to the West lies about 1 mile further North than charted.

The "Pilot" on P.313 advises passing at least 2.5 cables North of Schermo beacon. In fact this vessel passed 5.0 cables North, and the soundings found decreased in the space of 0.5 mile from 380 fathoms to 13 fathoms, then dropped off to over 300 fathoms equally abruptly. On departure we passed 1 mile off and the same ledge was found, this time with 15 fathoms over it.

The rock marked Schermo is charted as being awash, but was not sighted at 0.5 miles in daylight. Schermo beacon lies 1.8 miles West of this rock, and consists of 3 concrete blocks joined by catwalks, with 1 block toppled. A 30 ft. mast is erected on the centre block. Visible by radar as a very weak echo at 11 miles, as a good echo at 6–8 miles, and at 3 miles the echo can be resolved into 3 echoes. Visually, when approaching the port at 0800 hrs. the beacon could only be identified at 2 to 3 miles. On departure at dusk the light could be clearly seen at 8 to 9 miles.

Schermo beacon is the only navigation aid in the entire area. The coast in the area of Ras Baridi is radar conspicuous. The coast from Sharm al Khaur Southward to Yenbo does not show up on the radar in an identifiable manner until the vessel is within 4 to 5 miles. The echo sounder is no help, as 150 to 200 fathoms is found 1 mile off the port entrance, and apart from the 15 fathom ledge off Schermo, the rest of the inward track was over depths of 340 to 380 fathoms, with a generally level even bottom.

Recommended inward route: Steer a course of 090° along the parallel of 24° 06′ North. If on the track Ras Baridi will be found 12 miles to the North, and 5 miles further along the West side of Sharm al Khaur will be found 10 miles to the North. This course will pass 1 mile North of Schermo Beacon. When passing Schermo Beacon the cement silo in the Port of Yenbo can be seen, being the only conspicuous object bearing East. After passing Schermo steam at least 1 mile 090° before altering to 105°. Under no circumstances approach closer than 1 mile from the entrance, when embarking the Pilot.

AUTHORITY: Yanbu Port Management.

AGENT: See "Jeddah".

ZULUF TERMINAL: 28.23 N. 49.14 E.

TERMINAL CLOSED DOWN APRIL, 1976. THE STORE BARGE HAS LEFT. NO FURTHER OPERATIONS WILL TAKE PLACE AT ZULUF.

Senegal

DAKAR: 14.40 N. 17.26 W. (See Plan Book)

PORT LIMITS: *North:* From the point of Bel-Air by a parallel from N.E. of the N.E. Jetty of the harbour, to 1 mile N.E. by a meridian passing 2,900 m. East of the Round-Point determined by the crossing of Felix Eboue and Avenue de la Jetee Nord and by the parallel passing 2,060 m. North of Goree Island.

East: By the meridian passing 1 mile East of Goree.

South: By a line joining the Cape Manuel from the South point of Goree prolonged until it encounters the meridian passing 1 mile East of Goree.

DOCUMENTS:

5 Crew Lists.
2 Lists of Vaccinations.
6 Lists of Passengers in Transit.
6 Lists of Passengers Disembarking.
4 Lists of Crew Personal Effects.
4 Lists of Ship's Stores.
1 Maritime Declaration of Health.
2 Lists of Ports of Call.
5 Ship's Report Inwards.
1 Hatch List.

PILOTAGE: Pilots meet vessels off the North point of the Island of Goree in a naturally sheltered area.

RESTRICTIONS: During the rainy season, all vessels with a draft of more than 32 ft. 6 in. could be delayed due to the effects of swell to stay at anchorage in outer-roads and await meteorological conditions permitting their entry into the harbour.

Use of whistle signals to call Pilot is forbidden between 2200 and 0600 hrs. The harbour area is dredged to a depth of 10 to 11 m.

MAX. SIZE: Ships of 33 ft. draft are able to enter at all stages of the tide by day and night. Vessels up to 36 ft. draft may enter at high tide except possibly during the stormy season, between mid August and mid October.

HEALTH: Health Officials board vessel immediately after berthing alongside. For passenger vessels, these formalities are effected before berthing to avoid delays. Vessels at sea may obtain medical advice by VHF via Dakar Radio.

Inoculation/Vaccination can be arranged through Agent during weekdays.

Free pratique can be granted via radio by Agent, by using international Code Words "MIBDU/MIJMA".

VHF: The Port Captain's Office, pilot station and tugs are equipped with VHF, with the following Channels: Channel 16 used by vessels approaching to contact pilot station or Port Captain's Office; Channel 12 used during manoeuvres for communications between Pilots and tugs; Channel 6 used only by the tug station.

TUGS: Operated by a private company, 4 tugs available up to 2,000 h.p. Compulsory for loaded tankers.

BERTHING: 9,000 m. of quay length available of which more than half has depths of 8 to 12 m. alongside.

Mole D'Escale: 6 berths, depth alongside 10 m., can be used for vessels refuelling simultaneously with cargo operations.

Pier 718 Phosphate quay (Pechiny). 215 m. long, max. draft of 25 ft. 7 in., loading average of 200 t.p.h.

Pier 52 Phosphate quay (TA IBA). 170 m. long, max. draft of 36 ft., loading average of 1,000 t.p.h.

The South area has 3 wharves with a depth of 26-33 ft.

Dock I is 460 m. long.

Berth No.	12	Draft	26 ft. 3 in.
„ „	13	„	28 ft. 7 in.
„ „	14	„	28 ft. 7 in.
„ „	15	„	33 ft.
„ „	17	„	33 ft.

Dock II

Berth No.	21	Draft	27 ft. 3 in.
„ „	22	„	26 ft. 11 in.
„ „	24	„	26 ft. 3 in.
„ „	25	„	25 ft. 11 in.

Dock III is 360 m. long. Max. draft of 32 ft. 10 in.

Mole de Peche: 1,461 m. of quays, supplied with water and bunkers (entering into service, October 1980). Areas for spreading out fishing lines and nets.

TANKERS: The Petroleum Basin is dredged to a depth of 10 to 11 m. 2 jetty berths can receive tankers up to 200 m. length, max. draft 32 ft. 6 in. Petroleum Wharf: 4 berths, depth alongside 12 m. (depth in approaches 11 m.) can receive tankers up to 250 m. length with a draft of 36 ft.

STEVEDORES: Normal working hours, weekdays from 0800 to 1200 hrs. and from 1400 to 1800 hrs. Saturdays from 0800 to 1200 hrs. Overtime, weekdays from 0500 to 0800 hrs.; from 1200 to 1400 hrs.; from 1800 to 2200 hrs.; from 2200 to 0500 hrs. Holidays and Sundays from 0000 to 0500 hrs.; from 2200 to 2400 hrs.

MEDICAL: *Vaccinations;* Possible from 0800 to 1200 hrs. and 1500 to 1700 hrs. Sundays and holidays excluded. *Doctors:* All kinds of specialists available. *Hospitals:* With qualified doctors and good equipment.

FRESH WATER: All quays are fitted with water hydrants. Water supplied by 3 hoses simultaneously, with a rate from 60 – 100 cu. m.p.h. Can also be supplied by barge up to 400 tons capacity.

FUEL: All grades can be supplied from the quays up to 1,000 t.p.h. Fuel can also be supplied by barge. Also see "Shipmasters' Report".

REPAIRS: All types of repair can be effected by the Naval Arsenal or by private companies.

DRY DOCKS: At the Naval Arsenal, one dry dock length 189 m., width 23 m., depth up to 9.50 m. Syncrolift, max. weight acceptable, 1,200 tons.

New Floating Dock (to be in service October 1980) which will take vessels up to 70,000 d.w.t. Lifting capacity 28,000 tons. Acceptable dimensions 235 m. × 38 m.

REPATRIATION: Seamen can be repatriated to Europe without delays by air.

AIRPORT: International airport with regular services to Europe.

TELEPHONES: All berths are equipped with telephone apparatus which is placed on board vessels without charge.

HOLIDAYS: New Year (1st January); Tabaski (Variable Date); National Day (4th April); Easter (Variable Date); Labour Day (1st May); Ascension Day (7th May); Whit Monday (Variable Date); Maouloud (Variable Date); National Day (14th July); Assumption (15th August); All Saints' Day (1st November); Korite (Variable Date); Christmas (25th December).

SHIPMASTER'S REPORT: With a draft in excess of 15 m. it is not possible to anchor in the inner roads due to the swell. The swell is worse from July to October (rainy season).

The Pilot directed us to an anchorage 0.5 miles N.E. of Island of Goree but in my opinion it is a little too close. However, the nearer a vessel can anchor N.E. of Goree the better. The holding ground is very good.

It is possible to talk to Mory Fuel Company direct on VHF Channel 2 . They have a barge which is able to deliver fuel oil and diesel oil, capacity 500 tons.

Three tugs available, be sure to order one well in advance before completion of bunkering or the vessel may have to wait. Bunkering undertaken day and night.

AUTHORITY: Port Autonome de Dakar.

AGENT: Socopao Senegal, 47 Avenue Albert Sarrault, B.P. 233. Tel. 23.10.01. Telex 521.621.622. Cables "Freight Dakar".

KAOLACK: 14.09 N. 16.06 W.

DOCUMENTS:

2 Crew Lists.
2 Store Lists.
2 Manifest pacotille (tobacco, wine, etc.). Agents deposit to Customs office.

PILOTAGE: Pilot taken on board, and lands in Dakar. When vessels do not require tank-washing, the Pilot disembarks in roadstead.

ANCHORAGES: Sufficient for three vessels only. About 6 m. deep.

RESTRICTIONS: Night navigation forbidden in River Saloum. Depth available 3.0 m.

MAX. SIZE: Length 105 m. (because of River Valor).

HEALTH: Agent signals to Harbour Master. Provisionally vessels quarantine in Dakar. No hospital.

TUGS: No tugs. (Only from Dakar.)

BERTHING: Signals by flag when berth available. Vessels enter at flood tide so that they can turn at anchorage to be ready for sailing.

MEDICAL: Yellow fever vaccinations only at Dakar. No hospital facilities.

DENSITY: August to December: sea water. January to July: 1.55.

FRESH WATER: Available at 10 t.p.h.

FUEL: None available.

GANGWAY/DECK WATCHMEN: Arranged by Agent.

OPENING/CLOSING HATCHES: By stevedores.

CUSTOMS ALLOWANCE: Tobacco, No restrictions, but Customs control on board (declaration on manifest). Crew going ashore only allowed cigarettes marked "Vente au Senegal". Wine and/or Spirit, Not limited, Customs controlled.

IDENTIFICATION CARDS: Not necessary.

CONSULS: None (Dakar only). French Consulate Agent: Mr Jean Guillemot. UTRAM. Tel. 87. Telex Mafic 781 SG.

REPAIRS: None (only Dakar).

REPATRIATION: Not possible (Dakar only).

AIRPORT: None.

TIME: GMT Permanent.

HOLIDAYS: Independence Day (4th April) no loading. Tabaski (dependent on moon phase).

FIRE: Tel. 324.

TELEPHONES: Not possible to place on board.

SHORE LEAVE: Crew members allowed ashore.

REGULATIONS: Vessels must hoist Senegalese flag and notify Agent before entering port.

AUTHORITY: Harbour Master.

AGENT: Socopao Senegal, B.P. 202, Kaolack. Tel: 87.025. Telex: 7460 Freight SG.

Seychelles

PORT VICTORIA, Mahe: 04.37 S. 55.28 E.

DOCUMENTS:

Maritime Declaration of Health – forms obtainable from Medical Officer.

Deratisation Certificate.

5 Crew Lists and Passengers' Lists.

Dangerous Cargo List.

Ship's Register.

Crew Declaration Form.

Declaration of Stores.

Parcels List.

Firearms List.

List of Animals remaining on board.

Un-manifested Cargo List.

Cargo Manifests.

Clearance from last Port.

PILOTAGE: Compulsory in inner and outer harbour for any vessel of or exceeding 150 tons gross burdened register.

24 hours notice, giving draft and length. Telegraphic address "Demarine" through Cable & Wireless (on schedule 500 kc/s. and 8714 mc/s. Schedule published in Radio list. Harbour control equipped with VHF Channels 16, 12 and 6).

Pilot Boat: White hull with blue cabin, with "H" flag.

Signals for Pilot: "G" by flag and/or whistle and by night "G" by morse. Pilot boat stationed inshore and proceeds to sea to meet approaching vessels. Pilot can board in any weather. While awaiting Pilot; vessel can anchor in any suitable anchorage in the pilotage area. Vessels should call "Harbour Control" on VHF, Channel 16, two hours before arrival between 0700 and 1800 hrs. Between 1800 and 0700 hrs. the station may not be manned.

ANCHORAGES: (1) Anchorage A. In depth of 66 to 72 ft., fine sand and shells. Good holding, 9.75 cables, 058° from Victoria Lighthouse.

(2) Anchorage B. In depth of about 64 ft., sand and coral. Good holding, 8.25 cables, 074° from Victoria Lighthouse.

(3) Anchorage D. In depth of 78 ft. coral and sand. Good holding, 3 cables, 048° from Victoria Lighthouse.

(4) Anchorage E. In depth of about 78 ft., sand and shells. Good holding, 1.25 miles, 089.5° from Victoria Lighthouse. Super tankers and large vessels anchor outside the Fairway Buoy in any suitable anchorage. The Master should always contact Harbour Master for anchorage instructions.

RESTRICTIONS: All shipping movement in Inner Harbour to take place during daylight hours only. In Outer Harbour, night movement at discretion of Master. No tide restrictions.

HEALTH: "Q" Flag or international red over white. Medical Officer boards vessels at anchor and before entering Inner Harbour. Crew Lists with vaccination dates against smallpox, yellow fever and cholera if vessel from infected places. Health clearance given at Port Victoria only. Hospital facilities available. Vessels proceeding to the inner harbour may be disinsectised.

RADIO: Cable and Wireless, Port Victoria, Mahe. Call sign ZCQ. Harbour Control equipped with VHF, Channels 16, 12 and 6.

TUGS: One twin-engine 2,000 b.h.p. tug in full operation. Vessels of up to 650 ft. are able to berth alongside.

BERTHING: Due to limited space no berth can be reserved either alongside or at anchorage. All assistance given to position every ship in best available place.

Mahe Quay (New deep water port) is now in full operation. Two vessels can berth alongside. Berth No. 1 is allocated to oil and cement tankers and Berth No. 2 to cargo and passenger ships. Maximum depth of water at all berths is 35 ft. There are connections for fuel, fresh water and telephones at all berths. Passenger terminal, Port Offices and Customs are situated at the New Port area.

A tanker berth at Seychelles International Airport supplies fuel to the Airport.

STEVEDORES: ETA advice required two to three days before ship's arrival in port. Loading and Discharging: General Cargo: average 8 to 10 t.p.h. per gang (subject weather conditions). Bagged Cargo: average 10 to 15 t.p.h. per gang (subject weather conditions).

TANKERS: Usual safety requirements. Max. length 570 ft. Discharge throughout 24 hrs. Discharge line 6 in.

DENSITY: Average 1025 at all states of tide.

FRESH WATER: In good supply. By mains when alongside and steel barges when at anchor. All water supplied is chlorinated. One special steel water barge with capacity of 80 tons with pumping capacity of 40 t.p.h. Vessels should request water at least 72 hours before arrival.

FUEL: Marine diesel, viscosity Redwood 42 secs. at 100° F. Gas oil viscosity Redwood 35 secs. at 100° F. Due to limited stock, it is advisable to give one week's notice, preferably through Shell International, London.

GANGWAY/DECK WATCHMEN: Customs Officer on duty at all times if vessel is discharging cargo.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CUSTOMS ALLOWANCE: At Custom Officer's discretion.

CARGO GEAR: All cargo slings and gears supplied by ship.

IDENTIFICATION CARDS: See"Shore Leave".

CONSULS: Madagascar, Netherlands, Norway, Sweden, Denmark, Finland and Iceland.

REPAIRS: Only minor repairs to deck: gas welding, pipe bending, etc.

DRY DOCKS: None.

REPATRIATION: Crew changes for British ships and nationalities represented. Repatriations for same by Agents.

AIRPORT: In operation. Several flights weekly.

TIME: GMT plus 4 hours, throughout year.

HOLIDAYS: New Year (1st and 2nd); Good Friday; Corpus Christi (15th August); Labour Day (May 1st); Liberation Day (June 5th); Independence Day (June 29th); Assumption Day (August 15th); All Saints' Day (November 1st); Immaculate Conception (December 8th); Christmas Day (December 25th).

POLICE/AMBULANCE/FIRE: Police 22011; Fire 2555; Ambulance 2555.

A telephone is placed on board ships alongside. Rate as follows: Warships Rs 40/- per day. Other ships Rs 30/- per day.

SERVICES: No tank-cleaning equipment, no facilities for discharge of tank washing, no compass adjusting, radar or radio engineer available for small repairs.

SHORE LEAVE: All members of the crew are allowed ashore. No limit to shore leave. Crew to be in possession of identity card or discharge book.

DELAYS: Berthing: limited berth. Loading or discharging: weather conditions. Bunkering: space alongside.

REFUSE: No refuse to be dumped in the harbour and approaches. When alongside Mahe Quay, adequate bins for garbage collection are available on the quay.

AUTHORITY: Port Department, Ministry of Transport.

NOTES

Please also advise Shipping Guides Ltd.

Sierra Leone

FREETOWN: 08.30 N. 13.14 W (See Plan Book)

DOCUMENTS:

5 Crew Lists.
5 Ports of Call Lists.
5 Passengers in Transit Lists.
5 Passengers Landing Lists.
1 Crew Declaration (signed by Crew members).
1 Store List.
1 Arms Ammunition List.
1 Port Health Declaration.
1 Vaccination List (smallpox, cholera and yellow fever).

Port Health Declaration, Crew Declaration Form and Arms and Ammunition List, all special forms, which obtained from boarding party or, if required, mailed in advance to ship's owners.

1. *For vessels working cargo (discharging):*
   (a) From each port of loading, by air mail to vessels Agent: 2 copies of Cargo Manifest, 1 copy of Freighted Manifest.
   (b) On arrival: 5 copies of Cargo Manifests, 1 copy each Bill of Lading (non-negotiable).

Note: Customs and Port Authority insists on documents in English, and that Manifests should show weights and measurements. Non-compliance with these instructions places vessel's Agent in difficult position, and vessel may not discharge without payment of fine.

2. *Required by Port & Stevedores for vessels working cargo:*
   4 copies Stowage Plan, 4 copies Hatch Lists. List of all lifts over 3 tons.

PILOTAGE: Vessels may at present enter and leave port anchorage without Pilot. Pilotage only compulsory for vessels berthing alongside Queen Elizabeth 2nd Quay or Kissy Oil Jetty. Upon Master's request, Pilot available at Fairway Buoy with 24 hours notice. Normally only at daylight hours. Port entrance is between Cape Sierra Leone to South and Fairway Buoy to North. Is approx. 1 mile wide and min. draft 36 ft. To West harbour is protected by sand shoals, nearest to entrance is O'Farrell Shoal about 1.5 mile North of Cape Sierra Leone.

Pilots board from a launch painted black, with white superstructure, with letter "P" on each bow.

Aberdeen Signal Station will give an anchorage to every vessel arriving or, if a vessel is berthing on arrival, will advise where the Pilot is boarding. This is normally off the quay. The Signal station is equipped with VHF, standing-by on Channel 16, switching to Channel 12 for communication.

The Pilot Office, Queen Elizabeth II Quay, is also equipped with VHF, standing-by on Channel 16, switching to Channel 12 for communication. The Port Operations Manager is available on this link.

ANCHORAGE: With Falconbridge Point Beacon bearing as follows (all bearings true): Note: Falconbridge Point Beacon circular steel tower 8 ft. high, painted white with 2 horizontal black bands; Fl. white every 2 seconds.

Anchor Berth	*Bearing (T)*	*Distance (Cables)*

With Cline Point bearings as follows

Anchor Berth	*Bearing (T)*	*Distance (Cables)*
D. 1	232	5.5
D. 2	253	7
D. 3	253	3
D. 4	273	5.5
C. 1	244	4
C. 2	270	5
B. 2	280	7.25

With Kissy Oil Jetty bearing as follows

Anchor Berth	*Bearing (T)*	*Distance (Cables)*
B. 2	235	1 mile

No draft restriction at anchorage, also no length and beam restrictions and vessels can arrive and sail any hour day and night.

RESTRICTIONS: *Draft Limits for Deep Laden Vessels:*

(Draft Limits: 38 ft. (11.6 m.) plus height of tide to a maximum of 48 ft. (14.6 m.).

Time Limits:

1. From 5 hours flood tide to high water.
2. From low water to 1 hour Flood Tide.
3. During hours of daylight only.

Vessels of 36 ft. draft and over must keep to the time limits.

Vessels of under 36 ft. draft may navigate the channel at any time but attention is drawn to the strong cross currents.

(H.M.S. Hydra has commented strongly on this danger).

HEALTH: Pratique by radio or on boarding. See "Agents Cable Requirements".

RADIO: *Freetown Radio, Coast Station:*

Watch is maintained on 500 kc/s from 0700–2200 hrs. GMT on week-days, and 1200–1400 hrs. GMT on Sundays and Public Holidays.

The working frequency is 421 kc/s and traffic lists are broadcast on this frequency after preliminary announcements on 500 kc/s at 0730, 0830 hrs., etc.: up to 2130 hrs. GMT. On Sundays and holidays, traffic lists are broadcast at 0800, 1200 hrs. and 1700 hrs. GMT.

Time GMT	*9LL Freq.*	*Search-band for reply*
0800–0900 hrs.	6411	6 mc/s
1300–1430 hrs.		
1700–1830 hrs.		
0900–1000 hrs.	8710	8 mc/s
1200–1300 hrs.		
1830–2000 hrs.		
1000–1100 hrs.	13042.5	12 mc/s
1530–1700 hrs.		

On Sundays and other holidays the H.F. Schedules are as follows:—

0830–0900 hrs.	8710	8354 to 8374 kc/s
0930–1000 hrs.	13042.5	12531 to 12561 kc/s
1330–1400 hrs.	6411	6 mc/s
1600–1630 hrs.	13042.5	12531 to 12561 kc/s
1700–1730 hrs.	8710	8354 to 8374 kc/s

Traffic lists are broadcast at the commencement of every HF Schedule and repeated at intervals during the Schedule.

Ships Radio telephone and Harbour Service: Watch is kept on 2182 kc/s for casual R/T traffic from 0800–2000 hrs. GMT on weekdays, and 0800–1730 hrs. GMT on Sundays and holidays.

Ships are advised to arrange their calls in advance by W/T where possible so it can be ensured that the called party is available. Calls can be connected to or from any number on the Freetown Telephone Exchange. Longer range contacts should be in the 8 mc/s maritime band, the frequency of 9LL in this band being 8768.9 kc/s.

Other Services: Navigational warnings issued from time to time by the Harbour Master are broadcast on W/T. Spoken telegrams are accepted at ordinary W/T rates on RT.

VHF: *Freetown Radio:*

A 24-hour watch is kept on Channel 16 switching to Channel 26 for communication. Calls can be connected to the Freetown Exchange. Masters are advised the fullest use should be made of this service, particularly after office hours and during the early hours of the morning or late at night when no cable service is available. The Authority tugs are also equipped with VHF, watch being kept on Channel 16 switching to Channel 12 for communication. The same is applicable to the Lighterage service, which keeps watch and communicates on Channel 12.

Signal Station	Channel 16
Pilot Office (Freetown Pilot)	Channel 16
Harbour Master	Channel 16

AGENTS CABLE REQUIREMENTS: Masters requested cable ETA as early as possible. Following information required:

(a) For vessels working cargo: 1. Discharge or Loading Hatch distribution. 2. Gangs required. 3. If Explosives on board for Freetown or in transit.

(b) For vessels bunkering: Bunkers and water required.

(c) For Tankers discharging: 1. Total Displacement. 2. Draft. 3. Cargo particulars (quantity and grade).

(d) For vessels embarking/disembarking krooboys: 1. If krooboys provisions required and for how long. 2. Cash requirements. 3. If service on arrival if arriving between 2200 hrs. and 0700 hrs., bearing in mind the high costs for Customs overtime and port service.

(e) In general: 1. Cash requirements. 2. Water requirements. 3. Medical attendance, if required on arrival.

When ETA received and confirmed agent will cable vessel informing despatch prospects and if not berthing on arrival, anchor berth.

Note: For vessels returning to Freetown from round trip to coast, information should be cabled if any over-carried cargo, etc., to be discharged.

TUGS: 2 seagoing tugs available, *Sewa* (2,200 h.p.) and *Bintimani* (2,200 h.p.). Both are twin-screw with diesel engines and are equipped for salvage having fire-fighting equipment and a 10-ton derrick. Normally 1 tug used for berthing and unberthing operations, but 2 if necessary. Charges for berthing and unberthing include use of 1 tug, whether required or not.

BERTHING: All alongside berths: between hours of 0630 and 2330. Kissy Oil Jetty; max. displacement – 46,000 tons, max. draft 39 ft., berthing flood-tide only.

Queen Elizabeth II Quay No. 1: Berthing length: no restriction; breadth: no restriction; max. draft 31 ft. 6 in. At this draft vessels must be 180 ft. from steps East end of quay. Vessels up to draft not exceeding 24 ft. may berth as far East as steps. Unberthing not permitted from 1 hour after high water until 1 hour after low water.

Berth No. 1A: As for Berth No. 1, max. draft 31 ft. 06 in.

Berth No. 2: Berthing and unberthing, length and breadth no restrictions. Max. draft 31 ft. 06 in. No tidal restrictions.

Berths No 3 and 4: Max. draft 32 ft. 06 ins.

Berth No. 5: Max. draft 31 ft. 06 in.

Berth No. 6: Max. draft 29 ft. 06 in.

Facilities for loading Palm Kernel Oil available only at Berth No. 1.

Bulk Grain: No. 1 Berth is equipped for discharging grain in bulk through a conveyor built on No. 1 Shed to the Flour Mill. The actual discharge is effected by mobile vacuvators. Four such units are available with total potential of 80 t.p.h., though a more realistic figure would be in the region of 60–70 t.p.h. Grain vessels are worked around the clock.

King Tom Jetty: Berthing *not* allowed.

Dispensation will only be granted in exceptional circumstances to berth or unberth vessels before 0600 hrs. and after 2330 hrs.

During discharging and/or loading, Customs Officers, normally 2, as well as 2 Port Authority Discrepancy Clerks (only when discharging) will be on board.

Sherbro River: Anchorage daylight only. Length of vessel up to 470 ft. Breadth, no restrictions. Max. draft, 24 ft. 06 in. The passage between No. 1 Buoy and No. 8 Buoy and between No. 1 Buoy and Yangsai anchorage must be navigated in daylight hours only.

The Channel between Buoy Point and Yangsai must be navigated only during period 2 hours to H.W., and on a rising tide, buoy point being area which restricts draft. Bagru River Anchorage Buoy 8, length and breadth unlimited. Max. draft 24 ft. 06 in. Limitations as regards vessel's dimensions, drafts and times at which movements may be carried out should not be deviated from without prior permission of the Harbour Master.

MECHANICAL EQUIPMENT:

Type	*Capacity*	*Complement*
Portal Quay Crane	3 tons	2
Portal Quay Crane	5 tons	1
Mobile Crane	15/30 tons	1
Mobile Crane	4 tons	9
Mobile Crane	5 tons	2
Mobile Crane	7 tons	2
Fork Trucks	10 tons	1
Fork Trucks	4,000/5,000 lbs.	34
Tractors	—	15
Trailers	6 tons	17
Trailers	8 tons	1
Trailers	10 tons	12
Trailers	20 tons	18
Trailers (Pole)	10 tons	2
Landrover Fire Engine	—	1
Container Handlers	26 tons	2

Berths 3 to 6 are not equipped with Portal Cranes.

DANGEROUS CARGO: Dangerous cargo, explosives, small arms, ammunition, *must not* be unloaded either alongside or into lighters unless Port Authority has been notified on approved form, and has given permission for cargo to be discharged. Vessels should cable prior arrival if dangerous cargo for discharge on board.

LIGHTERAGE: Lighterage operations have now virtually ceased to exist.

A specially fitted pontoon (PM2) is available for the disembarkation/-embarkation of Kroo labour for vessels at anchorage. This service is available throughout the day and night, as is the water supply by barge.

STEVEDORES: (See "Agents Cable Requirements") ETA as soon as possible. Discharge/loading hatch distribution. Gangs required. Bunkers and water requirements information re explosives. For tankers discharging — total displacement and draft. Work ashore undertaken by Sierra Leone Ports Authority on cargo quay, Queen Elizabeth II Quay, whilst work on board as well as discharging and/or loading to or from vessels at stream undertaken by Sierra Leone Ports Authority stevedoring division.

Working hours alongside quay: Normal working hours from 0800 to 1200 and 1330 hrs. to 1700 hrs. Monday to Friday.

No meal-break but the hour 1200 to 1330 hrs. counts overtime.

Working at Stream: Discharging and/or loading to or from vessels effected 24 hours a day. Gangs can be arranged at anytime between 0730 hrs. and 1800 hrs. week-days. On Sundays and holidays work must be arranged on the previous day.

MEDICAL: Hospital facilities available.

TANKERS: *Kissy Oil Jetty:* In order that berthing/unberthing operations at Kissy Oil Jetty are carried out without delay Agencies are requested to furnish to the Harbour Master the following particulars, of vessel using Kissy Oil Terminal.

ETA: At least 24 hrs. notice to be given.

Displacement and deadweight: The max. permitted displacement is 46,000 tons.

Draft forward and aft: Max. draft 11.90 m. (39 ft.).

Length overall: No restriction.

The time of berthing will be at the discretion of the Port Authority, dependent on tidal and weather conditions, and vessels draft. This is normally on a flood tide and during daylight hours only.

In view of the strain experience on the forward back springs during ebb tide on above-named jetty, vessels are to moor using double or more forward back springs. This is necessary to avoid any damage to the discharge/loading arms on jetty.

DENSITY: 1018 to 1025.

FRESH WATER: Good fresh water is available at all quay berths and at Kissy Oil Jetty. There are also 2 water barges with a total capacity of approximately 350 tons.

(Supply Rates:—	Old berths	Approx: 20/25 t.p.h.
Dependent on	New berths	Approx: 40/50 t.p.h.
Ships intake)	Kissy Oil Jetty	Approx: 15/20 t.p.h.
	Barges	Approx: 25/30 t.p.h.

FUEL: A 24 hour Shell/Mobil bunkering service is available at all berths. The supply rate is up to 200 t.p.h. dependent on ships intake.

The supply rate at Kissy Oil Jetty is 100 t.p.h. Thin fuel oil is not available at the latter jetty but is obtainable at Queen Elizabeth II Quay.

A limited supply of Gas Oil (Shell) is available ex-bowsers on the Quay berths. Sufficient notice should be given to the Oil Company for this service.

Texaco/BP supply bunkers to vessels at anchorage with 3 barges of 750 tons capacity each supply rate 200 t.p.h. 1 of their tugs also has a storage capacity of 40 tons.

A 24-hour Pilotage service is available (including Pilotage from the Fairway Buoy if requested) for all vessels requiring bunkers only.

GANGWAY/DECK WATCHMEN: Strongly recommended, available through Agent.

OPENING/CLOSING HATCHES: By stevedores, except mechanical hatches.

CERTIFICATES:
Ship's Register.
Deratisation Certificate.
Deck Passengers Certificate.
Radio Certificate.

CUSTOMS ALLOWANCE: Tobacco, 40 cigarettes *or* 0.25 lb tobacco. Wine and/or Spirits, 0.25 bottle of spirits. Master — 200 cigarettes and one opened bottle of spirit.

IDENTIFICATION CARDS: Not required.

CONSULS:

REPAIRS: All repairs if spares supplied.

DRY DOCKS: No dry docks in Freetown. Slipway of 600 tons capacity.

REPATRIATION: Can be arranged.

AIRPORT: By bus and ferry to Lungi Airport, 1 hour journey. Served by regular airlines.

TIME: GMT throughout year.

HOLIDAYS: Several religious and anniversary holidays. Port works every day except Good Friday and Christmas Day.

POLICE/AMBULANCE/FIRE: For all emergencies dial 009.

TELEPHONES: Not available for placing on board.

GENERAL: Always confirm time of entering harbour with the Aberdeen Hill Signal Station to ensure turn for berthing. Draft should be indicated.

SERVICES: Tank cleaning. Tank and hull scaling.

SHORE LEAVE: Allowed. Identity cards must be carried.

DELAYS: Berthing, loading or discharging — up to 1 day. Bunkering — up to 12 hours.

DEVELOPMENTS: It is the Port Authorities intention to surface the front and rear stacking areas at Berth Nos. 5 and 6 for use as a container park.

A new shed of approximately 53,000 sq.ft. is under construction and should be ready early 1981.

AUTHORITY: Sierra Leone Ports Authority. Managers: Waportman International Ltd.

AGENT: Sierra Leone National Shipping Co. Ltd., 1 College Road, P.O. Box 935, Freetown, Sierra Leone. Telex: 3273, 3212. Cables: Elship, Freetown. Telephone: 5639, 5283.

PEPEL: 08.34 N. 13.04 W.

IMPORTANT: SEE "AUTHORITY".

LOCATION: On Sierra Leone River, 15 miles upstream from Freetown. Approach Channel between Freetown anchorage and Pepel is fully buoyed. No night navigation.

DOCUMENTS: See "Freetown".

PILOTAGE: Private pilotage undertaken by mining Company's Pilots who board Freetown anchorage, 48 hours ETA required, cable "Mags Freetown Sierra Leone", giving ETA Fairway buoy, quantity water/fuel required, asking free pratique, and if Pilot required to Freetown anchorage.

ANCHORAGE: See "Freetown".

RESTRICTIONS: Draft only, decided at discretion of Berthing Master. Entry daylight hours only. Channel between Pepel and Freetown is now deepened so that depth in channel is 38 ft. plus height of tide. According official tide tables, range of high tides is approximately 7 ft. to 11 ft. above Admiralty Chart Datum.

MAX. SIZE: Length 840 ft., beam 128 ft., depth water 38 ft. plus height of tide which ranges from 7 to 11 ft. above Chart Datum. September to December additional draft restrictions due channel silting.

HEALTH: See "Freetown". 48 hours advance warning for free pratique.

TUGS: Not used.

BERTHING: Milton Margai Pier only. Loading up to 3,000 t.p.h. according to size of vessel.

New dolphin mooring system installed to permit handling larger ships. Depth alongside 45 ft.

Shiploader max. boom height when in horizontal position is 71 ft. above Chart Datum, with max. outreach 87 ft. from berthing line. Loading rate now increased to 4,000 t.p.h.

Under the new conditions, limiting dimensions for ships (which must be equipped with satisfactory mooring equipment): Length overall 840 ft. Moulded breadth 128 ft.

Allowance must be made for safe navigation, permissible sailing draft of all ships will, as at present, remain absolutely at discretion of Berthing Master at Pepel or his deputy. It is possible that yearly during the months of September to December an additional draft allowance will have to be imposed by reason of seasonal silting of the channel, but it is intended to carry out annual maintenance dredging.

Company will be prepared to consider acceptance of ships having dimensions in excess to those above but only after specific approval of fully detailed plans of each ship concerned and, in any event, not in excess of dimensions. Length overall 870 ft. Moulded breadth 136 ft. Moulded depth 73 ft.

Berthing displacement 63,000 tons on an even keel ballast draft of 23 ft. forward and aft on berthing.

STEVEDORES: Available.
FRESH WATER: Available, 48 hours notice required.
FUEL: Limited supplies available, 48 hours notice required.
TIME: GMT throughout year.
TELEPHONES: None available.
SHORE LEAVE: Not allowed. Customs and Immigration regulations prohibit any member of crew from disembarking at jetty or other works.
DELAYS: First come first served.
GENERAL: See "Freetown" for all general information.
AUTHORITY: The Sierra Leone Development Company Limited (In Liquidation), P.O. Box 491, Freetown, Republic of Sierra Leone. Telephone Freetown 24139.

(The Sierra Leone Development Co., Ltd. went into voluntary liquidation in 1975. A Care and Maintenance Party is stationed at the Port of Pepel maintaining the shiploading plant in operational condition). It is not known when the port will re-open.

At the time of liquidation, the conditions above existed.

NOTES

Please also advise Shipping Guides Ltd.

Singapore

SINGAPORE (incl. Jurong, Pulau Bukom, Pulau Ayer Chawan, Sembawang and Tanjong Penjuru):
01.16 N. 103.50 E. **(See Plan Book)**

DOCUMENTS:
4 Ship's Passenger Lists.
4 Crew Lists.
5 Cargo Manifests.
Customs Declaration of duty free liquor and tobacco Form (C and E 117) to be furnished by Master to Customs boarding officers.

Master, mate, or authorised officer required to furnish information asked for by Officer i/c of Customs Boarding Party for Boarding Officer's Report (this only required if ship is to be searched).

Immigration: 4 copies Crew List and 2 copies each of Disembarking and Through-passenger Lists on arrival. At departure, 2 copies Crew List and 2 copies Passenger List.

Declaration regarding presence on board of any stowaway, unauthorised person and/or repatriate.

PSA: All vessels: General Declaration on arrival or departure.

Port Health: Entry Declaration. Deratisation or Exemption Certificate. Vaccination Certificate requirements. Smallpox: from all countries, except children under 1 year of age if they arrive from a non-infected area or under 6 months of age if they arrive from an infected area.

Crew Lists. Passenger List.

PSA (The Port of Singapore Authority): Arms and Explosives, and Dangerous Goods and Petroleum Declaration.

TRAFFIC LANES:
Inwards only

1. *The Sisters Fairway* is the navigable water bounded by the line drawn from Beacon No. 15 (Terembu Selegi) to the Northern extremity of Pulau Tekukor, thence from the Southern extremity of Pulau Tekukor to the Northern extremity of West St. John's Island to position Lat. 01° 12′ 33″ N., Long. 103° 50′ 30″ E., thence to Beacon No. 15 (Terembu Selegi).

2. *The Middle Channel* is the navigable water bounded by the line drawn from the charted position of Sisters Buoy to position Lat. 01° 12′ 09″ N., Long. 103° 49′ 19″ E., thence to position Lat. 01° 12′ 16″ N., Long. 103° 49′ 41″ E., thence to position Lat. 01° 13′ 09″ N., Long. 103° 48′ 41″ E., thence to the charted position of Sisters Buoy.

Outwards only

3. The Jong Fairway is the navigable water bounded by the line drawn from the charted position of Sisters Buoy to position Lat. 01° 12′ 09″ N., Long. 103° 49′ 19″ E., thence to Beacon No. 45, thence to Pulau Jong Triangulation Station, thence to the charted position of Sisters Buoy. Only those vessels which are inward bound and owing to their draft and other considerations preclude the safe use of the above mentioned *INWARD CHANNELS* may use the Jong Fairway.

Eastbound and Westbound

4. *The Southern Fairway* is the navigable water bounded by the lines drawn from Beacon No. 45 to the Southern extremity of West St. John's Island, thence to Peak Island Light Beacon, thence with Beacon No. 39 in transit with Peak Island Light Beacon to the Southern port limit, thence Westwards along the port limit until Beacon No. 45 bears 313°, thence along that line to Beacon No. 45. The Southern Fairway is to be considered sub-divided by a median line extending from the Western limit to the Eastern limit of the fairway.

The Southern Fairway is designated for the passage of vessels as follows:

(a) Vessels from sea East/Eastern sector of the port proceeding to the Western sector to keep Northwards of the median line:

(b) Vessels from the Western sector of the port bound for the Eastern sector to keep Southwards of the median line;

(c) Vessels from the Western sector of the port bound for the sea East to keep Southwards of the median line and to proceed beyond the Easternmost limit of the Southern Fairway. Vessels after having proceeded beyond the Easternmost limits of this Fairway shall enter Main Straits only when it is safe and practicable to do so.

Vessels proceeding from/to the following areas need not follow the Southern Fairway but may proceed as stated:

(a) Vessels from sea Westbound for the Western sector of the port via the Middle Channel or Sisters Channel may cross the Southern Fairway when it is safe and practicable to do so.

(b) Vessels from the Western sector of the port bound for sea West may cross the Southern Fairway and on reaching the port limit enter the Main Straits when it is safe and practicable to do so.

PILOTAGE: Compulsory in Keppel Harbour, including East Lagoon, the Western sector and Sembawang from Johore Shoal Buoy to the Causeway. Request for Pilot must be made not less than 6 hours before arrival. Confirmations of arrival and amendment of ETA must be further notified to "Singapore Port Operations" not less than 2 hours before arrival. Telegraphic Address: PORTMASTER SINGAPORE. VHF Singapore Port Operations Channel 20 or 12.

Pilot Boarding and Disembarkation Grounds:

(a) Eastern Boarding Ground: 2.5 miles East of Sekijang Pelepah (St. John's Island Lighthouse).

(b) Western Boarding Ground: 1 mile S.W. of Sultan Shoal Lighthouse;

(c) Southern Boarding Ground: South of Beacon No. 45 within Port Limits (used only by special arrangement); and

(d) East Johore Straits Boarding Ground: S.E. of Johore Shoal Buoy in position 01° 18′ 00″ N., 104° 05′ 30″ E.

ANCHORAGES: Masters are required to notify "Singapore Port Operations" on Channel 12, their final anchoring positions giving bearings and distances from the following positions: Fullerton Lighthouse (Eastern sector), Tg Rimau Light (Rimau Beacon) – (Western sector), Sultan Shoal Lighthouse – Jurong Special Purpose Anchorage. Ships changing their location within port limits are also required to report their new positions. Ships leaving should report their departure time prior to leaving.

Orders for Pilots will be declined to vessels in the anchorages which have not reported their positions.

USE OF ANCHORAGES FOR VESSELS ARRIVING FROM EAST AND WEST:

1. Vessels arriving from the East and requiring Health and/or Immigration Clearance must make use of the Eastern Immigration/Quarantine Anchorage.

2. Vessels arriving from the West and requiring Health and/or Immigration Clearance must make use of the Sultan Shoal Immigration/Quarantine Anchorage.

3. After Immigration/Quarantine Clearance, vessels arriving from the East are to make use of the appropriate Eastern Anchorage and vessels arriving from the West are to make use of the appropriate Western Anchorage.

4. Vessels that do not require to be cleared at the Immigration/Quarantine Anchorages (i.e. Radio Provisional Pratique/Advance Immigration Clearance) and require to proceed to an Anchorage/Berth, shall on arrival, proceed directly to the appropriate Eastern Anchorage if they arrive from the East or to the appropriate Western Anchorage if they arrive from the West.

N.E. Monsoon (Approximately December to March).

5. The use of the Eastern Immigration/Anchorage will cease.

6. Vessels arriving from the East are to make use of the Western Immigration/Quarantine Anchorage.

7. Vessels arriving from the West are to make use of the Sultan Shoal Immigration/Quarantine Anchorage.

8. After Immigration/Quarantine Clearance:—

(a) Vessels have the option to work cargo in the Eastern or Western Anchorages.

(b) The Western Working Anchorage is reserved exclusively for vessels working cargo or waiting to go alongside within 24 hours of arrival.

(c) All other vessels not working cargo must proceed to their proper anchorage in the Eastern Anchorages.

9. Owners/Agents of vessels who are unable to comply with the requirements stated above due to draft and length restrictions or any other constraints are requested to refer to Port Operations for an alternative Anchorage for their vessels.

MAX. SIZE: Length, no restrictions. Breadth, no restrictions. Draft, Keppel Harbour 33 ft. at zero tide; Empire Dock 28 ft. at zero tide; Jurong Wharves being dredged to 38 ft. at zero tide.

Oil Installations: see "Tankers".

CLEARANCE: The Master of any vessel entering Singapore may apply for radio pratique to the Port Health Office through his local Agent, not less than 12 hours or more than 24 hours prior to arrival in Singapore (exceptions allowed).

All applications should be accompanied by answers to the Port Health Questionnaire.

Free Radio Pratique will not be granted in the following cases:

(a) Vessels with a case or suspected case of infectious disease on board.

(b) Vessels with a dead body on board.

(c) Vessel which has visited plague-infected ports during the current voyage.

(d) Passenger vessels, other than those approved by Public Health Officer.

The provisional pratique by radio is a quarantine clearance by the Port Health Officer on duty. The clearance permits a vessel to proceed directly to berths or working anchorages and begin normal business activities without the inspection of the Port Health Officer.

The granting of radio pratique clears the vessel only as far as the Port Health Officer is concerned, and it neither exempts the vessel from the requirements of other government agencies prior to commencing operations, nor a vessel from quarantine inspection and other control measures, subsequently deemed necessary by the Port Health Officer.

Vessels wishing to communicate with the Port Health Officer should do so on VHF Channel 14.

All ships other than gazetted mail ships, arriving within 5 days of departure from a smallpox infected port, or from a plague infected territory, should await health clearance at Quarantine Anchorage displaying appropriate signals.

All ships with suspected infectious disease on board should radio information to Port Health Officer and await clearance at Quarantine Anchorages. All vessels from infected ports upon arrival are required to anchor in Eastern Quarantine Anchorage or Sultan Shoal Quarantine Anchorage, where appropriate (alternatively Western Quarantine Anchorage during the N.E. 'monsoon, approx. December to March), unless Health and Immigration exemption have previously been granted. Vessels from non-infected ports can obtain free pratique. Vessels from infected ports must fly "Q" flag for Port Health. Vessels must also fly pennants 2 over 5 (alternatively 3 over 4 when there are passengers aboard) for immigration.

Corresponding night lights red over white for Port Health and 2 green for Immigration. Once vessel has been cleared by Port Health and/or Immigration she must proceed to appropriate berth/anchorage. On sailing, unless exemption granted, vessels must return to Principal Anchorage for Immigration Clearance; 2 hours notice required of departure.

The Port Master, Port of Singapore Authority has issued the following regulations regarding vessels requesting Immigration and Port Health Clearance:

(1) All Masters, Owners and Agents are reminded that vessels when requesting Immigration and Port Health Clearance must anchor in the designated Immigration and Quarantine Anchorage and exhibit the appropriate signals.

(2) The Senior Health Officer has advised that delays have occurred due to ships not anchoring at the designated anchorage or not displaying quarantine signals.

(3) Failure to comply with the above may result in action being taken against the vessels.

RADIO: Medium range (HF) telephone service is available continuously and normally provides satisfactory communication up to a range of about 800 miles. Ships wishing to contact Singapore Radio may do so on any of the following carrier frequencies:

Station	*Call sign*	*Frequency* kHz *Coast*	*Ship*	*Hours*	*Remarks*
Singapore Radio	9VG4	2182	2182	24	Call, reply and Safety
	9VG40	4434.9	4136.9		
	9VG8	6204	6204		
	9VG5	2760	2527	24	Working
	9VG38	4364.7	4066.1		
	9VG43	8751.2	8217.2		

After establishing contact, the call will be booked and both stations will change to one of the following Frequencies prior to connection with the Subscriber:

Station	*Call sign*	*Frequency* kHz *Coast*	*Ship*
Singapore Radio	9VG39	4377.4	4078.8
	9VG44	8757.6	8223.6
	9VG45	8799.2	8265.2

VHF:

Public Correspondence	24	28	For connection to Singapore Telephone Exchange

TUGS: PSA operates 14 tugs – 3 of 3,000 b.h.p., 4 of 2,500 b.h.p., 2 of 1,200 b.h.p., 2 of 1,000 b.h.p., 2 of 900 b.h.p. and 1 of 650 b.h.p. Shell operates 2 tugs approximately 1,500 b.h.p. A number of privately owned salvage tugs make the port their base.

Tugs join anywhere in port limits by pre-arrangement with Pilots. Normally ship's line used. All PSA and Shell tugs carry tow ropes for use if required. PSA charge for use of tow rope.

BERTHING: Vessel's Agents should submit to Authority a Schedule "A" (Application for Berth) giving overall length, maximum draft alongside, ETA and ETD of, and Schedule "B" listing out dangerous cargo on board vessel at least 48 hours before berth required.

CARGO HANDLING FACILITIES: *Keppel Wharves:* Vessels working only general cargo will normally be berthed at the Keppel Wharves. This is the largest of the six gateways of Port of Singapore Authority, having marginal wharves of 4.8 km. that are capable of accommodating 30 vessels at one time. Depth of water 10.10 m. at LW. There are well-ventilated transit sheds and warehouses totalling 170,000 sq.m., and 59,000 sq.m. of concrete hardstanding for open storage.

Container Terminal: Length of 5 main berths 1,554 m., depth 13.4 m. at zero tide. Able to handle 5 third-generation vessels at one time. 10 container quay cranes of 35 tonnes lifting capacity available. Feeder berth length 213 m., draft 9.16 m. for coastal vessels and a cross berth of length 213 m., draft 10.4 m. There are also three freight stations covering an area of 22,100 sq.m. for consolidation and unstuffing of containers. The stacking yard of approximately 14 hectares can accommodate 14,000 containers (20 ft. equivalents) stacked 2 to 5 high.

Bunkering facilities available. Bunker fuel pumped at the rate of 1,000 tonnes per hour through 18 in. (4.6 dm.) diameter mains. There are 15 outlets along the quay with 10 in. (2.5 dm.) tap-offs. Marine diesel and fresh water also available.

Sembawang Wharves: The Port of Singapore Authority operates 5 berths, at the Sembawang Wharves, situated North of Singapore. The length of the berths totals 822.67 m. with minimum depth of 10.4 m. at zero tide covered storage space available totals 51,100 sq.m. It is geared towards handling of low-value, high volume homogeneous cargoes like bulk sawn timber and logs.

Jurong Port: The Port is a bulk-handling facility to serve the Jurong Industrial Estate. The marginal wharves of 1,792 m. with depth 10.92 m. can accommodate 10 ocean going vessels. In addition, there is a 172 m. wharf with minimum depth of 3.1 m. for coastal shipping. There are 77,800 sq.m. of covered storage and 226,600 sq.m. of open storage space.

The terminal has facilities for the discharge of grain (by elevator), sugar, fertilizers, cement, clinker, sulphur, etc. Shore bulk-handling cranes are used.

The equipment includes a kangaroo crane conveyor, unloading capacity of 300 tonnes per hour.

Two gantry type unloader cranes each with capacity of 450 tonnes per hour.

An iron ore hopper/conveyor loading system with a capacity of 304 tonnes per hour.

Grain silos with capacities up to 20,320 tonnes (20,000 tons).

Bulk grain suction – conveyor unloading system with discharge rate of 203 tonnes per hour and loading rate of 101 tonnes per hour.

Pasir Panjang Wharves: 1,421 m. of wharves with minimum depth of 2.3 m. – 6.4 m. which can accommodate 23 lighters, 4 LASH (Lighters-Aboard Ship) barges, and 7 coastal vessels at any one time. There are 4 large modern transit sheds covering 38,000 sq.m., 1 back up shed 22,300 sq. m., 7 warehouses 1,120,401 sq. m. (of these 48,000 sq. m. are outside the free trade zone) and some 35,200 sq.m. of open storage area.

Telok Ayer Wharves: This gateway caters for coastal vessels and lighters/barges. There is a total of 744 m. of wharves for lighters and coastal vessels. With land reclamation carrying on at this place, 5 new berths can accommodate vessels with a draft of up to 6.4 m.

STEVEDORES: Labour should be ordered by 0900 hrs. for 2nd shift (1500 to 2300 hrs.) on same day and by 1300 hrs. for 1st shift (0700 to 1500 hrs.) for next day, by 1100 hrs. for 3rd shift (2300 to 0500 hrs.) on same day.

Under normal circumstances no work is performed during meal hours, 1100–1200 hrs. and 1830–1930 hrs. unless the ship is classified as a "key" vessel or the Agent orders work during the meal hours.

MEDICAL: When infectious disease not suspected, permission will be granted by Port Health Officer to Agent to take doctor on board and remove the case, if necessary, to hospital. Preferably as much notice as possible. Several hospitals, General hospital, Gleneagles, Mt. Alvernia to name a few. Cholera, smallpox, plague, etc., are not endemic in Singapore.

TANKERS: Bunkering and discharge facilities available at Eastern and Western petroleum anchorages or installations at Pulau Bukom. Pulau Ayer Chawan, Tanjong Penjuru, Tanjong Berlayer, Jurong and Pulau Merlimau.

PSA operates a Slop and Reception Treatment Centre at Pulau Sebarok with facilities for the discharge of slops from crude oil, black oil, white oil, tank cleaning and ballast water.

Smoking not permitted during period tanker alongside PSA wharves. Grades permitted for discharge along PSA wharves: (a) marine diesel oil, (b) fuel oil.

Shell

Pulau Bukom – 10 berths and a single buoy mooring. Depth of water in approach is 18.3 m. LWOST. Fresh water, fuel oil, gas oil and diesel oil available.

Berth	*Draft* (m.)	*Max. length* (m.)	*Max. displacement* (tons)	*Remarks*
1	9.75	173.7	33,000	Continuous Jetty
2	9.75	91.4	33,000	
3	10.95	82.3	33,000	
4	12.19	189.0	43,000	
5	12.50	193.6	45,000	
6	14.63	243.8	92,000	
7	12.34	185.9	65,000	
8	12.95	230.1	65,000	
9	13.10	198.1	33,000	
10	15.54	265.0	84,000	Min. length acceptable 172.2 m.
SBM	22.36	—	352,990	

Esso

Refinery on an island Pulau Ayer Chawan 2.4 km. South of Jurong Industrial Complex. Refining capacity of 231,000 barrels per day. Lubricant plant 5,000 barrels per day. The jetty has an overall length of 982.1 m. and consists of 4 loading and bunkering berths.

Berth 1	length 82.4 m.	draft 7.6 m.
Berth 2	length 189.0 m.	draft 10.7 m.
Berth 3	length 244.0 m.	draft 12.8 m.
Berth 4	length 305.0 m.	draft 16.1 m.

Caltex

Operates berths (No. 1 and No. 2) at Tanjong Penjuru which can accommodate vessels alongside up to 13.71 m. max. draft. No. 1 Berth (4 breasting dolphins) capable of handling vessels of any size. No. 2 Berth (4 breasting dolphins) can handle any vessels exceeding 91.4 m. flat sides, up to 32,000 tons displacement and length not exceeding 182.8 m. Night time berthing at the discretion of the Pilot.

Mobil
Provides 4 berths 1,040 m. long for vessels up to 85,000 d.w.t. Night time berthing at the discretion of the Pilot. At No. 3 Berth day-time berthing and unberthing only possible, on flood tide.

Berth 1	14.3 m. LWOST
Berth 2	12.8 m. LWOST
Berth 3	6.7 m. LWOST
Berth 4	6.1 m. LWOST

B.P. Refinery
Refinery with 3 berths situated at Tanjong Berlayer. Small jetty inside harbour known as Jetty No. 2 can receive small vessels up to 1,000 tonnes as water depth only 6.1 m. below ACD.

No. 1 Jetty at S.W. side of Tanjong Berlayer can accommodate vessels up to 33,000 tons at off-shore mooring where dredged channel 10.97 m. below ACD. Berthing cannot be effected for 43 days of year due strong tidal currents.

At Jetty No. 1A which is Northwards extension from Jetty No. 1 trunkway, vessels up to 5,000 tonnes can be berthed; water depth 7.62 m. below ACD. Simultaneous mooring of vessels at Jetties No. 1 and 1A not allowed as floating hose used to connect Jetty No. 1 to ship at mooring buoys.

Singapore Petroleum
Provides 3 berths for bunkering and other services on Pulau Merlimau, an island off the S.W. coast of Singapore. The marine berth can accommodate vessels up to 90,000 d.w.t. and 15.5 m. draft, refining capacity 65,000 barrels per day. Night time berthing at Pilots discretion. Fresh water available ex-pipe-line. Bunkers available by barge or pipe-line.

Gatx Terminals: Vessels berth at marine trestle 1,400 ft. (427 m.) offshore. One berth for vessels up to 85,000 d.w.t. and 1 for vessels of 5,000 d.w.t. 32 operating pipe-lines serve the main berth. The terminal handles chemical, petrochemical and vegetable oils. Total capacity 287,910 barrels in 55 tanks.

Docklines	2× 75 mm. dia.
	1×100 mm. dia.
	26×150 mm. dia.
	3×200 mm. dia.

DENSITY: Usually between 1019 and 1022 unaffected by tide or temperature variations. Variation due to periodic heavy run-off of rain water.

FRESH WATER: Fresh water available at any point of PSA's wharves. PSA also has a fleet of 10 waterboats to supply fresh water to ships anchored within the port limits.

FUEL: All grades available alongside PSA wharves and ex installation, otherwise by barge. Marine diesel oil 40 sec. to 100 sec. Heavy fuel oil 700 sec. to 1,000 sec. Thinned fuel 433 sec. to 450 sec. Blended fuel 200 sec. to 430 sec.

FIRE PRECAUTIONS: Normal precautions with respect to cargo vessels, vessels under repair, etc. Fire boats available. Oil companies apply own regulations at installations.

GANGWAY/DECK WATCHMEN: Recommended, particularly in Roads. Agents normally arrange. Cost varies.

OPENING/CLOSING HATCHES: Conventional hatches by stevedores. Mechanical hatches usually by ship's crew.

CERTIFICATES: If dangerous drugs on board, an export authorisation from country of origin and an import authorisation from country to which drugs being conveyed should be available for sighting and endorsement.

All vessels	Certificate of Registry or Tonnage Certificate. International Load-line Certificate or equivalent.
Passenger ships	Passenger Safety Certificate issued under international Convention for Safety of Life at Sea 1960 or the Simia Rules 1931.
Cargo ships	Safety Equipment Certificate (if over 500 tons gross) or equivalent. Radiotelegraphy Certificate or Radiotelephony Certificate whichever is applicable.

CUSTOMS ALLOWANCE: Tobacco: for crew and transit adult passengers. First day of arrival 50 cigarettes or 15 cigars or other tobacco 60 gms.; and for each subsequent day to the maximum of 7 days. 25 cigarettes or 7 cigars or other tobacco 30 gms.

Wines: 1 bottle per day to maximum of 8 days. Spirits: 0.875 reputed quart (in opened bottles) on first day of arrival and 0.125 reputed quart per day for rest of 7 days. Malt liquors: 1 bottle (beer, stout, etc.).

CARGO GEAR: Possession of valid test certificates. At PSA wharves, if gear appears faulty, an inspection by competent Port Officer may be required.

IDENTIFICATION CARDS: Sect. 22 (1) (c) of Ordinance provides for issue of Seamen's Identification Card as set out in First Schedule to the Immigration Regs. 1966, but rarely issued nowadays. Normally accept passports, discharge books or any identification cards issued by Masters of vessels for purpose of granting shore leave to Crew members, provided these documents sufficiently identify person concerned

Gate Passes issued against crew list at wharves and installations. No passes required from roads, although some form of identification advisable.

CONSULS: Consuls, Embassies and High Commissions. Arab Republic of Egypt, Argentina, Australia, Austria, Bangladesh, Belgium, Brazil, Bulgaria, Burma, Canada, Republic of China, Czechoslovakia, Denmark, El Salvador, Finland, France, Democratic Republic of Germany, Federal Republic of Germany, Great Britain, Greece, Hungary, India, Indonesia, Iran, Ireland, Israel, Italy, Japan, Democratic People's Republic of Korea, Republic of Korea, Malaysia, Nepal, Netherlands, New Zealand, Norway, Pakistan, Panama, Philippines, Poland, Romania, Saudi Arabia, Spain, Sri Lanka, Sweden, Switzerland, Thailand, Trinidad and Tobago, Turkey, Union of Soviet Socialist Republic, USA, Yugoslavia.

REPAIRS: All types of repairs (hull, engine and electrical including navigational aids) carried out. Facilities also available for repairs out afloat while vessel in anchorages.

SURVEYORS: A.B.S., B.V., Det Norske Veritas, Lloyds Register, N.K.K., G.L., N.K.K.K. and Salvage Association.

DRY DOCKS: Several shipyards offering building, repairing and engineering facilities, for example:
Jurong: 2 dry docks: No. 1, length 270 m.; breadth, 40 m.; capacity 90,000 tons d.w.t. No. 2 length 350 m.; breadth 56 m.; capacity 300,000 tons d.w.t. 1 floating dock length 86 m.; breadth 18 m.; lifting capacities 2,000 tons.
Keppel Shipyard: 7 dry docks, the largest of which (301 m.×52 m×10.1 m. depth) can accommodate vessels up to 120,000 d.w.t. A drydock with capacity 330,000 d.w.t. under construction with completion expected in March 1982.
Sembawang Shipyard: 400,000 d.w.t. super graving dock, 100,000 d.w.t. graving dock, 3 floating docks from 5,000 d.w.t. to 30,000 d.w.t. capacities. 1,330 m. of repair berth with 12 m. of water.
Hitachi Zosen Robin Dockyard: 2 drydocks, No. 1: Length 350 m.×60 m.×11.5 m. depth. Max. size: 300,000 d.w.t. No. 2: Length 300 m.×60 m.×11.5 m. depth. Max. size: 170,000 d.w.t. Repair quays and cranes to 80 tons capacity also available.

REPATRIATION: Ships' Agents responsible for repatriating seamen. Mercantile Marine Office undertakes repatriation of distressed British seamen on behalf of Board of Trade, United Kingdom, whenever necessary. Seamen who hold proper documents which ensure entry into their countries of origin, citizenship and destination are normally granted Special Passes after discharge for purpose of repatriation.

AIRPORT: 11.2 km. from city. Regular and frequent services to all parts of the world.

TIME: Singapore time, GMT plus 7.5 hours. No seasonal change.

HOLIDAYS: Work can be arranged on all 10 Public Holidays. New Year's Day; Chinese New Year; Hari Raya Haji; Good Friday; Labour Day (1st May); Vesak Day; National Day (9th August); Deepavali; Hari Raya Puasa; Christmas Day.

POLICE/AMBULANCE/FIRE: City Police 999; Fire/Ambulance only, 328111; Flag signal: CB3. VHF Channels 12 or 16. PSA Police 2712211 ext. 2222; Fire ext. 2209 or ext. 2333; Ambulance 2712211.
Ships requiring Police assistance:
For your information we quote the contents of Port Circular No. 14 of 1977 issued by the Port of Singapore Authority:
1. The shipping community is hereby informed that with effect from 1st April, 1977, vessels within Singapore waters can now directly contact Marine Police for assistance on those matters falling within police jurisdictions.
2. Ships should establish radio contact on:–

VHF Channel	*Hours*	*Ship Tran/Rec Frequencies*	*Call sign (Voice)*
21	24	157.50/ 161.650 mHz	Marine Police

Giving the following information:
(a) Name of ship;
(b) Location of ship in port;
(c) Nature of emergency;
(d) Nature of police assistance required.

3. Ships requesting immediate police assistance shall as soon as possible hoist up the appropriate flag signals by day (International Code "CB3") and light signals by night, (Red-Red-White – Red on top).
4. The vessels are required to sound on her whistle or siren at intervals of about 1 minute 3 long blasts so that marine police on patrol duties are alerted.

TELEPHONES: Available on board vessel at PSA wharves only.

GENERAL: Master of any vessel in territorial waters of Singapore shall obey any signal from a preventive vessel and any instruction from officers of Customs. Customs officers shall have free access to any part of vessel and have powers to mark, lock or seal any dutiable goods on import including sea stores.

SERVICES: Following additional services available: Cleaning and preparing ship's tanks. Cleaning, scaling and painting. Insulation. Interior decorating and furnishing. Refrigeration and air-conditioning. Chemical cleaning of boilers, etc. SCAMP underwater cleaning service.

Services of following Classification Societies available: Lloyds Register of Shipping. Det. Norske Veritas. American Bureau of Shipping. Bureau Veritas. Nippon Kaiji Kyokai. Germanischer Lloyd. Polski Register Stratkow. China Corporation Register of Shipping.

Compass adjusting and DF Calibration. Radar and Radio servicing depots.

SHORE LEAVE: No restriction on crews landing after Immigration and Health formalities have been satisfactorily completed. With rare exception (e.g. CPG Crew), all *bona fide* crew of a vessel allowed shore leave on strength of their passports, discharge books or identification cards.

The following circular was issued in May 1973 by the Singapore Port Authority.

"In line with the Government's decision that action should be taken to deal with the 'long-hair' problem as part of a campaign against undesirable alien influences, the Port of Singapore Authority would be most grateful for your co-operation in implementing this decision by advising all your employees, including ships' officers and Crew members, wishing to come ashore to be more tidy in their general appearance.

"To assist you to decide whether an individual's hair is long, the following definition of long hair may be used as a guide:
(i) Hair reaching below an ordinary shirt collar;
(ii) Hair covering the ears;
(iii) Hair falling across the forehead and touching the eyelashes."

POLLUTION: No oil or mixture containing oil shall be discharged into Singapore waters from any vessel. The Master or person in charge of the vessel committing such an offence shall be liable on conviction to a fine not less than 500 dollars and not exceeding 500,000 dollars or to imprisonment for a term not exceeding 2 years or to both such fine and imprisonment.

No refuse, garbage, waste matter, substance of a dangerous or obnoxious nature or trade effluents to be discharged from any vessel into Singapore waters. The Master or the person in charge of the vessel committing such an offence shall be liable on conviction to a fine not exceeding 10,000 dollars or to imprisonment for a term not exceeding 2 years or to both such fine and imprisonment.

Any person who puts, throws, cast or deposits into Singapore waters, or causes to be put, thrown, cast or deposited there into, any oil mixture containing oil, refuse, garbage, waste matter, carcase, substance of a dangerous or obnoxious nature, or trade effluent, shall be guilty of an offence and shall be liable on conviction to a fine not exceeding 10,000 dollars or to imprisonment for a term not exceeding 2 years or both such fine and imprisonment.

If any oil or mixture containing oil is discharged into Singapore waters:

(a) for the purpose of securing the safety of the vessel or of preventing damage to the vessel or her cargo, or of saving life; or

(b) is found to be escaping, or to have escaped into Singapore waters from a vessel in consequence of damage to the vessel, or by reason of leakage, the Master or the person in charge of the vessel shall report the occurrences to the Director of Marine and the Port Master. Failure to do so shall be an offence and shall be liable on conviction to a fine not exceeding 5,000 dollars.

Slop Reception: The P.S.A. Slop Reception and Treatment Centre at Palau Sebarok has a total tank capacity of 62,000 cu.m. (395,000 barrels).

Berthing facilities consist of 4 piers – Piers 1 and 2, Sludge Pier and Utility Pier.

The depths of water alongside the piers are 7.6 m. (25 ft.), 12.8 m. (42 ft.) and 9.7 m. (32 ft.) at LWOST respectively.

The Centre can accommodate vessels up to an overall length of 264 m. and a displacement of 45,800 tonnes

The average rate of discharge to the storage tanks through the Centre's 0.3 m. (12 in.) pipe-lines is 500 tonnes (490.2 tons) per hour at an operational pressure of 10.6 kg./sq.cm. (150 p.s.i.).

Communications: VHF Station Channel 21. Mobile Radiotelephone – Kapal 57.

Safety and security at the island is well provided and maintained by both the Authority's Police Force and Fire Brigade.

DELAYS: Normally none. Occasional congestion due to prolonged rainy weather or other abnormal conditions.

DEVELOPMENTS: An additional container berth to be constructed at the East Lagoon Container Terminal.

AUTHORITY: Port of Singapore Authority (PSA).

AGENT: Intrasea (Pte) Ltd., Faber House, 234E Orchard Road, Singapore 9. Tel. 2352611 Cables: Freight Singapore. Telex: RS 24010.

NOTES

Please also advise Shipping Guides Ltd.

Society Islands

BORA BORA (Vaitape): 16.31 S. 151.45 W.

DOCUMENTS: All vessels arriving in French Polynesia must first call for clearance at Papeete, or at Uturoa, or at Taiohae. See "Papeete" for documents required.

PILOTAGE: There is no pilotage station at Bora Bora; a Pilot will be provided at Papeete. Vessels are requested to advise their Agents at least 15 days before arrival of their ETA, length and draft of ship. In addition, Masters should confirm their ETA to the Port Captain of Papeete at least 3 days before arrival. Telegraphic address is Capitaine de Port, Papeete.

ANCHORAGE: Vessels may anchor in the port roads in depths of 34-21 m. Good holding ground in sand and coral.

RESTRICTIONS: Night pilotage is impracticable due to the absence of lighted navigation marks.

MAX. SIZE: Length 220 m., beam 30 m., draft 9.60 m.

HEALTH: Vessel should ask for free pratique by radio message to Sante Maritime Papeete, via coast station Mahina. This message to be sent 24 hours before arrival.

RADIO: Mahina Radio, call sign FJA, operating 24 hours a day on 500, 2,182 and 8,230 Khz.

TUGS: No tugs available at Bora Bora.

BERTHING: One quay, (Quai de Farepiti) 132 m. length, situated in Faanui Bay. Depth alongside 7.30 m. This quay was constructed during the 2nd World War and is in poor condition, only used by small warships and yachts. One other quay (Quai de Vaitape) 40 m. long and with depth alongside 4 m. Situated at Vaitape. Used by barges.

MEDICAL: No doctor available, but there is a local infirmary.

FRESH WATER: Not available.

FUEL: Not available.

CUSTOMS ALLOWANCE: No restrictions for crew members, but all tobacco and alcohol must be declared. Crew men going ashore may not take more than 2 packets of cigarettes.

AIRPORT: Situated 7 kms. from Vaitape, only inter-island services.

TIME: GMT minus 10 hours. No change during the year.

HOLIDAYS: See "Papeete".

SHORE LEAVE: Allowed.

AUTHORITY: Chef de Post, Bora Bora.

PAPEETE: 17.33 S. 149.34 W. (See Plan Book)

DOCUMENTS:

Required by Port Health:
Maritime Declaration of Health (form provided by the Pilot).

Required by Police:
Crew List.
List of Passengers Disembarking.
List of Passengers in Transit.

Required by Customs (2 copies of each):
Manifest of Cargo for Discharge.
Provisions List.
Mail List.
Crew Personal Effect List.
Bonded Stores List.
Ship's Spares List.
Crew List.
List of Passengers Disembarking.
List of Passengers in Transit.
List of Animals Disembarking.
List of Animals in Transit.
Complete Cargo Manifest.

Required by Port Captain:
Entry Declaration (form supplied on arrival).
Crew List.
List of Passengers Disembarking.
List of Passengers In Transit.

PILOTAGE: Vessels are requested to advise their Agents at least 3 days before arrival giving their ETA, length and draft of the ship, amount of cargo for discharge and any other requirements. In addition, Masters must give their ETA 24 hours before arrival to Capitaine de Port, Papeete. Pilot station and pilot launches are equipped with VHF and may be contacted on Channel 6 when within 30 miles. Pilot launches have grey painted hull with a white band, with wheelhouse on the fore part. The pilot flag is described as the colours of code flag "W" upside-down. International code flag signals may be used to call Pilot. Pilot boards about 1.5 miles from the entrance channel. There is no anchorage outside the port for ships awaiting a Pilot.

Pilotage is effected from 0500 to 2200 hrs. for entering vessels. For departing vessels, pilotage available up to 2400 hrs.

ANCHORAGE: Vessels up to 170 m. length can anchor in the port roads in depths of 18-25 m. Good holding ground in mud.

MAX. SIZE: Length 250 m., beam 32 m., draft 10.30 m. The Q.E. II, length 294 m. entered and docked in 1978.

HEALTH: Vessels should ask for free pratique by radio to Sante Maritime Papeete, via Coast Station Mahina Radio. This message should be sent 24 hours before arrival. Pratique is automatic for vessels coming from another Polynesian port.

RADIO: Mahina Radio, call sign FJA, operating 24 hours per day on 500, 2,182, 8,281.8 kHz, and on VHF Channel 16.

G.M.T. 0118 hrs. —	8.461 kHz	FJA 8	A1	W/T
G.M.T. 0733 hrs. —	17.040,8 kHz	FLA26	A1	W/T
G.M.T. 0433 hrs. —	8.461 kHz	FJA 8	A1	W/T
G.M.T. 0503 hrs. —	17.040,8 kHz	FJA26	A1	W/T
G.M.T. 0903 hrs. —	4.298 kHz	FJA41	A1	W/T
G.M.T. 0933 hrs. —	8.461 kHz	FJA 8	A1	W/T
G.M.T. 1333 hrs. —	8.461 kHz	FJA 8	A1	W/T
G.M.T. 1733 hrs. —	4.298 kHz	FJA41	A1	W/T
G.M.T. 2018 hrs. —	8.461 kHz	FJA 8	A1	W/T
G.M.T. 2048 hrs. —	17.040,8 kHz	FJA26	A1	W/T

VHF: The Port Captain's Office is equipped with VHF. Watches are kept on Channel 6 when a ship is expected.

TUGS: Tugs join ships as soon as they are in the entrance channel. Generally, tow-lines are not required, as tugs push the vessels only. There are three tugs available up to 1,200 h.p. belonging to the Port Authority, and in addition, there are two naval tugs up to 700 h.p. which may assist if required.

BERTHING: Passenger Quay: 233 m. length, two berths, depth alongside 9 m.

Cargo Quay: 450 m. length, depth alongside 10.50 m.
Fishing Boat Quay: 100 m. length, depth alongside 5.50 m.

STEVEDORES: Cargo information should be confirmed to the Agents with ETA 48 hours before arrival.

MEDICAL: Advance notice required if medical attendance needed on board. Two hospitals available. Passengers disembarking must present a valid vaccination certificate.

TANKERS: One tanker berth, 105 m. long. Max. allowed draft 9.60 m. Discharging hoses are: Mobil Oil 8 in., Standard Oil 6 in.

FRESH WATER: Available from pipe-lines on all quays. Loading rate is 50 t.p.h. at passenger and cargo quays and 30 t.p.h. at the tanker berth.

FUEL: Diesel available subject to 1 week's notice.

GANGWAY/DECK WATCHMEN: Services of shore watchmen are necessary.

OPENING/CLOSING HATCHES: Hatches opened and closed by crew if they are of mechanical type, otherwise the stevedores will perform this operation.

CUSTOMS ALLOWANCE: No restrictions for crew members but all tobacco and alcohol must be declared. Crew members going ashore must not take more than two packets of cigarettes. Passengers disembarking may take 200 cigarettes or 50 cigars or 400 grammes of tobacco and one bottle of alcohol.

CONSULS: The following countries maintain representatives at Papeete:

Austria
Belgium
Chile
Denmark
Italy
Finland
Netherlands
Norway
Sweden

REPAIRS: Woodwork, electrical and welding repairs can be effected. There are 2 floating docks for vessels up to 3,800 tons.

REPATRIATION: Can be effected.

AIRPORT: Tahiti — Faaa Airport is situated 6 kms. from the port. Regular international flights.

HOLIDAYS: 1st January, 5th March (Arrival of the Gospel in French Polynesia), Easter Monday, 1st May, Ascension Day, Whit Monday, 14th July, 15th August, 1st November, 11th November, 25th December. No work is carried out on Sundays or on 1st May. All other holidays can be worked on double overtime rates.

TIME: GMT minus 10 hours. No alterations during the year.

POLICE/FIRE/AMBULANCE: Police 17; Fire 18; Ambulance 2 96 74.

TELEPHONES: Can be installed on board vessels at all quays.

SHORE LEAVE: Allowed without restriction.

AUTHORITY: Capitaine de Port.

Solomon Islands

GIZO: 08.05 S. 156.52 E.

Gizo is the copra and cocoa receiving centre for Western Solomons. Situated on Gizo Island West of New Georgia. Entrance to harbour is beaconed and a jetty with depth alongside of 9 ft. Sheltered anchorage available in 16 fathoms. The British Solomons Trading Company Ltd. provides stevedores and conducts a lighterage handling and warehousing service to Importers and Exporters.

Agents

1 Transit Passenger Manifest.
1 Landing Passenger Manifest.
1 Crew List.

PILOTAGE: 24 hours notice ETA stating number of passengers, dangerous cargo, etc., to Harbour Master, Honiara, via Honiara Radio. Usual signals. Pilot boards from launch about 0.75 mile N.E. Pelope Shoal. Vessels normally berthed port side to. Pilot uses port gangway in calm weather.

ANCHORAGES: East of Port Main Leading Lights. Fl. white and fixed green, in about 20 fathoms; coral bottom.

Local boats are available for transporting crew from anchorage to the shore. The landing stage is at Joanna Jetty on the East side of the main pier at Point Cruz. Height above water level is 2 ft. at high tide and 4 ft. at low tide.

APPROACHES: Approaches free from dangers provided vessels keep at least 2 cables off Point Cruz Beacon, identified by quick flashing red light. On foreshore in front of Shell Oil Storage Tanks is beacon with fixed green light, and above on Vavaya Ridge is white light flashes every 5 seconds from Tower on radio station building. When in line these 2 lights give correct approach to anchorage in 20 fathoms on, or East of, the line. Prevailing winds during S.E. season blow from N.E. direction sometimes reaching force 4 to 5 in early afternoon. During N.W. season direction and force variable generally between North and West up to force 4 and occasionally force 5.

RESTRICTIONS: Berthing in daylight hours only – departure any time.

MAX. SIZE: New Wharf, up to 650 ft. long and max. 29 ft. draft. Old Wharf, up to 200 ft. long and max. 13 ft. draft. Tankers, mooring at buoys, 600 ft. long and 27 ft. 6 in. draft.

HEALTH: Pratique can be obtained by radio. Cable Port Health. Suspect vessels should inform Health Authorities and Harbour Master by radio for doctor to board on arrival.

Cable to Quarantine Officer Honiara between 12 and 4 hours before arrival the following message: "Request Radio pratique negative answers all health questions maritime declaration of health Master." Normally, the P & T Radio Officer may grant pratique immediately whilst he is in radio contact with the ship. After arrival the Health Officer will check for rhinoceros beetle and will clear.

RADIO: Radio Honiara VQJ (Vee Kiu Jay). Watch continuous. kHz 6204, kHz 2182, kc/s 500. GMT Schedule 0020–0030 transmits 11560 kHz receives 8 or 16 mHz.

TUGS: There is a small 100 h.p. tugboat assisting with mooring when necessary.

BERTHING: At Point Cruz, berth length 235 ft., depth alongside 30 ft. Vessel berths port side alongside.

STEVEDORES: At least 24 hours notice, usually 3 gangs, indicate any extra gangs required. To facilitate quick turn around advisable have cargo in middle holds evenly distributed not at extreme end or massed in one hold only.

MEDICAL: Notice should be given in advance if medical attendance required on board. Smallpox vaccination required by all arriving on ship. Inoculations available at clinic on Fridays only. Limited hospital facilities available.

Cholera: Required if arriving from infected area. Vaccination certificates are checked individually by those passengers permanently disembarking.

For all other passengers and the crew ship's doctor must provide a statement advising that all passengers and crew comply with the health regulations and vaccinations required.

In case some passengers have for health reasons not been vaccinated, a letter from their doctor giving reason why no vaccination given must be produced. Passengers will be allowed to go ashore.

Central Hospital, tel. 09–61.
Emergency and Ambulance, tel. 09–33
Doctors, tel. 09–44
Dentist, tel. 09–43

All medical facilities are provided from the Hospital. One private doctor available: Dr. M. Strickland, tel. 770.

TANKERS: Tanker buoys, 8 in. pipe-line, max. draft 32 ft. New Wharf, 4 in. pipe-line, max. draft 27 ft. 6 in. Old Wharf, 4 in. pipe-line, (ADO), max. draft 13 ft.

DENSITY/TIDE: Approx. 1025. Tidal range about 3 ft.

FRESH WATER: At wharf by hoses. 40 t.p.h.

FUEL: Diesel and gas oil available. 48 hours notice, butane gas.

FIRE PRECAUTIONS: Normal fire precautions, with gang standing by with fire pump.

GANGWAY/DECK WATCHMEN: Watchmen to be recommended. Customs provide a preventive office for duty at a charge.

OPENING/CLOSING HATCHES: Stevedores assist crew. Crew to rig gear.

CERTIFICATES: Certificate of Registry.

CUSTOM ALLOWANCE: 200 cigarettes or 0.5 lb. tobacco per crew member. 3 quart bottles of beer per crew member.

IDENTIFICATION CARDS: Required.

CONSULS: Australian.

REPAIRS: Limited facilities only.

DRY DOCKS: Nil.

REPATRIATION: Facilities available.

AIRPORT: Situated approximately 10 miles from the wharf. Air New Guinea have 2 flights per week from Sydney via New Guinea, and Air Pacific have 2 flights a week from Suva via New Hebrides.

TIME: GMT plus 11 hours all year round.

HOLIDAYS: Cargo work can be arranged on all holidays except Christmas Day and Easter period.

POLICE/AMBULANCE/FIRE: Emergency phone numbers: Police 666; Ambulance 933; Fire 299.

SERVICES: Labour can be hired for assistance with painting and cleaning. Other services not normally available. 24 hours notice required.

SHORE LEAVE: Permitted.

VISAS: Transit passengers: not required. Disembarking passengers: require visa for a stay over 48 hours. Visa can be obtained from nearest British Consul.

LANDING CARDS: Only permanently disembarking passengers need special Landing Cards which can be obtained from Immigration Officer on arrival.

WEATHER: Cyclone season December to April, winds N.W. to variable, strength 0–5. From April to November winds are from N.E., strength 4–5.

DEVELOPMENTS: The deep-water berth will be extended by 50 m. shorewards. Work commenced mid-1979.

DELAYS: Nil, except when other ships being worked.

AUTHORITY: Harbour Master, Soloman Islands Ports Authority.

YANDINA: 09.04 S. 159.14 E.

Yandina is situated in Russell Islands and is copra export port for Lever's Pacific Plantations Pty Ltd. A concrete and steel wharf on South side of entrance with length 53.34 m. and minimum depth alongside 6.0 m.

Sheltered anchorage for vessels of up to 500 ft. in length, available in Renard Sound. Lever's Pacific Plantations Pty Ltd. provide stevedores and conduct handling and warehousing service to importers and exporters.

Somali Democratic Republic

BERBERA: 10.26 N. 45.01 E. **(See Plan Book)**

DOCUMENTS:

6 lists of crew.

2 Stores lists.

2 lists of articles owned by crew i.e. tobacco, wine/spirits, cameras, binoculars, wrist-watch, radio, firearms/swords etc.

1 cargo manifest (must be made out in accordance with original B/L issued. In the column "Consignees" the name of the party to be notified must be mentioned complete with full postal address. Should specify weight in kilos and measurements in cubic metres). 6 copies to be sent in advance unfreighted; 2 copies to be sent in advance freighted; 2 copies to be sent by the ship's box.

1 copy non negotiable B/L for each B/L issued.

2 lists transit cargo (total number of packages and total weight for each destination).

6 lists of passengers to be disembarked.

2 lists of passengers in transit.

1 health document will be prepared on arrival of the vessel in port, on special local form.

PILOTAGE: Compulsory for vessels over 200 n.r.t. Vessels await Pilot on the outer roads, 5-10 cables S.W. of Tamara lighthouse. In case of stormy weather and rough seas, it is permitted to wait for Pilot on the inner roads.

ANCHORAGE: Outer anchorage 5-10 cables S.W. from Tamara lighthouse. Inner anchorage limited by the line between 10° 26′ 16″ N. 45° 00′ 14″ E. and between perpendiculars from the ends of this line towards Cape of Tamara.

RESTRICTIONS: All ships should anchor in such a position that with any wind they should not get on to the lights in line, or Southward from it, or opposite the deep water pier.

MAX. SIZE: Draft 28 ft., length/breadth no restrictions.

HEALTH: Pratique granted after Port Authorities, including doctor, board vessel. Any suspected contagious illness aboard to be reported immediately to the doctor on arrival. Vessels calling from other Somali Ports subject to same procedure.

RADIO: Cable Agents giving ETA, draft, length and cargo via port radio station – 6O Y (SIX OU WAI) call and reply in the frequency 500 kc, working 450 kc. Working hours from 0700 to 1700 hrs. local time. Traffic list 3 times a day at 0800, 1200 and 1600 hrs.

TUGS: Use ship's lines. There is one tug of 1,200 h.p. and one of 700 h.p. to assist vessels in berthing and unberthing.

BERTHING: Depth at pier 28 ft. length of pier 320 m.

Transhipment of cargo is allowed with exemption of Harbour Tax and Warehouse Dues. Only handling charges are levied according to port tariff.

STEVEDORES: Vessel must give accurate ETA at least 24 hours in advance to enable Agent to order gangs. No shore facilities, all cargo to be loaded and unloaded with ship's gear.

Working Hours: Normally 0700-1400. But loading to and discharging from vessel is performed day and night.

MEDICAL: General hospital facilities available, but specialised treatment and surgery is not. Smallpox, yellow fever and cholera vaccinations certificates inspected on arrival.

TANKERS: Discharge at two mooring buoys with connecting hoses of American and British standards.

DENSITY: Salt water at all times.

FRESH WATER: Available alongside quay through hoses. Rate 15/20 t.p.h.

GANGWAY/DECK WATCHMEN: Gangway watchmen services carried out by customs police, food on vessel's account. Ships are also supplied with local watchmen through Agent.

OPENING/CLOSING HATCHES: Normally carried out by stevedores with the help of the crew. Vessel's crew may, if required by the vessel do so. Crew may close hatches prior to sailing.

CUSTOMS ALLOWANCE: 200 cigarettes, 2 packets of cigars and 5 bottles of wine. Cigarettes and spirits trafficking alongside and between vessels and shore strictly prohibited.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Crew to carry passport or seamen book whilst ashore.

CONSULS: None.

REPAIRS: Port Management own a well-equipped workshop where minor repairs for ships can be carried out.

TIME: GMT plus 3 hours all year round.

HOLIDAYS: See "Mogadiscio".

DEVELOPMENTS: The present two berths are being extended by a further two berths. (Work is underway.) Expected to be complete by the end of 1981

TELEPHONES: No possibility for placing telephones on board.

GENERAL: Vessels should not dispose of any waste into harbour or on to quays, lower lifeboats or use radio station without prior permission.

REGULATIONS: Livestock vessels are given priority.

AUTHORITY: Somali Ports Authority, Berbera.

CHISIMAIO (Kismayu): 00.22 S. 42.34 E.

DOCUMENTS:

6 Lists of Crew.

2 Stores Lists.

2 Lists of articles owned by Crew, i.e., tobacco, wine/spirits, camera, wrist-watch, radios, binoculars, firearms/swords, etc.

1 Cargo manifest (must be made out in accordance with original B/L issued. In the column "Consignees" the name of the party to be notified must be mentioned complete with full postal address. Should specify weight in kilos and measurement in cu.m.). 6 copies to be sent in advance unfreighted;
2 copies to be sent in advance (freighted). 2 copies to be sent by ship's box.

1 copy non-negotiable B/L for each B/L issued.

2 Transit Cargo (total number of packages and total weight for each destination).

6 Lists of Passengers to be disembarked.

2 Lists of Passengers in Transit.

1 Health Document will be prepared on the arrival of the vessel in port, on special local form.

PILOTAGE: Compulsory for vessels over 200 n.r.t. Pilot picks up vessel at an approximate position 0° 20′ S., 42° 34′ E., two miles S.E. of Fairway Buoy.

ANCHORAGES: In the port basin, from 27 to 30 ft. deep, excellent holding ground.

RESTRICTIONS: Entrance channel about 200 m. wide, marked by buoys. Entrance effected during daylight hours only. Port closed for vessels from 1800 to 0600 hrs.

MAX. SIZE: Port consists of two L-shaped quays, one 340 m. length the other 280 m. Max. draft 28 ft. at lowest low tide.

HEALTH: Pratique granted after port Authorities, including doctor, board vessel. Any suspected contagious illness aboard to be reported immediately to the doctor on arrival. Vessels calling from other Somali ports subject to same procedure.

RADIO: No local coastal radio operating at present. Cables to Agent could be sent through normal postal R/T and W/T services.

TUGS: Two tugs of 800 h.p. each are available to assist ships in berthing and unberthing. Ship's lines used.

BERTHING: No specific requirement to berth in the port. Vessels entering port basin after 1745 hrs. will berth next day at 0630 hrs. Vessel must sail before 1730 hrs. otherwise sailing will be postponed to next day at 0630 hrs.

STEVEDORES: Vessel must give accurate ETA at least 24 hours in advance to enable Agent order necessary gangs.

No shore facilities, all cargo to be loaded and unloaded with ship's gear.

Working Hours: Normally 0700–1400 hrs. but loading to and discharging from vessels is performed day and night.

MEDICAL: Hospital facilities available, but specialised treatment and surgery is not. Smallpox, yellow fever and cholera vaccination certificates inspected on arrival.

FRESH WATER: Available at wharf through hoses, rate 15/16 t.p.h.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Gangway watchmen service carried out by the Customs Police. Food on vessel's account; ships are also supplied with local watchmen through Agent.

OPENING/CLOSING HATCHES: Normally carried out by stevedores with the help of the crew. Vessel's crew may, if required by the vessel, do so. Crew may close the hatches prior to sailing.

CUSTOMS ALLOWANCE: 200 cigarettes, 2 packets of cigars and 5 bottles of wine. Cigarettes and spirits trafficking alongside and between vessels and shore strictly prohibited.

IDENTIFICATION CARDS: Crew to carry passport or Seaman's Book whilst ashore.

CONSULS: Italian Consul only.

REPAIRS: No facilities available.

REPATRIATION: Air communication via Mogadiscio.

AIRPORT: About 6 km. N.W. of the port.

TIME: GMT plus 3 hours all year round.

HOLIDAYS: See "Mogadiscio".

TELEPHONES: No possibility for placing telephones on board.

GENERAL: Vessels should not dispose any waste into harbour or on to quays, lower lifeboats or use radio station without prior permission.

SHORE LEAVE: Permitted.

REGULATIONS: Banana and livestock vessels are given priority.

AUTHORITY: Somali Ports Authority, Chisimaio.

MOGADISCIO: 02.02 N. 45.20 E.

DOCUMENTS:

2 Lists of Crew.

2 Stores Lists.

2 Lists or Declarations of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, binoculars, firearms/swords, etc. Vessels calling from other Somali ports subject same procedure.

Cargo manifest (must be made out in accordance with original B/L issued. In the column "Consignees" the name of the party to be notified must be mentioned complete with full postal address. Should specify weight in kilos and measurement in cubic metres). Six copies to be sent in advance unfreighted; 2 copies to be sent in advance freighted and 2 copies to be sent by ship's box.

2 Lists Transit Cargo (total number of packages and total weight for each destination).

6 Lists of Passengers to be Disembarked.

2 Lists of Passengers in Transit.

1 Health document will be prepared on the arrival of the vessel in port, on special local form.

PILOTAGE: Compulsory for vessels over 200 n.r.t. Pilot joins vessel at anchorage about 0.5 miles offshore. Pilot can be requested by International Code signals or through VHF using Channels 12, 14 or 16.
ANCHORAGE: About 0.5 miles offshore in depths up to 45 ft., in open roadstead. Because of occasional heavy swell maximum recommended draft 31 ft.
RESTRICTIONS: Berthing/unberthing of vessels is restricted to daylight hours. Max. draft permissible is 10 m. at general cargo berths and 12 m. at tanker berths.
HEALTH: Pratique granted after port authorities including doctor, board vessel. Any suspected contagious illness aboard to be reported immediately to the doctor on arrival. Vessels calling from other Somali ports, subject to same procedure.
RADIO: No local coastal radio operating at present. Cables to Agent could be sent through normal postal R/T and W/T services.
TUGS: Tugs join vessels at anchorage or as directed by the attending Pilot. Vessel's lines normally used. No extra charge for tug's lines.

Two tugs of 1,400 h.p. each available and 1 tug of 4,000 h.p. available for salvage and rescue operations.
BERTHING: Incoming vessels are assigned berths on a turn basis subject to operational requirements.
Harbour: Alongside deepwater port protected by 820 m. strong breakwater.
Berths: 5 berths. Berth lengths vary from 170–200 m. with depths alongside 8–12 m.
BULK CARGO FACILITIES: None.
STEVEDORES: Vessel to give accurate ETA at least 24 hours in advance to enable Agent order necessary gangs. No shore facilities, all cargo to be loaded and unloaded with ship's gear.
Working Hours: Normally 0700–1400. But loading to and discharging from vessels is performed day and night.
CRANES: Only ships' derricks are used. No portal cranes at quay but a number of mobile cranes are available for handling and stacking cargo with maximum lifting capacity of 50 tons. No floating cranes available.
MEDICAL: No advance notice for medical attention required. Hospital facilities available but specialised treatment and surgery is not. Smallpox vaccination, yellow fever and cholera certificates inspected on arrival.
TANKERS: One berth available for tankers with a draft of 12 m.
DENSITY: Salt water at all times.
FRESH WATER: Available alongside through hoses at a rate of 15–20 t.p.h.
FUEL: Diesel oil available.
FIRE PRECAUTIONS: Fire engines situated within easy reach of docks 24 hours per day. The tugboats are also equipped with fire fighting appliances.
CONSULS: U.S.A., U.K., France, Italy, Federal Republic of Germany, Yugoslavia, Belgium, Holland, Romania, Peoples' Republic of China, U.S.S.R., India, Pakistan, Algeria, Libya, Egypt, Syria, Iraq, Iran, Kuwait, Qatar, U.A.E., S. Yemen, N. Yemen, Kingdom of Saudi Arabia, Sudan, Kenya, Nigeria, N. Korea, German Democratic Republic.
REPAIRS: No facilities available.
DRY DOCK: None Available.
GANGWAY/DECK WATCHMEN: Gangway watchmen services carried out by the Customs police, food on vessel's account. Ships are also supplied with local watchmen through Agent.
OPENING/CLOSING HATCHES: Normally carried out by stevedores with the help of the crew. Vessel's crew may, if required by the vessel, do so. Crew may close the hatches prior to sailing.
CUSTOMS ALLOWANCE: 200 cigarettes, 2 packets of cigars and 5 bottles of wine. Cigarettes and spirits trafficking alongside and between vessels and shore strictly prohibited.
REPATRIATION: Facilities available.
AIRPORT: About 5 km. to the West.
TIME: GMT plus 3 hours all year round.
HOLIDAYS: Iidul Fitr, (1st & 2nd Shawaal); Iidul Adha, (9th & 10th Dilhija); Prophet Mahammed Birthday, (12th Rabiul Awal); International Labour Day, (1st May); Independence Day N. Region, (26th June); Independence & Union Day, (1st July); Revolution Festivals, (21st and 22nd October).
POLICE/AMBULANCE/FIRE: Police 28088; Ambulance 30000; Fire 85055.
TELEPHONES: Arrangement for placing telephones on board is not available.
IDENTIFICATION CARDS: Crew to carry passport or seaman's book whilst ashore.
SHORE LEAVE: Permitted.
GENERAL: Vessels should not dispose of any waste into harbour or on to quays, lower lifeboats, or use radio station without prior permission.
Tidal Range: 2.5 m.
Shipchandling: Available.
Major Exports: Fresh bananas, livestock, hides and skins and frankincense.
Imports: General cargo, crude oil, etc.
DELAYS: Nil, except when other ships are working alongside.
DEVELOPMENTS: Construction of 1 more berth with a depth of 10 m. is expected to be complete by 1981.

SHIPMASTER'S REPORT: June 1979.
Documents:
5 Crew Lists
1 Stores List
1 Crew Personal Effects Declaration
1 Cargo Manifest
1 List Passengers in Transit
1 Health Document (International Declaration of Health)
1 Vaccination List, Crew and Passengers
1 Form "A", Ship's Record and Master's Report
1 Arrival Report (Agency Form).
1 Application for Temporary Use of New Harbour
2 Cargo Plans for Discharging Cargo
6 Lists of Passengers to be Disembarked.

Pilotage: Compulsory. Pilot boards about 0.75 miles from breakwater entrance. Ladder on lee side 6 ft. above water with manropes. Usually 1 Pilot, assistant or trainee, and one communications man. Pilots use VHF Channel 16.
Anchorage: Open roadstead about 0.5–0.75 miles off breakwater. Assigned anchorage is West of new breakwater light bearing 310°. Do not anchor West of a line drawn perpendicular to West end of breakwater. There is a submerged tanker pipe-line and buoys West of breakwater, unlit at night. There are occasionally small unlit coasters anchored in the anchorage. Depth, clearance and congestion make anchorage unsuitable in heavy weather. During S.W. monsoon, ship's head approximately 180°–225° without circular swing.
Communications: Send ETA's through Radio Mombasa.
Clearance: Health, Customs, Immigration and Harbour Master board at anchorage. Hours are 0700 to 1600. Agent and Stevedore representative may be present. Seamen's books or I.D. cards are required for shore leave. Crew allowed ashore at anchorage 0730 to 1730 hrs. to comply with harbour curfew at 1800 hrs. Passengers not permitted ashore at anchorage. Curfew of 2400 hrs. exists at dock, and passengers permitted ashore after being recleared by Immigration. They were given a 1900 hrs. curfew.
Customs Allowances: 200 cigarettes, 0.5 lb. tobacco or cigars. Currency exchange strictly controlled at banks and legal hotels. Trafficking in any items strictly prohibited. Coffee, sugar and tea are considered bond items, but were not sealed.
Watchmen: Two by regulations; 1 on duty and 1 off duty. At anchorage, ship must provide sleeping area.
Medical: Smallpox, yellow fever and cholera vaccinations required.
Fresh Water: Fresh water can be made in port due to open status of harbour.
Time: GMT plus 3 hours.
Opening/Closing Hatches: Stevedores will open pontoon type hatches. Recommend modern mechanical or hydraulic hatches to be opened by crew.
Stevedores: Paid on a tonnage basis. Gangs usually given contract of approximately 100 tons bagged goods or equivalent. First shift 0700 to 1500 hrs.; second shift 1500 to 2200 hrs. No third shift, however, 2nd shift may be extended for a set amount of additional tonnage which usually finishes by 0100 hrs. Typical figures; bagged goods, 250 tons per hatch per day with single gangs. Doubling of gangs in hatch subject to warehouse congestion and shortage of transport. Overall quality with bagged goods was fair to good, and stevedores provided own sweepings and bag sewers. No cleaning gangs were hired by vessel, though said to be available.
Launch Service: Available at anchorage 0700 to 1730 hrs. One launch for all ships.
Harbour Development: A new deep water port has been constructed. There are wide aprons, new warehouses, and good rubber fenders. Strong bollards approximately every 75 ft. Plan of N.O. Chart 61240 or BA Chart 671 (both corrected by overlay) show harbour with good accuracy. The red light on end of new breakwater is extinguished and the lights listed as Occ. R. are F.R. The main light is NOT visible as given. It has sufficient brightness, but not sufficient height. It can be seen about 20–25 miles depending on draft.

There are three warehouses. Transport to clear warehouses is limited. The main quay formed by the new breakwater has three berths. There is a tanker berth at the East end, and it is not usable by cargo ships. When occupied, there is sufficient room left for one large and one coastal vessel to work general cargo. When empty, two large ships can work. There is an additional berth against the inner wall that can handle 1 cargo ship to about 500 ft. This berth is 'stern first' and is the banana dock. Fruit boats have priority and any ship there must be shifted out. On the main quay, unannounced shifts are likely depending on the tanker berth. There is 1 small livestock berth at the West end of the harbour for coaster size vessels only. The lighterage piers at the East end of the harbour appear to no longer be used, and no lighterage work was observed.

There is considerable surge caused by both the openness of the harbour and lack of protection from onshore winds. "4 & 2" tie-up is recommended and chafing gear advisable.
Tugs: One of 4,000 h.p. and 2 of 1,100 h.p. are available, tugs are new. For berthing, one short ship's line was used from vicinity quarter ship's length from bow and stern, necessitating the bringing of sufficient line from the mooring stations to these locations.
Approaches: Approaching from the South, there are strong cross currents, the last 24 hours out. Sets of over 1 m.p.h. have been experienced. Approach on a North-Easterly heading from seaward should provide the most clarity of landmarks and radar picture. At night, a white lume is visible, with a yellowish flame-off lume noted to the S.W. The harbour and first navigation lights to be sighted are in the North-Eastern half of the white lume. The town steps uphill sharply from the harbour, causing town lights to be visible well before the other navigation lights. Anchored ships may also obscure the lower lights. Harbour is well defined on 3 cm. radar at about 6 miles. Set drops off nearer to shore.

"Registration for port" is the time anchored. Pilots do not board ships to anchor. Pilots (port radio) are on VHF Channel 16. The transmitter is weak and range about 5 miles. When checking in, they will ask Name, Flag, Call Sign; F. & A. Draft; g.r.t. and n.r.t.; discharge tonnage and type. There is usually much repeating so earliest possible contact at slowest speed is advised so that this can be done with sufficient sea room. Only after completion will anchorage be "assigned".
Agency: SOMSHIP is government agency and services accordingly.
AUTHORITY: Somali Ports Authority, Mogadiscio.

South Africa

GENERAL:

Following is an extract of British Notices to Mariners No. 1647(1979).

Regulations for Laden Tankers off the coasts of South Africa:

Laden tankers in the Summer months should pass not less than 10 miles South of Alphard Banks (35° 02′ S., 20° 50′ E.) (See *Africa Pilot Vol. III*) and then keep 25 miles off the following points:

Cape Agulhas	(34° 50′ S., 20° 01′ E.)
Quoin Point	(34° 47′ S., 19° 39′ E.)
Cape Point	(34° 21′ S., 18° 30′ E.)
Slangkop Point	(34° 09′ S., 18° 19′ E.)
Cape Columbine	(34° 50′ S., 17° 51′ E.).

During the Winter, laden tankers should maintain the recommended distance offshore until the Winter Load Line Zone is reached and then keep as close to that line as possible. This will entail passing North of Alphard Banks and then about 12 miles off Quoin Point and Cape Point.

Vessels proceeding to the Replenishment Area (33° 55′ S., 18° 15′ E.). off Cape Town should maintain the above distances off shore until in a position where course can be safely altered to approach the Replenishment Area crossing the main traffic flow as nearly at right angles as possible.

Routeing of Laden tankers off the coasts of South Africa:

Laden tankers in the summer months should pass 25 miles off the following points:

South Sand Buff	(31° 20′ S., 29° 58′ E.)
Bashee River	(32° 14′ S., 28° 55′ E.)
Hood Point	(33° 02′ S., 27° 54′ E.)
Cape Recife	(34° 02′ S., 25° 42′ E.)

and then steer to pass 10 miles South of Alphard Banks (35° 02′ S., 20° 50′ E.).

During the Winter laden tankers should maintain the recommended distances off shore until the Winter Load Line Zone is reached and then keep as close to that line as is possible. Between Cape Recife and Cape Agulhas this will entail passing North of Alphard Banks. It is recommended to pass about 6 miles North of these banks.

CAPETOWN (Table Bay): 33.56 S. 18.26 E.

(See Plan Book)

PORT LIMITS: Westwards by a straight line between Green Point and Robben Island lighthouses, and Northwards by a straight line from Robben Island lighthouse East (true) to the Eastern shore of Table Bay, thence Southwards along high water mark, so as to include the foreshore to the Castle, thence back to Green Point lighthouse.

DOCUMENTS:

Customs:

*Form DA.1, Report Inwards/Outwards for Ships.
*Form DA.3, Certificate of Clearance for Ships.
*Form DA.4, Transire – for a destination in the R.S.A.
*Form DA.5, List of Sealable Goods on board ship.
Ships Crew List (Customs Department) 6 Copies.

Post Office:

*P1/27, Certificate of Departure of Vessel.
P.1/8, Post Office Certificate (Declaration).

Port Health:

Maritime Declaration of Health.
Crew List with last vaccination dates.
Deratisation Certificate.

Port Authority:

*T.958, Report of Arrival.
*T.962, Departure/Shifting Notification.
Ship's Manifest.
*Completed by Agent.

PILOTAGE: Compulsory. One hour advance notice to be given to the Port Captain through VHF radio, call sign Port Operations, on Channel 16, working Channel 12. Pilot boat fitted with multi-channel VHF. Motor pilot boat, black hull, white housing also 2 pilot vessels with black hull, brown upperworks, gold and green funnel. Pilot taken aboard at port entrance.

HELICOPTER SERVICE: Available for mail and small items of stores for vessels not wishing to enter harbour. See "Shipmaster's Report".

LAUNCH SERVICE: For vessels not wishing to enter harbour, Agent may arrange launch service for mail, stores, etc. In this case service only permissible in area North and West of position at least 5 miles due West of Robben Island. See "Shipmaster's Report".

RESTRICTIONS: Vessels not permitted to enter unless Agents have been appointed. Oil tankers and ships carrying explosives or dangerous goods restricted to daylight hours.

MAX. SIZE: Passenger and dry cargo vessels: max. length up to 1,000 ft. overall; draft 36 ft. Tankers: (for discharging) max. length 820 ft. overall; draft 43 ft. (tidal).

Tankers/ore carriers in ballast up to 350 m. in length, 350,000 d.w.t. and draft 10.7 m. may berth for bunkers, repairs, etc.

HEALTH: Pratique granted at first port of entry in South Africa. Pratique message 24 hours prior to arrival to "Port Health" at port of entry. If radio pratique not granted "Q" flag to be flown until ship has been cleared. Valid certificates must be held for smallpox and yellow fever. Ships from Eastern ports must also have valid certificates for cholera and typhoid.

RADIO: Capetown Radio, call sign ZSC. VHF and R/T 2182.

TUGS: Join vessel approximately 0.25 mile from harbour entrance. Tug's wires used at no extra charge.

DENSITY: 1025.

FRESH WATER: Delivery by hose ex-wharf hydrants. 50 t.p.h.

FUEL: 48 hours notice required. All grades of fuel available.

Berth 603	305.0	14.0		
Berth 604	305.0	14.0		

Roll-on/Roll-off facilities: Available at berths 500 and 501, as well as at "L" and "M" berths. 2 berths ("A" and "J") are available to accommodate vessels with slew ramps.

Five 35 ton container stacking cranes are available at berths 602 to 604 and one 35 ton crane at road to rail transfer area.

CRANE: *Floating crane:* Lifts 60 tons at 24.4 m. radius and another floating crane lifts 200 tons at 21.5 m.

BULK HANDLING FACILITIES: *Grain Elevator:* 1 terminal grain elevator of 27,220 tons storage capacity, with loading conveyors to the Collier Jetty. Continuous intake capacity of elevator, 750 t.p.h.; shipping capacity, 1,000 t.p.h. Other bulk cargoes handled at general cargo berth with shore crane. No LPG facilities.

MEDICAL: Unrestricted hospital facilities. Medical assistance must be arranged through Agents.

TANKERS: Diameter of line 8 in. 2 Tanker berths, max. length 249.9 m.

max. draft 14.0 m. (tidal). Slop tank capacity 1,500 tons, available for oily ballast from tankers back-loading white oil.

GANGWAY/DECK WATCHMEN: Ship's Agent makes necessary arrangements.

OPENING/CLOSING HATCHES: Mechanical hatches opened/closed by crew. Other types of hatches by stevedores.

CERTIFICATES: Safety Certificates in respect of construction and gear.

Radio Certificate.

Load Line Certificate.

Deratisation Certificate.

Certificate of competent officers (passenger ships only).

CUSTOMS ALLOWANCE: The Master, officers and other members of the crew who remain on the ship during its stay in port may each be allowed to retain in his possession the following quantities (to cover 4 days) of the undermentioned sealable goods:

	Tobacco in any form grammes	*Potable spirits in any form litre*	*Wine litres*	*Beer or stout litres*
The Master/Pilot	230	1	3	3
Officers (including pursers, surgeons, chief stewards, wireless operators and serangs)	175	1	3	3
Other members of the crew	115	nil	3	nil

Where the Master, officers or other members of the crew remain on board the ship for more than 4 days, the Controller of Customs and Excise may on request authorise the issue from under seal, for consumption on board, of the following further quantities per day:

	Tobacco in any form grammes	*Potable spirits in any form millilitres*	*Wine litres*	*Beer or stout litres*
The Master/Pilot	30	100	1	1
Officers (including pursers, surgeons, chief stewards, wireless operators and serangs)	25	100	1	1
Other members of the crew	15	nil	1	nil

CARGO GEAR: All cargo handling equipment must be in good condition and certificates available for inspection.

IDENTIFICATION CARDS: Not required.

CLASSIFICATION SOCIETIES: Lloyds, BV, N.V and ABS.

DRY DOCKS:

Sturrock Graving Dock: Situated at S.E. end of Duncan Dock:

Dimensions—		
	Overall docking length	360.0 m.
	Length on keel blocks (first to last keel block)	338.3 m.
	Length on bottom (dock floor)	350.4 m.
	Width at coping	47.5 m.
	Width at entrance top	45.1 m.
	Maximum width at bottom	38.4 m.
	Depth on entrance sill, HWOST	13.7 m.
	Depth on inner sill, HWOST	15.1 m.

A docking length of 369.6 m. can be obtained by placing the caisson in the emergency stop at the entrance.

The dock can be divided into 2 compartments of either 132.5 m. and 216.1 m. or 205.7 m., and 142.9 m. respectively.

One 50 ton and one 10 ton electric crane on 7.6 m. gauge track, two 5 ton electric cranes on 4.9 m. gauge track and three 4 ton electric cranes on 4.9 m. gauge track are available.

The dock can be emptied in 4 hours.

A landing wharf 548.6 m. in length is provided on the port side of the graving dock to facilitate the dry-docking of ships.

A repair pier 427.6 m. in length with a depth of 10.7 m. on one side and 12.0 m. on the other side at LWOST is provided off "M" berth. One 15 ton electric crane on 9.1 m. gauge track is available.

Robinson Graving Dock: Situated in Alfred Basin:

Dimensions—		
	Overall docking length	161.2 m.
	Length on keel blocks (first to last keel block)	142.6 m.
	Length on bottom	152.4 m.
	Width at coping	27.4 m.
	Width at entrance top	20.7 m.
	Maximum width at bottom	17.2 m.
	Depth on entrance sill, HWOST	7.9 m.

Three 4 ton electric cranes on 4.1 m. gauge track and one 15 ton electric crane, on 4.1 m. gauge track are available.

The dock can be emptied in 3 hours.

Floating Dock No. 2:

Dimensions—		
	Extreme length	62.8 m.
	Length on bottom	61.0 m.
	Length on keel blocks	58.2 m.
	Extreme width	19.2 m.
	Width at entrance	13.7 m.
	Height of keel blocks	1.2 m.
	Draft on keel blocks, HWOST	5.6 m.
	Lifting capacity	1,016 tons

A 4 ton electric crane is mounted on a side wall of the dock.

Syncrolift Situated in Alfred Basin:

Dimensions—		
	Lifting capacity	1,778 tons
	Maximum length of vessel	61 m.
	Maximum width of vessel	15 m.

Slipways:

There are 4 boat slips for yachts and small craft.

REPATRIATION: All facilities available.

1. *Vessels docking*
   - *(a)* Any personnel arriving to join a vessel at Capetown should possess a valid travel document and a brief letter of introduction. Entry Permits can be extended if the vessel is late in arriving.
   - *(b)* Application to spend time (longer than 48 hours) in South Africa prior to repatriation should be made to the local immigration authorities.
2. *Vessels calling off Port Limits*
   - *(a)* The same requirements apply as for 1(a) with the exception of personnel who have entered the country from a vessel calling off Port Limits.
   - *(b)* The following applies to all personnel disembarking from vessels calling off Port Limits.
     (i) Repatriation must be made within 48 hours from time of signing off.
     (ii) In order to comply with local immigration authorities the Agent requires the following details, for each individual, at least 72 hours before disembarkation:
       - *(a)* Full name and nationality.
       - *(b)* Rank and, if Technician, name of employers.
       - *(c)* Passport number, place and date of issue.
       - *(d)* Place and date of birth.
       - *(e)* Destination and class of travel.
       - *(f)* If air ticket held on board, full details of routing.
       - *(g)* Reasons for disembarkation.

In the case of personnel transferring from one company vessel to another, the same conditions apply except the maximum time permitted for such transfer is 78 hours. If they have not joined the vessel within this period, repatriation must be arranged forthwith.

There are no difficulties for any personnel disembarking for medical reasons.

AIRPORT: D.F. Malan Airport – 20 km. from harbour. Daily flights to Johannesburg connecting with overseas flights by regular airlines.

TIME: GMT plus 2 hours.

HOLIDAYS: New Year's Day (1st January); Good Friday, Easter Monday, Ascension Day (date varies); Republic Day (31st May); Settlers' Day (1st Monday in September); Kruger Day (10th October); Day of the Covenant (16th December); Christmas Day (25th December); Boxing Day (26th December). Cargo is not worked on Christmas Day and New Year's Day.

POLICE/AMBULANCE/FIRE: Police, 438-3471; Ambulance, 51-5151; Fire, 438-3431 or 22-2222.

TELEPHONES: Telephones can be supplied at all berths. Arrange through Agents.

SHORE LEAVE: Allowed.

SHIPMASTER'S REPORT: Off limits launch (and helicopter) service.

Port, Immigration, Customs and Health Authorities have made it clear that this service is a privilege and not a right. It is therefore of the utmost importance that the regulations are strictly adhered to.

The Agent must apply to the Port Captain for permission to service the vessel and the following details must be submitted. Name of vessel, time and date of arrival, draft, where from, where to, stores required and other reasons for call.

Launch is only allowed to be alongside vessel for 1 hour maximum otherwise vessel will have to enter port limits and incur port dues. Tariff R.15.00 per half hour, minimum R60.00.

If personnel embarking, Immigration Authorities require name of vessel, tonnage, whether ballast or loaded and names of persons embarking. If persons disembarking then full names, dates and places of birth, nationality, passport or discharge book number and expiry date, whether South African visa held and comprehensive reason for leaving vessel, arrangements made for departure from South Africa (usually 24/48 hours allowed), and flight number. This does not apply to medical cases. Guarantee from Agent accepting full responsibility and liability regarding maintenance and repatriation expenses. Persons disembarking must report immediately to Passport Control. Failure to report or leave South Africa on the booked flight is an offence and in addition to any fine or imprisonment the Owners will be refused any further off limits service for *any of their vessels.*

Port health require application for radio pratique 48/24 hours before arrival. Customs require all bonded stores loaded to be signed for and ship's stamp applied. Stores or spares being landed must have prior notification to Agent and an accompanying letter giving full description and disposal instructions.

Agents require 168, 96, 48, 24, and 12 hours' notices followed by any amendment to ETA. Stores requirements should be sent at least 96 hours before arrival. Three copies of Crew List to be sent ashore with launch (or helicopter).

Services operate 24 hours per day and usual rendezvous position is 5 miles West of Green Point lighthouse for launch (and 12 miles West for helicopter). Launch can carry up to 30 tons stores (and helicopter up to 2,000 lb.). Vessels should not anchor but provide a good lee and have derrick rigged. Contact should be made with the launch (or helicopter) 1 to 2 hours before arrival rendezvous point using Channel 16.

AUTHORITY: South African Railways, Port Captain, Table Bay Harbour.

DURBAN (Port Natal): 29.53 S. 31.02 E.

(See Plan Book)

PORT LIMITS: The area of sea bounded by: (1) to the North, a line drawn from the coast in position: 28° 48′ 42″ S. 31° 02′ 32″ E. in a 090° (True) direction to position 29° 48′ 42″ S. 31° 7′ 30″ E.; (2) to the South, a line drawn from the coast in position; 29° 54′ 06″ S. 31° 02′ 30″ E. in a 090° (True) direction to position 29° 54′ 06″ S. 31° 07′ 30″ E.; (3) to the East, a line joining the seaward positions in (1) and (2).

DOCUMENTS: See "Cape Town".

PILOTAGE: Compulsory. As much advance notice as possible to be given to Port Captain through VHF radio – Port Operation – calling Channel 16, working Channel 12. Call Pilot by Aldis lamp if necessary. Pilot boats fitted with multi-channel VHF. Motor pilot boat – black hull, white housing. "Pilot-Loods" painted in black on housing. Steam pilot boat – black hull, brown housing and yellow funnel. Pilot taken aboard at outer anchorage.

RESTRICTIONS: Vessels not permitted to enter unless Agents have been appointed. Oil tankers and ships carrying explosives or dangerous goods restricted to daytime hours. The depth of the inner and outer channels is 12.8 m. at LWOST.

MAX. SIZE: The draft permitted is 40 ft. (12.10 m.) The length of 800 ft. is also exceeded with the Port Captain's approval. Vessels over 600 ft. length berth daylight only.

HEALTH: Pratique message to "Port Health" at port of entry. If radio pratique not granted "Q" flag to be flown until ship has been cleared. Valid certificates must be held for smallpox and yellow fever. Ships from Eastern ports must also have valid certificates for cholera and typhoid.

Shipmaster's Report: Valid Yellow Fever Certificate not required.

RADIO: Durban Radio – ZSD.

TUGS: 10 first-class tugs available. Join vessels in entrance channel. Tug's wires used at no extra charge.

CRANES: *Floating Cranes:* 3, lifting capacities of 25 tons, 40 tons and 125/200 tons, respectively.

Mobile Cranes: Diesel-electric road cranes: 3×12.5 ton, 1×16 ton, 1×30 ton, 7×35 ton and 2×45 ton cranes.

BULK HANDLING FACILITIES: *Grain elevator:* 1 terminal elevator of 38,100 tons storage capacity, with shipping gallery at Berth No. 8 Maydon Wharf. Intake capacity of elevator, 1,000 t.p.h.; shipping capacity 1,271 t.p.h.

Privately owned bulk storage and handling facilities:

(1) Manganese Ore Loading Facilities at Maydon Wharf, Berth No. 15, storage capacity 30,000 tons. Shipping capacity 400 t.p.h.

(2) Bulk Sugar Terminal. At Maydon Wharf, Berth No. 2. Storage capacity of 520,000 tons and shipping rate up to 800 t.p.h.

(3) Alumina Handling Facilities. At the Crossberth, Berth No. 109. Storage capacity of 32,000 tons and conveyor system with discharge rate of 300 t.p.h. Max. size 45,000 d.w.t., max. draft 12.8 m.

(4) Bulk Soda-Ash Facilities. At Maydon Wharf, Berth No. 14. Storage capacity of 22,000 tons and conveyor system with discharge rate of 150 t.p.h.

(5) Bulk Shipping Terminal for pelletised maize products, ground nuts and soya beans located at Berth No. 3 Island View. Storage capacity 30,000 tons. Shipping rate 450 t.p.h. Vegetable oils storage capacity: 6,500 tons, shipping rate 220 t.p.h.

(6) Multi-purpose Bulk Handling Facility for pelletised maize and wheat products, ground nuts, barley malt, rice, soda ash and fluospar located at Berth No. 5 Maydon Wharf.

Storage capacity:	agricultural products	30,500 tons
	mineral products	60,000 tons
	soda ash silos	12,000 tons
	anthracite	6,000 tons
Shipping rate:		500 tons to 1,200 t.p.h.
Discharge rate:		250 tons to 300 t.p.h.

(7) Bulk Handling Facilities for the export of wood chips located on Berth 109 Crossberth, together with alumina facilities mentioned in (3) above.

Storage capacity:	79,800 tons
Shipping rate:	540 t.p.h.

(8) Bulk Molasses facility at Maydon Wharf, Berth No. 9.

Storage capacity:	42,000 tons
Shipping rate:	150–350 t.p.h.

Bulk-loading Facilities: Electrically-driven appliances for the loading of coal, pig iron, manganese ore, iron ore, etc., are provided at the Bluff. There are dumpers with capacity of 645 tons and 1,100 t.p.h., respectively. 2 belt loaders capable of loading at the rate of 550 t.p.h.

and 3 bucket transporters with an aggregate capacity of 1,100 t.p.h. are available. The overhead storage bins have a capacity of 9,320 tons, while concrete bins are provided for ground storage with the following capacities:

1. Anthracite throughout–64,630 tons.
2. Mixture of anthracite and pig iron: Anthracite–82,860 tons.

Coal/Anthracite Storage Facilities: Concrete ground storage bins of 18,290 tons capacity at Salisbury Island.

CONTAINER HANDLING FACILITIES: A major container terminal comprising 5 deep sea berths (201-205) and 2 coaster berths (108-109) is equipped with 7×40 ton wharf container cranes at deep sea facility and 1×35 ton unit at Berth 108.

The entire complex covers some 102 hectares and provides very substantial stacking areas backed up by a large terminal building with computer control, workshop complex and a road/rail transfer terminal to handle unit trains conveying 80 t.e.u.'s. This rail terminal is served by 2 modern 35-ton container gantry cranes covering 3 rail tracks and 2 traffic lanes. The back up system operates on a combined trailer/straddle carrier system comprising 37×30 ton, 8-wheeled straddle carriers augmented by a substantial fleet of terminal haulers and trailers as well as a large cartage fleet operated by the Port Authority for the local delivery of containers.

A very modern stuffing and re-stuffing depot located on a 13 hectare site immediately adjacent to the harbour terminal is operated by private enterprise (Messrs. S.A. Cargo Depots). The depot is fully equipped with re-stuffing sheds and container handling equipment to cater for LCL traffic.

STEVEDORES: Stevedoring undertaken by private enterprise stevedores appointed by ship's Agent.

MEDICAL: Unrestricted hospital facilities. Medical assistance must be arranged through Agents.

TANKERS: Off-shore Single Buoy mooring suitable for tankers up to 300,000 tons situated in position 30° 0′ 30″ S., 30° 58′ 29″ E.

Mooring Master boards in position 5 km. East of SBM. Rope messengers should be available on forecastle, and manifold prepared to connect two 16-in. hoses ASA 150 flanges. Stores launch can be arranged for up to 30 tons stores, provided that vessels anchor outside port and territorial limits. No bunkers, no fresh water, and no shore leave for vessels at single buoy mooring.

In harbour 4 tanker berths, for vessels of max. length 800 ft., max. draft 12.3 m. Slop tanks available. Crude discharge through 10 in, hoses, white oil 8 in. hoses, loading products through 8 in. hoses.

DENSITY: 1025.

FRESH WATER: Delivery by hose ex-wharf hydrants. Rate of delivery 40 t.p.h.

FUEL: All grades of fuel available. 48 hours notice required. Fuel may be obtained alongside berths or by barge. No barging outside harbour area.

OPENING/CLOSING HATCHES: Mechanical hatches opened/ closed by crew. Other types of hatches by stevedores.

CERTIFICATES:

Safety Certificates in respect of construction and gear.
Radio Certificate.
Load-line Certificate.
Deratisation Certificate.
Certificate of competent officers (passenger ships only).

CUSTOMS ALLOWANCE: See "Capetown".

CARGO GEAR: All cargo handling equipment must be in good condition and certificates available for inspection.

IDENTIFICATION CARDS: Required, otherwise National Identity Cards, if available.

DRY DOCKS: *Prince Edward Graving Dock:*

Dimensions—	Overall docking length	352.044 m.
	Length on keel blocks	327.660 m.
	Length on bottom	352.044 m.
	Width at coping	42.215 m.
	Width at entrance top	33.528 m.
	Maximum width at bottom	33.528 m.
	Depth on entrance sill HWOST	12.497 m.
	Depth on inner sill HWOST	13.106 m.

A docking length of 364.44 m. can be obtained by placing the caisson in the emergency stop at the entrance.

The dock can be divided into 2 compartments:

Outer 206.906 m. and inner 138.684 m.

One 25 ton electric crane with 27.342 m. radius and one 10 ton crane on 7.925 m. gauge track and one 10 ton, one 5 ton and one 4 ton electric cranes on 4.572 m. gauge tracks are available. The dock can be emptied in 4 hours.

Floating Dock No. 3:

Dimensions—	Extreme length	106.680 m.
	Length on bottom	106.680 m.
	Length on keel blocks	104.546 m.
	Extreme width	26.822 m.
	Width at entrance	19.482 m.
	Height on keel blocks	1.219 m.
	Draft on keel blocks, HWOST	5.334 m.
	Lifting capacity	3,629 tons
	Crane	4 tons

REPATRIATION: All facilities available.

AIRPORT: Louis Botha Airport – 15 miles from harbour. Daily flights to Johannesburg connecting with overseas flights by regular airlines.

TIME: GMT plus 2 hours.

HOLIDAYS: New Year's Day (1st January); Good Friday, Easter Monday, Ascension Day (date varies); Republic Day (31st May); Settlers' Day (1st Monday in September); Kruger Day (10th October); Day of the Covenant (16th December); Christmas Day (25th December); Boxing Day (26th December). Cargo is not worked on Christmas day and Good Friday.

POLICE/AMBULANCE/FIRE: Police, 310-2714; Ambulance, 62333; Fire, 4123222 or 62333.

TELEPHONES: Telephones can be supplied at all berths. Arrange through Agents.

GENERAL: A copy of the Regulations for the Republic of South Africa supplied gratis to Masters on arrival.

SERVICES: Tank-cleaning facilities, compass adjustments and repairs to all electronic gear can be undertaken.

SHORE LEAVE: Allowed.

SHIPMASTERS REPORT: June 1979.

Approaches: Decca Chain 10C, can be erratic, especially at night. 'Bluff' shows up at 48 miles on radar. Cooper Point D/F continuous.

Pratique: Send message to "Porthealth" Durban 36 hours before arrival. If no complications free Pratique given quickly from Durban Radio.

Anchorage: Satisfactory if good weather, within about 4 miles N.E. of breakwaters, however if Southerly winds and swell build up it can be dangerous and it is often best to lie off.

Pilots: Send message to 'Port Captain Durban' 24 hours before arrival; ships particulars, type, cargo, length, draft and Agents name. Contact Durban Harbour Radio at least 1 hour before arrival. Pilot boards from large black fast cutter, nearly always on vessels starboard side (landward side).

Must have fixed ladder with manropes, if vessel has large freeboard gangway required at half height. Pilots dislike hoists.

Entry: Due to swell and cross currents around breakwater vessel has to be "driven" through breakwater entrance which requires full harbour speeds and sometimes more if heavy swell conditions, once well inside breakwaters speed is reduced.

VHF: Durban Harbour Radio and Pilots generally work Channel 12 but numerous other Channels available.

For public correspondence use Durban Radio which usually works Channel 26, but very busy in the morning.

Tugs: 9 large powerful firefighting tugs are on station. The latest Kort Knozzle diesel tugs of 4,500 h.p. and 39 tonnes bollard pull, fitted with two extendable hydraulic firefighting monitors. Very manoeuvrable and excellent stopping power. For most ships two tugs used inward and one outward, tugs wires used. A 20,000 h.p. ocean going tug is usually on station at Durban.

Tugs join vessels just inside breakwaters. For large vessels will accompany vessel on either side from anchorage area and then connect up when swell slackens inside.

Berth: For bunkers, Island View, Starboard side too. Swing in turning basin. For oil transfer of any kind use gantry 'Sheepbridge' with flexible pipes.

Shock absorbing fenders. For vessels of 207 m. in length at No. 8 Berth the straight section of the ship's side lay along the quay. FW available from quay.

Lines: Three head and stern lines, one of which is a shore line from mooring posts ashore. Two backsprings either end to the jetty. Mooring boat used.

Gangway: If amidships, no difficulties encountered. If aft, it is not possible to use and a shore gangway (a portable, heavy, rail type) is used.

Bunkers: Meter pump. Stop on meter at quantity stemmed. Rate up to 200 t.p.h.

Stores: Have to be taken from roadway down to the jetty. Generally local labour has to assist.

General: D/F calibration can be easily undertaken off Copper Point, good continuous beacon from red tower near water tower, generally little traffic.

Customs/Immigration: Papers as per 'Guide to Port Entry'. Immigration require 'I' flag flown until immigration clearance granted.

AUTHORITY: South African Railways, Port Captain, Durban.

EAST LONDON: 33.02 S. 27.55 E. (See Plan Book)

PORT LIMITS: These are defined in the "Regulations for the Harbours of the Republic of South Africa" as follows:

The area of the sea bounded by a line drawn from the Nahoon Point in position 32° 59′ 50″ S. 27° 57′ 07.5″ E. in a 114° direction for 1 sea mile to a position 33° 00′ 13.9″ S. 27° 58′ 12.8″ E. thence in a 216.5° direction to a position 33° 03′ 14.46″ S. 27° 55′ 37.18″ E. and thence in a position 295° direction to the coast in position 33° 02′ 36″ S. 27° 53′ 57″ E. (All bearings are true.).

For Charter Party purposes: An "arrived ship" is when she enters the port limits.

For Harbour Revenue purposes, a vessel "arrives" when it passes into the harbour proper or upon first contact at anchorage whilst waiting for berth.

DOCUMENTS: See "Cape Town".

Immigration: Produce their own forms which are:

(a) Arrival and Departure forms.
(b) Prohibition Notice – which states all crew must sail with vessel unless officially signed off through Immigration.
(c) Medical Certificate.
(d) Advice letter from last South African port – if applicable.

They require Crew Lists and the "I" Flag to be flown until vessel cleared by Immigration Officer.

PILOTAGE: Compulsory. One hour advance notice to be given to Port Captain through VHF radio – Port Operation – calling Channel 16, working Channel 12. Pilot boats fitted with multi-channel VHF. Motor pilot boat – black hull, white housing "Pilot-Loods" painted in black on housing. Steam pilot boat – black hull, brown housing and yellow funnel. Pilot taken aboard at outer anchorage. Pilots prefer pilot ladder and manrope system for boarding and disembarking.

RESTRICTIONS: Vessels not permitted to enter unless Agents have been appointed.

Port operates from: 0600 to 2200 hrs. Mondays to Fridays 0600 to 1300 hrs. Saturdays 0600 to 1900 hrs. Sundays. Tankers are handled in daylight only.

MAX. SIZE: Tankers: max. length 204 m. overall, draft 9.9 m.

Passenger and dry cargo vessels: max. length 239 m. overall, draft 9.9 m.

HEALTH: Pratique granted at first port of entry in South Africa. Pratique message 24 hours prior to arrival to "Port Health" at port of entry. If radio pratique not granted "Q" flag to be flown until ship has been cleared. Valid certificates must be held for smallpox and yellow fever. Ships from Eastern ports must also have valid certificates for cholera and typhoid.

Vessels will not be brought into harbour until radio pratique has been requested/granted, if this is first port of call on the South African range.

RADIO: East London Radio, call sign ZSA.

TUGS: Two tugs available. Join vessel in entrance channel. Tug's wires used at no extra charge.

BERTHING:

*Suitable for small fishing craft only.

DENSITY: 1025.

FRESH WATER: Available along Nos. 3 and 4 quays.

FUEL: Limited supplies of Gas oil along Nos. 3 and 4 quays.

MEDICAL: Cape St. Blaize lighthouse on 24-hour watch. Requests for medical assistance passed through lighthouse to Harbour Master and Pilot.

Hospital facilities available. Vessels in port should arrange medical facilities through Agent.

CUSTOMS ALLOWANCE: See "Cape Town".

CARGO GEAR: All cargo handling equipment must be in good condition and certificates available for inspection.

IDENTIFICATION CARDS: Required. Otherwise National Identity Cards, if available.

REPAIRS: Only minor repairs can be undertaken on a 380 ton capacity slipway.

TIME: GMT plus 2 hours.

HOLIDAYS: New Year's Day (1st January); Good Friday, Easter Monday, Ascension Day (dates vary); Republic Day (31st May); Settler's Day (1st Monday in September); Kruger Day (10th October); Day of the Covenant (16th December); Christmas Day (25th December); Boxing Day (26th December). Cargo is not worked on Christmas Day and Good Friday.

AIRPORT: George Airport, 40 km.

SHORE LEAVE: Allowed.

AUTHORITY: South African Railways. Harbour Master and Pilot, Mossel Bay.

PORT ELIZABETH: (Algoa Bay): 33.57 S. 25.39 E. (See Plan Book)

PORT LIMITS: Bounded on the Southward by a line drawn from Cape Recife, East (true) to a point in the Indian Ocean, distant 1 nautical mile on the Northward by a line drawn from the extreme point of the East bank of the Zwartkops River, East (true) distant 1 nautical mile, on the Eastward by a line drawn between these 2 points, and shall embrace the foreshore between high and low water marks from Cape Recife lighthouse to the aforesaid line at East bank of the Zwartkops River, including that portion of the said river which lies on the seaward side of the bridge carrying the railway line to Alicedale.

DOCUMENTS: *Customs*

Form DA.1 Report Inwards/Outwards for ships.
Form DA.3 Certificate of clearance for ships.
Form DA.4 Transire – for a destination in the R.S.A.
Form DA.5 List of sealable goods on board ship.
Ships Crew List (Customs Department).
Livestock Form (Customs Department).

Post Office

P.160 Notification of departure of vessel.
P1/27 Certificate of departure of vessel.
P1/149 Ship mail declaration.
P.21 Post Office Certificate.

Port Health

Maritime Declaration of Health.
Crew List with last vaccination dates.
Deratisation Certificate.

Port Authority

T.958 Report of Arrival.
T.962 A Departure/Shifting Notification.
Ship's Manifest.

PILOTAGE: Pilotage is compulsory. Messages addressed to Port Captain, Port Elizabeth. Initial ETA together with draft, 72 hours prior to arrival, updated 12 hours prior to arrival and confirmed with Port Control when within VHF range. VHF radio calling on Channel 16. Working frequency Channel 12.

Pilot boats fitted with multi-channelled VHF. Pilot boats black hull with white superstructure, "Pilot-loods" painted black on white. Pilot boat stationed inside harbour and meets ship on arrival approximately 3.5 km. East of breakwater. Boarding requirements consist of pilot ladder together with 2-manropes or pilot hoist. Pilot ladder usually rigged on starboard side of docking. Algoa Bay is considered a safe anchorage for all sizes of ships, the bottom consisting mainly of sand. Usual anchorage for ships awaiting Pilot is 3.5 km. Eastward of breakwater, in the outer anchorage. Predominant winds are Westerly all the year, with East/South Easterly during the Summer months. The Westerly winds are the stronger of the two but are off land and cause little difficulty. Easterly's being from the sea are inclined to cause an uncomfortable sea.

ANCHORAGE: See "Pilotage".

RESTRICTIONS: Vessels not permitted to enter unless Agents have been appointed.

Dry-cargo ships 0600 to 2200 hrs. Pilot must be aboard by 2030 hrs.

Vessels which are considered *not gas free* are restricted to daylight entry only.

MAX. SIZE:

	Max. length	*Draft*
Passenger, dry-cargo and container vessels	Subject to Port Captain's prior approval	11.6 m.
Tankers	203.3 m. overall	9.3 m.
Ore carriers	251.5 m.	11.6 m.

HEALTH: Pratique granted at first port of entry in South Africa. Pratique message 24 hours prior to arrival to "Port Health" at port of entry. If radio pratique not granted "Q" flag to be flown until ship has been cleared.

Valid certificates must be held for smallpox and yellow fever. Ships from Eastern ports must also have valid certificates for cholera and typhoid.

RADIO: Port Elizabeth Radio. Call sign ZSQ.

VHF: See "Pilotage".

TUGS: Three "Z-Peller" diesel tugs available, fitted with radar and VHF. Tugs join between anchorage and harbour entrance. Tug's wires used at no extra charge.

BERTHING:

	Dimensions		*Depth at LWOST*		*Cranes*

Container back-up facilities: 21.4 ha. with 3,669 ground positions for deep sea container traffic and 5.9 ha. with 924 ground positions for coastwise container traffic.

10 straddle carriers, 21 haulers and 21 bath-tub trailers for internal use.

A rail terminal for forwarding and receiving containers to and from inland destinations.

Ro/ro facilities: Side loading for deep sea traffic. End loading for coastwise traffic.

Developments: The container project is complete except for the port administration building and port control tower, mechanical workshops, ancilliary buildings and new road access, all of which will have been placed in service before December 1981.

BULK HANDLING FACILITIES: *Ore Loading Plant:* Storage capacity approx. 460,000 tons. Rated loading capacity 1,360 t.p.h.

Ore loaders:

Maximum outreach from quay face	19.35 m.
Extreme elevated height of loaders above HWOST	13.92 m.

MEDICAL: Unrestricted hospital facilities. Medical assistance must be arranged through Agent.

DENSITY: 1025.

FRESH WATER: Delivery by hose ex wharf hydrants. 160 t.p.h.

FUEL: 48 hours notice required. Bunker fuel and gas oil available at ore berth. Bunker oil available at Berth No. 15.

CUSTOMS ALLOWANCE: See "Capetown".

CARGO GEAR: Undertaken by shore cranes. No floating crane available.

STEVEDORES: To be arranged through ship's agency.

IDENTIFICATION CARDS: Required. Otherwise National Identity Cards, if available.

CONSULS:

REPAIRS: Minor deck and engine room repairs.

DRYDOCKS: Nil. Electrically operated 1,200 ton slipway; depth on keel blocks F. 3.7 m.; A. 7.5 m. HWOST; telescopic cradle 75.4 m. long, minimum length 44.3 m. Max. length of ship 82 m. and max. beam 12 m.

SURVEYORS: All classification societies represented.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Shipmaster to liaise with stevedores.

REPATRIATION: All facilities available.

AIRPORT: 4 km. from harbour. Regular daily S.A. Airways flights to and from all major centres.

TIME: GMT plus 2 hours.

HOLIDAYS: New Year's Day (1st January); Good Friday, Easter Monday, Ascension Day (dates vary); Republic Day (31st May); Settlers' Day (1st Monday in September); Kruger Day (10th October); Day of the Covenant (16th December); Christmas Day (25th December); Boxing Day (26th December). Cargo is not worked on Christmas Day and Good Friday.

POLICE/AMBULANCE/FIRE: Police (City) 10111, Police (Harbour) 520-2280; Ambulance 2-22311; Fire 2-1555.

TELEPHONES: Telephones can be supplied at all berths. Arrange through Agents.

IDENTIFICATION CARDS: No passes issued.

SHORE LEAVE: Allowed.

DEVELOPMENTS: See "Berthing".

AUTHORITY: South African Railways. Port Captain, Port Elizabeth.

RICHARDS BAY: 28.48 S. 32.06 E. (See Plan Book)

LOCATION: The port is located some 200 km. North of Durban. Mid point of the bay is approximately 28° 48′ S. and 32° 02′ E.

DOCUMENTS: The following documents should be prepared and ready on berthing:

Port Health:

1 Maritime Declaration of Health.
1 Vaccination List.
1 Crew List.
1 Valid Derat Certificate.

Immigration:

3 Crew Lists.

Customs:

2 Crew Lists.
1 Ship's Stores List.
1 Crew Declaration of Bonded Stores, etc.

Agents:

2 Crew Lists.
Loading Certificate.
Safety Radio Certificate
Safety Equipment Certificate.

Customs: All vessels using the port, will be subject to Customs Inspection and must obtain a Customs Clearance.

PILOTAGE: Pilotage is compulsory and Pilots are provided by the Marine Department of South African Railways and Harbours.

Boarding points are determined by the Pilot, but generally speaking will be within an area approximately 5 km. East of the Harbour Entrance.

At the present time vessels can only enter and leave during daylight. Later this position will be reviewed to consider a 24 hour service.

Vessels with freeboard in excess of 30 ft. must have accommodation ladder rigged in addition to the pilot ladder.

PILOTAGE: Compulsory. One hour advance notice to be given to Port Captain through VHF radio – Port Operation – calling Channel 16, working Channel 12. Pilot boats fitted with multi-channel VHF. Motor pilot boat – black hull, white housing "Pilot-Loods" painted in black on housing. Steam pilot boat – black hull, brown housing and yellow funnel. Pilot taken aboard at outer anchorage. Pilots prefer pilot ladder and manrope system for boarding and disembarking.

RESTRICTIONS: Vessels not permitted to enter unless Agents have been appointed.

Port operates from: 0600 to 2200 hrs. Mondays to Fridays 0600 to 1300 hrs. Saturdays 0600 to 1900 hrs. Sundays. Tankers are handled in daylight only.

MAX. SIZE: Tankers: max. length 204 m. overall, draft 9.9 m.

Passenger and dry cargo vessels: max. length 239 m. overall, draft 9.9 m.

HEALTH: Pratique granted at first port of entry in South Africa. Pratique message 24 hours prior to arrival to "Port Health" at port of entry. If radio pratique not granted "Q" flag to be flown until ship has been cleared. Valid certificates must be held for smallpox and yellow fever. Ships from Eastern ports must also have valid certificates for cholera and typhoid.

Vessels will not be brought into harbour until radio pratique has been requested/granted, if this is first port of call on the South African range.

RADIO: East London Radio, call sign ZSA.

TUGS: Two tugs available. Join vessel in entrance channel. Tug's wires used at no extra charge.

DRY DOCKS: *Princess Elizabeth Graving Dock:*

Dimensions—	Overall docking length	198.5 m.
	Length on keel blocks	193.1 m.
	Length on bottom	198.5 m.
	Width at coping	31.2 m.
	Width at entrance top	27.2 m.
	Maximum width at sill level	22.9 m.
	Depth on entrance sill, HWOST	10.2 m.
	Depth on inner sill, HWOST	10.2 m.

A docking length of 209.2 m. can be obtained by placing the caisson in the emergency stop at the entrance.

Two 15-ton and one 5-ton electric cranes on 4.9 m. gauge track are available.

The dock can be emptied in 4 hours.

Slipway:

Extreme length	222.5 m.
Length of cradle	63.4 m.
Draft on keel blocks, HWOST:	
Forward end	3.5 m.
Aft end	6.7 m.
Capacity	100 tons

REPATRIATION: All facilities available.

AIRPORT: Ben Schoeman Airport – 8 km. from harbour. Daily flights to Johannesburg connecting with overseas flights by regular airlines.

TIME: GMT plus 2 hours.

HOLIDAYS: See "Durban".

POLICE/AMBULANCE/FIRE: Police 2–5555; Ambulance 2–1212; Fire 2–1212. National Sea Rescue 22555. Harbour Police 442032.

TELEPHONES: Telephones can be supplied at all berths. Arrange through Agents.

SHORE LEAVE: Allowed. No shore pass required.

DEVELOPMENTS: Ro/Ro berth under construction, the first stage almost completed.

AUTHORITY: South African Railways. Port Captain, East London.

MOSSEL BAY: 34.10 S. 22.09 E. (See Plan Book)

PORT LIMITS: Within a line drawn from Cape St. Blaize lighthouse to the mouth of the Little Brak River, thence along the highwater mark so as to include the foreshore between these points, together with Seal Island, the estuary of the Little Brak River as far as the tide flows.

DOCUMENTS: Refer to "Cape Town".

PILOTAGE: Compulsory. 1 hour advance notice to be given to Harbour Master and Pilot through VHF radio. Port operation calling Channel 16, Working Channel 12. Motor pilot boat – black hull, white housing "Pilot-Loods" painted in black on housing. International pilotage signals used. Pilot boards about 2 miles North of Cape St. Blaize Light.

ANCHORAGE: Open anchorage with unlimited depth.

RESTRICTIONS: Vessels not permitted to enter unless Agents have been appointed. No night berthing for tankers.

MAX. SIZE: Anchorage: no restrictions. Tankers: up to 32,000 d.w.t.

HEALTH: Pratique granted at first port of entry in South Africa. Pratique message 24 hours prior to arrival to "Port Health" at port of entry. If radio pratique not granted "Q" flag to be flown until ship has been cleared.

Valid certificates must be held for smallpox and yellow fever. Ships from Eastern ports must also have valid certificates for cholera and typhoid.

RADIO: Cape Town Radio, ZSC. Port Elizabeth Radio, ZSQ.

TUGS: 1 Pilot tug of 300 h.p., 1 of 200 h.p. available.

BERTHING:

Wharfage	*Dimensions*		*Depth at LWOST*		*Cranes (electric)*	
	Length (m.)	*Cope Level above LWOST* (m.)	*Max.* (m.)	*Min.* (m.)	*No.*	*Lifting capacity* (tons)
No. 1 Jetty (2 sides) each	107	5.6	4.6	3.0

*No. 1 Quay	44	4.4	1.7	1.7		
*No. 2 Quay	50	4.4	2.7	2.7		
No. 3 Quay	213	3.5	6.7	5.5		
No. 4 Quay	274	3.7	7.5	7.5	3	4

*Suitable for small fishing craft only.

DENSITY: 1025.

FRESH WATER: Available along Nos. 3 and 4 quays.

FUEL: Limited supplies of Gas oil along Nos. 3 and 4 quays.

MEDICAL: Cape St. Blaize lighthouse on 24-hour watch. Requests for medical assistance passed through lighthouse to Harbour Master and Pilot.

Hospital facilities available. Vessels in port should arrange medical facilities through Agent.

CUSTOMS ALLOWANCE: See "Cape Town".

CARGO GEAR: All cargo handling equipment must be in good condition and certificates available for inspection.

IDENTIFICATION CARDS: Required. Otherwise National Identity Cards, if available.

REPAIRS: Only minor repairs can be undertaken on a 380 ton capacity slipway.

TIME: GMT plus 2 hours.

HOLIDAYS: New Year's Day (1st January); Good Friday, Easter Monday, Ascension Day (dates vary); Republic Day (31st May); Settler's Day (1st Monday in September); Kruger Day (10th October); Day of the Covenant (16th December); Christmas Day (25th December); Boxing Day (26th December). Cargo is not worked on Christmas Day and Good Friday.

AIRPORT: George Airport, 40 km.

SHORE LEAVE: Allowed.

AUTHORITY: South African Railways. Harbour Master and Pilot, Mossel Bay.

PORT ELIZABETH: (Algoa Bay): 33.57 S. 25.39 E.
(See Plan Book)

PORT LIMITS: Bounded on the Southward by a line drawn from Cape Recife, East (true) to a point in the Indian Ocean, distant 1 nautical mile on the Northward by a line drawn from the extreme point of the East bank of the Zwartkops River, East (true) distant 1 nautical mile, on the Eastward by a line drawn between these 2 points, and shall embrace the foreshore between high and low water marks from Cape Recife lighthouse to the aforesaid line at East bank of the Zwartkops River, including that portion of the said river which lies on the seaward side of the bridge carrying the railway line to Alicedale.

DOCUMENTS: *Customs*

Form DA.1 Report Inwards/Outwards for ships.
Form DA.3 Certificate of clearance for ships.
Form DA.4 Transire – for a destination in the R.S.A.
Form DA.5 List of sealable goods on board ship.
Ships Crew List (Customs Department).
Livestock Form (Customs Department).

Post Office

P.160 Notification of departure of vessel.
P1/27 Certificate of departure of vessel.
P1/149 Ship mail declaration.
P.21 Post Office Certificate.

Port Health

Maritime Declaration of Health.
Crew List with last vaccination dates.
Deratisation Certificate.

Port Authority

T.958 Report of Arrival.
T.962 A Departure/Shifting Notification.
Ship's Manifest.

PILOTAGE: Pilotage is compulsory. Messages addressed to Port Captain, Port Elizabeth. Initial ETA together with draft, 72 hours prior to arrival, updated 12 hours prior to arrival and confirmed with Port Control when within VHF range. VHF radio calling on Channel 16. Working frequency Channel 12.

Pilot boats fitted with multi-channelled VHF. Pilot boats black hull with white superstructure, "Pilot-loods" painted black on white. Pilot boat stationed inside harbour and meets ship on arrival approximately 3.5 km. East of breakwater. Boarding requirements consist of pilot ladder together with 2-manropes or pilot hoist. Pilot ladder usually rigged on starboard side of docking. Algoa Bay is considered a safe anchorage for all sizes of ships, the bottom consisting mainly of sand. Usual anchorage for ships awaiting Pilot is 3.5 km. Eastward of breakwater, in the outer anchorage. Predominant winds are Westerly all the year, with East/South Easterly during the Summer months. The Westerly winds are the stronger of the two but are off land and cause little difficulty. Easterly's being from the sea are inclined to cause an uncomfortable sea.

ANCHORAGE: See "Pilotage".

RESTRICTIONS: Vessels not permitted to enter unless Agents have been appointed.

Dry-cargo ships 0600 to 2200 hrs. Pilot must be aboard by 2030 hrs.

Vessels which are considered *not gas free* are restricted to daylight entry only.

MAX. SIZE:

	Max. length	*Draft*
Passenger, dry-cargo and container vessels	Subject to Port Captain's prior approval	11.6 m.
Tankers	203.3 m. overall	9.3 m.
Ore carriers	251.5 m.	11.6 m.

HEALTH: Pratique granted at first port of entry in South Africa. Pratique message 24 hours prior to arrival to "Port Health" at port of entry. If radio pratique not granted "Q" flag to be flown until ship has been cleared.

Valid certificates must be held for smallpox and yellow fever. Ships from Eastern ports must also have valid certificates for cholera and typhoid.

RADIO: Port Elizabeth Radio. Call sign ZSQ.

VHF: See "Pilotage".

TUGS: Three "Z-Peller" diesel tugs available, fitted with radar and VHF. Tugs join between anchorage and harbour entrance. Tug's wires used at no extra charge.

BERTHING:

	Dimensions		*Depth at LWOST*		*Cranes*

Container back-up facilities: 21.4 ha. with 3,669 ground positions for deep sea container traffic and 5.9 ha. with 924 ground positions for coastwise container traffic.

10 straddle carriers, 21 haulers and 21 bath-tub trailers for internal use.

A rail terminal for forwarding and receiving containers to and from inland destinations.

Ro/ro facilities: Side loading for deep sea traffic. End loading for coastwise traffic.

Developments: The container project is complete except for the port administration building and port control tower, mechanical workshops, ancilliary buildings and new road access, all of which will have been placed in service before December 1981.

BULK HANDLING FACILITIES: *Ore Loading Plant:* Storage capacity approx. 460,000 tons. Rated loading capacity 1,360 t.p.h.

Ore loaders:

Maximum outreach from quay face	19.35 m.
Extreme elevated height of loaders above HWOST	13.92 m.

MEDICAL: Unrestricted hospital facilities. Medical assistance must be arranged through Agent.

DENSITY: 1025.

FRESH WATER: Delivery by hose ex wharf hydrants. 160 t.p.h.

FUEL: 48 hours notice required. Bunker fuel and gas oil available at ore berth. Bunker oil available at Berth No. 15.

CUSTOMS ALLOWANCE: See "Capetown".

CARGO GEAR: Undertaken by shore cranes. No floating crane available.

STEVEDORES: To be arranged through ship's agency.

IDENTIFICATION CARDS: Required. Otherwise National Identity Cards, if available.

CONSULS:

Belgium	Tel.	46561	Netherlands	Tel.	21986
Denmark	„	41 3489	Norway	„	52 2021

REPAIRS: Minor deck and engine room repairs.

DRYDOCKS: Nil. Electrically operated 1,200 ton slipway; depth on keel blocks F. 3.7 m.; A. 7.5 m. HWOST; telescopic cradle 75.4 m. long, minimum length 44.3 m. Max. length of ship 82 m. and max. beam 12 m.

SURVEYORS: All classification societies represented.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Shipmaster to liaise with stevedores.

REPATRIATION: All facilities available.

AIRPORT: 4 km. from harbour. Regular daily S.A. Airways flights to and from all major centres.

TIME: GMT plus 2 hours.

HOLIDAYS: New Year's Day (1st January); Good Friday, Easter Monday, Ascension Day (dates vary); Republic Day (31st May); Settlers' Day (1st Monday in September); Kruger Day (10th October); Day of the Covenant (16th December); Christmas Day (25th December); Boxing Day (26th December). Cargo is not worked on Christmas Day and Good Friday.

POLICE/AMBULANCE/FIRE: Police (City) 10111, Police (Harbour) 520-2280; Ambulance 2-22311; Fire 2-1555.

TELEPHONES: Telephones can be supplied at all berths. Arrange through Agents.

IDENTIFICATION CARDS: No passes issued.

SHORE LEAVE: Allowed.

DEVELOPMENTS: See "Berthing".

AUTHORITY: South African Railways. Port Captain, Port Elizabeth.

RICHARDS BAY: 28.48 S. 32.06 E. **(See Plan Book)**

LOCATION: The port is located some 200 km. North of Durban. Mid point of the bay is approximately 28° 48′ S. and 32° 02′ E.

DOCUMENTS: The following documents should be prepared and ready on berthing:

Port Health:

1 Maritime Declaration of Health.
1 Vaccination List.
1 Crew List.
1 Valid Derat Certificate.

Immigration:

3 Crew Lists.

Customs:

2 Crew Lists.
1 Ship's Stores List.
1 Crew Declaration of Bonded Stores, etc.

Agents:

2 Crew Lists.
Loading Certificate.
Safety Radio Certificate
Safety Equipment Certificate.

Customs: All vessels using the port, will be subject to Customs Inspection and must obtain a Customs Clearance.

PILOTAGE: Pilotage is compulsory and Pilots are provided by the Marine Department of South African Railways and Harbours.

Boarding points are determined by the Pilot, but generally speaking will be within an area approximately 5 km. East of the Harbour Entrance.

At the present time vessels can only enter and leave during daylight. Later this position will be reviewed to consider a 24 hour service.

Vessels with freeboard in excess of 30 ft. must have accommodation ladder rigged in addition to the pilot ladder.

ANCHORAGE: 3 to 5 miles off Port but not opposite Entrance (precise area not yet demarcated).

Quality of Bottom: Sandy.

Note: Anchorage is similar to Durban and in high S.W. winds anchorage is safe, but in high N.E. winds caution should be exercised.

MAX. SIZE: LOA Max. 314 m. Beam max. 47.25 m. Draft max. 17 m. D.W. Limit max. 165,000 d.w.t.

Minimum Ballasted Condition on Entry:

Length	*Draft – Fore*	*Draft – Aft*
600 ft.	20 ft.	24 ft.
700 ft.	25 ft.	28 ft.
800 ft.	26 ft.	30 ft.
900 ft.	27 ft.	32 ft.
over 900 ft.	28 ft.	34 ft.

HEALTH: Radio Pratique can be obtained by cabling Port Health – Durban using the standard international procedure for working. See "Radio".

RADIO: *Arrival Advice:*

To "Porthealth Richardsbay" – direct through Durban Radio – 24 to 48 hours prior arrival – advising ETA, last port, date sailed, number of crew, full inoculation/vaccination status, and state of health of crew, and requesting Radio Pratique. Porthealth will cable vessel directly, either granting pratique or requesting further details. These messages are free of charge.

To "Portcaptain Richardsbay" – direct through Durban Radio – 48 hours prior arrival, advising ETA, draft, freeboard and reason for call at Richards Bay.

VHF: Vessels can communicate with Port Control, on Channel 16 VHF watch is maintained continuously. When at anchor, listening watch should be kept to receive berthing instructions.

TUGS: Tug attendance is compulsory.

Tugs are owned and operated by South African Railways and Harbours and consist of the following:

1. Voight Schneider (1 tug)	4,200 h.p. Bollard Pull 43 tons.
2. Diesel Kort Nozzle (2 tugs)	4,400 h.p. Bollard Pull 50 tons.

BERTHING: Line boats are provided by the Harbour Authorities, as are berthing gangs.

Coal Terminal:

Berths No's 301 & 302 are used solely for the export of South African Steam Coal. The plant is owned and operated by the Richards Bay Coal Terminal Company (Pty.) Ltd.

Length	700 m.
Depth	19 m.
Permissible draft	17.1 m.
Quality of bottom	Sandy to hard
Density of sea water	Between 1000/1025 (Fresh to salt)
Height of quay above HWOST	3.2 m.

Shiploaders: Two. (Dimensions apply to one machine)

Loading capacity (nominal)	6,500 m/t.p.h.
Loading capacity (average)	3,500 m/t.p.h.
Loading capacity of Trimmer	3,000 m/t.p.h.
Working Range of Boom	15° up to 15° down
Height of Boom above HWOST with Loader in best working position	21.0 m.
Height of Boom above HWOST with Loader at max. working elevation	21.6 m.

Clean Cargo Berth:

On the North side of the harbour 1,300 m. of quay wall has been constructed and commissioned (Berths 609 and 701 – 703: height of quay above HWOST 3.2 m. Quality of bottom, sandy.)

Berth 609	length	300 m.
	depth	12.8 m.
	permissible draft	12.0 m.
Berth 701	length	300 m.
	depth	12.8 m.
	permissible draft	12.0 m.
Berths 702/703	length	700 m.
	depth	19 m.
	permissible draft	17.1 m.

Berths 701–703 have been equipped with 8×4 ton wharf cranes and 5×15 ton cranes and a shiploader of max. capacity 2,500 t.p.h. as well as rail tracks and adequate back-up areas.

A phosphoric acid terminal with a storage capacity of 36,000 tons is located behind the quay and tankers are loaded at a rate of 1,200 tons per hour via means of pipe manifolds at Berth 703.

A very substantial multi-purpose bulk handling facility is being developed behind Berths 701-703 for the import of sulphur, petroleum coke and alumina. The terminal, which is partially completed, and comprises truck tipplers, silos, open and covered storage, conveyors, etc. is at present handling the export of zircon, rutile, titanium slag, pig iron, ferro-alloys and logs by means of wharf cranes or belt loader. The ship's unloader is due for completion late 1980.

Berth 609, which is served by rail tracks and an adequate surfaced area is currently being used for the import of heavy lift cargoes.

Berth 703 has been provided with a pipe-line to load bulk phosphoric acid ex-storage tanks. Max. pumping rate 2,000 t.p.h.

MEDICAL:

Hospital: There is a modern and well equipped hospital at Empageni. (Approx. 25 km. from the berth).

Doctor/Dentist: Usual port services available on 24 hour basis.

DENSITY: 1026.

FRESH WATER: Fresh water is available at the berth. Rate approx. 25 t.p.h.

FUEL: Heavy and Medium Fuel Oil. Diesel Oil and Gasoil are available by pipe-line at the berths 301, 302 and 209 only. Bunkering can take place concurrently with loading.

Stems for bunkers should be placed with normal bunker suppliers who will arrange delivery through the Bunker Supply Company at Richards Bay. All vessels calling for bunkers must either be gas free or inerted before they will be permitted to enter the port.

CONSULS: In Durban.

REPAIRS: Written approval must be obtained from the Port Authorities, via the Agents for vessel to immobilise engines to carry out repairs. Repairs may be carried out at the berth.

SURVEYORS: Lloyds, ABS, BV and NV in Durban.

GANGWAY/DECK WATCHMAN: Recommended.

OPENING/CLOSING HATCHES: By crew.

CUSTOMS ALLOWANCE: See "Capetown".

REPATRIATION: Possible.

AIRPORT: There is an airport at Richards Bay 26 km. from the Coal Berth, and there are 4 flights per day to Durban, where international connections can be made.

HOLIDAYS: *Local Holidays:*

New Year's Day, 1st January; Good Friday; Easter Monday; Ascension Day; Republic Day, 31st May; Settler's Day, 1st September; Kruger Day, 10th October; Day of the Covenant, 16th December; Christmas Day, 25th December; Family Day, 26th December.

Where such a holiday falls on a Sunday, the Monday following becomes a Public Holiday.

TIME: GMT plus 2 hrs.

POLLUTION: The Port Authorities demand that no vessel using the port shall discharge any garbage, refuse, vegetable or food matter, deck cleanings polluted bilge water, oil or rubbish of any description in the vicinity of or in the port of Richards Bay.

Heavy penalties will be imposed for breach of the regulations.

Vessels arriving in Ballast must have clean ballast on board, as deballasting takes place alongside the berth. Dirty ballast pumped into the harbour will incur heavy penalties for pollution.

TELEPHONES: Telephones are available at the berth. Application for the service should be made through the Agents in advance.

All telephone calls made will be charged to the vessel's account.

Caution: With direct dialling available internationally it is strongly recommended that telephones are placed in the custody of a responsible officer to avoid abuse.

SHORE LEAVE: There are no restrictions on shore leave for crew. Entertainment in the Richards Bay area is very limited. Durban, 2.5 hours drive away, however, can offer very much more.

IDENTIFICATION CARDS: Seaman's Book sufficient.

DEVELOPMENTS: The development of the town and surrounding areas is taking place rapidly together with large scale industrial and commercial developments.

Apart from the development of the extensive multi-purpose bulk handling terminal behind Berths 701-703 the Railway Administration is providing an additional coal berth (No. 303) and the Richards Bay Coal Terminal Company are expanding their handling and storage facilities for an export capacity exceeding 40 million tons per annum.

GENERAL: The harbour and the quays are owned by South African Railways and Harbours.

Provisions: Stores and provisions can be obtained through local Ships Chandlers.

Game Parks: National Parks Board Game Reserves (Hluhluwe and Umfolosi) are within easy reach of Richards Bay by car.

Car Hire: Cars can be hired, through the Agents at reasonable cost to officers and responsible crew members only. An International Driving Licence is required to make use of this service.

Navigational Aids: Lighthouse (500,000 candlepower). Radio beacon at lighthouse "ZK", on 285.5 kc/s. Continuous transmission, North of the harbour at position 28° 48′ S., 32° 06′ E.

Leading lights – Front Red, fixed during day, flashing at night in position 28° 47′ 24.725″ S., 32° 02′ 44.711″ E.

Breakwater tip lights (2 flashes per 5 secs.) South light Red, North light White.

Tides: Tidal change between HWOST and LWOST is approximately 2 m.

Prevailing Winds: South Westerly; North Easterly.

SHIPMASTER'S REPORT: January 1980.

Pilotage: Compulsory.

Restrictions: At the present time vessels cannot enter or leave during the hours of darkness. However, 24 hour service is under consideration. Vessels able to dock and un-dock at any stage of the tide.

Max. Size: 165,000 d.w.t. LOA 314 m., beam 47.25 m., and max. draft 17 m.

Tugs: Three tugs available.

1×Voight Schneider 4,200 h.p. Bollard pull 43 tons.

2×Diesel Kort Nozzle, both 4,400 h.p. Bollard pull 50 tons.

Radio: Richard's Bay Signal Station and Port Control.

VHF: Channels used 16, 9, 11, 12, 13 and 14. Pilot and Port Authority on Channels 16 and 12.

Berthing: Distance from entrance to berth 6.5 km. Maximum size 165,000 d.w.t., length 314 m. and max. draft 17.1 m.

Hours of movements within the port, 0600 hrs. to 1800 hrs. A multi-purpose bulk handling appliance is presently being erected. There are 8 cranes of 4 tons capacity and 5 cranes of 15 tons capacity available. No Ro/Ro facilities. No floating crane available. Port not geared to handle palletised cargoes.

Consuls: Nearest Consuls in Durban.

Facilities Available: Fresh water; Fresh provisions; Repairs (limited); Machine ship (limited); Airport; Lloyd's Surveyor; Salvage Surveyor (from Durban); Laundry service; Bunker fuel oil and diesel oil (at coal berth) and Berth No. 209. Lubricating oils; Doctor and hospital; Groceries and Meats.

AUTHORITY: South African Railways, Port Captain, Richards Bay.

SALDANHA BAY: 33.02 S. 17.58 E. (See Plan Book)

DOCUMENTS: *Port Health:*
1 Maritime Declaration of Health.
1 Vaccination List.
1 Crew List.
1 Valid De-ratting Exemption Certificate.
Immigration:
3 Crew Lists only.
Customs:
1 Crew List
1 Ship's Stores List.
1 Crew Declaration.
Agents:
2 Crew List.

Customs: Arrangements have been made with Customs that loading shall commence before Customs Entry is completed. Customs will normally board on arrival for the purpose of checking and sealing Bonded stores, etc.

Immigration: On arrival at the port, any vessel which is not cleared by Immigration shall show the 'I' flag. No persons may disembark or embark without the express permission of the Immigration Officers until such time as Immigration formalities have been completed.

PILOTAGE: Pilotage is compulsory at Saldanha Bay, and is undertaken by fully qualified Master Mariners employed by the South African Railways and Harbours.

APPROACHES: Masters of vessels are warned not to proceed too close to the shore line in the vicinity of Saldanha Bay harbour, nor to enter the S.B.H. limits without a Pilot. The Wasserfall Bank situated between Jutten and Malgas Islands across the entrance to the outer bay constitutes an unmarked hazard. The recommended position to embark the Pilot is North Head light × 050°T (ships in ballast only). Distance 2 nautical miles but *not* in any circumstances closer to the Saldanha Bay harbour limits.

Ships in loaded or part loaded condition should board Pilot in position North Head light 030° distance 3 nautical miles.

MAX. SIZE: LOA, 350 m. Draft, 21.25 m.

HEALTH: Vessels requesting free pratique should cable Port Health, Cape Town, via Cape Town Radio (ZSC) at least 24 hours before arrival. There is no charge for messages addressed to Port Health. When free pratique cannot be granted, then the vessel will be required to show the 'Q' flag on arrival and will be boarded by Port Health Inspectors at the anchorage in Saldanha Bay.

RADIO: Saldanha Bay will be served by Cape Town Radio (ZSC).

Arrival: Vessels calling at Saldanha Bay to load ore will be required to send their ETA 96 hours prior to arrival, stating the approx. tonnage of ore required, the type of ore and the loading programme. Further messages will be required to be sent at 48 hours and 24 hours prior to arrival, updating the ETA. These ETA's are to be sent via Cape Town Radio (ZSC) addressed to Port Captain, Iscor Maritime Co-ordinator and also to the Agent. In addition, VHF contact on Channel 16 or MF on 2182 kHz must be established as soon as possible with Port Control. As pilotage is lengthy, arrangements to dispatch pilot vessel must be made at least 3 hours before ETA.

Vessels calling at Saldanha Bay after leaving Cape Town will be required to send by telex their ETA 24 hours before the expected time of arrival at Saldanha Bay, together with their final tonnages of cargo required, type of ore and loading programmes.

With the final 24 hour ETA the Master will be required to provide the draft forward and aft, and the de-ballasting time required on arrival. If there is any change to this programme a further message should be despatched as soon as possible after any such change is known.

48 hours prior to arrival, in addition to the updated ETA, the vessel must indicate her requirements, i.e. fuel, fresh water, other services to Port Captain, Iscor Maritime Co-ordinator and the Agents. Final advice of loading programme:

1. Quantity
2. Grading
3. Sequence

to be provided at least 24 hours before Notice of Readiness is given. Failure to provide this information may result in a delay of 12 hours before loading commences. Vessels are to request docking instructions from Port Control 6 hours before arrival. Instructions will be given promptly and concisely.

Vessels will be loaded in regular turn subject to cargo availability and Charter Party Lay Days, providing they berth with hatches open and are ready for loading in all respects.

VHF: *Port Control:* Saldanha Bay Port Control is equipped with VHF and contact can be made direct using Channels 16, 12, 11, also MF 2182.

Tugs: The tugs operate with VHF Channels 1 – 28 and 60 – 88, and radio telephone.

TUGS: There are 3 tugs stationed in Saldanha Bay Harbour operated by the S.A.R. & H. Each tug is propelled by Voith Schneider gear, and is of 4,000 h.p. and 42 ton bollard pull.

There are also, one small diesel tug of 900 h.p. and four diesel launches for running lines.

BERTHING: The jetty construction is of the caisson type, spanned with a deck construction between the caissons. The total jetty length is 991.65 m. and the total mooring length available will be 650 m. for iron ore loading vessels and 310 m. for oil tankers at a depth of 23 m. below chart datum. Vessels can be accommodated on both sides of the jetty and the jetty is equipped with adequate quick release hooks and fenders.

The design of the jetty makes provision for the mooring of 350,000 d.w.t. loaded vessels with a max. theoretical approach speed of 18 cm./sec. In practice, the approach speed of a vessel will be limited to between 10 and 12 cm./sec. as a maximum. The approach speed and relative position of a vessel to the jetty will be measured by docking sonar equipment, suitably positioned on the jetty and information will be relayed to the Pilot by means of light indication, radio and a portable instrument.

The width of the dredged area is 260 m. maximum on either side of jetty, tapering to 220 m. at the oil jetty, 380 m. at No. 4 Buoy and 400 m. at No. 1 and 2 Buoys.

A turning basin with a diameter of 580 m. and a depth of 23.20 m. below CD is provided in the navigational channel, seaward of the jetty.

From the turning basin seawards the depth of the navigational channel increases to 23.45 m. CD and eventually to 23.70 m. CD in the section marked by buoys. From the outer buoys the depth increases from 24 m. to 45 m. at the outer harbour approaches.

Loading: Bulk ore loading will be effected by means of two luffing, slewing and travelling ship loaders, together capable of loading continuously at a rate of 8,000 t.p.h. average, with a peak rate of 10,000 t.p.h.

MEDICAL: *Hospitals:* There is a fully equipped hospital in Vredenberg, 13 km. from Saldanha Bay. Serious medical cases, however, will normally be referred to one of the hospitals in Cape Town.

Doctors: There are several doctors available in Saldanha Bay and nearby Vredenberg. To expedite appointments, however, and to arrange for attendance on board, Agents should be consulted.

Dentist: There are several dentists available in the area, and in order to expedite appointments, Agents should be consulted.

AIRPORT: International Airport near Cape Town. Military airport locally but special landing rights have to be applied for.

FRESH WATER: Fresh water will be delivered at the rate of 35 t.p.h., and at a cost of 45 cents per kilolitre. Application for the supply of water should be made to Port Captain through the Agents.

FUEL: Bunkers, not yet available ex jetty.

CONSULS: There are no Consulates established in Saldanha Bay, but the following countries are represented at Cape Town:

Argentina
Australia
Austria
Belgium
Bolivia
Brazil
Canada
Chile
Denmark
El Salvador
Finland
France
Germany
Greece
Holland
Italy
Japan
Monaco
Norway
Panama
Peru
Portugal
Rhodesia
Spain
Sweden
Switzerland
Taiwan
United Kingdom
U.S.A.
Uruguay

CUSTOMS ALLOWANCE: See "Capetown".

HOLIDAYS: The following are recognised Public Holidays in the Republic of South Africa:

New Year's Day, January 1st; Good Friday; Easter Monday; Ascension Day; Republic Day, May 31st; Settlers' Day, September 4th; Kruger Day, October 10th; Day of the Covenant, December 16th; Christmas Day, December 25th; Boxing Day, December 26th.

Should any of the above mentioned days fall on a Sunday, the following Monday is observed as a Public Holiday.

These do not affect Ore/Oil Cargo operations, working 24 hours per day, 365 days per year.

TELEPHONES: Telephone facilities are available from the jetty. In order to obtain a telephone, however, arrangements will have to be made by the Agents. In this respect we would point out that many foreign countries have direct dialling facilities with South Africa, and in all cases arrangements should be made for lockable telephones to be placed on board, and the use of that telephone placed under the control of the Master.

GENERAL: *Removal of Rubbish:* Arrangements are available for the removal of rubbish and can be made through the Agents.

Weather: The climate is temperate. Average high temperatures year round are 20°C (68°F) and average low temperatures are in the region of 11°C (52°F). Sea water temperatures average 16°C. Prevailing winds in Summer are SSE'ly and in Winter NW'ly. Rainfall figures are approximately 300 m.m. per annum. Saldanha Bay is a Winter rainfall area. Fog occurs generally in the March to August period. Currents – there are no sea or thermal currents in the harbour area. Tidal currents generally will not exceed 0.05 km./hr.

Currency: The standard unit is the Rand. One Rand divided into 100 cents. Exchange rates vary, but for practical purposes at the time of writing, one can use the figure of $1.12 equals R1.

Electricity: Can be made available ex jetty on application to S.A.R. & H. via the Agents.

Compressed Air: Will be available ex quay on application to S.A.R. & H. via the Agents.

Cranes: A mobile crane will be made available through S.A.R. & H. via the Agents.

Ship Chandlers: Local Chandlers now operating.

Sporting Facilities: Can be arranged for all sports through the Port Captain in co-operation with Military and Naval Authorities in area.

SHIPMASTER'S REPORT: 1977 (Vessel – 150,000 d.w.t. OBO)

Port Limits: A line drawn between North Head and South Head lighthouse. Vessel considered arrived after passing these limits. Notice of Readiness accepted when first hatch open ready for loading or when berthing completed if vessel docks with open hatches.

Documents: Request Radio Pratique 48 hours before arrival giving (1) Name and Nationality of Vessel (2) Last Port (3) Destination (4) Health condition on board (5) Number of crew and passengers (6) Type of cargo or in ballast (7) ETA.

Pre-arrival cable via ZSC Capetown to Iscor Vredenburg, Port Captain Saldanha and the vessel's Agents.

Advise ETA 96, 48 and 24 hours out and if any changes. With 24 hours ETA, or earlier if available advise Agents:–

(a) Final stowage required and types of ore. (Hatch Totals).
(b) Loading sequence. (Hatch Runs, Trimming stops, etc.).
(c) Deballasting time required.
(d) Drafts on arrival, estimated drafts on sailing.

(e) Whether OBO vessel and whether or not in possession of gas-free certificate.

(f) On vessel's first call – Summer d.w.t., LOA, breadth from foremost hatch coaming to bow, aftermost hatch coaming to stern, distance upper gangway platform to stern and whether leading forward or aft. Advise Agents all requirements 48 hours pre-arrival.

Port Papers: 4 copies Crew and Passenger list.
3 copies report inward DA1 to DA3 (Agents supply).
1 Crew declaration.
1 Store list.
1 Slop chest list.
1 Livestock list if applicable.
1 Gasfree Certificate.

If vessel's last cargo oil and no gasfree certificate on board, Agents will arrange if pre-advised, chemist comes from Capetown.

Pilotage: Compulsory. Pilot boards off North Head but in practice comes some way to seaward to meet vessel. Cutter is a rakish red craft capable of 23 knots, fitted VHF, all normal Channels. IMCO regulation pilot ladders required complete with manropes. There are 5 Pilots in the port.

Anchorage: Vessels are permitted to anchor in the bay under pilotage. Swell and depth of water make the area to seaward unsafe.

Restrictions: Vessels with drafts up to 21.25 m. can be handled at high tide and the ports largest vessel to date was a 284,000 tonner. When the developments are complete it is expected that vessels of at least 350,000 d.w.t. can be handled.

Pratique: See "Documents".

Radio: ZSC Capetown for messages, and the Port Radio Service on arrival.

Radar: Decca 50S surveillance radar system in Port Control Office, manned 24 hours – VHF communication.

Tugs: 3 Voith Schneider tugs of 3,960 b.h.p. each. Tugs connect to vessel in berth approaches. Tugs lines at no extra charge.

Berthing: Vessels berth against Yokohama fenders on either East or West side of quay. Ordinary moorings but extra moorings available on hire during infrequent heavy swell conditions. Vessels are always swung to berth head out. There is apparatus for indicating vessel's approach velocity.

Handling Facilities: 2 ore loaders nominal capacity 10,000 t.p.h., 1 loading and the other placed for next run. Actual load rate about 7/8,000 t.p.h.

Medical: Services available. Advise through Agents pre-arrival. Small hospital at Vredenburg and extensive facilities in Capetown, 1.5 hours away.

Density: Salt – 1025.

Fresh Water: Available ex-jetty at about 40 t.p.h. Berthing staff connect hose.

Fuel: Not available at present. Small stocks of diesel and gasoil. Presume heavy oil could be supplied by coaster ex-Capetown if pre-arranged.

Repairs: Small repairs are possible locally. Major repairs can be handled from Capetown, Globe Engineering have a branch at Saldanha. If vessel has urgent repairs pre-arrange attendance with Agent.

Note: Permission is required to immobilize main engine. Also advantageous to pre-arrange.

Surveyors: Available on request from Capetown for all Societies.

Watchmen: Not required, but readily available.

Customs Allowance: (Period of 4 days) – Local officer enforces allowances.

Master: 230 gm. tobacco (any form), 1 litre spirits (any form), 3 litres of wine, 3 litres beer or stout.

Officers and Petty Officers: 173 gms. tobacco, 1 litre of spirits, 3 litres wine, 3 litres beer.

Crew: 115 gm. tobacco, no spirits, no beer, 3 litres wine.

Wine only permitted on ships where wine is part of rations – French, Italian, Spanish vessels etc.

Repatriation: Readily available, 1.5 hours in car to Capetown, thence by International air network. Due regularity of crew changes off Capetown there are competing courier services etc., so very few delays. Hotel accommodation is available Saldanha if required.

Time: South African Standard.

Holidays: Port operates through 365 days a year.

Police/Ambulance/Fire: Through Port Control and VHF.

Telephones: Available.

Services: Cleaning gangs, riggers, watchmen, etc., readily available.

Shore Leave: Saldanha town 10 miles from dock.

Identity Cards: Not required, except on tankers.

B/L Figures: By survey of ship's drafts. Vessels are not permitted to submerge their Plimsoll Lines, avoid sag or shortshipment inevitable.

General: Provisions and laundry available from Capetown, cable in, lorries permitted on dock provided no interference with operations, but not at tanker berth. Service technicians also available from Capetown.

Trip to and from Capetown regularly and routinely undertaken by all and sundry involved at Saldanha, but to avoid time loss and delay ensure that wherever possible contractors and Agent are aware of requirements.

AUTHORITY: The South African Railways and Harbour Administration.

NOTES

Please also advise Shipping Guides Ltd.

South Atlantic Islands

ASCENSION ISLAND, GEORGETOWN:

07.55 S. 14.20 W.

DOCUMENTS: Crew and Passenger lists, Health documents, Manifests and Bills of lading if discharging cargo.
PILOTAGE: No pilots are available and not required as it is an open anchorage. Require 48 hours notice of ETA. Ascension Radio operated by Cable & Wireless will reply.
RESTRICTIONS: None – but if vessel has not been here before it would be advisable to wait until daylight.
ANCHORAGE: Only 1 ship can anchor at a time. There is 14 fathoms of water in the anchorage and vessels of 28,705 tons have used this anchorage. The other anchorage used by tankers is at English Bay and there is a special berthing procedure which the Oil Company give to Captains of tankers. When in doubt contact Harbour Master for information.
HEALTH: Pratique should be requested when giving the ETA and will be granted by either Cable or VHF.
RADIO: If coming from the North via Freetown Radio, and from the South via Cape Town. VHF Channel 16 available. Emergency frequency, Ascension Radio 2182 kHz.
TUGS: No tugs available.
BERTHING: Open anchorage only, no berthing alongside.
MEDICAL: Facilities available, if possible 48 hours notice required. There is a 12-bed hospital in Georgetown. Inoculation and vaccination and yellow-fever certificates not required. Other than Government personnel no one is allowed to land on Ascension without an entry permit.
TANKERS: Only 1 berth available at anytime.
FRESH WATER: None available.
FUEL: None available.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Usually done by stevedores.
CONSULS: No Consulates. British Administrator attends to all requirements.
REPAIRS: Only minor repairs can be effected.
REPATRIATION: No facilities for crew changes. Repatriation can be arranged but only in the case where a person has been hospitalised. If a ship puts in with a medical case on board an M.O. will visit the ship. Fees paid to the Cable & Wireless representative. If the patient is hospitalised the Master must guarantee in writing that all hospital fees and the air fare to Antigua or Johannesburg will be honoured by his shipping line Agent. As so few ships call at Ascension no hospitalised patients can be evacuated by sea. All patients received from ships are evacuated on M.A.C. flights to Antigua or Johannesburg. These flights are run weekly to Antigua and to Johannesburg twice a month.
AIRPORT: Airport 2 miles. U.S.A.F. No civil airlines call here.
TIME: Always GMT.
HOLIDAYS: Cargo vessels are discharged during public holidays – no night work.
GENERAL: There are no facilities for visitors on the island. Anchorage must be vacated when a mail vessel is due.
SHORE LEAVE: Not permitted.
AUTHORITY: The Administrator.

FALKLAND ISLANDS, PORT STANLEY:

51.50 S. 58.56 W. **(See Plan Book)**

PORT LIMITS: West of the line joining Mengeary Point and Cape Pembroke.
DOCUMENTS: Crew Lists, Passenger Lists, Customs, Health Documents, Manifests, Bills of Lading, Ship's Papers, Ship's Certificates.
PILOTAGE: Pilotage should be requested via Cable & Wireless Radio Station. 24 hours notice of arrival required. Frequency 2182.
ANCHORAGES: For large vessels, the anchorage is somewhat confined; except S. of Navy Point, where there is good swinging room in depths of from 8.2 m. to 10.4 m. (27 ft. to 34 ft.), it is necessary for a long vessel to moor. There is good anchorage N.N.E. of the cathedral, but, owing to the prevailing strong W. winds, a vessel may have some difficulty in turning, when leaving this position. The best time to leave is after 1800 hrs. or before 0800 hrs. as, unless there is a widespread area of bad weather over the islands, the wind, which is local, is seldom strong between these hours. The holding ground is good, and vessels have not dragged during winds of up to force 8, though a second anchor is often necessary.

The bottom of the harbour is stiff mud, which is very noisome and sticky; it is necessary to allow plenty of time for cable washing when weighing.

Two oil barges and numerous small boats, none of which exhibit a riding light at night are moored at the South side of the harbour.
RESTRICTIONS: No restrictions on entry.
RADIO: Cable & Wireless Ltd.
VHF: Port Radio, call sign "Port Control", listening on Channel 16 from 0800-1200 hrs. and 1315-1630 hrs.
RADAR: No port radar service.
TUGS: No harbour tugs.
BERTHING: Falkland Islands Company jetty with a depth of 1.5 m. at its head. T shaped Head.
CRANES: 1 × 5 ton crane.
BULK CARGO FACILITIES: Nil, drummed cargoes only are handled.
STEVEDORES: 1 week's notice required. If Falkland Islands Company charter vessel (4 voyages a year) is being worked then stevedores will not be available until work on the charter vessel has been completed.
MEDICAL: Advance notice required.
TANKERS: Advance information should be sought.
DENSITY: Full salt water.
FRESH WATER: Available at night. Delivery by direct hose. Cost £2 per ton +33% of the cost of the labour involved.
FUEL: Fuel is available only by special arrangement with the Ministry of Defence. Grade 47 Cetane (viscosity cSt 100° F – 1.8; s.g. at 15° C – 0.840). Delivery by lighter and pump.
FIRE PRECAUTIONS: Normal safety requirements.
CONSULS: Norwegian.
REPAIRS: Minor repairs to machinery.
DRY DOCKS: Nil.
SURVEYORS: Not available.
GANGWAY/DECK WATCHMEN: Recommended.
OPENING/CLOSING HATCHES: By ship's crew.
CUSTOMS ALLOWANCE: Quantity permitted by crew is one bottle of spirits, 200 cigarettes or 1 lb. of tobacco, 6 bottles of wine, 1 case (24 cans) beer.
CARGO GEAR: There is 1×5 ton crane. Ships gear may be used.
REPATRIATION: With a twice weekly Air Service repatriation could be arranged.
AIRPORT: 5 miles from Port. Feeder airlines connect with Comodoro Rivadavia, Argentina.
TIME: GMT minus 4 hours. Summer time from October to end of March.
HOLIDAYS: Cargo can be handled on the 10 public holidays.
POLICE/AMBULANCE/FIRE: Police – 95; Fire – Exchange; Ambulance – 54.
TELEPHONES: Connection possible at rate of £20 a year.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Seamans book sufficient.
REGULATIONS: No particular or unusual regulations.
DELAYS: Delays may be experienced if berthing alongside only commercial jetty if firms charter vessel is being handled. Four voyages a year: – turn around 1 week.
DEVELOPMENTS: No port developments under way.
AUTHORITY: Harbour Master.

ST. HELENA, JAMESTOWN: 15.56 S. 05.40 W.

PORT LIMITS: Within 3 miles radius of the port. Laytime commences at the anchorage.
DOCUMENTS:
3 copies of Crew List.
3 copies of Passenger List.
10 copies of Manifest.
1 Health form.
PILOTAGE: No official Pilot. Agents sometimes hire a Pilot for ships requiring one.
ANCHORAGE: The harbour consists of an open roadstead with anchorages shown on charts.
MAX. SIZE: Any size vessel can enter the Port. There is little rise and fall of tide and current negligible.
HEALTH: Pratique will be granted by the boarding party or by telegram from Port Health Officer. If suspected disease or fever, the Port Health should be informed by telegram in advance of anchoring so that the necessary precautions can be taken.
RADIO: Name: St. Helena Radio. Call sign for W/T working – ZHH. Frequencies: 500 and 461 kHz. A2, A1. 12,963.5 kHz. A1. Working Hours: 500 and 461 kHz – Weekdays from 0800 to 2000 GMT. Sundays from 0800 to 1300 GMT. 12, 963.5 kHz – Daily except Sundays from 1200 to 1300 GMT. Listening watch on Channel 5 and Channel 6.

Call sign for R/T working – St. Helena Radio. Frequencies: 2182 and 3162 kHz A3H, A3J and A3A. 4397.7, 8737.5 and 13150.4 kHz. A3J A3A. Working Hours: 2182 and 3162 kHz – Weekdays from 0800 to 2000 GMT. Sundays from 0800 to 1300 GMT. 4397.7, 8737.5 and 13150.4 kHz are only operated on request and ships should answer on Channels 414, 807 and 1217 respectively.
TUGS: None. There are 3 towing launches (from 16 to 28 h.p.) for harbour use only.
BERTHING: Vessels anchor in 18–20 fathoms offshore, in open roadstead. There is deep water (sufficient for ocean-going vessels) right into the area where cargo lighters and other small craft are moored.
STEVEDORES: 48 hours notice required by Agent, also particulars of tonnage of cargo.
MEDICAL: Agent should be notified if medical attention required. A resident staff of three doctors, plus nursing staff, in a well-equipped modern hospital. The basic requirements for intending visitors is a certificate of vaccination against smallpox.
FRESH WATER: Delivered by floating pipeline at a rate of approximately 14 t.p.h.
FUEL: No stocks of marine fuel. Ordinary diesel oil is available in drums of 45 gallons (supplied ex South Africa) and only limited stocks for local needs are held.
OPENING/CLOSING HATCHES: Stevedores can do this, but preferable for crew to open on arrival so that work can start as soon as stevedores arrive on ship.
CERTIFICATES: Vaccination certificates required for all crew. Derating certificate should be valid.
CUSTOMS ALLOWANCE: No restrictions. Free use on board.
CARGO GEAR: All discharge carried out by vessels derricks into lighters. Agents provide own cargo nets, etc. There is one 30 ton shore crane.
CONSULS: French Consul. Appointed representatives for Denmark and Norway.
REPAIRS: Small repairs can be carried out (welding or turning pipes, etc.).
REPATRIATION: No facilities for crew changes. Only for those left behind for hospitalisation.
AIRPORT: No airport on St. Helena.

TIME: GMT throughout the year.
HOLIDAYS: New Year's Day (1st January); Good Friday; Easter Monday; St. Helena Day (21st May); Whit Monday; Queen's Official Birthday; August Bank Holiday; Christmas Day (24th December); Boxing Day (25th December). Cargo work can be arranged except on Christmas holidays.
POLICE/FIRE/AMBULANCE: No telephone numbers. Must ring exchange.
SHORE LEAVE: Allowed. No restrictions provided vessel has free pratique.
DELAYS: No delays in berthing. Loading or discharge can be delayed by bad weather due to swell alongside wharf.
AUTHORITY: Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

Spain

AGUILAS and HORNILLO: 37.24 N. 01.35 W. (See Plan Book)

DOCUMENTS: See "Almeria".
PILOTAGE: Hornillo port has no Pilot. The Pilot of port of Aguilas which is less than a mile from Hornillo, does pilotage services of both. To enter both ports Hornillo and Aguilas, anchor mile or a mile and half distance from entrance of Aguilas. Wait for Pilot with engine stopped. To call Pilot give three long blasts several times. Pilot's launch is small motor boat painted white, with letter "P" painted on both sides of boat. During night it carries white light on top of mast, and 8 ft. lower a red light, besides the usual lights.
RESTRICTIONS: It is not possible to enter Hornillo port during dark. Wait till dawn outside Aguilas.
MAX. SIZE: Length up to 145 m., draft about 29 ft.
HEALTH: See "Almeria".
TUGS: None in port. Not necessary for either port.
BERTHING: Aguilas port has a commercial quay with a berth area about 300 m. and depths of between 8 – 12 m. Hornillo port has a pier to handle minerals with berth area of 90 to 100 m. and depths between 6 – 10 m.
BULK HANDLING: Two conveyor belts each of 100 tons grain per hour capacity. May be used for other bulk cargoes.
STEVEDORES: Team of stevedores who belong to "Port Workers' Trade Unions" (Sindicato de Obreros Portuarios).
MEDICAL: Master can send cables to consignee requiring this kind of service. There are a number of doctors and a hospital.
FRESH WATER: Available by pipe-line at berths.
FUEL: There are no supplies of fuel in either port.
GANGWAY/DECK WATCHMEN: Not necessary, usually this is done by crew.
OPENING/CLOSING HATCHES: Usually this is done by crew.
REPAIRS: No facilities.
REPATRIATION: Facilities for effecting crew changes exist. Repatriation can be done by train to Madrid and by plane from there.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: See "Almeria".
POLICE/AMBULANCE/FIRE: Ambulance and fire services can be requested from Port Authority. If the police services are required call to "Caseta de Vigilancia" of the Civil Guard in either port.
GENERAL: Hornillo port is used only for loading and discharge of minerals, and for this purpose a pier is provided with a railway. The nearest port of Aguilas, less than a mile distant on the West, is the commercial port, with a quay for loading/discharging and a crane of 10 tons capacity.
SHORE LEAVE: Crew members are allowed ashore.
DEVELOPMENTS: An additional berth with depth of 2.0 m. (approx.) is near completion.
AUTHORITY: Ayudante de Marina o Capitan del Puerto (Port Authority or the Assistant) Aguilas.

ALGECIRAS: 36.08 N. 05.26 W. (See Plan Book)

DOCUMENTS:
Maritime Declaration of Health.
5 Crew Lists.
2 Manifests of Cargo for the Port.
2 Manifests of Cargo in Transit (if coming from Spanish port a Manifest is sent by the Customs officials of that port).
1 Bill of Lading of cargo for the port.
2 Ship's Stores Lists.
2 Lists of Crew Personal Effects.
If the vessel carries passengers the following are required:
8 Lists of Passengers Disembarking with baggage declaration for each passenger.
5 Lists of Passengers in Transit.
2 copies of Arrival Report.
1 Manifest of Vehicles belonging to Passengers Disembarking.
If the vessel is a tanker the following are required:
Certificate of Quantity of Cargo.
Certificate of Quality of Cargo (or Ballast Certificate).
PILOTAGE: Vessels entering the port call Pilot by international code signals, sound or light. Notice of ETA should be radioed to Agent 72, 48 and 24 hours before arrival. Pilots cannot be contacted by radio, and are ordered by Agents on the basis of Master's ETA.

Pilot boat is painted white with a letter "P" in black on both sides. By day they carry a blue flag with the letter "P" in white. By night they carry regulation pilot lights. The Pilot boarding zone is a circle of 0.5 mile radius with centre 1 mile East of the Northern breakwater head (red light).
ANCHORAGE: Vessels waiting for a Pilot may anchor North of the parallel of the Barranco beacon in depths of 30 m.
RESTRICTIONS: Vessels may enter by day or night.
MAX. SIZE: Puerto de Algeciras – no length restrictions, max. draft 29 ft.

Tankers: Refineria Gibraltar – max. length 283 m. Draft up to 65 ft.

Monobuoy: Depth of water 60 m. Designed for vessels up to 500,000 d.w.t. Largest vessel to moor: 300,000 d.w.t. with draft 22.67 m.
HEALTH: Free pratique is obtained automatically when authorities board on arrival and Maritime Declaration of Health is completed. In case of suspected disease or fever on board full details should be sent by radio to Sanidad Maritima, Algeciras, before arrival.
RADIO: Aranjuez Radio and Cadiz Radio. Vessels proceeding to Refineria Gibraltar should announce their arrival by VHF to the Capitania of the port using Channel 16 for calling and Channel 13 for communication.
TUGS: 8 tugs are available up to 2,250 h.p. and assist according to Pilot's directions. Ship's tow lines used.
BERTHING:

Darsena Sur (South Dock):

Name	*Length* (m.)	*Depth* (m.)	*Usage*
Dique Norte	125	8 – 10	Liquid cargoes
	590	10	Liquid cargoes
Muelle de la isla Verde	33	8 – 12	General cargo
	463	12	General cargo, containers and solid bulk cargoes.
Muelle de la Galera (South)	75	4	Passengers
	305	6	Ferries, Ro/Ro
	264	10	Ferries, Ro/Ro

Darsena Norte (North Dock)

Name	*Length* (m.)	*Depth* (m.)	*Usage*
Muelle de la Galera (North)	255	8 – 10.5	General cargo
(East)	110	10.5	Frozen fish, and bulk liquids

BULK HANDLING FACILITIES: *Cement:* Discharged to storage silo at Muelle de la isla Verde. Rate 200 t.p.h.
Containers: 2×30 ton Paceco (Sealand) gantry cranes at Muelle de la isla Verde and 2×30 ton transtainers.
Scrap iron and metal products: Acerinox Quay: Length: 250 m. Depth 9.5 m. 2 jib cranes, capacity 25 tons each.
CRANES: (Also see "Bulk Handling Facilities").

Location	*Owner*	*No.*	*Capacity*
Muelle de la Galera (North)	Port Control	1	3.5 – 6
Muelle de la isla Verde	Port Control	1	30
Muelle de la isla Verde	Port Control	4	6
Muelle de la isla Verde	Private	1	3 – 8

Junta del Puerto (Port Control) also own mobile cranes, 1×3 – 6 ton, and 2×6 – 25 ton capacity.
STEVEDORES: Ordered by vessel's Agent on basis of Master's ETA.
MEDICAL: Doctors and hospital facilities available. International vaccination certificates only required if vessel is proceeding from an infected area.
TANKERS: Refineria Gibraltar (C.E.P.S.A.) – 5 berths for tankers up to 283 m. length, 2 of which can accept draft up to 65 ft. Loading/discharge lines are 12 in., 10 in., 8 in., 6 in. and 4 in. Refineria Gibraltar has 2 slop tanks each of 600 cu. m. capacity which can accept oily residues.

Gibraltar Refinery (C.E.P.S.A.):

Berth	*Length* (m.)	*Depth* (m.)
South	700	19 – 20
North	380	17 – 19
North	300	17 – 19
North	115	6
South	115	6

There are 18 hydraulic and 10 manually operated loading arms. Max. pressure permitted 150 p.s.i.
Monobuoy: Operated by Compania Espanola de Petroleos S.A. (C.E.P.S.A.).

Location: Lat. 35° 10′ N. Long. 05° 24.8′ W.

Depth: Approx. 60 m.

Anchorage: Pilot will advise anchorage in accordance with weather conditions.

Prohibited Anchorage: Vessels are not to anchor within 0.3 miles of the monobuoy or within 150 m. of the underwater pipeline which runs in a N. 20° E. direction from the buoy to the Terminal onshore.

Pipelines: There are two underwater pipes, one 42 in. for crude oil and one 16 in. for bunkers.

Navigation Aid: Light: Fl. 3 every 8 seconds ("U") Range 5 miles. Height above sea level 6.0 m.

The buoy is also equipped with a radar reflector 7 m. above sea level, "Racon" letter "U" and fog signal manually operated with characteristic 3 blasts every 3 seconds ("U" in Morse code).

The floating hoses display white flashing lights 70 m. apart, 20 flashes every 60 seconds. Range 1 mile. Height above sea level 0.75 m.

Charts: Spanish: No. 3500 and 3503. British: B.A. No. 1448.

Communications:

Telegraphic Address: Spanoil, Algeciras.

Telex Address: 78007 Cepsa E.

Telegraphic Communications: Once the vessel has left the port of loading, Master must send a telegram via Aranjuez Radio, giving the following information:

(a) Name of vessel.
(b) ETA in GMT.
(c) Amount loaded per Bill of Lading.
(d) Specific gravity.
(e) Maximum draft.
(f) Capacity of tanks.
(g) Slops in the cargo.
(h) Whether it has a central bow installation, in which case give dimensions.
Where not, indicate type, characteristics and distance to the stem.

If vessel is to effect loading operations, once it has left its unloading port, Master must send the following telegram:

(a) Name of vessel.
(b) ETA in GMT.
(c) Quantity of cargo required.
(d) Amount of dirty ballast and deballasting time.
(e) Capacity of tanks.
(f) Amounts of slops and kind.
(g) Whether it has a central bow installation, in which case, give dimensions.
Where not, give type, characteristics and distance to the stem.

If the cargo receiving points are of a different type to 16 in. or 12 in. standard ASA 150 lb. this must be communicated both in the case of a vessel coming to load and one which will be discharging.

Within 72 hours of arrival, the Master must send a second telegram including the following information:

(a) Name of vessel and Master.
(b) ETA in GMT.
(c) Amount of fuel required.
(d) Additional requirements.

Within 48 and 24 hours prior to arrival, he must send further telegrams confirming his ETA.

Radiotelephonic Communications: A soon as the vessel is within VHF range, contact must be made with the Pilots or the Port Captaincy of the "Gibraltar" Refinery on Channel 13 to receive instructions with regard to berthing, this station listens out 24 hours a day.

Notice of Readiness: Will be accepted by the Monobuoy Captains, when the vessel is in all respects ready to commence operations.

Notice of Readiness will be accepted under either of the following situations:

(a) When the Master receives the Monobuoy Captain or,
(b) When the vessel has anchored in the anchorage area.

Port Closed: The Notice of Readiness will not be accepted when port closed.

Port closure periods are considered to be such when the weather conditions prevent vessels coming alongside and berthing. The decision to close the port is made by the Marine Authority.

Berthing sequence: Vessel will berth normally in strict order of arrival and any alteration will be duly communicated and sufficiently in advance.

Services and Facilities:

Pilotage: The Pilotage service is obligatory and the Corporation is available permanently. The waiting area for Pilots is between Lat. 36° 7.5′ and Lat. 36° 08.5′ N. and Long. 5° 24.0′ and Long. 5° 25.0′ W.

Mooring: The Monobuoy Captain will board the vessel in the vicinity of the buoy together with a foreman, 2 deckmen and 2 divers and will assist the Pilot and crew respectively in the berthing operations. These services are provided free of charge and the personnel remain on board during the whole duration of operations during which food and accommodation of an adequate nature must be provided.

Tugs, launches, mooring equipment: Tugs and/or launches can assist the vessel in the operations of berthing and unberthing under the direct control and supervision of the Pilot and the Monobuoy Captain. There are also launches for transporting crew members ashore.

Consignee: The Compania Espanola de Petroleos, S.A. at its "Gibraltar" Refinery, has a Consignee department. Vessels utilising this service must send their radiograms to the following address:

Compania Espanola de Petroleos, S.A.
"Refineria Gibraltar",
San Roque (Cadiz) – Spain
Telephones: 761700 – 761800
Telex: 76008 Cepsa E
Telegrams: SPANOIL (Algeciras)

Arrival Documents: The following documents are required:

6 copies of the Crew List
1 Negative Passenger List
3 Copies of Passenger List if any onboard
2 Copies of the Cargo Manifest for Algeciras
1 Copy of the Cargo Manifest for cargo in transit
2 Copies of the vessel's manifest list, including bunker, oil, tobacco, alcohol, medicine, belonging to the vessel.
2 Copies of a list of the crew's and passengers' personal effects.

The maximum quantity of tobacco and alcohol permitted for each crew member and passenger outside the manifest is 200 cigarettes and 1 litre bottle.

Free Pratique: It is not necessary to advise the Health Authorities prior to arrival unless there is any sickness on board.

Free pratique is granted when the vessel is visited by the Health Official at the anchorage or when it is berthed at the Monobuoy and the following documents will be required:

1 Health Declaration
1 Crew List
1 Passenger List or
1 Negative Passenger List

The Health Official will inspect the Deratting Certificate or Exemption. This Certificate can be drawn up or renewed at Algeciras if required.

Doctor: Medical Service, if required, can be obtained via the Agent and will be sent as quickly as possible.

Fuel Bunkers: Fuel Oil is supplied via the Monobuoy.

Apart from the advice by radio to the local Consignee, owners must contact Campsa-Madrid, advising them of the type and quantity of bunkers required on arrival.

(The suggestion above is based on the fact that in Spain all supplies are effected directly by Campsa through the authorised refineries).

Direct contact with Campsa by the Owner, and the transfer of funds for the supply, required by the local Agent prior to bunkering taking place.

Oils: A majority of international companies have stocks of oil in the country, requirements to be advised via their Agent sufficiently in advance in order to prepare documentation and delivery. This delivery will not be made whilst the vessel is moored at the Monobuoy carrying out loading or unloading operations since it has to be effected by barge or a tanker type tug. Only vessels operating with inert gas are excepted.

Water: This is supplied by a 200 ton vessel (the "Caracola"), and must be requested 48 hours in advance via the local Agent. There is no water line via the Monobuoy.

Victualling and Provisions: All kinds of stores obtainable in Algeciras and deck and machinery supplies can also be provided, requirements are to be communicated to the Agent or Consignee by radio.

All deck and machinery supplies will be supplied by launches or tugs prior to berthing or after unberthing at the Monobuoy.

Spares to be supplied from abroad for vessels at Algeciras must be sent to the airport of Malaga or the airport of Seville, addressed to the Master of the vessel in question and consigned to the local Agent at Algeciras.

Goods sent by TIR should be despatched to Malaga for Customs clearance.

Repairs: Only minor repairs can be carried out by local workshops. In the event of major repairs being required, there is at Cadiz, which is 120 kilometres away (approx.), all types of workshops and equipment. Any kind of repair which might leave the vessel without means of propulsion is absolutely prohibited whilst it is berthed at the Monobuoy.

Classification Societies: No classification societies have representatives at Algeciras.

The Agent will be advised to prepare the visit of Inspectors from Cadiz where all the Societies have a representative.

Telephone Numbers:

"Gibraltar" Refinery:	
Monobuoy Captain	761700 – 761800 (Ext. 243)
Port Captain	761700 – 761800 (Ext. 311)
Fire Fighting	761700 (Ext. 222)
Ambulance	761247 (Ext. 111)
Medical	763658
Algeciras:	
Command Post	671458
Police	671555
Fire Fighting	672020
Ambulance	672290

Mooring:

Preparation for Mooring: Vessels must have in position a Pilot ladder and/or hoisting ladder or a gangway which is safe and firmly protected for immediate use and sufficiently long to reach the approaching Monobuoy Captain's launch.

For vessels with a freeboard of 40 ft. or more, the gangway must be extended, lowered and the platform must not be more than 10 ft. from sea level, a Pilot ladder shall also be provided for boarding the platform.

Vessels must provide a lee on the port side for the embarkation or disembarkation of Monobuoy Captains.

Vessels must have prepared on the forecastle and in the bow section the following:

(a) 2 mooring cables of polypropylene if possible.
(b) 2 veering cables 5 in. circumference, min. length 300 ft.

Vessels must have ready amidships and on the port side the following:

(a) Derrick equipped and ready to lift equipment from the launch.
(b) Mooring shackles.
(c) Wire and equipment for connecting hoses.

Note: If vessels moor with the aid of tugs, the Port Pilot will indicate the number of tugs to be used and the cables required.

Mooring at the Monobuoy: The Monobuoy is equipped with a cable 19 in. in diameter and 180 ft. long (55 m.) and with a breaking strain of 795.6 tons, its ends having collars and special cable protections with corresponding shackles. The shackle which connects it to the Monobuoy has a test strain of 688.8 tons and this is connected to a meter, which indicates at any time the strain to which the whole assembly is subjected. The shackle placed at the other end has a test strain of 510 tons and is connected to a length of chain of two different dimensions, its total length being 40 ft. (12 m.). The first 25 ft. (8 m.) are of 4 in. ending in two lengths of 702 mm. length and 440 mm. wide, and which are connected to the remaining 15 ft. (5 m.) of chain with a dimension of 2.75 in. which ends in two open links 478 mm. long and 293 mm. wide. The end of this length of chain is connected by means of a shackle S.W.L. 40 tons to a plaited cable of polypropylene 11 in. diameter and 250 ft. (76 m.) long, known as the approaching cable. The end of this cable is identified by means of a small 12 in. diameter buoy connected to it by means of a 0.5 in. guy and 5 ft. long. The weight of the length of chain mentioned above is supported by a cylindrical buoy 3,600 kgs. in weight.

When the vessel is close to the Monobuoy the crew must pay out the end of the veering cable through the central fairlead or nearest alternative lead available on the port side, whilst at the same time, various flexible cables 16 in. or 10 in. are made fast on board, according to the tonnage, to each bitt and also to the bow, and if there is no central fairlead available, onto the bitts on the port side. Once on board, the chain will be made fast to the cables by means of two 4 in. or 2.5 in. shackles according to the type of cable to be used. Where the vessel has a "Smit Bracket" or similar type of berthing fitment, the chain will be made fast to this. Vessels of less than 150,000 d.w.t. will be connected to the 2.75 in. chain and those exceeding this tonnage will be connected to the 4 in. chain.

Whilst the vessel is berthed at the Monobuoy a tug will remain alongside in the event of it being necessary to remove the vessel from the Monobuoy, in which case she must have available at the stern a very good towing line.

Turbine vessels which may have their propellor turning, must go astern so as not to come close to the buoy and cause damage.

Connection and Disconnection of Hoses:

General: The Monobuoy has two floating hoses 20 in. in diameter for discharge and loading which end in 3×16 in. diameter sections, each for direct connection having an approximate weight of 7 tons. The hoses will be hoisted and connected by the crew of the vessel in collaboration with the foreman and two deckmen from the Terminal. The Monobuoy Captain will assist the vessel's officers in the connection operations. For supply of bunkers there is a 12 in. diameter hose available with a weight limit which is less than those mentioned above.

Derricks: All tankers operating at the Monobuoy must have a derrick with minimum capacity of 10 tons on the port side.

Flanges: The connecting flanges are 16 in. ASA for loading/unloading and 12 in. 150 ASA for bunkers. In the event of vessels not having flanges of these dimensions or reducers, this should be notified by radio 72 hours in advance.

Ballasting and Deballasting:

Anti-pollution precautions: The vessel's Master must take the necessary measures so that there is no loss of dirty ballast and is responsible at all times for damages and costs which may originate from this.

Scuppers: Before commencing operations the scuppers must be closed.

Sea Valves: During the operation of ballasting, the tightness of the sea valves and inlets must be checked, taking all precautions to obviate contamination of the sea.

Ballasting/Deballasting during the night: If these operations are carried out during the night, the area must be adequately lit.

Inability to receive dirty ballast: All vessels operating at the Monobuoy must arrive with clean ballast since there is no facility for reception of dirty ballast. In the event that they have residue arising from tank cleaning, this must be pumped to the slop tanks, which will be measured and which will be loaded by the "load on top" system.

Loading and Discharging:

Communications during loading/discharging: All communications relative to loading and discharging of vessels will be made via the Monobuoy Captain who will remain in contact constantly with the Refinery Blending department via portable VHF on Channel 9. In the event of damage to the portable VHF, contact will be continued via the vessel's equipment.

Damage during communication: In the event of damage to all communications with the Blending Department, the loading and discharging operations will cease immediately.

Average of loading and discharge: The installation can operate at an average (max.) of 12,000 cu. m. per hour and at a working pressure of 12 kgs./cm^2, at the vessel's manifold.

The supply of bunkers can be effected at a maximum average of 2,000 t.p.h. with a working pressure equal to 12 kgs./cm^2.

Anti-pollution precautions: Contamination of the sea by hydrocarbons is absolutely prohibited; this prohibition includes pumping. The non-fulfilment of this regulation can give rise to serious penalties and for which reason all vigilance must be applied to stop leaks which would give rise to the immediate cessation of all operations, the Master/Owner being entirely responsible for costs or damages which might arise therefrom. Trays must be provided to catch any possible leaks during connection or disconnection of hoses to the manifold.

Valve closure due to excessive loading: No valve will be closed which may stop or reduce the movement of the product, whilst the shore pumps are operating unless prior advice has been given to and the approval obtained from the Monobuoy Captain. The practice of closing the valves at the vessel's manifold must be obviated.

If a decrease in pumping rate is required the shore terminal will lower the pumping rate to the required level if requested.

The Master will be responsible for any damage which may arise from the sudden stoppage in flow due to faults on board the vessel. It cannot be overemphasised for this to occur it is extremely dangerous and may give rise to extremely extensive damage to the installation.

Sample intakes and empties: All vessels which have available inert gas installations in service must arrive with all tanks depressurised for the purpose of taking samples, emptying water, etc. Once this operation has been effected, tanks can be pressurised once again. Once discharge has been terminated, the tanks will be depressurised in order that they may be inspected.

FRESH WATER: Available from all berths in Algeciras rate 30–200 t.p.h. depending or location and at Refineria Gibraltar. Can also be supplied by barge at the rate of 15 t.p.h.

FUEL: Fuel oil and Gas oil supplied by C.A.M.P.S.A. at Dique Norte (North Breakwater) and Muelle de la isla Verde.

Product	*Location*	*No. of Points*	*T.p.h. per Point*	*T.p.h. of Quay*
Heavy fuel No. 1	Dique Norte	4	200	200
Gas Oil "A"	Dique Norte	4	250	250
"B"	Dique Norte	4	250	250
"B"	Dique Norte	1	75	75
"B"	Dique Norte	1	20	20
"B"	Dique Norte	1	30	30
Heavy Fuel No. 1	Muelle de la isla Verde	3	150	150
Gas Oil "A"	Muelle de la isla Verde	3	200	200
Gas Oil "B"	Muelle de la isla Verde	3	200	200

Bunkers can also be delivered by road tanker or barge.

DEVELOPMENTS: Currently under construction is a breakwater, which will extend the current breakwater by 700 m. in the same direction.

It will be able to receive vessels for berthing on the inner wall, and can be used for discharge of refined oil products, supply of fuel, water and stores to vessels, completion is planned for 1981.

Construction is about to commence on extending Muelle de la isla Verde by 250 m., with 12 m. of water, together with the execution of 150 m. of berth for roll-on/roll-off traffic, with 8 m. of water, this work is planned for completion in 1981.

GANGWAY/DECK WATCHMEN: Not available from shore.

OPENING/CLOSING HATCHES: Opened and closed by ship's crew.

CUSTOMS ALLOWANCE: Max. quantity of tobacco permitted in ship's stores is 3 kilos per crew member and 2 kilos per passenger. The quantity that may be held out of bond is 40 grammes tobacco per person per day. Wine/Spirits. 1 decilitre per person per day may be held out of bond.

CONSULS:

Denmark
El Salvador
France
Great Britain
Italy
Morocco
Netherlands
Norway
Panama
Sweden

REPAIRS: Small repairs afloat can be effected. No dry docks.

AIRPORT: Nearest is at Malaga, 120 kms. from Algeciras.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: New Year's Day, 6th January, 19th March, Maundy Thursday, Good Friday, Easter Saturday, 1st May, Ascension Day, Corpus Christi, 29th June, 18th July, 25th July, 15th August, 1st October, 12th October, 1st November, 8th December, 25th December.

POLICE/FIRE/AMBULANCE: *Algeciras:* Police, tel. 67.15.55; Fire, tel. 67.20.20; Ambulance, tel. 67.22.90. *Refineria Gibraltar:* Police, tel. 67.15.55; Fire, tel. 76.17.00; Ambulance, tel. 76.12.47.

SHORE LEAVE: Crew members are permitted to go ashore subject to police control.

AUTHORITY: Comandancia de Marina.

ALICANTE: 38.23 N. 00.28 W. **(See Plan Book)**

PORT LIMITS: The line drawn from Cabo de las Huertas and Cabo de Santa Pola.

DOCUMENTS:

4 Crew Lists.
4 Passenger Lists.
10 Manifests for Cargo, including cargo in transit as well as cargo for Alicante. Tobacco and Cargo Manifests to be visaed by Spanish Consulate in port of origin.
All vessels' Certificates.

PILOTAGE: The Pilotage service is permanent, and should be requested by means of the International Signals Code. It has a VHF radio station and can be called up on Channel 16. The Pilots have a cutter (engined) painted white with the letter "P" on both sides, and flies a black flag with letter "P" in white, whilst at night it shows lights in accordance with the International Regulations. The launch meets vessels one mile from the green breakwater light, but in bad weather closer to that light.

ANCHORAGE: Vessels waiting to enter port may anchor at a distance of 0.5 miles off the breakwater in depths of 16 m.

MAX. SIZE: Vessels of up to 225 m. length and 38 ft. draft (60,000 – 80,000 d.w.t.) can be berthed alongside. For tankers, max. draft 35.20 ft. (10.73 m.) 36,000 d.w.t. at Muelle 11.

Discharge of butane is carried out at buoys located to the South of the port and with a limitation of maximum length of 140 m. between perpendiculars and 28 ft. draft.

HEALTH: Regulations as dictated by the International Regulations for Foreign Health are enforced.

RADIO: Radio-telephone communication through Radio La Costera, Alicante, medium frequency range approx. 220 miles and VHF approx. 40 miles.

TUGS: Only 1 tug available to assist berthing of 1,295 h.p. Normally ship's lines used for connection with tug. Tug meets vessel at Port entrance.

BERTHING: The breakwater extends in a S.W. direction and vessels berth within the breakwater. Max. depth being available at the outer end of the breakwater, decreasing in the N.E. direction.

Muelle 14: Extends along the length of the N.E./S.W. breakwater and depths vary alongside the berth from 12.5 m. at the S.W. end to 8 m. at the N.E. end. Length of quay – 970 m.
Muelle 12: Depth alongside 8.0 m. Length – 296 m.
Muelle 10: Depths alongside the berth vary from 6 to 8.75 m. Length – 203 m.
Muelle 9: Depth alongside berth 8.75 m. Length – 103 m.
Muelle 7: Depth alongside berth 8.75 m. Length – 240 m.
Muelle 11: A combined tanker, dry cargo and container berth. Length – 360 m.

CRANES: All quays have cranes of 3–6 tons, and on quay No. 11 there is a 30 ton crane. Loading and discharging operations are always carried out by shore personnel, irrespective of the means used.

SPECIAL CARGO HANDLING FACILITIES: There are 3 berths located at the head of berths 10/12 and 12/14 for Ro/Ro traffic.

STEVEDORES: It is necessary to advise Agents 48 hours in advance of the arrival of the vessel.

The main goods shipped at this port are: canned goods, aluminium ore, asphalt, ground pepper, bulk cement, etc. Average speeds of loading and discharge are: bulk cargo 50 t.p.h.; general cargo 9 t.p.h.; bagged cargo 40 t.p.h.

MEDICAL: Many hospitals and medical services available. Advise Agent prior to arrival if medical assistance required.

TANKERS: Tankers discharge takes place at Muelle 11 (see "Berthing"). Product handled: Fuel oil, (2×12 in.) and Gas oil (2×10 in.)

DENSITY: Average 1030.

FRESH WATER: Available from hydrants at the quays at the rate of 10 t.p.h., per hydrant.

FUEL: Supplied by Campsa. Vessels requiring fuel are requested to berth alongside Muelle 11 and will incur delays if berth is already occupied. Maximum advance notice to Agent is essential.

CONSULS: The following countries have local representation: F.D.R., Belgium, Bolivia, Brazil, Chile, Denmark, Colombia, Finland, France, Gt. Britain, Greece, Guatemala, Haiti, Liberia, Norway, Netherlands, Panama, Paraguay, Peru, Dominican Republic, Sweden.

SURVEYORS: Comisario Maritimo Espanol (Spanish Maritime Commissary) and Lloyds.

REPATRIATION: Possible, without difficulty.

GANGWAY/DECK WATCHMEN: Agents normally provide watchmen.

OPENING/CLOSING HATCHES: Normally opened by crew and closed by stevedores using cranes.

CUSTOMS ALLOWANCE: 200 cigarettes and one bottle of spirits per person.

CARGO GEAR: All berths have cranes, varying from about 6 tons capacity. There is 1 heavy lift crane capacity 30 tons, and one with capacity 10 tons.

REPAIRS: Only minor repairs carried out. There is a dry dock for small craft.

AIRPORT: About 8 km. distance from Alicante, and serviced by international flights.

IDENTIFICATION CARDS: Additional identification cards only required by crew members of communist-flag ships.

TIME: GMT plus 1 hour in Autumn and Winter. GMT plus 2 hrs. in Spring and Summer.

HOLIDAYS: Normally no work is carried out on the following holidays: New Year, 1st January; Epiphany, 6th January; La Pelegrina, 26th April; Maundy Thursday; Good Friday; Labour Day, 1st May; Festival of San Pedro, 29th June; Corpus Christi; Santiago Apostol, 25th July; Assumption; Festival of the Spanish Speaking World, 12th October; All Saints', 1st November; Immaculate Conception, 8th December and Christmas Day, 25th December.

POLICE/AMBULANCE/FIRE:

Police: Telephone 091.
Ambulance: Telephone 20.72.01.
Fire Brigade: Telephone 22.90.80.

TELEPHONES: Can be installed on board; the cost of installation currently is about 12,000 pesetas.

AUTHORITY: Comandante Militar de Marina.

ALMERIA: 36.52 N. 02.30 W. (See Plan Book)

DOCUMENTS:

4 Crew Lists.
4 Passenger Lists or negative.
2 Cargo manifests of goods destined to Almeria, as well as other cargoes in transit.
Store List in duplicate, including tobacco, spirits, radios, etc., belonging to vessel.
Details list in duplicate of all personal effects of crew and passengers (tobacco, spirits, cameras, radios, etc.).

Note: Tobacco. In case vessel carries more than 3 kilos of tobacco per man, excess must be declared in a separate manifest, which must be visaed by a Spanish Consul. In absence of Consul, said document will have to be visaed by an Authority of former port of clearance. Otherwise, the vessel would be fined.

PILOTAGE: Compulsory, service is permanent. Pilots board vessels by motor-boat in roads, near entrance formed by two breakwaters. This entrance is 287 m. wide. Pilot boats are painted white and letter "P" is painted in black on each bow. Also boats have a blue flag hoisted on mast, with letter "P" in white on both sides of flag. At night, boats have white light, under this light is a red light. When weather is bad vessels approach as close as possible to entrance so that Pilot can easily board the vessel.

ANCHORAGE: When harbour is congested, vessel can anchor at West Mole while waiting for berth.

MAX. SIZE: Only limitation is draft. Max. draft 38 ft. in the inner-port and 43 ft. in the outer port.

HEALTH: Pratique is obtained immediately after berthing, when Health Officer boards vessel, In case of suspected disease or fever on board Master must send a radio message to Agents, in order that they advise the Health Officer. Following documents are required by Health Officer upon berthing: Maritime Declaration of Health, Deratisation Certificate, 1 Crew List.

RADIO: Nearest important radio stations are Cadiz-Radio and Palos-Radio.

VHF: Call Almeria Radio on Channel 16 for connection with pilot station.

TUGS: Two available but not compulsory, is employed according to Master's requirements.

BERTHING: Prior to ship's arrival and in accordance with Master's ETA Agent attends Port Authorities to procure a proper available berth. Commercial quays have a length of 475 m. with double sheds and 25 ft. water depth, 350 m. with single shed with max. depth 22 ft and 365 m. with max. depth 23 – 27 ft. for tankers and Ro/Ro traffic. There is 363 m. of berthing space with 32 ft. depth and 250 m. with 39 ft. depth with open storage area for solid bulk cargoes.

There is a Ro/Ro ramp, max. load 20 tons per axle.

Iron Ore Berth: Max. size 80,000 d.w.t. Max. draft 13.9 m. 1 ship loader, rate 2,000 t.p.h.

STEVEDORES: It is necessary that Master sends ETA so that Agent can inform Receiver's stevedores accordingly and arrange for proper reception of cargo and berth. Timetable of shifts available at the port; Daytime, normal working hours, from 0800–1200 hrs. and 1400 – 1800 hrs. (1 shift), 0800 – 1400 hrs. (1 intensive shift), 1400 – 2000 hrs. (1 intensive shift). Night time, from 1800 to 2400 hrs.; Sundays and holidays, from 0900 to 1200 and 1400 to 1800 hrs.

MEDICAL: Medical facilities are available; only it would be appreciated for Master to send a radio message if a crew member is in need of urgent medical attention.

FRESH WATER: Always available. Deliveries from quay available at all berths, supplying about 30 t.p.h.

FUEL: Ordinary fuel oil and gas oil is available at local refinery of "Campsa". It is advisable that Shipowners stem bunkers through their own Contractors, with an ETA of 48 hours, so that the order can be received in time.

FIRE PRECAUTIONS: Tankers perform their operations at the berth of "Campsa" at East Pier, which has the necessary fire precautions. No special precautions at other piers.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: This work normally carried out by crew.

CERTIFICATES: Vessel should have the usual documents on board, but only the Safety Wireless, Safety Equipment and Deratisation Certificates are required by Authorities.

CUSTOMS ALLOWANCE: The quantity allowed per each crew member is 3 kilos tobacco. (See "Documents".) Wine and/or Spirits: Only one bottle for each crew member.

CARGO GEAR: Muelle de Levante: 1 crane capacity 15/25 tons.

Muelle de Ribera: 5 cranes capacity 3 tons.

Muelle de Poniente: 6 cranes capacity 3/6 tons, 2 cranes capacity 6 tons and 2 cranes capacity 12 tons.

IDENTIFICATION CARDS: Not required.

CONSULATES:

Denmark, Alvarez de Castro 22	tel.	212245
Sweden, Alvarez de Castro 22	,,	212245
Belgium, Paseo Generalismo 151	,,	214455
Holland, Paseo Generalismo 151	,,	214455
Finland, Aguilar Martell 7	,,	215954
Italy, Paseo Generalismo 18	,,	215790
France, Avenida Vivar Tellez	,,	220050
Colombia, Navarro Rodrigo 18	,,	213171
Panama, Jaul 27	,,	220073

REPAIRS: All types deck and engine repairs available.

REPATRIATION: Good facilities available.

AIRPORT: Airport is located about 6 km. from town, well served by regular airlines.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: 1st January; 6th January; 19th March; (St. Joseph) Good Thursday afternoon; Good Friday; 1st May (Labour Day); Corpus Christi; 25th July (Santiago), 15th August; Assumption Day; Last Saturday in August (Our Lady of the Sea – Local Holiday); 12th October; 8th December; 25th December and 26th December (second Christmas Day).

POLICE/AMBULANCE/FIRE: Police 214081; Ambulance 215780; Fire 220044.

AVILES: 43.35 N. 05.56 W. (See Plan Book)

DOCUMENTS:

3 Crew Lists.
2 Passenger Lists or a negative.
1 Cargo Manifest of goods destined for the port.
Another Manifest covering transit cargo.
2 Store Lists, including tobacco, cigars, cigarettes, coffee, spirits, radios, cameras, etc., in possession of crew. In all cases make and number of radios to be indicated.
Safety Wireless Certificate and Safety Equipment Certificate.

If vessel carries over 6 kilos tobacco per crew member, the excess to be declared in a separate manifest, which must be visaed by the Spanish Consul at the last port, otherwise vessel exposed to heavy fine.

PILOTAGE: Compulsory for vessels over 50 g.r.t. Telegrams to be sent to Corporacion de Practicos, San Juan de Nieva – Aviles Tel. 563013 or 566856.

Send ETA 2 hours in advance, confirming by VHF when vessel some 10 miles off. Pilots listen continuously on Channels 16 and 12. When vessel in sight of lookout, give preferably audible signals in accordance with International Code. Pilot craft are painted black with a white "P" on each bow. They are equipped with VHF and listen out on Channel 12, having also available Channels 16, 14, 9 and 6. When coming alongside a vessel they hoist the "H" flag. Normally they remain within the port, going out to vessels up to 1 mile from La Forcada.

ANCHORAGE: Outside the port vessels can use the sector between N.W. and W.N.W. of La Forcada and at a distance of 0.5 mile from it, in 15 to 25 m. depth and sandy bottom. There are no sheltered anchorages. When awaiting a berth, vessels must remain at anchorage with one or two anchors.

RESTRICTIONS: Entrance channel 150 m. wide, 800 m. long up to San Juan de Nieva Dock. Depth at low water from 9 to 12 m.

MAX. SIZE: Length 210 m., draft 9.20 m. (Neaps), 10.70 m. (Ordinary Tides), 11.70 m. (Springs). Vessels over 150 m. LOA require 5 ft. keel clearance.

HEALTH: Yellow flag to be hoisted, and once Health Authority has boarded, and the Marine Health Certificate completed, provided this is negative, clearance is automatic.

Health documents required: Marine Health Declaration if coming from another country, but if from another Spanish port, the Health Clearance Document from that port suffices.

Deratting certificate, or exemption certificate.

If coming from country where epidemic is in force, certificates of vaccination for each crew member.

If sickness on board, patient will be examined immediately and decision taken as to clearance or isolation.

RADIO: If the vessel has short wave radio, messages can be sent to Aviles, but via Aranjuez Radio, Cadiz Radio, Teneriffe Radio (EAC 2/5) and Vigo Radio (EAF 2/5). If close to the coast, and medium wave radio is available, then messages can be sent to any of the other Spanish coastal stations. Messages sent purely with the telegraphic address "Pilots" are sent on by telephone to the Pilotage Authority.

TUGS: 1×500 h.p., 1×1,200 h.p., 1×1,250 h.p. and 1×1,800 h.p.

BERTHING: 10 berths available.

Berth	*Length (m)*	*Depth (m)*	*Use*
Raices	822.84	8.0	Bulk and General
S. San Juan	300.00	6.0	" " "
W. San Juan	277.70	4.0	" " "
S.W. San Juan	90.25	2.0	" " "
New Fish Quay	303.00	5.0	Fish
Aviles Fish Quay	515.94	2.0 – 1.0	Fish
E. Ensidesa	300.00	9.0	Fuel, General, Bulk
E. and S. Ensidesa	715.00	7.0	General, Bulk
S. Ensidesa	107.50	5.0	General
Endasa	132.84	7.0	Bulk cargo

CRANES: Private and Port Authority: *Quay cranes:* 10×5 tons, 5×6 tons, 2×10 tons, 11×12 tons, 4×15 tons, 2×45 tons and 1×150 tons. *Mobile cranes:* 24×3 tons – 100 tons.

STEVEDORES: *Private Berths:* 0600 hr. Monday – 0600 hrs. Sunday (working throughout 24 hrs.).

Port Authority Berths: 0800 hrs. – 1700 hrs. Monday – Friday. 0800 hrs. – 1200 hrs. Saturday.

Overtime is arrangeable.

CUSTOMS ALLOWANCE: Normally Customs permit 200 cigarettes per man out of bond. Additional quantities needed on the stay of ship in port. 1 bottle of spirit per man.

REPAIRS: Possible. Diver available.

DRY DOCKS: 1 dock at Las Canteres, owned by "Empresa Nacional Siderurgica", length 50 m., width 9.50 m. Capacity 600 tons.

4 docks at El Monumento owned by Astilleros Ojeda y Aniceto, length, 2 of 100 m. and 2 of 85 m. width 3.10 m. Capacity 500 tons.

FRESH WATER: Supplies available in the San Juan de Nieva zone and at Ensidesa Quay in San Agustin Dock. Also available by barge.

FUEL: Gas-oil can be supplied in the West San Juan dock and Aviles Fish Quay. Also available by barge.

AIRPORT: Asturias Airport — 11 km. from the port under the control of the Aviles Customs Office at the airport.

TIME: GMT plus 1 hour, except during Summer when GMT plus 2 hours.

HOLIDAYS: 1st January, 6th January, 19th March, 1st May, 24th June, 16th July (Mercantile Marine), 28th August, 8th September, 12th October, 1st November, 25th December, Good Thursday, Good Friday, Good Saturday, Corpus Christi, Easter Monday, Ascension Day.

POLICE/AMBULANCE/FIRE: Police 544311 and 544511. Ambulance 540080, 540511, 540733, 540844. Fire 546114, 544127.

AUTHORITY: Capitania de Puerto.

BARCELONA: 41.25 N. 02.10 E. (See Plan Book)

DOCUMENTS:

(1) Manifest of Barcelona cargo: 1 set covering all loading ports; make sure that this manifest is in perfectly good order before ship's berthing, as Customs will board the vessel immediately and take it away as it is; thereafter any omission or excess of pages may lead to a fine. It is important that the Master has copies as Manifests mailed by Agents in loading ports sometimes arrive too late or not at all.
(2) Manifest of Transit Cargo: 2 sets (same recommendations as above).
(3) 3 Crew Lists.
(4) 1 Negative of Passengers.
(5) 2 sets of Bills of Lading of the Barcelona cargo.
(6) 2 Provisions Lists.

Of items (3), (4) and (6) above several copies will be required for distribution among various authorities, therefore it would be well for the Master to have at least 3 copies of each ready at hand on arrival. Tobacco allowed per crew member is 3 kg.

All tobacco in excess of the 3 kg. allowed by the Spanish authorities should be manifested and signed by the Spanish Consul at the last port of call before Spain. If there is no Spanish Consul at the last port before calling at Spain, then the consulate of a country friendly to Spain or the Port Authorities could carry out the same formality. The same procedure must be followed when the vessel loads a cargo of tobacco for discharge in Spanish ports, or when the tobacco cargo is loaded in transit.

If any item of cargo manifested for Barcelona should be discharged in error at any other port in the ship's itinerary before arrival at Spain, there would be a fine imposed here for shortage of goods if no advice of such shortage is given before arrival.

PILOTAGE: Pilot boats painted black, with letter "P" in white on each bow. Telegraphic address: "Pilot Station-Barcelona". Required notice of ETA 24 hours before arrival. Signals to be made by vessels requiring Pilot: the letter "G" in sound and/or light.

Pilot boats have no radar and are reluctant to venture more than just outside port entrance in poor visibility. Pilots give priority to vessels nearest port entrance. Pilotage is compulsory and the service is permanent. In case of port congestion vessels remain at anchor at the roads.

ANCHORAGES: In the Outer port for small vessels only, with depths over 50 ft. Also at the roads 0.5 miles away from breakwaters where vessels usually remain at anchor.

MAX. SIZE: Only limitation is draft: max. 45 ft.

HEALTH: Pratique obtained immediately after berthing, when Health Officer boards vessel. In case of suspected disease or fever on board Master must send a message to Agent, to advise Health Office. Following documents are required by Health Officer upon berthing; Maritime Declaration of Health, Deratisation Certificate, 1 Crew List.

RADIO: Aranjuez Radio, call sign EAD.

VHF: Barcelona Radio can be contacted on VHF Channel 16, 3 hours before arrival and Channel 26 for long distance calls.

TUGS: Tugs join vessel at entrance of port. Usually use ship's lines; if tug's lines used usual charge 10% of official tariff. It is normal for 2 tugs to be used for vessels from 5,000 to 15,000 g.r.t.

10 tugs available, from 800 h.p. to 1,800 h.p.

BERTHING: Commercial quay, length 12,100 m. and depths min. 8 m. max. 14 m. dependent location. Depth alongside Grain Elevator in Pier Contradique is 37 ft. Pier Barcelona, berths for transoceanic maritime passenger traffic, depths 26 ft. and 31 ft. Shore fenders keep vessel about 1 m. off quay.

CARGO HANDLING FACILITIES: For unloading grain, there is a silo with a 65,000 ton storage capacity, provided with 4 suction pumps capable of unloading vessels at a rate of 400 t.p.h. and loading rail or road trucks at the rate of 200 t.p.h.

Liquid methane reception and gasification plant with a storage capacity for 249,000 cu. m. of liquid gas. Potash reception and loading plant with mechanical loading bridges which can load up to 450 t.p.h. of this product.

General cargo handling is fully mechanised and, apart from the pier cranes, there are fork-lift trucks, truck cranes and a palletisation process.

A container wharf with a berthing frontage of 365 m. increasing to 1,115 m., 14 m. water depth, 9.8 acres surface area, with a capacity for 1,250 20-ft. containers. 2 cranes available at 50 tons and reach of 35 m. There will be a terminal with berthing space for 6 ferries for operating a roll-on/roll-off service.

TANKERS: There are 6 berths for oil tankers, max. size 60,000 d.w.t., discharge rate 1,000 t.p.h., depth alongside 12 m. (2), 11 m. (2), 8.5 m. (2). Diameter of loading lines 4 in. and 8 in., diameter of discharge lines 10 in., 12 in. and some of 18 in.

There is 1 natural liquid gas berth, depth alongside 12 m.

There are 5 berths for inflammable liquids, asphalt, vegetable oil and tallow, depth alongside 12 m.

STEVEDORES: *(a)* Daytime, normal working hours, from 0800–1200 and 1400–1800 hrs. (1 shift); *(b)* 0800 – 1400 and 1400 – 2000 hrs. (2 "intensive" shifts). Night-time, from 2000 – 0200 and 0200 – 0800 hrs. (2 intensive night shifts). Extra costs are involved for intensive shifts. Nightwork is paid on an overtime basis. Average rates for discharge of grains in bulk are about 7,500/8,000 tons per day of 24 consecutive hours; for general cargo a rate of 100 tons within normal working hours.

MEDICAL: All medical facilities are available; it would be appreciated for the Master to advise in advance if crew member is in need of urgent medical attention. Contact Barcelona Radio in an emergency.

FRESH WATER: All piers have water available by shore pipes or by barge. Rate of delivery about 16/20 t.p.h. Rate 150 t.p.h. by barge.

Ship's Master advises that fresh water is very saline and that it is not advisable to take any.

FUEL: Fuel oil and gas oil available at "Campsa", installation. It is advisable that Shipowners stem bunkers through their own contractors, with advance notice of 48 hours. Delivery either by barge, or at the bunkering pier of "Campsa". Bunker barges allowed alongside vessel during cargo-handling.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Normally carried out by crew, except in liner vessels which is contracted for by stevedores.

CERTIFICATES: Vessels should have all usual certificates aboard but only the Safety Wireless, Safety Equipment and Deratisation Certificates are required by authorities.

CUSTOMS ALLOWANCE: Quantity allowed for each crew member is 200 cigarettes and 1 bottle wine/spirits.

CARGO GEAR:

57 Quay cranes up to 3 tons
55 ,, ,, ,, 6 tons
6 ,, ,, ,, 10 tons
8 ,, ,, ,, 15 tons
141 Mobile cranes 1 – 50 tons
3 Floating cranes up to 160 tons

IDENTIFICATION CARDS: Not required.

REPAIRS: All types deck and engine.

DRY DOCKS: 1 floating dock, length 111 m., lifting power 6,000 tons; belonging to Port Management.

Dry dock, maximum available length 215 m., available beam 34.7 m. Cross-beam height at zero level of the port 19.6 m. Height of stocks above zero level 8.74 m. Cross-beam height to top of superstructure 12.1 m. 50 ton, 20 ton, 5 ton and 3 ton cranes. Can accommodate vessels of 50,000 d.w.t.

SURVEYORS: Lloyd's; 2410400. A.B.S.; 2399275. N.V.; 3192906 and 2463164.

REPATRIATION: Good facilities available.

AIRPORT: Located about 7 km. from town, well served by regular airlines.

TIME: GMT plus 1 hour (30th September – 15th April) GMT plus 2 hours (6th April – 27th September).

HOLIDAYS: 1st January; 6th January, Good Friday; 1st May, 25th December.

No cargo work Maundy Thursday, Good Friday, Easter Sunday and Easter Monday.

POLICE/AMBULANCE/FIRE: Police 091; Harbour Police 3026367; Ambulance 3171717 (Also 24 hour medical service); Fire 080 and 2535353 (080 is best).

TELEPHONES: Only at Terminal Station.

DEVELOPMENTS: Lengthening under construction of breakwater Dique del Este, and pier Contradique. A wharf for 6 berths for tankers only, plus 4 berths for vessels loading/unloading crudes in bulk with a depth of 39 ft.

SERVICES: Carpenters, lashing, hatch and tank cleaning all available.

AUTHORITY: Junta Puerto Autonomo, Comandancia Militar de Marina.

BILBAO: 43.17 N. 02.55 W. (See Plan Book)

DOCUMENTS:

3 Cargo Manifests.
2 Negative Passengers.
3 Crew Lists.
2 Stores Lists.
2 Crew Personal Effects Lists.

The maximum quantity of tobacco and/or cigarettes allowed per crew member, Master included, is 3 kilos. Any surplus must be separated and manifested as cargo in transit and the manifest duly visaed by a Spanish Consular Representative at the loading port. Should there be no Spanish Consular Representative of a friendly nation, Port Authority (Custom House) or Chamber of Commerce in the sailing port. In case a vessel carrying an excess amount of tobacco or cigarettes and not in possession of a Manifest duly visaed by the competent Authority is diverted at sea to a Spanish port while on voyage to another, the Master should cable to the Administrator de Aduanas de Bilbao, notifying the diversion and the excess of tobacco manifested without official visa. On arrival the Master should submit the Manifest and other documents to the Custom Authorities.

PILOTAGE: Pilotage is compulsory for vessels entering and leaving Bilbao Port. Pilot will board incoming deep laden or ballast tankers within a radius of 2 miles from the new Punta Lucero Light. The pilot ladder for boarding is usually rigged off port side. If the Pilot is unable to board on account of bad weather, the pilot boat will display the signal "follow in my wake" and lead the vessel into sheltered harbour.

Pilots keep on watch 24 hours on Channel 12.

ANCHORAGE: Good anchorage in Outer Harbour inside old breakwaters. Depths of LW about 28 – 33 ft. Also anchorage outside old breakwaters, between Santurce Breakwater and New Lucero Breakwater, lightening operations sometimes performed when weather good. The recommended anchorage zone for deep-laden vessels is 1.3 miles S.W. of Punta Galea Lighthouse in 12 fathoms, sand.

RESTRICTIONS: None, except when draft exceeds 13 – 14 ft. and proceeding to berths inside river, which case must await tide. See "Max. Size".

MAX. SIZE: No restrictions length or breadth. Max. advisable draft 30 – 31 ft. Tankers: Largest vessel entered 409,499 d.w.t. Length 378.01 m. Draft 22.48 m.

HEALTH: If proceeding direct to berth, pratique obtained immediately after berthing. Otherwise, at anchorage on arrival. Cases suspected disease or fever on board, Master must radio Agent, to advise Health Office. On berthing Health Authorities require Health Declaration, Derat Certificate and Crew List.

RADIO: Cabo Mayor Radio.

TUGS: No tugs required for entering port, only for berthing or shifting inside river. Ship's lines used, the tug employed according Pilot's advice. 28 tugs available, 125 h.p. – 4,000 h.p.

BERTHING: Canal de Duesto 26 ft. alongside. Tankers: Vessels will berth day and night, but vessels deep laden must be on pilot station 2 hours before HW. Mooring lines should be of polypropylene or fibre, etc.; if wires are used they should have a fibre pennant. For average weather conditions 18 mooring lines are recommended, 5 head ropes, 5 stern, 4 breasts and 4 springs.

Operated by the Port Authority:

General Cargo:
800 m. of berthing with depth of more than 12 m.
1,832 m. of berthing with depth between 8 m. and 10 m.
362 m. of berthing with depth between 6 m. and 8 m.
1,798 m. of berthing with depth between 4 m. and 6 m.

Bulk Cargo:
1,043 m. of berthing with depth of more than 12 m.
1,372 m. of berthing with depth between 6 m. and 8 m.
121 m. of berthing with depth between 4 m. and 6 m.

Containers:
645 m. of berthing with depth of more than 12 m.
500 m. of berthing with depth between 8 m. and 10 m.

Passenger:
180 m. of berthing with depth between 10 m. and 12 m.

There are also 3 Ro/Ro ramps available.

CRANES: *Gantry Type:* 6 with over 12 tons capacity, 23 of 12 tons capacity, 36 of 6 ton capacity, 62 of 3 tons capacity.

Mobile type: 20 mobile cranes with capacity from 3.5 tons to 100 tons.

Floating Cranes: 10 floating cranes with capacity up to 400 tons.

Container Cranes: 5.

STEVEDORES: Very important send advance messages giving ETA. Agent then informs Shippers or Receivers' stevedores. Official working hours Monday/Saturday 0800 – 1200; 1400 – 1800 hrs.

MEDICAL: Medical service must be arranged by the Agent. In emergency send cable in advance to Agent.

TANKERS: "Campsa" have private berth at Zorroza. Cargo manifest must be visaed by Spanish Consul, or in absence of Consul by Authority at loading port.

Petronor Refinery: *Location:* The Petronor Refinery is located on the North coast of Spain; the Marine Terminal is situated near the Township of Abanto v Ciervana. Geographical situation is approximately Latitude 43° 22.2′ N. Longitude 3° 05.8′ W.

A lighthouse is located on the extremity of the West breakwater (Dique de Poniente) marking the West side of the port entrance, showing a green light with 2 flashes every 6 seconds.

A temporary red buoy located in Latitude 43° 22′ 31″ N. Longitude 3° 04′ 41″ W., showing a red light with 2 flashes every 5 seconds marks the East side of the port entrance; this buoy marks the starting point of the East breakwater (Dique de Levante). Other lights may also be shown.

Charts: Spanish I. H. M. No. 941-942-1938-1940.
British Admiralty No. 74-2925.

Documents/Customs Allowances: The usual documents required are:

6 Crew Lists.

1 Negative Passenger List; if there are passengers aboard, 4 copies of the Passenger List.

2 Copies of the cargo manifest for Petronor and 2 copies of cargo in transit if any.

2 Copies of the vessel's Store List, including bunkers, vessel's stores, tobacco, spirits, medicine chest, etc.

2 Copies of the crew and/or passenger personal effects.

Crew members are not allowed to keep more than 200 cigarettes (or the equivalent in tobacco) and a bottle (1 litre) of spirits out of bond. The rest must be included in the vessel's store lists, and are to be sealed. The total maximum quantity that any ship can carry in accordance with the Spanish Laws is 3 kgs. of tobacco or 3,000 cigarettes for each person aboard (for instance, 30 crew members the maximum quantity allowed is 90 kgs. of tobacco or 90,000 cigarettes).

Any quantity over these amounts should be manifested as tobacco in transit and this Manifest visaed by the Spanish Consulate in the last previous port.

If a Spanish Consul, is not available in the last port of call, Master is required to send prior to arrival the following cable to:

DIRECCION GENERAL DE ADUANAS-MADRID

Vessel.. Coming from..

Bound to Bilbao PETRONOR with tobacco Manifest not visaed last port due to Spanish Consul not being available in the last port.

Master...

....

The text of this cable to be registered in the log book and 1 copy of the same to be given to the Customs Agent when boarding.

Clearance: The Customs Authority will board either when vessel is berthing or at anchor.

Pilotage: Pilotage is compulsory. Vessels must make contact with the Harbour Pilots Office 1 hour before arrival; Masters will make contact again when they are 7 miles from the port entrance.

For large VLCC's tankers, Pilots will board 3 miles off breakwater entrance.

There are no traffic separation schemes or traffic control systems for the Port of Bilbao and approaches.

Arrival Information: The pilot station maintains a permanent radio watch service on VHF Channel 12.

Vessels must send radio advice to Petronor Somorrostro, telephone 4377352 and ETA advice 72, 48 and 24 hours prior to arrival.

The 24 hour advance notice should be updated there after whenever 2 hours delay or more is likely.

If necessary the Refinery Terminal will contact vessels via Aranjuez/EAV, or via Corunna or Cabo Mayor Radio if possible.

Vessels can also make contact through 2182 kc/s with Bilbao Radio for a further phone contact direct.

The arrival cable shall include: Name of the vessel; ETA; Master's full name.

When vessels are coming to load the cable must also specify: the quantity and grade of cargo, loading order when it is more than one grade, tons of ballast and estimated deballasting time, bunkers required and the type. All communications with the Refinery Marine Terminal, do not relieve the Master of keeping the vessel's Agent duly informed.

Anchorage: Masters will be informed by Harbour Pilots of the estimated berthing time and any other information in connection with berthing prospects; should need for anchoring arise due to terminal necessities or any others, vessels will be requested to anchor under the control of the Harbour Pilots in the usual anchoring places, which must be confirmed by Pilots.

The following recommended anchorages for the different types of vessels are pointed out for information only.

Anchorage "A" (outside the harbour entrance):
Recommended area for vessels with a draft greater than 20 m. or over 150,000 d.w.t. (having a better manoeuvring area in case of an emergency).
Holding ground: Sand.
Depth: 50 m.
Bearings and Distances:
North of the entrance green lighthouse, distance 1.7 miles and 314° from Punta Galea lighthouse, distance 2.7 miles.

Anchorage "B" (inside the harbour entrance):
For vessels with draft less than 20 m. and between 90,000/150,000 d.w.t.
Holding ground: Sand.
Depth: 27 m.
Bearing and Distance:
261° from Punta Galea lighthouse; distance 1.9 miles.

Anchorage "C" (inside the harbour entrance):
For vessels less than 90,000 d.w.t.
Holding ground: Sand
Depth: 24 m.
Bearing and Distance:
229° from Punta Galea lighthouse; distance 1.2 miles.

Anchorage "D" (inside the harbour entrance):
For vessels when anchorage "C" is occupied.
Holding ground: Sand
Depth: 20 m.
Bearing and Distance:
204° from Punta Galea lighthouse; distance 1.2 miles.

Depths: The depth at the entrance and manoeuvring area to berths is 28 to 29 m., the maximum tidal range is 4.5 m. All depths refer to low water equinoctial springs.

Health: The national and international regulations concerning free Pratique are applied in Bilbao.

Free pratique is granted when at berth; in case of being anchored the Agent will be requested to arrange the visit under Master's requirements.

Radio advice to the Health Authorities is not required unless there is contagious sickness on board or if coming from an epidemic zone.

Garbage or trash must not be dumped into the port waters. The area surrounding the vessel shall be kept clean.

VHF: Petronor, Marine Terminal, is provided with a permanent radio watch service through VHF Channel 14 or 12.

Before berthing, Control will monitor VHF Channel 12; when the vessel is approaching the berth, it will change to work on Channel 14. Likewise, Petronor personnel appointed to the berth are constantly in communication with the Port Control through the radio. For internal communications between Berth/Port Control and the Refinery, there is, in addition to radio, a telephone system for restricted use.

Berthing: Speed Reference Lights: Placed inside the West breakwater from its initial point, near the port entrance are vertical blue lights that will help on determining the speed when vessel is proceeding towards berths.

From the initial point of the inside breakwater to Berth No. 1, lights are installed every 200 m. From Berth No. 1 to No. 2 every 100 m.

Berthing Assistance Information; Nereides System: Berths No. 1 and 2 are provided with a radar and sonar system which, by means of a luminous panel placed at berth and easily seen from the vessel, supplies the Master and Pilot with an instantaneous indication of the vessel's speed in cms./sec. of the hull side in connection with berthing at bow and stern; likewise, by means of the sonar, the distance in metres, from the hull to the contact points (fenders) bow/stern, appears on the same panel.

Berth No. 1	HW	LW
Spring tides	15 ft. 6 in.	0
Neap tides	9 ft. 6 in.	4 ft. 11 in.
Currents	None reported	
Depths	31 m.	

Loading arms (Hydraulic speed seal connection)	
Crude	4×16 in.
Ballast	2×16 in.
Bunker	1×12 in.

Moorings
2 quick release hooks of 60 tons each.
3 quick release hooks of 100 tons each.
Mooring wires are permitted.

Berth No. 2	HW	LW
Spring tides	15 ft. 6 in.	0
Neap tides	9 ft. 6 in.	4 ft. 11 in.
Currents	None reported	
Depth	19.5 m.	

Loading arms (Hydraulic speed seal connection)	
Crude/fuel/ballast	2×12 in.
Clean products/ballast	2×10 in.

Moorings
2 quick release hooks of 60 tons each.
3 quick release hooks of 100 tons each.
Mooring wires are permitted.

Berth Nos. 3-4-5-6
Tides and currents: Same for Berth Nos. 1-2.

Loading arms			
Berth No. 3	Fuel/ballast	2×12 in.	Speed seal
	Clean products	1× 8 in.	Speed seal
	Clean products	1× 6 in.	Speed seal
Berth No. 4	Fuel/ballast	2×12 in.	Speed seal
	Ballast/clean prod.	2× 8 in.	Speed seal
Berth No. 5	Fuel/ballast	2×10 in.	No Speed seal
	Clean prod./ballast	1× 8 in.	No Speed seal
	Gasolines	1× 6 in.	Speed seal
Berth No. 6	Fuel/ballast	2×10 in.	No Speed seal
	Clean products	1× 8 in.	No Speed seal

Moorings: Mooring wires are permitted on the quick release hooks; if shore bitts are used the eyes of mooring line must be of manila, synthetic fibre or similar.

Mooring Lines: Vessels must be provided with suitable mooring lines in quality and quantity in accordance with their size. The quantity should not be less than 4 headlines, 4 breast and 4 springs at bow and stern respectively. The vessel's crew must keep the mooring lines taut and to the satisfaction of the Petronor supervisor at all times; the variations of the vessel due to changes of tide and/or vessel operations shall be taken into account constantly. The use of the tension winches will be carried out under Terminal Chief authorisation, in order to have the protection of the loading arms always guaranteed.

The use of mooring wires by the vessel will be allowed on the quick release hooks. If using wires to the bollards ashore, the tail pieces must be of Manila, synthetic fibre or similar with a breaking load at least equal of the wires.

Cargo information:
Heavy Hydrocarbons: Heavy hydrocarbons, such as Fuels, Diesel, Asphalts, etc., with an ignition point higher than 65°C (150°F) will be loaded in accordance with the rates established by the Refinery or limited to the conditions of the vessel lines.
Middle Distillates: Products such as Kerosenes, JP-5, Jet A-1, JP-4, Nafthas, Gasolines, Benzene, Toluene, etc.

The flow loading rate of these products to the vessel tanks will not exceed 1 m./sec. (3 ft./sec.) till the cargo level is 1 m. over the tank bottoms (covering lines, heating coils, etc.), in order to avoid turbulence and splashes.

This loading rate could be increased up to 5 m./sec. once the liquid reaches the mentioned level and it will be decreased to 1 m./sec. whenever the cargo level reaches 1 m. under the upper maximum level (vessel deck.)

The flow loading rate will be according to the following table:

Cargo line diameter	*Velocity flow rate 1 m./sec. bbls./cu.m.*	*Velocity flow rate 5 m./sec. bbls./cu.m.*
4 in.	168 bbls./h. 27 cu.m.	840 bbls./h. 133 cu.m.
6 in.	380 bbls./h. 60.3 cu.m.	1,900 bbls./h. 301.4 cu.m.
8 in.	675 bbls./h. 107.1 cu.m.	3,375 bbls./h. 535.7 cu.m.
10 in.	1,080 bbls./h. 171.4 cu.m.	5,400 bbls./h. 857 cu.m.
12 in.	1,510 bbls./h. 239.6 cu.m.	7,550 bbls./h. 1,198 cu.m.
14 in.	1,850 bbls./h. 293.6 cu.m.	9,250 bbls./h. 1,467.2 cu.m.
16 in.	2,450 bbls./h. 388.9 cu.m.	12,250 bbls./h. 1,944.4 cu.m.

Medical: Medical services must be arranged through the Agent. In case of emergency this service can be requested through VHF in order to have everything prepared on arrival either at berth or at anchorage.

Petronor will advise the Health Authorities through VHF 16 or 14.

Fresh Water: No fresh water facilities on the berths. Fresh water must be arranged through the Agent in order to be supplied by barges.

Fuel: The fuel-oil/gas-oil requirements will be arranged directly between the vessel's Agent and Campsa. Fuel-oil is only available at Berth No. 1 with fuel-oil and gas-oil at all other berths.

Ballast: All ballast will be discharged into the shore facilities. The Master will report to the terminal when due to bad weather, the ballast quantity is above normal.

The sea suction and overboard discharge valves will be inspected, closed and sealed before starting any operation; representatives from the terminal and the vessel will take part in the inspection of the closing and sealing. The bilge valves of the engine with sea discharge will be also sealed.

Crew landing Permits: There is no restriction.

The Master will receive the Port Control Permits on arrival which will be duly completed before going ashore, each member will give one copy to the Petronor Representative at the berth gate.

Communications: The Marine Terminal is located at a distance of 8 kms. from the nearest rail station in Santurce; the departure frequency of trains is every 10 minutes.

The distance to/from Bilbao is 25 kms. by road.

Bilbao Airport is located in Sondica and it is 35 kms. from the terminal. It is linked daily with several flights to Madrid and Barcelona, and alternatively to Santiago de Compostela. There are also international links to London and Paris alternately.

Air reservation telephone: 429 10 90.

Rail reservation telephones: 421 35 00 and 424 59 42.

Visitors: Access to the terminal is only authorised to those persons who under previous justification should get on board.

The Marine terminal will issue the pass permit, pointing out the authorised area and time limit.

To go on board, under the previous authorisation of the Master, all persons should be provided with the respective permission of the Spanish Coast Guard.

DENSITY: 1025.

FRESH WATER: Always available. Delivery by tugs. Minimum 10 tons.

FUEL: Ordinary fuel oil and gas oil available at local "Campsa" refinery. Advisable that Shipowners stem bunkers 48 hours prior arrival. Delivery by barges, or at the bunkering pier. Bunkers available at Petronor. Advise Agent in advance.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Normally by crew, except in liner vessels, when contracted by stevedores.

CERTIFICATES: Have usual documents on board, but only Safety Radio, Safety Equipment and Deratisation Certificates required by authorities.

CUSTOMS ALLOWANCE: Normally, Customs permit 200 cigarettes, and 1 bottle wine/spirits per man.

CARGO GEAR: Usually shore cranes employed in loading or discharging but if require lightening then ship's derricks used as only 1 floating crane is available.

IDENTIFICATION CARDS: Not required.

REPAIRS: Good repair facilities, and several important shipyards.
DRY DOCKS: 5 graving docks. Biggest: length 166 m., breadth: 20 m. (naval shipyard).
REPATRIATION: Good facilities.
AIRPORT: About 10 km. from town. Regular services to Madrid and Barcelona. Also direct flights London and Paris.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: 1st January; 6th January; 19th March (St. Joseph); Good Thursday afternoon; Good Friday; 1st May (Labour Day); Ascension Day; 29th June (St. Peter and St. Paul); 31st July (local holiday); 15th August; 12th October; 1st November; 25th December.
POLICE/AMBULANCE/FIRE: Police 091; Ambulance (hospital) 41.87.00; Fire 21.30.00.
AUTHORITY: El Comandante Militar de Marina de Bilbao and Puerto Autonomo de Bilbao.

BURELA: 43.39 N. 07.20 W.

BERTHING: Sheltered berth for vessels with draft up to 20 ft. Facilities includes 2 silos for bulk cement.

CADIZ: 36.30 N. 06.20 W. (See Plan Book)

DOCUMENTS:

Entrance Declaration.
Health Declaration.
List of Crew on Arrival.
List of Crew on Departure.
List of Passengers on Arrival (if applicable).
List of Passengers on Departure (if applicable).

All vessels must be represented by a local Agent who will be responsible for completing the required Customs, Health and Port Authorities documentation.

PILOTAGE: International Code Signals used to call Pilot. Pilot can be contacted by VHF (Channels 14 and 16) or through telegraphic address. "Praticos Cadiz". 6 to 8 hours notice of ETA preferred.

Pilots operate diesel launches both painted black with yellow funnel on which letter "P" is painted in black on both sides. Pilot boat does not remain at station but comes out when ordered. Pilot boards in an area between the Rota light and San Sebastian light. In case of bad weather the Pilot will board nearer Los Cochinos shore and meanwhile signal instructions to the vessel until the Pilot is able to board.

ANCHORAGE: Vessels waiting for a Pilot may anchor in any safe position according to draft and weather conditions. Tankers or deep draft vessels may anchor West of the Junction buoy in 16-18 m. depth where the Pilot boards at first opportunity.
RESTRICTIONS: Entry is restricted only by the depth of the entrance channel, maximum safe draft 30 ft.
HEALTH: Master should radio, not more than 50 hours and not less than 5 hours before arrival, the following information to the port authority: name and nationality of ship, date and time of arrival, last port of call, number of passengers and crew aboard, if doctor on board and details of any sickness noted on voyage. Message to be addressed to "Sanidad Maritima Cadiz". International code quarantine signals to be shown on arrival when free pratique will be given provided health situation is satisfactory.
TUGS: Normally join vessel off San Felipe breakwater. 7 tugs available, up to 2,600 h.p.
BERTHING:

Mole No. 1. or Reina Sofia: 370 m. length, depth alongside 10 m. LW.
Mole No. 2. or Alfonso XIII: 300 m. length, depth alongside 10 m. LW.
Mole No. 3. or Generalisimo Franco: 340 m. length, depth alongside 10 m. LW.
Mole No. 4 or Reina Victoria: 232 m. length, depth alongside 10 m. LW.
Mole No. 5 or Marques de Comillas: 425 m. length, depth alongside 10 m. LW.

TANKERS: 3 Tanker berths for vessels up to 27 ft. draft at the piers in the Zona Franca, operated by Campsa. Hoses: Fuel oil 10 in., gas oil 8 in., gasoline 8 in. No slop discharge facilities.

International Terminals Corp. Berth, length 170 m., depth 9.5 m.

FUEL: Fuel, gas oil and several types of marine diesel can be supplied.
REPAIRS: There are 3 shipyards – Astilleros Espanoles SA, at Cadiz and Matagorda. Empresa Nacional Bazan-Carraca, and several workshops of Auxiliar de la Construccion Naval. All types of repairs can be effected.
DRY DOCKS: Largest is 370 m. long, 66.65 m. wide. In addition Astilleros Espanoles (Factoria de Cadiz) have 1 dry dock of 234.7 m. length, 36.3 m. wide, and 2 floating docks, 1 of 231 m. length, 24 m. breadth, lifting capacity 39,400 tons, and the other 100 m. length, 17.54 m. breadth, lifting capacity 4,500 tons.

At Matagorda, there is a dry dock of 150.97 m. length, 19 m. width, and 6.23 m. max. draft.

At Puerto Real Factory there is a dry dock of 500 m. length, 100 m. width, and 9.0 m. draft, where they can accommodate vessels up to 400,000 tons.

OPENING/CLOSING HATCHES: This work is normally effected by the stevedores.
CONSULS: Argentina, Belgium, Bolivia, Colombia, Denmark, France, Germany, Greece, Italy, Liberia, Netherlands, Norway, Sweden, Finland, Portugal and Venezuela.
CUSTOMS ALLOWANCE: Max. of 3 kilos of tobacco for each person on board. All to be declared. Wine or spirits, 1 decilitre per man per day.
AIRPORT: Nearest at Seville, about 150 kms. away. Daily flights to Madrid, Barcelona and overseas.
TIME: GMT plus 1 or 2 hours, depending on season.
TELEPHONES: Connection to vessels can be arranged by Agents.
SHORE LEAVE: Crew are permitted to go ashore subject to police control.
DEVELOPMENTS: Astilleros Espanoles is building a new dry dock to accommodate vessels up to 400,000 tons.
AUTHORITY: Comandante Militar de Marina.

CARTAGENA: 37.35 N. 00.59 W. (See Plan Book)

DOCUMENTS:

6 copies of the Crew List.
6 copies of the Passenger List, or 2 negative copies as the case may be.
2 sets copies Manifests covering cargo destined to Cartagena and carried in transit.
Store Provision List, in duplicate, including items such as: tobacco, spirits, radios, coffee, tea, bunkers, and any other items belonging to the vessel.
2 copies of all Personal Effects Lists, from passengers and ship's crew.

The amount of cigarettes allowed for each member of crew/passenger is 3 kilos; any amount over has to be manifested as tobacco in transit, and this manifest must be visaed by a Spanish Consul in the last loading/discharging port. If there is no Spanish Consul in the port of call before Cartagena, the Master is requested to send a cable to: Direccion General de Aduanas, Madrid, quoting as follows: "m.v.' . . .' coming from . . . order to proceed to Cartagena tobacco manifest unlegalised = Master".

This cable is to be inserted in the radio log-book, and copy of same to be delivered to local Customs Authorities when boarding the vessel.

PILOTAGE: Compulsory. Position of Pilot station 37° 34.6′ N. 0° 59′ W. Position with green light of Dique de Curra bearing 000°, and the white light of Las Losas bearing 090°. This is the position at which the Pilot normally boards.

Vessels bound for Escombreras wait for Pilot in position 37° 34.2′ N., 0° 59′ W., with green light of Dique de Curra bearing 000° and the green light of Dique Bastarreche bearing 090°.

Pilot launch is a motor-boat with cabin, about 9 m. long, white hull, red below water line, black letter "P" painted on both sides.

When bad weather prohibits Pilot boarding in the above position, vessel may be required to embark Pilot inside the harbour breakwaters.

Vessels call Pilot in daytime by code flag "G", or by sounding 3 prolonged blasts on the whistle.

At night, Pilot may be called by flashing code signal "PT", or by 3 prolonged blasts on whistle.

Radio messages, with ETA, may be sent direct to Practicos Cartagena with 24 hours' notice, and confirmed 12 hours before arrival, messages should include vessel's seawater draft and, if calling for the first time, vessel's length overall. Pilot station equipped with VHF.

APPROACHES: Escombreras Bank with datum depth of 9.5 m. situated West of Escombreras Island, extends from 200 to 400 m. West of the Eastern tip of the island. This bank is unmarked.

Area of underwater obstructions exists between the coast, the meridian of Santa Ana buoy, and the parallel of Las Losas beacon.

There is a zone used for submarine exercises which is marked on the charts. Occasionally, naval divers carry out exercises in the vicinity of the port entrance. These are accompanied by naval vessels showing appropriate signals.

Ships bound for Escombreras, to enter the port, should steer for a point situated at the intersection of the N.S. line of the red light at the extremity of Curra Pier, and the E.W. line through the green light at the extremity of the Bastarreche Pier, at which point, approximately, the Pilot boards the vessel.

The least recorded depth in the entrance to the port is 25 m. The approaches to the port of Escombreras do not present any difficulties.

ANCHORAGE: Vessels anchored within the port limits should not carry out repairs affecting main engines as the possibility of sudden storms in Winter may make it necessary to move to a sheltered anchorage North of Cabo Tinoso, or to put to sea.

Vessels under 29 ft. 6 in. draft may anchor inside the breakwater provided they do not obstruct other vessels' movements.

Anchorage for larger vessels in Cartagena Roads, approx. position 37° 35′ N., 0° 59′ 30″ W. in depths of 40 m.

Anchorage for tankers off Escombreras in approx. position 37° 34′ N., 0° 58′ 23″ W., in depths of 42 m.

MAX. SIZE: No length limitations. For Cartagena max. draft 31 ft. 6 in. For Escombreras max. draft 68 ft.
HEALTH: Free pratique is immediately obtained when vessels berth any time from sunrise to sunset. Port Health Officers, require Maritime

Health Declaration, Deratisation Certificate, and copy of crew and passenger lists.

RADIO: Cabo Palos Radio, Aranjuez Radio, and/or Gibraltar Radio.

TUGS: 3 tug-boats 500 – 1,000 h.p. with fire-fighting capabilities. All 3 tugs on duty 24 hours duly equipped, with 2 shifts of crew.

Tugs join vessels in vicinity of port entrance, vessel's lines normally used.

The tugs available to assist berthing tankers in Escombreras are all diesel tugs, equipped with fire-fighting equipment. 5 tugs available of up to 2,400 h.p.

BERTHING: Total length of general cargo quays 679 m. Depth alongside 8 – 10 m. Solid bulk materials: total length of berthing 717 m. Depth alongside 8 – 10 m.

CRANES:

No.	*Capacity*	*Type*
7	3 – 20 tons	Electric Gantry
2	3 tons	Mobile-Diesel
1	6 tons	Mobile-Diesel
2	25 tons	Mobile-Diesel
1	90 tons	Mobile-Diesel

STEVEDORES: In the case of a vessel calling at Cartagena at night time, Sundays or holidays, it is important that Master cable 24 hours in advance to advise his ETA in order that Agents are able to arrange stevedores' operations. Gangs can be called on as follows: on weekly working days 0800 and 1330 hrs. On Sundays/holidays 0800 hrs. (with prior advice to Union by 1200 hrs. on Saturdays or day preceding holidays). The official working hours are: Monday/Saturday 0800 to 1200 and 1330 to 1730 hrs. – Sundays/holidays: from 0800 to 1400 hrs.

MEDICAL: Medical services rendered as soon as requested but, in case of emergency, Master required to send urgent cable in advance.

TANKERS: Tankers call at port of Escombreras 2 miles away from Cartagena port, this port owned by Refineria de Petroleos de Escombreras S.A. Slop discharge facilities available at Escombreras.

For ships of 250,000 d.w.t Berth No. 7, of recent construction, consists of 4 dolphins, in a line parallel to Bastarreche Pier. Between the first and third dolphin is situated a loading platform with loading/discharging lines. The centre of this platform is situated at a distance of 230 m. from the head of Bastarreche Pier, bearing 140°.

The least depth in Berth No. 7 is 21.45 m. or 70 ft. 4 in. at the extreme South of the berth. The rest of the area has a depth of between 24 to 28 m.

The maximum length foreseen for tankers of 250,000 tons d.w.t. is 250 m. or, 1,145 ft., since the total length of the berth is 430 m.

The maximum allowable draft is 21 m. or 68 ft. 1 in.

Shore lines for crude oil are 1 of 40 in. diameter and 3,500 m. length, and another of 24 in. diameter and 3,500 m. length.

The Woodfield hose-handling gantry has 4×16 in. hoses of which the 2 outside hoses should be used for loading bunkers as well as for discharging. Connecting flanges of 16 in. diameter, type 150 ASA.

Fresh water can be supplied by pipe-line at all berths at a rate of 45 t.p.h.

Only vessels up to about 100,000 d.w.t. may be berthed at night.

8 berths suitable for tankers from 29 ft. 6 in. to 43 ft. draft.

2 berths for LPG carriers up to 29 ft. 6 in. draft.

FUEL: At Cartagena, only gas oil available from tank trucks. At Escombreras all grades of fuel available subject to advance notice given.

FRESH WATER: Available from quay by hose connections, only on working days. On Sundays/holidays notification to be required before 1400 hrs. preceding day.

FIRE PRECAUTIONS: The port area has its own Fire Department under supervision of Port Director. Although there is no water-borne equipment available, tug "Brio" will assist as required as well as Cartagena City Fire Department.

CONSULS: The following countries are represented in Cartagena:

Finland
France
Sweden
Panama
Peru
Italy
Denmark
Greece
Norway
Holland
Belgium

GANGWAY/DECK WATCHMEN: Not compulsory, only used when required by Master under Immigration Police Supervision.

OPENING/CLOSING HATCHES: Usually by ship's crew.

CUSTOMS ALLOWANCE: 200 cigarettes per each crew member, out of bond. The excess to be declared as cargo in transit. Wine and/or spirit: 1 bottle for each crew member or passenger.

CREW IDENTIFICATION CARDS: Not required.

REPAIRS: There are very good repair facilities. A private shipyard "Empresa Nacional Bazan" and 2 other private repair shops.

DRY DOCKS: 1 dry dock can accept vessels of 566 ft. length and 73 ft. beam. 2 floating docks for vessels up to 333 ft. in length.

REPATRIATION: All facilities available.

AIRPORT: San Janvier Airport situated 27 miles from Cartagena with daily service to Madrid, Barcelona and Almeria.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: 1st January; 6th January; 19th March (St. Joseph); Good Thursday from 1400 hrs.; Good Friday; 1st May (Labour Day); Ascension Day; Corpus Christi; 29th June (St. Peter and St. Paul); 18th July (National holiday); 15th August; 12th October; 1st November (All Saints' Day); 25th December.

POLICE/AMBULANCE/FIRE: Police tel. 501456. Ambulance 503470; Red Cross 510727; Fire Department 501111; Port Fire Department 503100.

DEVELOPMENTS: There is a big programme to increase berthing-places by building new piers close to breakwaters, available for 3 vessels.

AUTHORITY: Capitan de Navio, Comandante Militas de Marina de Cartagena, Comandancia de Marina.

CASTELLON DE LA PLANA: 39.58 N. 00.01 W.

(See Plan Book)

DOCUMENTS:

Manifest of Castellon cargo: 1 set covering all loading ports; make sure that this manifest is in perfectly good order before ship's berthing, as the Customs will board the vessel immediately and take it away as it is; thereafter any omission or excess of pages may lead to a fine.

Manifest of the Transit cargo: 2 sets (the same recommendations as above).

3 Crew Lists.

2 Negative of Passengers.

2 sets of Bills of Lading of Castellon cargo.

2 Provisions Lists.

2 Manifests of personal effects.

PILOTAGE: Compulsory, and service is permanent. Pilots board vessels by a cutter in roads near entrance formed by the 2 breakwaters.

Pilot cutters are painted white and have the letter "P" in black on each bow. Cutters have a blue flag, with letter "P" in white. Signals to be made by vessels requiring Pilot: 3 long blasts. Telegraphic address: "Practicos, Comandancia Marina, Castellon".

ANCHORAGE: Vessels can remain at anchor at the roads. Recommended anchorage: 0.5 mile East of lighthouse in depth of 12 m.

RESTRICTIONS: Max. draft 22 ft. for vessels of about 110 – 120 m. length. For vessels of more 120 m., to 140 m. length, max. draft is 20 – 21 ft.

HEALTH: Pratique obtained immediately after berthing, when Health Officer boards vessel. In case of suspected disease or fever on board Master must radio Agent to advise the Health Office. Following documents are required by the Health Officer upon berthing: Maritime Declaration of Health, Deratisation Certificate, 1 Crew List.

RADIO: Aranjuez Radio, call sign EAD, 36 – 48 hours prior arrival nearest radio station is El Grao Radio, call sign EAV.

TUGS: Tugs join vessels at entrance of port. Vessels of more than 100 m. length normally use 1 or 2 tugs. Ship's ropes used.

STEVEDORES: Very important that Master sends in advance short radio notice regarding vessel's ETA so Agent can inform Shippers or Receivers' stevedores accordingly. Official working hours of port are: Monday/Saturday 0830 – 1230 and 1400 – 1800 hrs.

MEDICAL: All kinds of medical services can be arranged. In case a crew member needs medical attendance urgently, it is advisable that Master sends a radio message in advance.

TANKERS: "Campsa" berth in Muelle Serrano Lloberes.

Esso Petroleos Espanoles, S.A. Refinery Terminal. Breasting Island; Lat. 39° 56′ 7″ N. Long. 00° 01′ 6″ E. for tankers with unlimited length. Depth of water in the berth is about 12.5 m. (41 ft.).

Vessels berth heading either East or West. The Breasting Island is built on piles. A central platform about 70 m. (230 ft.) long and 15 m. (49 ft.) wide will accommodate the loading arms and the island services. 2 mooring dolphins are located at about 128 m. (420 ft.) from the centre of the platform. They are linked with the main platform by a walkway. The platform elevation from the sea level is an average of 6.8 m. (22 ft.).

Both sides of the Breasting Island central platform and the Eastern dolphin are provided with a resilient fendering system. No fendering system is installed on the Western dolphin. Vessels can be docked at both sides of the Breasting Island.

2 "swamped" breasting wires are anchored about 200 m. (640 ft.) off both sides of the Breasting Island. Quick-release hooks are provided on the platform corners and on both mooring dolphins.

Hoses: 2 loading arms of 10 in.–150 lbs./ASA and 2×8in. loading arms 150 lbs./ASA.

Any vessel from 3,000 d.w.t. through 37,000 d.w.t. can be accepted at the Breasting Island having a deepest draft of 37 ft. 6 in.

Sea berth: For crude oil cargoes with submarine pipe-line: Lat. 39° 56′ 4″ N. Long. 00° 02′ 7″ E. Unlimited length.

Depth of water in the berth is about 25 m. (82 ft.). Vessels berth heading 075°/080° true using both anchors forward, with about 280 m. (900 ft.) of chain out on each anchor and 2 swamped mooring legs if it is necessary.

The stern is secured to 5 lamgar buoys equipped with 2 release hooks on each. These buoys have flashing lights.

1 navigational range consisting of 2 lighted buoys, is used to proceed to the sea berth and drop the anchors.

Any vessel from 27,000 d.w.t. to 165,000 d.w.t. can be accepted in the sea berth.

Bunkering available. Water available by barge. Provisions available. Pilotage compulsory – Esso Pilots. Tugs: 2 tugs compulsory.

BALLAST: All ballast must be discharged to shore tanks, no exception will be made to this rule. A total of 17,000 cu. m. (110,000 bbls.) can be received by the Refinery ballast tanks.

FRESH WATER: All piers have water available by shore pipes. The rate of delivery is about 8–9 t.p.h.

FUEL: Available with 5 days notice and subject to "Campsa" berthing availability.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: Vessels should have usual documents on board, but only the Safety Wireless, Safety Equipment and Deratisation Certificates are required by authorities.

CUSTOMS ALLOWANCE: Normally, Customs permit 200 cigarettes per man out of bond and 1 bottle of spirit per man.

CARGO GEAR: All commercial piers served by electric shore cranes able to lift 3-6 tons and 14-18 tons (restricted use).

IDENTIFICATION CARDS: Not required.

CONSULS Italian, Navarra 99, tel. 211004; France, Avda Almazora S/N, tel. 211717; Norway, Enmedio, 9, tel. 222550; Sweden, Maestro Ripolles, 28, tel. 220053.

REPAIRS: Work shop for small repairs.

REPATRIATION: Good facilities exist.
AIRPORT: Valencia, 70 km. away.
TIME: GMT plus 1 hour. Summertime: GMT plus 2 hours (Summertime, 1st Sunday in April to 1st Sunday in October).
HOLIDAYS: 1st January; 6th January; 19th March, St. Joseph; Good Thursday after 1400 hrs.; Good Friday; 1st May, Labour Day; Ascension Day; Corpus Christi; 14th June, local holiday; 29th June, St. Peter and St. Paul; 18th July, National holiday; 25th July, St. James; 15th August; 12th October; 1st November; 8th December; 25th December; and 2 or 3 local holidays more, variable.
POLICE/AMBULANCE/FIRE: Police: tel. 220516; Ambulance 213944; Fire 221222.

CASTRO-URDIALES: 43.24 N. 03.14 W.

DOCUMENTS:
3 Cargo Manifests. 1 visaed by the consular authority.
3 Cargo Manifests for other ports if the vessel has called at and loaded in other ports.
3 Ballast Manifests (if the vessel has arrived in ballast).
5 Passenger Lists (if passengers are carried).
5 Captain's Certificates to the effect of "No Passengers" if no passengers are carried.
5 Crew Lists.
5 Stores Lists.
5 Crew's Store Lists – cameras, radios, spirits, cigarettes, etc.
Health Certificate.
Certificate of Derating and fumigation against insects.
4 Bills of Lading.
International Freeboard Certificate.
International Safety Certificate.
International Radio Certificate.
Certificate of Stowage of cargo.

PILOTAGE: *To request pilotage:* 1. Advise the arrival of the vessel 24 hours in advance. 2. Hoist flag "G" of the International Flag Code. 3. Anchor within the pilotage limits of the port.

Port pilotage limits: Coastal zone comprised between the Onton meridian and that of the Punta del Rabanal at 1 mile from the coast. The Pilot goes out to a limit of 1 mile outside the port. There are no means of radio communication with the pilot boat or pilot station. ETA to be given 24 hours in advance. Sound signals to summon the Pilot – 3 long blasts. In the event of bad weather, the Pilot does not proceed to sea, and the vessel must enter the port and anchor in the bay.

Anchorage to await Pilot: In the mouth of the port at 1 mile distant. The pilot boat carries a blue flag with the white letter "P" upon it. The pilot boat is blue and is a small motor-launch.

ANCHORAGES: The best anchorage is 045° – 800 m. from the green coloured beacon of the breakwater at the port entrance, in a depth of 12 m.
RESTRICTIONS: There are no entry restrictions. Vessels with a draft greater than 6 m. cannot enter the port.
MAX. SIZE: Length 105 m., draft 5 m., depth at the entrance 9.14 m.
HEALTH: The Health Official boards the vessel as soon as it is berthed alongside. In the event of suspected illness or fever, advise Agent by radio and anchor near the port until the Health Doctor authorises entry.
RADIO: The best radio station to pass the ETA telegram to consignees or Agents is Santander Radio station call sign "EAS". Frequency 500 kHz.
TUGS: None available.
BERTHING: Irrespective of tide. The S.E. pier has a total length of 980 ft., of which 500 ft. forms the commercial wharf, mainly for coasters sundry cargoes. No cranes. Fresh water supply. Depth 17 ft. at low water.

Iron ore loading tips: Along open coast adjoining Castro-Urdiales are several cantilever piers connected with the Iron Ore Mines, partly sheltered in creeks or small coves. All vessels bound to load iron ore there should clear and apply at Port of Castro Urdiales. Steamers cannot remain at these berths during rough weather but may find good anchorage in roads, or immediate shelter at the port of Castro-Urdiales, or better at Bilbao Harbour 9 miles East.

The Iron Ore Loading berths (no length limit) are as follows:

Name	*Situation*	*Approx. ebbtide draft*	*Loading rate per working hour*
Dicido	1 mile E.	21 ft.	800 tons
Saltacaballo	1.5 miles E.	22 ft.	800 tons
Onton	2 miles E.	21 ft.	1,000 tons

STEVEDORES: Ordered by Agent or Shipper. No ETA to stevedores necessary.
MEDICAL: It is not necessary for Agent to receive advance notice that medical attention is required. In the port there is a corps of doctors and one of them is always on duty for any emergency. Furthermore, there is a permanent Spanish Red Cross service with ambulances to transport any patient to a large hospital centre. There is also a hospital in this town.

In the case of serious illness, patients are taken by ambulance to the Cruces Medical Aid Centre (province of Vizcaya-Bilbao) 18 km. from Castro Urdiales.

International Vaccination Certificates are required.

DENSITY: 1016.
FRESH WATER: Water may be taken on board at the San Luis Quay (also known as the Ocharan Mazas Quay). By means of hoses and at a rate of delivery of about 40 t.p.h.
FUEL: Not available.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Carried out by Crew.
CERTIFICATES: Safety Wireless, Safety Equipment, and Deratisation generally inspected.
CUSTOMS ALLOWANCE: Normally 200 cigarettes per man. For longer stay, new allotment out of bond obtainable. Wine/and/or Spirit: 1 bottle per man.
CARGO GEAR: At the small commercial wharf ship's derricks are used. At the iron ore loading berths along the coast with Cantilever Piers, conveyor belt employed with spout at the tip.
IDENTIFICATION CARDS: Not required.
CONSULS: None.
REPAIRS: Limited.
REPATRIATION: Crew changes and repatriation can be effected, bearing in mind that any consular negotiation must be made in Bilbao, since there are no Consulates in this port.
AIRPORT: Nearest Sondica (Bilbao) 40 km. by road.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: Sundays; 1st January; 19th March (Saint Joseph); April, Holy Thursday and Friday (variable each year); 1st, 23rd May; 13th and 29th June; 18th and 25th July; 15th August; 12th October; 1st November; 25th December. On holidays, work may proceed if requested.
POLICE/AMBULANCE/FIRE: Police C.G. Tel. 861146; Ambulance Red Cross 861147 and 861191; Hospital 860196; Fire 861294.
TELEPHONES: No arrangements for placing telephones on board.
SHORE LEAVE: Crew allowed ashore.
DELAYS: The only delays that can normally be expected are those due to bad weather.
AUTHORITY: Military Marine Adjutant – Port Captain.

CEUTA: 32.53 N. 05.17 W.

DOCUMENTS:
Health Declaration.
2 Cargo Manifests.
2 Stores Lists.
4 Crew Lists.
5 Passenger Lists.

PILOTAGE: Radio Agent advising ETA 24 hours in advance. International code signals used to call Pilot, or give 3 long blasts. Sound signal used day and night. Pilot boards 1 mile from the breakwater. Pilotage compulsory. Pilot on VHF Channel 16 throughout 24 hours, working Channel 12.
ANCHORAGE: To the N.W. of the green light buoy marking the port entrance and to a distance of one mile, in depths of 10 to 15 fathoms, but vessels must leave this area during strong winds from the first and fourth quadrants, in which case the anchorage in the South Bay is advisable. The outer part of the N.W. side of the Western Quay is very rocky.
Prohibited Anchorage: To the East of the meridian passing through the Red Light on the Eastern Quay, anchorage is prohibited due to the presence of submarine cables.
RESTRICTIONS: Vessels carrying explosives must give ample warning of arrival in advance.
MAX. SIZE: Length, 220 m. Max. draft, 33 ft. 6 in.
HEALTH: Pratique obtained immediately after berthing when vessel boarded by health officials.
RADIO: Algeciras, Tarifa, Tangiers, Gibraltar, or Cadiz Radio.
RADAR: No service available.
TUGS: Normally 2 tugs in service, 1,100 h.p. and 825 h.p. Tugs use ship's lines.
BERTHING: West Mole: 5 berths for vessels up to 33 ft. 6 in. draft. East Mole: 2 berths for vessels up to 31 ft. draft. Dato wharf: 2 berths, up to 20 ft. draft. Muelle Espana, 2 berths for vessels up to 20 ft. draft.
STEVEDORES: To be requested when sending ETA. The times for engaging personnel is from 0730 to 0830 and from 1630 to 1730 hrs., and within these times personnel are appointed up to midnight of that day.

On holidays, engagements take place the previous day at 1730 hrs. For Sundays, personnel are engaged on Saturday at midday. Extraordinary working hours are prohibited. With effect from 2000 hrs., work is considered as nightwork, and is subject to 50% increase in rates. Sundays, holidays, and Saturday afternoons are subject to 40% increase in paid rates.

MEDICAL: Advance notice by radio preferred. Hospital facilities available.
DENSITY: About 3.64%.
FRESH WATER: Available.
FUEL: All grades available, to be ordered in advance. Also see "General".
GANGWAY/DECK WATCHMEN: Available but not essential.
OPENING/CLOSING HATCHES: Performed by stevedores.
CUSTOMS ALLOWANCE: Maximum 3 kilos tobacco for each crew member. Normal daily consumption of wine and spirits allowed.
IDENTIFICATION CARDS: Not required.
CONSULS:

Belgium	Tel. 512680

RANES: 24 electric cranes, capacity 3 – 45 tons, outreach 10 – 22 m. diesel-electric mobile cranes, capacity 1.5 – 6.0 tons, outreach 8.0 – .5 m. 1 locomotive crane, capacity 5 tons.
ULK HANDLING FACILITIES: *Private Storage Facilities:*

ement:	3 silos each of 800 tons capacity.
	4 silos each of 1,000 tons capacity.
luminium:	3 silos each of 3,000 tons capacity
	1 silo capacity 4,000 tons.
ertilizer:	2 tanks each of 7,500 tons capacity.
nspecified Oils:	2 silos each of 1,000 tons capacity.
	2 silos each of 500 tons capacity
	1 silo capacity 600 tons.
	1 silo capacity 350 tons.
	6 silos each of 500 tons capacity.

ANKERS: 2 berths, depth 13.0 m. for tankers of 45,000 d.w.t. and 0,000 d.w.t.
1 pier, depth 17.0 m. Berthing for 1 tanker of 120,000 d.w.t. and the ther 65,000 d.w.t.
Storage facilities:
Campsa: 6 tanks of 3,500 cu.m. each and 3 tanks of 2,500 cu.m. each.
Petroliber; 18 tanks with capacities from 2,500 cu.m. to 35.000 cu.m. Total capacity 220,000 cu.m.
Facilities for reception of dirty ballast.
FRESH WATER: Can be supplied by pipe-line at most berths rate 0 – 150 t.p.h. or by barge at rate of 150 t.p.h.
FUEL: Can be supplied by pipe-line at most berths. No barges.
CUSTOMS ALLOWANCE: Normally Customs permit 200 cigarettes per man out of bond. Additional quantities needed depend on the stay of ship in port. 1 bottle of spirits per man.
REPAIRS: Minor repairs can be effected in shore work shops.
AIRPORT: Nearest international airport at Santiago de Compostella 60 km. away.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: Work can be arranged on following holidays. New Year's Day (January 1st, full day); Epiphany (January 6th, full day); St. Joseph (March 19th, full day); Easter Thursday (half day); Easter Friday (full day); St. Joseph Artizan (May 1st, full day); Patron Saint of Spain (July 25th, full day); Ascension Day (August 15th, full day); Holiday of Hispanicism (October 12th, full day); All Saints' (November 1st, full day); Immaculate Conception (December 8th, full day); Christmas Day (December 25th, full day).
AUTHORITY: Junta del Puerto.

FERROL: 43.28 N. 08.16 W.

PORT LIMITS: Whole of the area in the Estuary joined by an imaginary line between Punta Coitelada and Cabo Priorino.
DOCUMENTS:
3 Crew Lists.
2 Passenger Lists or a negative.
1 Cargo Manifest of goods destined for the port.
Another Manifest covering transit cargo.
2 Store Lists, including tobacco, cigars, cigarettes, coffee, spirits, radios, cameras, etc., in possession of crew. In all cases make and number of radios to be indicated.
Safety Wireless Certificate and Safety Equipment Certificate.

If vessel carries over 3 kilos tobacco per man, the excess to be declared in a separate manifest, which must be visaed by Spanish Consul at the last port, otherwise vessel is exposed to heavy fine.
PILOTAGE: Compulsory. International code signals used to call Pilots. Pilots board off Cape Priorino.
MAX. SIZE: Cargo vessels up to 32 ft. draft. Tankers up to 35 ft. draft.
HEALTH: If vessel proceeds directly to berth, pratique can be obtained immediately after berthing. Otherwise, at anchorage at vessels arrival. If vessel has sickness on board of a contagious nature Masters should advise Health Authorities by radio, and they will examine patients immediately upon arrival, to enable vessel to be granted free pratique.
RADIO: Corunna Radio (Riazor): Calls on 1748 kc/s and listens on 2182 kc/s and 2122 kc/s.
Corunna (Eiris): Call sign "EAR" on 500 kc/s and 472 kc/s.
VHF: El Ferrol Pilot maintains permanent watch on Channel 14.
Corunna (Eiris): Call sign "EAR" on Channel 16 and 26.
TUGS: Available up to 1,750 h.p. Also salvage tug normally stationed at Ferrol.
BERTHING: Depth alongside quays 25 – 32 ft.
CRANES:

No.	Capacity (tons)	Reach (m.)
2	3/5	15/9
2	3/6	20/15
1	3/6	20/15
1	7.5/15	15/9
1	6	20
4	12	26

Floating cranes available up to 130 tons capacity.
TANKERS: Campsa Oil Terminal, 3 berths, can accommodate tankers up to 656 ft. length and 35 ft. draft. Facilities available for discharging slops ashore.
FRESH WATER: Can be supplied from the quays.
FUEL: All grades available at the oil berths.
REPAIRS: All ships' repairs can be effected.
DRY DOCKS: 5 dry docks for building and repairing Naval and merchant ships. Largest dry dock length 330.20 m., width 50 m., capacity 230,000 g.r.t.
CUSTOMS ALLOWANCE: Normally Customs permit 200 cigarettes per man out of bond. Additional quantities needed depend on the stay of ship in port. One bottle of spirits per man.
AIRPORT: Alevedro Airport (La Coruna), two services a day to Madrid. Labacolla Airport (Compostela), regular services to Oviedo, Santander, Bilbao, San Sebastian, Barcelona, and Madrid.
TIME: GMT plus 1 hour in Winter. Summertime kept from April to September.
HOLIDAYS: Work can be arranged on following holidays. New Year's Day (January 1st, full day); Epiphany (January 6th, full day); Saint Joseph (March 19th, full day); Easter (two days); Easter Monday; St. Joseph Artisan (May 1st, full day); Labour Day (July 13th, full day); Patron Saint of Spain (July 25th, full day); Assumption Day (August 15th, full day); Holiday of Hispanicism (October 12th, full day); Immaculate Conception (December 8th); Christmas Day (December 25th, full day).
AUTHORITY: Comandante Militar de Marina El Ferrol and Ingeniero Director.

GARRUCHA: 37.10 N. 01.49 W. **(See Plan Book)**

SHIPMASTER'S REPORT:

DOCUMENTS: Usual forms required:
4 Crew Lists
1 Crew Declaration
1 Ship's Stores Declaration
Ship's Register
Cigarettes and spirits sealed.

APPROACHES: Coming in from the East the port is easy to find, first sighting is of a small Spanish town at the edge of the sea. On the radar the harbour breakwater begins to show up 12 miles, and is clearly distinguished at 6 miles.
PILOTAGE: The Pilot boards from a small open boat about 2 cables from the end of the breakwater, the boat is painted white and for a short spell shows a blue flag with a white "P" on it to convey that he is the Pilot and not a local fisherman.

There are 2 Pilots available. The service of a Pilot is obligatory both on entry and leaving for vessels of more than 50 g.r.t.

ANCHORAGE: On our arrival 1 vessel was anchored in a position off the centre of the town, 2 cables from the end of the breakwater on a line drawn continuing from the breakwater, this appears to be the anchorage mentioned in the Admiralty Pilot Book. We passed close inshore of him and obtained soundings of 14 to 16 m. when passing his position, whilst we were alongside another vessel arrived and anchored 1.5 cables to seaward from the breakwater.

TUGS: In June, 1980, there will be a tug of 1,200 h.p. to assist manoeuvring of vessels on entry and departure, the tug's assistance being obligatory for vessels of more than 110 m. LOA or 3,500 g.r.t.

HARBOUR: From June 1980, the maximum permitted draft at the commercial quay is 8.5 m. Also, at that date, the commercial quay will be extended to 220 m. length.

The harbour is man-made, the outer wall is made of high stone blocks in an "L" shape, the foot of the "L" attached to the land and the outer part running in line with the shore. It is entered from the South with a mole on the port hand enclosing a small fishing harbour. Minimum depth according to the Pilot is 6.3 m. In the N.W. corner on the outer breakwater there is a large concrete apron extending for a length of approximately 100 m. where we loaded, then from the seaward end to the end of breakwater there is an open berth with a large cantilevered loading chute jutting out over the harbour which is fed from conveyors on the seaward side of the breakwater.

BERTHING: The vessel entered the harbour from the South, when the bow was almost level with the end of the inner berth the starboard anchor was dropped to 1 shackle and the vessel swung to starboard on the anchor, a headline was sent away and when the vessel was three quarters swung the anchor picked up. The face of the quay was protected with large roller rubber tyre fenders.

LOADING: The main export of the port is gypsum stone in bulk, we loaded from quay with 2 conveyor belts being fed by dumper trucks into bins on the end of the conveyor belts from the cargo stacked on the quay. The loading rate with the 2 conveyors was up to 800 tonnes per hour. The labour was helpful in positioning the conveyors to our requirements, and they have one man who keeps a careful eye on the draft.

SUPPLIES: There is a ship chandler in Garrucha. Fresh water is supplied by road tanker and pumped aboard, the tanker holding approximately 4 tonnes.

GIJON: 43.34 N. 05.41 W. (See Plan Book)

LOCATION: The port is located on North coast of Spain on Gijon Bay. The harbour of Gijon has 3 main areas: Commercial area (formerly called Puerto del Musel) on N.W. of Bay; Local Harbour on S.E. of Bay (used by fishing vessels and yachts); Central area, where ship and dockyards are located.

DOCUMENTS: *Cargo Manifests:* A set of manifests (3 copies) has to be handed to the Customs Authorities. This manifest should cover all cargo on board including any transit cargo, that is, covering all cargo bound for any port. If the vessel arrives in ballast at a Spanish port, a "nil" cargo manifest has to be submitted to the Customs Authorities. A special visaed *Tobacco Manifest* is also necessary, in accordance with the following paragraph.

Transit Tobacco Manifest: Please pay special attention to this in order to avoid considerable losses and expenses. The Spanish Customs regulations provide for 6 kilos of tobacco per crew member to be on board as usual provisions. If the total quantity of tobacco (including cigarettes, cigars, pipe tobacco, and other kinds of tobacco) does not exceed the said average of 6 kilos per crew member, such quantity may be declared as "provisions" on the usual provisions list, and no further documentation is necessary. For your guidance the Customs consider a carton of 200 American cigarettes to weigh 250 grams. If the total quantity on board exceeds the said average, the excessive quantity must be shown on a special transit manifest. Usual manifest forms may be employed, describing the tobacco in Spanish, as "Tobacco en Transito". The essential point is that this transit manifest is visaed by the Spanish Consulate which must insert a full and complete visa. A simple consular stamp is not sufficient. This point is mentioned especially because it is known from experience that the information given by Spanish Consulates in this respect is often different and erroneous. If there is no Spanish Consulate at the last port of sailing, or nearby the tobacco manifest may be visaed by the local Customs Authorities, or a friendly consulate, but the visa is still essential. The Spanish Customs Authorities are very strict in this respect and the lack of a visa on the tobacco manifest would inevitably entail the confiscation of the excessive quantity, plus severe fines from the Customs.

Provisions and Stores List: Has to be submitted in duplicate to the Customs Authorities. Usual international forms may be employed.

Crew List: Must also be submitted to the Marine Authorities.

Personal Effects Declaration: Has to be submitted in duplicate to the Customs Authorities and must be signed by all the crew members.

Passenger List: Including passengers in transit, must be presented. When no passengers are on board a "nil" passenger paragraph has to be issued in the cargo or ballast manifest, as follows: "No Pasajeros".

The above mentioned documents must be signed by the Master and should bear the ship's stamp.

PILOTAGE: On approaching the Port of Gijon, Masters are urged to contact the pilot station via VHF Channel 14. The Pilot will board the vessel in the roads, whether scheduled to berth or to remain at anchorage. The Pilot will be instructed beforehand in respect of ship's berthing/anchorage instructions. Pilotage is compulsory.

ANCHORAGE: The Port of Gijon is located in the Bay of Gijon. It is a wide open area with deep water. Large vessels remain at anchor (when berth is not available) outside of the inner port limits. Smaller ships ma anchor within breakwaters.

RESTRICTIONS: The mouth of the harbour is 400 m. wide, and dept over 21 m. Tidal range: 4.6 m.

HEALTH: It is strongly recommended that Masters send a radi message requesting Free Pratique 24 hours before the vessel's arriv in port, to "Sanidad Exterior" Gijon, also notify Agent.

VHF: *Communications with ships at anchor:* Communication may b established by VHF Channels 16 and 26 via Radio Gijon coastal statio Pilot station may be contacted through Channel 14.

TUGS: "Jove" (500 h.p.), "Torres" (1,000 h.p.), "Penas" (2,500 h.p. "Arbeyal" (1,630 h.p.). When required, service is complemented with th tugs based at the nearby port of Aviles.

Entrance Regulations: The undersecretariat of the Merchant Marine General Direction of Navigation has approved the regulations propose by the Port of Gijon Authority concerning entrance of large vessels in th Port of Gijon (El Musel inner wharves). These regulations will b applicable to all vessels in good manoeuvring conditions. Length is to b understood as overall for bulbous bow ships, and betwee perpendiculars for all others. Unless otherwise specified, tug horsepower is to be understood as being not less than 500 h.p.

Group 1:
  Length from 215 to 250 m. Max. draft: 45 ft.
  Water beneath keel: 5 ft. Tugs: 3 (1 of 2,000 h.p.)
Group 2:
  Length from 250 to 260 m. Max. draft: 45 ft.
  Water beneath keel: 6 ft. Tugs: same as group 1.
Group 3:
  Length from 260 to 275 m. Max. draft: 45 ft.
  Water beneath keel: 7 ft. Tugs: 4 (1 of 2,000 h.p.).
Group 4:
  Length from 275 to 290 m. Max. draft: 43 ft.
  Water beneath keel: 8 ft. Tugs: Same as group 3.
Group 5:
  Length from 290 to 305 m. Max. draft: 41 ft.
  Water beneath keel: 9 ft. Tugs: 5 (1 of 2,000 h.p.).

Manoeuvring of Groups 2 and 3 will be done during good weather ar of Groups 4 and 5 during good weather and preferably in day time. F ships over 305 m. length, entering must be approved by compete authorities, conditions to be determined.

BERTHING: Pier's name, depth alongside, usage and facilities:

Muelle de Los Porticos (North Pier)
 First Section:
  144 m. length. 14 m. depth. Liquefied Gas discharge.
  Connection to gaseoduct.
 Second Section:
  550 m. length. 14 m. depth. Bulk discharge.
  4 portico-type cranes, each discharging 500 t.p.h.
  Conveyor belt. 3 cranes of 6 tons handling 60 t.p.h.
Muelles de Ribera:
 Primera Alineacion:
  228 m. length. 7 m. depth. General cargo.
  2 cranes of 3 tons handling 25 t.p.h.
  2 cranes of 3 tons handling 28 t.p.h.
  4 cranes of 3 tons handling 30 t.p.h.
 Segunda Alineacion:
  109 m. length. 7 m. depth. Bulk cement loading.
  Bulk cement loading installation.
 Tercera Alineacion:
  156 m. length. 8 m. depth. General cargo and containers.
  1 crane of 45 tons handling 140 t.p.h.
  2 cranes of 3 tons handling 25 t.p.h.
  1 crane of 3 tons handling 30 t.p.h.
Espigon I:
 North Section:
  220 m. length. 8/10 m. depth. Bulk and General cargo.
  6 cranes of 3 tons handling 30 t.p.h.
 South Section:
  314 m. length. 9/10 m. depth. Heavy cargo and steel goods.
  1 crane of 12 tons handling 90 t.p.h.
  2 cranes of 25 tons each handling 140 t.p.h.
  1 crane of 45 tons handling 140 t.p.h.
Estacion Maritima:
 Cuarta Alineacion:
  114 m. length. 6 m. depth. General cargo and steel goods.
  3 cranes of 3 tons handling 28 t.p.h.
 Quinta Alineacion:
  225 m. length. 7 m. depth. Coal loading berth and Ro-Ro ramp.
  Coal loading installation handling 400 t.p.h. each of the 2 bridges
  1 crane of 45 tons handling rail wagons.
  A Ro-Ro ramp.
Espigon II:
 North Section 1:
  80 m. length. 7/8 m. depth. Cement loading.
  Cement loading installation: 200 t.p.h.
 North Section 2:
  220 m. length. 8/12 m. depth. Oil and Bulk cargo.
  3 connections for oil products.
  6 cranes of 6 tons handling 60 t.p.h.
 South Section 1:
  166 m. length. 8.5 m. depth. Oil products.
  Connections for oil products.
  Tanks for vegetable oil.
 South Section 2:
  180 m. length. 8.5/12 m. depth. General cargo, oil and steel products.
  Connections for oil products.
  3 cranes of 6 tons handling 60 t.p.h.
  3 crane of 12 tons handling 100 t.p.h.

Pantalan de Petroleros (Oil Berth):
North Section:
180 m. length. 9 m. depth. Oil products.
Connection for discharging oil products.
South Section:
180 m. length. 9 m. depth. Oil products.
Connection for discharging oil products.
Muelles del Rendiello:
Sexta Alineacion:
346 m. length. 5 m. depth. Not yet in commercial service.
Muelle Adosado:
443 m. length. 5/7 m. depth. Not yet in commercial service.
Muelles de la Osa:
Septima Alineacion 1:
332 m. length. 8/10 m. depth. Bulk, general cargo and containers.
2 cranes of 30 tons handling 150 t.p.h.
Septima Alineacion 2:
200 m. length. 12 m. depth. Bulk and general cargo.
2 cranes of 6 tons handling 60 t.p.h.
3 cranes of 12 tons handling 100 t.p.h.
Octave Alineacion:
206 m. length. 12 m. depth. Bulk and general cargo.
4 cranes of 6 tons handling 60 t.p.h.
Muelle Moliner:
313 m. length. 14 m. depth. Bulk cargo and steel products.
5 cranes of 12 tons handling 100 t.p.h.

TANKERS: 1 tanker berth owned by Campsa accommodating tankers of 600 ft. length and maximum draft 29 ft. 6 in. Also see "Berthing".

STEVEDORES: Work in the port is not performed on Sundays or Holidays.

Working Hours: At "Muelle de los Porticos" (North Pier), 24 hours a day, 7 days a week, Sunday and Holidays included. All other quays, Monday/Friday 0800 – 1200, 1300 – 1700. Overtime 1700 – 2300. Saturday 0800 – 1200, no overtime. Sunday/Holiday: No work.

MEDICAL: Crew members requiring medical attention, hospitalisation, etc. should be reported by the Master to the Ships Agent for prompt attention. All necessary facilities are available at Gijon.

FRESH WATER: Available ex-wharf or barge. From the wharf connections it is supplied at 20 t.p.h., and from barge at those berths where there is no shore supply facility.

FUEL: Fuel and diesel oil are supplied to ships either directly from shore connection (available only at Espigon II) or by a small tanker in service for the purpose.

CONSULS: The following countries have consular representation in Gijon: Argentina, Belgium, Brazil, Chile, Dominican Republic, Ecuador, France, Guatemala, Italy, Liberia, Nicaragua, Norway, Netherlands, Panama, Paraguay, Portugal, Sweden, El Salvador, Uruguay.

REPAIRS: There are 5 shipyards at Gijon, and work shops specialised in naval works. All types of repairs will be readily attended. It is recommended that advanced notification is given when assistance is required. Electrical power is supplied ex-wharf.

CUSTOMS ALLOWANCE: See "Documents".

DRY DOCKS: 3 companies own a total of 6 dry docks at Gijon, the largest of which is 170 m. length, 27.40 m. wide for vessels up to 26,000 tons.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

AIRPORT: The regional airport, named Asturias (in some instances it still is being known as Oviedo) is 45 km. away from the port. There are daily flights linking Gijon with Madrid and Barcelona. There is a bus service for passengers from Gijon to the airport.

HOLIDAYS: Jan. 1st and 6th, March 19th, Maundy Thursday, Good Friday, May 1st and Corpus Christi, June 29th, July 25th, August 15th, September 8th, September 29th, October 12th, November 1st, December 8th and 25th.

DEVELOPMENTS: New piers are under construction and will be ready for commercial use in 1982/83.

AUTHORITY: Junta del Puerto de Gijon.

AGENT: Romualdo Alvargonzalez, S.A. Apartado 141, Gijon. Tel.: 344400. Telex: 87366.

HUELVA: 37.16 N. 06.55 W. (See Plan Book)

DOCUMENTS:
3 Crew Lists.
2 Passenger Lists or a negative.
1 Cargo Manifest of goods destined to Huelva.
Another Manifest covering transit cargo.
2 Store Lists, including tobacco, cigars, cigarettes, coffee, spirits, radios, cameras, etc., in possession of crew. In all cases make and number of radios to be indicated.
Safety Wireless Certificate and Safety Equipment Certificate.

If vessel carries over 3 kilos tobacco per man, the excess to be declared in a separate manifest, which must be visaed by the Spanish Consul at the last port, otherwise vessel is exposed to heavy fine.

PILOTAGE: Compulsory. Services from middle to high tide, depending on draft of vessel on arrival or departure. Pilot's motorboat painted white. Letter "P" in black at both bows. Agent must be in close contact with Pilot Office. Pilots are informed by Agent of ETA at bar. In rough weather Pilots will not be available for entries or sailings. Depths of water depend on location, ranging from 15 ft. to 30 ft. in high tide. Pilot station equipped with VHF Channel 16.

Telegraphic address of Pilots – "Practicos–Huelva", 24 hours notice of ETA required.

At night the regulation lights are exhibited. Contact must be made by VHF to take Pilot on board. Regulation ladder required.

In the event of bad weather the Pilot will board at Cascajera.

MAX. SIZE: Max. length for entry to Cascajera, 200 m. Max. length for entry from Punta del Sebo to Tharsis Quay, 180 m. Max. draft, permitted 28 ft. 05 in. up to 32 ft. 05 in. depending on the tide.

The entry to port is always subject to tides and maximum sizes of vessels able to proceed to inner quay berths will depend upon the berth and the tidal constant.

HEALTH: As long as Masters of vessels notify Medical Office by cable that there are no sick on board and that the ship proceeds from an area free from contagious diseases as specified by the International Sanitary Regulations, free pratique will be granted to the vessel, although this does not eliminate all the sanitary measures specified in the Exterior Sanitary Regulations in force.

Notice should be given en-route towards the Port of Huelva and sufficiently in advance to permit the free pratique to be granted.

When there is any sickness on board, no operation will be carried out until the vessel or its personnel have been inspected by the Medical Authorities.

The granting of free pratique does not signify that the Yellow Flag may be lowered. This will be done once the Medical Authorities have carried out their inspection or are in possession of the Maritime Health Declaration Form signed by the Master.

RADIO: Local coastal radio station Huelva-Radio. Working frequency: 1700 kc/s. Listens out permanently on 2182 kc/s. and Channel 16 on VHF.

Hours of service 24 hours (continuous).

National and International Radio traffic – radio conversation, radio-telegrams, advice to navigators.

TUGS: Only used inside harbour. Ship's lines employed, 4 tugs available. Number required to assist vessels at the discretion of the Pilot in charge.

BERTHING: Mineral loading quay – 435 m. mooring length and 12 m. depth of water at LWST. Has 2 loaders of 1,200 t.p.h. each.

Jetty belonging to "Energia e Industrias Aragonesas S.A." for movement of liquid and solid bulk cargo. Has 150 m. mooring, with 8 m. depth of water at LWST. For movement of solids, a gantry crane of 6 tonnes is available, together with 3 tubes for liquids.

Extension of the Fosforico Espanol S.A. jetty consisting of fitting out liquid quay for movement of solid bulk cargo. Has a 7 ft. depth of water, 3×15 tonnes gantry cranes and pipes for conveyance of phosphoric and sulphuric acids.

"Reina Sofia Quay" of the Union Explosivos Rio Tinto S.A. for the movement of liquid bulk cargoes, is 500 m. long and 8 m. draft at LWST. Has 2 berths for vessels up to 6,000 d.w.t., 1 berth for vessels up to 3,000 d.w.t. and 2 berths for lighters and tugs.

Levante (Eastern) Quay: Length 1,200 m. of which 700 m. is for general cargo and bulk cargo. Depth 8 m. Equipment includes 2×12 ton, 2×6 ton and 11×3-6 ton cranes.

Tharsis Quay: 320 m. long, depth of water 7 m. 2 gantry cranes of 15 tons for loading ore.

Fertiberia Quay: 120 m. long, depth of water 4.7 m. Used for solid and liquid bulk cargoes.

Pertrechos Quay: Used for fishing boat repairs.

Saltes Quay: 200 m. long, depth of water 5.5 m. Used for fitting out and deballasting.

Ingeniero Juan Gonzalo Quay: 920 m. long, depth of water 12 m. LWST Equipped with 6 gantry cranes of 12 tons, used for general cargo and solid bulk cargoes.

STEVEDORES: 48 hours advice to Agent necessary to engage labour.

MEDICAL: Agent must give at least 24 hours advance notice where medical aid is required. There is a provincial hospital. Vaccination certificates against fevers and cholera are issued by the Provincial Health Authority.

TANKERS: Rio Tinto Minera S.A. (Oil Division) operate a SBM tanker-mooring 7 miles offshore, about 20 miles distant from Huelva. Mooring is suitable for vessels 900 ft. long with draft up to 70 ft. salt water. Mooring 66 ft. is used for discharging only. Discharge rate is about 1,300 t.p.h. through two 12 in. lines and a 30 in. submarine line.

Within Huelva port, there are 2 tanker berths of which one is used by Campsa. The 2 berths at the "Torre Arenillas" quay permit a draft of 12 m. at low water but the max. length permitted at the oil quay is 200 m.

Berth No. 1 (North) loading/discharging:

LPG	8 in. line
Gasoline	10 in. ,,
Naphtha	10 in. ,,
Diesel	10 in. ,,
Fuel oil	10 in. and 12 in. lines

Berth No. 2 (South) loading/discharging:

Benzine	8 in. line
Cyclohexan	8 in. ,,
Gasoline	10 in. ,,
Diesel	10 in. ,,
Distillates	10 in. ,,
Fuel oil	10 in. and 12 in. lines

Residues: there is a receiving station near the oil quay for tank residues, together with a product separator. Connection lines are 10 in.

Product	*S.G.*	*A.P.I.*
Propane	0.507	—
Butane	0.573	—
Gasoline 85-Ron	0.693	72.68
Gasoline 96-Ron	0.735	61.02
Campsa G.O.	0.832	38.57
R.D. 2494	0.789	47.84
Industrial F.O.	0.945	18.24

DENSITY: Water at this port is salt water. Fresh water, in quantity of 1 in. to 7.5 in., only present in heavy rainy weather.

FRESH WATER: The supply of drinking water is made at the Eastern (Levante) quay at the rate of 20 t.p.h. per vessel. This can also be provided by means of tugs at a rate of 50 and 30 t.p.h.

FUEL: Fuel oil and diesel available in main port. Not available at offshore tanker terminal.
GANGWAY/DECK WATCHMEN: The employment is at the discretion of Masters, who are free to either employ or do without any watchmen.
OPENING/CLOSING HATCHES: Normally effected by crew, liner vessels excepted.
CERTIFICATES: Safety Wireless, Safety Equipment and Deratisation Certificates should be at hand for production if requested.
CUSTOMS ALLOWANCE: 200 – 300 cigarettes per man out of bond. If necessary permit may be obtained from Customs Authorities to open bond and provide crew with fresh supplies, if stay in port justifies procedure. Wine and/or Spirit Allowances: Two bottles per man.
IDENTIFICATION CARDS: Not necessary.
CONSULS:

Belgium
Denmark
Finland
France
Germany
Greece
Holland
Italy
Norway
Panama
Portugal
Sweden

REPAIRS: Any kind in engine room, and hull above water.
DRY DOCKS: Only 1 small dry dock available for vessels up to 3,500 g.r.t.
REPATRIATION: No difficulty in this respect.
AIRPORT: The nearest is at Seville – San Pablo. A distance of 100 km. from Huelva.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: 1st January; 6th January; 20th January; 19th March; Thursday preceding Good Friday as from 1400 hrs. Good Friday; 1st May; Corpus Christi; 29th June; 3rd August; 15th August; 12th October; 1st November; 8th December; 25th December.

Permit to work on any of the mentioned holidays (1st January Good Friday and 25th December excepted) can be obtained, but sufficient reasons must be given to justify permission.
POLICE/AMBULANCE/FIRE: Police and Civil Guard 215175, 213136; Fire-brigade 214421; Customs 215174.
SHORE LEAVE: Permitted.
TELEPHONES: No arrangements exist, for the time being, to place telephones on board vessels.
DEVELOPMENTS: Projects are in being to increase depth of water down to 35 ft. for tankers using the "Torre Arenillas" Quay, but this implies dredging of bar and channel, a distance of 8 – 9 miles; it is not known when the project will be completed.

Sand Retention Mole: Once the access road to the mole has been finished which runs through the islands of Cacuta and Slates (right bank of the rivermouth) with a length of 11.5 kms., the construction of the mole proper, 12 kms. long, will start, as far as the last of buoys 1 and 2 at the port entrance. In this way, after a deepening programme of drafts in the access channel, these will be stable with 10.5 m. of water at LWST. Completion expected 1981.
AUTHORITY: Marine Military Commandant.

IBIZA: 38.54 N. 01.28 E. (See Plan Book)

DOCUMENTS: *Passenger Liners:*
5 Crew Lists (Customs, Comandancia de Marina, Health, Police and Consignee).
6 Passenger Lists (Customs, Police, Guardia Civil, Obras del Puerto, Health and Consignee).
2 Lists of Crew and passengers personal effects (Customs).
2 Store Lists (Customs).
Health Certificate (Health Department).
2 Cargo Manifest, if any. (Customs).
2 Negative Cargo manifest, if no cargo.
Cargo Ships:
5 Crew Lists.
2 Lists of Crew personal effects.
2 Store Lists.
Health Certificate.
2 Cargo Manifests.

PILOTAGE: Pilotage compulsory. No ships allowed to go further than imaginary line between Botafoch lighthouse and Isla Negra del Este, without a Pilot. Advisable to give 24 hours notice of ETA. Shortly VHF will be installed in Pilot station and boats. Pilot's boat is of the canoe type with white sides and letter "P" in black on both sides. Vessels requiring a Pilot must give three long whistles. By night flash morse "G".

Pilot will board between Botafoch lighthouse and Isla Negra del Este. In bad weather vessel should follow Pilot's canoe till he is able to board.
ANCHORAGES: Anchorage area situated inside imaginary line: Botafoch-Negra del Este with depths of 40 to 50 ft. Pilot required to anchor.
MAX. SIZE: Max. length for berthing, 135 m. Maximum draft 21 ft.
HEALTH: Report in advance to Pilot if there is any problem. If situation is normal, then, after ship berths the health inspector boards and quickly grants pratique. In event of any suspected disease or fever on board, the Pilot (without boarding), will show the anchorage area, then health inspectors and authorities will board, and give necessary instructions.

Vessels entering after calling at another Spanish port have no problems obtaining pratique.
TUGS: Not available.
STEVEDORES: Available, ETA required 24 hours in advance.
MEDICAL: Civil hospital, military hospital, and 3 private clinics available.
TANKERS: Load/discharge lines 10 in. and 8 in. No facilities for discharging residues. 1 berth. Max. draft of the ship is 21 ft.
FRESH WATER: Available at the quays. 9 m.t.p.h.
FUEL: Available. Notice required 24 hours.
FIRE PRECAUTIONS: Tankers should have a rope over bows, at water level while the ship is berthed.
GANGWAY/DECK WATCHMEN: Performed by crew.
OPENING/CLOSING HATCHES: There are no fixed rules on this matter: it varies according to the circumstances.
CUSTOMS ALLOWANCE: There are no free allowances.
IDENTIFICATION CARDS: Required.
REPAIRS: There are good work shops and engineers but with limited possibilities. There is a shipbuilder's yard where they build and repair yachts and canoes.
REPATRIATION: Facilities for effecting crew changes and arranging any necessary repatriations.
AIRPORT: 8 km. away, served by scheduled flights daily.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: Cargo work can be arranged on the official holidays with an extra charge of 40% to the workmen.

New Year; Epiphany (6th January); Saint Joseph (19th March); Maundy Thursday: half-day (the evening); Good Friday; Ascension of our Lord (40 days after Resurrection); Saint Joseph the Artisan (1st May); The Holy Heart (last Friday of June); Exaltation to work (18th July); Santiago, Lord of Spain (25th July); Our Lady of the Snows, Lord of Ibiza (5th August); Ascent of Blessed Virgin Mary to Heaven (15th August); Feast of the Hispanicism (12th October); All Saint's Day (1st November); Festival of the Immaculate Conception (8th December); Christmas Day (25th December).

Although not yet official there will be introduced as a holiday Easter Monday and 26th December.
POLICE/AMBULANCE/FIRE: Police 301131; Ambulance 301214; Fire telephone call to the Comandancia de Marina, tel. 301190.
SERVICES: Compass adjusting.
SHORE LEAVE: Crew members are allowed ashore.
DEVELOPMENTS: Increasing depths in the port to 7 m. It has also been approved to enlarge berthing quays to 220 m. and 7 m. depth, and build a fishing dock.
AUTHORITY: Comandante de Marina de Ibiza, Comandancia de Marina.

MAHON: Minorca, 39.52 N. 04.18 E. (See Plan Book)

DOCUMENTS: *Health Department:*
Crew List.
Passenger List.
Disinfect and Deratisation Certificates.
Port Authorities:
Crew, Passenger List.
Ship characteristics and other details.
Cargo.
Indication of previous Port and destination.
Customs:
Cargo Manifest.
Bill of Lading (Cargo for this port).
Crew List and Passenger List.

Also the Captain will produce, if required, Log book and passports of crew.
PILOTAGE: Compulsory to take Pilot in entry, departure and any movements within port. On approaching port, during day, ships will hoist flag corresponding to International Code "I need a Pilot". By night, by means of lights, according to International Code.

During day Pilot's boat is recognised by a square blue flag with letter "P" (painted white) in centre of flag. Pilotage area comprises all the estuary, from inside port to outside Capes of La Mola and San Carlos.
ANCHORAGES: Inside are good anchorages, for instance Cala Llorga and Plana de Cala Figueras.
MAX. SIZE: Unlimited length and width, but draft is limited to commercial port, 25 ft.; and to anchorage, 43 ft.
HEALTH: Hoist correct flags of International Signals Code to indicate health situation of ship. Before Pilot boards, he should ask for health situation. If ship suspected, he will lead it to Lazareto anchorage and once anchored Pilot will report by means of Port Authority to Health Department. Port is provided with service of disinfection and means to kill rats. A disinfection certificate can be issued, and although rat killing means are available, no deratting certificate is issued.

Ships coming from Middle East and East Africa should carry certificate of anticholeric vaccination, anti-smallpox, anti-yellow fever and anti-typhus. Also from North Africa and South America. All others only anti-smallpox and anti-typhoid.
BERTHING: Commercial Quay: Length 518 m. average depth alongside 8 m.

Container and Ro/Ro Quay: Length 180 m. depth alongside 6.5 m.
STEVEDORES: Available. Loading and discharge is as follows:

Container Berth: 2 fixed cranes 800 tonnes per day loading and discharge.

Commercial Quay: 2 fixed cranes and 1 mobile crane with a capacity of 1,000 tonnes per day. Priority to regular lines.
MEDICAL: In case of accident or illness of any member of crew medical assistance and hospitalisation will be in civil hospital.
FRESH WATER: Available. 4 points on the Container Quay and 7 points on the Commercial Quay.
FUEL: Available from Campsa at Cala Figueras.
OPENING/CLOSING HATCHES: Carried out by crew before 0800 hrs
IDENTIFICATION CARDS: Not required.
CONSULS: Italy: Tel. 363393; France: Tel. 363889; Netherlands: Tel 362703.
REPAIRS: Small repairs possible.
DRY DOCKS: Military dry dock of 2,000 metric tons.
AIRPORT: 5 km. from Mahon – international and national flights.
TIME: GMT plus 1 hour from September to April, and 2 hours from April to September.

HOLIDAYS: Main holidays are: 1st January (New Year), Holy Week (variable), 1st May (Labour Day) Corpus Christi (variable), 24th June – National Holiday, 8th September, local holiday, 25th December – Christmas. Work is possible on all these dates provided the labour force is paid extra.
POLICE/AMBULANCE/FIRE: Police: Tel. 36.37.12; Ambulance: Tel. 36.11.80; Fire Brigade: Tel. 36.39.61.
TELEPHONES: No telephones on the Quays.
AUTHORITY: Capitan de Navio, Comandante Militar de Marina de Menorca.

MALAGA: 36.41 N. 04.24 W. (See Plan Book)

DOCUMENTS:

5 Crew Lists.
5 Passenger Lists or Negative.
1 Cargo Manifest of goods destined to Malaga, as well as of other cargoes in transit.
Store List in duplicate, including tobacco, spirits, radios, etc., belonging to vessel.

Details list in duplicate of all personal effects of the crew and Passengers (tobacco, spirits, cameras, radios, etc.). For vessels bigger than 499 g.r.t., Safety Equipment Certificate.

Note: Tobacco; In case vessel carries more than 3 kilos of tobacco per man, the excess must be declared in a separate manifest, which must be visaed by Spanish Consul. In absence of Consul, said document will have to be visaed by an Authority or Consul of a friendly nation at the former port clearance. Otherwise, vessel may be severely fined.

PILOTAGE: Pilotage is compulsory and service is permanent. Pilots board vessel by cutter in roads, near entrance formed by 2 breakwaters. Pilot cutters are painted black and have letter "P" in white on each bow. Cutters have a blue flag hoisted on mast, with the letter "P" in white, at both sides of flag. At night, cutters have white light, and under this light, red one. Entrance between breakwaters is 260 m. wide and easily accessible. When weather in the roads is bad, which seldom happens, vessels approach as close as possible to entrance in order that Pilot can board easily.
ANCHORAGE: Vessels can anchor outside of breakwaters, in roads in depths of 80 – 90 ft. Anchoring is prohibited in vicinity of tanker moorings, the Pilot will advise best position. Weather is bad occasionally when East wind blows, during Winter.
MAX. SIZE: No restrictions in respect of length or breadth. Max. advisable draft to enter port is 31 – 32 ft.

The tanker sealine berth can accept vessels up to 300,000 d.w.t.

Largest vessels to enter port: Passenger ship "Oriana" length 245 m. Draft on entering and leaving 9.14 m. Bulk-carrier "Soledad Maria" length 254 m., draft on entering or leaving 8.53. Tanker "Calatrava", 50,376 d.w.t., length 225 m., draft 12.49 m. on entering.

Largest tanker at buoy mooring "Ventura Europa", 276,050 d.w.t., length 376 m., draft on entering or leaving 21 m.
HEALTH: If vessels proceed directly to berth, pratique can be obtained immediately after berthing. In case of any suspected disease or fever on board, Master must radio to Agents, in order that they can advise Health Office.
RADIO: Nearest important radio station is Radio Costeva (VHF – Onda Media) Cadiz, or Gibraltar and Aranjuez. Master's messages should be received at least 24 hours before arrival.
TUGS: Ship's lines are used, tug-boats are employed according to Pilot's advice, and upon request. 7 tugs available, 450 h.p.–1,650 h.p.
BERTHING: Pilots will advise Masters whether vessel has a free berth or not. Also if she has to anchor in roads. Further particulars can also be obtained from Pilot.

Berth No.	*Length (m.)*	*Depth (m.)*	*Remarks*
1	350	9.4	General cargo,Bulk and Passengers.
	99	8.0	General
2	483	10.5	General Cargo, Bulk and Passengers
3	120	7.0	Passengers and Ferries
	150	10.0	Passengers and Ferries
	130	8.0	Passengers and Ferries
4	477	8.0	General cargo, Bulk and Passengers.
5	101	6.5	Armament
6	500	10.5	Bulk solids and Bulk liquids. (Partially completed.)
7	145	9.4	Fish
8	128	5.0	Storage
	135	5.0	Fish
Foreport:			
East side	—	10.5	Berth for passenger ships when weather fine.
North side	363	9.3	Quay for bulks, solids and liquids when weather fine.
South side	—	13.5	Berth for tankers with crude or refined oil.

SPECIALISED CARGO HANDLING FACILITIES: Quay No. 2 includes 15,000 tons silo for grain, loading and discharging capacity 200 t.p.h.

Quay No. 7 (Foreport) includes 3,312 cu.m. silo for molasses, discharging capacity 150 t.p.h. Also delivery can be performed at Quay No. 6 (inner basin).

Quay Nos. 6 and 7 can handle all cargo in bulk. Also 3 ton forklifts and a Hyster 620 capable of handling containers up to 26 tons. There are regular car ferries for passengers and cargo, ro/ro plying with Tangiers, Genoa, Marseilles and Casablanca, all of them direct. For butane gas a special sea-line outside the port Westward, along the beach in front of the depot. For LPG and chemicals No. 7 quay and berths in foreport can be used, though loading and unloading has to be done into tank trucks. 20 ft. containers can be handled with a crane up to 30 tons and a Hyster forklift with appropriate spreader, eventually 30 ft. containers also.
CRANES: 34 quay cranes with capacity up to 30 tons and 1 mobile crane with capacity of up to 8 tons.
STEVEDORES: It is important that Master sends advance message regarding the vessel's ETA. Agents can inform Shippers or Receivers' stevedores accordingly, to arrange operations properly. Official working hours of port are: Monday/Saturday 0800 – 1200, 1400 – 1800 hrs.
MEDICAL: Any kind of medical service can be arranged. In case a crew member needs medical attendance urgently, it is advisable that the Master radio in advance.
TANKERS: Petroleum handled at Quay Nos. 6 (partially) and 7. Depths 10.5 m. and 9.4 m. respectively. Also at the New Tanker berth, depth alongside 13.50 m. (see "Max. Size").

Quay Nos. 5, 6 and 7: Operator: Demagrisa. Crude oil discharge pipe-line – 250 t.p.h. Refined oil discharge pipe-line – 800 t.p.h.

Playa Misericordia: Operator: Enpetrol. Sea-line for discharging tankers up to 250,000 d.w.t. Max. discharge rate 6,000 t.p.h. through 1×30 in. pipe-line.

Operator: Butano. Sea-line for butane which also handles propane. Max. discharge rate 300 t.p.h.

Quay Nos. 6 and 7: Operator: Anomiaco Espanol SA. 4 lines for naphtha discharge. Rate 210 t.p.h.

Operator: Enpetrol. 4 discharge lines for oil. Rate 1,500 t.p.h.

Tanker Berth: Operator: Enpetrol. Crude oil pipe-line, diameter 24 ins. with 2 discharge arms and 1 spare. Discharge capacity 2,000 – 2,500 t.p.h. Also Campsa, refined oil. 4 pipe-lines available 3×12 in., 1×14 in., with 2 discharge arms.

Quay Nos. 6 and 7: Operator: Campsa. 4 pipe-lines available, 2×10 in., 1×12 in. and 1×14 in. maximum pumping rate 800 t.p.h.
DENSITY: 1025.
FRESH WATER: Always available. Deliveries are performed directly from the quay, rate 20 – 200 t.p.h. or occasionally by tugs. Minimum tonnage, 10 tons, occasionally supplies by tank-barge, minimum 50 tons.
FUEL: Ordinary fuel oil and gas oil are available at local refinery of "Campsa". It is advisable that Shipowners contract bunkers through their own contractors, with anticipation of 48 hours, so that order can be received in time. Delivery can be performed at bunkering pier at a rate of 60 t.p.h. or by car tankers.
FIRE PRECAUTIONS: Tankers perform their operations at the petroleum berth by Enpetrol or "Campsa" which have necessary fire precautions.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: This work effected normally by crew, except in liner vessels, which is contracted by stevedores.
CERTIFICATES: Vessels should have the usual documents on board.
CUSTOMS ALLOWANCE: Normally, customs permit 200 cigarettes per man out of bond. 1 bottle of spirit for each crew member.
CARGO GEAR: Usually shore cranes of 2-3-6-15-30 tons lifting power employed in loading or discharging operations, if vessels require any lightening then vessel derricks are employed, as only 1 floating crane is available at the port of 20 tons and 10.5 m. height.
IDENTIFICATION CARDS: Not required.
CONSULS: Most countries have consulates at Malaga.
REPAIRS: Facilities of a limited nature.
DRY DOCKS: There is a floating dock for vessels up to 2,000 tons.
REPATRIATION: Good facilities.
AIRPORT: The airport is about 8 km. from town. Daily services with Madrid, Barcelona, Seville, Valencia, Tangier and Melilla. Also direct flights to London, Paris, Amsterdam, Brussels, Frankfurt, Stockholm, Helsinki, Geneva, Zurich, Nice.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: 1st January; 6th January; St. Joseph (19th March); Good Thursday; Good Friday; Labour Day (1st May); Corpus Christi; 18th June; 16th July; 25th July; 15th August; 8th September; 12th October; 1st November; 8th and 25th December.
POLICE/AMBULANCE/FIRE: Police, Tel. 211302 and 091, 215005; Ambulance, Tel. 390400, 215121, 224400; Fire, Tel. 234567.
DEVELOPMENTS: An extensive plan to increase facilities of port, and for building new piers. Other important work being effected at breakwater, to erect new piers for large passenger ships.
AUTHORITY: Junta del Puerto de Malaga and Comandancia de Marina.

MOTRIL: 36.43 N. 03.30 W. (See Plan Book)

DOCUMENTS:

Health Certificate.
5 Passenger Manifests (1 Health, 2 Customs, 1 Police, 1 Agent).
4 Crew Manifests (1 Health, 2 Customs, 1 Agent).
2 Store Lists (for Customs).

PILOTAGE: Arranged by Agent basis ETA given 24 hours in advance. pilot boat distinguished by painted "P". Night pilotage possible approx. 100% extra, on holidays 50% extra. Vessels await Pilot just outside port. Pilot compulsory for all foreign vessels and Spanish vessels arriving from abroad. Pilot should be requested when 1 mile from the port by means of international signals.
ANCHORAGE: Area near port. The roads to the East of the port have very little depth. The sea is rough in this area and vessels can run the serious risk of beaching. The best location for anchorage is outside the port 0.25 miles S.S.W. from the port entrance, in 14 to 25 m. of water, mud bottom.
RESTRICTIONS: None, vessels may enter day or night.
MAX. SIZE: Entrance 33 ft. at LWS. Maximum draft alongside quays, 27 ft.
HEALTH: Free pratique given on board.

RADIO: Harbour tugboats and pilot operate on VHF Channel 12.
TUGS: Available. One tug 500 h.p. One tug, 1,000 h.p. expected at a later date.
BERTHING: There is 470 m. of quayage with a depth of 8.2 m. (27 ft.) at LWS and 107 m. of quayage with a depth of 6.4 m. (21 ft.) at LWS.
CRANES: There are 5 electric cranes of 3.5 to 6 tons capacity; three 6 ton and one 3 to 6 ton mobile crane.
BULK CARGO FACILITIES: Muelle de Levante: 300 m. length. Maximum shipdraft 8.2 m. (27 ft.) at LWS. Three cranes 6 ton capacity for handling bulk cargoes (grain, ore, coal, fertilisers, etc.). Loading/discharge rates: 300 t.p.h. One crane 3.5 to 6 ton for handling general cargoes.
Muelle de Poniente: 110 m. length. Maximum shipdraft 6.4 m. (21 ft.) at LWS. Two cranes 3.5 to 6 ton capacities for handling bulk and general cargoes.
Muelle de Costa: 160 m. length. Maximum shipdraft 8.2 m. (27 ft.) at LWS. Two cranes 3.5 to 6 ton for handling general cargoes.
SPECIALISED CARGO HANDLING FACILITIES: Muelle de Poniente equipped for handling liquid chemicals and asphalt, by lines.
STEVEDORES: No ETA advice necessary. Agents arrange gangs.
MEDICAL: No advance notice required. All facilities available.
TANKERS: Vessel about 8,000 tons. No special requirements.
DENSITY: Normal Mediterranean.
FRESH WATER: Available alongside all quays.
FUEL: Available at Muelle de Levante. Rates of delivery: 200 t.p.h.
GANGWAY/DECK WATCHMEN: Agent arranges.
OPENING/CLOSING HATCHES: Crew open and close hatches.
CUSTOMS ALLOWANCE: Tobacco: About 100 cigarettes per man. Wine and or spirit. None.
IDENTIFICATION CARDS: Not necessary.
CONSULS: None in Motril. The nearest Granada or Malaga.
REPAIRS: Minor repairs can be affected. There is a slipway for vessels up to 150 tons.
REPATRIATION: Facilities available.
AIRPORT: The nearest airports Malaga 105 km. Granada 70 km. and Almeria 120 km.
TIME: Local time GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: New Year's Day (January 1st), Epiphany Day (January 6th), Vote Day (January 13th), Good Thursday, Good Friday, Wort's Day (May 1st), Santiago Day (July 25th), Assumption Day (August 15th), Pilar's Day (October 12th), Local Holiday (October 15th), Immaculate's Day (December 12th) and Christmas Day (December 25th).
Work can be arranged on above days, however dependent upon permission of the Work Authority.
POLICE/AMBULANCE/FIRE: Police 601221; Ambulance 600200; Fire 600200.
TELEPHONES: No facilities for placing telephones on board.
SHORE LEAVE: Crew members are allowed ashore.
DEVELOPMENTS: 3 Roll-on/Roll-off berths under construction on Muelle de Costa. One berth of 250 m. length and 10 m. (33 ft.) depth.
AUTHORITY: Grupo Puertos De Granada-Almeria. Direccion del Puerto. Motril (Granada).

PALAMOS: 41.50 N. 03.08 E.

DOCUMENTS:
3 Crew Lists.
1 Passenger List or negative.
Manifest of goods destination Palamos and in transit.
Store List in duplicate, including tobacco, spirits, radios, etc., belonging to vessel.
Detailed list in duplicate of all personal effects of crew and passengers (Tobacco, spirits, camera, radios, etc.).

Tobacco – any excess over 3 kilos per person must be stated on a separate manifest duly visaed by Spanish Consul.

If on inspection differences are found (more or less), articles removed and heavy fine imposed.

PILOTAGE: Pilotage is compulsory and service is permanent. Often no berths available between 2400 and 0600 hrs. owing to port occupied by fishing boats. Pilot is informed by Agent of vessels ETA given 24 hours in advance. When vessels approach the breakwater, Pilot will board. Pilot boat is white with a black "P" painted on the side.
RESTRICTIONS: None but for draft. Vessels carrying dangerous cargo should get authorisation for berthing prior to arrival of the ship.
MAX. SIZE: No restrictions in respect of length. The maximum advisable draft for berthing is 24 ft. stern, 20 ft. bow.
HEALTH: Pratique is obtained immediately after berthing. In case of suspected disease or fever on board the Master must radio to Agent in order inform Health Office in time.
RADIO: Radio Costera of Barcelona, Bagur or Marmella.
TUGS: None but Barcelona's tugs could be hired should the vessel's size make it necessary.
BERTHING: Depth of water in centre of harbour 42 – 52 ft. Commercial Wharf length: North 689 ft., depth 18 – 26 ft. South 246 ft., depth 15 – 24 ft. Pier Wharf or breakwater: not available for commercial traffic. Length 2,100 ft.
STEVEDORES: Information about ETA time is advisable to get gangs ready.
MEDICAL: Any kind of medical services can be arranged if information received in time.
FRESH WATER: Plentiful supply of water by means of hoses from the pier to vessel.
FUEL: Can be supplied if required.
GANGWAY/DECK WATCHMEN: It is not compulsory but advisable at night.
OPENING/CLOSING HATCHES: Normally opened/closed by the crew, otherwise according to Charter Party.
CERTIFICATES: Usual documents on board. Safety Wireless, Safety Equipment, Deratisation and Registered Tonnage Certificates are the only ones required by the Authorities.
CUSTOMS ALLOWANCE: Crew : 3 kilos tobacco per person. Passengers: 2 kilos per person. Any excess on this amount must be declared on a separate Manifest as in transit. Wine and/or Spirit: only 1 bottle per man. Any excess, must be declared on a separate Manifest as cargo in transit and stowed apart from the tobacco and spirits carried under the Provisions List. This Manifest must be visaed by the Spanish Consul at the last port of call. Any infringement of this regulation will subject the vessel to the immediate imposition of heavy fines and confiscation of the excess tobacco.
IDENTIFICATION CARDS: Not required.
CONSULS:

France	Tel. 314472	Portugal	Tel. 320148
Denmark	,, 314400	Sweden	,, 320850
Italy	,, 320200		

REPAIRS: Only small ones.
REPATRIATION: Good facilities exist.
AIRPORT: Gerona Airport situated at 40 km. distance and half an hour time by car from Palamos. Regular flight services with Madrid, Barcelona, Palma Mallorca, London, and all over the world with transhipment at Madrid and/or Barcelona.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Police 31 41 87; Ambulance 31 43 50; Fire 31 43 50.
DEVELOPMENTS: Steps are being taken to get the breakwater in condition to berth tankers and liners.
AUTHORITY: Captain of the Port.

PALMA, Majorca: 39.34 N. 02.38 E. (See Plan Book)

PILOTAGE: Compulsory. Order through Agent.
ANCHORAGE; In outer harbour in depths up to 13 m.
RESTRICTIONS: Depth in harbour entrance up to 15 m.
TUGS: Available if required.
VHF: The Spanish Telephone Company has established a station for ship-to-shore communications.
BERTHING: Quays at Puerto Pi with 12 m. depth alongside. Quays at Puerto de Palma with up to 10 m. depth alongside.
FUEL: Supplied at the quays by CAMPSA. Depth alongside 36 ft. Gas oil available at 120 cu.m.p.h. Fuel oil No. 1 at 250 t.p.h. Intermediate fuel oil also available.
FRESH WATER: Available at the quays.
AIRPORT: Palma Airport well connected with the Peninsula (mainland) and with foreign airports.
DEVELOPMENTS: Additional commercial and passenger quays under construction.

PASAJES: 43.21 N. 01.56 W. (See Plan Book)

PORT LIMITS: In this port a vessel is considered to be an "arrived ship" (subject to C/P Terms) when the Pilot leaves the vessel once she is inside the port. The laytime will commence when the Master has delivered in writing the notice of readiness.
DOCUMENTS:
4 Crew Lists.
2 Passenger Lists or negative.
2 Cargo Manifests with an individual copy of each Bill of Lading for items to be discharged at port of Pasajes.

Copy of Manifest covering other cargo on board in transit for other ports.

Stores List in duplicate, including tobacco, cigarettes, spirits, radios, etc., belonging to the vessel.

Detailed Crew's Stores List, in duplicate, of all personal effects pertaining to crew and passengers (tobacco, cigarettes, spirits, cameras, radios, arms, etc.).

For vessels exceeding 499 tons g.r.t. Safety Certificate; Safety Equipment Certificate, Deratisation Certificate should be on board ready for production.

PILOTAGE: Pilot service is compulsory and permanent. Pilots board vessel in an area about 1.5 miles out from leading lights of port entrance. The telegraphic address is: Corporacion de Practicos, Pasajes. Notice should be given 24 hours before arrival; generally Agents keep Pilots informed of vessel's time of arrival when they are advised by Masters. VHF service in operation.

Pilots' cutter is painted in naval-grey with letter "P" painted in white on both sides of bridge; flag with letter "P" in white, is hoisted on cutter's mast.

International pilot signals are used by Pilots, by means of Aldis lamps when approaching vessel at night. International light and sound signals to be made by vessel when requiring Pilot.

In event of bad weather Pilots cannot board vessel at usual 1.5 miles location. In this case vessel has to wait for instructions (VHF or radio) for entering port.

With respect to boarding and safety measures, the international safety regulations are to be followed.

ANCHORAGES: A limited number of vessels may anchor in roads inside the port, in good shelter. Depth in area of anchorage is 25 – 29 ft.
RESTRICTIONS: The entrance channel has a length of 1,200 m. breadth 80 – 120 m. and a depth of 20 m. LWS. Vessels over 140 m. length must enter at high water and in daylight.
MAX. SIZE: 175 m. length and 29 ft. draft. When dredging works now being carried out are completed in the entrance channel and bay, the port will be able to accept vessels of up to 180 m. length and 30 ft. draft

HEALTH: If vessels proceed directly to berth pratique can be obtained immediately upon berthing. If vessels anchored in bay, pratique can be obtained after anchoring. In case of any suspected disease or fever on board, the Master must advise the Agents, by radio, in order that they may inform the Sanitary Authorities in advance.
RADIO: Nearest Radio stations are the coastal radio stations of Igueldo and Cabo Mayor. Messages by radio-telephone can be transmitted via Radio Arcachon (France). Notice of ETA should be sent to Agent 24 hours before arrival.
TUGS: No tug-boats required for vessels with normal steering when entering port. Tug-boats are required for berthing or shifting to and/or from quays for vessels over 80 m. length. Ship's lines are used and tug-boats are employed according to Pilot's advice.

11 tugs available, the largest being 800 and 1,250 h.p. respectively.
BERTHING: Berths are allocated by Port Control after notice of arrival and information regarding cargo given by Agent. Pilots inform Masters of location of berth appointed, if any. No tidal difficulties for berthing or shifting inside the port.

Berths belonging to Port Control.

Name	*Length* (m.)	*Depth* (m.)
Ancho	273.20	10.00
Molinao	313.00	10.00
Capuchinos	298.30	10.00
Petroleos	159.50	10.00
Lezo – 1	298.40	10.00
Lezo – 2	163.20	10.00
Avanzado Molinao	145.00	10.00
Transatlantico	234.10	8.00
Avanzado (North)	63.60	6.00
Avanzado (East)	114.60	6.00
Avanzado (West)	120.30	6.00
Herrera	400.00	5.00
Reloj	240.00	5.00

CARGO HANDLING: *Containers:* 4×30 metric tonne cranes available for container handling.
Ro/Ro Traffic: The port has two ramps for ro/ro traffic, one at Ancho quay and the other at Avanzado Molinao.

Whenever a vessel arrives with inflammable products, such as gas, propane, etc., the quay where vessel is discharging is fenced off.
CRANES:

No.	*Capacity* (metric)
8	3 tons
13	3.5 – 6 tons
13	6 tons
1	6 – 10 tons
10	12 tons
4	30 tons

STEVEDORES: ETA advice should be received by Agent 24 hours before arrival in order arrange loading/unloading operations with stevedores. The official working time in the port is: Monday/Friday 0800 to 1200 hrs. and 1330 to 1730 hrs. and Saturday 0800/1200 hrs.
MEDICAL: Any kind of medical assistance is available. In case urgent surgical or medical assistance required on vessel's arrival, Agent should be informed in plenty of time to make the necessary arrangements.

No particular inoculations required or vaccination/fever certificates to be produced unless epidemic at last or recently visited ports.
TANKERS: Berth at Muelle Petroleos: 2×8 in. (Gas oil), 2×8 in. (Fuel oil No. 1 & 2 and Gas oil).
FRESH WATER: Fresh water available at all wharves. Rate of delivery 70 cu/m. per hour.
FUEL: Fuel is supplied by C.A.M.P.S.A. at Ancho, Molinao and Capuchinos Quays. The rate of delivery is 100 t.p.h. Owners must pay C.A.M.P.S.A. for the fuel 24 hours prior to its delivery.
FIRE PRECAUTIONS: No specific precautions required unless the vessel carries inflammable cargo. Special harbour fire-fighting corps.
GANGWAY/DECK WATCHMEN: Not compulsory. Shore watchmen available.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CERTIFICATES: To be produced if required, specially Safety Wireless, Safety Equipment and Deratisation Certificates.
CUSTOMS ALLOWANCE: In case the vessel carries more than 3 kilos tobacco per crew member and more than 2 kilos per passenger, the excess must be declared in a separate Manifest which must be legalised by the Spanish Consular Authorities. In absence of Spanish Consular Authorities that Manifest will have to be legalised by an Authority of last port of clearance wherefrom the vessel proceeds. A reasonable amount of alcohol is allowed per man.
IDENTIFICATION CARDS: Not required.
CONSULS: Consulates/Vice-Consulates at San Sebastian and/or Pasajes:

Argentina
Belgium
Brazil
Colombia
Costa Rica
Chile
Denmark
El Salvador
Finland
France
Germany
Great Britain
Greece
Italy
Netherlands
Norway
Panama
Paraguay
Peru
Portugal
Sweden

REPAIRS: Repair shops and shipyards available, where repairs or overhauls may be carried out.
DRY DOCKS: One (1) floating dock 91.56 m. long, 23.25 m. wide, and 10.40 m. depth of water.

One (1) floating dock 66.27 m. long, 23.25 m. wide, and 9.125 m. depth of water.

Two (2) slipways with 8 ramps of length between 130 and 157 m. and widths between 3 and 9.4 m. Max. admissable vessel tonnage: 1,200.
REPATRIATION: Good facilities for repatriation.
AIRPORT: Airport of Fuenterrabia is situated at 15 km. from Pasajes. Regular daily services with Madrid and Barcelona.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: 1st January; 6th January; Maundy Thursday (afternoon); Good Friday; 1st May; Corpus Christi; 7th July; 25th July; 31st July; 15th August; 12th October; 8th December; 25th December.
POLICE/AMBULANCE/FIRE: Police 351841; Ambulance 414142; Fire from 0800 to 1930 hrs. tel. 351844, from 1930 to 0800 hrs. tel. 397262; Red Cross (local) 351032; Hospital, San Sebastian, 423632.
TELEPHONES: No possibility of placing telephones on board.
SERVICES: Divers.
SHORE LEAVE: Crew allowed to land immediately upon arrival.
DEVELOPMENTS: Construction of a new quay has commenced, to be known as Lezo – 3,150 m. long and with depth of 8 m., building will take 30 months. Apart from making new berths available for traffic in general, it is hoped that the new quay will increase the possibilities of making use of and revitalising the land owned by the Port Control in the port area of Lezo.
AUTHORITY: Comandancia Militar De Marina De San Sebastian.

AGENT: Sobrinos De. M. Camara Y Compania, Telegrams "Camara". Tel. 357045, 357046 and 357047. Telex 36241.

(Shipbrokers, Customs/Forwarding Agents, Chartering Agents, Lloyd's Sub-Agents, Brittany Car Ferries. Greece, Netherlands and Peruvian Consulates.)

RIBADEO: 43.32 N. 07.02 W.

DOCUMENTS:

Manifest of Cargo, including cargo in transit.
3 Crew Lists.
2 Passenger Lists or negative.
2 Stores Lists.

If vessel carries over 3 kilos tobacco per man, the excess to be declared in a separate manifest which must be visaed by Spanish Consul at last port, otherwise is exposed to heavy fine.
PILOTAGE: Prior advice of ETA required by Pilot, who boards at the mouth of the river at the time advised by Agent. Pilot boat is white-painted motor launch, carrying international pilot signals.

In case of bad weather, Pilot will instruct vessel by signals to proceed to anchorage or to berth.

The Pilot always boards on the lee side, in the latitude of Isla Pancha.
ANCHORAGE: At Ensenada de Arneo, approx. position 43° 33′ N. 7° 01.6′ W. in depth of 9 m. LW.
RESTRICTIONS: Vessels enter night and day, limited only by draft and state of tide.
MAX. SIZE: Length and beam not limited. Max. draft 15 ft.
HEALTH: Pratique given on arrival on production of clean Bill of Health. International quarantine signals to be used. Port Authorities to be advised if any case of suspected disease or fever on board.
RADIO: Messages may be routed through coastal stations at Vigo, La Coruna or Gijon.
TUGS: None available.
BERTHING: Vessels may berth at the mole at any time, or state of tide, according to draft.
STEVEDORES: Stevedores services operated only by Servicio de Trabajadores Portuarios.
MEDICAL: Nearest clinic at Mondonedo 35 km. from Ribadeo.
DENSITY: 1025.
FRESH WATER: Water connections exist along the length of the mole. Rate, 20 t.p.h.
FUEL: There is a gas oil supply for small vessels, rate 12 t.p.h.
GANGWAY/DECK WATCHMEN: None required.
OPENING/CLOSING HATCHES: Performed by crew.
CUSTOMS ALLOWANCE: 200 cigarettes and 1 bottle wine/spirits per man.
CONSULS: Nearest at La Coruna.
REPAIRS: Minor mechanical repairs can be effected. Slipway for vessels up to 200 tons.
AIRPORT: Nearest at La Coruna, 150 km. away, or Aviles, 165 km. away, with regular services to Madrid.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Tel. Ribadeo 110650.
AUTHORITY: El Ayudante Militar de Marina de Ribadeo.

ROSAS: 42.14 N. 03.10 E. **(See Plan Book)**

DOCUMENTS:

Crew List.
Passenger List.
(1 of each) Ship's Papers.

PILOTAGE: No Pilots in this port.
ANCHORAGE: Bay of Rosas is anchorage area.
MAX. SIZE: Draft in Commercial Port is 4 m., with berths for cargo ships of about 1,000 n.r.t. (metric).
HEALTH: Once ship is anchored in the bay it obtains pratique by means of signals, and by raising the yellow health flag. When vessel entering after calling at another port in the same country, this procedure is not required; Health Inspector boards at the quay side.
RADIO: No radio station in the port, but can contact Coastal Radio Station of Barcelona (1730 kc/s. – 173.4 m.), power 150 W.
TUGS: None.
BERTHING: Advisable during daylight only.
MEDICAL: Port Health Doctor available. Hospitals 18 km. distance.

FRESH WATER: Available at Commercial Port at rate of 8 to 10 metric t.p.h.
FUEL: Available to small vessels only.
POLICE/AMBULANCE/FIRE: Police Service 25-62-72; Ambulance Service 25-68-28; Fire Service 25-66-32.
AUTHORITY: Ayudante Militar de Marina de Rosas.

SAGUNTO: 39.42 N. 00.14 W. (See Plan Book)

PORT LIMITS: The East/West line through the point of Cape Escollera de Levante.
DOCUMENTS:
2 copies Entrance Manifest.
4 copies Crew List.
Passenger List disembarking at this port.
Passenger List in transit.
Refer to "Barcelona" for other important information concerning Documentation.
PILOTAGE: Port is privately owned, and Pilots employed by Altos Hornos del Mediterraneo S.A. As Pilots are employed in Consignees Office no separate ETA is necessary. They are sent out to meet vessels as required. Pilot boat is not fitted with radar or VHF. Boat displays signals in accordance with international regulations.
ANCHORAGE: From 155° to 170° from the Cape Canet Lighthouse in 20 m. of water.
RESTRICTIONS: Delays may be caused by berth being occupied. Larger vessels may be delayed by bad weather (the Levante), as dredged channel is narrow.
MAX. SIZE: Draft 29 ft. 5 in. No other limitations.
HEALTH: Pratique can be arranged at any time by Consignees.
RADIO: Cadiz Radio-EAC, Cabo Palos Radio-EAP and Valencia Radio EAV.
TUGS: Normally join vessel either in anchorage or 0.5 mile from entrance. Ship's lines are used. Tugs should be ordered in ETA message also mentioning vessels length and cargo.
BERTHING: Subject to berth occupation and to berthing priority that Altos Hornos gives to different cargoes. Overnight berthing is allowed, in cases of emegency, or for ship safety.
BULK HANDLING FACILITIES: Ore loading pier for Sierra Menera (approx. 1,700 m. in length). Max. draft 48 ft.
CRANES: 10 at 6 tons on the coal quay, 4 at 20 tons, 4 and 60 tons and a 250 ton winch on the new quay.
STEVEDORES: Employed by consignees.
MEDICAL: Medical assistance should be ordered in advance. All kinds of medical assistance available. One hospital owned by Altos Hornos.
TANKERS: No facilities.
DENSITY: Salt water.
FRESH WATER: Available.
FUEL: None available.
FIRE PRECAUTIONS: Fire service organised by Altos Hornos.
GANGWAY/DECK WATCHMEN: Usually by crew. The Civil Guard keep watch on all ships for contraband.
OPENING/CLOSING HATCHES: Effected by ship's crew.
CUSTOMS ALLOWANCE: 200 cigarettes only. One bottle spirits per man but bottle should be opened. Spanish spirits allowed; one bottle per man. No control of Spanish wines.
IDENTIFICATION CARDS: Passport only.
CONSULS: Nearest at Valencia.
REPAIRS: Small repairs possible.
REPATRIATION: Facilities for effecting crew changes and arranging repatriation.
AIRPORT: Manises Valencia, 40 km. away.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: *Religious Festivals:* January 6th, March 19th, August 15th, December 8th and 25th. Variable: Good Friday and Corpus Christi. *National Festivals:* January 1st, May 1st, July 25th, October 12th.
TELEPHONES: None on board. Telephones placed in Boat house and Pilots' Office.
SHORE LEAVE: Crew members allowed ashore.
DEVELOPMENTS: Port to be expanded during the next five years to accommodate 300,000 tonners, at specialised cargo handling facilities. (Delayed for time being).
AUTHORITY: Ayudante Militar de Marina.

SAN CIPRIAN: 43.43 N. 07.28 W. (See Plan Book)

LOCATION: Located on the N.W. coast of Spain mid way between Burela and Vivero.

The port is owned by Aluminio Espanol and Alumino Espanola, whose factory is dedicated to produce aluminium and alumina. In its construction the most advanced technical systems have been used.
PILOTAGE: 2 Pilots available.
RESTRICTIONS: Present Harbour Master's Regulations only allow vessels to enter port or sail during daylight hours. These regulations also limit the maximum draft to 12.9 m.
VHF: New Radio Station with service on Channel 16.
TUGS: The Factory has time-chartered 2 tugs: "Sertosa Diez" and "Sertosa Catorce" to service the port. A third tug based at Aviles is also used to assist large vessels (i.e. 60,000 d.w.t.).
BERTHING: The port is sheltered by the Northern breakwater called "Dique Norte" which is 1,700 m. long. The Southern breakwater called "Dique Sur" is the commercial wharf. It has a length of 800 m. The bar of the port is 280 m. wide and its depth 22 m.

Southern breakwater main berth ("A" on Plan) is 280 m. long and its depth 14 m. It has been equipped with a tower-type crane to discharge bulk cargoes, particularly bauxite, and it averages 1,100 to 1,200 t.p.h. It will discharge into a conveyor belt, but whilst it is being installed, discharge is done into lorries, thus the present unloading rate is around 10,000 tons per 24 hours of consecutive work.

Southern breakwater auxiliary berth ("B" on Plan) is 80 m. long and its depth 7.5 m. It is equipped with 2 cranes of 5 tons lifting capacity each and used to discharge alumina in bulk, averaging a rate of 1,200 to 1,400 tons each 24 hours of work. Petroleum coke is also discharged through this berth at a rate of 2,000 tons every work shift from 0800 to 2000 hours. Loading of aluminium ingots and slabs is also undertaken, with a load rate of 500 tons per 24 hours of work. This berth is also being equipped in order to accommodate vessels discharging fuel oil and liquid soda.
FRESH WATER: Not available.
FUEL: Not available.
AUTHORITY: Harbour Master.
AGENT: Romualdo Alvargonzalez, S.A. Trv. Puerto 2, Telex: 87492.

SAN FELIU DE GUIXOLS (Gerona): 41.46 N. 03.01 E.

GENERAL: Refer to Palamos for all general information.
PILOTAGE: Pilotage is compulsory. Service between 0700 to 2400 hrs. Tel: 320910 or call Barcelona Radio or Bagur Radio (VHF).
ANCHORAGE: Vessels arriving after midnight or due to port congestion are anchored outside the breakwater.
MAX. SIZE: The maximum advisable draft for berthing is 22 ft. and up to 115 m. length.
TUGS: No tugs available.
BERTHING: Due to the fact that a few vessels can work at the same time, it is advisable to know as soon as possible the ETA for berthing arrangements.

Commercial Wharf.	Length 108 m.	Depth 22 ft.
Breakwater	Length 116 m.	Depth 22 ft.

A pier for coasting vessels with a maximum draft of 18 ft.
MEDICAL: Any kind of medical services can be obtained in San Feliu or Gerona hospital.
FRESH WATER: By means of hoses from the pier.
FUEL: Can be supplied in small quantities.
CARGO GEAR: Commercial pier is served by an electric crane able to lift up to 6 tons. Normally vessels derricks are used.
AUTHORITY: Ayudantia Militar de Marina.

SANTANDER: 43.28 N. 03.49 W. (See Plan Book)

PORT LIMITS: Between Cabo Menor and Punta Galizano.
DOCUMENTS:
5 crew lists.
7 passenger lists, or 3 negative.
3 cargo manifests of the goods destined to the port of Santander, 2 sets of manifests for cargoes in transit.
Store list in triplicate, including tobacco, spirits, radios, etc., belonging to the vessel.
Detailed list in triplicate of all personal effects of crew and passengers (tobacco, spirits, cameras, souvenirs, radios, etc.).
For vessels exceeding 499 g.r.t: Safety wireless certificate and Safety equipment certificate.

Legalisation required for manifests covering tobacco and tobacco products. This legalisation to be effected at the port prior to the first Spanish port of call.

Master and each member of crew of vessel can carry for his own consumption up to 3 kilos of tobacco in whatever form, and, if passengers are carried, up to 2 kilos per passenger, all of which must be declared in provisions list (1 kilo of tobacco = 1,000 cigarettes = 100 cigars). If Masters carry greater quantity than stated above, it cannot be manifested as tobacco for consumption on board, but must be included in Consular Manifest as being in transit, and as such must be separated in the holds from other cargo and hatches or lockers will be sealed by Customs until ship leaves Spanish waters. This Consular Manifest has to be legalised by a Spanish Consul. In the absence of Consul, said document will have to be visaed by an Authority of the former port of clearance. Otherwise, vessel would be severely fined.
PILOTAGE: Compulsory and service is permanent. Pilots board vesse by a cutter at the road, near the entrance off Mouro Island. Pilot cutters are painted white and have the letter "P" in black, on each bow. Cutters have blue flag with letter "P" in white, at both sides of flag. At night cutters have a white light, under this a red one. VHF available.
ANCHORAGES: The harbour consists of a large bay which provides good anchorage.
RESTRICTIONS: Entrance is well marked and there is no bar. Depth a entrance is at max. (dependent on tides) 34 ft.
MAX. SIZE: No restriction in respect of length or breadth, the maximum advisable draft to enter port is 34 ft.
HEALTH: If the vessel proceeds directly to berth, pratique can b obtained immediately after berthing. Otherwise, at anchorage a vessel's arrival.

If vessel has sickness on board of a contagious nature Masters shou advise Health Authorities by radio, and they will examine patien immediately upon arrival, to enable vessel to be granted free pratique. I vessel has to be fumigated or deratised a charge is made.
RADIO: Nearest important radio station is Cabo Mayor Radio, and it i advisable that messages received at least 24 hours before arrival.
TUGS: No tug-boats required for entering the port, only for berthing o shifting when in port. Ship's lines are used, and tug-boats are employe according to Pilot's advice.

BERTHING:

Berth	*Length* m.	*Depth* m.
Calderon	270	4
Maura	55.6	6.5
Albareda	267	7.25 to 9.5
Almirante	107.2	9.5
Maliano (Sections 10 and 11)	229.1	10.5
Maliano (Section 9)	129	7
Maliano (Section 8)	106.4	5
Maliano (Sections 1 – 7)	710	8
North Edge	538	9.5
Campsa Quays	280	8.5
Calatrava Quay	—	11.5

All depths of water quoted above correspond to LWOST and 13 – 14 ft. should be added for depths at HWOST. Bottom is generally soft.

Calatrava Wharf: for discharge of chemicals. Depth alongside 34 ft. with overall length limitation of 980 ft. Up River, at Astillero, beyond the harbour area, there is one spout called Orconera Tip for loading iron ore. Vessels up to 260 – 270 ft. length are allowed with a maximum draft, fully loaded, of 19 ft. Loaded vessels can only sail from that place at high water. A modern installation for dismantling and scrapping vessels is operating up river, on the way to Astillero.

CARGO HANDLING FACILITIES: There are berths for handling bulk cargoes, grain, ore, coal, etc. There are also berths for handling bulk liquids, chemicals. Berth available for roll-on/roll-off traffic.

STEVEDORES: It is very important that Masters send advance notice regarding vessel's ETA. With this notice, Agents can inform Shippers or Receivers' stevedores accordingly. Official working hours of port, are: Monday/Saturday: 0800 – 1200 hrs.; 1400 – 1800 hrs.

MEDICAL: Any kind of medical services can be arranged.

TANKERS: "Campsa" (Spanish State Monopoly): Installation is served by two identical concrete wharves situated in Nueva Montana Basin, berthing space of which is 500 ft. with a depth alongside of 29 ft.

DENSITY: Sea water.

FRESH WATER: Always available. Supply is performed by tug-boats and from shore connections at various quays.

FUEL: Ordinary fuel, diesel and gas oil are available at "Campsa". Depth alongside 19-32 ft.

Advisable that shipowners stem bunkers through their own Contractors, with an anticipation (at least) of 48 hours. Delivery can be performed either by tank-trucks or at bunkering pier.

GANGWAY/DECK WATCHMEN: Not compulsory but available upon request.

OPENING/CLOSING HATCHES: Effected normally by crew, except in liner vessels, which is contracted by stevedores.

CERTIFICATES: Vessels should have the usual documents on board, but only the safety Wireless, Safety Equipment and Deratisation Certificates are required by Authorities.

CUSTOMS ALLOWANCE: Normally, Customs permit 200 cigarettes per man out of bond. Additional quantities needed depend on the stay of ship in port. One bottle of spirit per man.

CARGO GEAR: Shore cranes are usually employed in loading/discharging operations.

CRANES:

Maura Quay	1 fixed 30 ton crane (electric)				
Albareda Quay	3	electric	mobile	cranes –	3 tons
Maliano Quay (Sections 10 & 11)	6	,,	,,	,,	6 tons
Maliano Quay (Sections 1 to 7)	14	,,	,,	,,	3 – 6 tons
North Edge Quay	4	,,	,,	,,	6 tons
	5	,,	,,	,,	12 ,,

Also movable motor cranes, mechanical shovels and similar, available.

IDENTIFICATION CARDS: not required.

Note. Acting as Consul of those countries with no Consular Representation: Valentin Lavin del Noval, Dominican Consul.

REPAIRS: Good repair facilities with various shipyards at port. All types of deck, engine, etc., repairs are possible.

DRY DOCKS: Three dry docks, one of which is within the harbour area and the other at Astillero (beyond the harbour area). Dimensions are:

Extreme length	405 ft.	434 ft.	722 ft.
Breadth at entrance	58 ft.	54 ft.	105 ft.
Depth on sill (high water)	23.7 ft.	20 ft.	38 ft.

REPATRIATION: No difficulties.

AIRPORT: About 4 miles from town. There are regular services with Madrid and Barcelona. Also charter flights to U.K. and other European countries.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS:

POLICE/AMBULANCE/FIRE: Police 222543; Civil Security Guards 232004; Hospital, Casa de Socorro 221214, Valdecilla 231400; Fire 231662; Ambulance Cruz Roja 270235.

TELEPHONES: On very special instances, can be arranged.

SERVICES: Available for tank cleaning, washings, compass adjusting, hull cleaning whilst floating, radio installation repairs, etc.

SHORE LEAVE: Crew allowed ashore at any time.

DEVELOPMENTS: *Extensions:* The entrance channel has been widened to 200 m. and has some depths between 9.5 and 10.5 m.

AGENT: Modesto Pineiro y Compania, S.R.C. PO Box 14, Paseo de Pereda, num. 27, Santander.
Telegrams "Pineiro-Santander". Tel. 220000. Telex 35832. (P & I Club representatives, Shipbrokers, stevedores and chartering Agents, Lloyd's Sub-agents, Brittany Car Ferries. Greek, Netherlands and Peruvian Consulates.)

SEVILLE: 37.25 N. 06.00 W.

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists.
2 Cargo Manifest, including cargo for discharge and in transit.
Declaration of Health.
2 Lists of Provisions and Stores.
2 Copies of Bills of Lading.

If vessel carries over 3 kilos tobacco per man the excess to be declared in a separate manifest which must be visaed by Spanish Consul at last port, otherwise is exposed to heavy fine.

PILOTAGE: *At the Bar:* Vessels may commence to enter and leave the river 1.5 hours after low water. Bar Pilots are stationed at Chipiona and come out to board vessels when requested, 2 miles North of Chipiona Lighthouse.

Pilot motor launches about 9 m. long, painted white with black "P" on sides. They carry regulation lights and signals day and night.

River Pilots: Vessels should radio their ETA at least 24 hours in advance to "Practicos Sevilla". River Pilots are stationed at the pier at Bonanza, 36.48 N. 06.20 W. Sound signal to call Pilot is 3 long blasts. Pilot boards from white-painted launch marked by black letter "P" and carrying regulation signals. Pilots require means of embarkation in accordance with International Conventions.

ANCHORAGE: At Bonanza, in depth of 20 ft. below chart datum.

RESTRICTIONS: Navigation in the river above Bonanza is prohibited at night to vessels of more than 115 m. length, and 18 ft. draft, and to tankers or vessels with dangerous cargoes.

Draft is controlled by height of tide and this should be ascertained by Owners or Agents in advance for the probable date of entry.

MAX. SIZE: Length 185 m., beam 24 m., max. draft about 24 ft. dependent on height of tide. Tankers are required to have an additional 1 ft. keel clearance.

HEALTH: Pratique is obtained on arrival at Bonanza, on presentation of International Health Certificates.

RADIO: Coastal stations of Cadiz, EAC, or Aranjuez, EAD 3.

TUGS: Normally join vessel in the anteport. Ship's tow line is used.

BRIDGES: Vessels berthing at Delicias Quay must pass through the Alfonso XIII drawbridge. May be opened at any time of day.

STEVEDORES: 24 hours notice should be given by Agents and confirmed 12 hours before vessels arrival.

MEDICAL: All medical and hospital facilities available.

TANKERS: There are 2 berths, depth alongside 20 ft.
At Quay No. 2, hoses 8-in. diameter.
At Quay No. 3, hoses 8 and 10-in. diameter.

DENSITY: Fresh water. The tide has no influence at Seville.

FUEL: All grades available.

GANGWAY/DECK WATCHMEN: Not considered necessary. All quays are watched by the Guardia Civil.

OPENING/CLOSING HATCHES: Performed by ship's crew.

CUSTOMS ALLOWANCE: 3 kilos tobacco per crew man, and 2 kilos per passenger; this includes tobacco in bonded stores. No restriction on wines/spirits.

IDENTIFICATION CARDS: Not required.

CONSULS: The following countries are represented at Seville:

Belgium
Bolivia
Colombia
Cuba
Chile
Denmark
Dominican Republic
Germany, Fed. Rep.
Great Britain
Greece
Honduras
Italy
Liberia
Nicaragua
Netherlands
Panama
Peru
Portugal
Sweden
Uruguay
Venezuela
United States

REPAIRS: All types of repairs can be effected.

DRY DOCK: Astilleros Espanoles S.A. have 1 dock, length 149 m., breadth 25 m.

REPATRIATION: All facilities available.

AIRPORT: Situated 12 km. away, regular daily flights to Madrid, Barcelona, other parts of Spain. Some transatlantic flights.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: 1st January; 6th January; 19th March; Maundy Thursday; Good Friday; 1st May; Ascension Day; Corpus Christi; 29th June; 12th October; 1st November; 8th December; 25th December. All holidays may be worked with overtime.

POLICE/AMBULANCE/FIRE: Police: 091; Fire Brigade: 232123; Ambulance: 231945.

TELEPHONES: Can be installed on board if requested 10 days in advance.
SHORE LEAVE: No restrictions.
SERVICES: Fresh provisions and stores available, refuse collection, correction of compasses.
AUTHORITY: Comandancia Militar de Marina.

SOLLER: Majorca, 39.47 N. 02.46 E.

DOCUMENTS: See "Bilbao".
PILOTAGE: None available. 2 intermittent lights situated on the Mola indicate the Entry Channel.
MAX. SIZE: Advisable length and draft 60 m. and 4.50 m. respectively.
TUGS: None available.
MEDICAL: It is advisable to give advance notice if medical attention is required. There are no hospitals. Medical service is available 5 km. from the port.
FRESH WATER: Not available at the quay.
FUEL: None available. If required the order should be placed to Campsa through the Agent.
GANGWAY/DECK WATCHMEN: Crew do this operation.
OPENING/CLOSING HATCHES: Crew.
IDENTIFICATION CARDS: It is advisable to have these available.
CONSULS: None.
REPAIRS: No facilities exist.
AIRPORT: The airport is situated 40 km. away; the island is well connected with the Peninsula (mainland) and with foreign airports.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
SHORE LEAVE: Allowed.
AUTHORITY: Jefe Encargo del Despacho de Buques, Oficianas del Destacamento de la Comandancia Militar de Marina en Soller.

TARRAGONA: 41.06 N. 01.17 E.

DOCUMENTS: Cargo Manifest of all goods in ship, stating any foreign port from where those goods come. This procedure should always be done in the first Spanish port.

In first Spanish port ship should produce an Itinerary Manifest; and those ships which carry goods to discharge should produce this Manifest in those ports in which they will discharge the goods.

Supplies Certificate for those ships not having any goods to discharge in any Spanish port, or who have previously been in other Spanish port.

Register of the Supplies and Equipment in ship.

Register of the Crew's Belongings, if the ship comes directly from a foreign port.

Passenger List (if there are passengers). Negative Passenger List (if there are no passengers).

Crew List.

Health Certificate, if the ship comes from another Spanish port.

PILOTAGE: Every ship upon arrival should note following signals: During day, hoist flag letter "G" of International Signals Code. Acoustics signal, three long whistles. During the night, flash signal letter "G" of code or the letters "PT". Cable Address: Practicos Puerto Tarragona. VHF station Channels 16, 14, 12 and 9.

Pilot boats: White colour with letter "P" painted on both sides. Lights: according to International Regulations. Pilotage area begins at a max. distance of 2 miles from port entrance. Ships awaiting for Pilot anchor in the Rada and East of the lighthouse. If weather does not allow, Pilot will meet ship at port entrance. Ladder for Pilot to be placed at leeward side.
ANCHORAGE: The West limit is marked by imaginary line running N./S. at the end of the breakwater. East limit is marked by imaginary line between the Paseo de Sta. Clara with the cathedral tower. Depths in Rada are 16 m. and 30 m.; quite good for anchoring (mud and sand).
RESTRICTIONS: No restrictions to enter port during day or night. No tides.
MAX. SIZE: Max. length 260 m., max. draft 38 ft. 06 in. Outside port the plant of Pantalan de Assesa, 1 mile West of lighthouse, allows berth of tankers up to 30,000 tons d.w.t. Enpetrol, 60,000 d.w.t.
HEALTH: Hospitals and clinics available. There is a doctor service in health department of port, which is authorised to vaccinate, and give certificates against yellow fever authorised by the OMS.
RADIO: No radio station.
VHF: Pilot on VHF Channel 16.
TUGS: Six tugs. Tugs join vessel outside port. Ship's lines are used.
BERTHING: All berths are made of stone with rubber protection every 20 m. in the port. In Pantalan de Assesa and Pantalan Enpetrol, quays over iron pillars and berth is on the platform.
STEVEDORES: Advisable to report ETA, in order to have all the necessary equipment and necessary number of workmen required for operations. If there are not enough cranes at a given time, own ship equipment is used.

General Cargo: Estimated speed of 80 – 100 tons per person in a working day of 8 hours, except in particular cases due to the nature of the cargo.

Cargo in Bulk: Speed varies according to the nature of the goods. For instance:

Minerals: 500 – 800 tons per person in a working day of 8 hours.
Grains: 400 – 600 tons per person in a working day of 8 hours.
Goods in bags: 150 – 200 tons per person in a working day of 8 hours.

GANGWAY/DECK WATCHMEN: Not compulsory, if Master requires them he is provided with specialised staff for this purpose.
OPENING/CLOSING HATCHES: Although this work is normally carried out by crew it can be done as well by the stevedores if required at extra charge.
TANKERS: Outside the port there is berthing for oil carriers at Pantalan of Assesa, Pantalan Enpetrol and monobuoy for large tankers.

Storage of residues: There is a plant for slop (residue) discharge facilities connected with all platforms of the Pantalan and plant of residues disposal is available to all vessels.

There are 3 platforms to berth with the following drafts: Platform "A" – 38 ft. Platform "B" – 33.5 ft. Platform "C" – 23.5 ft. In inner port there are berths to discharge refined goods available to the tankers of the Compania Arrendataria of the Oil Monopoly.

Pantalan Enpetrol with 3 platforms; Platform 80S – 50 ft. Platform 35T – 40 ft. Platform 35S – 40 ft. and 11S – 30 ft.
FRESH WATER: Supply of fresh water by means of an underground pipe in all the commercial quays of the port.

Ship's Master advises that water is very saline and it is not advisable to take any on board.
FUEL: Fuel oil and gas oil available. Request of this supply should be done with 24 hours notice through the Commercial Agent of Campsa.
CUSTOMS ALLOWANCES: It is permitted to have a packet of tobacco per person per day. Unlimited allowance with national drinks.
CREW IDENTIFICATION CARDS: Not required.
CONSULS: Various available.
REPAIRS: Small repairs available.
DRY DOCKS: None.
REPATRIATION: Facilities exist.
AIRPORT: The town of Reus 12 km. distance has a military airport that is also used for charter flights and regular flights to Madrid.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Police 20–11–29; Ambulance at local hospitals; Fire 20–19–50.
SHORE LEAVE: Allowed.
DEVELOPMENTS: Building of quay in Levante Dock, with a length of 550 m. and 12 m. draft, with a probable extension of another 300 m. of quay with 14 m. draft. The draft in the port will then be 12.70 m. and in the entrance channel 13.40 m.
AUTHORITY: Capitan del Puerto en Comandancia Militar de Marina.

TORREVIEJA: 37.58 N. 00.40 W.

PORT LIMITS: The port limits are considered to be at 1 mile distance from the lighthouse at the end of the Eastern Dock or breakwater.
DOCUMENTS:

4 Crew Lists.
4 Lists of Passengers.
10 Cargo Manifests, including cargo in transit, together with cargo for Alicante. Tobacco and cargo manifests visaed by the Spanish Consul in the port of origin. All the vessel's certificates, and where necessary in respect of the cargo which international regulations require.

PILOTAGE: The corporation does not have a radio station, however, it does have a walkie-talkie with a range of about 12 miles on VHF equipped with the following Channels: 6, 9, 11, 14, 16. The pilot craft is 10 m. overall length and is painted white, with the letter "P" painted in black on the sides. The pilot craft normally operates within a 1 mile radius of the white light of the breakwater lighthouse.
ANCHORAGE: The anchorage which is most recommended for vessels is 1 mile from the breakwater, with a sandy bottom and good holding ground.
MAX. SIZE: The port's maximum sizes are: Overall length 150 m. Max. draft on entry of 21 ft., if the vessel has to remain anchored awaiting a berth, and max. departure draft of 29 ft. 6 ins.
HEALTH: Regulations as laid down by the International Foreign Health Requirements are enforced.
RADIO: Coastal station at Alicante; on MF with average range of 220 miles, and on VHF with a range of 40 miles.
TUGS: None available.
BERTHING: There is a berth in the Western Dock, with a length of 360 m., and a max. depth of 10 m. The loading operations are effected by shore equipment, provided that bulk salt is being loaded, or with the vessel's gear when bagged salt is being loaded.
CRANES: The port has no cranes, however, a mobile crane can be used for any weight which has to be loaded, the max. capacity of this crane is 7 tons.
STEVEDORES: There are no stevedoring gangs as the work force is employed by the Salt Plant. The only commodity loaded is salt and work is betweeen 0600 hrs. and 2200 hrs.
MEDICAL: If a doctor is required by the Master, medical services can be furnished locally, it being necessary to transfer the patient to clinic in Alicante, if the case is serious.
TANKERS: No facilities available.
DENSITY: Average port density is 1030.
FRESH WATER: Available. Rate 5 t.p.h.
CUSTOM ALLOWANCES: Each crew member is permitted to have 200 cigarettes and 1 bottle of spirits out of ship's bond.
REPATRIATION: Possible.
HOLIDAYS: Normally no work is done in the port on the following holidays: New Year (January 1st), Epiphany (January 6th), San Vicente (April 23rd), Maundy Thursday, Good Friday; Labour Day (May 1st); Festival of San Pedro (June 29th), Corpus Christi; Santiago Apostol (July 25th); Assumption Day, Festival of the Spanish speaking world (October 12th); All Saints (November 1st); Immaculate Conception (December 8th) and Christmas Day (December 25th).
AUTHORITY: Ayudante Militar de Marina.

VALENCIA: 39.27 N. 00.19 W. (See Plan Book)

DOCUMENTS:

3 Crew Lists.
2 Passenger Lists or a negative.
1 Cargo Manifest of goods destined for the port.
Another manifest covering transit cargo.
2 Store Lists, including tobacco, cigars, cigarettes, coffee, spirits, radios, cameras, etc., in possession of crew. In all cases make and number of radios to be indicated.
Safety Wireless Certificate and Safety Equipment Certificate.

If vessel carries over 3 kilos tobacco per man, the excess to be declared in a separate manifest, which must be visaed by Spanish Consul at the last port, otherwise vessel is exposed to heavy fine.

PILOTAGE: Pilotage is compulsory for this port. Day and night service. The pilot launch is painted black with a letter "P" painted in white on the sides.

ANCHORAGE: There is a good anchorage outside the port, vessels are required to keep the entrance channel clear.

RESTRICTIONS: Entrance to the port faces S.S.E. and is 260 m. wide, with a low water depth of 15 m.

MAX. SIZE: The following size vessels have entered the port.

GRT	*LOA*	*Draft*
32,280 tons	273 m.	10.00 m.
44,992 tons	255 m.	11.58 m.
44,688 tons	257 m.	13.30 m.

HEALTH: If the vessels proceed directly to berth, pratique can be obtained immediately after berthing. Otherwise, at anchorage at vessel's arrival.

If vessel has sickness on board of a contagious nature Master should advise Health Authorities by radio, and they will examine patients immediately upon arrival, to enable vessel to be granted free pratique.

RADIO: Coastal radio station with international frequencies 1580 kHz. ETA to be sent to Agent in advance.

TUGS: Not compulsory for entering port. 10 tugs available up to 1,800 h.p. Two tugs normally used for berthing and unberthing.

BERTHING: Quays operated by Port Authority:

Name	*Length m.*	*Depth m.*	*Use*
Extension, Levante	495.7	14.00	Containers
Levante	953.14	9.00	Bulk and general cargo

Inner Poniente Transversal	212.25	7.00	General cargo & passengers

CARGO HANDLING FACILITIES: Grain, coal, fertilisers, etc., in bulk are handled at Espigon del Turia and Muelle del Turia. Also at Muelle del Turia is a chemical-handling installation, depth alongside 9.25 m.

Containers: Two berths at the Turia pier, North side, with crane of 40 metric tons capacity, also, and using conventional means, they are discharged at the Western quay.

There are 4 work-points for roll-on/roll-off vessels at the Eastern transversal quay and the Western transversal quay.

CRANES: 2 floating cranes, capacity 60 and 80 tons.

The Port Authority operate 54 gantry cranes with capacity of 3 tons to 30 tons and 6 mobile cranes. 32 private cranes also available.

TANKERS: *Campsa:* One berth, length 210 m., depth 12.0 m.

Pipe-lines: The port areas equipped for oil traffic are connected to the C.A.M.P.S.A. plant by means of a network of 5 pipe-lines, starting at the Turia pier and quay, and ending at the plant itself. These pipe-lines are 1×10 in. diameter with a capacity of 300 cu.m./hr., and another of 8 in. and 250 cu.m./hr. for movement of fuel-oil.

2×8 in. diameter and 250 cu.m./hr. one for gas-oil and one for gasoline. There are also means of delivery of aviation paraffin by means of 1 pipe-line 6 in. diameter at the rate of 120 cu.m./hr. Also see "Berthing".

Two deballasting berths each length 200 m. Depths 7.50 m. and 9.00 m.

MEDICAL: All medical services available in the port and in the city.

REPAIRS: All types of hull and machinery repairs can be effected.

FLOATING DOCK: 1 floating dock available, owned by Union Naval de Levante. Interior length 143 m., interior width 24.60 m. Lifting capacity 8,000 tonnes.

CUSTOMS ALLOWANCE: Normally Customs permit 200 cigarettes per man out of bond. Additional quantities needed depend on the stay of ship in port. One bottle of spirit per man.

FRESH WATER: Available at all main berths at the rate of 30 t.p.h.

FUEL: Campsa can supply by pipelines at the Turia berths, at the rate of 100 – 280 t.p.h.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

AIRPORT: Valencia Airport, 15 km. from the port.

CONSULS: The following countries are represented in Valencia:

Argentina
Belgium
Bolivia
Brazil
Colombia
Costa Rica
Chile
Denmark
Dominican Republic
Ecuador
El Salvador
Finland
France
Germany (West)
Great Britain
Greece
Guatemala
Honduras
Iceland
Italy
Nicaragua
Norway

Switzerland
U.S.A.
Uruguay
Venezuela
Yugoslavia

POLICE/AMBULANCE/FIRE: Police 091; Fire 271234; Ambulance 230304.

HOLIDAYS: Work can be arranged on following holidays. New Year's Day (January 1st, full day); Epiphany (January 6th, full day); Saint Joseph (March 19th, full day); Easter (two days); Saint Joseph Artisan (May 1st, full day); Saint Peter & St. Paul (June 29th, full day); Labour Day (July 13th, full day); Patron Saint of Spain (July 25th, full day); Assumption Day (August 15th, full day); Martyrs' Day (August 30th, full day); Holiday of Hispanicism (October 12th, full day); All Saints (November 1st, full day); Christmas Day (December 25th, full day).

DEVELOPMENTS: Eastern Quay to be extended. Ro-Ro berths to be constructed at Station Quay.

Installation of 6×12 ton cranes is planned.

AUTHORITY: Direccion del Puerto de Valencia.

VIGO: 42.14 N. 08.40 W. (See Plan Book)

DOCUMENTS:

Maritime Declaration of Health.
Crew List.
Passenger List.
Manifest of Cargo for the Port.
Manifest of Cargo in Transit.
Ship's Stores List.
Crew's Personal Effects List.
Ship's Particulars Declaration.

Note: Tobacco. In case the vessel carries more than 3 kilos of tobacco per man, the excess must be declared in a separate manifest, which must be visaed by a Spanish consul. In the absence of the Consul, said document will have to be visaed by an authority of the former port of clearance. Otherwise the vessel would be severely fined.

PILOTAGE: Pilotage at Vigo is compulsory and the service permanent day and night. Pilots board in auxiliary motor-boats with a letter "P" in white at both sides of the hull and a blue flag with the letter "P" in white, near the entrance of the harbour, in the zone included inside Punta Lameda-Cabo Vicos on the channel of the South entrance and inside Punta Caballo-Subrido, on the channel of the North, both situated to the West of the harbour. At night the pilot boats have a white light visible around the horizon and under this light another red one, also visible around the horizon. International code signals used to call Pilot, or four long blasts on the whistle. Pilot station situated at Transatlanticos Pier 3. Pilot boats normally on station on a line connecting Borneira and Transatlanticos Pier.

ANCHORAGE: Several suitable anchorages in the Vigo river, naturally sheltered, in depths of more than 35 m. The main anchorage opposite the port on the South side of the "Ria" has depths of 15 – 25 m.

MAX. SIZE: No limitation for length and beam, unlimited deep water approaches.

HEALTH: If vessels proceed directly to the berth, pratique can be obtained immediately after berthing. Otherwise, at the anchorage on vessel's arrival. In case of suspected disease or fever on board, the Master must send a radio message to the Agent in order that they advise the Health Office.

RADIO: The nearest Radio Station is Vigo Radio, situated in the limits of Vigo port.

TUGS: No tug-boats are required for entering the port. Only used for berthing ships from 120 m. length upwards according to Pilot's advice. At Vigo there are 2 modern tugs of 1,000 h.p. each and another of 5,000 h.p.. Tugs join vessel off the berth. Tug's line used at no extra charge.

BERTHING: The commercial piers to load or unload have a depth of up to 36 ft. and the Transatlantic Pier, depth of about 40 ft. at LW. The tide difference between high water and low water is about 3.5 m.

At Rande, in the lower harbour, there are very modern special loading installations for mineral ore, at an average rate of 2,000 t.p.h. The depth alongside this installation is 36 ft. LW.

Containers: Unloaded at the Arenal Quay with 15 and 28 metric tonne cranes. Depth 10 m. at Spring low tides, and at the Transversal Quay with a 30 metric tonne crane.

Ro-Ro traffic: New dock at Bouzas with 3 berths, with depths of 8 and 10 m. at Spring low tides. Also at Linkspan in the interior of the Transatlantic Quay with 6 m. depth.

TANKERS: Tankers berth at a pier depth alongside 11 m. at low water. Tankers up to 300 m. length acceptable. Inner berth suitable for vessels of less than 100 m. length with a draft of 6 m. Discharge lines 12 in., 10 in. and two of 8 in. diameter.

STEVEDORES: It is very important that Masters send advance notice regarding the vessel's ETA. With this notice, Agents can inform Shipper's or Receivers' stevedores accordingly, so that they arrange operations properly. The official working hours of the port are Monday/Friday 0830 – 1230 hrs. – 1400 – 1800 hrs. Saturday 0830 –1230 hrs.

MEDICAL: Doctors and hospital facilities available. Advance notice preferred in urgent cases.

DENSITY: Average 1026.
FRESH WATER: Available from the quays at the rate of 50 – 80 t.p.h. Can also be supplied by tugs at 500 t.p.h.
FUEL: Available from the Oil Pier or delivered by barge. 24 hours notice of requirements recommended.
GANGWAY/DECK WATCHMEN: Available from shore if required.
OPENING/CLOSING HATCHES: Opening may be done by crew to avoid delays. Closing hatches usually performed by crew.
CUSTOMS ALLOWANCE: 200 – 250 cigarettes or three kilos of tobacco and 2 bottles spirits may be held out of bond for each person. Wine not restricted.
IDENTIFICATION CARDS: Shore passes are provided by the Agent.
CONSULS: Most countries have consulates at Vigo.
REPAIRS: All types of deck and engine repairs are possible.
FLOATING DOCKS: One floating dock available: length 128 m., breadth 22.40 m.
REPATRIATION: Crew changes and repatriation can be arranged without difficulty.
AIRPORT: Local airport, situated 8 kms. from the port, has at least 1 daily flight to Madrid. International airport of Santiago de Compostela is 100 km. away.
TIME: GMT plus 1 hour in Winter. Summertime from April to September.
HOLIDAYS: 1st January; 6th January; 19th March (St. Joseph); Good Thursday; Good Friday; 28th March (local holiday, Reconquest Day); 1st May (Labour Day); Corpus Christi; 25th July (St. James' Day); 15th August; 16th August (Local); 12th October; 8th December (Immaculate Conception); 25th December.
POLICE/FIRE/AMBULANCE: Police, tel. 21.00.00; Fire, tel. 21.20.00; Ambulance, tel. 21.25.09.
TELEPHONES: No arrangement for connecting on board.
SHORE LEAVE: Allowed without restriction.
DEVELOPMENTS: New transhipment terminal under construction to the North of Bouzas and the West of the fishing port, suitable for vessels up to 300 m. LOA and 16.0 m. draft.
AUTHORITY: Director del Puerto, Junta del Puerto y Ria de Vigo.

NOTES

Please also advise Shipping Guides Ltd.

Spanish Sahara

EL AAIUN (Laayoune): 27.04 N. 13.28 W.

LOCATION: Lighthouse at phosphate terminal in position 27° 03′ 55″ N. 13° 27′ 45″ W.
DOCUMENTS: See "Villa Cisneros".
APPROACHES: There is a light located at the end of the bulk phosphate terminal in position 27° 03.9′ N. 13° 27.7′ W. at the top of mineral silos, at a height of 180 ft. 1 flash every 5 seconds, range 10 miles.

There is also a fixed green light located at the Northern part of the terminal, range 10 miles, and a fixed red light at the Southern part of the terminal, range 10 miles.

The phosphate terminal installations give a good radar target at a distance of 25 miles. Vessels approaching from the North should keep 10 miles off the coast until the pier is bearing 090° and then steer towards the pier.

At nights the installation lights are always visible and with a clear atmosphere can be seen from 25 miles off the coast.
PILOTAGE: Compulsory. Pilot boards about 0.75 miles off the pier head.
ANCHORAGES: Good anchorages can be found in 10 fathoms of water. When waiting for the Pilot it is recommended to anchor 0.75 miles Westward of the pier. No shelter in strong winds. Service of powerful auxiliary boats is available when standing at anchor.
MAX. SIZE: Depth 17.5 m. at LWL at the phosphate terminal berth, and 9.5 m. LWS at the berth for general cargo ships, located at the middle of the pier.
HEALTH: Valid smallpox, yellow fever and cholera certificates are required. Otherwise, usual clearance.
RADIO: Via Tenerife Radio on HF, call sign EAT. Via Las Palmas Radio on MF, call sign EAL.

There is no coast radio station in Spanish Sahara for communication with El Aaiun. VHF radio communication is being placed at the phosphate terminal to work in future on Channels 12 and 16.

Ships calling at the terminal are required to send ETA cables 72, 48 and 24 hours prior arrival to "Cargadero Fosbucraa el Aaiun" and "Fosbucraa Madrid".
TUGS: 2,000 h.p. tugs are called from Las Palmas to assist whenever the ship requires their service. Assistance has to be requested by Master or Owner 60 hours prior arrival.
BERTHING: Aaiun Mineral Terminal located approx. 6.5 miles South of El Aaiun City.

The terminal head is in a North-South direction. Vessels are moored alongside dolphins that cover the three loading stations for 100,000, 40,000 and 20,000 tons d.w.t. ships. The loading pier has a height above water of 50 ft. and the dolphins approx. 20 ft.

Facilities consist of modern equipment available for handling phosphate in bulk at a loading rate of 4,000 t.p.h. in 2 of the stations, and 2,000 t.p.h. at the 3rd. The phosphate is loaded by means of moveable loading machines with telescopic spouts to permit perfect trimming.

Facilities at the general cargo berth available for vessels up to 8,000 tons d.w.t. are 2 cranes of 6 tons each, and 1 derrick of 150 tons capacity.

No gangway to be rigged at this terminal. Communication from ship-to-shore is by means of elevator from the loading machines.
AIRPORT: Aaiun (30 km. from harbour).
REPAIRS: No repairs can be effected at this port.
BUNKERS: No bunkers available.
PROVISIONS: Provisions may be obtained if requested by vessel 48 hours prior arrival.
OPERATORS: Fosfatos de Bucraa S.A., Madrid.

VILLA CISNEROS: 23.42 N. 15.55 W.

DOCUMENTS: *Foreign Vessels*
Crew List.
Health Pratique.
Passenger List.
Cargo Manifest.
Spanish Vessels, in addition to the above:
Safety Equipment Certificate.
Radio Safety Certificate.
Seaworthiness Certificate.
PILOTAGE: Pilot is necessary to cross the bar and for river navigation. Pilot joins at anchorage. Pilotage compulsory for all vessels over 50 g.r.t. Contact Pilot by radio-telephone, via Puerto de Villa Cisneros Radio operating on 2182 and 2626 kHz. from 0800 to 1300 hrs. and from 1500 to 2000 hrs. GMT.
ANCHORAGE: In depths of more than 10 m. about 0.6 mile East of the breakwater head. This situation is well protected from swell from the S.W. but open to winds from the N.E. which are frequently strong creating difficult conditions for very small vessels. There are no mooring buoys.

Vessels loading trans-shipment cargo anchor in position with Punta Galera Light bearing 030°T, 1.2 miles off. The prevailing winds blow mostly from the North up to force 3 with a long low swell mostly from a Northwesterly direction.
MAX. SIZE: Length 100 m., beam 12 m., draft 5 m.
HEALTH: Masters are required to complete a health certificate for the Comandancia declaring that the vessel has not called at any infected ports.
TUGS: None available, only one small launch which may assist.
BERTHING: Breakwater of 750 m. length extends towards the S.E., berths alongside the last 200 m., 1 concrete pier for small vessels, 3 small jetties enclosing 2 docks, can be used by vessels of medium size.
STEVEDORES: Employed by Port Authority and engaged by ship's Agent.
MEDICAL: Hospital available for any kind of medical attention; doctors and ambulance service available.
TANKERS: Moor at jetty No. 2. Pipelines 4 in. diameter.
FRESH WATER: On the quays are 3 hydrants, capacity 3 t.p.h. and 4 of 2 t.p.h.
FUEL: Atlas Company can supply fuel subject to advance notice.
OPENING/CLOSING HATCHES: Opened and closed by crew.
CUSTOMS ALLOWANCE: Crew are allowed to take only sufficient tobacco ashore for their own consumption. It is not permitted to take alcohol ashore.
IDENTIFICATION CARDS: Seamen going ashore must take an identity card or a shore pass, issued by the Master.
CONSULS: No local representation.
REPAIRS: Only facilities for very minor repairs.
REPATRIATION: Can be arranged provided that documentation is in order.
AIRPORTS: Situated 1 km from the port. Iberia Airlines have 5 flights per week. In case of emergency, military aircraft may be used.
TIME: GMT is used all year round.
HOLIDAYS: 1st January; 6th January; Maundy Thursday; Good Friday; Corpus Christi; Ascension Day; 29th June; 16th, 18th and 25th July; 15th August; 12th October; 1st November; 25th December.

Mohammedan Holidays: Aid el Queber (2 days); Aid el Mulud (1 day); Aid el Seguer (2 days).
POLICE/FIRE/AMBULANCE: Police Station situated 100 m. from the quays. Fire: tel. 18. Ambulance: tel. 17.
SHORE LEAVE: Allowed without restriction
AUTHORITY: El Comandante, Militar de Marina.

NOTES

Please also advise Shipping Guides Ltd.

Sri Lanka

COLOMBO: 06.56 N. 79.50 E. **(See Plan Book)**

DOCUMENTS:

5 each of Crew and Passenger Lists.
8 Manifests.
1 Arrival Report for Pilot.
1 Master's Declaration for Immigration, and same for Police.
2 Private Property Lists of officers and crew for Customs.
2 copies of Preliminary Report by Master for Customs.
1 Maritime Declaration of Health for Port Health Officer.
1 Master's Declaration of Cargo for Quarantine Department.

PILOTAGE: Vessels approaching port apply for Pilot by flying the "G" flag by day or 2 red lights at night. They can, in addition, flash the pilot station or use VHF Channel 16. The telegraphic address of pilot station is "Pilot Station Sri Lanka Ports Authority Colombo" and a provisional ETA 24 hours ahead is advisable with corrections thereafter. However, these are best channelled through the vessel's Agent. Pilot boat is a wooden motor launch with the word "Pilot" on its side. It flies the "H" flag by day or red and white lights by night according to the international code. The Pilot boards within an area of about 1 mile of the harbour entrance. Advice of where to anchor can be obtained from the Pilot by VHF or signal light.

ANCHORAGES: The anchorage off port is within 3 miles of the harbour mouth where up to 14 fathoms of water is available. 18 fathoms of water is available within 6 miles.

This anchorage is to be used on instructions from pilot station. All vessels arriving have to anchor South of Panadura (Latitude 6° 43' North) or off Negombo until instructed to proceed to the anchorage off harbour.

RESTRICTIONS: Entry may take place at all hours of the day and night but it is unusual for the Pilot to board vessel between midnight and 0400 hrs.

MAX. SIZE: For entering harbour, max. draft 36 ft. and a length of 800 ft. is permissible. Beam is not critical. There is no appreciable rise and fall of tide.

Tankers' max. dimensions for berthing alongside: length 750 ft., draft 34 ft.

HEALTH: The vessel entering port must fly the "Q" flag until boarded by the Port Health Officer to grant pratique. Pratique may be granted by radio if there is a doctor on board provided the ship is not calling from a port in India. A radio message should be sent within 24 hours of the vessel's ETA in the following terms "Last port — no quarantinable disease on board – Doctor on board" and the Port Health Officer will reply to the Agent confirming pratique being granted by radio. Pratique is automatic if the vessel enters after calling at another port in Sri Lanka. If any quarantinable disease on board double "Q" flags must be hoisted prior to entering harbour.

RADIO: "Colombo Radio" with a call sign 4PB is the usual channel for communicating with Colombo.

The pilot station is presently available on VHF Channel 16 and the Port (Cargo) Corporation on VHF Channel 11.

TUGS: Tugs normally join the vessel at the harbour mouth and use ship's lines.

BERTHING: There are no specific requirements relating to berthing space but early advice of draft is most advisable. See "Developments".

STEVEDORES: The stevedores at Colombo are the Port (Cargo) Corporation, a nationalised concern having the monopoly of stevedoring and lighterage. ETA at least 24 hours in advance if possible. Gangs for the day shift which commences at 0730 hrs. must be ordered by 0700 hrs. and gangs for the evening shift, commencing at 1630 hrs., by 1600 hrs. This excludes the Poya Day on which only the day shift is worked, and gangs must be ordered by 0930 hrs. on the previous day.

MEDICAL: Although advance notice of medical assistance required is helpful, particularly when port stay is limited, it is not essential. Comprehensive hospital facilities are available either in private nursing homes or the Government hospitals. The following inoculations are required: Smallpox and cholera, yellow fever if calling from ports in East Africa and Mozambique.

TANKERS: There are 3 tanker berths, 1 for importing crude oil suitable for tankers of 750 ft. length, max. draft 34 ft. One berth for white oil tankers with max. draft 33 ft. One berth for fuel oil imports for vessels with a max. draft of 31 ft., and this same berth is used for exports when permissible draft is 33 ft.

The diameter of discharge lines;
Crude oil, 24 in., giving capacity 1,000 t.p.h.
White oil, 10 in., capacity 250 t.p.h.
Gasoline, 10 in., capacity 170 t.p.h.
Furnace oil, 14 in., capacity 500 t.p.h.
Naphtha, 12.75 in., capacity 450 t.p.h.

Pumping will not be commenced after nightfall. No residue discharge facilities are available.

DENSITY: 1025.

FRESH WATER: Fresh water is readily available by barge. The rate of delivery is approx. 40 t.p.h. The water is of good quality.

FUEL: Furnace diesel and gas oil available. Advance notice of at least 24 hours is advisable as the bunker requirements of the port often exceed the ability of the oil companies to supply immediately. Supplies are by barges which can pump at 300 t.p.h.

Note: Vessels may be limited to a maximum of 400 tons of fuel oil, also bunkers may only be made available to vessels loading or discharging cargo.

GANGWAY/DECK WATCHMEN: Watchmen are available and are to be recommended unless members of the crew are available to provide this service.

OPENING/CLOSING HATCHES: This work is normally carried out by the stevedores except in the case of McGregor or similar hatch covers which they will not handle.

CERTIFICATES: Register showing vessels name, port of registry, gross and net tonnages and owner. Safety Equipment Certificates quadrennial and annual, Ship's Articles (British) and clearance from previous port and deratisation Certificate.

CUSTOMS ALLOWANCE: Cigarettes 25 per man per day. Tobacco 1 oz. per man per day. Snuff 1 oz. per man per day. Spirits 0.25 bottle per man per day. Wine 1 bottle per man per day. Beer 2 bottles per man per day.

IDENTIFICATION CARDS: These are not essential but the crew is expected to carry some form of identification with a photograph on it when they leave the vessel.

CONSULS:

Belgium
Burma
China
Cyprus
Czechoslovakia
Denmark
Egypt
France
Germany
Greece
Indonesia
Italy
Japan
Maldives
Netherlands
Philippines
Poland
Rumania
Thailand
Switzerland
U.S.A.
U.S.S.R.
Yugoslavia

REPAIRS: Most main engine and boiler repairs and minor hull repairs can be effected.

DRY DOCKS: No. 1 – 700 ft.×85 ft.×32 ft. over blocks – Max. size 675 ft. LOA. 80 ft. breadth – Deepest draft 29 ft.
No. 2 – 350 ft.×54 ft.×22 ft. over blocks.
No. 3 – 400 ft.×54 ft.×18 ft. over blocks.
Owners and Operators – Colombo Dockyard Limited.

A dry dock of 65,000 d.w.t. complete with workshop facilities is planned for operation by late 1981.

REPATRIATION: There is no difficulty in arranging repatriation and crew change.

AIRPORT: It is 18 miles to the international airport which is served by regular airlines.

TIME: Sri Lanka standard time is 5.5 hours in advance of GMT, and no alterations are made during the year.

HOLIDAYS: Cargo work can normally be arranged on all except the following holidays:

1st January; Sinhalese & Tamil New Year 1 day in April; 1st May; Wesak Full Moon in May; Republic Day 22nd May; 26th September; Christmas Day.

POLICE/AMBULANCE/FIRE: Harbour Police tel. 21075; Ambulance 20428; Ambulance launch: Exhibit "A.L." flags; Port Fire Brigade 32331.

TELEPHONES: None are available for placing on board.

GENERAL: Ships should not discharge oil within territorial waters, dispose any waste into harbour or on to quays, immobilise main engines without prior permission, use radio for transmission in harbour. Ships should hoist national flag during daylight hours.

SHORE LEAVE: There is no restriction on crew members being allowed ashore but advised to carry passport or other identification.

DELAYS: Delays for vessels working cargo are seldom over 24 hours. However, it is very unusual for vessels calling for bunkers, fresh water, stores, etc., to be delayed for more than a few hours.

DEVELOPMENTS: One new alongside dry-cargo berth length 1,000 ft. with a draft of 36 ft. completed. Container berth gantry cranes to be installed shortly and present draft of 36 ft. to be increased to 39 ft. at this berth.

AUTHORITY: Sri Lanka Ports Authority.

GALLE: 06.01 N. 80.14 E.

PORT LIMITS: To the Eastward Unawatuna Point, to the Westward Gindurah Point, to the Southward the usual sea league from the line between these points.

DOCUMENTS: Pilot brings on board:

Arrival Report and Maritime Declaration of Health.

Port Health Officer boards vessel after berthing and collects Crew List, Passenger List, Maritime Declaration of Health. Examines crew, passengers and International Certificates of Vaccination.

Customs. Manifests, Bonded List, Passenger List, Cargo List, List of Currency, Port Declaration.

Immigration. 3 Crew Lists.

PILOTAGE: Apply for Pilots via local Agents. Send ETA not more than 24 hours prior arrival via Colombo Radio. Vessels telegraph direct to Master Attendant, Galle, via Colombo Radio. Vessels advised listen-in on Channel 16, VHF.

Pilot launch about 60 ft. long with white hull carrying word "Pilot". Pilot launch proceeds to vessels from Master Attendant's Office and Pilot will board about 0.25 mile to South of bell buoy. Vessels should anchor until pilot launch arrives and heave-up on approach of pilot launch; due to heavy swell prevalent *essential* vessels provide good lee for Pilot. Proper pilot ladder and two man ropes should be ready. Vessels anchoring should do so to the South or East of bell buoy. See "Anchorages".

ANCHORAGES: Best anchorage lies to Eastward of bell buoy where depth 9 fathoms. To Southward of bell buoy depth increases to 15 fathoms. Vessels should anchor about 0.5 mile from bell buoy.

RESTRICTIONS: Vessels should not proceed North of bell buoy. Entry prohibited after 1700 hrs. and may be delayed by bad weather. Generally a wind force of over 25 knots and a swell of over 4 ft. delays entry.

MAX. SIZE: At present only 1 stream berth available for vessels of length 475 ft., max. draft 23 ft. in N.E. monsoon and length 450 ft., max. draft 21 ft. in S.W. monsoon.

Two alongside berths available for vessels up to 350 ft. length and 18 ft. draft. 750 ft. of quay space available.

HEALTH: The International Declaration of Health, handed to Master by Pilot, must be completed and returned to Port Health Officer, who boards after berthing. Port Health Officer also requires 2 Crew Lists.

synopsis of Vaccination Certificates, Deratisation Certificate and examines Certificate of Vaccination.
RADIO: Colombo Radio.
TUGS: At present only 1 tug of 250 h.p. available throughout year. If sufficient notice given (over 24 hours) an additional tug could be sent from Colombo (only available during N.E. monsoon). Tug meets vessel at berth, tugs lines used. Charges for tugs included in port (pilotage) charges irrespective of ownership of towing lines.
BERTHING: Vessel berthing in stream lies to both anchors and picks up 4 to 6 mooring lines from buoys aft. To pick up mooring lines, vessel should have ready at stream 2 messenger wires of 2.5 in. diameter and 60 fathoms length.
STEVEDORES: All stevedoring carried out by Government Corporation. Gangs, lighters etc. are all arranged by Port (Cargo) Corporation. 16 lighters of approx. 15 d.w.t. capacity available for working vessels in stream berths.
MEDICAL: Vessels arriving in Galle and requiring medical attention should cable Agent and "Port Health – Galle" at least 12 hours in advance.
DENSITY: 1025.
FRESH WATER: In cases of emergency up to 20 tons fresh water could be supplied daily in stream in 400 gallon tanks conveyed by lighters. Alongside main quay up to 50 tons per night could be supplied by Bowser.
FUEL: Bunkering Division of Ceylon Petroleum Corporation, Kolonnawa (off Colombo) can service vessels with small quantities of fuel. 5 days prior notice required.
GANGWAY/DECK WATCHMEN: Ceylon Police Station. Two policemen aboard every vessel in harbour. For vessels berthed alongside policemen stationed aboard through day. For stream vessels policemen stationed only during hours when cargo worked.
OPENING/CLOSING HATCHES: Shore labour, but there is no objection to hatches being opened prior to labour boarding.
CUSTOMS ALLOWANCE: Present allowance 200 cigarettes per week, 2 bottles beer per day. Others proportionately.
CONSULS: All Consular Officers in Colombo, 72 miles away, 2 hours by train, 2.5 hours by road.
REPAIRS: No repairs possible as Galle open to S.W., essential that vessels have engines ready at all times. No shutdown permitted.
REPATRIATION: Sub-collector of Customs acts as Shipping Master and will sign on/off properly authorised crew changes.
AIRPORT: Colombo.
TIME: Standard Time GMT plus 5.5 hours.
HOLIDAYS: Non-working days in the port (dates variable yearly): Sinhala and Tamil New Year in April; Good Friday, 1st May; Wesak Full Moon in May; 22nd May; 26th September; Christmas Day.
POLICE/FIRE/AMBULANCE: Harbour Police 3222; Ambulance 2261. No fire brigade available.
TELEPHONES: No telephones available aboard.
SHORE LEAVE: Crew allowed ashore.
DEVELOPMENTS: Building of breakwater and all dredging operations stopped indefinitely.

Dredging main quay to 30 ft. deep, and channels to 33 ft. depth.
AUTHORITY: Master Attendant, Master Attendant's Office.

KANKESANTURAI: 09.49 N. 80.03 E.

SHIPMASTER'S REPORT: May 1979.

LOCATION: Kankesanturai (KKS) is situated on the North coast of Sri Lanka in position Latitude 9° 48′ 57.5″ North. Longitude 80° 02′ 41.5″ East.
DOCUMENTS: See "Colombo".
APPROACHES: Kankesanturai cannot be approached directly from sea but is approached via the Pedro Channel. The area seaward of Pedro Channel is very shallow and abounding in reefs.

Approaches to Pedro Channel: The East coast is low lying and sandy with only palm trees. The landmarks for making Pedro Channel are (a) Mullaittivll Light and (b) an obelisk situated in position Latitude 9° 35′ North, Longitude 80° 27.5′ East. Mullaittivll Light was not working and the obelisk which is 100 ft. high can hardly be distinguished because it is surrounded by vegetation. The best approach is to steam on a course of 280° (T) heading straight for the obelisk. (Note: Radar distances etc., could not be observed as the vessel's radar was out of order). This area is covered by BA. Chart Nos. 2197, 2031 and 68A. These charts are not to be fully relied upon as the charts last large correction etc., was in 1947. This vessel did not have a working radar, hence it was decided to lower the boat and sound the intended track ahead. The track sounded was followed until the obelisk was ahead of the track. The track sounded was followed until the obelisk was visible which was in this case at about five miles. Once the vessel enters Pedro Channel it has to proceed on a course parallel to the coast. After altering course in a NW'ly direction the obelisk which is the only mark in the area is soon covered by vegetation and not visible. The next landmark being the Point Pedro lighthouse which is 25 miles away to the North. The objects marked on the chart like churches, buildings etc., cannot be relied upon at all as they are numerous in number.

Depths in Pedro Channel: As marked on the chart the depth in Pedro Channel varies from 6.5 to 9 fathoms. During this vessel's transit, it was suspected in patches to be less and at certain points, the boat was again lowered and soundings of 28 ft. were obtained.

Approaches to KKS: After passing Point Pedro Light course was altered to West keeping about 3 miles off the land and dangers. "KKS" can be observed from quite a distance because of chimneys of a cement factory. The "KKS" lighthouse could also be visually observed at a distance of about 8 miles. When "KKS" lighthouse bore South, distance 2.5 miles, the vessel was stopped and again the boat was lowered to sound the anchorage area and approaches. Depths of 30 ft. to 36 ft. were found just 0.5 miles distance from the land. The anchorage was approached and this vessel anchored with "KKS" light distance 0.5 miles. Four shackles were used and throughout the stay the vessel heldfast.

After anchoring soundings were taken all round the vessel and the least depth obtained was 31 ft. at low water. There is hardly any tide, the maximum difference being about 2 ft. The vessel usually lies in an East–West direction and when swinging around usually does so via North. Only on one occasion throughout the stay did she swing via the South.
RADIO: Communication with "KKS" from even Colombo (telephone) were very difficult, sometimes delays over 4 to 5 hours were experienced. "KKS" has no telex communication. The best method is to keep the vessel's radio station open and communicate via Madras Radio.
CARGO OPERATIONS: *Port of "KKS" and discharging:* This is a complete anchorage port which is only open from March to October. Cargo is bagged on board and discharged into lighters. The lighters are then beached on the beaches and labour carries bags ashore to the warehouse which is about 30 yards away. On this vessel cargo was bagged during the night and discharged by day. There are at one time about 200 – 300 labourers on board. The labour for bagging and discharging are different. The average discharge rate worked out to about 800 tons. This is the first time the bagging had to be done as normally vessels calling are loaded with bagged cargo. The crane operators are very careful and follow the instructions given by the vessel with regard to the cranes. About 12 vessels call at this port per year during the season.
DENSITY: Density was found to be constant at 1025.
FRESH WATER: None available. Ample fresh water needed as water also has to be supplied to the labour.
PROVISIONS: Almost all types of provisions available at reasonable costs. Rice which is also available is of very poor quality. The Agents also handle the ship chandling.
LAUNDRY: Laundry facilities are available, but costs are slightly on the high side. This is also handled by the Agents.
REPAIRS: There is a small workshop available for mechanical/electrical repairs.
GENERAL: "KKS" is a very small town. The largest town being Jaffna which is 14 miles away. Buses and taxis are available.
CURRENCY: All currencies have to be declared and all currencies except Indian, Pakistani and Bangaladesh can be changed in banks. The above three currencies are supposed to be banned in Sri Lanka. Exchange rate was 1 Sri Lanka rupee = 53 Indian Paisa.

TRINCOMALEE (Including Pulmoddai):

08.36 N. 81.15 E.

DOCUMENTS:

International Maritime Declaration of Health.
6 copies Crew List.
6 copies Passenger List.
Smallpox Vaccination Certificates are compulsory.
Cholera or Yellow Fever Certificates required if vessel is arriving from an infected port.

PILOTAGE: Call Pilot on VHF Channel 16, also send ETA via Colombo Radio to pilot station. Vessels should indicate ETA through Colombo Radio, either to Agent or direct to Deputy Master Attendant, Trincomalee, at least 24 hours before arrival. No night pilotage. Pilot boards incoming vessels between hours of 0600 and 1800 hrs. about 2 cables Northward of Round Island (8° 30′ 48″ N. 81° 13′ 24″ E.). Vessels embarking Pilot should whenever possible lower an accommodation ladder; if this is not practicable should let down a pilot ladder and provide 2 man ropes not less than 3 inches in circumference. Vessels awaiting a Pilot should anchor 0.5 miles N.E. of Round Island light tower in depths from 11 to 13 fathoms.

Vessels arriving between 1800 – 2100 hrs. may be brought in at Deputy Master Attendants discretion if they come to anchorage 5 cables N.E. of Round Island.
ANCHORAGES: Trincomalee Harbour is the only entirely sheltered natural harbour in Sri Lanka. Good anchorage may be found in almost any part of harbour in good weather.
RESTRICTIONS: Vessels may enter during hours of daylight only. Range of tide is very small and does not restrict entry.
MAX. SIZE: Almost unlimited length and draft can be accommodated in anchorage. Only 1 berth which can accommodate up to 600 ft. length, and 36 ft. draft. This jetty used for discharging tankers and bunkering.
HEALTH: The Port Health Officer boards vessels after arrival at anchorage to grant pratique. Pratique automatic for vessels arriving from another port in Sri Lanka.
RADIO: All cables to Deputy Master Attendant, Agents, Receivers. etc., should be routed through Colombo Radio; call sign 4 PB.

Pilot carries a portable VHF set. Channel 16, with about 2 miles range.
TUGS: One tug attends when required. Tow-lines generally not used; but if required tug/ship's lines used.
BERTHING: A new bulk-grain berth to accommodate vessels of 800 ft. in length, and draft forward 41 ft. and aft 46 ft. has been completed at Malay Cove, in the vicinity of Round Point and comes into operation in September 1980.
Pulmoddai: Pulmoddai is a roadstead, on the Eastern coast of Sri Lanka and approximately 38 miles from Trincomalee. The loading season is usually from April to September.

The Mineral Sands Corporation has housing for their staff and a medical practitioner is employed by them who also acts as a Port Health Officer for granting pratique to vessels.

The Corporation has two godowns with a capacity of 14,000 tons of rutile and 25,000 tons of ilmenite. Presently ore is transported by conveyor belts from the godowns for lighterage along a pier stretching up to a length of 250 ft. into the sea. The Corporation has a fleet of 8 steel lighters, of which 6 are of 100 tons capacity and 2 of 200 tons capacity. The loading rate is around 2,000-2,600 tons per day working five hooks in good and fair weather.

The stevedore labour is private and is recruited from Trincomalee whenever a ship operates at Pulmoddai. As the stevedores stay on board until completion of loading, it will be necessary for the vessel to carry sufficient water to meet the stevedore requirements.

It is customary for the ship to provide food and accommodation for two Customs Officers and a representative of the Shippers during cargo operations.

Prior information is also essential by the Agents of vessels' ETA, etc., which should be passed to the Plant Manager of the Corporation at Pulmoddai by cable or telex to enable him to obtain labourers from Trincomalee.

There is no launch service, but the Corporation provides a launch on a schedule drawn by the Corporation, and the Agents could make use of this facility.

STEVEDORES: Stevedoring operations have been nationalised and are carried out by the Port (Cargo) Corporation, Trincomalee.

TANKERS: One tanker berth at which vessels of 600 ft. length and 32 ft. draft are discharged.

DENSITY: Salt water.

FRESH WATER: Available, supplied by water lighters and from bunkering jetty.

FUEL: Marine heavy diesel and furnace oil can be supplied at 24 hours notice.

GANGWAY/DECK WATCHMEN: Watchmen are provided by the Port Tally and Security Services Corporation.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCE: Tobacco issued as required. Wine and/or Spirit issued as required.

IDENTIFICATION CARDS: Identity Cards or Passports are required to be carried by crew members ashore.

CONSULS: All Consular Officers are in Colombo.

REPAIRS: Only minor repairs can be carried out.

REPATRIATION: Crew changes and repatriation can be effected.

AIRPORT: No International flights through Trincomalee. Internal service of Air Ceylon operates daily flights between Trincomalee and Colombo.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Dates of holidays are not fixed. Cargo work can generally be arranged on any holiday.

TELEPHONES: Police 308; Ambulance 448; Fire 335. There are no telephone connections for ships.

SHORE LEAVE: Allowed.

AUTHORITY: Master Attendant, Port Commission.

NOTES

Please also advise Shipping Guides Ltd.

Sudan

PORT SUDAN: 19.37 N. 37.14 E.

DOCUMENTS:

Port Sudan Harbour Master's Declaration.
Sudan Customs Declaration.
Quarantine Form.
(All above forms to be filled by Master on arrival).
3 Crew Lists.
3 Passengers Lists.
1 Crew Declaration.
1 Dutiable Stores.
4 copies Manifest.
1 copy B/Lading.
1 Provisions List.

PILOTAGE: 24 hours notice ETA. VHF. Channel 16. Pilot boards South of South Wingate Beacon. Pilotage compulsory.

ANCHORAGES: Towartit Anchorage, approx. 8 km. S.E. of harbour.

RESTRICTIONS: No restrictions providing berth available.

MAX. SIZE: Length 850 ft. Max. draft at Oil Terminal 37 ft., other berths between 28 ft. and 34 ft. 6 in.

HEALTH: Radio pratique obtainable if message sent not more than 24 and not less than 8 hours before arrival to "Quarantine, Port Sudan", with following information: Name of ship and ETA; Name of Agent; Whether surgeon carried or not; Whether illness on board, if so, what illness; Port of departure and last port of call. On receipt the Quarantine Medical Officer will inform ship by wireless whether pratique is granted or not.

RADIO: Port Sudan Radio (call sign STP). Operates daily on High Frequency as follows: 8652 Mcs from 0400 hrs. to 1600 hrs. GMT; 4356 Mcs from 1600 hrs to 0400 hrs. GMT; 500 kcs – continuous listening watch for first 10 minutes of every hour. Radiograms may be handed in at Port Sudan Post Office at all times and at Port Sudan Quays Post Office during office hours.

TUGS: About 1 mile from harbour entrance. Either ship's or tug's lines at Pilot's discretion.

BERTHING:

Berth	Length	Depth	
		Winter	Summer
Nos. 1 to 5 main berths	458 ft.	30 ft.	28/33 ft.
No. 5A	426 ft.	35 ft.	33 ft.
Nos. 6 & 7	606 ft.	35 ft.	33 ft.
Nos. 8 & 9	600 ft.	37 ft.	35 ft.
No. 15	642 ft.	37 ft.	36 ft.
No. 16	230 ft.	37 ft.	35 ft.
Nos. 17 & 18	908 ft.	39 ft.	37.5 ft.

CARGO HANDLING: Grain silo of 50,000 tons capacity situated at Berth No. 15. Heaviest lift normally acceptable is 15 tons; special arrangements necessary for heavier items.

Span of coal transporters is 420 ft.

TANKERS: At berth No. 16, vessels up to 600 ft. length can berth with overhang. Max. draft 34 ft. 6 in.

Berths 17 and 18 accommodate tankers up to 37 ft. draft. Berths connected by pipe-line to refinery 8 km. South of Port Sudan.

Used for discharging crude oil and loading refined products.

STEVEDORES: Require 24/48 hours advance notice of ETA and stowage of cargo. Rate of Discharge and Loading: General cargo, 5 – 10 tons per hook per hour. Bagged cargo, 15 – 20 tons per hook per hour.

Exports. Main exports, cotton, cottonseed, gum Arabic, oilcakes, MOP shells, trocas shells, senna, beans, domnuts, oilseed, hides, skins, salt, beeswax, durra, wheat bran, chick peas, karkadeh, ground nuts, livestock, castor seed and edible oil.

Tea. Following exports should not be stowed with tea: castor-seed, hides, linseed, edible oil, oilcake. Cottonseed may be stowed with tea with separation of 3 ft. but it is preferable to stow in separate compartment from tea.

Cotton. Gum should never be stowed with cotton.

Transhipment cargo. Is normally not accepted at Port Sudan without prior permission, except in very small quantities.

Weight. Deadweight of cargo is expressed per ton of 1,000 kilos.

MEDICAL: Advance notice advisable. Hospital facilities available. Crew and passengers must have International Health books valid.

DENSITY: 1025.

FRESH WATER: Available ex-quay and ex-barge.

FUEL: Marine Fuel oil (normally 1000 secs.); marine diesel oil (42/45 secs.); gas oil (35 secs.). 24/48 hours advance notice advisable. Name of suppliers is required.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Normally by stevedores.

CUSTOMS ALLOWANCE: Tobacco, 200 cigarettes per person. Wine and/or Spirit, 2 bottles of different kinds per person. Only personal requirements may be taken ashore.

IDENTIFICATION CARDS: Not required.

CONSULS: A.R.E. (Egypt) and Nigeria.

REPAIRS: Minor deck and engine repairs.

DRY DOCKS: Slipways for 2 vessels up to 500 tons capacity.

REPATRIATION: Not recommended. Formalities take 2/3 days.

AIRPORT: 3 miles away. Flights twice per day Port Sudan to Khartoum. 2 flights per week Port Sudan to Cairo.

TIME: GMT plus 2 hours. In Summer, GMT plus 3 hours.

HOLIDAYS: The following government holidays will be considered as port holidays. (The dates may vary in other years) January 1st (Independence Day – 1 day), February 19th (Mulid El Nabi – 1 day), March 3rd (National Unity – 1 day), May 1st (Sham el Nassem – 1 day), May 25th (Revolution Day – 1 day), September 3rd-6th (Ramadan Bairam), November 10th-14th (Kurban Bairam), December 1st (Mohammedan New Year – 1 day), December 25th (Christmas Day).

The port will not work on the following days: January 1st (Independence Day), November 10th–14th (First Day Kurban Bairam), December 1st (Mohammedan New Year), February 19th (Mulid El Nabi) May 25th (Revolution Day), September 3rd (First Day of Ramadan Bairam), December 25th (Christmas Day). Overtime will be worked on all other days.

POLICE/AMBULANCE/FIRE: Police 4888; Ambulance 2400; Fire 5922.

TELEPHONES: No arrangements exist for placing telephones on board.

GENERAL: No foreign currency allowed ashore. Crew are permitted to go ashore with any amount Sudanese Currency.

DEVELOPMENTS: Include building 3 berths and 2 wharf faces, completion of a ro/ro berth, and construction of roads, an oil terminal, offices and a container park.

The first development stage includes modification of 2 existing berths to accept ships of up to 50,000 d.w.t. and container vessels, relaying railway track in the port area and asphalting.

AUTHORITY: Managing Director's Office, Sea Port Corporation.

AGENT: May Trading and Services Co., PO Box 17, Port Sudan. Telegraphic address: "Mayo" Portsudan. Telex: No. 6. Tel. (during office hours) 2437; 2029, 2389; after office hours 2652, 2040.

NOTES

Please also advise Shipping Guides Ltd.

Suriname

MOENGO: 05.38 N. 54.25 W.

A bauxite mining town about 70 miles up the Cottica river, a tributary of the Commewijne river, which latter joins the Suriname river at Fort Nieuw Amsterdam.

DOCUMENTS/PILOTAGE/GENERAL INFORMATION: refer to "Paramaribo".

TUGS: Two tugs are available, the larger is 1,750 h.p.

MAX. SIZE: Ships of 525 ft. can be accommodated. Ore vessels call daily. Draft depends on bar draft Suriname river.

BERTHING: Moengo has two piers at which ore is loaded by a transporter at the rate of 800/1,000 t.p.h. One pier is 430 ft. long and has a depth of 24 ft. alongside. Both will accommodate ships of 525 ft. length. Tracks are laid on the 430 ft. pier and a 25 ton crane is available.

PROVISIONS: Not available.

FUEL: Small quantities can be supplied.

FRESH WATER: Small quantities can be supplied.

AIRPORT: About 5 km. from docks.

AUTHORITY: District Commissioner acts as Harbour Master.

AGENT: Alcoa Shipping Co.

NEW NICKERIE: 05.57 N. 56.59 W.

DOCUMENTS:

2 copies Crew List.
2 copies Passenger List.
Customs Documents; Crew Declaration Lists; for instance, souvenirs, electric apparatus, etc.
2 copies Ship's Store Lists.
3 copies Manifests of Import.
3 copies Manifests of Export.
1 copy Transit Manifest.
2 copies Manifests of Coastal Cargo.
Ship's Papers to be shown on request.

PILOTAGE: Pilotage is compulsory for the Nickerie River for ships bigger than 50 gross tons. There is always a Pilot available; ETA to be sent 48 hours before arrival and 12 hours before arrival give necessary correction message to the Agent.

Ships can only enter the river at or about the time of high water.

The Pilot boards near the Sea Buoy (Buoy No. 1). The pilot boat is a small wooden, grey and white painted vessel. The pilot boat does not use the international red-white pilot lights at night. It is possible to make radio telephone contact with the boat (Pilot carries a walkie-talkie VHF equipped with Channel 12). There is a signal lamp on board.

Send ETA-message to Agent who will order the Pilot. Awaiting high water the vessel can anchor about 3 miles N.N.E. of the Sea Buoy.

ANCHORAGES: With a draft of 15 ft. the ship can safely anchor 3 miles N.N.E. of the sea buoy. It is not advisable to anchor in the Nickerie river for a long time, the river is too narrow.

MAX. SIZE: With Spring tide the max. draft must not exceed 14 ft. 9 in. and at Neap tide 12 ft. The vessel has to use the high-inlet while passing the bar.

Max. permissible length of vessel is 130 m. (426 ft.). At low water ships are seated in the mud without consequence to hull, rudder or propeller alongside the wharf. There are berths for oil-carriers.

HEALTH: There is no pratique-procedure. Only in the event of any suspected disease or fever on board a doctor must be called.

RADIO: Send ETA cables to Paramaribo Radio. The pilot office at Nickerie has a radio telephone transmitter. Frequency 8233.9 kHz; listening hours 0700, 1200, 1800 hrs. local time. SSB and VHF equipment also used.

TUGS: No strong tugs available.

STEVEDORES: The Agent orders the gangs (maximum 3 gangs available).

MEDICAL: No advance notice required for medical treatment. There is 1 hospital in Nickerie with a surgeon.

TANKERS: There are 3 piers in Nickerie: Esso, Shell and Texaco pier. Maximum permitted draft 14 ft. 9 in. at Spring tide.

DENSITY: In the dry season the density on the river near New-Nickerie is 1015. In the rainy-season the density is 1005 near HW, and 100 near LW. These all depend upon Spring tide or Neap tide.

FRESH WATER: Fresh water is available alongside the wharf of New-Nickerie. It is loaded from shore by hose.

FUEL: Small quantities of fuel available from Esso or Shell, also grease and petrol.

GANGWAY/DECK WATCHMEN: It is recommended to have a watchman during the night.

OPENING/CLOSING HATCHES: Patent hatches must be opened by the crew, other hatches by the stevedores.

CUSTOMS ALLOWANCE: Captain included: for every 72 hours staying in port: 15 cigars or 60 cigarettes or 30 cigarillos or 150 gm. tobacco plus 0.25 bottle spirits or 5 bottles beer or 1 bottle wine.

IDENTIFICATION CARDS: Not needed.

CONSULS: No consuls in Nickerie.

REPAIRS: Small engine repairs and shaft repairs and some welding repairs can be done.

REPATRIATION: Possible via Paramaribo.

AIRPORT: The airport is 10 miles from the port of Nickerie. 2 times per day there is a flight to Paramaribo arranged by a local company, called S.L.M.

Daily bus service between New Nickerie and Paramaribo.

TIME: Local time is GMT minus 3.5 hours. No alteration in time.

HOLIDAYS: New Year's Day; Good Friday; Phagwa; Queen's Birthday (April 30); Ascension Day; Labour Day (May 1st); Day of Liberties (July 1st); Idul Fitre; Christmas Day and Boxing Day. On these days work can be done by paying overtime.

POLICE/AMBULANCE/FIRE: Police 356; Ambulance 241; Fire 333.

TELEPHONES: No arrangements can be made for a telephone connection on board.

SHORE LEAVE: No restrictions.

DELAYS: Delays in berthing: There are only 2 wharves with a total length of 700 ft. Banana ships have priority. Delays in loading and discharging: there are only 3 gangs of stevedores. These can be enlarged to 5 "small gangs".

DEVELOPMENTS: In the future a bigger and deeper port will be built in the Corentyne river, about 20 miles up the river.

AUTHORITY: District Commissioner acts as Harbour Master.

PARAMARIBO: 05.49 N. 55.09 W.

PORT LIMITS: The seaward boundaries of the port, within which a vessel is considered to be "arrived" is the entrance of the Suriname, Matowijne, Coppename, Corantijn and Nickerie rivers. Laytime commences to count after vessel has anchored or berthed.

On the left bank of the Suriname river about 8 miles above New Amsterdam and 21 miles from light-vessel at river entrance.

DOCUMENTS:

5 Incoming Cargo Manifests (if any cargo), otherwise 3 copies.
1 Cargo Transit Manifest.
4 Outward-going Manifests.

These above-mentioned must be sent ahead to the Agent so that they can be translated into Dutch.

4 Crew Lists.
2 Store Lists.
2 Crew Declaration Lists.
6 Passenger Lists.

PILOTAGE: Compulsory. All ships are requested to amend their estimated time of arrival in local time, at least 12 hours in advance by special message through the wireless station to their Agents or to the Harbour Master. Arrival message should include draft of vessel and other requirements. 6 hours prior to arrival the ETA has to be confirmed and if necessary corrected. The Pilot will be dispatched after receiving the confirmed ETA. As there is no shipping but in the Suriname river, the Commenwijned river, the Cottica river and the Nickerie river, all Pilots except one for Nickerie are stationed at Paramaribo. Paramaribo Pilots board the vessels at the light-vessel of the Suriname river. All vessels have to stop off the light-vessel.

ANCHORAGE: Anchorage off town in 18 – 35 ft. of water at LWS. Government officials board vessels immediately on arrival for inward clearance. Vessels which are required to anchor off the port to wait for berths may be boarded at the anchorage.

RESTRICTIONS: Bar has min. depth of 14 ft. 5 in. Rise neap tide 6 ft. 7 in. spring tide 8 ft. 10 in. Due to the fact that the bar consists of mud, vessels regularly leave the port with drafts between 22 and 23 ft.

RADIO: There is a 24 hours radio telephone service at the Harbour Department on SSB and VHF. The coast station, PZN, also maintains a 24-hour radio telegraph (500 kc.) and telephone service in the 2182 kc. band. The lightvessel *Suriname River* is equipped with VHF Channel 12.

VHF: Harbour office on Channel 12, 24 hours a day. Radio Station "PZN" on Channel 16, 24 hours a day.

HEALTH: Port doctor will visit an arriving ship only if there is a case of contagious disease aboard, or if one of the preceding ports of call has been declared to harbour contagious disease. No bill of health is required. A ship with an infection on board must advise the Harbour Master by special message through the wireless station before arrival.

BERTHING: *O.G.E.M. wharf,* 120 ft. long least depth 18 ft. Oil/gas discharge for public undertakings. Wharf partly dismantled and declared unfit to receive vessels.

B.E.M. wharf, 110 ft. long, least depth 18 ft. Private cement and gravel discharge wharf, Moorings 450 ft. apart.

Banana export pier, 297 ft. long, least depth 18 ft. Fresh water can be supplied.

New Oil terminal, Moorings 570 ft. apart. Least depth 18 ft.

Flour pier, 36 ft. long. Moorings 160 ft. apart. Least depth 16 ft. Only possible to discharge flour with a grain elevator.

Vensur Cement wharf, 180 ft. long, least depth 14 ft. Moorings 600 ft. apart.

New Wharf Ltd., 1,815 ft. long. Least depth 19 ft. at LWS. Fresh water can be supplied.

Belwaarde: 3 miles above Fort Nieuw Amsterdam on the right bank of the Suriname river. Length of pier: 279 ft., least depth 18–20 ft. Loading sugar.

Shell Oil Terminal: Moorings 540 ft. apart. Least depth at LWS 21 ft. exclusively for oil and gas.

MEDICAL: Excellent medical and dental attention is available to crew members of all vessels.

FRESH WATER: The water is of excellent quality. Available at most berths as mentioned above.

FUEL: Ship's bunkers are available in most ports of Suriname in limited quantities. Advice regarding quantities and specifications of oil should be given to Agent's representative immediately after docking.

CUSTOMS ALLOWANCE: 60 cigarettes or 15 cigars or 0.5 lb. of tobacco. One-fifth litre of spirits, one-third litre of wine, 2 litres of beer, for each crew member. All quantities in excess of the above, will be put under seal.

REPAIRS: No facilities for major ship repairs. Local workshops can do repairs of minor nature. There are 2 floating dry docks and 1 floating derrick owned and operated by the Suriname Drydock Co. Lifting capacities dry docks: 400 – 650 tons.

GANGWAY/DECK WATCHMEN: The customs board the vessel while riding at anchor or alongside one of the docks. All vessels are required to make a proper gangway available to the custom boarding officer.

The local authorities assign one or more custom guards to each vessel during its stay in port. The charges for guarding are for the account of the vessel. These officials must be provided with meals on board at regular meal hours, and rooms if necessary.

REPATRIATION: Under special circumstances vessels may sail without all crew members on board (sickness, etc.). The Master furnishes a letter to his Agent authorising him to accept responsibility for the missing seaman or seamen.

CONSULS:

Austria
Belgium
Brazil
Colombia
Denmark
Dominican Republic
Ecuador
Finland
France
Great Britain
Germany (West)
Guyana
Indonesia
Italy
Mexico
Norway
Portugal
Spain
Sweden
Venezuela
U.S.A.

TIME: Local time is GMT minus 3.5 hours. Vessels are required to use local time in ETA messages and when dealing with Agents.

HOLIDAYS: 1st January; Good Friday; Easter Sunday; 1st May (Labour Day); 1st July (Freedom Day); 25th November (Independence Day); 25th and 26th December; Holy Pagwha and Idul Fitre.

SHORE LEAVE: Under normal circumstances no restrictions are imposed by the Government Immigration Authorities on shore leave.

GENERAL: While alongside vessels must maintain engines and propulsion machinery in readiness to leave the pier under full power on short notice. No repairs are permitted which should interfere with this requirement. While alongside, oil tankers should have their offshore anchor out about 50 ft.

All vessels except ships of war, must furnish a statement, of the amount and character of explosives carried, also a certificate to show how they are stored and manner of packing.

Special anchorage areas are provided in the harbour for vessels with dangerous cargo.

All firearms and ammunition must be manifested on store lists and must remain in bond on board during vessel's entire stay in territorial waters of Suriname. Any violation of this regulation renders the vessel subject to fines and confiscation of firearms and ammunition.

BALLAST: Vessels must arrive with sufficient ballast to permit safe handling. All vessels should enter port with clean ballast water that may be pumped overboard while in the harbour, as it is prohibited to pump dirty ballast water or oil residue or sweepings into the harbour.

AUTHORITY: Harbour Master.

PARANAM: 05.38 N. 55.05 W.

Located on left bank of the Suriname River about 40 miles from the entrance, consisting of bauxite mining, alumina refining and an aluminium smelter with facilities for shipping these commodities.

DOCUMENTS/PILOTAGE: and all General Information refer to "Paramaribo."

MAX. SIZE: Vessels up to 40,000 d.w.t. load to outer bar draft (approximately half load) and usually top off at Trinidad.

HEALTH: Health officer does not board unless there are quarantinable diseases aboard.

TUGS: Not generally available.

BERTHING: *General Dock:* Concrete pier of about 350 ft. mooring, 660 ft. apart. Least depth 30 ft. This dock used for loading bauxite or aluminium ingot and for discharging general cargo, oils, caustic and other raw materials.

Alumina Pier: Least depth 30 ft. length 680 ft. Used for loading alumina or discharging oils and caustic.

Equipment: 75 ton Gantry Crane on rails at General Dock.

Loading Capacity: Bauxite at General Dock: 800 t.p.h.
Alumina at Alumina Dock: 850 t.p.h. Loading by conveyor spout trimmed (Telescopic chute).

FUEL: Small quantities of light diesel No. 2 only in emergency.

FRESH WATER: Can be supplied.

REPAIRS: None can be effected.

AIRPORT: At Zanderij, 45 km. from dock.

AUTHORITY: District Commissioner officially acts as Harbourmaster but vessel movements, pilotage, etc. handled by Paramaribo Harbour Master's Office.

SMALKALDEN: 05.38 N. 55.05 W.

A bauxite mining town on the left bank of the Suriname river about 20 miles upstream from Paramaribo.

DOCUMENTS/PILOTAGE: and all General information; refer to "Paramaribo".

TUGS: None available.

BERTHING: Wharf with length of 218 ft. Moorings, 535 ft. apart, least depth 30 ft. Ships can load to outer bar draft. Bauxite loaded by two conveyors with an average of 800 t.p.h.

FUEL: None available.

FRESH WATER: Small quantitites can be delivered by trucks.

REPAIRS: None.

AIRPORT: At Zanderij, 45 km. from dock.

DEVELOPMENTS: New wharf under construction capable of handling ore ships up to 40,000 d.w.t. Moorings 680 ft. apart.

SHIPMASTER'S REPORT: 1978

Documents: Two crew lists, two stores lists and two crew declaration lists.

Customs: Customs board at Smalkalden on arrival and clear vessel. They do not remain on board.

Pilotage: Available and compulsory. Pilot station at Paramaribo.

Anchorage: Safe anchorage available 4 miles North of the sea buoy, depth of water about 30 ft., nature of bottom, mud.

Approaches: Inwards: There is a direction finding station at Paramaribo. Light vessel not on station. The buoy channel is almost non-existant as some buoys have disappeared and have not been replaced. The light buoys are extremely poor.

On entering the river, it was noticed that the propeller stirred up dense mud. The main engine cooling filters became choked even though the high suctions were being used. Top side ballast tanks were then used to discharge ballast and cool the main engine at the same time.

Vessel anchored at Suzannasdaal on passage up river to await tide, and clearance of another vessel which was on the berth. The anchorage was good, vessel used five shackles. Vessel then proceeded up river to Smalkalden but on passing Domburg, heard that the other vessel could not complete on time, so we had to pass the berth and anchor of Chatillon. The river is very narrow at this point and engines were kept on standby to be used when turning in case vessel became too close to the shore. Vessel docked at Smalkalden just before HW.

Outwards: On completion of loading, vessel sailed 2.5 hours before HW Paramaribo and proceeded down river. The vessels draft was 23 ft. 2 ins. and in places the river became very shallow and the vessel slid over mud at various points. The worst place noticed being between beacon "D4" and Buoy No. 12 at Sunoza. The vessel again anchored off Suzannasdaal to await the rising tide 6 shackles in the water as the current was very strong. The vessel later sailed for the sea 3.5 hours before high water at Paramaribo and again touched bottom at various places whilst proceeding towards the sea. The main engine was cooled using ballast discharge for suction which is higher than normal high suction, whilst on passage beacons "R6" and "R10" were extinguished and 6 of the channel buoys were missing, also buoy lights were of extremely low intensity.

Restrictions: Vessels can enter and leave port day and night.

Max. Size: Agent advised that max. draft was equal to: (4.50 m. + height of tide) − FWA of 4 in.

However Pilot advised differently as follows:

Safe loading calculation:
Least channel depth . . . ft.
plus Rise of Tide . . . ft.
equals Safe loading draft . . . ft.

*Least channel depth rising tide (from Neap to Spring tide 4.60 m.)
*Least channel depth falling tide (from Spring to Neap tide 4.35 m.)

Pilot also advises that the FWA from Sea Buoy to Suzannasdaal is practically nil – so do not take FWA into account.

VHF: Pilots and Harbour Office maintain a continuous watch on Channel 12.

Tugs: Not available and not normally required. Should vessel experience difficulties tugs can be called from Curacao.

Berthing: Suriname Billiton Bauxite Berth: Maximum permissible draft varies with the tide. Tidal range 1.16 to 2.39 m.

Maximum permissible length and breadth of vessel not known.

Loading-Discharge Gear: There are two shoots approximately 150 ft. apart which are semi-movable. Loading rate varies between 200 and 600 long tons per hour. Cargo operations continue throughout 24 hours. A gang consists of one foreman and four men.

In addition to the facility at which we berthed, there are general cargo berths alongside the modern quay and a bulk aluminium loading berth with one shoot which is semi-movable.

Density: For the berth, the density is 998. Also see "Max. Size".

Fuel: Not available.

Fresh Water: Delivered by truck with capacity of 7 tons. Delivery is slow and extremely expensive. Arrangements are to be made with the foreman.

Medical: Hospital facilities available.

Shore Leave: Possible, however, crew required on board most of the time as vessel has to be shifted up and down the jetties for loaders.

Gangway: Accommodation ladder not used. Shore ladder is provided.

Provisions: Fresh fruit and vegetables available but of poor quality and very expensive.

Transportation: The town of Smalkalden is about 30 minutes by car from Paramaribo and about 1 hour by bus (taxi fare, 25 Guilders, bus fare 1 Guilder).

Publications: BA. 517 and BA. 99 also South American Pilot Volume 4 No. 7A used. BA Chart 99 does not extend far enough to sea as the sea buoy is not shown on it and the outer anchorage is about 3 to 4 miles outside this buoy. The Pilot informed me that the local Dutch Chart is available from the Harbour Master at Paramaribo and is much more satisfactory.

AUTHORITY: District Commissioner acts as Harbour Master.

Sweden

AHUS: 55.56 N. 14.19 E. (See Plan Book)

DOCUMENTS: See "Stockholm".

PILOTAGE: Pilots meet vessels at Pallagrund. Telegraphic address: "Pilotstation, Ahus". Tel. 044 – 240027. VHF. Channel 16 call sign: "Pilot Station, Ahus." Awaiting Pilot, anchor outside "Pallagrund". Depth 15 – 20 m. (Also see "Stockholm").

ANCHORAGE: Anchorage forbidden in dredged entrance channel.

RESTRICTIONS: No special regulations.

MAX. SIZE: Max. length 160 m., max. draft 7.6 m.

HEALTH: No special regulations.

RADIO: Stockholm Radio (SDI) also VHF, Channel 16 and working Channel. Port radio: Ahus Port Radio keeps watch, Monday to Friday 0800 to 1600 hrs. on VHF Channel 16. Working Channel 11. At other times Ahus Pilot Station.

RADAR/VHF: Radar on pilot station. VHF call sign: Pilot Station, Ahus. Channel 16.

TUGS: 1 tug available with advance notice.

BERTHING: Depth alongside (at MW) as follows:

Berth	Length (m.)	Depth (m.)
Wine Quay	100	4.2
No. 1 – 4	270	5.8
No. 5 – 17	740	7.2
No. 18 – 26A	475	8.2
26B	15	4.2

Depth allowance 0.6 m.

STEVEDORES: Ahus Stuveri AB. Tel. 044 – 240038. Working hours: Monday to Friday 0700 – 1600 hrs. Meal breaks 0845 – 0900 hrs. and 1200 – 1245 hrs.

FRESH WATER: Delivered from pipe-line.

FUEL: Available day and night.

FIRE PRECAUTIONS: No special regulations.

GANGWAY/DECK WATCHMEN: If wanted, watchmen available.

OPENING/CLOSING HATCHES: Normally by the crew.

CUSTOMS ALLOWANCE: See "Stockholm".

CARGO GEAR: 9 shore cranes, capacity 5 – 25 tons.

IDENTIFICATION CARDS: Crew list needed. No cards.

CONSULS: Danish Vice-Consul: Vasagatan 17B, 29153 Kristian-stad. Tel. 044 – 114841. Norwegian Vice-Consul Mast. Bonggatan 2, 29154 Kristianstad. Tel. 044 – 115605.

REPAIRS: Minor repairs only.

DRY DOCKS: No dry dock. Nearest dry dock Solvesborg.

AIRPORT: Nearest airport about 10 miles away. 2 flights per day.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: See "Stockholm".

POLICE/AMBULANCE/FIRE: Police 242030; Ambulance 90000; Fire 90000.

TELEPHONES: 2 public telephones on quays.

AUTHORITY: Port of Ahus.

BROFJORDEN: 58.21 N. 11.25 E. (See Plan Book)

PORT LIMITS: Between "Stretudden" (crude oil berth) and the island "Rixo" in Brofjorden.

DOCUMENTS: Documents required for entry and clearance.

Certificate of Registry, Certificate of Tonnage, Derating Exemption Certificate, 3 Crew Lists, 1 Crew Manifest, 1 Declaration of Bonded Stores. Free pratique will be received via Customs on arrival berth. Oil Pollution Certificate.

PILOTAGE: Pilot station VHF Channel 16 around the clock. Channel 16 for calling only, thereafter changing to an agreed Channel. Call: Lysekils Pilots.

According to harbour regulations VLCC's are requested to give 72 hours ETA, and if any changes 48 and 24 hours ETA.

Product tankers are requested to give 48, if any changes 24 hours ETA.

Position where Pilot will board:

VLCC's	58° 13′ 05″ N.	11° 09′ 05″ E.
Product tankers	58° 15′ 01″ N.	11° 13′ 03″ E.

ANCHORAGES:

VLCC's	East Scaw, 57° 42′ N. 10° 49′ E. Water depth: 26 m. Holding ground: sand, good.

Only for Product tanker (up to 60,000 d.w.t.):

58° 20′ 03″ N. 11° 21′ 00″ E.	Water depth: 28 m. Holding ground: clay, good
58° 19′ 07″ N. 11° 23′ 05″ E.	Water depth: 26 m. Holding ground: clay, good

RESTRICTIONS: *When berthing VLCC:*

Visibility minimum 4 miles, wind force max. 12 m./sec. and current max. 1 knot at the outer buoys (Nos. 1 & 2).

MAX. SIZE: *Crude oil jetty:*

Deadweight:	50,000 – 500,000 tons.
Length overall:	No limit.
Beam restriction:	No limit.
Draft restriction:	25 m. (82 ft.)
Depth of water:	28.0 m. (92 ft.).

Product jetty (Berth 2 and 3):

Deadweight:	50,000 tons.
Length overall:	230 m. (754 ft.).
Beam restriction:	No limit.
Draft restriction:	14.4 m. (47 ft.).
Depth of water:	16.0 m. (53 ft.).

Product jetty (Berth No. 1):

Deadweight:	7,000 tons.
Length overall:	120 m. (394 ft.).
Beam restriction:	No limit.
Draft restriction:	8 m. (26 ft.).
Depth of water:	8.8 m. (28 ft.).

HEALTH: No special papers required. Master informs by radio or on arrival.

RADIO: For ETA cables to Agent and Receivers call Gothenburg Radio.

VHF: VHF stations are installed at the pilot station, the pilot boat, the tug boats and at the Scanraff Harbour office. Scanraff and Lysekil Pilot listen on Channel 16 day and night.

When mooring: the Pilot, Harbour Master, mooring boats and the mooring gangs carry portable VHF sets. Channel 69 is usually used.

RADAR: At the pilot station two radar sets are installed for watching the entrance.

TUGS: *For VLCC's:* Tugs made fast after passage of Dynabrott and Brandskars flak light houses.

For Product tankers: Tugs made fast when passing Bubacka Buoy (opposite crude oil berth).

BERTHING:

Instruments:	SAMI-doppler and current meter at crude jetty.
Salinity:	18 – 34% 0
Current velocity:	0.2 – 0.9 knots at entrance.
Nature of bottom:	Clay.

The crude and product jetties are equipped with quick release hooks. The coaster berth has common bollards.

One Safety Tug-boat is always standing-by within the harbour area in case of emergency. When a Crude Carrier is alongside an additional Safety Tug-boat is standing by.

MEDICAL: Hospital available in Lysekil. No particular inoculations required.

TANKERS: Crude Jetty:

Concrete jetty for tankers of 50,000 to 500,000 tons DW.

Length of jetty-deck: 135 m.

Height of jetty-deck above MWL: 6 m.

Minimum distance between fenders: 96 m.

Height of gangway tower: 27 m.

3×16 in. marine arms for cargo handling.

1×12 in. marine arm for bunker supply (Only Bunker C available).

All 4 arms are equipped with hydraulic operated speed seal couplings, designed for 150 lb-ASA flanges, minimum size 10 in.

Reach capability of arms: Max. 30 m., min. 4 m. above sea level. Max. 11 m., min. 3 m. from berthing line. Drift: 4.5 m. each side of manifold centre line.

Fresh water can be supplied at a rate of 60 t.p.h.

1×4 in. sewer-line connection is located between manifolds on jetty-deck.

Vessel arriving shall have 1 derrick rigged amidships to lift on board carbage-container.

Shore-connected telephone will be placed on board. Telephone number 605 88. Area number 0523.

Telephone number to Scanraff switchbord 604 60. Area number 0523.

Mooring: Vessel is normally moored port side to jetty.

Approach velocity is continously measured by doppler radar and provided to ship's Master/Pilot during berthing operation.

Max. allowed approach speed is shown in "Plan Section".

Communication between jetty-pilot-tugboats and mooring-boats by VHF.

Under normal weather conditions 6 tugboats representing approx. 23,000 h.p. will be used for berthing of VLCCs. Under abnormal weather conditions additional tugboats can be ordered.

2 mooring-boats are provided to assist in line handling.

18 mooring lines are required for safe mooring. All lines to be provided by the ship.

Mooring lines to be arranged in accordance with "Plan" (See "Plan Section"), or as close to as possible.

Combination of synthetic, ropes and wires in the same direction shall be avoided.

Self tensioning winches are not allowed.

All mooring lines will be put on quick release hooks of 150 tons SWL each.

4×10 in. mooring lines are available on jetty-deck for emergency use.

Safety Precautions: Vessel must be safely moored before gangway is placed on board and marine arms connected.

Correct setting of winch brakes to be checked regularly by ship's personnel.

Safety wires to be properly rigged fore and aft.

Cargo handling and/or bunkering will be stopped if wind velocity reaches 17 m./sec. (33 knots) for wind between N.W.-S.W. and during thunderstorms.

If reaching the above limit: Stop discharging/bunkering, drain and disconnect all arms. Close all tank lids and ullage plugs. Tugs to be ordered to ship's side.

2 safety tugboats are always available in Brofjorden Harbour, while a crude carrier is alongside the crude jetty.

The Harbour office together with the ship's Master will decide on approach actions to be taken.

Product Jetty: (Berth 2 and 3)

Berth No. 2:	1×12 in. (F.O. No. 4 and F.O. No. 5).
	1×12 in. (F.O. No. 4, F.O. No. 5 and ballast).
	2×10 in. (F.O. No. 1 and diesel oil).
	1×10 in. (Premium gas).
	1×10 in. (Naptha and regular gas).
Berth No. 3:	1×12 in. (F.O. No. 4 and F.O. No. 5).
	1×12 in. (F.O. No. 4, F.O. No. 5 and ballast).
	2×10 in. (Diesel and fuel oil No. 1).
	1×10 in. (Premium gas).
	1×10 in. (Regular gas).
	1× 4 in. (TML).

Potable water and bunker oil are available at all berths.

A 4 in. sanitary sewer line is available at all berths and dry garbage can be left ashore (free of charge) in containers placed between berth No. 2 and 3.

Product Jetty: (Berth 1)

Size	*Flange rating*	*Service*
6 in.	150 lb ASA	Prem. gas, reg. gas.
6 in.	,,	Diesel, F.O. 1.
8 in.	,,	F.O. 4, F.O. 5 Ballast.
8 in.	,,	Sulphur.

Max. discharge rate at Crude Oil Jetty 18,000 cu.m. per hour. Max. pressure allowed 10 kilos. Max. loading rate at Product Jetty 1,500 cu. m. per hour. Max. pressure allowed 10 kilos.

Both Crude and Product Jetty have 4 in. 150 lbs sanitary sewer and 4 in. 150 lbs potable water connections available which may be used by running hose from ship.

All arms are hydraulically operated except those at the Coaster Jetty. No hoses are allowed for oil handling.

Ballast water can be discharged at Product and Coaster Jetties.

FUEL: Bunker C only is available at Crude Oil Jetty. Bunker C and diesel oil are available at Product Jetties and the Coaster Jetty.

FIRE PRECAUTIONS: A special Fire Instruction will be given on board on arrival.

POLLUTION: Oil pollution prevention. A special instruction will be given on board on arrival.

CONSULS: Denmark, Finland, Holland, Norway and Germany have consuls in Uddevalla, 40 km. from Scanraff.

REPAIRS: Uddevallavarvet and Skandiaverken. For hull and engine repairs, harbour and voyage service.

Pemco: For construction work, mechanical erection and repairs.

Andersson & Callenberg: For electrical installations.

Engine repairs must be reported to Port Captain for permission.

DRY DOCK: Gothenburg, capacity 250,000 tons.

SURVEYORS: Det Norske Veritas and Lloyds.

GANGWAY/DECK WATCHMEN: The crude oil jetty has gangway tower. But accommodation ladder is necessary in the product harbour.

Watchman is compulsory at the Crude Oil Jetty. At the Product Jetty watchman is available on request.

CUSTOMS ALLOWANCE: 1 bottle spirit and 200 cigarettes or 200 grams tobacco.

REPATRIATION: Changing of crew and any necessary repatriation is possible.

AIRPORT: Nearest airport is Gothenburg, 100 km. South of Lysekil.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

POLICE/AMBULANCE: Dial 90 000 and ask for necessary service.

TELEPHONES: A telephone can be connected on board if ordered through Agent or jetty operator. Telephone numbers: Alarm central 90 000 (Ask for ambulance, police etc. Can be in action within 10 minutes); Safety tug-boat 608 33; Lysekil Pilot 608 00; Scanraff switchboard 604 60; Product berth No. 1: 608 76; Product berth No. 2: 602 41; Product berth No. 3: 602 34. A slot telephone is also available in the gate house.

SERVICES: Compass adjusting is available. Local shipchandler available.

SHORE LEAVE: Crew members are allowed ashore. No identification card or passes are needed.

REGULATIONS: The Harbour Regulations will be placed on board on arrival.

GENERAL: At the Crude Oil Jetty there is a refuse container to be lifted on board by means of the ship's gear. At the Product Jetty are 2 containers, which will remain ashore. These containers are free of charge to the ships.

AUTHORITY: Skandinaviska Raffinaderi AB, Scanraff.

GAVLE: 60.41 N. 17.11 E. (See Plan Book)

PORT LIMITS: A line from Utvalnas (approx. 60° 45.2′ N. 17° 21.4′ E.) over Bakharen to Langharen (approx. 60° 41.0′ N. 17° 17.5′ E.).

DOCUMENTS:

4 Crew Lists (for European vessels).
2 Crew Lists (for other vessels).
2 Manifests.
2 Bills of Lading.
1 Tobacco List.
1 Stores List.

Following documents supplied by Agent and signed by Master:

On arrival from foreign port:
1 Maritime Declaration of Health.
4 Report of Arrival (customs).
1 Declaration of Master (of persons on board).
1 Declaration of living animals (if any).

On arrival from any port:
1 Report of Arrival (Harbour Office).
1 Report of Receivers (Harbour Office).
1 Cargo List (or Manifest).
1 Transfer.

On departure to foreign port:
4 Report of Departure.
1 Declaration of Master (of persons on board).

On departure to any port:
1 Report of Shippers (Harbour Office).
1 Declaration by foreign Master.

PILOTAGE: *(a)* Sea Pilots: Pilot station: Bonan Telephone Nos. 991 10 and 992 20. Telegraphic address: Pilotstation, Gavle. 5 hours advance notice of ETA pilot station. Notice of ETA can be given over any Swedish coastal radio station or free of charge on VHF over any Swedish pilot station or Grundkallen lighthouse.

VHF: Channels 16: Calling and Safety } Pilot station and
13: Pilotage traffic } Pilot boats.

All pilot boats orange. International signals for calling pilot. Pilot boards: S.E. of Grasjalsbadan 60° 43′ N., 17° 27′ E., and on request South of Eggegrund Lighthouse, 60° 43′ N., 17° 34′ E. In case of bad weather closer to pilot station. Anchorages: Graberget roadstead N.E. of Bonan Lighthouse (approx. 60° 44.8′ N. 17° 20.5′ E.), about 350 m. (0.2 m.) from shore and in 18 – 21 m. (10 – 13 fathoms) deep. Open for Easterly winds. *(b)* Harbour Pilots: Available for moving within harbour area on application to Port Administration, Telephone Nos. 12 49 10 or 11 31 56 or by VHF to Gavle Port Radio, Channels 16, 14 and 13.

ANCHORAGES: See "Pilotage". Outer roadstead situated inside of Northern entrance and in red sector of Fredriksskans light. Outer roadstead well protected, depth of 15 – 11 metres (8 – 6 fathoms). Anchoring forbidden:

(a) In dredged channel between lights in Northern channel and to a point 800 m. (875 yds.) W.S.W. of Light No. 4.

(b) In white sector of Fredriksskans light E.N.E. within a distance of 2,000 m. (2,190 yds.) from same.

(c) In navigable channel from Fredriksskans Light to Gavle Dolphin Light.

(d) In Fredriksskans Harbour basins.

(e) In Gavle River from berth No. 18 to berth No. 10.

RESTRICTIONS: Two fairways lead to harbour. Northern fairway is 11.0 m. (36 ft. 01 in.) deep and has bottom width of 60 m. (196 ft. 11 in.) Day-time: max. draft 10.5 m. (34 ft. 5 in.); max. length 220 m. (722 ft.); max. breadth 30 m. (98 ft.). Night-time: max. draft 7.45 m. (24 ft. 3 in.); max. length 172 m. (565 ft.). Southern fairway (daylight only) permits draft of 3 m. (9 ft. 9 in.). All depths are referred to mean water level. Ships on way from outer roadstead or passing from Fredriksskans Harbour to Inner Harbour shall give way to vessels proceeding in opposite direction. This shall not apply to vessels with tow unless vessel approaching also has tow.

MAX. SIZE: Max. permissible draft (at mean water) as follows:

Fredriksskans Harbour	*Max. Draft* m.	ft. in.	*Real depth* m.	*Allowance* m.
Oil berth No. 21	10.5	34 05	10.9	0.4
				Max. length 220 m. (722 ft.)
Oil berth No. 1	7.45	24 05	7.8	0.35
				Max. length 200 m. (656 ft.)
Oil berth No. 2 – 3	5.3	17 05	5.5	0.2
Berth No. 4 – 8	7.45	24 05	7.8	0.35
Berth No. 9 – 14	9.0	29 06	9.4	0.4
Inner Harbour (River Gavle and Nyhamn)				
Berth No. 25 – 38	4.7	15 05	5.0	0.3
Berth No. 8 – 23			4.85	0.15
Karskar				
Berth No. 105 – 106	6.6	21 08	6.9	0.3
Length 195 m. (640 ft.)				
Berth No. 107 – 108	7.9	25 11	8.2	0.3
Length 196 m. (640 ft.)				
Berth No. 109	4.7	15 05	4.9	0.2
Length 90 m. (295 ft.)				
Berth No. 110, South end.	4.7	15 05	4.9	0.2
Length 35 m. (115 ft.)				
Berth No. 110, North end.	6.1	20 00	6.4	0.3
Length 75 m. (246 ft.)				

Terminal Granudden: See "Cargo Handling".

HEALTH: Pratique always automatic. If any suspected disease or fever on board, notify ship's Agent.

RADIO: Harnosand Radio (SAH).

RADAR/VHF: No port radar service, but Bonan Pilot Station, Eggegrund Lighthouse, and one pilot cutter equipped with both radar and VHF and assists any ship approaching pilot station on request. After calling pilot station on VHF Channel 16, ships will be given assistance on Channel 13, 12, or 6.

TUGS: Join vessel outside Fredriksskans Lighthouse or outside Korsnas Works for berthing, and outside Northern entrance channel for passage through same. Ship's lines always used.

CARGO HANDLING: Container berth, max. draft 9 m. Three cranes with 30-ton capacity, two of which have automatic container spreaders for 20 ft. containers.

Roll-on/roll-off berth, max. draft 4.7 m.

Terminal Granudden: A new port terminal at Granudden which is situated opposite Fredriksskans Harbour. The terminal comprises of 350 m. of quay with a Roll-on/Roll-off berth, having max. draft for vessels: 9.0 m. for length of 150 m. adjacent to the Roll-on/Roll-off ramp and 10.5 m. for length of 200 m., 2 warehouses each having an area of 22,000 sq.m., as well as extensive storage space. The total terminal areas is 150,000 sq.m. and it will have an annual maximum capacity of 1.2 million tons forest products. The terminal has very good connections with both main roads and the railway system.

STEVEDORES: 24 hours notice (if possible) order arrange gangs.

MEDICAL: Notice of medical attention to Agent as early as possible. All kinds of medical and hospital facilities available. Smallpox vaccination required on arrival from non-European ports. Other vaccinations necessary on arrival from diseased area. (Common for all Swedish ports.) Quarantine Station established at Gavle with Quarantine Anchorage on outer roadstead.

TANKERS: *Tanker Berth No. 21:*
Max. length 220 m. (722 ft.). Max. draft (M.W.) 10.5 m. (34 ft. 5 in.).
Manifold connection size (all grades) 200 mm. (8 in.).
Berth to Depot pipe-line size:

	mm.	in.
Heavy Fuel Oils	450	18
Gas Oil	400	16
Gasoline	350	14
Kerosene	250	10

Tanker Berth No. 1:
Max. length 200 m. (656 ft.). Max. draft (M.W.) 7.45 m. (24 ft. 5 in.).
Manifold connection size:

	mm.	in.
Fuel Oils	250	10
Gasoline	200	8
Kerosene	200	8

Berth to Depot pipe-line sizes:

	mm.	in.
Fuel Oils	350	14
Gasoline	300	12
Kerosene	250	10

Tanker Berth No. 2 and 3:
Max. length 125 m. (407 ft.). Max. draft (M.W.) 5.3 m. (17 ft. 5 in.).
Manifold connection size (all grades) 150 mm. (6 in.).
Berth to Depot pipe-line sizes (all grades) 150 mm. (6 in.).

Tanker Berth No. 105-106:
Max. length 195 m. (640 ft.). Max. draft (M.W.) 6.6 m. (21 ft. 8 in.).
Manifold connection size (all grades) 200 mm. (8 in.).
Berth to Depot pipe-line (all grades) 250 mm. (10 in.).

Tanker Berth 107-108:
Max. length 195 m. (640 ft.). Max. draft (M.W.) 7.9 m. (25 ft. 11 in.).
Manifold connection size (all grades) 200 mm. (8 in.).
Berth to depot pipe-line (all grades) 250 mm. (10 in.).

New Tanker Quay K201:
Max. length 220 m. (722 ft.). Max. draft 10.5 m. (34 ft. 5 in.).
Owned by Krangede A.B.

DENSITY: Fresh water.

FRESH WATER: Delivered from water posts at all quays in Fredriksskans Harbour. Inner Harbour, at Korsnas Works and on roads fresh water delivered by water boat.

FUEL: All kinds of fuel oils available either from pipe-lines at oil berths or by lorries at all other quays. Following viscosities (Redwood I) normally in stock: 35, 225, 650, 1500, and 3500 secs. Other viscosities can also be delivered. Notice of delivery is required day before.

GANGWAY/DECK WATCHMEN: Available, but not compulsory.

OPENING/CLOSING HATCHES: Can be done by either crew or stevedores. Only patent hatches have to be opened by crew.

CERTIFICATES:
Tonnage Certificate.
Derat Certificate (Not older than 6 months).
Certificate of Nationality (for Swedish ships only).

CUSTOMS ALLOWANCE: Tobacco: each crew member 200 cigarettes or 100 grammes of tobacco out of Bond.

Wine and spirit: Each crew member 1 bottle (75 centilitres) of spirit and moderate quantities of wine and beer out of bond. After a week in Sweden the same quantity may be taken out on request to Customs Office.

IDENTIFICATION CARDS: Not needed.

CONSULS:
Denmark
Finland
France
Great Britain
Netherlands
Norway
Portugal

REPAIRS: The former shipyard Gavle Varv carries out all types of deck and engine repairs along fitting-out quay 200 m. (656 ft.) long, with water depth 3.8 m. (12 ft. 6 in.) and with max. draft 3.65 m. (11 ft. 11 in.) at mean water. One 10-ton luffing crane. Another berth along South side of former slip-way with water depth 5.9 m. (19 ft. 7 in. and maximum draft 4.7 m. (15 ft. 5 in.) at mean water also available. Repairs can also be carried out in all parts of harbour.

DRY DOCKS: None.

REPATRIATION: Crew changes and repatriations arranged by Agent.

AIRPORT: Stockholm Airport (Arlanda) 145 km (90 miles) served by regular airlines. Rorberg airport 16 km. (10 miles). Regular traffic to Swedish airports.

TIME: GMT plus 1 hour in Winter. Summertime (6th April – 26th September) GMT plus 2 hours.

HOLIDAYS: New Year's Day (Jan. 1st); Twelfth Day (Jan. 6th); Good Friday; Easter Day; Easter Monday; First May (May 1st); Whit Sunday; Whit Monday; Midsummer Day (Saturday nearest to June 24th); All Saints' Day (first Saturday in Nov.); Christmas Day (Dec. 25th); Boxing Day (Dec. 26th).

POLICE/AMBULANCE/FIRE: Police 11 53 00; Ambulance 12 90 90; Fire 12 90 90. Emergency 90 000.

TELEPHONES: Fredriksskans and Inner Harbour: Telephones can be placed on board at all berths in Fredriksskans Harbour and at three berths in Inner Harbour. At Korsnas Works: Telephones can be placed on board at two berths in Karskar and one at Kastet Pier.

SERVICES: *(a)* Minor quantities of oil and other liquid residues can be discharged into tank lorries with special suction equipment (approx. 6 cu.m. = 210 cu.ft. per lorry). *(b)* Compass adjusting by licensed adjusters. *(c)* An area for compass adjusting is established on outer roadstead. *(d)* Speed trails can be made on measured mile between Eggegrund Lighthouse and island of Limo

DELAYS: Normally no delays in berthing, loading, discharging or bunkering.

DEVELOPMENTS: New shipping terminal for coal and coke where discharging capacity will be very high.

AUTHORITY: Gavle Hamn (Gefle Port Authority).

GOTHENBURG: 57.42 N. 11.57 E. (See Plan Book)

DOCUMENTS:
3 Cargo Declarations (IMCO model).
4 Crew Lists.
3 Passenger Lists.
2 Tobacco Lists (must be signed by each Crew member).
1 Stores List.
1 Health Document.
Ship's Papers.
Nationality Certificate.
If stay more than 48 hours, Articles to Consulate.
Manifests, Bills of Lading.

PILOTAGE: Cable address: 404 47 Vinga. Vessels with VHF equipment may contact on international call frequencies 156.8 Mc/s. (Channel 16). Working frequencies for Sea Pilots 156.65 Mc/s. (Channel 13) and for Harbour Pilots 156.6 Mc/s. (Channel 12). Pilot station located at Vinga Lighthouse. Sound or light signal G towards Vinga lookout. Pilot boat located outside Trubaduren Lighthouse, where Pilot taken on board. Approved pilot ladder, if rail is high accommodation ladder, heaving line, and a man standing-by to receive Pilot. (Also see "Stockholm").

ANCHORAGE: At Rivo Fiord and Dana Fiord. VLCC's anchor 2 miles S.W. of Trubaduren Light.

MAX. SIZE: Torshamnen, water depth 64 ft. 4 in. (19.6 m.). Tankers of 225,000 d.w.t. received. Skarvik Harbour, water depth 42 ft. (13 m.). Tankers up to 50,000 d.w.t. Skandia harbour, general cargo, container vessels, water depth up to 39 ft. (12 m.). General cargo harbours: for other cargo and passenger vessels 39 ft. (12 m.). Water depth at MWL. Tide of no importance.

HEALTH: The Master of every ship, whose voyage has touched lands outside Europe (excepting U.S.A., Canada, Azores, Canaries, Madeira and Morocco), and who within 28 days arrives at Gothenburg from a port in any such land, shall submit to Customs on demand a Declaration of Health for the ship in the prescribed form. If ship arrives within 14 days of calling at any such port she must not touch land until inspected by the Quarantine Medical Officer and permission to land granted. Master must be prepared to state whether all persons on board possess internationally valid evidence of inoculation for smallpox. Compulsory medical examination not required where a ship liable to inspection has undergone an approved Quarantine Inspection in either a Danish, a Norwegian or a Finnish port, and all questions in the Declaration of Health have been answered negatively. Exemption may also be granted to any other ship which would otherwise be liable for examination, if Master, pursuant to Article 21 of Quarantine Regulations for Sweden, has previously radioed all information regarding state of health on board to Health Authorities (radio-pratique). Telegraphic address: "Portsan, Gothenburg". Messages must be made not less than 4 hours prior to ETA. (Preferably, messages should not be made during night). Free-pratique messages should include: Name of the ship; estimated time and day of arrival; number of crew; number of passengers; information as to whether all persons on board possess valid certificates of vaccination for smallpox (issued within the last 3 years); names of the last two ports called at outside Europe, and dates of departure therefrom; replies to the 6 questions contained in Declaration of Health.

RADIO: Goteborgs Radio, call sign SAG.

TUGS: Tugs normally join vessel between the island Nya Alvsborg and Rya Nabbe. Vessels use their own lines. Tugs join at Dana Fiord for tankers bound for Torshamnen.

BERTHING: No restrictions at any time of day and night. VLCC's berth in daylight only.

BRIDGES: Alvsborg Bridge (suspension bridge) in Western part of city, clearance 147.5 ft. (45 m.). Gotaalv Bridge in centre of city, clearance 64 ft. (19.5 m.). Ships should give three long blasts with whistle for bridge to be opened. If opening not required they have to give one long and one short blast. It is possible to contact Gotaalv Bridge on frequency 156.80 Mc/s. (Channel 16). Working frequencies are 156.70 Mc/s. (Channel 14) and 156.60 Mc/s. (Channel 12).

STEVEDORES: Goteborgs Stuveri AB: Provides dock workers.

CONTAINERS: The Skandia Harbour for container handling with 4 terminals including 15 berths and 9 ferry ramps. Depths up to 39 ft. 04 ins. (12 m.).

TANKERS: One berth for discharging of crude oil with draft of 62 ft. 6 in., and lines 12 in. and 16 in.

		Permitted draft at MWL	*Lines diameter (in.)*
Tors Harbour	1 berth for disch. crude oil.	52 ft.	12 & 16
Skarvik Harbour	1 berth for disch. and loading.	40 ft. 6 in.	10
	4 berths for disch. and loading.	31 ft.	8
Rya Harbour	4 berths for disch. and loading.	31 ft.	8
In Oil Harbour	18 berths for coast-distribution.		

Reducing pieces available in Oil Harbours.

DENSITY: Average density 1030. Tide of no importance.

FRESH WATER: Available from quay or water boats.

FUEL: All grades available at short notice.

GANGWAY/DECK WATCHMEN: Watchmen accepted by Harbour and Fire Authorities on tankers and vessels loaded with explosives. On other vessels not necessary.

OPENING/CLOSING HATCHES: By crew or stevedores.

CUSTOMS ALLOWANCE: Tobacco, per week 200 cigarettes or 250 gram other tobaccos. Wine and/or Spirits, per week 1 bottle of spirits and 1 litre of wine, alternatively 2 litres of wine.

Require report latest 24 hours prior to arrival, and re-confirmation of arrival time latest 2 hours in advance.

CARGO GEAR: Certificates that equipment is approved.

IDENTIFICATION CARDS: Not necessary. Crew list to be furnished in the oil harbours.

TELEPHONE: For placing a telephone on board cost is 42 crs., and 15 crs. a day for hire.
SHORE LEAVE: Crew members allowed ashore.
AUTHORITY: Halmstad Hamnforvaltning.

HARGSHAMN: 60.10 N. 18.29 E.

The port is situated in the Archipelago of Oregrund, about 130 km. North of Stockholm and about 110 km. South of Gefle. Only iron ore products are exported, and the port is managed by the shippers, AB Dannemora Gruvor. It is a natural and well sheltered harbour, suitable for vessels up to about 25,000 d.w.t., bigger vessels are loaded with limited cargoes.
DOCUMENTS: ETA is to be given 48 and 24 hours in advance by cable or phone to "Oreship Uppsala". On arrival a cargo-plan is to be given to the Agent or foreman, stating quantity required and loading-rotation of hatches, as well as estimated draft on sailing.
The Customs Officers require the following documents on arrival.
Tonnage Certificate (Certificate of Registry).
Certificate of Nationality.
Swedish Light Dues receipts for current year.
Crew List IMCO FAL Form No. 5, 3 copies
Crew's effects declaration IMCO FAL Form No. 3, 1 copy
Ship's stores declaration IMCO FAL Form No. 4, 1 copy.
If the international IMCO Forms are not available, similar Forms are accepted.
PILOTAGE: It is not compulsory to engage a Pilot except for tankers and other vessels carrying dangerous cargoes. Entry without a Pilot is not recommended and should not be attempted without the most detailed local knowledge and previous experience of the port. Pilotage dues will only be charged if a Pilot is actually employed.
Pilot is embarked off Svartklubben lighthouse (60.09 N. 18.52 E.) and has to be ordered 5 hours before needed. Pilot can be ordered via the Agent, the Svartklubben Pilot Station, phone: Hallstavik (0175) 100 06. Cable: "Pilotstation Hallstavik" or by VHF at any of the Swedish pilot stations. Distance to Hargshamn is about 17 miles. For vessels arriving from ports in Gefle district, Pilot will board on request at Oregrund or North thereof, such request to be made as above.
RESTRICTIONS: Loaded vessels with draft over 23 ft. 6 in. at MWL are navigated in daylight and good visibility only.
MAX. SIZE: Max. draft allowed (at MWL in FW) 34 ft. (10.4 m.). Density of water: 1,006. Max. length about 575 ft. (175 m.). Max. breadth about 80 ft. (24.4 m.). The breadth limitations may be increased in the case of ore-carriers with side tanks. Max. distance water level to hatch coamings about 33 ft. (10 m.).
TUGS: A steam tug of 800 h.p. is available from Hallstavik, and is normally used to assist vessels over 9,000 d.w.t. on departure only. A small tug of 230 h.p. is available at the port.
BERTHING: There is an ore quay about 90 m. in length and depth alongside of 36 ft. The loading conveyor moves along the quay over a distance of 85 m., therefore only the biggest vessels have to shift during loading. Loading capacity 650 – 800 t.p.h. Stowage factor of the ore 17 – 18 cu. ft./ton and concentrate about 13 – 14 cu.ft. per ton.
STEVEDORES: Work is effected in 2 shifts: 0600 – 2200 hrs., Saturdays and days before holidays 0600 – 1200 hrs. Work on night shift and on Sundays/holidays can be arranged on request. However, on the following holidays work cannot be arranged: New Year's Day, Good Friday, Easter Eve, Easter Sunday, 1st May, Whitsun Eve, Whit Sunday, Midsummer holidays (last Friday/Sunday in June), All Saint's Day (1st Saturday in November), Christmas Eve, Christmas Day, New Year's Eve.
FRESH WATER: Available.
CUSTOMS ALLOWANCE: 100 cigarettes per man and 1 bottle of spirits per officer.
ICE: The port can be kept open all Winter by an ice-breaking tug. Normally there is ice from the last week of December until the last week of March/first week of April. In port and the entrance there is fast ice up to 1.5 – 2 ft. Navigation is maintained in a broken ice-channel. At the pilot station or in the Aland Sea there is very seldom packed ice or other difficulties during a normal Winter.
AUTHORITY: AB Dannemora Gruvor.
AGENT: Bjorsbo Shipping HB, S-740 73 Hargshamn. Tel: Osthammar 0173-200 80. Telex: 76042. Telegrams: ORESHIP UPPSALA.

HARNOSAND (Hernosand): 62.37 N. 17.58 E.

DOCUMENTS:

2 Crew Lists and/or 2 Passenger Lists (stating what tobacco, cigarettes or spirits each man has in their possession).
Deratification certificate.
Manifest and/or Bills of Lading.
Register, and if vessels before in Sweden same year, bills for light dues paid.

PILOTAGE: Applications for licensed Pilots should be made at least 5 hours before arrival. When making application, specify name of vessel, tonnage, draft and destination. Also give estimated time for taking Pilot on board and route. If this procedure not followed, the Maritime Service cannot guarantee to supply a Pilot without considerable delay to vessel.

Preferable to make application by telephone or by radio via a coastal station or by some other method direct to pilot station. Also possible request Pilot by VHF.

Pilot station at Harnoklubb.

ANCHORAGES: In port approaches in depth of 15 to 40 m.
RESTRICTIONS: Harbour can be closed by ice some time during Winter but assistance given by State Ice-breakers as long as possible.
MAX. SIZE: Up to 32 ft. 5 in. draft.
RADIO: Cable Agents to give ETA, draft and cash required via either Hernosand Radio SAH or Stockholm Radio SDJ.
HEALTH: Vessels arriving from ports outside Europe must, for inward clearance, provide Customs Officer with written declaration of freedom from infection. Further instructions will be issued by Customs Office where such a declaration cannot be given.
TUGS: Tug assistance is available.
BERTHING: Depth alongside main quays from 7 to 8 m.
TANKERS: Oil pier, depth alongside 10.50 m.
DENSITY: Nearly fresh water.
FRESH WATER: Available from the quays or by barge.
FUEL: Can be supplied.
GANGWAY/DECK WATCHMEN: Available for gangway. Not compulsory.
OPENING/CLOSING HATCHES: Normally done by crew.
CUSTOMS ALLOWANCE: 200 cigarettes and one bottle of 75 centilitre per man/week. Extra granted on request.
CERTIFICATES: See "Stockholm".
IDENTIFICATION CARDS: Not necessary.
REPAIRS: Most repairs possible.
DRY DOCK: At Gustavsvik.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: New Year's Day; Epiphany; Good Friday; Easter Monday; Labour Day; Ascension Day; Whit Monday; Midsummers Day; All Saint's Day; Christmas Day; Second Christmas Day.

Working ceases at 1130 hrs. on the following eves of holidays and is voluntary and paid with 100 per cent overtime: Easter Eve; Whitsun Eve; Midsummer's Eve; Christmas Eve and New Year's Eve.

POLICE/AMBULANCE/FIRE: Telephone numbers: Accidents, Police, 90000; Fire: ask for alarm 90000.
AUTHORITY: Harnosands Hamn.

HELSINGBORG: 56.03 N. 12.41 E. (See Plan Book)

DOCUMENTS: See "Stockholm".
PILOTAGE: Call Pilot on the VHF Channel 16. Pilots board about half nautical mile off jetty of Helsingborg Northern Harbour. Good anchorage within area of about half nautical mile off jetty.
ANCHORAGES: Areas as above, depths of water 50 – 70 ft.
MAX. SIZE: Permissible length about 220 m.; breadth unlimited; draft 34 ft. on MLW. No tides but certain variations following prevailing winds.

Tankers: Max. draft 10.5 m.

HEALTH: Pratique automatic for all vessels arriving from non-infected ports. In cases where pratique should be obtained, notice to be given through ship's Agent. Further directions given by Pilot.
RADIO: For communication – Goteborgs Radio.
VHF: 24 hour watch on Channel 16. Call sign "Helsingborg Harbour", working Channels 11 and 12. Ships to contact the harbour 1 hour before arrival and 1 to 1/2 hour before departure.
Pilots: Channel 16, working Channels 13, 14 and 69.
Tugboats: Working Channels 11, 12 and 69.
TUGS: Join vessel outside entrances. Vessel's lines used.

3 tugs available, up to 2,640 h.p.

BERTHING: Basin No. 1, depth 6 m.
Basin No. 2 depth 5 to 7.3 m.
Basin No. 3 depth 5 to 7 m.
Basin No. 4 (Ocean Terminal), depth 8 to 10 m.
Basin No. 5 (Tanker Terminal), see "Tankers".
Basin No. 6 depth 10.5 m.
Basin No. 7 (Skane Container Terminal), depth 8 and 11.5 m.
Basin No. 8 (Copper Mill Harbour), depth up to 11.5 m.

CRANES: 35 cranes with capacity up to 45 tons. 2 container cranes (45 tons each), 2 transtainers (30 tons each) and 2 multipurpose cranes (30 tons each).
BULK CARGO FACILITIES: 2 berths of 215 m. length for grain and fertilizers, max. draft 9.9 m.
SPECIALISED CARGO HANDLING FACILITIES: Complete container terminal "Skane Terminal" with 540 m. berths and 2 Ro/Ro berths, max. draft 11 m. There are a total of 10 Ro/Ro berths in the port. All types of handling equipment. Liquid chemicals handled at the tanker terminal.
STEVEDORES: Cargo handling performed by "Skaneterminalen AB" offering all kind of harbour works including loading, discharging, warehousing, etc.
MEDICAL: For attention, application to be made through ship's Agent. Hospital facilities available.
TANKERS: Dimensions of pipe-lines – for oils, 14 in., 12 in., 8 in., petrol, 12 in., 10 in., 6 in., slops, 6 in. Discharge facilities for slops through pipe-lines from berths numbers 503, 504 and 505. Tankers berth at quay numbers 503 and 504 with depth of water alongside 36 ft. MLW, and quay number 505 depth of water alongside 26 ft. MLW.
DENSITY: 1007. No tides, but slight variations in accordance with prevailing currents.
FRESH WATER: Available for quay connections.
FUEL: Bunker fuel delivered from pipe-lines. No advance notice required. Any grade available.
FIRE PRECAUTIONS: Standard procedures apply.
GANGWAY/DECK WATCHMEN: Watchmen generally at Master's option.
OPENING/CLOSING HATCHES: By crew or stevedores.
CERTIFICATES:
Certificate of Nationality.
Bill of Measurements.
Bill of Health.
Deratification Certificate.
Crew List.

CUSTOMS ALLOWANCE: Tobacco, 200 cigarettes or equivalent quantities for each person on board. Wine and/or Spirit, one bottle each member to be held out of bond.
CARGO GEAR: Usual Board of Trade Regulations valid.
IDENTIFICATION CARDS: Not needed.
CONSULS:

TELEPHONES: Quay-connected telephones are placed on board on request.
SERVICES: Tank cleaning, discharge of tank washings, compass adjustments, etc., can be carried out after application through local Agents.
SHORE LEAVE: No restrictions.
REGULATIONS: Normal regulations apply.
DELAYS: No other delays than berths being occupied by working vessels can be expected.
AUTHORITY: Port of Helsingborg.

HOGANAS: 56.12 N. 12.33 E. (See Plan Book)

Privately-owned port serving only owning company – Hoganas AB. Customs and pilotage arranged through authorities in Helsingborg (12 nautical miles South-East of Hoganas).

DOCUMENTS: See "Stockholm".
PILOTAGE: Compulsory. Pilot obtainable at Hoganas or at Helsingborg. Pilot service day and night, available after request to pilot office at Helsingborg.
RESTRICTIONS: Entrance channel, Length 750 m.; width 65 m.; depth 8.25 m.

The harbour is seldom closed by ice.

TUGS: There are no tugs stationed at Hoganas, but tugs are available after request to the Harbour Office at Helsingborg.
BERTHING: *The Pier (Extending South-Westerly).*

Length of quayage:	380.00 m.
Depth alongside:	
For 120 m. (from outer end)	6.60 m.
For the next 160 m.	8.25 m.
For remaining 100 m. varies down to	4.00 m.
The Cross Quay:	
Depth alongside at 75 m. from Northern end	3.50 m.
the remainder is unnavigable	
Quay in the middle of the Harbour:	
Length of quay:	180.00 m.
Depth alongside N.W. side:	
For 120 m. (from outer end)	6.60 m.
For the next 35 m. the depth varies from to being unnavigable.	4.2 m.
Depth alongside S.E. side:	
For 30 m. (from outer end)	5.00 m.
remainder	unnavigable

The depth of water at this port is somewhat affected by winds.

CRANES: 1×25 ton and 1×5 ton railbound electric grab cranes, 1×25 ton mobile crane.
REPAIRS: Machine-shop repairs only.
STEVEDORES: Working hours; a normal working day, Monday to Friday from 0653 to 1600 hrs. Normally no working on Saturdays.
FRESH WATER: Available.
FUEL: Can be supplied.
AUTHORITY: Hoganas AB.

HORNEFORS: 63.37 N. 19.54 E. **(See Plan Book)**

DOCUMENTS: Documents necessary are:

1 List of Bonded Stores.
2 copies Tobacco List.
3 Crew Lists.
3 Passenger Lists.

Health documents, none – if all on board healthy. In case of illness on board, this must be reported to Customs on arrival.

Copy B/L and copy Manifest.

PILOTAGE: Pilot station, Bredskar, tel. 090/45021; Pilot must be ordered 5 hours before arrival. If change in position, this must be informed at least 2 hours before arrival. Pilot can also be taken at Skagsudde Pilot Station 0660/66003. (Also see "Stockholm".)

ANCHORAGES: Will be informed by Pilots from case to case.

RESTRICTIONS: Vessels over 100 m. length only taken in and out of harbour during daylight.

MAX. SIZE: Max. length 105 m. Max. draft 20 ft. 08 in. (6.3 m.).

RADIO: Harnosand Radio, 0611/12733.

TUGS: Available.

BERTHING: No particular arrival times necessary.

CRANES: 1 stationary crane, capacity 3 tons.

STEVEDORES: Labour must be ordered latest 1430 hrs. day before commencement loading, and if such day is Monday labour to be ordered before 1100 hrs. Saturday.

MEDICAL: No special regulations. Hospital and doctors available day and night.

TANKERS: 8 in. connections.

FRESH WATER: By pipe, 2 t.p.h.

FUEL: No fuel available in port. Must be ordered from Holmsund.

GANGWAY/DECK WATCHMEN: Not compulsory, but can be arranged.

OPENING/CLOSING HATCHES: Normally done by ship's crew.

CERTIFICATES:

Lighthouse dues (receipts).
Oil Record Book.
Deratisation Exemption Certificate.
Nationality Certificate.
Ship's Register (International form).
For open/closed ships – Freeboard Certificate.

Pilot to be ordered 5 hours before arrival. If ordered before 2100 hrs., vessel can obtain Pilot also during hours between 2100 – 0530 hrs. Pilot boat: orange painted cutter. International pilot signals. Pilot boards near "Myran" lightbuoy: 61° 36′ N., 17° 29′ E. Telegraphic address of pilot station at Hoelick: "Pilotstation Hudiksvall". (Also see "Stockholm").

ANCHORAGE: Anchorage places for vessels awaiting Pilot or anchoring owing to weather conditions: 61° 37.5′ N., 17° 25.0′ E.; 61° 37.0′ N., 17° 22.0′ E.; 61° 37.7′ N., 17° 21.3′ E. depending upon prevailing winds etc. Bottom mud and/or sand. Depth 10 – 30 m.

RESTRICTIONS: No tidal water at Hudiksvall. Tankers of more than 100 m. in length between p.p. not during darkness because of narrow channel with some curves. Dry cargo vessels up to 150 m. length after dark.

MAX. SIZE: *Tankers:* Daylight 45,000 d.w.t., length 210 m., draft 9.2 m. After dark 6,000 d.w.t. length 100 m., draft 7.5 m.

Other Vessels: 16,000 d.w.t., length 160 m., draft 8.7 m.

LW between 0.2 – 0.5 m. may occur often, sometimes as much as 0.7 m. below MWL. LW periods may occur when N.W. winds blowing over Northern Sweden.

HEALTH: Pratique automatic. No doctor visits incoming vessels if not specially ordered for treatment on board, etc.

RADIO: Vessels coming from South and having not yet passed the Stockholm area are recommended to call Stockholm Radio – VHF Channels 25 or 28 for vessels between Gotland/Sweden, 24 outside Stockholm South, 28 Stockholm East and North, 23 North of Aalands Sea, and in Gefle Bay, Hernoesand Radio SAH Channels 25 Hudiksvall area, 24 Sundsvall area, 23 Hernoesand area, 28 Oernskoeldsvik area. Hudiksvall harbour office: Channel 16. Working Channel 9.

TUGS: Tug compulsory for tankers over 6,000 d.w.t. and for other vessels over 8,000 d.w.t. in fairway. Vessels met near isle of "Enbarsskar" at 61° 39.5′ N., 17° 17.0′ E. For mooring purposes tug compulsory for tankers over 6,000 d.w.t. and for other vessels exceeding 5,000 d.w.t. Ship's lines used. Ice-breaking tug *Ago,* 203 tons, 1,260 EHK available in Hudiksvall during the whole year.

STEVEDORES: Ordered 1600 hrs. on day preceding vessel's arrival. For loading starting Monday morning, gangs to be ordered before 1100 hrs. local time Saturday. 3 – 5 gangs available at Hudiksvall and Iggesund; Stocka 3 gangs. Working hours: Monday-Friday, 0700 – 1600 hrs.; Meal hours: 0900 – 0930, 1230 – 1300. 2 hours overtime at extra cost of 50% Monday, Tuesday, Thursday, Friday (1600 – 1800 hrs.). For completing vessel, further 3 hours Monday, Tuesday, Thursday, Friday (1800 – 2100 hrs.). Extra cost of 100%. For completing vessel 5 hours' overtime can be obtained on Wednesday (1600 – 2100 hrs.), 2 hours at 50% and 3 at 100% extra.

On Saturdays no normal work, but stevedores available for maximum eight hours work, but 100 per cent overtime has to be paid and for minimum 5 hours even if vessel working less than 5 hours on Saturdays.

BERTHING: Main berth Hudiksvall draft allowed at MW 8.7 m. alongside 165 m., thereafter 5.4 m. alongside 30 m. and therefore 4.9 m. alongside 160 m. One Ro/Ro ramp draft allowed 8.7 m. at MW.

Pier at Iggesund 7.4 m. draft allowed MW 150 m. length of pier. Ro/Ro berth 17.4 m. draft if more than 12 m. from Ro/Ro berth, if less draft allowed 6.3 m. Ro/Ro berth II 7.4 m. draft allowed if more than 12 m. from berth, if less 6.7 m.

Pier of Stocka 110 m. length, draft allowed MW 4.9 m. On Southern side of pier draft allowed 3.9 m. alongside 48 m.

TANKERS: One berth only. Draft allowed: 9.2 m. at MW. Pipe diameter for fuel: 10 in. light oils: 8 in. Connecting hoses between pipes and vessel: 8 in. diameter, both types. Shore tanks lie about 100 – 200 m. from berth, 5 – 8 m. above sea. Surface of jetty about 2 m. above sea level.

DENSITY: Average 1002 – 1001.

FRESH WATER: Fresh water available all berths. Delivery capacity about 15 – 20 t.p.h. During Winter it is difficult to arrange hoses, vessels assist with own hoses.

FUEL: Available all berths. Delivered by tank-lorries from Sundsvall 50 miles North of Hudiksvall. 24 hours' notice required.

FIRE PRECAUTIONS: No special precautions. Within bounded area oil jetty smoking prohibited. Also on new quay outside sawmill.

GANGWAY/DECK WATCHMEN: Available in all ports, not necessary if not required by vessel.

OPENING/CLOSING HATCHES: By crew.

CUSTOMS ALLOWANCE: Crew over 18 allowed 200 cigarettes; one bottle of spirits out of bond. If vessel stays in Swedish ports but still in foreign traffic, above quantities obtained from bond once a week (every 7 days). Instead of spirits one bottle wine or 6 bottles export beer.

IDENTIFICATION CARDS: Not needed. If crew going to doctor or to hospital preferable has passport.

CONSULS:

Country	*Address*	*Tel. Office*	*Tel. Home*
Denmark	Marknadsgatan 1 Hudiksvall	0650/11 712	0650/10 983
Finland	Varvsgatan 2–4 Hudiksvall	0650/15 250	0650/10 056
Great Britain	Drottninggatan 48 Gefle	026/18 03 00	
West Germany	Skeppsbroplatsen Sundsvall	060/15 55 00	060/15 24 40 060/62 22 2

REPAIRS: Small engine and deck repairs. To be ordered through vessel's Agent or through stevedoring foreman onboard.

DRY DOCKS: None.

REPATRIATION: Possible.

AIRPORT: Nearest regular airport: "Midlanda", near Sundsvall, 60 miles North of Hudiksvall. Regular Swedish inland airlines. Regular flights to Swedish main airports.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: No work on following days, although not all legal holidays. New Year's Day; Epiphany; Good Friday (Easter); Easter Eve; Easter Monday; Labour Day; Ascension Day; Whitsun Eve; Whit Monday; Midsummer Eve; Midsummer Day; All Saint's Day; Christmas Eve; Christmas Day; Second Christmas Day; New Year's Eve.

POLICE/AMBULANCE/FIRE:

Police Hudiksvall	0650/15 600 or 90 000
Police Iggesund	0650/20 820 or 90 000
Ambulance Hudiksvall	0650/10 670 or 90 000
Ambulance Iggesund	0650/10 670 or 90 000
Fire Hudiksvall	0650/10 670 or 90 000
Fire Iggesund	0650/20 329 or 0650/20 812
Doctor Hudiksvall	0650/17 370 or 90 000
Doctor Iggesund	0650/70 026 or 90 000
Hospital Hudiksvall	0650/92 000
Hospital Iggesund	0650/92 000

For Stocka: as Hudiksvall.

TELEPHONES: At Stocka and Iggesund: no telephones available for connecting onboard. At Hudiksvall telephones available. Skr 25 per day plus cost of calls.

GENERAL: Hudiksvall port is very near town. Railway station, bus station, etc., very near port. Oil port about 700 m. from town.
SERVICES: No tank cleaning or discharge of tank washings. Compass adjusting: 0650/10 339 (Pilot office). Ordered through Agent.
PORT REGULATIONS: Speed limit: max. 5 knots within the harbour basin. As plastic pipe is laid out on the bottom around the oil berth, anchoring during berthing is prohibited. Pipe filled with compressed air after vessel's mooring, comes up to the surface forming ring around vessel and oil jetty as shelter against oil leakage.
DELAYS: During Winter (December–April) delays on berthing/sailing owing to ice in fairways and alongside quays. Special mooring delays will occur owing to ice between vessel and quay.
AUTHORITY: Hudiksvalls Kommun.

KALMAR: 56.40 N. 16.20 E. (See Plan Book)

DOCUMENTS: See "Stockholm".
PILOTAGE: Compulsory for vessels carrying dangerous cargo. Pilot may be ordered on VHF, Channel 16 or by telephoning 0480/10719. Approaching from North, Pilot boards at Skaggenas or Krongrundet, from the South at Tradgardsgrundet. Round-the-clock service provided. (Also see "Stockholm").
ANCHORAGE: Good anchorage outside port available.
MAX. SIZE: Largest vessel 25,000 tons deadweight, draft 24 ft. Channel and harbour depth 26 ft. Ferry berth 22 ft.
TUGS: Available, order by tel. 15775.
RADIO: Stockholm Radio.
VHF: Harbour Master on VHF Channel 16.
CARGO HANDLING FACILITIES: 3 portable electric cranes of 5 tons each, 3 mobile cranes of 23 tons each and 1 mobile crane of 18 tons. 1 floating crane available, maximum lifting capacity 75 tons.
STEVEDORES: Available weekdays 0700 – 1630 hrs. Overtime is worked Saturdays and eves of public holidays. The operations comprise work on board, work ashore and rough sorting.
TANKERS: Oil dock has depth of 26 ft. alongside and has dealt with partly loaded ships of 25,000 tons. Discharge capacity about 28,000 cubic ft. an hour.
MEDICAL: Hospital available.
FRESH WATER: Available from wharves.
FUEL: Bunkers available by barge or at Oil dock.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: Crew or stevedores.
CUSTOMS ALLOWANCE: 200 cigarettes plus 1 bottle spirits.
CONSULS:

Danish Vice-Consulate	tel. 14719.
Finnish Consulate	tel. 10700.
Netherlands Vice-Consulate	tel. 14444.
Norwegian Vice-Consulate	tel. 22330.
German Consulate	tel. 21769.

REPAIRS: Available. Divers for underwater repairs; major repairs undertaken.
DRY DOCKS: 2 floating docks. 1 for vessels up to 3,000 d.w.t. and 1 for vessels up to 10;000 d.w.t. also slip for vessels up to 850 tons. (AB Kalmar Varv 0480/15390, telex 43100).
AIRPORT: Ten kilometres from the port.
DEVELOPMENTS: Ro/Ro berth will be erected 1981 at Barlastholmen. (Depth about 21 ft.)
Store houses for general cargo and sawn timber about 7,000 sq.m. have been erected.
AUTHORITY: Harbour Master.

KARLSBORGSVERKEN (Kalix District): 65.48 N. 23.17 E.

Axelsvik (Oil Harbour) 4 miles East.
PILOTAGE: Pilot station "Erikoren", Karlsborgsverken. Pilots embark or disembark at Maloren 18 nautical miles South Karlsborgsverken.
MAX. SIZE: Max. draft entrance to Karlsborgsverken 6 m., to Axelsvik 8.8 m. Size no limit.
TUGS: Available.
BERTHING:

	Max. draft.	*Length of quay*
Cellulose Quay	6.0 m.	145 m.
Sulphate Quay	5.0 m.	80 m.
Timber Quay	6.0 m.	250 m.
Kalix Outer Harbour Quay	5.4 m.	145 m.
Axelsviks Oil Harbour	8.8 m.	60 m.
Tore (17 nautical miles) N.W. Karlsborgsverken	6.0 m.	170 m.

STEVEDORES: Available, No particular ETA advice required except as normally sent by Master to the Agent.
MEDICAL: Hospital and dental services available.
FRESH WATER: Available at all berths except at Axelsvik's Oil Harbour.
OPENING/CLOSING HATCHES: Usually carried out by the vessel's crew.
CRANES: No land cranes. Mobile cranes to hire for loading/discharging.
CONSULS: None.
REPAIRS: Workshop available for repairs.
AIRPORT: Lulea 85 km. from Karlsborgsverken.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Telephone 90000 for emergency and ask for service required.
TELEPHONES: Available at quays.
SHORE LEAVE: Allowed.
AGENT: Kalixspedition, Svanberg & Co. AB, Box 61, S-952 01 Kalix Telex No. 8311.

KARLSHAMN: 56.10 N. 14.52 E. (See Plan Book)

DOCUMENTS:
3 Crew Lists (IMCO Forms).
3 Passenger Lists.
2 Tobacco Lists.
2 Store Lists.
1 Manifest.
1 Bill of Lading.
PILOTAGE: Vessels approaching port call on VHF Channel 16, Karlshamn Pilot Station 5 hours in advance. Pilot boat orange coloured. Lights and sound signals as international regulations. Pilot boat always located 2 nautical miles South from Pilot Station Ortholmen, this point marked on charts. Location of anchorage in same area where Pilot taken. (Also see "Stockholm").
ANCHORAGE: Depths of water in anchorage area about 20 – 25 m.
RESTRICTIONS: Tankers not allowed to enter during darkness. Max. draft for tankers 32 ft. 06 in.
MAX. SIZE: Max. length 180 m., max. draft 32 ft. 06 in. Oil pier outside main harbour, Kolo harbour, length 270 m., max. draft 41 ft. No tide.
HEALTH: If infectious disease on board Captain must immediately send information to Agent.
RADIO: Karlskrona Radio.
RADAR/VHF: The Pilot station is fitted with radar and VHF.
TUGS: 2 tugs available, 3,000 h.p. and 2,000 h.p. Join vessels about 1 nautical mile outside Harbour boundary. Ship's lines always used.
BERTHING:
Inner Harbour: West Harbour Area.

Berth	*Length (m.)*	*Depth (m.)*
Ocean Quay	150	10.0
Soja Quay	250	8.5
West Quay	400	7.5 – 6.0

These quays are served by 5 rail-bound bulk goods cranes of 5 – 10 tons and have 2 grain elevators.

Via the West Harbour area oil seed plants, copra and vegetable oils for the Karlshamn Oil Factory (AKO) are shipped as well as other bulk goods.
East Harbour Area.

Berth	*Length (m.)*	*Depth (m.)*
East Pier	160	8.5
East Quay	500	6.0

The East Pier, is equipped with 2×6.7 tons rail-bound unit goods cranes and served by 2 railway tracks. Adjacent to the East Pier are 2 cold stores with a total floor area of 7,000 sq.m.

Loading and discharging is carried out with mobile cranes at the East Quay. The Harbour has 5 mobile cranes with lifting capacities ranging from 4 to 23 tons.

Goods shipped via the East Harbour area include timber products, timber, bulk goods and general cargo.

Sterno Harbour:
A special harbour for stone products, wood and timber. Water depth is 6 m.

Stone blocks are loaded at a special quay and crushed stone products, chiefly diabase which is used for producing mineral wool, are discharged from a quay by a newly-erected stone-crushing plant. The crushing plant is owned by Armerad Betong-Vagforbattringar.

At Sterno Harbour a timber floating terminal consisting of an 80 m. long quay and timber landing areas both on land and in the water have been arranged and leased to Mo och Domsjo AB. The timber is floated from Karlshamn to MoDo's pulpmill at Husum.

The quays of the old shipyard are used chiefly for shipping timber. Timber Terminalen AB have built a timber terminal with a sawmill, planing mill and sorting plant adjacent to the quay area.

Stilleryd Harbour:
Karlshamn's new outer harbour; it was inaugurated in 1975 and consists of a 400 m. long quay with water depths of 8 and 11 m. 2×35 ton luffing cranes are used for loading and discharging vessels and they are backed up by mobile cranes. Double railway tracks serve the quay.

The harbour also has ro-ro facilities with a water depth of 8 m. Stilleryd Harbour accommodates vessels of up to 35,000 d.w.t. The harbour area features 3 warehouses with a total storage area of 21,000 sq.m. Adjacent to the quay area is a stockyard of approximately 200,000 sq.m., of which 40,000 sq.m. is asphalted.

Sodra Skogsagarna ship products like paper pulp, paper, wood chips, pulpwood, etc. via the Stilleryd harbour. Fernstroms Granitindustrier ship stone blocks while Vikingtra AB ship wood and timber via this harbour.
CRANES: In addition to the cranes mentioned above, there is a heavy lift crane capacity 300 tons.
MEDICAL: Hospital facilities available.
TANKERS: Different lines used. From 12 in. to 6 in. depending on cargo to load/discharge. 3 different loading/discharging berths available. 1 at Inner Harbour 32 ft. 06 in. draft, 1 at Kolo Harbour 41 ft. draft and 1 at Oxhaga.

Kolo Oil Harbour:
Position 56° 09′ N. 14° 43′ E. Pilot boards by Laknallarna, position 56° 07′ 8″ N. 14° 53′ E. Berthing during daylight only. Max. size 270 m., draft 41 ft. 75,000 d.w.t. or 100,000 d.w.t. with part load. Depth at berth and approaches 46 ft. 2 tugs are generally used.

The pipe-line is 20 in., length 400 m. and hose connection 12 in. Max. rate, 1,500 cu.m./hour (hfo). There are no ballast facilities and no clean ballast can be discharged into harbour. Vessels are allowed to clean tanks and gas free in the roads only.

Fresh water available at 20 t.p.h. by pipe-line.

Old Oil Harbour:
Situated at Sutudden where a large number of major oil corporations and manufacturing companies have their depots. Heavy and light fuel oils, diesel oil, petrol and paraffin are imported and stored here. Storage capacity amounts to approximately 180,000 cu.m. of which half consists of underground rock storage facilities.

The oil quay has a depth of 11 m. and can accommodate fully-laden tankers of up to 30,000 d.w.t.

Oxhaga Oil Harbour:
Karlshamn's new oil harbour, situated at Munkahusviken where the water depth at the quay is 13 m. Underground rock storage facilities with a total capacity of 400,000 cu.m. – 200,000 cu. m. for heavy oil and 200,000 cu.m. for light oil have been constructed. Storage has been leased to manufacturing companies, municipalities and oil companies.

Oxhaga Nabb's oil harbour is used by fully laden tankers of 50 – 55,000 d.w.t.

An above ground storage area for petroleum, oil and chemicals is planned for the oil harbour areas. Surveys have shown that it is possible to build additional rock storage facilities for petroleum products in the Oxhaga area.

DENSITY: 1003.
FRESH WATER: Fresh water available and delivered by hoses.
FUEL: All grades available.
GANGWAY/DECK WATCHMEN: Watchmen only necessary when tankers discharge petroleum products.
OPENING/CLOSING HATCHES: By crew.
CERTIFICATES: Certificates of Tonnage, Derat Certificate.
CUSTOMS ALLOWANCE: Tobacco, 200 cigarettes per man/week. Wine and/or Spirits, 1 bottle per man/week.
IDENTIFICATION CARDS: Not needed.
CONSULS:
Netherlands, Tel. 10041
Denmark, Tel. 52080.
Norway, Tel. (0454) 14225
Finland, Tel. (0454) 11319.
REPAIRS: Small deck and engine repairs can be effected.
DRY DOCKS: None.
REPATRIATION: Facilities for repatriation of crew possible.
AIRPORT: Distance from airport 3 miles. 3 flights per day.
HOLIDAYS: January 1st and 6th; Easter; May 1st, 15th, 26th; June 21st; November 1st; December 25th, 26th. No work can be arranged during holidays.
POLICE/AMBULANCE/FIRE: Tel. 90 000.
TELEPHONES: Telephones on board arranged at cost of 85 Sw. Cr.
DEVELOPMENTS: An extension of Stilleryd harbour is planned. By 1980 it is expected that an additional 100 m. quay with a water depth of 8 m. will be ready for service. It is judged that quay capacity at Stilleryd harbour will be fully developed during the 1980's. Total quay length will then amount to 1,100 m.
AUTHORITY: Harbour Master.

KARLSKRONA: 56.10 N. 15.36 E.

DOCUMENTS: See "Stockholm".
PILOTAGE: Pilot is taken at Aspo. Tel. 0455/39016. (Also see "Stockholm"). Ordering Pilot between 2100 – 0500 hrs. contact Karlshamn Pilot Station 0454/14102. Stations operating on VHF Channel 16. Pilot should be ordered 5 hours in advance. Pilot boats usually orange.
ANCHORAGE: On roadstead. Reference to nautical chart No. 821 (Swedish).
MAX. SIZE: Max. draft 9.1 m. (30 ft.).
HEALTH: See "Stockholm".
RADIO: Stockholm Radio. Karlskrona Radio.
VHF: Karlskrona Port office equipped with VHF Channels 16, 14.
RADAR: Radar service available when entering port. Tel. 0455/25075 or 0455/50780.
TUGS: Tugs assistant available.
BERTHING: Total quay length 4,700 ft., oil terminal 400 ft., depth alongside quay 13 – 33 ft., oil terminal 29.5 ft. Ro/Ro quay 23 ft.
STEVEDORES: Available. Ordered through Agents or directly 0455/10518.
MEDICAL: Advance notice to Agents desirable.
TANKERS: No specific requirements applicable on oil carriers. Two tanker berths available. Draft 7.0 and 8.5 m.
FRESH WATER: Available, customary delivery from quay-berth.
FUEL: All grades available. No advance notice required.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CONSULS:
Danish Vice-Consul, Tel. 15006.
Netherlands Vice-Consul, Tel. 10926 and 12495.
REPAIRS: All types of deck and engine repairs possible.
DRY DOCKS: Largest dry dock: length 185 m., breadth 20.76 m., depth 8.80 m. Six smaller docks.
REPATRIATION: Not allowed.
AIRPORT: 30 kms. from port.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Tel. 90000.
TELEPHONES: None available.
SERVICES: Compass adjusting.
AUTHORITY: Harbourmaster.

KARLSTAD: 59.23 N. 13.31 E. (See Plan Book)

PORT LIMITS: Vessel considered to be an "arrived ship" when berthed or anchored South of the Gerholmsrevet buoy in case of congestion.
DOCUMENTS: As usually required in Swedish ports.
PILOTAGE: Not compulsory. However Pilots available.
ANCHORAGES: There is a safe anchorage South of the Gerholmsrevet buoy, sand and clay.
RESTRICTIONS: There are no restrictions imposed upon entry. Vessel to give 1 prolonged blast – 1 short blast – 1 prolonged blast to call the attention of boatman.
MAX. SIZE: Vessels length, breadth and draft maximized by the locks of the Trollhatte canal (87 m. × 13 m. × 5.3 m.).
HEALTH: Documents etc. as usually required in Swedish ports.
RADIO: Gothenburg Radio.
VHF: ETA to be given to Karlstad Port Radio (0800 – 1600 hrs. MET)
RADAR: No port radar available.
TUGS: Two icebreaking tugs available. Ship's lines usually used.
BERTHING:

Vanerterminalen		Length	175 m.
(The Venerterminal)		Shipdraft	5.3 m.
Mobile cranes			
Styckegodskajen		Length	270 m.
(The general cargo quay)		Shipdraft	5.3 m.
Three general cargo cranes		6 tons	
Trakajen		Length	120 m.
(The wood quay)		Shipdraft	5.3 m.
Mobile cranes			
Kolkajen		Length	350 m.
(The coal quay)		Shipdraft	5.3 m.
One bulk cargo crane		5 tons	
One heavy-lift crane		28 tons	
Lambergshamnen		Length	230 m.
(The Lamberg Harbour)		Shipdraft	5.0 m.
Mobile cranes			
One heavy-lift crane		160 tons	
Inrehamnen (Inner harbour)		Disused by merchant vessels.	
Oljehamnen	Each pier	70 m. Mooring space both sides	
(Oil harbour)			
Three jetties for handling oil, etc.		Shipdraft	5.3 m.

STEVEDORES: Modern and extensive machinery equipment. Loading/discharging can be arranged in two or three shifts.
MEDICAL: Hospital facilities available.
DENSITY: Fresh water in the port.
FRESH WATER: Delivered by hose from piping on the quay.
FUEL: All kinds of bunker oil available.
CONSULS: Danish, Norwegian and German.
REPAIRS: All kinds of deck and engine repairs possible. Slipway 2,300 tons
SURVEYORS: All major classification societies represented in nearby port of Gothenburg. Government ship surveyor situated at Karlstad.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Usually carried out by crew
CUSTOMS ALLOWANCE: As usually allowed in Swedish ports.
CARGO GEAR: Shore gear usually used.
REPATRIATION: Crew changes and repatriation can be effected.
AIRPORT: Regular domestic airlines. Several flights per day to and from Stockholm and Gothenburg.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: Cargo work can not be arranged on Christmas, New Year's and Easter day or on Good Friday.
POLICE/AMBULANCE/FIRE: Telephone number 90 000.
SERVICES: Tank-cleaning equipment and facilities for discharge of tankwashings available.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not necessary for shore leave.
REGULATIONS: Ship's propulsion machinery may not be used when ship is berthed.
DELAYS: Normally not to be expected.
DEVELOPMENTS: Number of cranes and sheds will be increased. A 35 ton container crane is to be purchased in the near future and will be sited on the Coal Quay.
AUTHORITY: Port Manager and Port Captain, Port of Karlstad.

KLINTEHAMN: 57.23 N. 18.11 E.

Harbour is being rebuilt. Quay will then be 330 m. and depth 5 m. Depth on entrance 5.5 m.

The most unfavourable winds are South — West. The harbour is however to be considered as good and safe.

Most products are loaded/discharged with mobile cranes.

Documents needed are Nationality Certificate, Bill of Measurement, Passenger List, Crew List, Derat Certificate, Ships and Crew Declaration.

Pilot Station at Visby. Pilots have VHF and operate on Channel 16.

Bunkers and water can be obtained.

KOPING: 59.31 N. 16.00 E. (See Plan Book)

DOCUMENTS: See "Stockholm".
PILOTAGE: Via Sodertalje: Pilots obtainable for inward bound vessels from Landsort to Sodertalje and from Sodertalje to Koping; for outward bound vessels from Koping and Sodertalje. Via Stockholm: Pilots obtainable for inward bound vessels from Simpnas, Furusund, Sandhamn, Dalaro and Landsort to Stockholm and from Stockholm to Koping; for outward bound vessels from Koping and Stockholm. (Also see "Stockholm"). Harbour pilotage obtainable but not compulsory in harbour area. Assistance of a boatman is compulsory for arriving vessels.

Distances: Landsort – Sodertalje (nautical miles), 34; Sodertalje – Koping, (nautical miles) 69; Landsort – Dalaro, (nautical miles), 32; Dalaro – Stockholm, (nautical miles), 46; Sandhamn – Stockholm, (nautical miles), 36; Stockholm – Koping, (nautical miles), 78; Vasteras – Koping, (nautical miles), 27; Harbour Pilotage, (nautical miles), 2.

ANCHORAGES: At the "Broken" light buoy, clay bottom.
RESTRICTIONS: Ice is prevalent in lake Malaren and the inlet from the Baltic from January to March, but the entrance channel is kept open during Winter season.
MAX. SIZE: The pilot station on Lake Malaren, Tel. 0755/30467, will give information on the max. admissible sizes of vessels. In general the following applies:

Max. Admissible	*Via Sodertalje*	*Via Stockholm*
Length	124 m.	110 m.
Breadth	17 m.	15 m.
Draft	6.8 m.	5.65 m.
Height of masts above water level	35 m.	26 m.

The figures stated for the draft are subject to variation according to the water level. The entrance fairway to the port has been dredged to a depth of 7.6 m., the width of the bottom being 60 m.
VHF: Work freq. Channel 14. Call Koping Port Radio, Channel 16.
TUGS: Available day/night.
BERTHING: *Deep-Water Harbour:* (built 1932, large extension 1936-64) has 152 m. of quayage with a depth of 6.2 m. and 377 m. with a depth of 7.3 m. alongside, and is equipped with two 6 tons portal cranes and four 7 tons level-luffing jib cranes, two of them having a maximum lifting capacity of 10 tons each at 18 m. radius; and further, one 33-tons "multi-purpose" crane.

There is also an 80 m. quay, depth 6.2 m. – without cranes – where loading/unloading by vessels own winches can be undertaken.

Mobile cranes also available.

The quays are rail-connected and equipped with conn. contacts for supplying electricity, telephones and fresh water.

There are about 10,000 sq.m. of concrete stockyards within reach of the cranes, and outside this area and at a short distance from the cranes, a space of about 40,000 sq.m. is available for storage of goods. There are also about 22,000 sq.m. of sheds of different types in connection to the quays.

The cranes are well equipped with lifting devices such as grabs of different types etc. Conveyor belts of varying length, fork trucks, trimming and other cargo handling equipment are also available.

Old Harbour: Has 400 m. of quayage with depth varying from 3.6 to 4.5 m. alongside, mobile cranes are used.

Oil Harbour: A modern oil harbour (built 1969) is situated at the mouth of River Kopingsan (North side), the jetty having one outside and one inside berth with depth of 7.6 and 5.7 m. respectively.

On the North side is a new (1975) 80 m. concrete quay for grainloading vessels. Depth alongside 7.3 m.
Private Wharves: There is (on the North side) a private 120 m. concrete quay, depth 6.2 m., belonging to Messrs. Tibnor Ltd., (Iron and Steel Merchants). One 10 ton travelling portal crane available.

A private harbour, belonging to Cementa Co., is situated in the immediate vicinity of the "Deep-water harbour". There is a 110 m. concrete quay, with 7.3 m. alongside, and one 6 ton travelling portal crane and one belt conveyor available. There is also a 50 m. pier, same depth, for self-unloading (cement) vessels.
STEVEDORES: Working hours: 0700 – 0900, 0930 – 1300 and 1330 – 1600 hrs. (Monday to Friday). Special conditions on Christmas Eve, New Year's Eve, Easter Eve, Whitsun Eve and Midsummer Eve.

Overtime work: can usually be executed on Mondays, Tuesdays, Wednesdays, Thursdays and Fridays for 3 hours daily and 6 hours on Saturday.
GANGWAY/DECK WATCHMEN: Always available.
FUEL: Water, provisions, coal and oil obtainable.
REPAIRS: Minor mechanical, electrical and other repairs can be carried out by different local firms. Diver available.
AUTHORITY: Harbour Master.

LANDSKRONA: 55.52 N. 12.48 E. (See Plan Book)

DOCUMENTS: See "Stockholm".
PILOTAGE: Pilot available on request from Helsingborg pilot station or from Landskrona pilot station in daytime. 5 hours' notice required. Pilot stations and boats equipped with VHF. (Also see "Stockholm").
ANCHORAGE: Vessels of up to 10 m. draft can safely anchor North of Staffans Bank.
MAX. SIZE: Depth in channel and harbour 11 m. (36 ft.) Max. draft 10 m. Vessels up to 253 m. length have sailed from harbour.
HEALTH: See "Stockholm".
RADIO: Gothenburg Radio call sign SAG; Malmo Radio call sign SDP. The harbour office, pilot station, Pilot boats and tug boats equipped with VHF.
TUGS: Tugs usually meet off Pilhaken lightbuoy. Ship's lines to be used.
BERTHING: Terminal for handling bulk cargoes. Rock phosphate can be discharged with a capacity of 8,000 tons per 24 hours.
MEDICAL: Medical attention and hospital facilities available.
TANKERS: No oil berth in Landskrona.
DENSITY: Density of water changes with currents.
FRESH WATER: Available from quay.
FUEL: Small quantities of fuel oil can be obtained from quay.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: Usually carried out by ship's crew.
CERTIFICATES: See "Stockholm".
CUSTOMS ALLOWANCE: See "Stockholm".
IDENTIFICATION CARDS: Not needed.
CONSULS:

Finnish Vice-Consulate	Tel. 0418/16020
Danish Vice-Consulate	Tel. 0418/16150
Netherlands Vice-Consulate	Tel. 0418/16020

REPAIRS: All types of deck and engine repairs.
DRY DOCKS: Dry dock for ships up to about 25,000 tons d.w. (189 m. length). Floating dock for up to about 5,000 ton d.w.
AIRPORT: Sturup, 60 km.
TIME: GMT plus 1 hour in Winter. Summertime (April 6th – September 27th) GMT plus 2 hours.
HOLIDAYS: See "Stockholm".
POLICE/AMBULANCE/FIRE: Tel. 90000.
TELEPHONES: Can be placed aboard.
REGULATIONS: Anchoring prohibited between and up to 50 m. from harbour lights.
AUTHORITY: Landskrona Hamnforvaltning.

LULEA: 65.35 N. 22.09 E. (See Plan Book)

DOCUMENTS: See "Stockholm".
PILOTAGE: Telegraphic address, "Pilotstation Lulea". Advance notice 5 hours. VHF Channel 16, 156.80. Pilot boat, orange with internationa signals. Pilot boards about 2 nautical miles West of Rodkallen fo entering Germandoleden and 1 nautical mile N.E. of Farstugrundens Lighthouse for entering Sandoleden. Location of anchorage wher awaiting Pilot, West of Rodkallen and South of Farstugrunden Lighthouse.
ANCHORAGE: Germandofjarden, 1.5 nautical miles S.E. o Larsgrundet Lighthouse and inner roads.
MAX. SIZE: Max. draft at MW 11.4 m. in Sandoleden and 7.5 m. ir Germandoleden.
HEALTH: No special regulations.
RADIO: Harnosand Radio, call signal SAH.
TUGS: At the inner road for the ore dock, and in Sandoleden 1 nautica mile South of the coal quay and the oil terminal. Ship's lines to be used.

Two tugs of 4,200 h.p. each are available for towing and icebreaking
BERTHING: *Deep Quay:* Length 345 m., depth 6.5 – 9 m. Genera cargo and wood. Two 7.5 ton cranes. Railway.

SJ-Coal Quay: Length 190 m., depth 6.9 m. Bentonite and genera cargo. Two 4 ton cranes. Railway.

Cement Silo Quay: Length 50 m., depth 9 m. Cement.

LKAB Ore Quay: Length 415 m., depth 13.2 m. Iron ore. Two shiploaders of 4,000 t.p.h. each.

SSAB Quay: Length 498 m., depth 8.0 m. Iron, steel. Eight 6 – 12 ton cranes.

Coal Quay: Length 575 m., depth 12.2 m. Coal, coke, iron, steel, limestone. Three 18 ton grab cranes, 35 tons with hook.
BRIDGES: When passing up to Northern side of port, notice has to be given 2 hours in advance for opening of Bergnasbridge.
STEVEDORES: Bottenvikens Stuveri AB.
TANKERS: Diameter of lines from 150 mm. up to 350 mm. 2 oil jetties depth 7.8 m. and 12.2 m. Length 20 m. and 60 m. respectively. Facilities for receiving dirty ballast. Rate 300 cu.m. per boat.
DENSITY: Fresh water, 1000.
FRESH WATER: Fresh water available at any berths.
FUEL: All grades of oil available.
GANGWAY/DECK WATCHMEN: Safety watchmen are to be on board all tankers when loading or discharging.
OPENING/CLOSING HATCHES: Stevedores.
SHIP'S CERTIFICATES: See "Stockholm".
CUSTOMS ALLOWANCE: 200 cigarettes or 250 grams of tobacco for each Crew member once a week. (Wine/Spirits) 0.75 litre for each Crew member over 20 years old, once a week.
IDENTIFICATION CARDS: Not necessary.
CONSULS:

British 16329
Danish 20240
Finnish 10440
French 10440
Norwegian 13040
Netherlands 12030

REPAIRS: Only small engine repairs.
AIRPORT: 10 km. from port. Served by regular airlines.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: See "Stockholm".
POLICE/FIRE/AMBULANCE: Telephone 90 000.
TELEPHONES: Connections available at oil terminal, coal terminal, ore terminal and Deep Quay.
GENERAL: All ships mooring at oil terminal over 3,000 d.w.t., and ore dock have to use tugs.
AUTHORITY: Lulea Hamn.

LYSEKIL: 58.17 N. 11.26 E. (See Plan Book)

DOCUMENTS: See "Stockholm".
PILOTAGE: Pilot boards 2 miles West of Gaven lighthouse. 5 hours advance notice required. Pilot ordered by VHF Channel 16 or telephone No. 60800.
ANCHORAGES: Safe anchorages both for small and large vessels just outside harbour in Gullmarsfiord.
RESTRICTIONS: No restrictions night entry, except max. draft possible 30 ft. No tide.
MAX. SIZE: Maximum permissible length for berthing about 600 ft. Draft 30 ft.
HEALTH: Declaration of health only when required from Customs or for vessel coming from outside Scandinavia.
RADIO: Cable Agents giving ETA, draft, cargo and cash required via Gothenburg Radio.
RADAR/VHF: No port radar service, VHF for calling Pilot, Channel 16
TUGS: Must be requested through Agent at least 12 hours before arrival.

BERTHING: 3 berths available. Gullmarskajen length 600 ft. max. draft 30 ft., Grotokajen 500 ft. max. draft 22 ft. Anderssons Kav 400 ft. max. draft 18 ft. Railway on all berths.
CRANES: Five mobile harbour cranes working all berths. Maximum capacity 40 tons. No restrictions against using ships own gear.
STEVEDORES: Ordered by Agents.
MEDICAL: Hospital in town.
TANKERS: See the port of "Brofjorden".
DENSITY: About 1027.
FRESH WATER: Available from shore installation.
FUEL: Gas oil and Diesel available.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Normally opened by crew.
CERTIFICATES: Registered Tonnage Certificate.
CUSTOMS ALLOWANCE: See "Stockholm".
IDENTIFICATION CARDS: Not required.
CONSULS: Denmark, Finland, Iceland, Norway.
REPAIRS: Small repairs possible.
HOLIDAYS: See "Stockholm".
REPATRIATION: Change of crew and repatriation possible.
AIRPORT: None.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
TELEPHONE: Police, Ambulance, Fire Brigade 90000.
AUTHORITY: Lysekils Hamnforvaltning.

MALMO: 55.37 N. 13.01 E. (See Plan Book)

DOCUMENTS:
2 Crew Lists.
1 Passenger List.
2 Lists of Personal Effects (Tobacco List).
1 Declaration of Health.
2 Stores Lists.
3 Cargo Manifests.
1 Bill of Measurement.
1 Certificate of Nationality.
1 Deratisation Certificate.

PILOTAGE: Vessel applies for Pilot by telegram, by telephone or VHF (telegraphic address, Pilotstation, Malmo; tel. 115269; VHF Channel 16). Advance notice required 5 hours before pilotage to commence. Pilot boat orange-coloured cutter equipped VHF and radar. Pilot boards at Malmo roadstead. In case of bad weather vessel awaits Pilot at roadstead. (Also see "Stockholm").
ANCHORAGE: Vessels anchor about 5 cables North of fairway buoy "Roder Prick" and East of leading lights Centralhamnsrannan Nedre and Ovre, and S.W. of leading lights Malmo Oljehamn, Nedre and Malmo Oljehamn Ovre. Depth 12 to 14 m. and bottom hard clay.
RESTRICTIONS: Speed must be reduced inside breakwaters. When red flag hoisted (red lantern at night) at the N.E Dry dock pier head, indicating dock gates open, vessels may pass breakwater at min. speed. Bridge opening signal for passing from South Wharf Basin 2 long blasts, followed by 1 short.
MAX. SIZE: *Oil Harbour:* Max. length 225 m. on draft not exceeding 10.4 m.
Free Port: Max. length 220 m. on draft not exceeding 8.6 m. Max. length recommended in New Harbour is 150 m. on max. draft 6.6 m. and in Industrial Harbour 180 m. on max. draft 8.4 m. No tides.
HEALTH: Free pratique automatically granted arriving from non-infested areas. If arriving from infested areas health declaration must be presented immediately on arrival. If diseases on board suspected, vessel allowed to enter after approval City Medical Adviser, but nobody allowed on board until vessel's crew examined by doctor and after approval of medical adviser.
RADIO: Vessel can route ETA cables to Gothenburg Radio (call sign SAG or Channel 26 on VHF), open all hours. Radio stations can also be called by radio-telephone on 2182 kHz.
VHF: Port Control Office equipped with VHF (Channel 16, 12 and 14), open 24 hours a day. Masters can receive information about berthing place, present traffic and existing hazards to navigation in harbour area.
TUGS: Tugs usually meet vessels at roadstead. Ship's lines used. Four tugs, supplied at all hours, also carry out ice-breaking.
BERTHING:
Privately owned Quayside Silos:

933	341	19.5	2	6 – 20	19 – 23.2	1×20 tons crane

12 of these cranes can be equipped with grabs

BRIDGE: Will be opened with certain exceptions 0700 – 1700 hrs. weekdays. May be opened other hours on request to Port Control Office.
STEVEDORES: Work in shifts from 0600 through to 0100 hrs.
CONTAINER HANDLING FACILITIES: 10 Roll-on/Roll-off ramps, 2 container berths with 40 tons capacity container cranes, 3 forklift trucks with 25 – 40 tons capacity.
MEDICAL: No advance notice required for medical attention. Good hospital facilities available. See also "Health".
TANKERS: The Oil Harbour in the Northernmost section of the port of Malmo, and can be reached by a special approach fairway, the Oil Harbour channel, which has a depth of nearly 37 ft. The harbour is equipped with 7 berths, 2 of these being for ocean-going tankers with modern equipment for the unloading of oils and chemicals. Water depth varies between 20 and 36 ft.

(continued overleaf)

The harbour can accept fully-loaded tankers of up to 32,000 d.w.t. as well as partly-loaded ships of up to 65,000 tons.

The berths for ocean-going tankers are each equipped with 3 hydraulically manoeuvrable transfer plants for faster and more reliable unloading. A piping system leads from the berths, unloading capacity of up to 2,000 tons per transfer plant, berth and hour. Tanks and pipes can be heated from a central steam-production station used by all firms. The Oil Harbour area also contains storage tanks for liquid chemicals and solvents. There are also good possibilities for development within the area, for e.g. petrochemical industries.

Berth	*Quay Length*	*Depth*
1003	770 ft.	36 ft.
1004	770 ft.	36 ft.
1006 – 1007	295 ft.	19.5 ft.
1008 – 1009	295 ft.	19.5 ft.
1010	328 ft.	19.5 ft.

DENSITY: Average density 1010. No tide experienced.

FRESH WATER: Fresh water available all berths and delivered by private company (AB Malmo Skeppshjalp, tel. 970470.) Rate of delivery 60 t.p.h.

FUEL: All normal grades available. No special advance notice required.

FIRE PRECAUTIONS: Apart from usual non-smoking precautions, vessel discharging or loading dangerous goods of Class 1 in IMCO code required to have a fire guard on board at all times.

In Oil Harbour the shore-valve watchman also serves as fire guard.

GANGWAY/DECK WATCHMEN: Not considered necessary other than in Malmo Oil Harbour. Decision to be made by Master.

OPENING/CLOSING HATCHES: Normally carried out by stevedores on ocean-going vessels.

CERTIFICATES:

International Bill of Measurement.
Certificate of Nationality.
Deratisation Certificate.
Load-line Certificate.
Radio Certificate.
Safety Equipment Certificate.
Gear Certificate.

CUSTOMS ALLOWANCE: Tobacco, 200 cigarettes or 40 cigars or 150 grams of smoking tobacco per week out of bond. Spirits, 0.7 litre spirits per week out of bond.

CARGO GEAR: No additional requirements.

IDENTIFICATION CARDS: Not needed.

REPAIRS: Ship and engine repairs of all kinds, and dockings carried out by Kockums Mekaniska Verkstad, one of biggest shipyards in world. Certain kinds of repairs carried out by other firms in town.

DRY DOCKS: 2 dry docks for ships up to 25,000 d.w.t. and 1 dock with a capacity of 750,000 tons. Efficient crane equipment permits single lifts of up to 800 tons. Kockum are also large manufacturers of ship's engines, in particular MAN diesels and De Laval steam turbines.

REPATRIATION: Facilities exist for effecting crew changes and arranging repatriations.

AIRPORT: Sturup Airport, served by regular airlines, situated about 25 kms. from Port of Malmo.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: See "Stockholm". Cargo work can be arranged on those days after agreement with Stevedore Company. Oil tankers can be dispatched all hours.

POLICE/AMBULANCE/FIRE: 90000.

TELEPHONES: Can be connected at most berths. Cost Sw. kr. 15:-/day plus actual cost of long-distance calls.

SERVICES: All services available.

DELAYS: No delays expected.

AUTHORITY: Malmo Hamnforvaltning.

NORRKOPING: 58.36 N. 16.12 E. (See Plan Book)

DOCUMENTS: 3 Customs Documents. 3 Health Documents. 3 Crew Lists. 3 Passenger Lists. 3 Manifests.

Master of ship arriving from abroad to first Swedish port has to give Maritime Declaration of Health on special form.

PILOTAGE: See "Stockholm". Ships will be received 2 nautical miles North of the lighthouse Gustav Dahlen. The Pilot must be ordered on radio, telephone or in some other way at least 5 hours before piloting to start.

ANCHORAGES: 58° 38.7′ N. 16° 22.5′ E. Depth 70 ft.

RESTRICTIONS: Tankers loaded with more than 10,000 tons gasoline must not move in port at night-time. Tankers over 15,000 d.w.t. will not be shifted at night-time. Pampushamnen Oil Jetty: Tankers loaded with more than 10,000 tons must not enter at night-time. Inner Harbour: Tankers loaded with more than 15,000 tons must not enter at night-time.

MAX. SIZE: Pampushamnen Oil Jetty can berth vessel of about 45,000 d.w.t. with max. draft of 9.9 m. MLW. Gastgivarehagen Oil Jetty can berth vessel with a max. draft 8.4 m. MLW and length 195 m. Ramshall and Tallbracken Oil Jetty can berth vessel with max. draft 8.4 m. MLW, length 177 m., breadth 24.4 m., daytime only. General cargo quay (Ohmanskajen) can berth vessel max. draft 8.4 m. MLW and max. LOA 195 m. Dry cargo vessels of 15,000 d.w.t. or more for Ohmanskajen daylight entry only. Dry cargo vessels of max. LOA 195 m. and max. breadth of 23 m. and vessels of max. LOA 180 m. and max. breadth of 26 m. permitted. Vessels exceeding this size shall obtain prior permission from Pilots to enter the Ohmanskajen through the Lindo Kanal. Vessels must be able to make head-way through the Kanal with a speed not exceeding 5 knots. Dry cargo vessels of 25,000 d.w.t. or more should have bridge controlled main engines. Inner Harbour can berth vessel max. draft 6.4 m.

Largest tanker at Pampushamnen, 65,405 d.w.t. LOA 236.66 m. Also see "Tankers".

RADIO: Stockholm Radio, Tingstade Radio.

RADAR/VHF: VHF radio Channel 14 and 16. No radar.

TUGS: 3 tugs available, 1,680 b.h.p., 1,265 b.h.p. and 310 b.h.p. The 2 large tugs are icebreaking. Join vessel off St. Juten 58° 38.1′ N., 16° 19.6′ E. Ship's lines to be used. All towing is carried out subject to "Scandinavian Tugowners Standard Conditions of the year 1959 revised 1974".

BERTHING: No specific requirements except at Oil Jetty Tallbacken and Ramshall, which require daylight docking and undocking.

Berths specially equipped for grain, berths equipped for containers, berth for roll-on/roll-off traffic, berths handling liquid chemicals. 4,500 m. of quayage with depths of 5 – 10.5 m. and 6 oil jetties.

Roll-on Roll-off berths:

One Ro-Ro berth with a fixed concrete ramp and a water depth of 9 m. Loading and discharging by shore cranes may take place simultaneously with Ro-Ro operations. Sternloading vessels port side alongside.

One Ro-Ro berth with a fixed concrete ramp and a water depth of 8 m. for Ro-Ro operations only. Sternloading vessels starboard side alongside. One Ro-Ro berth with a fixed concrete ramp adjacent to the heavy lift crane specially designed for heavy loads. Water depth 9 m.

Djuron

Grain terminal, position 58° 38′ N., 16° 20.1′ E. 160 m. long concrete pier with a water depth of 13.5 m. MLW. Travelling grainloader with maximum loading capacity 500 tonnes/hour. Max. elevation above MLW 18 m.

Braviken

Paper Mill, Holmens Bruk AB. Position 58° 38.3′ N., 16° 16.1′ E. 126 m. long concrete pier with a water depth of 9 m. MLW. Mobile cranes for loading on request. Otherwise ships gear. Roll-on/Roll-off fixed concrete ramp 20 m. wide with a water depth of 7 m. MLW. Stern loading vessels starboard side alongside.

CRANES: All cranes are owned and operated by the Port Authority. These include 26 electrical transportable quay cranes with a capacity of 4 – 10 tonnes, two 25 tonnes cranes adapted for 20 ft. and 40 ft. container handling which together can lift 45 tonnes, two 25 tonnes mobile cranes, one fixed heavy lift crane with a maximum lifting capacity of 320 tonnes and one 4 tonnes floating crane.

STEVEDORES: Gangs must be ordered before 1500 hrs. day before arriving.

MEDICAL: Arranged by Agent. All services available.

TANKERS: *Pampushamnen:* Pier I: Depth alongside 10.5 m. The berth is equipped with a crane for the handling of hoses and has pipe connections for all petroleum and bitumen products. Permanent gangway for the use of tankers.

Pier II: Depth alongside 10.5 m. The berth is equipped with a crane for the handling of hoses, and 3 mechanical couplings and has pipe connections for all petroleum products. Permanent gangway for the use of tankers

Pier III (coastal tonnage): Depth alongside 7.5 m. The berth is equipped with a crane for the handling of hoses and has pipe connections for all petroleum products.

Fuel oil: one 18 in. and one 16 in. pipe-lines for discharging. 2 connections with 8 in. hoses. Gas oil: 14 in. pipes with 2 connections to 8 in. hoses. Asphalt: 10 in. pipes. Kerain: 10 in. pipes with 1 connection to 8 in. hose. Gasoline: 12 in. pipes with 1 connection to 8 in. hose. Connection to bigger or smaller hoses possible through existing flange-connections.

Pipe connections for discharging ballast water are installed at all piers at Pampushamnen. Receiving of ballast water is covered by ballastage. Ballast water containing any chemical agents not accepted.

Receiving capacity during the first hour is 650 cu.m. Thereafter, 150 cu.m./h.

Tallbacken (Shell): Depth alongside 9 m. Beam of vessels restricted to 24 m. (78 ft. 9 in.) due to passage through the Handelo drawbridge. Vessels require own gear for the handling of hoses.

3 connections for variable kinds of oil, 8 in. hose connections.

Gastgivarehagen (Gulf): Depth alongside 9 m. The berth is equipped with a crane for the handling of hoses.

4 connections for variable kinds of oil, 8 in. hose connections.

FRESH WATER: Delivered by 1 water boat of 90 cu.m.

FUEL: All grades available, delivered by boat. Notice: daytime not necessary.

DENSITY: 1000.

GANGWAY/DECK WATCHMEN: Watchmen are not necessary. Hose-watcher required during loading and discharging of tankers.

OPENING/CLOSING HATCHES: Decided from case to case.

CERTIFICATES: International Tonnage Certificate, Derating Certificate, Trade Certificate, and Radio Safety Certificate.

IDENTIFICATION CARDS: Not needed. Crew List to be used in Oil Jetties.

REPAIRS: Minor repairs can be effected.
DRY DOCKS: None.
AIRPORT: Norrkoping 80 km., and Stockholm 120 km.
HOLIDAYS: New Year's Day; Good Friday; Easter and Easter Monday; Labour Day (1st May); Whit Monday; Midsummer Day and Christmas Day.
POLICE/FIRE/AMBULANCE: Police 17100; Ambulance 90000; Fire 90000.
TELEPHONE: None available for placing on board.
SERVICES: None.
SHORE LEAVE: Permitted.
AUTHORITY: Hamnkontoret Nykoping.

NYNASHAMN: 58.55 N. 17.58 E. (See Plan Book)

OIL HARBOUR

DOCUMENTS:

2 Crew Lists, and 3 Crew Lists on Imco form.
3 copies General Declaration (form supplied on arrival).
Bill of Health.
Deratisation Certificate.
3 copies Cargo Manifest/Bills of Lading.
Tonnage Certificate.
Certificate of Nationality.
Stores and Personal Effects Declaration.
Tovalop Certificate.

RESTRICTIONS: Draft limited to 13 m. through the archipelago to the harbour.
MAX. SIZE:

Berth	*Max. Length of Vessel*	*Max. Distance Bow-manifold*	*Water Depth*
1	300 m.	140 m.	17 m.
		165 m.	15 m.
2	110 m.	60 m.	7 m.
3	250 m.	90 m.	12.5 m.
		105 m.	12.0 m.
4	120 m.	60 m.	12.9 m.
5	70 m.	—	*5.2 m.

*As far as 18.0 m. N.E. of the berth.

HEALTH: Vessels arriving from ports outside Europe must, for inward clearance, provide Customs Office with written declaration of freedom from infection. Further instructions will be issued by Customs Office when such declaration cannot be given.
RADIO: Stockholm Radio; call sign SDJ.
VHF: Nynasoil on Channels 16, working 9 and 13.

Channels 8, 12 and 16 are portable and used during mooring operations.

BERTHING:

Berth No. 1: Loading arms: 3×12 in. for crude oil, 1×8 in. for bunker. Min. height of loading arms above sea level 2.5 m. Max. height of loading arms above sea level 23 m. Min. distance between connections of 2 loading arms 1.5 m.

Fresh water supply max. 15 t.p.h.

Ballast water can be pumped ashore at a max. rate of 300 cu.m. per hour.

Connection with the loading arms. Vessels usually berth starboard side alongside.

Berth No. 3: Loading arms: 1×10 in. for dirty oil. 1×10 in. for light fuel oil. 1×10 in. for gasoline. Min. height of loading arms above sea level 1 m. Max. height of loading arms above sea level 16.5 m. Min. distance between connections of 2 loading arms 1.5 m. Fresh water supply max. 15 t.p.h.

Ballast water can be pumped ashore at a max. rate of 300 cu.m. per hour. Connection with the loading arms. Vessels usually berth portside alongside.

Berth No. 2, 4 and 5: For coasters only. Jetty No. 2 and 4 are equipped with loading arms and hose connections of 6 in., 8 in. and 10 in. Jetty No. 5 hose connections only.

DENSITY: 1010.
FRESH WATER: Can be supplied from the piers. No barges.
FUEL: All grades can be supplied from the piers. No barges.
CUSTOMS ALLOWANCE: 200 cigarettes per person per week. 1 bottle of wine and spirits per person per week.
CONSULS: All consuls available at Stockholm.
REPATRIATION: Can be arranged.
AIRPORT: Nearest at Stockholm.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summertime (April 6th – September 27th).
SHORE LEAVE: No restrictions.
AUTHORITY: Nynashamnsraffinaderiet.

ORNSKOLDSVIK: 63.17 N. 18.43 E. (See Plan Book)

DOCUMENTS:

1 Crew List.
1 Passenger List.
4 Customs Documents.
1 Health Document.
1 Manifest.
1 Bill of Lading.
1 Ship's Paper.

PILOTAGE: Pilot station, Ornskoldsvik, tel. 0660/66003. 5 hours' notice. VHF Channel 16. Orange-coloured motor launch fitted with radar and VHF. International signals. Station 2 miles South Skagsudde Lighthouse. Pilots serve all ports between Umea and Harnosand, also Sea Pilots and ice advisers for Gulf of Bothnia. (Also see "Stockholm").
ANCHORAGE: Ornskoldsvikfjarden 30 – 75 ft. Anchorage forbidden in area Raskarson-Malmon-Buron.

AIRPORT: Oskarshamn, 3 km. away, 2 flights daily to Stockholm.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: See "Stockholm".
POLICE/AMBULANCE/FIRE: Police, tel. 15090; Alarm, Police/Ambulance/Fire 90000.
TELEPHONES: Available, for connection on board.
SERVICES: Compass adjusting.
AUTHORITY: Oskarshamns Port and Stevedoring Co.

OTTERBACKEN: 58.57 N. 14.02 E. (See Plan Book)

DOCUMENTS:

2 Crew Lists.
1 Store List.
Ship's Register.
1 Manifest of Bill of Lading.

PILOTAGE: Pilotage is not compulsory. Pilot obtainable at Vanersborg.
ANCHORAGE: In the roads in depths from 16 to 19.5 ft., clay bottom, and in the bay E. of Storon from 18 to 16.5 ft., clay and sand bottom.
MAX. SIZE: All ships able to pass through the Trollhatte Canal with a max. draft of 16.7 ft. at MWL can enter the harbour.
HEALTH: No certificates required. In event of any disease or fever contact agent.
RADIO: All messages to Agent via Gothenburg Radio.
VHF: Port of Otterbacken can be reached by VHF Channel 16.
TUGS: Tugs available when icebreaking is necessary.
BERTHING: Gamla Kajen (old quay) Length of quay 374 ft. Depth alongside 13 ft.

Nya Kajen (new quay) Length of quay 890 ft. Depth alongside 17 ft. – 18 ft.

Galejholmskajen (Galejholms Quay): Length 590 ft. Depth alongside 17 – 18 ft.

CRANES: One 50 ton fixed crane; two 7 ton travelling bridge cranes; two 10 ton movable diesel cranes; one 5 – 7 ton portal crane.
STEVEDORES: Provided by Speditionskontoret (Otterbacken) Ordinary working hours: From 0700 to 0900, 0930 to 1300 and 1400 to 1630.
MEDICAL: Hospital available.
FRESH WATER: Available.
FUEL: Available.
REPAIRS: Minor repairs only can be effected.
GANGWAY/DECK WATCHMEN: Available but not compulsory or necessary.
HATCHES: Opening/closing is normally carried out by the crew.
CUSTOMS ALLOWANCES: 200 cigarettes and 0.75 litres spirits for each crew member.
AIRPORT: Karlstad 90 km; Gothenburg (Torslanda) 180 km.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: January 1st and 6th; Good Friday; Easter Monday; May 1st; Whitsuntide; December 25th and 26th.
POLICE/AMBULANCE/FIRE: Tel. 90000
TELEPHONES: Not possible to place telephones on board. Telephones available at harbour office.
SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.
AUTHORITY: Otterbackens Hamn A.B.

OXELOSUND: 58.40 N. 17.08 E. (See Plan Book)

PORT LIMITS: The seaward boundaries of the port is a line between the Eastern point of Ljungholmen and the oil quay. For ore-loading ships, a vessel is considered to be an "arrived vessel" when at anchor at the roads West of Vinterklasen.
DOCUMENTS:

4 Crew Lists (3 for Customs and 1 for Ship's Agent).
4 Passenger Lists, if passengers are not inserted in Crew List.
2 Customs Documents, showing all alcoholic liquors and tobacco, belonging to officers, crew and passengers.
2 Customs Documents, showing ship's store of alcoholic liquors and tobacco.
Health Documents, not necessary.
Manifests, at least 4 copies, normally only for general cargoes.
Bills of Lading, at least a copy if not otherwise stipulated.
Ship's Paper, Ship's Register and Deratisation Certificate, not older than 6 months.

PILOTAGE: (See "Stockholm"). Pilot station located at Oxelosund, tel. 0155 30200. ETA required 5 hours in advance in order to avoid charge for waiting. When ships in open sea inform pilot station over telephone, transfer over Stockholm Radio, call sign SDJ or Gothenburg Radio, call sign SAG, will be recommended. VHF Channel 16 can be used for contacting Pilot station or Pilot boat. Approaching vessel applies for Pilot when daylight with flag signal "G" and when dark with pilot-light or Morse Code PT. Pilot boats orange. Ships advised to proceed by Northern inlet, where Pilot will board at Norra Krankan Lighthouse, Lat. 58° 37′ N., Long. 17° 27′ E. International requirements with respect to boarding and safety measures. Vessels awaiting for Pilot are prohibited to ride at anchor North of Lighthouse "Gustaf Dalen".
ANCHORAGES: Suitable anchorages West of Vinterklasen, clay-holding ground, depth 30 – 40 m., and between Beten Lighthouse and Harbour, clay-holding ground, depth 20 m. Ships are not allowed to berth until they receive orders and in the meantime they must anchor and await orders.
RESTRICTIONS: No tides. Draft not over 44 ft. 04 in. at MLW. No other special restrictions with exception of berthing ships of and over 30,000 d.w.t.
MAX. SIZE: Ore loading berth: Vessels between 3,000 and 80,000 d.w.t. can be loaded. Depth at quay 45 ft. Berth for unloading coal, iron ore: Ships of up to 40,000 d.w.t. can be discharged. Depth at quay 39 ft. 4 in. Berth for general cargo: Depth at quay 32 ft. 10 in. Oil pier: Oil carrier up to 80,000 d.w.t. can be berthed. Depth at quay 45 ft.
HEALTH: No special regulations.
RADIO: Stockholm Radio, call sign SDJ, or Gothenburg Radio, call sign SAG.
VHF: Harbour Authorities and Clearance Department for ore loading ships has VHF Channel 16.

TUGS: Two modern combined tugs and ice-breakers of 1,680 and 1,260 IHP. Ship's lines to be used. Tugs normally join vessel near Beten Lighthouse, just near harbour.
BERTHING: Harbour Pilot compulsory and normally ordered by ship's Agent. No tides. Depths in harbour can vary occasionally from minus 1 ft. 6 in. to plus 1 ft. according to temporary alterations of MWL. Ships of and over 40,000 d.w.t. cannot be berthed when dark.
CARGO HANDLING FACILITIES: The port has, among other things, one ore quay equipped with a travelling ore-loader with an average capacity of 2,000 t.p.h. One quay for unloading coal, iron ore and similar equipped with two travelling cranes with a capacity of 600 t.p.h. At No. 7 Quay there is a 25 m. traverse ferry ramp equipped to accommodate roll-on/roll-off traffic.
STEVEDORES: No special ETA advice required. Master of ship with general cargo has to inform Agent in advance number of gangs required.
MEDICAL: Necessary for Agents to receive advance notice of required medical attention, informing Agent if doctor should meet upon ship's arrival, if ambulance is required for transport to hospital and promptness required. No special vaccination/fever certificates necessary. Hospital at Nykoping, about 8 miles from Oxelosund.
TANKERS: One tanker berth, depth at quay 45 ft. Connection to load/discharge lines, have diameter of 8 in. – 16 in. Almost all types of oils. No slop/residue/facilities.
DENSITY: 1006 – 1016, 75% fresh water. No tides.
FRESH WATER: Available. Delivery through lines from quays at a rate of 10 t.p.h. Fresh water can also be delivered by tugs which have fresh-water tanks.
FUEL: All grades of heavy fuels can be delivered. At least one day's notice.
FIRE PRECAUTIONS: Watchman necessary when loading/discharging gasoline.
GANGWAY/DECK WATCHMEN: When ship berthed, reliable gangway must be arranged to quay. Tankers discharging/loading gasoline must have watchmen, arranged through ship's Agent.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CERTIFICATES: Usual international certificates. In order not to delay despatch, important that following certificates are available and valid: Measurement, Life-boat, Radio and Deratisation (not older than 6 months).
CUSTOMS ALLOWANCE: (Tobacco), each crew member permitted out of bond about 200 grams tobacco and 5 packets of cigarette-paper. (Wine and/or Spirits), each crew member is permitted to have out of bond 1 bottle spirits or 2 bottles of wine, if he is over 20.
CARGO GEAR: International certificates necessary. No additional requirements.
IDENTIFICATION CARDS: Not needed.
CONSULS: Denmark, Percy Tham AB, tel. 0155/30600; Finland, Percy Tham AB, tel. 0155/30600.
REPAIRS: Minor repairs can be undertaken at workshop on No. 1 quay. Tel. 0155/30547.
DRY DOCKS: None.
REPATRIATION: Crew changes can be effected and necessary repatriation arranged by Agent.
AIRPORT: Arlanda 40.4 miles outside Stockholm. Distance Oxelosund – Stockholm 92.8 miles. Total distance 133.2 miles. Served by regular airlines.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours (6th April – 28th September).
HOLIDAYS: General holidays on which no cargo work can be arranged: New Year's Day; Epiphany; Good Friday; Easter Monday; Labour Day; Ascension Day; Whit Monday; Midsummer Day; All Saints' Day; Christmas Day; Second Christmas Day; New Year's Eve; Whitsun Eve; Midsummer Eve; Christmas Eve.
POLICE/AMBULANCE/FIRE: Dial tel. 90 000 and ask for "Police-alarm", "Ambulance" or "Brandalarm" (Fire alarm).
TELEPHONES: Arrangements for placing telephones on board exist at Berth Nos. 9.5, 10 and 11. Cost for connection is charged per day.
SERVICES: No tank-cleaning equipment. Facilities for discharge of tank-washings.
SHORE LEAVE: No restrictions.
REGULATIONS: Ice-breaking dues equal to harbour dues are charged 21st December – 20th March each year.
DELAYS: Normally no delays.
AUTHORITY: Port is owned by the railway company, TGOJ, Eskilstuna. Local Authority: TGOJ, Harbour Office.

PITEA (Incl., Haraholmen, Pitsundet): 65.19 N. 21.29 E. (See Plan Book)

DOCUMENTS:
2 Crew Lists.
2 Lists Spirits and cigarettes.
Manifests and Bills of Lading of incoming cargoes to be presented to Customs.
1 Deratting Certificate.
PILOTAGE: Pilot to be taken at Gaasoeren-Skelleftea district. Must be ordered at least 5 hours prior arrival. All VHF Channels used – also onboard pilot-boats. (Also see "Stockholm".)
Outward-bound vessels must order Pilot from Harbour Office during office hours.
Signal station at Pitsund.
ANCHORAGES: Accordance Pilots advice.
RESTRICTIONS: No entry in darkness to smaller ports in district.
MAX. SIZE: Max. size through Pitsundet draft up to 22 ft.
Max. draft to Skuthamn 22 ft. and Pitea Town 17 ft. To Pitea max. about 3,000 d.w.t. No tides. Also see "Berthing".
HEALTH: No special restrictions. Diseases must be reported to Customs before entering port.
RADIO: Stockholm Radio, Hornosand Radio.
Radar and VHF on all stations. VHF also at signal station in Pitsundet – entrance to Pitea. Channel 16 only. Harbour Office, Channels 16, 9 and 13.
TUGS: Tugs available if ordered beforehand. Tugs compulsory for larger vessels. Costs for three tugs about Skr 30,000.
BERTHING: At Pitea, larger vessels berth in daylight only.
Haraholmen: Quay recently completed, length 600 m. plus Ro/Ro ramp, depth 12.5 m., max. draft 11.5 m. Quay is equipped with electricity, telephones, water and oil. Quay is very strong, capable of taking loads up to 250 tons.
Harbour is specially built for all year round traffic. Eight propeller engines are installed under the quay to keep water running and quay ice-free. Special lights are installed to assist in bad visibility.
Quay is equipped with 2 "*Asea*" cranes of 12.5 tons and 19.5 m. outreach.
STEVEDORES: Bottenvikens Stuveri AB – Pitea. Labour must be ordered latest at 1400 hrs. for morning start following day. Tariff available from Agents.
MEDICAL: All treatments available without notice.
TANKERS: Only one berth at Haraholmen. Max. draft 37 ft. 10 in. FW. No further restrictions. 2 tugs compulsory for vessels over 15,000 d.w.t.
FRESH WATER: Available by pipe and lorries.
FUEL: All grades available.
GANGWAY/DECK WATCHMEN: Not necessary but available if ordered.
OPENING/CLOSING HATCHES: Normally done by ship's crew.
CUSTOMS ALLOWANCE: (Tobacco), 200 cig./man per week. (Wine and Spirit), 1 bottle man/week. Only crew members over 18.

CONSULS: None.
REPAIRS: All types of repairs can be effected.
DRY DOCKS: None.
AIRPORT: Regular flights 9 times per day. Kallax Airport at Lulea. Distance 50 km. from port. 60 minute flight to Stockholm.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Tel. 90.000.
TELEPHONES: Facilities for placing on board available.
GENERAL: Masters to note the signals to be given before passing Pitsundet. Master must not forget that Pilot must be taken at Gaasoeren-Skelleftea district. If Pilot on bridge all way from Skelleftea to Pitea, a distance fee is charged. Piloting from Nygraan Lighthouse (entrance Pitea) only normal fee.
AUTHORITY: Hamnkontoret Pitea, Sjofartshuset-Haraholmen.

RONNEBY: 56.10 N. 15.17 E. (See Plan Book)

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
4 Customs Documents.
1 Health Documents.
2 Manifests.
1 Bill of Lading.
PILOTAGE: Pilot is taken at Karlshamn or Aspo (Karlskrona) pilot stations. Tel. Karlshamn 0454/14102, Aspo 0455/29016. Ordered over Karlskrona Radio on 3289 kHz or by VHF on Channel 16 (156.80 mcs). Pilot should be ordered 5 hours in advance. (Also see "Stockholm").
ANCHORAGE: Open roads.
MAX. SIZE: Limited by depth in fairway: 20 ft. 9 in.
RADIO: Karlskrona Radio, 2182 kc/s.
VHF: VHF call sign Ronnebyhamn, Channel 16, 12, 13.
TUGS: None, when necessary such ordered from Karlsham or Karlskrona.
STEVEDORES: ETA given to ship's Agent sufficient.
MEDICAL: Medical attention required ordered from Agents.
TANKERS: Only small tankers with max. draft 20 ft. 6 in. 1×10 in. and 1×12 in. (1979) line. No facilities for residue discharge.
DENSITY: 1000. No tide.
FRESH WATER: From water post on quay.
FUEL: Diesel oil from tank-lorries.
OPENING/CLOSING HATCHES: Performed by crew.
CERTIFICATES:
Deratisation Certificate not over 6 months old.
Certificate of Nationality.
Certificate of Tonnage.
CUSTOMS ALLOWANCE: 200 cigarettes plus 1 bottle spirits out of bond.
IDENTIFICATION CARDS: Not needed.
CONSULS: Danish Consulate, tel. 0457/10675.
REPAIRS: Minor repairs only.
DRY DOCK: None.
AIRPORT: About 6 miles from Ronneby Harbour; daily flights to Malmo, Stockholm and Visby.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer (from April).
POLICE/AMBULANCE/FIRE: Police 90000; Ambulance 90000; Fire 90000.
TELEPHONES: Telephone box on Quay.
AUTHORITY: Ronneby Hamnstyrelse (Harbour Board).

SIKEA: 64.9 N. 20.59 E.

SHIPPING HAS CEASED AT THIS PORT.

SKELLEFTEHAMN: 64.41 N. 21.15 E.

DOCUMENTS:

2 Copies of Crew Lists (at Ronaskarsverken 3 copies).
1 List of Provisions.
Measure Bill.
Manifests and Bills of Lading.

PILOTAGE: Telegraphic address: "Pilot station. Skelleftehamn". Advance notice required, 5 hours. Contact pilot boat or pilot station on VHF Channel 16. Calling signal "Skelleftea Pilot" (pronounced – Shellefteo Pilot). Pilot motor boats usually orange. Pilot taken on board 2 miles East of Gasoren Lighthouse. (Also see "Stockholm".)
RESTRICTIONS: No tides or tidal current.
MAX. SIZE: Maximum permissible length of tanker 590 ft. in accordance to dredged basins length.
HEALTH: In case of disease or suspected disease, ship should call for medical assistance in common Swedish order.
RADIO: Stockholm Radio or Harnosand Radio. When in reach of VHF station of harbour office, at 0830 – 1200 hrs. and 1300 – 1700 hrs., or else through pilot station VHF. Call signals "Skelleftea Hamnradio" or "Skelleftea Pilot Station".
RADAR/VHF: Radar service available when entering or leaving port. Contact Pilot station (Channel 16).
TUGS: Normally meet at passage of Gasoren Lighthouse. Ship's lines should be used. Tug of 3,000 h.p. also acts as local icebreaker.
BERTHING: No special requirements. *Kage:* Depth in harbour at quay 23/20 ft.; length 609 ft. *Ronnskarsverken:* Southern quay (jetty), depth 30.5 ft.; length 394 ft. Northern quay, depth 42/19.4 ft. and length 1,814 ft. *Skelleftehamn:* North quay, depth 26/21 ft. and length of 1,300 ft. Oil Terminal, (jetty), depth 34 ft. and length 210 ft. with dredged basin of 656 ft. Orviken, depth of 12 ft. along a wooden wharf of a length of 200 ft. Siporex, quay depth 19.7 ft. and a length of 150 ft.
Ronnskarsverken. Northern quay, depth 42/19.4 ft. Bjuroklubb. Length 230 ft., depth 17.5 ft.
STEVEDORES: No stipulated ETA regulations.
MEDICAL: Available at short notice. Government hospital in town.
TANKERS: One tanker berth. Max. draft 33 ft. Diameter of discharge lines 8 in. Flanges Din 2633.
FRESH WATER: At oil terminal 25 t.p.h. Elsewhere 15 t.p.h.
FUEL: All usual grades available.
FIRE PRECAUTIONS: Standard.
GANGWAY/DECK WATCHMEN: Watchmen recommended.
OPENING/CLOSING HATCHES: Carried out by crew.
CERTIFICATES: See "Stockholm".
CUSTOMS ALLOWANCE: (Tobacco): 200 cigarettes. (Wine Spirits), 1 bottle of wine and 1 bottle of spirits.
CARGO GEAR: No additional requirements.
IDENTIFICATION CARDS: Not needed.
CONSULS: Denmark, Norway, Finland and Netherlands.
REPAIRS: Minor repairs only. Patent slip, max. size 1,000 tons displacement.
REPATRIATION: Every kind of facility for effecting changes of crew.
AIRPORT: 18 km. Regular airlines, 2 flights a day.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: New Year's Day; Good Friday; 1st and 2nd Day of Easter; Ascension Day; 1st and 2nd Day of Whitsuntide; 1st May; Midsummer Day; and 1st and 2nd Day of Christmas. Cargo work cannot be arranged.
POLICE/AMBULANCE/FIRE: 38100, 31080; 90000; 58000.
TELEPHONES: Available for placing on board at the Northern quay in Skelleftehamn.
GENERAL: All waste to be taken to special waste containers ashore.
SERVICE: Small amounts of tank-washings can be taken ashore. Tug stationed in harbour.
DELAYS: In exceptionally bad weather.
DEVELOPMENTS: Planned to build jetty for drafts of about 42.5 ft.
AUTHORITY: Harbour Board of Skelleftea.

SKREDSVIK: 58.25 N. 11.30 E.

Oil-harbour in the Lysekil area.
DOCUMENTS:

3 Crew Lists, on IMCO form.
1 Cargo Manifest.
1 Copy Bill(s) of Lading.
1 Stores List.
1 Personal Effects List.
Derat Certificate.
Tonnage Certificate.
Certificate of Registry.

PILOTAGE: Pilot station at Lysekil, tel. 0523/60800. VHF Channel 16. Five hours' notice of ETA required. Pilot vessel is an orange-coloured motor launch fitted with radar and VHF. International signals. Pilot boards between Gaeven and Tovas Ungar, about 6 miles West of Lysekil.
ANCHORAGE: Gullmarsfiord, South-East of Lysekil, depth about 60 m.
RESTRICTIONS: Draft not to be in excess of 40 ft. on passage from Pilot to Skredsvik.
MAX. SIZE: Length 180 – 190 m. draft 10.0 m. No limit on breadth.
TUGS: Have to be ordered either from Gothenburg or from Uddevalla.
FRESH WATER: Can be supplied from the pier.
FUEL: Can be supplied from the pier.
CUSTOMS ALLOWANCE: 200 cigarettes and 1 bottle spirits or wine per person per week.
IDENTIFICATION CARDS: Not required.
POLICE/AMBULANCE/FIRE: Police 0522/14920, or 0524/10068 and 90000; Ambulance and Fire 0522/10051, or 0524/10550 and 90000.
AIRPORT: Nearest at Gothenburg.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
SHORE LEAVE: No restrictions, but photographing and smoking ashore is not permitted.
AUTHORITY: OE.E.F. Skredsvik.

AGENT: Ferm & Olsson AB. Post Box 66, 45300 Lysekil. Tel. nos. 0523/14060. Telex: 42080. Cables: "Fermson" Lysekil.

SLITE, Gotland Is.: 57.42 N. 18.50 E.

DOCUMENTS:

Crew Lists.
Customs Documents
Health Documents.
Bills of Lading.
Measurement Bill.
National Certificate.
Valid Derat Certificate.

All compulsory (also see "Stockholm".)
PILOTAGE: Service centralised to main station at Visby. Service da and night. Tel. 0498/10138. 5 hours notice required VHF Channel 1 (also see "Stockholm").
ANCHORAGE: Sheltered anchorage on Inner Road with up to 8.4 m. depth of water.
RESTRICTIONS: No restrictions. Entrance possible day and night.
MAX. SIZE: Draft not to exceed 21 ft. 6 in. alongside for cargo vessels. The depth at the entrance has been increased to 8.4 m. Depth alongsid remains at 7.2 m. except for vessels berthing at Bulk cement bert where depth is 8.4 m.
HEALTH: Restrictions only if fever on board or vessel coming from port where disease or fever in existence.
RADIO/VHF: Tingstade Radio Station, call sign SAE, VHF se "Pilotage".)
TUGS: No tug available.
BERTHING: No restrictions if due notice to Port Authority given.
STEVEDORES: Notice to be given latest noon on day before arriva order to make start next morning (unless special arrangements o agreements made).
MEDICAL: Attention by doctors-in-charge. Central hospital at Visby.
TANKERS: Pipe-line connection flange 8 in.
FRESH WATER: Available alongside quay.
FUEL: Practically all grades bunker oil available subject prior notice.
GANGWAY/DECK WATCHMEN: Not compulsory but available.
OPENING/CLOSING HATCHES: Ship's crew to open or close.
CUSTOMS ALLOWANCE: Presently 200 cigarettes per head/wee Practically no spirits allowed out of bond.
IDENTITY CARDS: Seamen's book or passport if travelling outside po area.
CONSULS: No consul representations at Slite. Nearest consuls (f Denmark, Norway, Finland, West Germany) at Visby.
REPAIRS: Only minor repairs possible.
DRY DOCKS: None.
REPATRIATION: Good possibilities for changing crew.
AIRPORT: About 40 km. to Visby Airport.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
TELEPHONE: Alarm tel. 90 000.
SERVICES: No services for tank-cleaning, tank washing, or compas adjusting.
SHORE LEAVE: Permitted.
AUTHORITY: Cementa AB.

AGENT: Atktiebolaget Rob. Myrsten, 620 30 Slite, Telex 4137 – A/ Myrsten. Cables: "Myrsten – Slite". Tel. 0498/22070. After hour 0498/20102/20021/25565.

SODERHAMN: (includes Stugsund, Langror oilbert Sandarne factory berth and Örrskar woodchip berth 61.18 N. 17.05 E. (See Plan Boo

DOCUMENTS:

2 Crew Lists.
3 Bills of Lading.
3 Manifests.
1 Tobacco List.

PILOTAGE: Pilot must have 5 hours notice. Telegraphic addre "Soderhamn Pilot Station", Ljusne. VHF Channel 16 for calling pilot bo and pilot station (frequency 156.8 mHz) and 13 (frequency 156.6 mHz). Pilot boat is orange. International signals to be used. Vessels c normally receive Pilot between Hallgrund and Storjungfrun. In case bad weather or ice, Master consults Pilot for advice (also s "Stockholm").
ANCHORAGE: Lilljungfru anchorage S.W. Lilljungfrun, where dep are 15 – 20 m., is W. or S.W. of Norrutharet. Branthalls ancho W. Branthall Isl., depths 10 – 15 m.
MAX. SIZE: Langror oil berth. Breadth of entrance fairway 55 – 60 and depth 8.5 m. at mean level. Max. ship length about 170 m. at quay.
Orrskar: Woodchip terminal, breadth of entrance fairway 110 depth 13 m. m.l.
Sandarne. Breadth 30 m., depth 7.2 m. m.l. 55 – 60 m. in unlit fairwa
Stugsund. Breadth 30 m., depth 6.2 m. m.l.
Soderhamn. Breadth 10 – 15 m., depth 3.7 m. m.l.

Depth varies about 1 foot below and 1 foot above m.l. Breadth given at narrowest point in fairway.

HEALTH: No special action except for suspected disease. In case of disease contact Agent for information.

RADIO: Stockholm Radio when vessels come from South and Harnosand Radio from North. Within reach Master may call Soderhamn Port Radio. Tug station is Stugsund. Tug fitted VHF, Channels 16, 13, 12.

There is a radar station at Soderhamn. Pilot station, Ljusne, and some of the pilot boats are fitted with radar.

TUGS: Normally meet large vessels at Otterhallans Lighthouse and others off quays on request. Ship's lines to be used.

BERTHING: Boatmen can be ordered by Pilots or Agents. Large ships berth oil berth only in daylight because channel not lit.

STEVEDORES: Gangs to be ordered by Agent usually at 1500 hrs. for starting next morning at 0700 hrs.

CRANES: One electric crane to lift 5 tons; one electric luffing crane to lift 6 – 10 tons and one mobile crane to lift 10 tons in Stugsund. In other berths mobile cranes can be hired by the Agents.

MEDICAL: Medical attendant available day and night.

TANKERS: 6 in. or 8 in. connections. Only 1 berth and max. depth at quay 8.5 m.

DENSITY: Practically fresh water.

FRESH WATER: Available in all ports. Delivered through pipe-lines on wharf. Rate: 10 t.p.h.

FUEL: Any normally used grade on request to oil company with few hours' notice.

GANGWAY/DECK WATCHMEN: Watchmen available.

OPENING/CLOSING HATCHES: Normally carried out by crew.

SHIP'S CERTIFICATES: Traffic permission (not necessary for ports within the custom district boundaries), Nationality and Reg. Certificate (or interim Nationality Certificate), Bill of Measurement, Swedish Sailor's Roll (only Swedish ships), Foreign Nationals Crew Passports, Derat Certificate (6 month), Certificate of Health.

CUSTOMS ALLOWANCE: (Tobacco), out of bond, 200 cigarettes or 100 gr. tobacco and 100 cigarettes. (Wine/Spirits), out of bond, 1 bottle of spirits, 75 cl.

CARGO GEAR: Valid cargo gear certificates.

IDENTIFICATION CARDS: Not needed.

CONSULS: Danish, French and Dutch.

REPAIRS: Minor plate-work and welding can be carried out.

REPATRIATION: Facilities exist for effecting crew changes.

AIRPORT: Nearest international airport. Stockholm.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: No work on official holidays, but may be possible on special request. New Year's Day (1st January); Twelfth Day (6th January); Good Friday; Easter Sunday and Easter Monday; 1st May; Whit Sunday and Whit Monday; Midsummer Day; All Saints' Day; 25th December and 26th December; New Year's Eve; Easter Eve; Whitsun Eve; Midsummer Eve; Christmas Eve.

POLICE/AMBULANCE/FIRE: Police 90000 or 0270/10020; Ambulance 90000; and Fire 90000 or 0270/12249.

TELEPHONES: In Sandarne, quay telephones can be placed on board. 2 telephones. Telephone can be placed on board at Orrskar quay.

GENERAL: There is a VHF port radio at the Port Office, Soderhamn. Working time 0800 – 1700 hrs. Channel 16 for call and working channel. During the ice-breaking season the tug may be out even at night. Tug has same channels. Soderhamn Customs District includes only Stugsund. Illjungfrun Pilot also serves ports of Ala, Ljusne and Vallvik.

SERVICES: Facilities for discharge of tank-washings max. 20 tons. Tank-cleaning and facilities for discharge of tank-washings of great extent are Stockholm and Sundsvall. Compass adjusting in Stugsund berth.

REGULATIONS: Port regulations available from Agent or Port Office.

DELAYS: Fog, ice and bad weather may delay berthing. Rain and snow can delay loading and discharging of dry cargo.

DEVELOPMENTS: A new quay at Langror berth for general cargo will be established in a few year's time.

AUTHORITY: Hamnforvaltningen.

SOLVESBORG: 56.03 N. 14.35 E. (See Plan Book)

DOCUMENTS: See "Stockholm".

PILOTAGE: Pilot station at Ahus, tel. 044/240027, needs 5 hours notice. Pilot station and pilot boat can be ordered by VHF Channel 16 (156.80 mHz) working on Channel 13. Harbour office in Solvesborg can be called on same frequency. (Also see "Stockholm".)

ANCHORAGE: Roadstead to South of harbour 25 ft. deep with good holding ground.

MAX. SIZE: Depth in outer harbour 8.2 m. (27 ft.) and in inner harbour 7.5 m. (25 ft.) Recommended for ships to have 1 ft. 6 in. of water under keel. Max. length 170 m. (656 ft.) Breadth 30 m. (98 ft.). Draft 7.7 m. (25 ft.) for vessel entering harbour. Largest ships to enter harbour were 26,000 tons oil tanker with load of 16,000 tons and 30,000 ton dry cargo ship loading 5,000 tons of pulp.

HEALTH: See "Stockholm".

RADIO: Stockholm Radio and Gothenburg Radio.

VHF: Harbour Office can be reached by VHF, Channel 16 Working frequency Channel 14.

Tug "Hafnia" – Channels 6, 13, 14 and 16.

Tug "Portia" – Channels 6, 13 and 16.

TUGS: Available. Ordered through Agent or directly to Harbour Office.

BERTHING:

Location	Length m.	Depth m.	No. of cranes (max. load in tons)
Inner harbour:			
Western quay, Southern section	225	7.5	1 (5)
Western quay, Northern section	129	6.5	1 (6)
Northern quay	85	5.0	Mobile (20)
Blekinge quay	53	4.0	—
Other quays	190	3.0	Mobile (18)
Outer harbour:			
Ro-ro ramp	20	6.0	—
Side-deck at the ro-ro ramp	45	6.0	Mobile (35)
Outer harbour quay	200	8.2	1 (20)
Oil Jetty	25 + Dolphins	8.2	—
(The ro-ro berth, quay and oil landing-stage are situated on a 500 m. line).			
Shipyard:			
Fitting-out quay (dock)	165	6.0	1 (15)
New quay	115	6.0	1 (15)

An opportunity of using a 200 tons floating (pontoon) crane belonging to the Solvesborg Shipyard.

Within the port area a total of 25 straddle, fork and clamptrucks, as well as 2 front loaders, the biggest fork truck having a lifting capacity of 25 tons.

A storage space of 17,000 sq.m. inside warehouses, and an open air space of 140,000 sq.m.

STEVEDORES: Require notice before 1500 hrs. if loading/discharging shall start at 0730 hrs. following morning, or notice before 1000 hrs. if loading/discharging shall start 1300 hrs. the same day.

TANKERS: 3 Shore-lines for oil products from oil jetty to depots.

1. 250 mm. for bunker C (2nd fuel).
2. 200 mm. for paraffin oil.
3. 200 mm. for petrol. For discharge coasters use ship's equipment.

Larger ships discharging bunker C oil use harbour's 8 in. rubber hose.

FRESH WATER: Available.

FUEL: Ordered from oil companies by ship's Agents.

GANGWAY/DECK WATCHMEN: Watchmen normally not needed. Can be ordered by ship's Agents.

OPENING/CLOSING HATCHES: Normally opened/closed by crew.

SHIP CERTIFICATES: See "Stockholm".

CUSTOMS ALLOWANCE: Tobacco: 200 cigarettes/week per head. Wine/spirit: normally 1 bottle/week.

IDENTIFICATION CARDS: Not needed.

CONSULS: Royal Danish Vice-Consulate. Railway Station Building. Tel. 0456/10115.

REPAIRS: Carried out by Solvesborgs Shipyard. Tel. 0456/10950.

DRY DOCKS: Dry dock in ship yard, 341 ft. long, 51 ft. wide at entrance, 14.5 ft. deep on sill HWOST.

Floating dock with 6,000 tons lift capacity, 476 ft. long 65 ft. wide and allows ship's draft to be 19 ft. (For ships up to about 10,000 d.w.t.).

REPATRIATION: Possible.

AIRPORT: 50 km. to Kristianstad Airport and 60 km. to Ronneby Airport. Served by regular inland airlines.

TIME: Local time is GMT plus 1 hour. Summertime (April 6th – September 28th, 1980) GMT plus 2 hours.

HOLIDAYS: See "Stockholm".

POLICE/AMBULANCE/FIRE: Dial 90 000 and ask for Police, Ambulance or Fire Department.

TELEPHONES: Telephones available in Agent's offices at quay and telephone boxes.

DELAYS: Normally no delays.

AUTHORITY: Solvesborgs Hamn.

STENUNGSUND: 58.04 N. 11.49 E. (See Plan Book)

LOCATION: Stenungsund is located on the East side of Askero Fjorden about 23 miles North of Gothenburg. There are 2 terminals.

1. The Powerboard Terminal.
2. The Esso Havden Terminal.

Both are located about 20 miles from the sea buoy at Dynan (57° 53′ N., 11° 25′ E.) and are reached via Marstrands Fjorden and Hake Fjorden.

DOCUMENTS:

3 Crew Lists.
2 Passenger Lists.
1 Tobacco and/or Stores List.
1 Manifest.
1 List of Animals on Board (if any).
Access to the usual ship's papers (measurement, register, certificate, etc.).
If away from Sweden more than 15 days: Bill of Health.

PILOTAGE: The pilot boat is steel hulled, painted orange, and it will meet ships based on ETA and VHF contact, South of Pater Noster or, by request, S.W. of Dynan Buoy.

Pilots will not handle large vessels during darkness. Those ships must anchor and await daylight. ETA advice to Pilot to be sent to "Lotsarna Marstrand" via Goteborg Radio at least 5 hours before arrival giving ship's name, flag, draft, ETA pilot station and destination. If requiring Pilot to board West of Dynan buoy (see "Approaches"), this should be stated to allow the pilot boat the extra time needed to reach there. Give 24 hours notice of ETA through Agents. (Also see "Stockholm").

APPROACHES: When approaching from the West, ships must keep North of the area dangerous due to mines extending to Latitude 57° 47′ N., Longitude 11° 03′ E.

Currents in this area are unpredictable and are much influenced by the wind. Ships have reported experiencing a change in direction of current on approaching the Dynan Buoy, for example, South-going outside Dynan, North-going inside Dynan. Currents of 1 to 3 knots have been experienced. As the normal Pilot pick up position South of Pater Noster has many surrounding dangers for deep-draft vessels, Masters of deep-draft vessels or vessels making first call should ask the pilot boat to meet vessel about 1 mile S.W. of Dynan light buoy.

The passage North of Dynan buoy should not be attempted by ships without local knowledge.

Seabuoy-Berth: For the larger ships bound for Stenungsund the recommended track is Algo Fjorden shown on charts as passing between N. Mekolm and S. Mekolm is not always followed by Pilots, some preferring to pass South of the Hunden Shoal and S. Mekolm. Great caution is needed in taking this Southerly route as there are unmarked dangers. During darkness or in poor visibility the Pilot's intentions should be fully discussed before entering Algo Fjorden.

The channel between Bratton, Kallon and Almon Islands at the North end of Hake Fjord and under the Tjornbron (bridge) between Kallon and Almon is in the form of an "S" bend and vision is obstructed. Traffic may be suddenly met with little warning, particularly as some ships do not carry Pilots, and there is no speed limit. Engines should be on standby, anchors ready and manned in this area.

ANCHORAGE: While awaiting berth vessels anchor outside harbour N.W. of Powerboard Jetty. Safe anchorages everywhere, but fairway South of Galteron Lighthouse has to be avoided.

RESTRICTIONS: Navigation of ships drawing more than 9.2 m. (30 ft.). is not practiced inwards of Algo Fjorden during darkness.

MAX. SIZE: *Powerboard Jetty:* Max. draft North side 12.30 m., South side 10.50 m.

Esso Havden: Max. LOA 210 m. Max. draft 10.4 m. (34 ft.). Distance bow to manifold 99.0 m.

HEALTH: No special pratique necessary. If any disease or fever suspected on board, doctor must be called on arrival. Pratique automatically granted when entering from another port in Sweden.

RADIO: Gothenburg radio.

VHF: Pilot on Channel 16. Working on Channel 6.

TUGS: At present no tugs are stationed in Stenungsund but have to be ordered from Gothenburg at least 2 hours steaming away.

Tugs are diesel driven, single screw, single rudder.

Tugs are made fast after passing Vinterholmen at the North end of Hake Fjord and before passing through the narrows under the bridge.

Tugs tow on the hook using ship's ropes. The larger tugs use two ship's ropes out of the same lead and care must be taken to equalise the load on the two lines before full load is taken.

The Pilot carries his own VHF set (having Channels 16, 13 and 12) and uses this to communicate with the tugs.

50,000 d.w.t. tankers use 3 tugs, 1 large tug forward, 1 large and 1 smaller tug aft.

MEDICAL: Doctors and dentists available at short notice. Hospitals situated at Uddevalla and Kungalv, ambulances at Stenungsund.

TANKERS: The Powerboard Terminal:

General: The Powerboard Jetty is a finger pier aligned W.N.W – E.S.E. located on the East side of the Askero Fjord about 1 nautical mile North of the town of Stenungsund (Latitude 58° 05.3′ N., Longitude 11° 49.2′ E.). It is shown on B.A. Chart 890. It is used for the import of fuel oil for the power station located 0.5 mile away and for the import of products, solvents and LPG for oil companies.

Cautionary Advice: Currents in Askero Fjorden are unpredictable both in speed and direction but generally run across the direction of the finger pier. The fendering of the outer corners of the pier is of low energy absorption characteristics and heavy landings must be avoided. Anchors should be manned and ready for letting go.

Berthing Procedures: On proceeding up Askero Fjorden past Havden the ship is swung to starboard with the assistance of tugs and lined up for the pier. Anchors are sometimes used to help steady the bow on the correct heading, and as assistance in bringing the ship up.

Ocean-going ships berth on the North side of the pier and are, therefore, starboard side to berth. When in position, most ships' sterns protrude beyond the end of the pier by as much as one-third of their length, therefore, maximum attention must be paid to the stern moorings. Because moorings placed on the buoy on the starboard quarter or on the bollards on the South shore prevent ships from using the South side of the pier the terminal will not, as a rule, put moorings to these points. However, in periods of unsettled weather, particularly if winds are from the S.W., Masters of the larger ships should insist on stern moorings being sent to the buoy and South shore. It should be borne in mind that tugs are not readily available at Stenungsund. Moorings are taken ashore initially by boat and then by heaving line. The forward spring line is usually first line ashore. No shore moorings are provided.

Gangway: Ship's gangway is used, there is ample room on the jetty to land the gangway abaft the manifold. Note that when ship is light the normal ship's gangway will become very steep (over 50°) and special safety precautions to prevent accidents to personnel will be necessary.

Fendering: The concrete strong points of the pier are protected by tubular rubber about 300 mm. diameter slung diagonally. The concrete outer corners are not well protected.

Cargo Connections and Handling: HFO, Heating Oil, Naphtha and Mogas are handled. Ullages and temperatures are taken jointly with shore representative upon arrival alongside.

Starboard manifold should be prepared for 10 in. hoses, 2 or 3 flexible hoses with 10 in. ASA bolted flanges are usually connected. Starboard derrick and a 4 ton shore crane are used for hose connection.

Concurrent loading and discharging are not allowed. Maximum back pressure is 10 kg/cm^2.

Naphtha receiving capacity is maximum 3,000 cu.m.p.h. Normal discharge rate is about 1,800 cu.m.p.h.

Deballasting Facilities: The terminal has limited high flash ballast reception facilities, about 2,400 cu.m. Discharge rate is about 500 cu.m.p.h.

Clean oil-free ballast may be discharged overboard but it is the ship's responsibility to ensure that the ballast water is oil-free and very heavy penalties are imposed for oil pollution.

Passing Traffic, Weather, Tide, etc.: There are no unusual problems except for strong S.W. winds when it is important that breast moorings are run to the starboard quarter buoy and to the South shore.

Special Regulations: No small craft are allowed alongside ship while at jetty.

Oil Pollution Safeguards: Floating oil booms – partly fixed and partly portable are available to surround the ship and jetty. Mechanical suction equipment is available.

Fire Fighting Equipment: Portable foam and water monitors are available at the berth.

Fresh Water: Good quality fresh water is available ex-jetty by hose, rate 25 t.p.h.

Additional Information: The berth on the South side of the Powerboard finger pier also handles HFO, heating oil, naphtha and mogas but is mainly used for loading/discharging LPG.

Esso Terminal, Havden: *General:* Esso's Havden terminal berth is located on the North side of the Havden peninsula on the East side of Askero Fjorden (Latitude 58° 05′ N., Longitude 11° 48.5′ E.). It is a marginal type berth with a breasting face about 60 m. long. It is used for the discharge of naphtha and LPG.

Cautionary Advice: (See "Powerboard Terminal").

Telegraph cables (shown on the chart) run out from the shore close Northwards of the berth and anchors should not be used. In addition, the dredged area tapers quite sharply towards the East end of the berth and use of an anchor could result in the ship "sitting" on the anchor or its cable.

Berthing Procedures: On arriving off Havden the ship is swung to starboard with the assistance of tugs and steamed slowly to the berth. Ships always berth starboard side to berth. Moorings are taken ashore by motor boat, the forward spring is usually the first line ashore. The stern of the ship is not well sheltered from the prevailing S.W. winds and special attention must be paid to putting out good stern moorings. It must be remembered that tugs are not readily available in Stenungsund. No shore moorings are provided.

Gangway: Ship's gangway used, ample room on the jetty to land the gangway aft of the cargo manifold. Note that, when ship is light, the normal ship's gangway will become very steep (over 50°) and special precautions to prevent accidents to personnel will be necessary.

Fendering: Each of the 3 concrete strong points is fendered by truck tyres around a rubber core slung horizontally. Care should be taken not to land initially between the strong points.

Cargo Connection and Handling: Only naphtha and LPG are handled at this berth. No bunkers can be provided. 2×10 in. fully counterbalanced hard arms of Chiksan manufacture are provided. Each has 10 in. ASA bolted flanges.

Ullages and temperatures are taken together with shore representative upon arrival alongside.

Starboard manifold should be prepared to accept 2×10 in. hard arms. If ship's manifold has large overhang outside the support, this should be jacked up before connection of arms. Stays, derricks, etc., in vicinity of starboard manifold should be removed. There are no facilities for receipt of dirty ballast at the terminal.

Oil Pollution Safeguards: Floating oil booms, partly fixed, partly portable are available to surround ship and jetty. Mechanical suction equipment is available.

Fire Fighting Equipment: The jetty is equipped with a fire water and a foam line and portable monitors.

Fresh Water: There is no fresh water available at this berth.

FUEL: Only available by barge from other places (i.e. Gothenburg Bunkering only during daylight. Can be ordered at short notice.

FIRE PRECAUTIONS: Normal.

GANGWAY/DECK WATCHMEN: Watchmen from ashore necessar when telephone connected.

CUSTOMS ALLOWANCE: 200 cigarettes. 1 bottle of spirits.

IDENTIFICATION CARDS: Not required.

CONSULS: At Gothenburg.

REPAIRS: Minor repairs can be made locally, large repairs by labou from Gothenburg shipyards. Gas-freeing alongside with Port Captain's approval only. Repairs alongside with Port Captain's approval only.

REPATRIATION: All facilities exist. Consuls at Gothenburg.

AIRPORT: Gothenburg 50 km. away. Regular airlines.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: Tankers load and discharge all year round.

TELEPHONES: Connected on board if required. Watchmen atten calls. Fireman and alarm on jetty during whole operation.

SHORE LEAVE: Permitted. Distance to Stenungsund 1 km., Uddeval 40 km. or Gothenburg 50 km. by bus, train or taxi. Shore passes issue at the gate.

AUTHORITY: Statens Vattenfallsverk.

STOCKHOLM: 59.19 N. 18.03 E. (See Plan Book)

DOCUMENTS:

(a) Crew List: normally 2 copies; for oil harbour at Loudden and Free Port, 3 copies.

(b) Passenger List: regular passenger services 2 copies; cruise ships (lists for cruise ships must be sent in advance to Agent for forwarding to Immigration Authorities), 2 copies.

(c) Customs Documents: Arrival report (form can be obtained on arrival), 4 copies.

(d) Quarantine Certificate or Bill of Health: Deratisation Certificate not more than 6 months old to be shown. *Note:* Additional quarantine regulations may be imposed in special circumstances.

(e) Manifest: 3 copies.

(f) Bills of Lading: 1 copy of each. Liners may be subject to other regulations with regard to *(e)* and *(f)* above.

(g) Ship's documents: Tonnage Certificate. Certificate of nationality.

PILOTAGE: *(Sweden General).* Applications for licensed Pilots should be made at least 5 hours before pilotage is due to commence. When making application specify name of vessel, tonnage, draft and destination. Also give estimated time for taking Pilot on board and route. If this procedure not followed, the Maritime Service cannot guarantee to supply a Pilot without considerable delay to vessel.

Preferable make application by telephone, or by radio via a coastal station or by some other method direct to pilot station nearest point where pilotage is to begin. Also possible request Pilot by VHF (ultra shortwave) telephone to any Maritime Service pilot station, Pilot waiting point or lighthouse which is equipped with VHF.

The Maritime Service's network of permanent VHF telephone stations has been extended to give almost complete coverage of all pilot stations and waiting points and is also operative for a number of lighthouses. The radio stations can operate on different Channels and are equipped for frequency modulation. During hours when pilot stations are open, a constant watch is kept on frequency 156.80 mc/s (Channel 16). This frequency should be used for all signals and replies – and for distress traffic. Outside these hours, normal traffic transmissions, i.e. applications for Pilots, etc. should be made on frequency of 156.65 mc/s (Channel 13) or on reserve operating frequency of 156.60 mc/s (Channel 12).

When making VHF telephone call, the type of call signal that should be sent is "Lotsarna (or pilot station) plus the name of the pilot station or the pilotage attendance".

	Arholma	*Sandhamn*	*Landsort*

Vartan	22 ft. 08 in. – 34 ft. 00 in.	600 ft. – 800 ft.

HEALTH: Vessels arriving from ports outside Europe must for inward clearance provide Customs Office with written declaration of freedom from infection. Further instructions will be issued by Customs Office where such a declaration cannot be given.

RADIO: Stockholm Radio, call sign: SDJ.

RADAR/VHF: All 3 pilot stations have radar for internal use. No harbour radar service. VHF Channels 16 and 12.

TUGS: Very large vessels may be met by tugs by special arrangement at pilot boarding point. Tugs available to special order to assist with berthing; the rendezvous usually near berth.

Rates: According to fixed tariff.

BRIDGES:

RULES CONCERNING VESSELS CROSSING SEALANE AT LIDINGO BRIDGE

In force as from 1st May 1970 until further notice. Movable part of Lidingo Bridge is opened after request for letting vessels pass through 5 minutes before full- and half-hour, in accordance with following table.

October – April: Weekdays except day before Sunday or holiday, 0825 – 1600 hrs.

May – September: Every day 0825 – 1600 hrs.

Vessels in regular traffic may pass the bridge at other times than those stated above after application to the bridgekeeper during working hours, before 1300 hrs. if the passage is to take place the same day.

The passage is free of charge.

HOURS FOR OPENING FOR MOVABLE ROAD BRIDGES OVER HAMMARBY SEALANE

Movable parts of road bridges over sealane of Hammarby opened on request for vessel unable freely to pass under the bridges, all through the year at regular hours.

BERTHING: Services of boatmen available any time day or night. *See Table overleaf.*

STEVEDORES: Stevedores available at 0700, 0930, 1100 and 1330 hrs., Stevedores required for 0700 hrs. must be booked previous day: otherwise can be booked for next starting time.

MEDICAL: Duty Medical Officer available all hours day or night. Tel. Stockholm 21 55 49, 11 83 31 or 20 30 91. Seamen admitted to hospital with note from Medical Officer for Seamen, but not necessary for emergency admissions. Valid certificates of vaccination must be produced. Any necessary vaccinations carried out by Medical Officer for Seamen.

TANKERS:

Tanker discharge quay	*Diameter of discharge pipe-lines in.*	*No. of tanker berths*	*Depth of water at quayside ft. in.*

** Besides the quay cranes there are 2 pontoon cranes of 6 – 260 tons lifting capacity, the biggest one with own propelling machinery. The number of cranes is thus 77. In addition to these there are some cranes in private ownership.

OPENING/CLOSING HATCHES: If opened and closed by stevedores, subject to extra fee.

CERTIFICATES:

Tonnage Certificate.

Certificate of Nationality.

Deratisation Certificate not more than 6 months old.

Ship's articles, crew list or similar document listing all persons signed on aboard.

CUSTOMS ALLOWANCE: Tobacco: 200 cigarettes per person per week or 200 g. (7 oz.) of tobacco per person per week. Wine and/or spirit: One bottle of spirits per person per week, one bottle of wine per person per week.

CARGO GEAR: Cargo vessels carrying goods which constitute a fire or explosion hazard or other flammable or otherwise dangerous goods must notify Port Authorities in advance the nature and quantity of goods concerned. In certain cases a red flag or red light must be carried at mast head.

IDENTIFICATION CARDS: Passport or seaman's discharge book with photograph.

REPAIRS: All types of deck and machinery repairs can be carried out.
DRY DOCKS: Gustav V Dock, length 598 ft., width 79 ft., depth 31 ft. Also 3 other dry docks and 5 floating docks.
REPATRIATION: Crewmen may be signed-on and paid-off. Whether paid-off crewmen will be allowed to remain in the country and seek new employment, depends on existing bi-lateral agreements between countries. Generally, only a citizen of a Scandinavian country may seek work in Sweden without a special labour permit.
AIRPORT: Arlanda, approx. 22 miles from central Stockholm. Served by egular airlines.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: New Year's Day (January 1st); Epiphany (January 6th); Good Friday (variable Friday in March/April); Easter Monday (variable Monday in March/April); May 1st; Ascension Day (variable Thursday in May/June); Whit Monday (variable Monday in May/June); Midsummer Day (variable Saturday in June); All Saint's Day (first Saturday in November); Christmas Day (December 25th); Boxing Day (December 26th). No work is normally done on these days.
POLICE/AMBULANCE/FIRE: Tel. 90 000.
TELEPHONES: Ship-to-shore telephone connections can be provided at most quays.
GENERAL: Degaussing station available.
SERVICES: Electric current can be laid on at some quays. Port has a special barge for collection of oil residues. Licensed compass adjusters available.
SHORE LEAVE: No restrictions.
DELAYS: Occasionally shortage of stevedores. Some delay may be caused by ice, but port kept permanently open by ice-breakers.
AUTHORITY: Stockholms Hamn.

STORUGNS, Gotland Is.: 57.50 N. 18.48 E.

(See Plan Book)

Situated on Eastside of Bay of Kappelshamn on the North coast of Gotland.

DOCUMENTS:

Vessels arriving from foreign ports shall have the following documents:

1 Crew Manifest.
1 Stores List.
3 Crew Lists.
Tonnage Certificate.
Certificate of Nationality.
Declaration of Health (Deratisation Cert.), not older than 6 months.
Not applicable to vessels from Scandinavian ports.

NOTICE OF ARRIVAL: On which the loading turn number is based, should be given when the vessel has passed Lat. 57° 52′ N. The notice can be given by VHF (Storugns harbour radio) or by telephone 0498/27160 (outside normal working hours by telephone only).

Vessels may not berth without permission of the Company.

PILOTAGE: Pilot who boards in the outer approaches and should be ordered at least 5 hours in advance by tel. 0498/27010 (Storugns) or 10138 (Visby). Pilots keep watch on VHF Channel 16.
ANCHORAGE: With good holding ground. Vessels waiting in the roads should keep watch on VHF Channel 16 during ordinary harbour working hours.

Ships lying in the roads shall anchor so that in-going and out-going vessels can pass without hinderance or risk. Anchoring in Kappelshamnsviken in the area between Lat. 57° 51′ N. and an E.W. line 200 m. South of the quay's Southernmost point is prohibited unless permission is obtained from the Company.

RESTRICTIONS: The harbour can be entered at all times regardless of wind direction except during strong Northerly winds.

The bay is normally ice-free. During exceptionally cold spells with Northerly winds traffic may be temporarily stopped or hindered by ice-floes.

MAX. SIZE: Depth at entrance and at quay 10 m. Vessels up to 20,000 tons have loaded to full draft. Max. draft 9.2 m.
HEALTH: No restrictions provided no disease or fever on board and vessel not arriving from port where disease or fever in existence.
RADIO: 96 and 24 hours before vessel's ETA preliminary notice must be given to the Company. Changes of ETA exceeding 10% of the remaining time must be reported. It is, however, not necessary to report changes of less than 1 hour. The Company may under special circumstances waive the obligation to give 96 hour notice.

On the arrival of a vessel in the harbour area notice of arrival must be given either in writing, by telephone 0498/27160 or by VHF radio. In respect of notice of arrival the harbour area is Kappelshamnsviken South of Lat. 57° 52′ N. If a vessel, owing to bad weather or for any other reason cannot safely lie within the harbour area, the Company may accept notice of arrival from vessel North of above mentioned latitude. At night (from 2230 to 0530 hrs.) notice of arrival can be given by telephone only (automatic answering service).

Between 0500 and 2230 hrs. vessels waiting in the roads shall keep watch on VHF radio or, if the vessel is not equipped with such, on the ordinary radio.

Coastal Radio Stations: Stockholm Radio and Tingstade Radio (Tingstade Radio, radio telegrams only).
VHF: Storugns Harbour Radio VHF Channels 16 and 9.
TUGS: Not available on the island of Gotland.
BERTHING: The harbour which is situated on the Eastern side of Kappelhamsviken is intended solely for the loading of limestone which is obtained from the nearby quarry. The Gotland limestone which is of high purity and has a very low percentage of impurities is used in cellulose, sugar, metallurgic and chemical industries, and in iron production.

The limestone is delivered in 11 different grades. The density is 2.5/2.6 tons/cu. m.

The stowage factor varies between 17 and 26 (17 – 18 for grades 0 – 3 mm., 23 – 26 for grades between 3 and 120 mm., and 20 – 24 for grades above 120 mm.).

Quay		*Length*			*Depth*
Quay 1	outside	140 m.		outside	9.5 m.
	inside	120 m.		inside	7.0 m.
Quay 2		48 m.	(no loading)		5.0 m.
Quay 3		110 m.		outer	7.0 m.
				inner	6.0 m.

Boatmen: Vessels with Pilots on board need not order boatmen. Other vessels should contact the Company well in advance. During night time boatmen can be obtained by contacting Securitas; tel. 0498/19000 not later than 2 hours before ETA.
BULK HANDLING FACILITIES: The loading elevators are movable along their respective quays. The capacity on Quay 1 is about 500 – 600 t.p.h and on Quay 3 about 300 – 350 t.p.h.
Shipmasters Report: 1979. Loading rate 967.5 t.p.h.

Cleaning of holds, discharging of ballast and opening of hatches shall be carried out in sufficient time to avoid delays in loading. The loading should be so planned that shifting of the vessel and loading elevators can be avoided as far as possible.

STEVEDORES: Normal working hours are Monday – Friday 0530 – 2230 hrs. Overtime working to complete loading is available to a limited degree, as is loading on Saturdays and Sundays. Vessels requiring overtime loading Sat./Sun. must give notice not later than Friday 1100 hrs.

During ordinary working hours vessels are loaded by turn. The turn is based upon the time of notice of arrival.

MEDICAL: Central hospital at Visby.
FRESH WATER: Not available.
FUEL: Most grades available from Visby subject prior notice.
GANGWAY/DECK WATCHMEN: Not compulsory but available.
OPENING/CLOSING HATCHES: Ship's crew open and close.
CUSTOMS ALLOWANCE: Presently 200 cigarettes per head/week. Practically no spirit allowed out of bond.
IDENTIFICATION CARDS: Seamen's book or passport if travelling outside port area.
CONSULS: Nearest consuls (for Denmark, Norway, Finland, West Germany) at Visby.
REPAIRS: Only minor repairs possible.
DRY DOCKS: None.
REPATRIATION: Good possibilities for changing crew.
AIRPORT: Visby.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
SHORE LEAVE: Permitted.
POLICE/AMBULANCE/FIRE: Dial 90 000.
AUTHORITY: Cemeenta AB.

STROMSTAD: 58.56 N. 11.10 E.

DOCUMENTS/PILOTAGE: See "Stockholm".
ANCHORAGE: Available within port for vessels up to and including 3,000 d.w.t.
MAX. SIZE: Cargo ships (not tankers), max. 3,000 d.w.t.
BERTHING: No particular restrictions for berthing within the port.
FRESH WATER: Available.
FUEL: None available.
GANGWAY/DECK WATCHMEN: Necessary.
OPENING/CLOSING HATCHES: Carried out by crew.
IDENTIFICATION CARDS: Needed.
CONSULS: Norway: Bertil Alen, Hjartagatan 13.
REPAIRS: Repairs possible.
REPATRIATION: Facilities exist for effecting crew changes.
AIRPORT: Landvetter (Gothenburg). Distance: 200 km. There is also a local taxiplane.
HOLIDAYS: Cargo work cannot be arranged on holidays.

POLICE/AMBULANCE/FIRE: Police 12530; Ambulance 90000 (ask for ambulance); Fire 90000.
TELEPHONES: No arrangements exist for placing telephones on board.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
DELAYS: No delays in load or discharge.
AUTHORITY: Hamnforvaltningen Stromstad.

SUNDSVALL: 62.25 N. 17.20 E. (See Plan Book)

DOCUMENTS:
Crew Lists 4.
Passenger Lists 4 (if passengers onboard only).
Crew Declaration on tobacco, liquer, Cigarettes and spirit etc.
Derat. Certificate.
Tonnage Certificate.
Register.
Swedish light dues.
Manifest and/or Bill of Lading.

PILOTAGE: Pilot station at Spikarna Southern point of Alno Island VHF Channel 16. For communication and instructions Channel 13.

Pilot boarding from pilot cutter 2.5 miles East of Gubben Lighthouse in position 62° 21′ N. 17° 40′ E.

Entrance passage Gubben Light – Spikarna Light – Draghallan Light all 14 m. deep.

ANCHORAGE: Between islands of Tjufholmen and Alno and also in Svartvik Bay.
MAX. SIZE: See "Berthing" and "Tankers".
RADIO: Cable Agents giving ETA, draft and Cash requirements either via Hernosand Radio SAH or Stockholm Radio SDJ. At least 24 hours notice required. Change in time to be given at least 5 hours before ETA pilot.
TUGS: Available, ordered by Agent. Compulsory at Sundsvall Oil terminal for Tankers of more than 10,000 d.w.t.
BERTHING: Around the clock berthing. No restrictions except draft. Following drafts (fresh water) accepted in Sundsvall and adjacent ports.

Essvik: 62° 19′ N. 17° 24′ E.
Length of quay 30 m. Tankers secure with mooring lines aft and anchors forward. Discharging by aft connection. Max. draft at 170 m. length – 7 m. Pilot distance 10 nautical miles. Distance from Sundsvall town 16 km.

Johannedal: 62° 25′ N. 17° 24′ E.
Length of quay 60 m. Max. draft 4.3 m. Pilot distance 13 nautical miles Distance from Sundsvall town 9 km.

Kubikenborg: 62° 22.7′ N. 17° 22′ E.
Length of quay 150 m. Max. draft 10.5 m. 1 shorecrane, capacity 5 tons. 1 suction-installation, capacity 100 – 150 t.p.h. Pilot distance 12 nautical miles. Distance from Sundsvall town 4 km.

Norra Nyhamn: 62° 20′ N. 17° 24.8′ E.
Length of quay (pierhead only) 8 m. Tankers to be secured aft and drop both anchors forward. Discharging aft-connection. Max. draft, along the quay, 10 m. Pilot distance 6 nautical miles. Distance from Sundsvall town 18 km.

Ortviken: 62° 23.8′ N. 17° 21.8′ E.
Oil Berth: Length of quay 140 m. Max. draft at max. 200 m. length – 10.8 m. Pilot distance 12 nautical miles. Distance from Sundsvall Town 4 km.

Ostrand: 62° 29′ N. 17° 21′ E.
Salt Berth: Length of quay 75 m. Max. draft 5 m. (port side alongside). 1 shore crane, capacity 5 tons.
Glaubersalt Berth: Length of quay 40 m. Max. draft 5.4 m. 1 shore crane, capacity 4 tons.
Oil Berth: Tankers berthed outside 3 timber rafts, max. draft 5.5 m. Pilot distance 17 nautical miles. Distance from Sundsvall town 15 km.

Soraker: 62° 30.5′ N. 17° 30′ E.
Length of quay 170 m. Max. draft 7.0 m. 1 shore crane, capacity 10 tons. Pilot distance 11 nautical miles (East of the island Alno). Pilot distance 20 nautical miles (West of the island Alno). Distance from Sundsvall town 34 km.

Stockvik: 62° 20′ N. 17° 22′ E.
Length of quay 140 m. Max. draft 7 m. 3 shore cranes, capacity 6 tons each. Pilot distance 10 nautical miles. Distance from Sundsvall town 9 km.

Sundsvall Town Quay: 62° 23.5′ N. 17° 19.5′ E.

Berths 7 – 8:	Length of quay 240 m. Max. draft 6.7 m.
Berths 11 – 12:	Length of quay 240 m. Max. draft 7.8 m.
Berth 13:	Length of quay 90 m. Max. draft 6.7 m.
Berths 14 – 15:	Length of quay 65 m. Max. draft 6.5 m.
Berths 16 – 17:	Length of quay 110 m. Max. draft 5.0 m.
Berth 32:	Length of quay 109 m. Max. draft 4.0 m.
Berth Mokajen:	Length of quay 50 m. Max. draft 4.0 m.

No cargo is handled on Sundsvall Town Quay. Pilot distance 12 nautical miles.

Sundsvall Oil Berth: (Vindskarsudde) 62° 23.2′ N. 17° 21.8′ E.
Length of quay 100 m. Max. draft 11.3 m. 3 swinging arms, each of 10 in. dimension. Pilot distance 12 nautical miles. Distance from Sundsvall town 3 km.

Svartvik: 62° 19′ N. 17° 22′ E.
Length of quay 140 m. Max. draft at 100 m. length – 7 m. 1 shore crane, capacity 4 tons.
Oil Berth: Tankers berthed outside 3 timber rafts. Max. draft at 170 m. length – Forward 6.9 m., Aft 9.1 m. Pilot distance 10 nautical miles. Distance from Sundsvall town 11 km.

Port of Sundsvall (Tunadalshamnen): 62° 25′ N. 17° 23′ E.
Length of quay 450 m. Max. draft 9.2 m. 2 shore cranes, capacity 10 tons. Additional berth: Length of quay 230 m. Max. draft 12.6 m. Pilot distance 13 nautical miles. Distance from Sundsvall town 7 km.

Tunadal Sawmill: 62° 25′ N. 17° 23′ E.
Length of quay 195 m. Max. draft at 80 m. length – 7 m. Pilot distance 13 nautical miles. Distance from Sundsvall town 7 km.

Vivstavarv: 62° 29′ N. 17° 28′ E.
Length of quay 180 m. Max. draft 7.3 m. Pilot distance 17 nautical miles. Distance from Sundsvall town 18 km.

MEDICAL: First class medical attention and dental care available.
TANKERS: See "Berthing".
STEVEDORES:
Ordinary working hours Monday – Friday 0700 – 1600 hrs.
5 hours overtime may be worked to complete cargo. Saturdays 0700 – 1530 hrs. minimum of 5 hours at double time. 2 hours may be worked to complete cargo.
CRANES: 2 cranes available 10 ton. At Tunadalshamnen cargo is also handled by mobile cranes. Also see "Berthing".
CUSTOMS ALLOWANCE: See "Stockholm".
DENSITY: Nearly fresh, 1005.
FRESH WATER: Supplied at all berths.
FUEL: All grades delivered. Notice must be given in good time, since these installations normally close down weekends.
SHIP WATCHMEN AND SHIP'S TELEPHONE: Available. Compulsory at Oil terminals only.
CONSULS: Finland, Norway, Denmark, Germany, Great Britain, Holland, Belgium, France, Iceland.
REPAIRS: Most repairs possible through local repair shops.
DRY DOCKS: Lunde Varv outside Kramfors.
AIRPORT: International airport 22 km. outside town. Good facilities to effect repatriation.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: See "Stockholm".
POLICE/AMBULANCE/FIRE: Dial 90 000.
GENERAL: *Dangerous Cargo:* Ships carrying dangerous cargo must notify Port authorities in advance of nature, quantity and Imco code number of goods concerned.
Wintertime: Ice-breaker service available if needed. Wintertime November to April.
AUTHORITY: Sundsvalls Hamnforvaltning.

TRELLEBORG: 55.21 N. 13.09 E. (See Plan Book)

DOCUMENTS: See "Stockholm".
PILOTAGE: Available day and night. Meet inward-bound ships on roads with motor boat. Outward-bound Pilot obtained from pilot station of Trelleborg. Tel. 10141. Pilots also attend warpings and hawser-moorings. Pilot boats provided with short-wave radio telephone, and in pilot station an up-to-date radar set is installed. Also see "Stockholm".
ANCHORAGE: Recommended West of entrance fairway between fairway buoy and No. 1 light buoy. Depth varies from 7 – 14 m. Anchor ground good – clay and sand.
RESTRICTIONS: Entrance a straight, perch-buoyed fairway of about 1,300 m. length, having measured depth of 8.5 m., and a bottom width of 100 m. Distance between moles (outer – 125 m.) and (inner – 86 m.)
HEALTH: See "Stockholm".
TUGS: Tug-boats can be promptly obtained from Malmo.
BERTHING: New Harbour has depth of 8 m. with quay on Northern side of basin. It is 1,640 ft. long and served by one bridge crane (6.2 tons) and one gantry crane (5 tons), also one mobile crane. Western harbour basin has depth of 7 m. in Western and Northern part and 8 m. in Eastern part. The Western part is served by a 5 ton bridge crane. Eastern harbour basin has depth of 6.5 m. in Eastern and Northern part and 8 m. in Western part. Oil quay 230 ft. long has depth at quay of 8 m. is situated on Southern side of New Harbour. Tankers of max. length 570 ft. can approach this quay. From oil harbour area direct importation of oils is made to Svenska Fina, Statens Jarnvagar (the Swedish State's Railway Company), the Trelleborgs Gummifabriks AB (Trelleborg Rubber Factory Ltd.). Five berths equipped for Ro/Ro traffic.
STEVEDORES: Available (tel. 112 66,112 69).
FRESH WATER: Available on all quays at request in Harbour Office.
FUEL: All grades bunker oils supplied at oil quay through direct pipe-line from sea depot. Order on phone Trelleborg 107 76. Bunker coal can be ordered via the harbour office.
REPAIRS: Available through private firms. Tel. Trelleborg 150 60 109 66 or 124 50.
CONSULS: Denmark, Finland, Norway and West Germany.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
TELEPHONES: Ship's telephone available at oil quay, tel. 148 28, and at the Harbour Bridge, tel. 147 67. Order is made through Harbour office.
SERVICES: Divers available through the Harbour office. Refuse containers can be hired.
AUTHORITY: Trelleborgs Hamnforvaltning, Trelleborg Harbour Authority.

UDDEVALLA: 58.21 N. 11.56 E. (See Plan Book

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
Health Document. Derat. Certificate when ship arrives from abroad except from Denmark, Norway and Finland.
3 Manifests.
1 copy of Bill of Lading.
Tonnage Certificate.
Nationality Certificate.
1 Crew Effects Declaration.
2 Ships Stores Declaration.
1 Declaration of Living Animals (if any).

PILOTAGE: Pilotage at Marstrand. Address "Marstrand Pilotstation". Required ETA 5 hours. VHF 16 and 6. Pilot boat S.W. of Hätteberget Lighthouse (57° 51.8′ N., 11° 27.65′ E). (Also see "Stockholm".)
MAX. SIZE: Draft 11 m.
HEALTH: Cable to Agent and he will arrange with health authorities.
RADIO: SAG. Gothenburg Radio (Goteborg Radio).
RADAR/VHF: No port radar service, VHF Channels 16 and 14.
TUGS: 5 Tugs up to 5,000 h.p. available. Can be ordered through Pilot or Agent.
BERTHING: Depths alongside (at MW) as follows:

	Depth
Skeppsholm Quay	10.7 m.
Bado Quay	7.0 – 9.5 m.
Bave Quay	7.0 m.
Skans Quay	6.0 m.
Thule Quay	4.0 m.
Juno Quay	6.5 m.

CARGO HANDLING FACILITIES:
Skeppsholmspiren: 5 electric cranes of 12 to 25 tons capacity. This berth is especially constructed to handle the loading/unloading of bulk cargoes ore, coal, coke, scrap iron etc. Very large storage areas. 1 berth equipped for ro-ro traffic.

Bado Quay: 8 electric cranes with capacities of 7 – 12 tons. 7,000 sq.m. of warehouses and 13,000 sq.m. of storage.

Bave Quay: 2 electric cranes with capacities of 6 tons. 3,000 sq.m. of warehouse and 14,000 sq.m. of storage.

Grain Cargoes: 2 silos owned by private companies.
STEVEDORES: Arranged by Agent.
TANKERS: Draft in the Skeppsviken Oilport, 11 m.; at the Bado Oilport, 9.5 m.
FRESH WATER: Available at all quays.
FUEL: All grades available.
FIRE PRECAUTIONS: Watchmen necessary when loading or discharging oils in pipe-lines.
GANGWAY/DECK WATCHMAN: Watchman accepted by Harbour and Fire Authorities on vessels loaded with explosives.
OPENING/CLOSING HATCHES: Preferably by crew. Can be arranged by stevedores.
CERTIFICATES: Tonnage Certificate, Nationality Certificate; Derat Certificate.
CUSTOMS ALLOWANCE: 200 cigarettes and 1 bottle of spirits for each man as a normal quantity. Possible to be increased for Master.
IDENTIFICATION CARDS: Not required.
CONSULS:

Denmark	Tel. 151 91	Norway	Tel. 910 00
Finland	Tel. 161 00	Holland	Tel. 144 60
	Tel. 388 60		
West Germany	Tel. 360 00		

REPAIRS: Facilities available.
REPATRIATION: In accordance with instructions of Consul.
AIRPORT: Gothenburg, 100 km.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Police, 90 000; Ambulance, 90 000; Fire 90 000.
TELEPHONES: Available for placing on board.
SERVICES: Compass adjusters and Ship's chandler available.
SHORE LEAVE: No restrictions.
DEVELOPMENTS: A new harbour named Frofland (58° 20′ N., 11° 52′ E.). This harbour will be specially constructed to handle unloading of ore.

Total length – 225 m., depth alongside – 12 m., 3 electric cranes with capacities of 35 tons, 35,000 sq.m. of storage.

This harbour will be ready to use Autumn 1981.
AUTHORITY: Harbour Manager, Port Authority of Uddevalla.

UMEA: 63.49 N. 20.16 E. **(See Plan Book)**

DOCUMENTS:
Ship's Documents:
Tonnage Certificate.
Certificate of Nationality.
Deratisation Certificate (not older than 6 months).
Supplied by Master on arrival:
1 copy of each Manifest.
1 copy of each Bill of Lading.
Supplied by Agent and signed by the Master on arrival from foreign ports:
1 Maritime Declaration of Health.
3 Crew Lists (one set).
2 Passenger Lists (one set).
1 Crew Effects Declaration.
2 Ship's Stores Declarations.
2 Cargo Declarations.
4 Reports of Arrival.
1 Declaration of Living Animals (if any) (supplied by the Customs Officer).
Furthermore on arrival from any port:
1 Report of Arrival, with double net tons, if applicable (Harbour Office).
1 Passenger List (if any in transit).
1 Crew List.
On departure to a Foreign Port:
5 Reports of Departure.

PILOTAGE: Umea Pilot Station: Bredskar. Tel. 090-45021 and 090-45544. Telegraphic address "Pilotstation Umea".

At least 5 hour's advance notice of ETA at pilot station, stating time and pilot station and destination, can be given over any Swedish coastal radio station or free of charge on VHF over any Swedish pilot station and some lighthouses.

Pilot station and pilot boats fitted with VHF Channel 16 – calling and safety; Channel 13 – pilotage and traffic; Channel 12 – spare Channel.

All pilot boats orange with flag "H" and equipped with radar.

Boarding point, 63° 36.5′ N. 20° 25.5′ E., 0.5 nautical miles South of Vaktaren Lighthouse. In case of bad weather, in the fairway, closer to the pilot station.

Anchorage for vessels awaiting Pilot: 63° 36′ N. 20° 28′ E., 1.5 nautical miles S.E. of Vaktaren Lighthouse. Depth 18 to 30 m.
ANCHORAGES: See "Pilotage".

Osterfjarden roadstead between Umea hamn and Obbola. Length about 2,800 m. and about 400 m. wide, midstream in River Umea. To the North and South of 63° 42.3′ N. 20° 21.0′ E. and with a depth of 12 to 22 m.

Anchorage is forbidden around position 63° 40.5′ N. 20° 20.0′ E.

Cables and fresh water pipe-line on Osterfjarden roadstead passing East-West around Lat. 63° 42.5′ N.
RESTRICTIONS: Entry permitted during darkness, for tankers, not more than 13,000 d.w.t. and a max. draft of 7.62 m., and dry cargo vessels with a draft not exceeding 8.53 m.

During unsuitable weather conditions, according to the Pilot on duty.

Tankers exceeding 1,600 g.r.t. and with a cargo of mineral oil products and other dangerous cargoes, must take a Pilot.
MAX. SIZE: Max. depth and max. permissible draft (at MW) in the fairway as follows:

The fairway to:	*Maximum draft (m.)*
Ferry Station No. 1-2	7.6
Ferry Station No. 3	10.2
Stormskar Oil Berth and Obbla	10.2
Holmsund Oil Jetty	5.5
Umea Inner Harbour and Gimonas Oil Jetty	3.0

No tide.
HEALTH: Free pratique automatically for ships arriving from non-infected areas. In event of any suspected disease or fever on board notify the Agent, who will give necessary directions. It is possible to send a telegraphic message to "Sanitary Authority, Umea" containing state of health on board, in ordinary items or code. (Also see "Documents").
RADIO: Harnosands Radio (SAH) on 2182 k/Hz or on VHF Channel 23-26 or 28 (depending on ship's position).

Port radio: Umea port radio keeps watch, Monday to Friday, 0815 to 1630 hours on VHF Channel 16. Working Channels 11 and 13. At other times Umea pilot station. No port radar service, but Umea Pilot Station and the pilot boats are equipped with VHF and can assist on request.
TUGS: Normally necessary only for larger tankers when berthing. Tugs join vessels just off the jetty. Ship's lines always used.
BERTHING: Depth alongside (at MW) as follows:

Umea Outport:	*Depth in metres*
Ferry Stations:	
No. 1 Hillskar	6.0
No. 2 Hillskar	7.0
No. 3 Truthallan	7.0
Oil Berth, Stormskar	11.0
Pilot Berth	5.3
South Quay, Berth Nos. 9 to 10	11.0
Pier Quay, Berth Nos. 7 to 8	9.0
Pier Quay, Berth No. 7	7.0
North Quay, Berth Nos. 2 to 6	7.0
North Quay, Berth Nos. 1 to 2	6.0

CRANES:
North Quay: 5 cranes, 2 – 7.5 tons.
Pier Quay: 3 cranes, 3 – 7.5 tons.
South Quay: 1 crane of 40 tons.
Ferry Station No. 3: 1 crane 3 – 5 tons.
TANKERS: Oil berth at Port of Umea.

Stormskar: Depth 11 m. Reducing pieces for all diameters between 6 in. and 12 in. and all types of flanges available. One crane for handling hoses.

Obbala: Oil Jetty, depth 11.0 m.
DENSITY: Nearly fresh water.
STEVEDORES: Holmsunds Stuveri AB. Tel. 090-40970. To be ordered before 1300 hrs. local time, day before gangs required. For work on Saturdays, Sundays, and holidays, special regulations.

Working hours: Monday – Friday 0600 to 1500 hrs., meal hour 1000 to 1100 hrs. Coffee breaks 0800 – 0810 hrs.; 1300 – 1310 hrs.
MEDICAL: All kinds of medical attention and hospital facilities available. Notify Agent as soon as possible.
FRESH WATER: Delivered from water posts in Port of Umea at Ferry Station No. 1, oil berth, Berth Nos. 1 – 10 and in Umea Inner Harbour.
FUEL: All kinds and grades of fuel oil available in Port of Umea. Bunkering at Berths 1 – 10 possible during normal loading or unloading from pipe-line. At ferry station Nos. 1 and 2 and the oil berth also bunkering from pipe-line. Fuel can also be delivered from lorries. Notice as soon as possible.
FIRE PRECAUTIONS: Security watchmen from port of Umea while alongside the oil berth. Alarm regulations in writing will be delivered on arrival.
GANGWAY/DECK WATCHMAN: Available but not compulsory except for tankers.
OPENING/CLOSING HATCHES: Can be done by stevedores if necessary, except patent hatches.
CUSTOMS ALLOWANCE: *Tobacco:* 200 cigarettes or 250 grammes of tobacco (7 ozs.)

Spirits and Wine: 1 bottle of each (1 litre), minimum age 20 years.

Above mentioned quantities are per crew member and per week in Sweden. After a week quantities are taken out after request to the Customs Office.
IDENTIFICATION CARDS: Not required. Seaman's book sufficient.

CONSULS: Following countries have representatives in Umea: Denmark, Finland, Netherland, Norway.
REPAIRS: Most deck and engine repairs.
REPATRIATION: Facilities exist for effecting crew changes and arranging repatriations.
AIRPORT: Umea, approx. 20 km. away, served by regular airlines.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer (6th April – 28th September).
HOLIDAYS: New Year's Day (1st Jan.); Twelfth Day (6th Jan.); Good Friday; Easter Monday; May Day (1st May); Whit-Sunday; Whit-Monday; Midsummer's Day (nearest Saturday to 24th June); All Saints' Day (1st Sat. in November); Christmas Day; Boxing Day.
POLICE/AMBULANCE/FIRE: Alarm central 90-000 and ask for service required.
TELEPHONES: Available for placing on board at Berths 1 – 10 and oil berth at Stormskar.
AUTHORITY: Port of Umea.

VALLVIK: 61.11 N. 17.11 E. (See Plan Book)

DOCUMENTS: See "Stockholm".
PILOTAGE: Pilot station at Soderhamn (Ljusne Station).
ANCHORAGE: *(a)* Ljusne bight sheltering for W., N. to N.E. winds, depths 6 to 8 fathoms. *(b)* North side of Storjungfrun island sheltering for S. to S.W. winds, depths 10 to 12 fathoms.
RESTRICTIONS: No direct restrictions. Ships of about 5,000 tons d.w.t. or more are recommended not to enter or leave the harbour in darkness (due to pilot and weather conditions).
MAX. SIZE: Max. draft in fairway 7.5 m. Loading pier is 200 m. Berthing possible on both sides.

	Distance	Depth MWL (m.)
East side (from outer end):		
	0 – 80 m.	8.3
	80 – 85 m.	7.7
	85 – 110 m.	7.2
	110 – 140 m.	6.7
	140 – 175 m.	5.8
	175 – 195 m.	5.7
	195 – 200 m.	5.2
West side (from outer end):		
	0 – 40 m.	7.6
	40 – 70 m.	5.8
	70 – 90 m.	5.5
	90 – 140 m.	4.6

HEALTH: No special action except if suspected disease. In that case contact Agent.
RADIO: Northward bound ships contact Stockholm Radio, Southward bound Harnosand Radio.
RADAR/VHF: No port radar service. There is a radar station at Ljusne. Pilot station and some of the pilot boats are fitted with radar. Master may contact Pilot by means of VHF Channel 16 (frequency 156.8 mHz) and 13 (frequency 156.656 mHz).
TUGS: Usually only needed when ships are leaving. Ship's lines always used.
BERTHING: Ship's Agent keeps contact with port authorities.
STEVEDORES: Agent arranges needed or available gangs according to the Shipmaster's wishes.
TANKERS: 10 in. diameter discharging hoses and pipe-line. Tanker berth at loading pier, 3 different connecting points.
FRESH WATER: Delivered by hose from quay. Rate about 8 t.p.h.
FUEL: Tanker lorries ordered through Agent, available with a few hours' notice.
GANGWAY/DECK WATCHMEN: Not necessary. If wanted, can be arranged.
OPENING/CLOSING HATCHES: Normally carried out by crew. Can be done by stevedores.
CARGO GEAR: Cargo gear certificates valid.
IDENTIFICATION CARDS: Not needed.
CONSULS: Danish, Dutch, and French Consuls in Soderhamn.
REPAIRS: Machinery repairs, plate-work and welding can be carried out to a certain extent.
DRY DOCKS: None.
REPATRIATION: Facilities for crew changes available.
AIRPORT: Nearest airport Arlanda, about 15 miles North of Stockholm.
TIME: Local time GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: See "Soderhamn".
POLICE/AMBULANCE/FIRE: See "Soderhamn".
TELEPHONES: No arrangements for placing telephones on board. Telephone for ship's use, available in Harbourmaster's Office.
AUTHORITY: Hamnkontoret, Vallviks fabriker.

VARBERG: 57.07 N. 12.15 E. (See Plan Book)

DOCUMENTS:
Crew List.
Passenger List.
Maritime Declaration of Health (incl. Certificate of Derating).
Ship's Certificate of Registry.
Manifests and B/L copies.
PILOTAGE: Application for sea pilot through ship's Agent. Telephone to Pilot station 0340/10300. Pilot to board vessel on the road about 0.5 nautical miles off Varberg. (Also see "Stockholm".)
ANCHORAGE: On the roads 33 ft. depth.
RESTRICTIONS: No tide or other entry restrictions.
MAX. SIZE: Length 170 m., breadth 25 m., draft 23 ft. No tide.
HEALTH: Vessel to be kept in quarantine if disease on board suspected.
RADIO: Gothenburg Radio, SAG. VHF Channels 16 and 26.
TUGS: Tugs to be ordered 12 hours in advance.
STEVEDORES: Gangs to be ordered in advance through ship's Agent.
MEDICAL: Hospital facilities available. Desirable to give advance notice.
TANKERS: 1 tanker berth, max. draft 23 ft.
FRESH WATER: Available all docks 35 t.p.h.
FUEL: Fuel oil No. 1 – 5 available from tank trucks.
FIRE PRECAUTIONS: Oil No. 1 and petrol to be discharged under supervision of watchman.
GANGWAY/DECK WATCHMEN: Recommended.
OPENING/CLOSING HATCHES: Generally done by stevedores.
CERTIFICATES: Certificates of Registry and Derating and also Crew List.
CUSTOMS ALLOWANCE: (Tobacco), 200 cigarettes per man. (Wine/Spirits), 1 bottle per man.
IDENTIFICATION CARDS: Not needed.
CONSULS:
Vice-Consul of Finland, tel. 0340/16000
Vice-Consul of Netherland, tel. 0340/16270
Vice-Consul of Denmark, tel. 0340/16190
REPAIRS: Only minor repairs.
REPATRIATION: Can be effected.
AIRPORT: Nearest airport with regular airlines, Torslanda/Gothenburg, 50 miles North Varberg.
TIME: Local time GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: Principle Swedish Holidays – when no cargo work is obtainable: New Year's Day; Good Friday; Easter Day; 2nd Easter Day; Labour Day (May 1st); Whitsun Day; 2nd Whitsun Day; Midsummer Day; All Saint's Day (November); Christmas Day; 2nd Christmas Day.
POLICE/AMBULANCE/FIRE: Tel. 90 000.
TELEPHONES: Available on dock and one for placing on board.
DEVELOPMENTS: Planned increases of draft at the entrance to 9 m. = 29 ft. and in the harbour to 8 m. = 26 ft.
AUTHORITY: Port Authority of Varberg, Hamnkontoret.

VASTERAS: 59.37 N. 16.33 E.

DOCUMENTS:
Ship's Register.
2 Crew Lists.
1 Tobacco List, signed by all hands on board.
1 Valid Deratting Certificate.
1 copy of Manifest or Bill of Lading for each Swedish port of call.
Light dues receipts, if on board.
PILOTAGE: Incoming ships receive Pilot from Landsort. Pilot ordered by VHF Channel 16 (165.80 m/c) or by RT. Pilot boats fitted with VHF. Give order 5 hours before Pilot required. Pilots meet ships about 2 nautical miles outside Landsort. Light and signals in accordance with the international rules. (Also see "Stockholm".)
ANCHORAGE: Within harbour area. Depth 9 – 10 m.
RESTRICTIONS: None. No tides.
MAX. SIZE: Vessels reach port through two deep navigable channels – through Sodertalje Ship Channel or via Stockholm through Hammarby Ship Canal. Lowest depth of channels at average water level is 7.3 m. (24ft. 1 in.).
Sizes of Locks:

	Length	*Width*	*Depth*
Sodertalje	136 m.	20 m.	7.5 m.
Hammarby	115 m.	17.4 m.	7.0 m.

Limitation of vessels: For Sodertalje. With beam of 18 m. max. draft 6.5 m. With beam of 17 m. max. draft 6.8 m. Max. LOA 124 m.
HEALTH: No special requirements or health documents, only valid deratting certificate. Disease or fever on board must be declared before entering port.
RADIO: Stockholm Radio.
VHF: The harbour office. VHF Channels 16 and 14. Monday – Friday 0800 – 1600 hrs.
TUGS: 1 tug for unberthing. Ship's lines.
BERTHING: *Deep Harbour:* 730 m. quay length, depth alongside 7.6 m. Roll-on/roll-off ramp. Two container handling cranes of 33 tons and one of 22 tons.
Old Harbour: 1,100 m. quay length, depth 4.5 m. to 7.6 m. Container handling crane of 22 tons. Heavy lift crane of 210 tons.
Little River Harbour: Quay 120 m. length, 7.6 m. depth alongside.
Power Plant Harbour: Quay 200 m. length, 5.8 m. depth alongside.
Oil Harbour: Quay 125 m. length, 7.6 m. depth alongside.
BRIDGES: 4 bridges. All of them to be opened at passage except bridge at Sodertalje which closed from 1630 until 1830 hrs. weekdays and 1300 – 1500 hrs. Saturday or day before a holiday.
STEVEDORES: Stevedores for next working day ordered at least 1500 hrs. day before and ETA to be given in due time.
MEDICAL: Necessary service given by local hospital and private doctors. Vaccinations carried out.
FRESH WATER: Ordered through Port Administration.
FUEL: Bunkering of all grades of oil can be carried out at all quays from trucks.
FIRE PRECAUTIONS: Accordance harbour regulations.
GANGWAY/DECK WATCHMEN: Can be obtained from shorewatch companies at different rates for night/day work.
OPENING/CLOSING HATCHES: Crew. Can be carried out by stevedores.
CERTIFICATES: Measurement certificate and all gear test certificates required, if ships gear to be used.
CUSTOMS ALLOWANCE: (Tobacco), 200 cigarettes or 200 gr. tobacco. Additional allowance depending on expected stay in port and size of vessel. (Spirits), 1 bottle of 0.75 c.l. for each crew member over 21. Additional allowance on request.

DENTIFICATION CARDS: None required.
CONSULS: Denmark, Finland and Norway.
REPAIRS: Most deck and engine repairs, as well as electrical.
DRY DOCKS: None.
REPATRIATION: Possible. Accommodation to be ordered in good time.
AIRPORT: Arlanda, 120 km. International lines.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: See "Stockholm".
POLICE/AMBULANCE/FIRE: Tel. 90000.
TELEPHONES: In oil and deep-water harbour, most quays fitted with elephones.
SERVICES: Compass adjusting. Small radio repairs by local radio men.
SHORE LEAVE: Crew can leave vessel after customs clearance and mmigration control.
DEVELOPMENTS: Constant new development and extensions. Additional room for extension in old harbour, deep harbour and oil harbour.
AUTHORITY: Vasteras Harbour Board.

VASTERVIK: 57.46 N. 16.38 E.

PILOTAGE: Pilot boards at Ido, available day and night.
BERTHING: *Outer Harbour:* Djuphamnskajen (Lucernakajen), length 200 m., depth 8.5 m.
Oil Quay (North part of Lucernakajen): Depth 8 m., equipped with 3×8 in. pipe-lines.
Ferry Harbour: Quay length 100 m., depth 5.5 m.
Inner Harbour: Quay length 900 m., depth alongside from 4 to 6 m.
Oil berth: Length 15.0 m., depth alongside 6 m.
FRESH WATER: Can be obtained from all quays.
AUTHORITY: Vastervik Harbour Administration.

VISBY: 57.38 N 18.17 E. (See Plan Book)

DOCUMENTS: See "Stockholm".
PILOTAGE: Tel. 0498 – 10138 at 0600 – 2200, if possible five hours before arrival. Pilotage day or night. Embark/disembark outside port entrance. Radar – VHF on pilot station. (Also see "Stockholm".)
ANCHORAGE: Outside harbour, water depth 30 to 50 m. Clay bottom. No mooring buoys anywhere.
RESTRICTIONS: No tide in harbour. Currents outside harbour up to 4 – 5 knots running along coast. Prevailing winds, Summer time mostly S.W., Winter between N.W. and N.E. Harbour open to winds between S.W. – W., which with strong winds will make swell along the piers.
MAX. SIZE: After re-building the max. size will be 5,000 – 6,000 d.w.t. and 150 m. LOA, turning in harbour.
TUGS: None available.
BERTHING: The harbour is being re-built and is expected to be ready in 1981. The harbour will then comprise of 2 new Ro/Ro berths, 160 m. and 200 m. in length with a depth of 7.0 m. Width of Ro/Ro berth 35 m. and a new oil quay with depth of 7.0 m. for vessels up to 5,000 d.w.t.
Old Harbour: The Old Harbour contains four Ro/Ro ramps, an oil quay, a berth of 120 m. for general cargo and a berth of 150 m. for grain. Depth alongside 5.0 – 6.0 m.
BRIDGES: No bridges or overhead cables.
STEVEDORES: Working hours, Monday – Friday 0700 – 1600. Overtime possible.
TANKERS: See "Berthing".
FRESH WATER: Available.
FUEL: Oil available.
REPAIRS: Only small repairs are possible.
AUTHORITY: Visby Harbour Office.

WALLHAMN: 58.01 N. 11.42 E. (See Plan Book)

DOCUMENTS:
3 Crew Lists.
2 Passenger Lists.
1 Tobacco and/or Stores List.
1 Manifest.
PILOTAGE: Pilots board West of Skallen Lighthouse outside Marstrand. No pilotage of big ships during darkness. Big ships will have to anchor and await daylight. Address: "Marstrand Pilot Station", Tel. 0303-60004, VHF Channel 16. 24 hours' notice to be given through Agents.
ANCHORAGE: Whilst awaiting berth, vessels can anchor South of the entrance.
RESTRICTIONS: Large vessels entry only in daylight.
MAX. SIZE: Draft not to exceed 11.0 m. At stone loading berth – 6.0 m.
HEALTH: No special action except for suspected disease, in which case Agent should be contacted for further information.
RADIO: Gothenburg Radio.
VHF: Wallhamn Harbour Radio – VHF Channel 16.
TUGS: Tugs from Gothenburg will join at entrance.
BERTHING: Four berths for roll-on/roll-off: (2) 180 m. × 11 m. depth. (3) 130 m. × 11 m. depth. (4) 130 m. × 8.0 m. depth (5) 240 m. × 8.5 m. depth and (6). 110 m. Quay for loading of stone products.
STEVEDORES: ETA given to Agents is sufficient.
MEDICAL: Doctors and dentists available at short notice. Nearest hospital in Kungaelv, 35 km.
FUEL: Most grades of bunker oil available with short notice.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: By crew or by stevedores.
IDENTIFICATION CARDS: Not necessary. Seamen's Book or Passports should be carried.
CONSULS: In Gothenburg, 60 km. away.
REPAIRS: Smaller repairs performed by own workshop. More complicated repairs to be arranged by Agent.
REPATRIATION: All facilities available.
AIRPORT: Landvetter International Airport, Gothenburg, 85 km. away.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer (from April to September).
HOLIDAYS: Stevedoring and clearance of vessels can be performed every day of the year, 24 hours' service.
POLICE/AMBULANCE/FIRE: Tel. 90 000.
SHORE LEAVE: No restrictions.
AUTHORITY: Wallhamn AB.

YSTAD: 55.26 N. 13.50 E. (See Plan Book)

DOCUMENTS: Crew List.
Passenger List.
Custom Documents.
Manifests.
Bills of Lading.
Ship's Papers, etc.
TRAFFIC WARNING SYSTEM: Vessels approaching Ystad listen on Channel 16 for broadcast announcing ferry departures. All inward bound vessels have to make contact.
PILOTAGE: Vessels approaching Ystad's Harbour must apply for Pilot at Trelleborg at least 5 hours before pilotage due to commence. Tel. 0410 – 10141 or VHF (Channel 16), stating tonnage, draft and destination. VHF tel. call sign "Lotsarna" plus name of pilot's station. (Also see "Stockholm".) Pilot boards at Ystad entrance buoy.
ANCHORAGE: Road: 1.0 n.m. S.W. harbour entrance, 9 – 10 m. depth; sand and clay, good anchorage ground. The road is open for winds between S.S.W.
MAX. SIZE: Largest fully loaded vessel that can enter harbour about 5,500 d.w.t.
RADIO: Goteborg and Stockholm.
VHF: 24 hour watch at Trelleborg pilot station on VHF Channel 16 and "Ystad Port Radio" on Channel 16 during office hours.
TUGS: Tug usually meets vessel at entrance buoy. Ship's lines used. Tugs not compulsory.
BERTHING: Vessels of 160 m. length and 20 m. breadth can enter harbour. Draft 22 ft. at M.W.L.
STEVEDORES: Stevedores must be ordered from Ystads Stuveri AB. Working hours Monday – Friday 0700 – 1630 hrs. Meal intervals 0900 – 0930 and 1200 – 1300 hrs.
MEDICAL: Agents to be notified in advance if medical attention wanted.
TANKERS: Load/discharge lines 8 in. diameter, but reducing pieces for 6 in. and 10 in. diameter.
FRESH WATER: Available from quays. About 10 t.p.h.
FUEL: Coal and oil can be obtained by lorries.
GANGWAY/DECK WATCHMEN: Can be arranged.
OPENING/CLOSING HATCHES: Crew or stevedores.
CERTIFICATES: See "Stockholm".
CUSTOMS ALLOWANCE: (Tobacco), about 200 cigarettes or 200 gram of tobacco for each member of crew. (Spirits), one bottle for each member of crew.
CARGO GEAR: Loading/discharging with shore cranes and 4 roll-on/roll-off ramps.
IDENTIFICATION CARDS: Not needed.
CONSULS: Danish Consul, tel. 13800. Finnish Consul, tel. 13940. Norwegian Consul, tel. 13930.
REPAIRS: Mechanical workshop.
AIRPORT: 30 km. distant and served by regular airlines.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer (From April 1980).
HOLIDAYS: Christmas; New Year; Easter; Whitsun and Midsummer. No cargo work.
POLICE/AMBULANCE/FIRE: Police tel. 13620; Ambulance and Fire 90000.
SHORE LEAVE: Permitted.
DEVELOPMENTS: The buoyage system was changed in 1980.
AUTHORITY: Ystads Hamnforvaltning (Port Authority).

Syrian Arab Republic

GENERAL

PORT REGULATIONS:
In corroboration of Articles 2 and 8 of the Decree Law No. 154/1961 which created the General Directorate of Ports and invited them to control the safety and security of ports and territorial waters and empower them to enact communiques and instructions for same and for public interest, the following provisory instructions will be in force for vessels lying in the Syrian ports and territorial waters until permanent regulations are issued for the safety of the harbours.

1. Any vessel calling at Syrian ports should contact the pilotage station or the signal towers upon entering Syrian territorial waters 12 miles (marine) giving her name, nationality and her cargo in case the whole or part is dangerous, also her ETA at the waiting zone of the port of destination.
2. The Masters of foreign vessels lying in Syrian ports should hoist the Syrian flag (size 63×126 cm.) in accordance with international maritime courtesy. The Agent should supply any vessel without same upon her arrival at Syrian ports.
3. The vessel should hoist international signals for a Pilot or for dangerous cargo, also the quarantine flag, etc., in accordance with her situation while approaching Syrian ports.
4. The vessels once in territorial waters are not authorised to receive any person on board before free pratique is granted by Harbour Authorities.
5. It is forbidden to receive any person after free pratique and during the stay of the vessel either in road or inner basin unless by written authorisation from the Harbour Authorities. Customs and Security are exempt when in service.
6. It is forbidden for a vessel to use her wireless when lying in Syrian ports or at anchorage unless with authorisation from the Harbour Authorities and in emergency cases.
7. It is forbidden for vessels lying in Syrian ports to use their own steam or electrical blowers, amplifiers or make any other signals not allowed by international rules to avoid sea collisions or the light signals authorised by the Harbour Authorities in accordance with Article 14 of the present communique.
8. Masters should keep at any time on board of their vessels while lying in the ports a continuous watch and enough seamen in order to secure the exploitation department necessities or during emergency cases, and in order to take the necessary steps to avoid fire and damages to others (Article 17 of D/Law 193).
9. If a Syrian watchman is appointed to watch the vessel, he must have an authorisation order from the Harbour Authorities. The shipping Agent is responsible for the execution.
10. It is forbidden to use the vessel's life-boats in the ports or in territorial waters unless by previous written authorisation from the Harbour Authorities on the basis of a written request stating the causes, the time of the dropping down of the life-boat from the vessel, and the time of its lifting provided the cause is necessary.
11. All vessels should keep their gangways up from sunset to 0700 hrs.
12. The hatches, stores, etc., should be covered and locked, if possible, during the night.
13. In case any objects from the vessel or their cargo drop into the sea, the Master should inform both the Port CO and the Harbour Master immediately of same.
14. The following signals should be used for the above mentioned cases as follows:

		Signals	
	Case	*Sound*	*Lights*
a)	Attack by thieves	Sequence of 6 short blasts.	Sequence of 6 light signals and flashes from the foremast.
b)	Case of fire onboard or alongside	Sequence of long blasts, each set 6 blasts.	Sequence of 6 long flashes.
c)	Case of serious injury	Sequence of 2 long blasts.	Sequence of 2 long flashes from the foremast.
d)	Case of stranding	Sequence of 4 long blasts.	Sequence of 4 long flashes.

N.B.

1. Distance time between each sequence is half a minute, but the length of the signals should be in accordance with international signals regulations.
2. The above signals should be accompanied by wireless call on Channel 16 to both Pilotage and Stations in Syrian ports.
3. The above instructions do not forbid the use of other sound and light signals stated in the international rules.

BANIAS: 35.14 N. 35.56 E. (See Plan Book)

DOCUMENTS:
5 Copies Crew List.
1 Copy Vaccination List.
1 Copy Store List.
1 Copy Private Store List.
1 Copy Slop Chest.
In case of cargo to be discharged, following are required:
Original and 2 Copies Manifest.
3 Copies Bill of Lading.

PILOTAGE: Compulsory. Pilots board all tankers approaching the Terminals. These Pilots act in the same capacity as Mooring Masters in the berthing of vessels, after which they supervise the raising of the flexible hoses and their connection to the ship's manifold. During loading operation they act as the Company's Representatives. The Company's Mooring Masters will meet tankers in the vicinity of Marqab Light Buoy.

It is requested that tankers of 40,000 d.w.t. and over should have rigged, when in light condition, an accommodation ladder lowered to about 12 ft., above the water. This can be adjusted to suit conditions. A pilot ladder should be rigged immediately abaft the accommodation ladder, to within 2 ft. above the water. This will enable the Pilot to ascend the pilot ladder clear of the launch and then step on to the lower platform of the accommodation ladder. United Kingdom Merchant Shipping (Pilot Ladders) Rules 1965 is relevant.

APPROACHES: Vessels approaching the port should keep to the authorised passage, defined by the following co-ordinates:

(a)	Lat. 35° 13′ 00″ N. Long. 35° 42′ 00″ E.
(b)	Lat. 35° 13′ 00″ N. Long. 35° 56′ 00″ E.
(c)	Lat. 35° 16′ 00″ N. Long. 35° 55′ 24″ E.
(d)	Lat. 35° 16′ 00″ N. Long. 35° 40′ 34″ E.

ANCHORAGE: In the event of a berth not being available, or suspension of mooring operations on arrival, a good anchorage can be used South of the berths in the vicinity of the Marqab Light Buoy positioned at: Lat. 35° 12′ 7″ N., Long. 35° 54′ 46″ E. It is important to maintain a listening watch on Channel 16 VHF, or visual watch on the shore Signal Station positioned approximately at Lat. 35° 13.4′ N., Long. 35° 56.9′ E. and recognised during darkness by lights in "Lorenge Shape", in order to avoid delays.

MAX. SIZE:

	Draft		*Length*	
Berth No.	*Winter (ft.)*	*Summer (ft.)*	*of Vessel (ft.)*	*Purposes*
1	Removed			
2	48	48	1,000	Discharging Crude Oil
	50	51		Loading
3	49	49	1,000	Discharging Crude Oil
	51	52		Loading
4	40	42	750	Loading
5	34	34	700	Load./Disch. White Products
6	30	32	700	Load./Disch. White Products

N.B. (1) Above is actual and temporary up to 1980.
(2) New installations will be commissioned after 1980.

NOTICE OF READINESS: Time of Notice of Readiness tendered will be considered when vessel arrives in the very near vicinity of the Marqab Light Buoy (position Lat. 35° 12′ 27″ N., Long. 35° 54′ 46″ E.), where the Mooring Master, who is the Company's Representative, will board and receive ship and remain on board throughout the entire operation.

HEALTH: Masters of tankers due may obtain free pratique by addressing the usual quarantine message to their Agents through commercial radio channels.

RADIO: Syrian Company for Oil Transport, Banias Terminal must be informed 72, 48 and 24 hours prior to arrival of a vessel's ETA, quantity of cargo required if in a state to load and maximum loading rate required. All times to be given in GMT.

Banias Terminal Radio Station. Call sign: "YKM 5". Frequency: 500 kc/s and 442 kc/s and VHF Channel 16. Also see "Radio Procedure" below.

Tanker VHF Radio Communications. Vessels approaching Banias can communicate with the Terminal by FM, VHF, Channel 16. Range 30 to 40 miles. Frequency 156.8 Mc/s. Simplex Operation. Call sign: "Banias". On arrival, ships radio installations will be sealed according to normal practice and the boarding Mooring Master will put his own portable equipment on board. Communications will then be as follows:

Banias. Equipment: Fixed station sited in the Terminal. Call sign: "Banias". Frequency: Transmitting 163.6 Mc/s. Receiving 159.1 Mc/s. Range: 8 miles. Watches: Continuous whilst vessels are in port or immediate vicinity.

Mobile Station. Equipment: Placed aboard vessel on arrival at Banias. Call sign: Ship's name. Frequency: Transmitting 159.1 Mc/s. Receiving 163.6 Mc/s. Range: 5 miles. Watches: Mutually agreed between ship and the Terminal on first establishing contact.

Note: The radio telephone circuit is connected with the main Company Communications network in Banias Terminal.

Radio Procedure:

Station	*Banias Syria* Private station for communication with tankers bound for Banias Syria.

Call sign: YKM5
Address: S.C.O.T. Banias – Syria

MF Schedules (A1)

Banias radio station (YKM5) keeps a 24 hours continuous watch on 500 kHz and answers calls on 500 kHz QSY 440 kHz for traffic. Broadcasts traffic list on 500 kHz at 0430, 0830, 1230, 1630 and 2030 (GMT) receives on ship frequencies 425, 454, 468, 480 and 512 kHz – also broadcasts traffic lists, on 440 kHz at 0432, 0832, 1232, 1632 and 2032 (GMT).

HF Schedules (A1)

Time GMT	*Listens on*	*Answers on*	*Traffic list at (GMT)*
04 – 05	4 mHz Band	4351 kHz	0410
05 – 06	8 mHz Band	8667 kHz	0510
08 – 09	6 mHz Band	6493 kHz	0810
09 – 10	12 mHz Band	12987 kHz	0910
12 – 13	8 mHz Band	8667 kHz	1210
13 – 14	16 mHz Band	16967 kHz	1310
16 – 17	16 mHz Band	16967 kHz	1610
17 – 18	6 mHz Band	6493 kHz	1710

VHF Schedules (F.3)

Banias Terminal keeps watch on 156.8 mHz (Channel 16). For traffic change to other International Channels, as instructed by Banias Terminal. This has a range of approximately 40 miles and its call sign is "Banias".

It is essential that all tankers bound for Banias oil loading terminal communicate with Banias Radio Station YKM5 at least 48 hours before arrival and therafter maintain contact.

Note 1: YKM5 deals only with TFC. For:
S.C.O.T., I.N.O.C. Banias
QSJ Nil.

Note 2: YKM5 uses only two frequencies out of HF Schedule until further notice.
0500 – 0600 8667 kHz
0800 – 0900 6493 kHz
1700 – 1800 6493 kHz

TUGS: Available only on demand from General Directorate of Harbours at Lattakia.

MOORING REQUIREMENTS: For tankers loading/discharging at Banias are as follows:

Forward

Anchors to be fitted with marker buoys with 20 fathoms of line.
2×120 fathom mooring lines.
2 rope stoppers.
1 suitable wire stopper (preferably carpenter patent) for use with 4.75 in. to 5.5 in. mooring lines.

Aft

4×120 fathom mooring lines.
4 rope stoppers.
2 suitable wire stoppers (preferably carpenter patent) for use with 4.75 in. to 5.5 in. mooring lines.

Boat Ropes

To be rigged on either side of ship, and of not less than 4.5 in. circumference.

BERTHING: At all berths vessels moor using both anchors forward, with wires to a buoy on the port bow, one buoy astern and one on each quarter. Hoses are lifted on the port side to be connected to the ship's manifold which must have pressure gauge fitted.

HOSES:
Berth No. 2: 2×20 in./16 in. hoses.
Berth No. 3: 2×20 in./16 in. hoses.
Berth No. 4: 1×16 in. hose.
Berth No. 5: 2×12 in. hoses.
Berth No. 6: 2×12 in. hoses.

N.B. All strings of hoses end in 12 in. reducers.

FRESH WATER: Available through Agents by means of barges of 30 tons capacity each.

FUEL: Bunkers are not available at Banias.

BALLAST: All tankers should ensure ballast is clean. Authorities are most strict and impose heavy fines for the slightest contravention. Ballast quantity should be kept to the minimum required to ensure safe manoeuvring. No facilities for disposal of ballast ashore.

Banias is an open roadstead and sudden changes in weather can be experienced especially during the Winter months. It is good practice to commence loading as soon as hoses are connected and whilst ballast discharge is still in progress, always providing this can be achieved safely and with no danger of contamination.

POLLUTION: The Port Authorities will, in cases where pollution is ascertained, collect a declaration from the Master of the offending ship, in which declaration he authorises his Agents to pay any fine to be levied by the official committee in the future.

In the light of the above and to avoid any delay to vessels, owners are kindly requested to:

1. Supply vessels with necessary chemicals to destroy any quantity of oil overflowing into the sea.
2. Provide a bank guarantee of Stg. £5,000 to be deposited against eventual fines. Such a guarantee (or cash) must be given before offending vessel is released.

LOADING: Ships' Personnel are solely responsible for the loading operation, i.e. starting, loading rate, tank switching, topping off, stopping, etc. The Mooring Master will pass requirements to the shore control. It is in vessel's interest to advise loading rate required, also to give 30 minutes' notice of expected time of commencing loading. Order to start will be taken as final.

The Mooring Master must be advised when ship estimates 1,000 tons to go for completion of loading.

Ensure scuppers are effectively plugged. On no account are plugs to be removed.

A complete watch on deck must be maintained throughout the operation, especially towards the shore signal station, to ensure safe loading and avoid delays.

Loading Rates: No. 2, 7,000 t.p.h.; No. 3, 8,500 t.p.h.; No. 4, 6,500 t.p.h.; No. 5, 4,000 t.p.h.

Discharging pressure which should be maintained during the operation at ship's manifold is to be according to the Terminal Requirements which will be handed over to the Master at each call of vessel.

MEDICAL: Hospital facilities or other relevant medical information are available through Agent on and/or prior to arrival of vessel.

TANKERS: See "Hoses". Slops (residue) are not allowed to be discharged as no facilities for treating same are available.

CUSTOMS ALLOWANCES: According to regulations or at Customs' own discretion.

SURVEYORS: Lloyds, who are represented by the Syrian Maritime Transport Agency.

REPATRIATION: Facilities exist through Agents.

TIME: Local time is GMT plus 2 hours.

SHORE LEAVE: Permission may be obtained from Immigration Dept. ashore through Agents.

DELAYS: Unsuitable weather, and Free Berths providing berthing day and night.

REGULATIONS: Terminal Requirements and Conditions of Use of Terminal Facilities will be handed over to Master of vessel at each time of call. The following are some of the regulations in the booklet.

Vessel in berth: Ships are not allowed to remain in berth for any reason when loading operation stopped. Hoses should be disconnected and dropped to sea unless stay authorised by Terminal Superintendent.

Lighting: During hours of darkness the manifold and poop mooring area of the sea in vicinity of ship should be adequately lit.

Main Engines: Must be kept on shore notice. Repairs which will immobilise must not be carried out in berth.

Deck Machinery: Must be ready for immediate use at all times.

Whistle or Siren: To be available at all times.

Signalling: An "Aldis" type lamp to be readily available.

Stores, provisions, etc: It is strictly forbidden for provisions, stores or other items to be received or discharged whilst loading is in progress. Launches or other craft must not lie alongside during the same period.

Tanker Safety Regulations: Tanker Safety Requirements must be strictly adhered to at all times. The Mooring Master is authorised to stop all operations should he consider the safety regulations are not being complied with.

Boarding: The boarding of a vessel whilst in mooring should be restricted to persons holding valid passes which are issued by the Syrian Company of Oil Transport (SCOT) on application to ship's Agents and authorised chandlers.

This restriction is carried out in conjunction with the Syrian Harbour and Security Authorities.

WEATHER: The Director of Port Authorities has issued statistics of the weather conditions along the Syrian coast after an experience of 20 years.

State of winds and whirlwinds on the Syrian Coast

Winter	*Kind and direction of winds*
December	Regular winds blowing from N.E. to S.E., sometimes S. to S.W., the alteration of winds is accompanied with rains.
January	Excess of storms starting to blow from S.E. to N.E. The alteration of winds from the E. is occasionally accompanied by heavy rains with probability of hail.
February	Excess of storms and heavy rains blowing from S.W. to N.E. and E.
Spring	
March	Variable winds from S.E. to S.W. and accompanied by heavy rains and altering to N.W. slight.
April	Variable winds from N.W. and S.W., and S. winds accompanied with light rains.
May	Regular winds blowing S.W. to N.W. and altering to S. sometimes accompanied by rain.
Summer	
June	Slight winds from S.W. and S.
July	Moderate winds from S. to S.W.
August	Slight N.W. winds.
Autumn	
September	Winds S.W. and N.W. accompanied by some rain from 15th September. Winds will lighten during the end of the day and will alter at night to slight E.
October	Variable winds from W. to S. and N.W. accompanied by rain will alter at night to E.
November	The winds are variable from N.E. and N.W. accompanied sometimes by rain which will alter to E.

SERVICES: In the event of tankers requiring assistance to lift loading hoses, recover lost anchors, and cables, etc., limited aid may be given during normal working hours. Current charges are available on application from Agent.

SHIPMASTER'S REPORT: Cigarette allowance is strictly enforced at 40 cigarettes per man, and has to be carefully declared. If the Chief Steward has a slop-chest, it has to be carefully declared. Whisky has to be declared separately from other spirits, but in practice it is better to declare each type of spirits separately.

The ship's Log Book is stamped by the police.

The new flag is red, white and black, with an eagle in the centre and may be obtained through the Agent.

AUTHORITY: Port Captain, Banias.

AGENT: Syrian Company of Oil Transport, P.O. Box 13, Banias, (Tartous), Syria. Cables Scot, Banias. Tel. Scot 41012 SY.

BORJ ISLAM: 35.40 N. 35.48 E. (See Plan Book)

SHIPMASTER'S REPORT: October 1980.

LOCATION: Borj Islam is located at Lat. 35° 40′ N. Long. 35° 47′ 35″ E. 1.4 miles to the North of Ras El Fasori.

This location was adapted about 2 years ago by the Syrian Government as a discharge zone for LPG carriers and tankers of small tonnage. In this respect, we know that the last vessel to visit this port was an LPG carrier of approximately 5,000 tons.

The coast is a conspicuous promentory with deep water in front of it. For mooring at night, there are no lights indicating this berth, and this presents difficulties.

By day, one can steer towards the cement works which is the most important point of reference in that vessels berth beneath these works.

ANCHORAGE: Vessels arriving by night should anchor in the nearby roads of Lattakia.

By day, the advisable anchorage is 200 m. on a bearing of 140° from the cement works.

PILOTAGE: Pilot must be contacted on arrival on VHF Channel 16 at Lattakia, and instructions will be given for berthing. The Pilot boards vessels at Borj Islam.

BERTHING: This is very difficult since there are no berths or buoys. The vessel berths "stern to the land" with 2 anchors 6/7 shackles on each and lines are fixed on to rocks.

Great attention must be paid to winds from the S./S.W. and W./N.W., since this location is open to such winds.

DISCHARGE: This is effected with hoses (supplied by the ship for connection purposes). The product is discharged slowly to tanker trucks. The position where the vessel anchors has a depth of water from 11 m. to 40 m.

LATTAKIA: 35.31 N. 35.46 E. **(See Plan Book)**

PORT LIMITS: The seaward boundary of the port is about 2 miles West of the main breakwater, starting with the entrance line of 133° South.

DOCUMENTS: In addition to the copies of Bills of Lading, Cargo Manifests and the various Ship's Certificates, the Master of an arriving vessel must produce the following documents:

Crew List, showing full names of crew members, nationality, date of birth, and rank onboard.
Stores List.
Passengers List.
Health Certificates and International Inoculation Certificates.
All other documents relevant to the ship.

PILOTAGE: Upon a vessel's arrival at the anchorage area, she may call the Pilot in any of the following ways:

(a) Flying the internationally recognized flag.
(b) Blowing the ship's whistle – 2 long and 1 short.
(c) Calling the pilot station on VHF – Lattakia pilot station – using Channel 16.
(d) Signalling the pilot boat. – Grey colour hull and white colour bridge, always flying the Pilot's flag.

The Pilot boards an arriving vessel when she has reached a distance of about a few hundred metres West of the Breakwater Head under good weather conditions. When the weather is bad, an arriving vessel is directed to the port basin entrance by VHF. The Master is advised the proper directions to follow and when he is to lower the pilot ladder to the lee side.

ANCHORAGES: Upon arrival at the anchorage area referred to under "Port Limits", the vessel has to wait for orders. This Anchorage Area has a draft of 20 – 25 m., and all Masters awaiting there have to keep listening on VHF Channel 16, from 0600 until 0900 hrs. and from 1800 until 2100 hrs. local time, for fresh orders. It is always recommended to keep a special watch on VHF Channel 16, for sudden orders.

RESTRICTIONS: The state of tide at Lattakia is negligible, and all vessels may enter and sail out of the harbour by night or day provided she has a Pilot onboard.

MAX. SIZE: The maximum permissible length, breadth and draft of an arriving vessel are determined by the place of berth or anchorage point.

HEALTH: All arriving vessels are boarded by the quarantine service to whom all relevant documents are submitted, in particular the Deratisation Certificate, and incidents onboard reported.

The application is filed by the Agent, who accompanies the boarding authorities. Free pratique is never automatic.

RADIO: The name of the Lattakia station is "Lattakia Radio" on 2182 kc/s. or Channel 16 on the VHF. Following first contact another Channel is agreed upon, leaving Channel 16 for the pilotage service.

VHF: See "Radio".

TUGS: Tugs are always under the direct orders of the Pilot and join the vessel at the point the Pilot boards. Usually ship's lines are used but there is no charge for the use of the tug's lines.

BERTHING: Quay berths available as follows:

Name	*Length*	*Depth Alongside*
Main Quay	600 m.	9.50 m.
Silo Quay	180 m.	9.50 m.
Passenger Quay	160 m.	8.00 m.
Eastern Quay	250 m.	7.00 m.
Northern Quay	200 m.	4.00 m.

None of these quays is a specialized one. The water is always salty. Cargo is loaded or discharged either by the ship's gear or Port Co. Cranes, at the entire discretion of the latter. A ship may operate in the basin or open road in and from barges.

BULK CARGO FACILITIES: At the silo quay, grain and molasses are the only types of cargo which can be handled in bulk. Grain may be loaded into a vessel's holds at the rate of 450 t.p.h., and discharged at the rate of 50 t.p.h.

STEVEDORES: 24 hours ETA advice is required to arrange working gangs if vessel is scheduled to operate on arrival. The average loading and discharging rates vary with the type of vessel, nature of cargo, where berthing and whether working in lighters or not.

MEDICAL: Except for urgent cases on board, the Agent need not be notified in advance. Hospitals in town available, and likewise doctors and private clinics. No particular inoculations are required.

DENSITY: Salinity is 1.033 (33 grams Salt per cu.m.).

FRESH WATER: Supplied either from hydrants alongside main quay or from tank barge at a price of LS 1.00 per ton from hydrants and LS 2.50 per ton from tank barge.

FUEL: All types of known marine fuels are available, may be delivered in any quantity from cistern trucks alongside quay. 48 hours notice is required.

FIRE PRECAUTIONS: No specific precautions except that vessels carrying explosives must operate and discharge into lighters in the open road.

CONSULS: Sweden, Finland, Holland, Greece, Italy, Spain, Portugal.

REPAIRS: Only minor deck, radio, and radar repairs may be carried out. Extensive and specialised workshops are not available.

DRY DOCKS: Not available. Only a 900 ton slipway is in operation.

SURVEYORS: Only minor surveys by Lloyds, German Lloyds, and Veritas.

GANGWAY/DECK WATCHMEN: Compulsory and are supplied at a hire rate of LS 48.00 per watchman per day.

HATCHES: Normally opened and covered by the ship's crew.

CUSTOMS ALLOWANCE: Cigarettes, 2 packs per man. Spirits, as would be reasonably agreed with the Customs on board prior to sealing the vessel's stores.

CARGO GEAR: Both may be used at the entire discretion of the Lattakia Port Company. Two floating cranes are available – one of 60 ton capacity and the other of 35 ton. Also one mobile crane of 25 ton capacity.

REPATRIATION: All facilities exist and are attended to by the vessel's Agent.

AIRPORT: Damascus International airport is 340 km. from Lattakia by road.

TIME: Winter Time GMT plus 2 hours. Summer Time GMT plus 3 hours. (1st May through September).

HOLIDAYS: Following the Lunar Calendar, the first 2 days of Bayram and Al-Adha are the only non-operational days.

POLICE/AMBULANCE/FIRE: Police phone No. 93; Ambulance phone No. 93; Fire phone No. 91.

TELEPHONES: No proper arrangements exist. Vessels in port may use VHF Channel 16 with the pilot station of Lattakia Radio.

SHORE LEAVE: Crew members allowed ashore with shore passes.

IDENTIFICATION CARDS: Shore passes in addition to the seaman's book.

DELAYS: Vary with state of congestion prevailing in the port.

DEVELOPMENTS: The execution of the 2nd development stage has just started and it will cover the following new facilities:

Specialized container and Ro/Ro quays.

Draft	*Length*	
13.0 m.	260 m.	Containers
11.5 m.	190 m.	Containers
11.5 m.	200 m.	Ro/Ro
11.5 m.	350 m.	General Cargo
10.5 m.	425 m.	General Cargo
7.0 m.	450 m.	General Cargo

In addition there will be new warehouses and stacking areas totalling 230,000 sq.m.

SHIPMASTER'S REPORT: December 1979.

Documents: Health Declaration, De-Rat Certificate, Ship's Register, Cargo Manifest, all Safety, Loadline and Radio Certificates.

Pilotage: Compulsory. Pilot boards in the Roads. Normal ETA's required.

Anchorage: Vessel anchored approximately 1 mile West of the breakwater in 60 ft.

Restrictions: Vessel may enter and leave at any stage of the tide; day or night.

Max. Size: Max. draft at present 28 ft. 6 in., (this is to be increased). Keel clearance of 1.5 ft required.

Health: Vessel anchors on arrival. Free pratique filed by Agent who accompanies boarding authorities. The authorities sign the log book and inspect all certificates which must be up-to-date.

Radio: Lattakia Radio or Banias Radio.

VHF: Pilot and Port Authority on Channel 16.

Tugs: 5 tugs available. Tugs are required for berthing, however vessels may unberth without tugs.

Berthing: Vessel berthed at the main quay which is 1 mile from the entrance. A total of 4 berths are available plus a Ro/Ro berth. Max. size (approximately) LOA 190 m., beam 25 m. and deepest draft 28 ft. 6 in. The least depth of water in the channel from sea to the berth is 30 ft. Mean tidal range is negligible. Nature at the bottom is mud and the density is 1033.

Cargo Handling Facilities: There are bulk handling facilities for grain and molasses.

Cranes: There are approximately 20×5 ton cranes on the main quay. There are 2 floating cranes, 1 of 35 ton capacity and the other 100 tons capacity, (capacity at the present time reduced to 60 tons).

There is limited storage space for containers, however this is to be increased. There is equipment for handling 20 ft. and 40 ft. containers.

Facilities: The following are available: Fresh water (poor quality), fresh provisions (poor quality), minor repairs, airport (at Damascus 340 km.), Lloyds Surveyor (Agency), Salvage Surveyor (Agency), ship's laundry (good but expensive), bunker fuel oil and diesel oil (by truck), doctor and hospital, groceries and meats.

Consuls: Sweden, Finland, Netherlands, Greece, Italy and Portugal.

AUTHORITY: General Manager, Lattakia Port Company, Lattakia, administered by the Syrian Ministry of Transport.

AGENT: Gulf Agency Co. (Syria) Ltd., Malas Building, Al Jazaer Street, P.O.B. 210, Lattakia, Syria. Cables "Gacship", Lattakia, Tel. 30181, 30182. After hours Tel. 26303, 26304. Telex: Beirut 20906 ("GAC 20906 LE") or Athens 216344.

TARTOUS: 34.53 N. 35.45 E. **(See Plan Book)**

DOCUMENTS: Bill of Health – The usual International form should be filled in on arrival and the Agent will deliver on board the Bill of Health and Port Clearance upon departure.

Manifests – Should be certified by the Syrian Consulate at port of loading in 4 copies.

Ship's Registry – To be presented to the Port Authorities upon request.

Crew List – 4 copies should be handed over to the Agent along with passenger or transit manifests.

Store List – 2 copies required by Customs who will allow 40 cigarettes to be retained by each person on board, the balance of slop chest and stores shall be sealed during ship's stay in port. Customs officers are at liberty to search crew quarters.

Deratisation Certificate – Valid certificate required and no extension can be obtained.

APPROACHES: Vessels approaching the port should keep to the authorised passage defined by the following co-ordinates:

Lat. 34° 56′ 24″ N.	Long. 35° 38′ 00″ E.
Lat. 34° 56′ 24″ N.	Long. 35° 48′ 36″ E.
Lat. 34° 59′ 00″ N.	Long. 35° 50′ 00″ E.
Lat. 34° 59′ 00″ N.	Long. 35° 52′ 36″ E.
Lat. 34° 54′ 24″ N.	Long. 35° 51′ 12″ E.
Lat. 34° 54′ 24″ N.	Long. 35° 37′ 48″ E.

ANCHORAGE: Vessels proceeding to Tartous pick up Pilot at the Anchorage which is 0.5 miles S.W. of the main breakwater. The rocky bottom constitutes good holding ground with a depth of up to 20 m. of water.

MAX. SIZE: At present minimum depths are at the entrance of the harbour about 2 cables seaward of the green light on the S.W. Breakwater. Depth about 33 ft. Max. draft 32 ft. dependent on swell. Also see "Tankers".

RADIO: Tartous Radio, call sign YKO, continuous watch on 2182 kHz from 0600 to 2400 hrs.

BERTHING: Mooring Masters are temporarily supplied by Lattakia port and vessels should therefore contact Agents at Lattakia giving them their ETA and requirements. Vessels berth heading to the predominant S.W. winds, i.e. starboard side alongside unless contrary winds prevail at the time of the berthing.

Southern breakwater – 2,650 m. long called Main breakwater
Northern breakwater – 1,650 m. long called Lee breakwater

The distance between the 2 heads of these breakwaters is 250 m. with a depth of 10.5 m., which is being dredged in order to bring it up to 13 m.

The harbour is divided into 3 basins which are protected by the 2 breakwaters: (1) The North basin; (2) The Middle basin; (3) The Southern basin. The Southern basin is the only one used presently, for the discharge of cargo.

12 vessels can be moored at anchor inside the breakwater of this basin, the depth being between 8 – 13 m. The turning circle at the entrance is 450 m. diameter with a depth of 11 – 13 m.

The main quay which is 150 m. wide offers on its Southern side from the shore side 300 m. of jetty with a depth alongside of 2 – 4 m., 300 m. with 8 m. and 200 m. with 9 to 10.5 m. depth. A standard gauge railway line is installed on the entire length of the quay.

POLLUTION: See "Banias".

TANKERS: *Operator:* Syrian Crude Oil Transportation Co.

Maximum safe length of tankers acceptable – 1,500 ft.
Maximum safe draft of tankers acceptable – 68 ft.
Maximum deadweight of tankers acceptable – 100,000 tons.

There are 2 berths for loading:

No.	*Max. Rate*	*Sealine*	*Hoses*	*Depth of Water*
1 (North)	4,000 t.p.h.	1×28 in.	2×12 in.	76 ft.
2 (South)	5,000 t.p.h.	2×28 in.	2×16 in.×12 in.	72 ft.

Loading is by gravity and loading rate depends upon height of tank and level of oil. All strings of hoses are fitted with 12 in. butterfly valves.

ETA: It is essential that tankers bound Tartous Terminal, S.A.R. communicate with "YKM – 5", at least 48 hours, prior to arrival, stating cargo required, maximum loading rate, SWL of derrick and confirming that the ballast is clean, and the last ETA Tartous Terminal.

Confirmation of ETA: Tartous Terminal control is equipped with Channel 16. Arriving ships should make contact at least 2 hours before ETA Tartous anchorage area. It is in vessel's interest to make contact to avoid delay on arrival. Vessels not equipped with Channel 16 should contact "YKO" Tartous Control on frequency 2182 – 2662.

Notice of Readiness: Notice of Readiness will be accepted when vessel arrives in the very near vicinity of the anchorage area (Position Lat. 34° 57′ N., Long. 35° 49′ 45″ where the Mooring Master, who is Company's representative will board and receive vessel and remain on board throughout the entire operation.

Pilot Ladder: Combination of accommodation and pilot ladder to be rigged, accommodation ladder to be lowered to within 12 ft. of water. Pilot ladder to be placed abaft and to within 3 ft. of water.

Anchorage: In the event of berth not being available or suspension of mooring operations on arrival a good anchorage is to be used South of the berths in the vicinity of the anchorage area.

Shore Control will keep vessel advised of expected time of berthing, etc.

It is important and in the vessel's interest to maintain a listening watch on Channel 16 or a visual watch on the shore Signal Station, to avoid delays.

On being advised of expected time "Mooring Master will board", heave short anchor before his arrival.

Moorings:

Forward: Anchors to be fitted with marker buoys with 20 fathom of line. 2×120 fathom mooring lines; 2 rope stoppers; 1 suitable wire stopper (preferably carpenter patent) for use with 4.75 in. – 5.5 in. circ. mooring wires.

Aft: 4×120 fathom mooring lines; 4 rope stoppers; 2 suitable wire stoppers (preferably carpenter patent) for use with 4.75 in. – 5.5. in. circ. mooring wires.

Boat Ropes: To be rigged on either side of ship and of not less than 4.5 in. circ.

Derricks and Cranes: SWL of 7 tons is recommended. it must be capable of plumbing overside abreast of loading manifold.

Loading Manifold: 2 suitable reducers to be fitted prior to arrival on port side and to be connected to the Oil Company's hose connections (12 in. series 150 flanges). The following tools to be available: 2 spanners 0.375 in., 2 spanners 0.875 in., 2 hammers 7 lbs., 1 axe 2.5 lbs.

Hose hang-off bitts are required at about 10 ft. from the ship's rail at the loading manifold to secure submarine hoses on the port side.

Safety of Mooring: On completion of mooring operation vessel must have not less than 7.5 shackles of anchor chain in the water.

Ballast: No dirty ballast.

(a) The Port Authority is most strict and will impose heavy fines for any oil pollution of the sea. In addition they may order vessel out of the berth to sea to clean any such contaminated ballast, and keep it on board vessel in a separate or slop tank. N.O.R. will not be accepted until ballast becomes clean.

(b) Ensure ballast quantity on board is kept to a minimum to safe manoeuvre in the prevailing weather conditions.

(c) Excess ballast causes delay, Tartous is an open roadstead consequently sudden changes in weather can be experienced especially during the Winter months. It is good practice to commence loading as soon as hoses are connected and whilst ballast discharge is still in progress, always providing, this can be achieved safely and with no danger of contamination.

(d) Leakage or spillage of oil on board ship must be collected and not be swept or washed overboard.

Ship's Assistance: Ship's crew with an Officer in Charge to assist in All operations as advised by the Mooring Master. This includes lifting, connecting, disconnecting, lowering of hoses and tending anchor cables and moorings.

Deck Watch: A complete watch on deck must be maintained throughout the operation, especially towards the shore Signal Station to ensure safe loading and to avoid delays.

Deck Scuppers Plugs: Ensure scuppers are effectively plugged. On no account should plugs be removed.

Loading Operations: (a) Ship's personnel are solely responsible for the loading operations, ie. starting, loading rate, tank switching, topping off, stopping, etc. The Mooring Master will pass requirements to Shore Control. It is in vessel's interest *to advise loading rate required, also to give 30 minutes notice of expected time of commencing loading.*

(b) Should vessel require adjustments in the loading rate, please advise the Mooring Master, sufficient notice must be given to enable shore operators to comply. Failure to give proper warning may cause delay or a tank overflow on board.

(c) The Mooring Master will not transmit any loading instructions to the shore until the responsible ship's Officer has admitted that:

Ship is safely moored.
Hoses are correctly connected.
All valves have been set for receiving cargo.

Order to start will be taken as final.

Vessels in berth: Ships are not allowed to remain in berth for any reason when loading operation is stopped, or disconnect hoses and drop them into the sea unless authorised by Terminal Superintendent.

Lighting: During hours of darkness the manifold, poop, mooring area of sea in vicinity of ship should be adequately lit.

Main Engines: Must be kept on short notice. Repairs which will immobilise them must not be carried out in berth.

Deck Machinery: Must be ready for immediate use at all times.

Whistle or Siren: To be available at all times.

Signalling: An "Aldis" type lamp to be readily available.

Stores Provisions, etc.: It is strictly forbidden for provisions, stores or other items to be received or discharged whilst loading is in progress, launches or other craft other than Company launches must not lie alongside during the same period.

Tanker Safety Regulations: Must be strictly adhered to at all times. The Mooring Master is authorised to *stop all operations* should he consider that Safety Regulations are not being complied with.

Boarding: The boarding of vessel whilst in mooring should be restricted to persons holding valid passes which are issued by the Terminal Superintendent on application to ship's Agents and authorised Chandlers. This restriction is carried out in conjunction with the Syrian Harbour and Security Authorities.

Vessel not allowed to send any crew or materials outboard for any reason before asking Agents for granting the official authority.

Guests: Masters wishing to receive guests on board should make arrangements through their Agents.

Action in case of emergency: In the event of fire, oil spillage or other emergency on the vessel

The Emergency Signal is

3 or more blasts of not less than 10 seconds duration each
on whistle or siren supplemented by a continuous ringing
of the general alarm bells.

Corridor: The corridor must be followed by vessel to Tartous Terminal:

Corridor Leading to Tartous Terminal

(a)	Lat. 34° 59′ 00″ N.	Long. 35° 50′ 00″ E.
(b)	Lat. 34° 59′ 00″ N.	Long. 35° 52′ 36″ E.
(c)	Lat. 34° 56′ 24″ N.	Long. 35° 38′ 36″ E.
(d)	Lat. 34° 36′ 24″ N.	Long. 35° 38′ 00″ E.
(e)	Lat. 34° 54′ 24″ N.	Long. 35° 37′ 48″ E.
(f)	Lat. 34° 54′ 24″ N.	Long. 35° 51′ 12″ E.

FRESH WATER: Unlimited supplies available to vessels berthed alongside the main pier.

FUEL: Only available in very limited quantities by tanker truck.

MEDICAL: Medical facilities are available, but serious cases may involve transportation to Lattakia or Damascus.

DEVELOPMENTS: A new quay for phosphate is now under construction 300 m. long and 4 m. depth and will be prolonged by a quay of 250 m. length and 11 m. depth for vessels loading phosphate up to 35,000 tons capacity. 1 shiploader, rate 1,000 t.p.h.

A dry dock will be soon under construction for repairing vessels and tankers with a capacity varying between 40 and 60,000 tons. Also 2 slip-ways for general overhaul for small vessels of 1,000 tons and less.

FLOATING CRANE: A floating crane of 100 tons lifting capacity available.

SHORE LEAVE: No amenities for the crew exist in the town of Tartous but crew may, if required, proceed ashore with a landing permit issued by the local security services.

WEATHER: See "Banias".

SHIPMASTER'S REPORT: September 1979
Time Zone: GMT plus 2 hours.
Paper Required:

1 Health Declaration.
8 Crew Lists.
1 General Information Sheet (Ship's details)
1 Provision List.
1 Bonded Stores List.
1 Crew Effects List.
1 Firearm & Ammunition Declaration (Letter even if none).

Radio: Certain regulations are in force when approaching Tartous. When 50 miles off the coast, the following should be sent through Lattakia Radio to Tartous Harbour Master.

1. Name of ship.
2. Nationality.
3. Type of Vessel.
4. Position and time.
5. Maritime Passage to port of call.
6. Speed.

From experience it was found that Lattakia Radio did not answer until 0630 hrs. Local Time.

Approaches: Approach to Tartous should be made along the Maritime Passage between the parallels of 34° 54′ 24″ N. and 34° 56′ 24″ N. on a course of 090° from 12 miles off.

Pilotage: Pilots commence work between 0530 hrs. and 0600 hrs. and can be called on VHF Channel 16. The pilot station will require draft, length, and type and tonnage of the cargo. The latter being important as vessels with less than 300 tons have priority, as do container vessels and ro/ro ferries.

It is most probable that it will be necessary to anchor off because of congestion. Vessel was anchored in a position with the end of the main breakwater bearing 110° True, distance 1.35 miles in a depth of 15 fathoms. Holding ground is reputed to be good.

Clearance: Vessels will normally be cleared on arrival at the anchorage if arriving in the morning or before 1400 hrs. If not, then Notice of Readiness can be sent via Tartous Radio.

Registration: It is possible to proceed to Tartous, register a turn for berthing and then proceed to another port.

When waiting for a berth, provision should be made for a delay of about two weeks.

Fresh Water: Requests for fresh water should be made in good time. At time of writing, there is only one meter in the port, though all the berths have water laid on, so vessels have to take it in turn. Applications should be made through the Agent for water. Vessels at anchor are brought in and tie up stern to the N.W. corner of the Southern pier, the water hose then being passed over the stern, ship's hoses will be required. Pressure is good, water being supplied at about 15 to 20 tonnes an hour. As supply of water cannot be guaranteed when a request is made, water stocks should be conserved.

Berthing: Berths are available on both sides of the Southern pier and at the end, though this area is reserved for the ro/ro ferries and small craft. Further berths are at the breakwater with the vessels tying up in a "Mediterranean Moor", i.e., stern to.

General: The Government Agency, Shipping Agencies Co., can be reached on Channel 16 or through Tartous Radio, their telephone numbers being 21541 & 20940.

Information regarding berthing is given by the pilot station on Channel 16, possibly in the evening before berthing, or in the morning about half an hour before berthing. Standard procedure is to weigh anchor and proceed slowly towards the four buoys marking the entrance channel. The Pilot may request that you enter the port slowly and he will board inside the breakwater. There is no difficulty in this, but it should be noted that there is a noticeable current flowing Northwards even though there is no wind.

In the Summer months, there is a seasonal low over the mainland of Syria which gives rise to a prevailing South-westerly air stream, more noticeable in the afternoons with the advent of the sea breezes. Periods of calm are also experienced and winds from other directions but not of any great force. In the Winter months gales are experienced.

A launch service is available for vessels at anchor and at the breakwater berths, this can be arranged through the Agents. Four tugs are available, two large and two small, one of the latter doubling as the pilot launch, identifiable by the pilot flag.

Cranes are available on both sides of the pier except where the silo is under construction. A phosphate berth is situated at the South side of the harbour, there being silos for this berth, at present it is fed by road transport from the mines inland. However, it is understood that a railway is being constructed for this. Another pier (mole) is being constructed between the existing Southern Pier and the Naval Pier in the North of the harbour. Fresh vegetables are available in season.

AUTHORITY: Harbour Master.

AGENT: Gulf Agency Co. (Syria) Ltd., Houssein Ali Building, Alnarges Street, P.O. Box 19, Tartous, Syria. Cables "Gacship", Tartous. Tel. 21897, 22287. Telex: Beirut 20906 or Athens 216344.

NOTES

Please also advise Shipping Guides Ltd.

Taiwan

HUALIEN: 23.59 N. 121.38 E. **(See Plan Book)**

PORT LIMITS: Radius of 1 mile from the centre of Hualien Kan Breakwater Beacon (23° 59′ 11.35″ N. 121° 37′ 35″ E.).

DOCUMENTS:

Ship's Register.
Derat Certificate.
Last Port Clearance.
Aids to Navigation Charges Memo.
Pratique.
8 copies Crew List.
1 copy Crew List visaed by office of China Mission (applicable to American vessels).
8 copies Passenger List – landing and transit.
1 list showing dates of vaccination (within 3 years) of all crew and any landing passengers. WHO "Yellow Books" may be examined.
1 Chinese Maritime Customs Stores List.
1 list Foreign Currency in safe.
1 list Narcotics in safe.
1 list Arms and Ammunition.
1 set of copy Bills of Lading.
2 Manifests of Inward Cargo.
3 Manifests of Through Cargo.
2 lists of Unmanifested Inward Parcels.
2 lists of Mail for landing.
Vessel's Log Book.

PILOTAGE: Compulsory. At anchorage hoist 'G' flag.

ANCHORAGE: *Quarantine Anchorage:*

Positions: (A) Lat. 23° 58′ 30″ N. Long. 121° 36′ 50″ E.
(B) Lat. 23° 58′ 30″ N. Long. 121° 37′ 10″ E.
(C) Lat. 23° 57′ 50″ N. Long. 121° 36′ 50″ E.
(D) Lat. 23° 57′ 50″ N. Long. 121° 37′ 10″ E.

RESTRICTIONS: Hualien Harbour closed to all ships at 0001 until 0500 hrs. Large ships not allowed to enter after sunset.

MAX. SIZE: Draft not exceeding 9.1 m. and length 160 m. may enter Hualien Harbour at present time.

HEALTH: At anchorage hoist 'Q' flag. Also see "Keelung".

RADIO: Hualien Radio XSY; ETA reported at least 24 hours before arrival.

TUGS: Normally used in harbour. Ship's lines should be used.

BERTHING: *Deep water wharf:* 2,487 m. (16 berths) capable of berthing 2 – 3×6,000, 3 – 4×7,000, 4 – 5×1,000 and 3 – 4×15,000 ton vessels, at the same time.

CRANES: 1×52 ton electric stationary derrick crane, boom length – 22 m. 3×25 ton mobile cranes. 1×45 ton (12 tyres) mobile crane.

STEVEDORES: Stevedores will be assessed against ships except when otherwise agreed between ships and consignees or shippers.

MEDICAL: Hospitalisation can be arranged through Agent.

FRESH WATER: Hoses from water-lines to tanks.

FUEL: 4 grades obtainable from Chinese Petroleum Corporation:

1. Marine diesel light – SUS at 100°F, max. 38.
2. Marine diesel heavy – SUS at 100°F, 35 – 45.
3. MF – 80 (MD – 600).
4. Fuel oil.

Fuel line 6 in. connection, no barge available, notify in advance.

DEVELOPMENTS: The outer harbour extension began 1978 and will be completed in 1985. The project will increase the berthing capacity to 25 ship berths.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CERTIFICATES:

Ship's Nationality Certificate.
Passenger ship Safety Certificates.
Cargo ship Safety Construction Certificates.
Cargo ship Safety Equipment Certificates.
Cargo ship Safety Radiotelegraphy
(Radiotelephony) Certificates.
International Load Line Certificate.

IDENTIFICATION CARDS: Passport or Seaman's book required.

AIRPORT: Domestic airport with connection to Taipei and Kaohsiung Airport.

TIME: GMT plus 8 hours.

AUTHORITY: Hualien Harbour Bureau.

KAOHSIUNG: 22.37 N. 120.16 E.

PORT LIMITS: Ship considered to be an "arrived vessel" when anchored at either of following locations:

1. Northern anchorage: Within 2 miles radius off Kaohsiung Lighthouse (22° 37′ 01″ N. 120° 15′ 25″ E.) forming a sector between Southern side of outer harbour channel toward shore line Southward.
2. Southern anchorage: Within a radius of 2.5 miles from the signal station of the second harbour entrance (22° 33′ 21″ N. 120° 18′ 28″ E.) forming a sector between Northern side of outer harbour channel toward shore line Northward.
3. For VLCC to discharge at 2 Monobuoys: SBM No. 1 position 22° 30′ 29″ N. 120° 17′ 49″ E. SBM No. 2 position 22° 29′ 45″ N. 120° 16′ 41″ E. Tankers are to anchor 1.5 miles West of the respective SBM as directed by Agents.

DOCUMENTS:

10 Crew Lists.
1 Customs Stores List (plain form acceptable).
1 Narcotic List.
1 Foreign Currency List.
1 Crew's Declaration List.
1 Arms and Ammunition List.
1 Parcel, Passenger and Mail List (all nil items may be put in one statement).
1 Set of Bills of Lading and Manifests if any.

PILOTAGE: Compulsory. Agents will arrange for Pilot to board vessel at anchorage outside breakwater. Pilot boat flies code flag "H".

Containerships over 15,000 g.r.t. and other freighters or tankers over 200 m. LOA must take 2 Pilots at double pilotage.

ANCHORAGE: See "Port Limits".

RESTRICTIONS: Container ships can enter and sail 24 hours a day. Other vessels up to midnight only. Vessels with max. draft 34 ft. must await high water to enter via Northern entrance.

MAX. SIZE: Length and breadth no restriction (largest container ship entered: 950 ft. LOA and 106 ft. beam). Max. draft inner harbour 34 ft. during high tide. Tankers with draft over 34 ft. discharge at Monobuoy outside.

HEALTH: Free pratique granted at anchorage after Master completes Quarantine Declaration Form furnished by quarantine doctors. Radio pratique available (see "Keelung"). No quarantine necessary if second port in Taiwan.

Shipmaster's Report: Master visited the port in 1976 and Cholera Certificates were not requested for inspection.

RADIO/VHF: Kaohsiung Radio (XSW). Normally used by Agents when cabling vessels. Contact with the Agent and Port Authorities may be made via Kaohsiung Port Radio on VHF Channel 16. Call Port Radio on Channels 16/14, 156.8 mHz. 1 hour before arrival to report ETA at Kaohsiung Roads.

TUGS: Harbour tugs usually join vessel after entry and while berthing. Ship's lines always used. Largest tug 2,400 h.p.

BERTHING: No specific requirement except bulk-carriers and tankers with max. draft of 34 ft. must berth during high tide.

Wharves: There are at present 65 wharves with a total length of 12,951 m. and 27 mooring buoys capable of accommodating 102 ships.

Container Terminals: No. 1 – consists of 3 berths Nos. 41 – 43. Berths Nos. 42 – 43 served by 1 MHI 35 ton gantry crane. 4 straddle-carriers available for 20 ft./40 ft. containers.

No. 2 – Includes 4 berths Nos. 63 – 66. Berths Nos. 64 – 66 are leased to lines for exclusive use. Berth 63 is the only common user berth. Container handling equipment includes 6 SIS gantry cranes and 20 straddle-carriers for handling 20 ft./40 ft. containers.

No. 3 – Includes 3 berths Nos. 68 – 70, with total length of 960 m. and a depth of 14 m. The terminal has 6 container cranes and a 65 hectares container yard.

Grain and other bulk handling equipment: For grain, there are 3 silos, 2×40,000 tons capacity and 1×80,000 tons capacity, unloading rate 400 – 600 t.p.h. 105 grabs also used to discharge grain by ship's gear at hourly rate of 40 – 50 tons per gang/hour. For heavy lifts, there are 3 floating cranes of 120, 60 and 30 ton capacity available.

STEVEDORES: All Government stevedores ordered by Agents as required.

MEDICAL: No advance notice required unless emergency case. Vaccination Certificates against smallpox (3 years) and cholera inoculation (6 months) required.

See "Health" – Shipmaster's Report.

TANKERS: Discharge lines at oil terminal inside harbour 8 in. (2 berths), and 12 in. at Monobuoy outside with necessary reducers supplied from ashore. In latter case, Master must inform Agents size of ship's manifold.

There are two Monobuoys situated about 7 miles S.S.E. of the Northern Anchorage. Their positions are:

SBM No. 1 – 22° 30′ 29″ N., 120° 17′ 49″ E. A white flashing signal light is mounted at the centre of the buoy with a range over 5 miles. The light appears for 1 second and goes off for 2, it then appears for 1 second and goes off for 11 seconds. This cycle is repeated. The area around the mooring buoy has a depth of 68 ft. and can accommodate tankers up to 140,000 d.w.t. The current runs at a maximum of 2.5 knots.

SBM No. 2 – 22° 29′ 45″ N. 120° 16′ 41″ E. depth around the area about 98 ft. capable of discharging tankers up to 250,000 d.w.t. Characters of signal light mounted at the centre of the buoy: White flash 1 second on and 1 off for 3 times then 1 second on and 8 seconds off in that cycle.

The 2 buoy moorings have facilities for 2×12 in. hose connections. Bunkers and fresh water not obtainable. Stores can be arranged for delivery by boat. Other services available to tankers at the buoys are confined to those of urgent nature.

VLCC's programmed to use the SBM Terminal are required to anchor 1.5 miles West off the respective SBM for arrival clearance. Pilot/Quarantine/Immigration, Cargo Supervisor and his hose-handling party board in this vicinity from a tug. After the discharge of cargo, the vessel is required to proceed to the Northern Anchorage to receive sailing clearance.

DENSITY: Average 1015 in Summer, 1023 in Winter.

FRESH WATER: Most berths supplied from shore line, otherwise from barge paying additional lighterage.

FUEL: All grades, mostly received from barge. Owners must contact suppliers for nomination through Chinese Petroleum Corp. before ship's arrival.

FIRE PRECAUTIONS: No specific regulations, but routine precautions should be enforced.

GANGWAY/DECK WATCHMEN: Recommended, to meet local security requirement.

OPENING/CLOSING HATCHES: Mostly handled by stevedores except steel hinged covers, which are to be done by crew.

CERTIFICATES: Ship's registry, Load-line, Safety Construction, Safety Equipment, Safety Radio-telegraphy and Derat Exemption Certificates must be inspected by Customs/Harbour Authorities.

CUSTOMS ALLOWANCE: 200 cigarettes or 1 box cigars and 1 bottle of wine or spirit allowed each. Application can be made to break seal for next issue once every 4 days.

CARGO GEAR: No additional requirements, but Cargo Gear Certificate must be valid.
IDENTIFICATION CARDS: Not required.
CONSULS: All in capital city Taipei, 230 miles North of Kaohsiung.
REPAIRS: China Shipbuilding provide 1,800 m. of quaywall and can handle any kind of repairs.
DRY DOCK: China Shipbuilding Corp. have a dry dock of 950 m. long with breadth 92 m. and average depth of 14 m. This dry dock is separated into 3 stages by 2 intermediate gates in between, of 380/390/180 m. respectively. Each stage can be independently operated to facilitate fabrication of ship sections, as well as to dock and repair ships.

A floating dock "Viva Island" LOA 174 m. with distance between side walls of 30 m. Draft over keel blocks 7.3 m. with lifting capacity of 11,500 tons.
REPATRIATION: Crew changes arrangeable.
AIRPORT: 7 miles from main port area. Presently linked with Hong Kong, 1 return flight daily.
TIME: Local: GMT plus 8 hours. No alteration during the year.
HOLIDAYS: New Year's Day (Jan. 1st – 2nd); Youth Day (Mar. 29th); Ancestors' Memorial Day (Apr. 5th); Labour Day (May 1st); Dragon-boat Day (5th day of 5th Lunar Month); Mid-Autumn Festival (15th Day of 8th Lunar Month); Confucius' Birthday (Sept. 28th); National Day (Oct. 10th); Taiwan Restoration Day (Oct. 25th); Late Pres. Chiang's Birthday (Oct. 31st); Dr. Sun's Birthday (Nov. 12th); Constitution Day (Dec. 25th); and Chinese Lunar New Year's Day (2 days mostly in Feb.). No work on New Year's Day (Jan. 1st), Labour Day (May 1st) and Chinese Lunar New Year's Eve and New Year's Day. Double stevedoring rates for rest of holidays.
POLICE/AMBULANCE/FIRE: Police and Ambulance: call 562311 Ext. 441; Fire: 562311 ext. 441 or 226119.
TELEPHONE: Telephone available for ships alongside wharf.
SERVICES: Laundry, ship-chandler and competent technicians available for repair of radar, radio, compass adjusting and other navigational aids. Tank cleaning equipment and facilities not available.
SHORE LEAVE: Normally arrangeable.
REGULATIONS: No curfew exists. Port opened for container ships 24 hours day and night; for other vessels between 0600 – 2300 hrs. only. Vessels flying flag of nations without diplomatic relation with the Republic of China must send 1 copy each of ship's photo (8 in.×10 in. broadside) and photocopy of Registry or Tonnage Cert. and 10 crew lists for application of entry permit.
DELAYS: With rapid extension of the harbour and more new wharves and container terminals built. Delay has been considerably reduced and very rarely occurs.
DEVELOPMENTS: A bulk transhipment terminal is to be built. Facilities will include 2 berths for 60,000 d.w.t. vessels, grain silo of 110,000 tons capacity, loading unloading equipment and packing facilities.
AUTHORITY: Kaohsiung Harbour Bureau.

KEELUNG: 25.09 N. 121.44 E. (See Plan Book)

PORT LIMITS: Any ship is considered to be an "arrived ship" once she has reported to Keelung Harbour Radio Station whether or not actually entering the outer harbour. However, Quarantine and Customs Inspectors do not attend ships outside the breakwaters due to lack of adequate transportation also they do not consider any ship an "arrived ship" unless she actually enters the outer harbour.
DOCUMENTS:

Ship's Registry.
International Load Line Certificate.
International Safety Certificate.
Last Port Clearance.
Crew List.
Fumigation Certificate.
Import Manifests.
Through Cargo List.
Stores List.
Arms and Ammunition List.
Narcotics List.
Foreign Currency List.
Parcel List.
Passenger List.
Yellow-book for every person on board (Vaccination Certificate).

PILOTAGE: Compulsory from anchorage to dock and any other movements in port. Pilot may also meet ships within 1 or 2 nautical miles North of breakwaters, commencing sunrise till sunset upon ship's/Agent's request. While waiting outside breakwaters for a Pilot, vessels shall keep adequate space and take care of both ship's and Pilot's safety. Before arrival, vessels shall contact Keelung Harbour Radio Station (25° 09′ 42.5″ N. 121° 44′ 57.5″ E.) via VHF on Channel 16 to ascertain Pilot's exact boarding time.
ANCHORAGES: Area in outer harbour is 8 m. to 13 m. in depth and can only contain 4 ocean-going vessels at a time. Vessels may also anchor outside breakwaters for Pilots or entry instructions.
RESTRICTIONS: Keelung Harbour Radio Station consists of Naval Harbour Control Signal Station and Harbour Bureau Signal Station. The former controls the entry and exit of all the vessels with the latter's assistance. Any ship shall apply in advance of her actual entry/exit by light signal or via VHF to Keelung Harbour Radio Station and shall not leave dock nor weigh anchor nor sail and remain close to harbour entrance before obtaining from Naval Harbour Control Signal Station the signal permit to entry or leave.
HARBOUR APPROACHES: At a location of 1.5 nautical miles N.N.W. from Keelung Isle ships should take Wan Jen Tsui Pi lighthouse and Chiu Tzu Shan lighthouse as coordinates and sail in on course of true bearing 201°. When 2 nautical miles North from harbour entrance, ship's course should be adjusted for entry. Ships should allow adjustment for their planned course and speed and should pay special attention to Hsin Lai Reef, East Breakwater, wind and current.
MAX. SIZE: Max. possible overall length less than 900 ft. Vessels or Agents shall declare ETA to Harbour Bureau 24 hours prior to their arrival.
HEALTH: Radio pratique possible. Pratique will be granted when vessel is in anchorage. Three measures will have to be conducted, these are: disinfection of ship, sampling of food and water, tetracycline drug for person, if the vessel arrives from an affected area within 5 days.

1. To obtain free pratique by radio, the Master is required to cable the following information to Agent within 10 to 36 hours prior to the vessel's arrival at the port.
   (1) Ship's name.
   (2) First port of the voyage and date/time of sailing.
   (3) Name(s) of port(s) and respective departure time, where the vessel called within the last 14 days prior to arrival at the Formosan port.
   (4) ETA.
   (5) Kind of deratting certificate, place and date of issue.
   (6) Number of crew and passengers on board.
   (7) If any illness or death occurred within 14 days prior to the vessel's arrival, and if so, give a detailed report.
   (8) If any rat or abnormal death of rats is found on board within 14 days before the vessel's arrival.
   (9) If there is any shipment of foodstuff on board.
   (10) Number of crew/passengers with an invalid vaccination certificate.
   (11) Any other information (if any doctor on board, etc.)
   (Example:)
   mv " .... " (ship's name)/New York 1st Mar 1300/Honolulu 16th Mar/25th Mar 1000/Yokohama 1st Nov 1977 Exemption/Crew 35 Passenger 3/7 to 11 None

2. Vessels under the following conditions are not allowed to apply for the radio pratique:
   (1) The interim time from the date when the vessel left the infected area and/or the place where infection is suspected to the date of the vessel's ETA at the Formosan port, is not over the legal incubative period of infectious disease, i.e. 5 days for cholera, 6 days for pest and yellow fever, and 14 days for smallpox.
   (2) Infectious disease and/or suspected infectious disease and death occurred within 14 days prior to the vessel's arrival at Formosa.
   (3) When any inactive rat is found or abnormal death of rats is found on board within 14 days prior to the vessel's arrival at Formosa.
   (4) When the vessel possesses no valid deratting/exemption certificate.
   (5) When a vessel comes from or passes through the infected area and there is any crew member/passenger who possesses no valid vaccination certificate.

3. The Quarantine Officer may still go on board the vessel after her berthing for re-inspection even if the radio free pratique is granted. If any discrepancy is found twice or more, then the vessel will be deprived of the right to apply for the radio pratique for one to six months.

RADIO:

1. Call Name: Keelung Harbour Radio Station is called Keelung Port Radio (or K.P.R.).
2. Channel:
   (1) Channel 16 (156.8 mHz.) is a duty channel, used for establishing communications.
   (2) Channel 14 (156.7 mHz.) is used for longer communications after making contact on Channel 16.
   (3) Channel 12 (156.6 mHz.) is a spare Channel, used for emergency.
3. Communication Contents:
   (1) Messages for vessels to enter or leave.
   (2) Matters concerning navigation and anchorage.
   (3) Other Emergencies.
4. Communication Distance: Any waters within diameter of 10 nautical miles from this station.
5. Priority:
   (1) Emergency salvage at sea.
   (2) Messages for vessels departing.
   (3) Messages for vessels at anchor in outer harbour.
   (4) Messages for vessels waiting outside breakwaters for entry instructions.
6. Languages to be used:
   (1) Mandarin.
   (2) English.
7. Remarks: Communications always in plain languages. Any codes or private conversations are not allowed unless approved by officers in charge.
8. Vessels shall contact Keelung Harbour Radio Station via VHF as soon as they are 10 nautical miles from the harbour and shall not be considered as "reported" unless answered by the station. The reporting time is to be counted for the basis for allocating berths. The report includes:
   (1) Nationality.
   (2) Vessel's Name.
   (3) Call Letters.
   (4) ETA Outside Harbour.
9. Communication Procedures: In accordance with international radio communication procedures.
10. Vessels without VHF or with VHF out of operation and thus unable to report earlier to Keelung Harbour Radio Station (25° 09′ 42.5″ N. 121° 44′ 57.5″ E.) shall contact the station by light signal until answered, as they report when vessel arrives within the visual scope of Ton Pan Yu Signal Station (domiciled with Keelung

Harbour Radio Station) in the waters outside the harbour. The report includes:
(1) Nationality.
(2) Vessel's Name.
(3) Call Letters.
(4) Actual arrival time or anchoring time outside the harbour.

11. Vessels unable to report by light signal through lack of power shall use other means to report same information as indicated in item 10 above or hoist vessel's call letters enabling registration at the station.

RADAR/VHF: No radar service to aid navigation in port. VHF and flashing lamp only used on ship's arrival. However, Pilots carry pocket walkie-talkie's to communicate with tugs and line-men on dock.

TUGS: 1×700 h.p., 1×1,100 h.p., 1×1,500 h.p., 1×1,700 h.p., 1×2,400 h.p., 2×600 h.p., 2×1,600 h.p. and 2×2,800 h.p.

BERTHING: Docking during daytime, and also during night-time if weather permits.

SPECIALISED CARGO HANDLING FACILITIES: Wharves No. 2, No. 3 and No. 14 to 18 at 3 tons. No. 4 at 30 tons stationary shore cranes on each wharf. Other wharves can be served by 10 to 100 tons mobile cranes, and No. 19 to No. 26 wharves can be served by 250 tons mobile crane.

Wharves No. 19 to No. 26, for container ships, Ro-Ro ships, and "Lash" vessels, equipment includes 6 Gantry cranes, capacity 35 tons; 12 straddle carriers for 20 – 40 ft. containers and 1 side loader for 20 – 40 ft. containers.

Wharves No. 30, 3 pneumatic unloaders for grain in bulk, max. capacity 600 t.p.h. average capacity 480 t.p.h.

CRANES: 25 mobile cranes, capacity 10 – 250 tons, 17 wharf cranes, capacity 3 – 30 tons. 6 container cranes, capacity 35 tons, 4 floating cranes, capacity 90 tons, 55 tons, 50 tons and 30 tons.

Other equipment: 240 forklifts, capacity 1 – 35 tons; 20 electric platform trucks; 5 portable pneumatic unloaders (for grain unloading), and 75 grab buckets and 9 excavators.

STEVEDORES: According to the storage plan and cargo details, stevedores are assigned by Harbour Bureau. Work time is divided into dayshift and nightshift. The hourly rates of handling major cargoes by each derrick is: Containers 24 t.e.u., bulk cargo 30 tons, logs 50 tons, grain 55 tons, general cargo 30 tons.

MEDICAL: All clinics and hospitals in Keelung area with English-speaking doctors and modern hospitals available in Taipei, a city 30 km. away.

TANKERS: Wharf No. 33 specially reserved for tankers, draft limited to 35.6 ft.

DENSITY: 1002 to 1023.

FRESH WATER:
1. Water supply facilities: Every wharf equipped with 2 hydrants of 2.5 in. in diameter, each tap delivering at rate of above 20 t.p.h.
2. 4 water barges, each barge delivering at rate of over 60 t.p.h.
3. Price:
   (1) Water supplied alongside priced at NT$33.00 (current exchange rate NT$38.00 to US$1.00) per ton.
   (2) Water supplied by barges at NT$53.00 per ton.
4. Application: Ships/Agents shall notify Harbour Bureau as early as possible if they need fresh water.

FUEL: Bunkers available subject to ship's/Agent's advance notice to C.P.C. who operate the bunker facilities.

FIRE PRECAUTIONS: Special wharves for tankers, wharves No. 33 and 33B having automatic fire equipment; fire brigade and fire boats available.

GANGWAY/DECK WATCHMEN: Harbour policeman always assigned by authorities at gangway free of charge. Other gangway/deck watchmen are recommended.

OPENING/CLOSING HATCHES: Normally carried out by stevedores, excepting new designs on modern vessels.

CUSTOMS ALLOWANCE: (1) Each crew member allowed 200 cigarettes in bulk or 2 cartons of cigarettes or half a pound of tobacco. (2) Each crew member allowed 1 opened bottle of wine and 1 dozen cans of beer or 2 sealed bottles of wine.

IDENTIFICATION CARDS: Passport or other identification papers are needed.

CONSULS: None. Mostly stationed at Taipei.

REPAIRS: Any ship which needs repairs must itemise repairs and declare them to Harbour Bureau via shipping company or Agent and then the repairs will be carried out in accordance with the relating articles under Administration Regulations on Harbour Business for Taiwan Provincial Commercial Harbours. As to docking, ships may deal with China Shipbuilding Corp. Keelung Dockyard or Keelung Harbour Bureau repair plant via shipping companies or Agents.

DRY DOCK: China Shipbuilding Corp. Keelung Dockyard has 3 dry docks, 2 for vessels under 100,000 tons and another for 25,000 tons. Keelung Harbour Bureau Repair Plant has 1 dock for vessels under 5,000 tons.

REPATRIATION: Crew repatriation usually carried out through International Airport in Taoyung, and Immigration prefer either individual or group visa for landing crew from ship.

AIRPORT: International airport in Taoyung only 1 hour by car.

TIME: GMT plus 8 hours. No alterations.

HOLIDAYS: New Year's Day (1st–2nd Jan.); Lunar New Year's Day (2 days in Feb.); Youth Day (29th Mar.); Ancestor Memorial Day (1 day in April); Labour Day (not a national holiday but only for labourers) (1st May); Dragon Boat Day (1 day in June); Mid-Autumn Day (1 day in September); Confucius Birthday or Teachers' Day (28th Sept.); National Day (10th Oct.); Taiwan Restoration Day (25th Oct.); late President Chiang's Birthday (31st Oct.); Dr. Sun's Birthday (12th Nov.); Constitution Day (25th Dec.).

POLICE/AMBULANCE/FIRE: The gangway guard assigned by Harbour Police or ship's Agent will act in emergencies.

TELEPHONE: Local telephones available to be placed on board.

GENERAL: Shore pass issued by Immigration for each crew member on ship's arrival and will be collected on ship's departure. Anyone who loses a shore pass is subject to fine.

SHORE LEAVE: Crew allowed ashore except for crew members from Communist countries.

REGULATIONS: Searching for stowaways is strictly carried out on arrival and departure.

Discharge of smoke, tank washings, garbage, etc., not allowed.

DELAYS: Keelung has rainfall on about 210 days in a year, port is sometimes congested after continuous rain.

AUTHORITY: Keelung Harbour Bureau.

SUAO: 24.36 N. 121.52 E.

PORT LIMITS: Radius of 1 mile from North Point Lighthouse.

DOCUMENTS: Ship's Register. Derat Certificate, Last Port Clearance, Taiwan Tonnage Dues Certificate (valid 1 year), Crew List (8 copies), Stores List, Vaccination List and Yellow Book, Foreign Currency in Safe, Narcotics List, Bills of Lading, manifest of Inward Cargo, manifest of Through Cargo, Mail and Parcels List. Also see "General".

PILOTAGE: Compulsory, at anchorage hoist "G" flag.

ANCHORAGE: Water area from North shore to South shore, depth 14 m. to 31 m. and outer depth over 30 m. Ship may anchor and remain outside breakwater (under construction) when waiting for Pilot, or entry instructions.

RESTRICTIONS: Permission to enter must be granted by naval signal station located on North shore, ship's Agent should give ship's ETA to Port Authority of Keelung 24 hours before arrival. Port closes from 0001 to 0500 hrs. daily.

MAX. SIZE: Max. draft 10 m. and LOA less than 200 m.

HEALTH: Radio pratique possible (see "Keelung"). Quarantine will clear vessel in anchorage area. Stool test will be conducted if vessel arrives from an affected area within five days.

RADIO: Radio Keelung, send cables to Harbour Master Keelung, or Agent. Report ETA, draft, etc.

VHF: Channel 16 – 156.8 mHz for calling. Call sign "Keelung Harbour Radio".

TUGS: Port Authority tugs assist with mooring and unmooring. Ship's lines used. 3 tugs, 1×2,400 h.p., 1×1,000 h.p., and 1×600 h.p.

BERTHING: Docking during daytime and sometimes at night time, Pilot compulsory. Vessel usually anchors in outer harbour for pratique and inspection.

Deep water wharf 1,060 m. (6 berths) capable of accommodating vessels up to 20,000 d.w.t.

Wharf No.	*Length*	*Depth*
No. 4W	200 m.	10.0 (design depth 11.0 m.)
No. 8W	150 m.	6.6 (design depth 9.0 m.)
No. 9W	150 m.	6.6 (design depth 9.0 m.)
No. 10W	210 m.	8.0 (design depth 9.0 m.)
No. 11W	150 m.	8.0 (design depth 9.0 m.)
No. 12W	200 m.	8.0 (design depth 9.0 m.)

SPECIALISED CARGO HANDLING FACILITIES: The port has no special facilities for bulk and container handling cargoes, but will have by 1981. For the present time ship's derrick only for logs, timber, cement and general cargo.

STEVEDORES: Arranged by local Agent. Working hours: 0800 – 1200, 1300 – 1700 and 1800 – 2200 hrs.

MEDICAL: Clinics with English speaking doctors available, modern hospitals available in Lotung, Ilan and Taipei by train or by car, 20 minutes, 30 minutes and 2 hours away respectively.

DENSITY: 1025.

FRESH WATER: Available by barge or alongside, subject 24 hours advance notice.

FUEL: Not available at present.

GANGWAY/DECK WATCHMEN: Harbour policeman always assigned by Authority for gangway, free of charge.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CERTIFICATES: International certificate, safety equipment, safety construction, safety radio, load line, cargo gear, etc.

CUSTOMS ALLOWANCE: Each Crew member allowed 200 cigarettes for own use and one bottle of wine for entertaining and for own use, Master enjoys some privileges and can keep additional cigarettes for entertaining.

IDENTIFICATION CARDS: Shore pass for the foreigners issued by immigration office according to the passport or other indentification papers.

CONSULS: None.

REPAIRS: Minor repairs can be carried out in port.

REPATRIATION: Crew repatriation usually carried out through international airport in Taoyuan, near Taipei.

AIRPORT: International airport in Taoyuan, 1.5 hours by car from port.

TIME: GMT plus 8 hours. For local time check in Chinese, dial telephone 117 (free of charge).

HOLIDAYS: New Year's Day (1st–2nd, January), Lunar New Year's Days (2 days in February), Youth Day (29th March), Labour Day (1st May), Confucius Birthday (28th September), National Day (10th October), Taiwan Restoration Day (25th October), Dr. Sun's Birthday (12th November), Constitution Day (25th December).

POLICE/AMBULANCE/FIRE: The gangway guard assigned by harbour police or ship's Agent will act in emergencies; in case of fire dial 119. Police and ambulance dial 110.

TELEPHONE: Local telephones available to be placed on board.

GENERAL: 3 Crew Lists sent by airmail from last port to Agent. Shore pass issued by immigration office for each Crew member on ship's arrival and will be collected on ship's departure.

SHORE LEAVE: Crew allowed ashore, except for Crew members from Communist countries.

REGULATIONS: Crew cannot shelter any unlawful person on board. Searching for stowaways is strictly carried out on arrival and departure.
DELAYS: Port is sometimes congested after continued rain and delays of a few days may be caused.
DEVELOPMENTS: First stage of five year development plan being carried out. After completion which is expected in 1981, every year cargo handling quantity will be 6,300,000 tons. 7 new deep water berths including 2 container berths, will be completed in 1981.
AUTHORITY: Harbour Master or Ministry of Communications, Taipei.

TAICHUNG: 24.18 N. 119.29 E. (See Plan Book)

PORT LIMITS: In radius of 1.5 miles from centre of the entrance between North and South breakwater.
DOCUMENTS: Ship's register, safety equipment, safety construction, safety radio, load line, derat certificate, sanitary certificate, last port clearance, Taiwan tonnage dues (valid 1 year), crew list, passenger list, vaccination list, arms and ammunition list, bills of lading, manifest of inward cargo, manifest of through cargo, mail and parcels list. Also see "General".
PILOTAGE: Compulsory, at anchorage hoist "G" flag, contact Taichung Port Radio on VHF Channel 16. Pilots board outside breakwater, except in bad weather. They disembark inside breakwater.
ANCHORAGE: Water area in port limits, except entrance channel can be used for anchoring, depth from 10 m. to 18 m. Ship may anchor and remain outside breakwater when waiting for Pilot.
RESTRICTIONS: Permission to enter must be granted by signal station. Ship's Agent to report ETA to Port Authority 24 hours before arrival. Port closed from 0001 to 0500 hrs. daily.
MAX. SIZE: Max. draft 11 m. and LOA less than 250 m., (third stage 15 berths under construction).
HEALTH: Radio pratique acceptable, also quarantine will clear vessel at anchorage. Special quarantine will be conducted if vessel arrives from a cholera affected area within 5 days.
Also see "Keelung".
RADIO: Via Radio Keelung or Radio Kaohsiung. Send cables to Agent or "Harbour Master Taichung" report ETA, draft, etc.
RADAR: No radar service to assist navigation in port.
VHF: Channel 16 (156.8 mHz) for calling purposes, call sign "Taichung Port Radio". VHF is used on ship's arrival. Pilots use walkie-talkies to communicate with tugs and mooring men on dock.
TUGS: Authority tugs assist mooring and unmooring, ship's line used.
BERTHING: Docking during daytime and sometimes night time. Pilot compulsory, vessels usually anchor outside the breakwater for pratique and inspection. But if radio pratique granted, vessel can enter port. Contact signal station by VHF to get instructions.
SPECIALISED CARGO HANDLING FACILITIES:
Container Terminal: Wharf No. 3 is presently used as provisional container berth. Wharf Nos. 9 – 11 are reserved for the construction of a permanent container terminal, one 35 ton gantry crane has been erected at Wharf No. 11. There are plans for installation of additional cranes.
Grain Silo: A 60,000-ton grain silo is now under construction at Wharf No. 1 with a designed unloading capacity of 600 t.p.h.
STEVEDORES: Handling service and storage operated by private company.
MEDICAL: Clinics and hospital with English speaking doctors available at town of Wuchi, 4 km. from port.
DENSITY/TIDE: 1023/High tide and low tide difference 4.5 m., when alongside pier keep watch on moorings.
FRESH WATER: Available, no limitation on quantity.
FUEL: Ordinary bunkers available but 24 hours advance notice required. Fuel barge operated by C.P.C.
GANGWAY/DECK WATCHMEN: Harbour policeman always assigned by authority at gangway free of charge.
OPENING/CLOSING HATCHES: Normally carried out by stevedores, except new designs on modern vessels.
CUSTOMS ALLOWANCE: Each crew member allowed 200 cigarettes and 1 bottle of wine for own use. Bonded store will be sealed on arrival.
IDENTIFICATION CARDS: Shore pass for foreigners issued by Immigration Office according to the passport or other identification papers.
CONSULS: None.
REPAIRS: Minor repairs can be carried out in port.
REPATRIATION: Crew repatriation usually carried out through international airport in Taoyuan near Taipei, or Kaohsiung. About 200 km. from this port.
TIME: GMT plus 8 hours. For correct local time dial tel. 117, time report in Chinese, free of charge.
HOLIDAYS: New Year's Day (1st – 2nd January), Lunar New Year's Day (2 days February), Youth Day (29th March), Labour Day (1st May), Confucius Birthday (28th September), National Day (10th October), Taiwan Restoration Day (25th October), Dr. Sun's Birthday (12th November), Constitution Day (25th December).
POLICE/AMBULANCE/FIRE: Call Taichung Harbour Police Tel: 562394 or Liaison Centre of Taichung Harbour Bureau Tel: 562164.
TELEPHONE: Local telephone available to be placed onboard.
GENERAL: 3 crew lists airmailed from last port to the Agent, shore pass issued by Immigration Officer for each crew member on ship's arrival and will be collected on ship's departure.
Recommended chart: Chinese Navy Chart No. 0357, Tai-Chung Kang.
POLLUTION: Harbour Master prohibits discharge of tank washings, etc. in port.
SHORE LEAVE: Crew allowed ashore except for crew members from communist countries.
REGULATIONS: Searching for stowaways is strictly carried out on arrival and departure.

Harbour Bureau Notice:

1. Please show your shore pass together with your hand-carried articles to the gangway guard when going ashore and to the gate police when coming aboard.
2. Photographing of the harbour, storing of explosive articles and displaying of fire crackers in the harbour area are prohibited.
3. Before obtaining a boarding pass which can be applied for you by your ship's agency, you are not allowed to board another ship with your shore pass.
4. Before going ashore, read over carefully the notice on your crew shore pass and comply with it.
5. Be sure not to lose your shore pass, nor should it be used by others, since it is an important official document. The expense of announcing the loss of shore pass for 3 days in the local newspapers is to be on loser's account.
6. To avoid getting lost, keep in your mind the number and location of the wharf at which your ship is alongside, and other ones in case the location of the ship is shifted.
7. Always maintain aboard your ship a sufficient number of crew in case of emergency.
8. For the prevention of stowaways, thefts and accidents, crew quarters and passenger cabins should be kept locked before their shore leave.
9. Pumping wasted oil and throwing rubbish into the water, or exhausting thick smoke in the port area shall be subjected to a heavy fine.
10. For the protection of foreign copyrights, pirated editions of foreign books and records are not exportable.
11. Unless an application is approved by the Customs, any taxable article should not be taken off the ship, while each crew member is allowed to carry ashore 2 opened packs of duty free cigarettes, 10 cigars or 2 ounces of tobacco.
12. Each crew member may carry ashore no more than 2,000 New Taiwan Dollars (NT $2,000).
13. Each crew member is allowed purchases not exceeding US $200 in value in local products or handicrafts which can be carried aboard by the buyer with purchasing invoice; a Customs permit should be shown to the guard if exceeded.
14. Whenever you need assistance, please feel free to call 62394 or 62611 ext. 275 upon which the Foreign Affairs Division of this Bureau is obliged to serve you.
15. For further information, please consult directly with your Agency or Authorities concerned, as the rules contained in this notice may be revised at any time.

Thank you very much for your co-operation.
DEVELOPMENTS: The third stage development plan is being carried out. After completion which is expected in 1982 cargo handling capacity will be 11,000,000 tons per year.
SHIPMASTERS REPORT: 1979.
Documents:
Documents air-mailed to Taiwan from last loading port:
2 photostat copies of Ship's Register.
3 copies ship's photo (broadside on, showing name clearly).
2 copies of Stowage Plan.
2 copies each crew member's photo.
10 copies Crew List (showing full details).
2 copies Ship's Particulars (including list of ports of call).
2 sets Bills of Lading.
2 sets Manifest.
Arrival at Taichung:
Vessel anchored in harbour to allow authorities to board to clear ship, excluding Customs who boarded upon berthing.
Port Health Official:
1 Health Declaration.
1 Crew List.
1 Vaccination List.
1 Ports of Call List.
Immigration Officials:
Officials check crew list and require to see all officers/ratings prior to clearance. Officers and ratings seen separately in own public rooms. Chinese ratings required to complete questionnaire. Confined to recreation room whilst Official searched all cabins.
Crew shore passes delivered to vessel following day. No shore leave until passes on board. No officers' photographs used on passes – only Chinese crew.
4 copies Crew List.
2 further copies Chinese crew photographs.
Customs Officials:
1 copy Crew List.
1 copy Crew Declaration (showing amounts of foreign currency).
1 copy Store Lists (U.S. style alright).
1 Currency List (foreign currency sealed).
1 Narcotics/Drugs List (Omnopon/Morphine sealed).
1 Arms and Ammunition List (nil return required).
1 List of Mail (nil return required).
1 List of Parcels (nil return required).
1 Passenger List (nil return required).
Customs will board for Bond Issue every 5 days. 2 – 3 Officials request lunch daily.
Agent:
10 Crew Lists.
Also requires following ship's documents:
Certificate of Registry.
De-rat Certificate.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Agent advised that 4 further copies photographs of Chinese crew also all documents as listed above required at subsequent port in Taiwan.

Anchor Position: 1.2 miles W.S.W. of outer breakwaters. Depth 11 fathoms.
Chart: No. 3231 (Chiu-Kang Po-Ti to Hai-K'ou Po-Ti).
VHF: Channels 16 and 14. Answered when calling "Taichung Port" 20 miles from signal station.
Signal Station: Conspicuous. Black and white vertical stripes round tower, red and white checked dome, red and white aerial tower.
North Outer Breakwater: Light under construction at seaward end.
Kaomei Lighthouse: Conspicuous.
Berth No. 6: Soundings around ship at low water gave range from 30 ft. inside to 36.5 ft. outside (e.g. 100 ft. off quay).
Working Hours: 2400 – 0600, 0800 – 1200, 1300 – 1700, 1800 – 2300. 1st May – national holiday.
Maximum Draft Advised by Pilot: 37 ft. 6 in.
Large Tidal Range: 3 – 5 m.
General: Vessel anchored inside harbour for 5 hours awaiting berth; Immigration boarded and pratique granted.

Two tugs used for berthing. Vessel berthed starboard side to. Port anchor used to check approach, mooring headlines 4 and springs 2, for'd and aft.

Deck Log Book taken ashore for inspection.

Arrival form to fill in includes:
- Date and time arrival outer anchorage.
- Arrival draft.
- Arrival fuel.
- Last port.
- Date and time Pratique granted.

AUTHORITY: Taichung Harbour Bureau.

NOTES

Please also advise Shipping Guides Ltd.

Tanzania

GENERAL: *All Ports: (Ship's Officer's Report):* The Boarding Customs require crew declarations on their special form duly signed by each individual member of crew. The excess private property or the items not required during the ship's stay in port are to be collected and placed in a locker or room and sealed by the Customs. This seal has to be kept intact even in the case of the vessel sailing from Tanzania to Kenya or vice versa. On arrival at the next port, the previous Custom's seal is replaced by the local authorities. No new crew declaration is needed if once filed at first port. However, it is recommended that an extra copy of the crew declaration is kept on board as a record in case it is requested by the local authorities.

CHAKE CHAKE: 05.14 S. 39.46 E.

DOCUMENTS, HEALTH: Refer to "Zanzibar", where vessel required call for clearance by Port Officals.
PILOTAGE: Not compulsory, but restricted to daylight only.
RESTRICTIONS: Entrance approached through Owen Channel or through passage between Mesale Island South and Ras Kingojelin. Depths from 10 to 22 fathoms but there are patches of 2.5 fathoms. Narrowest part of channel is 1.5 cables wide.

Vessels may enter and leave at any state of the tide, but in daylight hours only.

ANCHORAGE: No mooring buoys. Vessel's work cargo to lighters. Depth decreases to 3 fathoms for coastal anchorage off Ras Banani.
MAX. SIZE: 170 ft. length: 15 ft. draft.
TUGS: Not available and not required.
FRESH WATER: Not available.
FUEL: Not available.
AUTHORITY: See "Zanzibar".

DAR-ES-SALAAM: 06.50 S. 39.17 E.

PORT LIMITS: The port of Dar-es-Salaam includes all tidal waters enclosed by a boundary which, commencing at high water mark at a point S.E. of Ras Koronja (approximately 9.66 km. East of the city of Dar-es-Salaam), follows a straight line due North to the West tip of the Outer Sinda Island. Thence a straight line to Makatumbe Lighthouse, thence a straight line drawn to South tip of Mbudya Island, thence a straight line drawn 254° to the high water mark at a point on the mainland South of the entrance to Mto Peremji. Thence following the high water mark around Msansani Bay, Dar-es-Salaam Inner Harbours to the first point due South of Outer Sinda Island.

DOCUMENTS:
- Health Certificates (forms supplied by Pilot).
- 6 Crew Lists.
- 10 Passenger Lists.
- Ships Manifest.
- Heavy Lift List.
- Dangerous Cargo List.
- Ship's Register.
- Declaration and Advice of Consumable Stores (Form C-7 supplied by Customs).
- Crew Declaration (Form C-8 supplied by Customs).

PILOTAGE: Compulsory South of Makatumbe lighthouse, for all vessels over 200 n.r.t. The pilot launch is painted white and shows the conventional day and night signals. Vessels wishing to enter must await the arrival of the pilot launch at the Outer Anchorage, and, if necessary, must anchor clear of the leading marks. During the hours of darkness ships entering or leaving the port are limited to 485 ft. LOA on tides not exceeding 9 ft. range.
ANCHORAGE: Anchorage outside in 7 – 8 fathoms, sheltered by Nakatumbe Island during S.W. monsoon but exposed to swell in N.E. monsoon.

Shipmaster's Report: In good weather tankers waiting can anchor in a depth of 18 m., 12 cables from Makatumbe Light true bearing 250°.

RESTRICTIONS: Movements in and out of the basin are subject to restrictions depending on drafts and state of the tide at Spring tides. Tankers, vessels over 135 m. LOA and vessels carrying explosives are not allowed to leave or enter during hours of darkness.

There is a signal station (with tower, flagstaff and red roof) on East Ferry Point (Lat. 6° 50′ S, Long. 39° 18′ E.). Entry prohibited signals are: day signal – black flag on masthead; night signal – 3 red lights disposed vertically, and distant signals – black square on white background.

The entrance channel at North end of the basin is about 1.25 miles in length from its outer entrance between the edges of the banks fronting North and South Reefs to the Inner Harbour, South of West Ferry Point.

There is a sharp bend in the channel at West Ferry Point. Minimum depth of 6.7 m. LWOST, and minimum width of 128.02 m. between the 4 fathoms contour lines. A very strong ebb and flood runs through the channel at periods of Spring tides. Maximum current at Spring tides – 3.5 knots. During period of S.E. monsoon strong winds and heavy seas may make entry difficult, but in Inner Harbour port working is normally unaffected by weather.

MAX. SIZE: Twin-screw vessels not exceeding 182.9 m. Draft 10.1 m. at HWOST, 7.0 m. at LWOST, and 9.1 m. at HWNT and single-screw vessels not exceeding 175 m. Tankers LOA 175.26 m., 36,000 d.w.t., and draft 9.75 m. Also refer to "Mjimwema".
HEALTH: Radio Port Health officer giving ETA, name last port and health condition of passengers and crew. "Q" flag to be displayed until free pratique given.
BERTHING: In the Inner Harbour there are mooring and anchorage berths for up to 9 deep-sea ships ranging from 350 ft. to 600 ft. (106.48 – 182.88 m.) in length and from 23 ft. to 30 ft. (7.01 – 9.14 m.) in draft.

Deep water quays total length 2,013 m. comprising berths numbers 1-11 with 10.06 m. in depth at LWOST.

Accommodation:

Harbour sheltered and roomy, water area 95.9 ha; consists of tidal basin and Southern Creek, the latter having 11 deep-water berths. Anchorage in basin and creek.

		Depth	*Max. length*
"A"	Stern mooring	9.1 m.	183 m.
"B"	Moored Mooring	7.6 m.	153 m.
"C"	Moored mooring	7.6 m.	183 m.
"D"	Single Anchor	7.3 m.	183 m. waiting berth only.
"F"	Moored, buoys and anchor	7.3 m.	152 m.
"G"	Buoys	7.3 m.	168 m.
"H"	Buoys	7.1 m.	168 m.
"K"	Moored, buoys and anchor	9.1 m.	183 m.

In addition there are 2 coaster anchorages. The Southern Creek, at the South-east corner of the basin had a navigable distance of 1.5 miles for ships drawing up to 30 ft. of water.

CARGO HANDLING FACILITIES: The port has no special facilities for bulk handling cargoes but, subject to advance notice being given, vacuvators and grabs can be made available.

Equipment and other facilities:

Deep water vessels berthed in stream are loaded and discharged by lighters. At the lighter quay there are 8 electric portal cranes for working the lighters (1 × 5 ton and 7 × 3 ton), on the main quay, the port has 6 × 7 ton and 21 × 5 ton. There are 8 other portal cranes on the stacking yards as per details below:

(a) Belbase (AMI) — 2 × 10 ton cranes.
(b) Tanzania — 3 × 5 ton cranes.
(c) Yard 5, 6 & 7 — 1 × 7 ton and 1 × 7-20 ton Gosna Cranes
(d) Yard 8 — 1 × 5 ton Conrad.

Main Quay Cranes:

Berths Nos. 1 – 11 have between them 44 portal cranes of 7 tons capacity each.

Mobile Cranes: 2 × 30 ton, 13 × 11 – 7 ton, 14 × 6 ton, 2 × 4 ton and 1 × 60 ton (Floating Crane – "Kifaru"). These are moved between deep-water quays, lighterage quays and any other points of work on the stacking yards as and when required.

DENSITY: 1025.
TANKERS: Bulk Oil Jetty at which tankers up to 175.26 m. LOA, and 9.75 m. draft can discharge to tanks ashore. Depth alongside of 10.06 m. There is a refinery on the opposite side of the creek to the Bulk Oil Jetty; the tankers serving the refinery are not to exceed 20,000 s.d.w.t. capacity. Also refer to "Mjimwema".
STEVEDORES: Week days (except Saturday) 0700 – 1500 hrs. (45 minutes break), 1500 – 2200 hrs. (no break), 2200 – 0600 hrs. (no break). Saturdays 0700 – 1345 hrs. (no break), 1400 – 2100 hrs. (no break). Sundays and public holidays 0700 – 1500 hrs. (45 minutes break), 1500 – 2200 hrs. (no break).
FRESH WATER: Available at deep-water berths, and a water barge supplies water to ships at anchorage. All water is chlorinated but should be boiled and filtered. Water for boiler requires feed treatment (formal solutions adequate).
FUEL: Not generally available.
MEDICAL: Doctors and good modern hospital facilities exist.
REPAIRS: Several light engineering workshops. There is a Tanzania Harbour Authority Dockyard for construction and maintenance of Tanzania Harbour Authorities lighters and other small craft. This has a slipway for vessels up to 100 ft., lifting power 100 tons. The Port Administration employs a skin diver.
REPATRIATION: Can be arranged.
CUSTOMS ALLOWANCE: Each crew member is allowed 1 carton of cigarettes, 1 opened bottle of spirits and 8 small beers.
AIRPORT: International airport with daily connections to all parts of the world.
TIME: GMT plus 3 hours. No alterations.
HOLIDAYS: Christmas Day and International Workers' Day are the only holidays on which no work is performed. Other holidays on which restricted working may be carried out are: Zanzibar Revolutionary Day (January 12th); Id-el-Fitr (2 days); Id-el-Haj; Good Friday; Easter Monday; Union Day (April 26th); Maulidi Day; Saba Saba Day (July 7th); Tanganyika Independence and Republic Day (December 9th).
SHORE LEAVE: Allowed.
DEVELOPMENTS: Future plans of the port include the construction of 2 additional deep water berths Nos. 12 and 13, expansion of the dockyard capable of dry docking tugs, small ships up to 1,500 d.w.t. A new oil jetty will be constructed to give way for the construction of 2 additional deep water berths. Straightening, widening and deepening of the entrance channel to at least 10 m. depth will enable vessels of up to 35,000 d.w.t. to enter the port at all times of the day. It will also enable night pilotage to all types of ships which at present is restricted to vessels of up to 135 m. in length only.
AUTHORITY: Tanzania Harbour Authority.

MJIMWEMA TERMINAL: 06.49 S. 39.22 E.

DOCUMENTS and all General Information; refer to "Dar-es-Salaam".
LOCATION: The position of the Mono Buoy is Lat. 6° 49′ 20″ South, Long., 39° 22′ 00″ East, lying approximately 1.5 miles offshore in Mjimwema Bay. The buoy lies in 24 m. depth of water. The currents are up to about 1 knot and the direction varies.
PILOTAGE: Mooring Master/Pilot boards in an approximate position Makatumbe Island lighthouse bearing 240°. True distance 3.5 miles. Should the Pilot not be available on arrival, vessels are advised to keep underway and await the Pilot rather than anchor.

After mooring operations a Mooring Master/Pilot will remain on board.

Vessels must provide adequate means of boarding for Pilot, Customs and other officials. A pilot ladder with spreaders 4 ft. from the water and manropes are required.

The Mooring Master shall be provided with meals and accommodation comparable to a senior officer on board. The crew of the mooring launch will be provided with food comparable with ratings on board. No special foods need be provided.
RESTRICTIONS: Berthing during daylight hours only. Unberthing at anytime.
MAX. SIZE: The Mono Buoy accommodates tankers up to 100,000 d.w.t. Min. length allowed, 650 ft. Max. draft allowed, 55 ft.
HEALTH: Customs, Port Health and Immigration will board vessels on arrival.
RADIO: Within 6 hours of clearing the loading port, each tanker shall provide the Agent with the following information:

(a) Name of Ship.
(b) Name of last port from which the vessel cleared and the loading port if different from above.
(c) Estimated date and time of arrival at Dar-es-Salaam (Mjimwema).
(d) Cargo loaded.
(e) API gravity.
(f) Arrival draft, fore and aft.
(g) Lifting capacity of derricks.
(h) Size of manifolds.
(i) Personnel requirements.

72 hours from the pilot station, a second cable should be sent to Agent with following information:

(a) Name of ship.
(b) Amended time of arrival.
(c) Names of crew leaving the vessel (if any).
(d) Requirements of doctor and dentist.
(e) Any other requirements.

A final cable should be sent about 36 hours from the pilot station giving finally amended ETA.

When within 20 miles of Dar-es-Salaam Signal Station vessel should call the Signal Station on either Channel 12 or 16. A continuous watch is kept on both Channels. Call sign is Dar-es-Salaam Signal Station.

VHF Channels 16 calling, 12 berthing. VHF Channel whilst discharging to be decided.

Portable radios can be provided for vessels not having a VHF set and the Agent should be so informed in order to allow time to dispatch a portable radio on arrival. A vessel arriving without suitable means of communication and not having informed the Agent of the fact could incur delays which would be to ship's account.

The Mooring Master will be in direct control of all radio communications on the vessel while in the terminal area. Any unauthorised communications may result in the immediate cessation of all operations and removal from the berth.
READINESS: Notice of readiness will only be accepted by the Pilot/Mooring Master on behalf of the Harbour Authority, when the ship is berthed and connected.

Any vessel which is not, in the opinion of the berth controller, ready in all aspects to discharge, may be rejected until corrections are made. The Harbour Master's decisions are final.
BERTH: The Mono Buoy is a single point mooring buoy. The body of the buoy being secured in a fixed position with 6 moorings and the top of the buoy is in the form of a turntable allowing the ship, moorings and hoses to take up the position the vessel lies naturally due to tide, wind and current conditions.
MOORING: The following equipment is required to moor with safety: Two 10 in. nylon circumference ropes. 100 ft. in length. 4 end joining shackles.

The vessel approaches the Mono Buoy head to wind and tide or the resultant of these forces, and should have 2 mooring ropes lowered to the water, each having a 15 ft. lashing of 3 in. rope on it.

As the vessel nears the mooring, a launch will take the port rope from the ship and connect it to the port pick-up rope and return to the ship to take the starboard rope and repeat the operation on that side.

The vessel should heave on the ropes as soon as they are inboard and heave herself to the buoy until the chain is on the fairlead. The ship wire should then be shackled to the chain and turned up on bits. This applies to both sets of moorings.
HOSES: Raising and lowering of, connecting and disconnecting of hoses as well as other shipboard duties will be performed by the ship's crew under the advice of the Mooring Master. The ship should be capable of lifting 10 tons on her derrick, with a minimum of 7.5 tons.

When the vessel is securely moored, the launch will bring the hoses alongside on the port side. The vessel will lower the cargo hook to the boatman who will hook it on to the lifting ring on the forward hose. The hose will then be lifted to full height on the boom and secured on the "Hang off Chains" supplied. The hose is then lowered to the deck and the operation repeated with the after hose.

After completion of discharge the hoses will be filled with sea water by the ship. The hoses can then be disconnected from the manifold and lifted over the side of the ship and hung there on the slip ropes to be slipped off simultaneously with the moorings. This last operation will be carried out on the advice of the Mooring Master.
UNMOORING: On sailing, hoses will already have been disconnected and ready to be slipped at the direction of the Mooring Master.

The weight will be taken on the 2 approach ropes by heaving slowly with the winch. The shackles will then be released and the ropes slacked away until they are finally paid out through the fairlead and dropped into the sea.

The shore equipment should then be collected together under the derrick and returned to the boat.
BALLAST: Ballasting will be allowed during discharge but only with the express permission of the berthing controller, and in the case of ballasting in dirty tanks a dry certificate must be issued. Vessels will not be allowed to tank clean. There are no sludge tanks ashore.
FUEL: Agip Tanzania have a bunker barge but can only supply fuel oil.
FRESH WATER: Only very limited quantities of fresh water in the region of about 50 tons can be provided.
STORES: Stores are available in Dar-es-Salaam, but the Tanzania Harbours Authority cannot undertake to transport stores to the Mono Buoy. Transport of stores to the buoy will be the responsibility of the Agent.
REPAIRS: During periods of calm and the fact that there is little current, it is foreseen that the problem of riding up on the buoy may occur. The vessel's engines shall therefore be available at all times and the telegraph shall be on stand-by while the vessel is in the berth. Engine repairs are not permitted. Should a vessel not be able to use her engines the cargo will be stopped and the vessel towed to a safe anchorage at the vessel's cost, until she can safely return to the berth.
SHORE LEAVE: Shore leave can be arranged through Agents. Should any of the crew require to be landed for medical or relief reasons, the Agent will be reponsible for providing transport to the Inner Harbour. Tanzania Harbours Authority craft will on no account be available to ferry crew members to and from the passenger pontoon. The Mono Buoy lies 4.5 miles from the passenger landing pontoon, which is situated in the Inner Harbour.
POLLUTION: It is the Master's responsibility to see that no oil of any kind is pumped or spilled overboard from his vessel. This includes oily water from bilges, crude residues from the previous voyages or any other matter that may result in the pollution of the area. Owners and Masters should comply with any international regulations and recommendations concerning the prevention of pollution of the sea.

Serious consequences will arise if the above rule is broken. All costs and expenses involved will be for the account of the vessel concerned and the Master may be prosecuted under the Tanzania Merchant Shipping Act.
REGULATIONS: While in the berth the vessel should provide a pilot ladder on the opposite side of the vessel to the gangway, secured at the rail and ready for use.

No boats of any kind shall be lowered without permission from the Customs, Immigration and Harbour Master, except in an emergency.

Tanzania Harbours Authority maintains vessels to assist in berthing. These vessels are under the direct supervision of the Mooring Master/Pilot. Any service or facility provided by the Tanzania Harbours Authority, including the services of the Mooring Master/Pilot and boats are the vessel's risk. The furnishing of Mooring Master/Pilot and launches or other services and facilities shall not be construed to be or give rise to a personal contract.
AUTHORITY: Harbour Master, Dar-es-Salaam, for Port Manager.

MKOANI (Kohani): 05.21 S. 39.38 E.

DOCUMENTS, HEALTH: Refer to "Zanzibar."
PILOTAGE: No pilot available.
RESTRICTIONS: Vessels passing through channel between Zanzibar and Pemba should inform Port Authorities 24 hours in advance.

Entrance through Mkoani leading marks, buoyed and well-lit channel, depth of 11 fathoms. Vessels may enter and sail any time night and day.
ANCHORAGE: No mooring buoys. Min. depth 6 fathoms. Vessels work cargo to lighters. Sandy bottom with mud close inshore.
MAX. SIZE: Length 250 ft.
TUGS: Not available and not required.
FRESH WATER: Not available.
FUEL: Not available.
AUTHORITY: See "Zanzibar".

MTWARA: 10.16 S. 40.12 E.

DOCUMENTS, HEALTH: Refer to "Dar-es-Salaam".
PILOTAGE: Compulsory. Pilot based at Dar-es-Salaam and flys to Mtwara when required. Flights once daily except Wednesdays. Early information concerning ETA to Harbour Master, Dar-es-Salaam. (South-bound vessels requested to divert to Dar-es-Salaam to embark Pilot).

Pilot boards 0.5 mile North of Shangani Reef Buoy from tug.

Signal Station can be contacted on VHF, Channels 12 and 16, between 0800 and 1800 hrs.
APPROACHES: The entrance is approached by a channel marked by buoys and leading beacons. At its narrowest point abreast of Msemo spit the channel is 1.5 cables wide. In spite of the sharp turn in this vicinity, vessels of up to 175.26 m. in length can enter the harbour at all stages of the tide. Once around the Msemo spit there is a very good natural harbour with room for 2 moderately large vessels and 1 coaster alongside. There are 6 marked anchorages to accommodate vessels of up to 9.5 m. draft.
ANCHORAGE: No safe anchorage outside port.
RESTRICTIONS: Port closed from 1800 to 0600 hrs. No tidal restrictions.
MAX. SIZE: Length 575 ft., draft 32 ft.
RADIO: Dar-es-Salaam or Mombasa Radio.
TUGS: Join vessel off Signal Station. Tug's lines used.

BERTHING: Deep-water Quay; 1,248 ft. length; 9.75 m. depth alongside at low water. 2 berths available at quay.
CARGO GEAR: Vessels load/discharge using ship's gear.
STEVEDORES: Stowage plan required preferably before ship's arrival. Small coasters use the ports mobile cranes.
MEDICAL: Doctor available. All crew require valid smallpox vaccination and yellow fever inoculation certificates.
DENSITY: 1025.
FRESH WATER: Not normally available.
FUEL: Not available.
GANGWAY/DECK WATCHMEN: Arranged by Agents.
IDENTIFICATION CARDS: Required.
REPATRIATION: Possible.
AIRPORT: 7 miles distant. Daily service to international airport.
TIME: GMT plus 3 hours.
HOLIDAYS: All holidays worked as Sunday except following when no work done: Christmas Day and 1st May.
TELEPHONES: Direct connection on board not possible.
SHORE LEAVE: Crew allowed ashore.
AUTHORITY: Tanzania Harbours Authority, Dar-es-Salaam.

TANGA: 05.04 S. 39.08 E.

PORT LIMITS: From high water mark at Ras Kwawa 090° to the meridian of 39° 15′ E., thence 180° to the parallel of Lat. 5° 05′ S., thence 270° to the mainland at high water mark. Time of anchorage within port limits to constitute an "arrived vessel".
DOCUMENTS, HEALTH: Refer to Dar-es-Salaam.
PILOTAGE: ETA required via Mombasa Radio, if not given by Agents at previous port of call. Pilot embarks from white launch in vicinity of Ulenge Beacon on Ras Kazone leading line. Pilot ladder required on port side in N.E. monsoon, and on starboard side in S.W monsoon.

Vessels wishing to enter must await the arrival of the Pilot at the outer anchorage and, if anchored, must anchor well clear of the leading lines.
APPROACHES: Tanga is approached from the S.E. through channel in line with Ulenge leading marks bearing 319° T. A 3 fathom bank to starboard is marked by ship channel buoy. Care should be taken in this vicinity as there is frequently a strong set to the N.E. On the port hand, Niule Reef is marked on Northern tip by a buoy. After passing Niule Reef Beacon it is necessary to turn to port on to Ras Kazone leading marks bearing 266° T. until Ulenge Beacon is sighted.

A signal station is situated immediately below Ras Kazone High light. Signals are exhibited to indicate if inner channel to harbour is clear. Morse lamp messages may be exchanged with incoming vessels.

Late afternoon arrivals to Tanga may encounter poor visibility of land marks due to haze from setting sun, but a chimney on the fertiliser factory site on Ras Kazone with 3 vertical red lights at a height of 100 m. is conspicuous.
ANCHORAGES: Tanga has no deep water berths. It is a lighterage port where ships are worked at anchor in the stream. Eleven safe anchorages have been marked by means of beacons. The inner harbour provides 7 anchorages for use by deep sea vessels with length of up to 213 m., and drafts of between 6.4 m. and 9.5 m.

The outer harbour has 3 anchorages with drafts well over 9.45 m.

Incoming vessels without Pilot should not anchor within 1 mile of Ras Kazone.
RADIO: Mombasa Radio. Ras Kazone Signal Station keeps 24 hour VHF watch on Channel 16, working on Channel 12.
BERTHING: All except bulk cargo work is carried out at anchor. Vessels are not berthed in Inner Harbour during hours of darkness except by special request in cases of urgency. 40 lighters available, capacity up to 250 tons each.
CARGO HANDLING FACILITIES: One 20 ton fixed crane is available on lighterage wharf for heavy lifts. A jetty on the Eastern side of Ras Kazone provides 1 berth for vessels of 20,000 d.w.t. equipped for the discharge of bulk cargoes and liquid ammonia. Two portal cranes of 7 tons capacity fitted with grabs. Jetty currently handling bulk products for fertiliser factory.

5 new cranes have been assembled and will be put into operation as soon as the berth modifications have been completed.
PASSENGER FACILITIES: All passengers and visitors to ships pass through the customs passenger terminal at the Eastern end of the new lighter wharf, and embark or disembark from the pontoon landing stage. Private hire launches available.
FRESH WATER: Not available.
FUEL: Not available.
GENERAL: Refer to "Dar-es-Salaam" for all general information.
AUTHORITY: Tanga Port Manager.

WETE (Pemba): 05.14 S. 39.43 E.

DOCUMENTS, HEALTH: Refer to Zanzibar.
PILOTAGE: Not compulsory, but restricted to daylight only. Vessels passing through channel between Zanzibar and Pemba should inform Port Authorities 24 hours in advance.
RESTRICTIONS: Entrance through Uvinje Cap, channel depth decreasing to 11 fathoms, with shallow patches to be avoided. Narrowest part of channel is 1.5 cables wide. Vessels may enter and leave at any state of tide but in daylight only.
ANCHORAGE: No mooring buoys, Vessels work cargo to lighters. Depth decreases to 2.5 fathoms. Mud bottom.
MAX. SIZE: 240 ft. length; 25 ft. draft.
TUGS: 1 Tug and 1 Labour boat.
LIGHTERS: 3 lighters of 200 tons each.
6 lighters of 100 tons each.
FRESH WATER: Not available.
FUEL: Not available.
AUTHORITY: See "Zanzibar".

ZANZIBAR: 06.09 S. 39.11 E.

DOCUMENTS:
Bill of Health.
3 Crew Lists.
6 Passenger Lists.
3 Cargo Manifests.
3 Customs Manifests.
PILOTAGE: Compulsory. Vessels approaching from English Pass embark Pilot at Seagull Buoy, and vessels approaching from South Pass meet Pilot at Penford Buoys. Pilot takes vessel in and out, day and night. Notice of ETA required 6 hours in advance. Pilot on VHF Channel 16.
ANCHORAGE: 6 anchorages to accommodate vessels drawing up to 32 ft. Additional anchorage provided for vessels carrying explosives.
RESTRICTIONS: 2 entrances, English Pass and South Pass. The former is approximately 1 mile wide and has min. depth of 6 fathoms and 4 ft. and a very narrow angular turning corner of 1.7 cables width. South Pass wider and deeper than English Pass. Passes are well buoyed and lighted. In English Pass, tidal stream runs North and is stronger on ebb than on rising tide. South Pass, tidal stream runs N.N.W. and stronger on flood than on ebb-tide. Vessel may enter or leave at any state of tide at any time.
MAX. SIZE: (Anchorage) Length 1,100 ft., beam 110 ft., draft 32 ft.
HEALTH: Pratique given by Quarantine Officer who boards on arrival. All crew required to be in possession of valid smallpox vaccination and yellow fever inoculation certificates.
TUGS: 3 tugs and 2 labour boats.
BERTHING: Concrete pile wharf 800 ft. long to North of Ras Shangani used mainly for lighterage purposes and for berthing Government coasters. Under special circumstances, upon prior request to Port Officer, vessels of less than 375 ft. length and drawing less than 20 ft. may be permitted to berth alongside, but due prevailing onshore winds this practice not encouraged.
STEVEDORES: Normal working hours Monday to Thursday, 0700 to 1500 hrs. Friday 0700–1200 hrs.

Work can be extended on overtime for a second shift up till 2300 hrs.

Average rates: bagged cargoes 15 tons per gang hour, general cargo 8 tons per gang hour.
LIGHTERS: 2 lighters, open at the top for heavy equipment 280 tons each.
2 lighters for bag and general cargo, each with a capacity of 300 tons.
5 lighters for bag and general cargo, each with a capacity of 200 tons.
5 lighters for bag and general cargo, each with a capacity of 150 tons.
6 lighters for bag and general cargo, each with a capacity of 100 tons.
FRESH WATER: There is one water barge of 250 tons capacity. Water can be supplied at the wharf by wharf hydrant or at the anchorage in the stream by water barge.
FUEL: Not available.
AUTHORITY: Serikali ya Zanzibar, Port and Marine Dept.

NOTES

Please also advise Shipping Guides Ltd.

Thailand

BANGKOK: 13.42 N. 100.34 E. **(See Plan Book)**

KOHSICHANG:

North-east Monsoon 13.09 N. 100.50 E.
South-west Monsoon 13.11 N. 100.50 E.

PORT LIMITS: A vessel is normally considered to be an "arrived ship" on passing the Paknam Customs Station.

DOCUMENTS: Ship's forms: Crew List; Passenger List; Store List; List of arms and ammunitions for ship's use; List of Arms and Ammunitions n possession of passengers; List of opium and harmful habit-forming drugs; List of crew private belongings (cigarettes, radio, gramophone, camera, etc., including foreign currencies and liquors); Dangerous Cargo List; List of heavy lifts; Stowage plan; Inward cargo manifest; Transit cargo manifest; Through Cargo manifest; list of containers.

Documents to obtain from officials and Agents: Immigration forms No. 3, 4 and 35, obtainable from Agents. International Maritime Declaration, obtainable from Quarantine Officer.

APPROACHES: The entrance of the river Chao Phraya is marked by he Bangkok Bar light beacon situated at the Lat. 13° 26′ 24.3″ N., Long. 00° 35′ 48.1″ E. Sea-going vessels have to cross the bar at the mouth of the river through an 18 km. long bar channel, which is dredged to a depth of 8.5 m. from MSL (mean sea level), and a bottom width of 00 m. in the straight section and 250 m. in the curve.

The depth of the river within the port area varies from 8.5 m. to 11 m. rom MSL.

The MSL at the Bangkok Bar and at Klongtoi is 2.3 m. and 1.63 m. above lowest low water respectively.

At present the limiting length of vessels entering the port is 172.2 m. 565 ft.). The limiting draft of vessels will be determined by the bar adder plus the depth of water (predicted in the Tide Table published yearly by he Hydrographic Department RTN) from LLW at the Bangkok bar, but he max. draft of vessels allowed to cross the bar is not over 27 ft.

The MSL at the Bangkok Bar and at Klongtoi is 2.3 m. and 1.63 m. above lowest low water respectively.

PILOTAGE: Compulsory at Bangkok; Kohsichang not required; Advance notice required 48 hours prior to arrival.

Location Pilot vessel Bangkok: Lat. 13° 23′ 33″ N., Long. 100° 35′ 12″ E. Area waiting pick-up Pilot will be anchorage close to Pilot vessel, preferably 500 to 600 m. from Pilot vessel, enabling Pilot boat to get alongside safely. Pilot vessel marked by white flashing light every 2 seconds.

ANCHORAGE: (Map/DeLong Pier site.) Capacity – 10 deep draft ships. Location – N.E. of Ko Khram Yai Island between 12° 43′ N. and 2° 44′ N. Minimum depth 7.5 fathoms. Good holding ground (Deep water port site). Capacity unlimited. Location – South and S.W. of Channel entrance between 12° 34′ N. and 12° 35′ N. Minimum depth 9 athoms. Good holding ground. No protection from weather.

RESTRICTIONS: *Bangkok:* No restrictions, able enter day and night, dependent tide at Bar Channel. *Kohsichang:* No restrictions, able enter day and night.

MAX. SIZE: Bangkok: not exceeding 565 ft. LOA. Kohsichang: See Berthing".

HEALTH: *Radio Pratique:* According to the Thai Ministry of Health's Regulations and International Health's Regulations article 36:

Under the responsibility of ship's Master and shipping Agents, vessels rom infected areas may apply for exemption of Quarantine through adio pratique by telegram sent to Quarantine Bangkok, stating name of ship, last port, number of passengers and health of crew and passengers.

(a) Vessels with passengers from infected areas proceeding to the berthing places in Bangkok must slow down at Paknam enabling Port Health Officer to board the ship for inspection.

(b) Vessels without passengers from infected areas go directly to berthing places in Bangkok where they will receive Port Health Officer or inspection.

Remarks: In case of suspected infectious disease on board any ship or anything wrong about health or ship sanitation, the ship's Master is equested, as early as possible, to inform the Port Health Officer at nternational Quarantine Office (Medical) Section, Immigration Division, North Sathorn Road, Bangkok, Tel. 39588.

Documents Required: 1 copy of Maritime Declaration of Health; 1 copy of Crew List; 1 copy of Passenger List; Derating or Derating Exemption Certificate.

Vaccination: Vaccination Certificates required: Smallpox; Cholera only when leaving from infected areas); Yellow fever (only when leaving rom infected areas).

However, vaccination may be done as deemed necessary by Port Health Officer even if the crew or passengers are from non-infected areas.

Vaccination certificates will be shown collectively for transit passengers/crew members and individually for disembarking passengers/crew members only.

Exemption from Vaccination: If the Port Health Officer is of the opinion hat vaccination is contra-indicated on medical grounds, he shall provide he persons with reasons, written in English, underlying that opinion, which health authorities should take into account.

Death on Board: In the case of death on board after the ship was at he anchorage or at the port, permission to land the corpse must be obtained after the inspection of the Port Health Officer, if the cause of death was not quarantinable diseases.

Ship's Master or shipping Agent must inform the Port Health Officer for inspection if there are cadavers and/or remains on board, who died in a foreign port, in order to pass through the quarantine. The dead should be accompanied by a death certificate (or a true copy), signed by the medical officer and placed in a coffin hermetically sealed in a casket, which is air-tight and waterproof.

According to Immigration Law B.E. 2493 (1950): The traveller to Thailand must be free from diseases forbidden under section 14 (4) of the Immigration law such as: trachoma, leprosy, tuberculosis, venereal diseases, including physical or mental defects who cannot earn their living.

RADIO:

Name of Station	*Frequencies*	*Remarks*
Bangkok Radio:		
HSA Long Wave	500 kHz (for calling) 480, 512 (for traffic)	operate 24 hours
HSA Short Wave	8686 kHz (for calling) 8686, 12800 kHz (for traffic)	operate 7 times a day every day beginning hours of 0000, 0200, 0500, 0800, 1100, 1400 and 1600 (GMT).

In addition to above, communication can be made through the Port Radio and Pilot Radio; however these 2 stations can be reached within steaming time of less than 24 hours prior to arrival at Bangkok, their particulars as follows:

HSC 61	L.W.	500 kHz (for calling) operate 2300 – 1700 hrs. GMT 512, 480, 468, 454 and 425 kHz. (for working) Traffic Lists broadcast at 0450 hrs. GMT, and the beginning of every hour every day.
HSC 62	S.W.	8466 kHz. Operate 5 times a day every day beginning hours of 0000, 0300, 0600, 0900 and 1300 hrs. GMT.

Information to be supplied by incoming Vessel:

(1) Last port of departure.
(2) Estimated time of arrival pilot station.
(3) Draft (fresh water).
(4) General cargo tonnage for discharge.
(5) Dangerous cargo.
(6) Heavy lift required.
(7) Fresh water required.
(8) Number of passengers (landing and transit).
(9) Time of dropping anchor at pilot vessels.

VHF: VHF communication with port radio and pilot radio through Channel 16 (24 hours service). Also VHF communication with shore for International Maritime Mobile Service under following:

Channel 24			
For ship transmitting frequencies	157.20)	(for calling)	service 24 hours
For shore ,, ,,	161.80)		
Channel 26			
For ship transmitting frequencies	157.30)	(for traffic)	
For shore ,, ,,	161.90)		
Channel 28			
For ship transmitting frequencies	157.40)	(for traffic)	
For shore ,, ,,	162.00)		

TUGS: Will join when vessel approaches berth, using tug's line without extra charge. 6 tugs available, 25 tons static pull.

BERTHING: No difficulties in approaching berth. Agents will cable to Master to inform when Pilot has been ordered to board vessel.

Midstream: 21 anchorage places and mooring buoys for sea-going vessels.

2 berths in front of Co-operative Salt wharf for 500 ft. vessels.
4 berths in front of Customs boarding station for 300 ft. vessels.
2 berths at Bangplakod for 565 ft. vessels.
1 berth at Bangplakod for 500 ft. vessels.
5 berths South Sathupradit (6 mooring buoys) for 450 ft. vessels.
3 berths North Sathupradit for 400 ft. vessels.
4 berths North of Krungthep bridge for 280 ft. vessels.

Berths: 87 wharves on both sides of the river for sea-going vessels:

16 berths for imported general cargo (km. 27 to km. 29) on the left bank of the river at Klongtoi operated by the Port Authority of Thailand for 565 ft. vessels.

1 berth for imported general cargo (km. 39.5) on the right bank of the river operated by Thai Maritime Company for 400 ft. and 280 ft. vessels.

2 berths for imported general cargo (km. 46) on the right bank of the river operated by Thai Maritime Company for 250 ft. vessels.

14 berths for imported petroleum products operated by private and government organisation for 150 ft., 350 ft. and 565 ft. vessels.

54 berths for export cargo operated by private companies for 280 ft. to 565 ft. vessels.

36 dolphins in front of Klongtoi wharf. A row of 36 dolphins along the river at a distance of 275 m. from the Klongtoi wharf, to accommodate 7 ocean-going freighters for exported cargo.

Kohsichang: 7 berths available, no limit on length, max. draft 35 – 47 ft.

CRANES: 2 floating cranes at 125 tons capacity may be used for handling cargo in the ship's holds. Both are owned and operated by private companies.

BRIDGES: Bangkok port has one bridge only. However, as bridge up river, vessel permitted to pass bridge with LOA not exceeding 280 ft.

STEVEDORES: Vessel to advise Agents 48 hours prior arrival, text required in this cable to be ETA, Drafts, Tonnage of cargo aboard for Bangkok, Number of crew/passengers, Dangerous cargo/Heavy lifts, Gangs required.

MEDICAL: Hospital facilities available, advance notice of ETA required.

TANKERS: Diameter of shore line various from 6 in. to 20 in. All terminals are able to provide reducers.

DENSITY: Bangkok: Min. 1000, max. 1011; Kohsichang: 1021.

FRESH WATER: Available, supply can be made through barges and shoreline. Capacity of barges from 120 to 250 tons, rate of supply approx. 30 t.p.h. Advance notice 24 hours.

FUEL: Available. Supply can be made by barge and alongside terminals, no delay on bunkering, advance notice 48 hours.

GANGWAY/DECK WATCHMEN: Necessary.
OPENING/CLOSING HATCHES: In general carried out by stevedores without extra charge. (Ordinary hatch covers, not new hatch cover system.)
CUSTOMS ALLOWANCE: 200 cigarettes for officers, while crew member only 100 for 3 days. Wine/Spirit; 1 bottle each, opened.
CARGO GEAR: Supplied by stevedores except cargo tent and forklift truck.
IDENTIFICATION CARDS: Required for all crew and officers.

REPAIRS: Only minor repairs.
DRY DOCKS: 1 for vessels up to 360 ft. LOA.
REPATRIATION: Possible; however, no facilities for crew changes.
AIRPORT: About 25 kms. from Bangkok, regular services by airlines.
TIME: GMT plus 7 hrs. No change of clock during the year.
HOLIDAYS: Able work all around the year except December 31st and January 1st.
POLICE/AMBULANCE/FIRE: Police (Highway) 816240, 816241, 816250. (C.I.D.) 219111, 225151; Ambulance 811544; Fire 816666, 811544.
TELEPHONE: Available when alongside PAT berths.
SERVICES: No tank cleaning equipment. No facilities for discharge of tank washings. Compass adjusting, but spare parts unavailable. Radar/VHF/radio repairs. Lloyd's/ABS/Veritas/Nippon Kaiji Kentei Kyokai, Surveyors available.
SHORE LEAVE: Permitted.
DELAYS: Occasionally congestion, delay 1 to 2 days.
DEVELOPMENTS: *East Quay wall expansion at Klongtoi Wharf:* This project provides 6 more berths for ocean-going vessels, consisting of 2 berths for conventional freighters, 4 berths for feeder container ships and a 450 m. long wharf for lighter aboard ship (LASH). The construction work is now completed.

Laem Chabang deep sea port: The location of this deep sea port is expected to be at Laem Chabang on the Eastern side of the Gulf of Thailand near the town of Sriracha and about 120 km. S.E. of Bangkok. A Dutch engineering firm has been appointed to make the initial survey and final design under the financial assistance of the Dutch Government. This project is now under consideration. Also see "Sattahip – Developments".

SHIPMASTER'S REPORT: September 1980.
During S.W. monsoon Pilots appear to always require pilot ladder on starboard side and for vessel to leave pilot station platform to starboard when entering. Custom Officials board at Paknam on way up river to check documents. For repatriations, Immigration require 2 clear working days. After 30 days in Thailand must apply for extension from Immigration at a cost of U.S. $15.00 per man. Vessel must fly 'Blue Peter' 12 hours before sailing from Bangkok or liable to a fine of U.S. $5,000. Require 2 copies of Immigration Form 4 (crew list) for departure.

Telephone calls can be made via Bangkok Radio on Channels 25, 26, 27, after calling on Channel 26.

AUTHORITY: Chairman, Port Authority of Thailand.

PHUKET: 07.50 N. 98.25 E.

DOCUMENTS:
PRIOR TO ARRIVAL AT PHUKET:
Entry documents and advance information.
Custom and Immigration Entry forms as well as list of other documents required on *vessel's own forms* to be completed in advance for presentation on arrival Phuket will be sent in advance to the Agent at one of the previous ports together with request for the following information required 4 days in advance of vessel's arrival.

Confirmation of ETA and any subsequent revised ETA.
Master's name.
Last port of call before Phuket.
Next port of call after Phuket.
Net registered tonnage (n.r.t.).
Hatch distribution and gangs workable.
Cash advance of Master.

Flags: Vessels are required to fly the Thai flag and display the code flag "Q" on arrival.
PILOTAGE: There is no official Pilot available.
ANCHORAGE: The following anchorages are regularly used by ocean carriers of deep draft calling Phuket for loading or discharging cargo.

During the N.E. Monsoon Season: Prevailing wind from November through March and periods of strong Easterly winds, vessels are recommended to anchor in position 7° 53′ N. and 98° 27′ 15″ E. about 0.5 mile off Laom Mai Pai to pick up the boarding party and stevedores before proceeding to the actual anchorage for loading at position 7° 57′ N. and 98° 33′ E., about one mile off Koh Yac Hyai, draft approx. 16 m. (50 ft.) at LWOS. However, during calm weather periods cargo operation will be carried out at the first mentioned anchorage.

During the S.W. Monsoon season: Prevailing from April through October and any periods of strong Westerly winds, vessels are recommended to anchor at position 7° 53′ N. 98° 27′ 15″ E. about 0.5 nautical mile off Laom Mai Pai, draft approx. 14 m. or 45 ft. at LWOS.

To facilitate cargo operations during swell from South, vessels are requested to anchor as close as possible to the above anchorage positions according to the Master's judgement.

No Pilot is required on approaching the above anchorage; however, it should be noted *three ocean-going dredgers* are operating in the area between Koh Dok Mai and Kon Khai Nok which should be passed at a distance of about 1,500 ft. to keep clear of their anchor lines. The dredgers are lit up and clearly visible at night.

It should also be noted during the new moon period there are several small fishing craft in the area.

RESTRICTIONS: *Channel:* The channel around Koh Tapae Kyai is normally passed clockwise and is marked by a system of buoys, the position of which are shown on Thai charts. However, it is also possible to turn around by swinging on the anchor just after passing buoy No. 3 on a rising tide (South to North) just before high tide.

Width of Channel: Min. 230 ft. at buoy No. 6 measured (chart datum at LLW) at 6 m. depth curve. Max. 900 ft. at buoy No. 4 measured at 6 m. depth curve.

Restriction in Navigation: (1) Entering or leaving through the North channel involves a rather sharp turn with a radius of about 1,000 ft. and angle of about 115° between the axis of channel in a restricted area between buoy No. 6 and Koh Tapai Noi Island. Please also note the wreck buoy between buoy No. 6 and Koh Tapao Noi.

(2) The draft at buoy No. 6 is about 24 ft. 6 in. at Lowest H.W.

(3) At buoy No. 5 are placed two pairs of mooring buoys parallel in the channel, occasionally used by tankers discharging petroleum products to Esso and Shell installations ashore. The width between the narrowest pier is about 150 ft. and vessels are required to pass between these mooring buoys.

HEALTH: All crew and passengers must have valid health certificates for smallpox and cholera.
RADIO: Messages to and from vessels at sea on the West coast of the Malayan Peninsula are best transmitted via Penang Radio in time to allow retransmission to Phuket at about the following local times:

Weekdays at 0930 hrs., 1400 hrs. and 1630 hrs. Sundays at 1630 hrs.

For vessels outside this area, messages can be sent via Bangkok or Singapore as applicable. Cables via Bangkok Radio are normally transmitted every second hour from 0800 to 2100 hrs. local time, whereas cables via Singapore are sometimes retransmitted via Bangkok Radio and sometimes via Penang Radio.

There are no facilities for ship-to-shore communication in Phuket, but vessels are *not* required to close down their radio station or VHF set while in port.

There is long-distance telephone connection with Bangkok, Penang, Singapore and Kuala Lumpur from Phuket at all hours.

Despatch Cables: Agent will in all probability need to send cables via the ship's radio reloading results, etc., subject to the Captain's approval. The cost of all such cables is to be borne by the vessel.

TUGS: No tugs available.
BERTHING: *Pier Facilities:* At Laen Klusi, Thailand Smelting and Refining Co. Ltd. have built a crossway connected by a short bridge to a pier which is parallel to the channel. The pier and channel are presently only suitable to accommodate vessels up to about 10,000 d.w.t. and approx. 430 ft. long, not exceeding 22 ft. draft. Vessels berthing at the pier are recommended to anchor at position 7° 48′ 24″ N. and 98° 25′ 12″ E. to await loading and favourable tide.

Dimensions of the pier: Length 61 m. (200 ft.), width 12 m. (40 ft.). Depth about 24 ft. 6 in. at LLW.

Fenders: The pier is protected by a system of wooden fenders in addition to which there is one fender at each end of the pier with solid rubber buffers.

Mooring buoys: There are two mooring buoys about 700 ft. apart each at equal distance from the end of the pier.

MEDICAL: It is only possible to get a doctor on board in the most severe cases, but otherwise there are two hospitals in Phuket, one of which is

managed by American Seventh Day Adventists Mission Doctors and the other is a General Hospital.
FRESH WATER: Limited and difficult to obtain.
FUEL: Limited and difficult to obtain.
CONSULS: None.
SURVEYORS: No marine surveyors in Phuket; however, a surveyor can be called from Bangkok.
REPAIRS: No facilities.

SATTAHIP: (Military port, Royal Thai Navy).
Chuk Samet Port: 12° 37′ 00″ N. 100° 55′ 00″ E.
Tungprong Port: 12° 41′ 58″ N. 100° 50′ 21″ E.

PORT LIMITS: Extend to approximately 1,500 yards from the quay wall at Chuk Samet Port, and 1,000 yards from piers at Tungprong Port.
DOCUMENTS: See "Bangkok".
PILOTAGE: Recommended working daily during the day time only. Advance notice required 4 hours prior to arrival on working day (on holiday notice required at 0830 – 1200 hrs.) Radio frequency used when handling the vessel is 27125 mHz.
ANCHORAGE: Anchorage area for waiting berth and Pilot:
Chuk Samet Port; Capacity: eight deep-draft ships min. depth 8 fathoms.

Tanker Berth (Pol Pier)	Commercial Berths (DWP 1 – 4)
Lat. 12° 37′ 03″ N.	Lat. 12° 37′ 25″ N.

Tungprong Port; Capacity: four deep-draft ships minimum depth 10 fathoms.

Lat. 12° 43′ N.	Lat. 12° 45′ N.
Long. 100° 49′ E.	Long. 100° 49′ 30″ E.

Map Pier:

Lat. 12° 41′ 47″ N.	Long. 100° 50′ 31″ E.

RESTRICTIONS: Berthing day time only.
MAX. SIZE: See "Berthing".
RADIO: Radio telephone.

Name of Station	*Frequencies*	*Remarks*
MSC	2738 mHz	Day time
Portsat	2738 mHz	Day time

TUGS: Join when vessel approaches berth, charge for use of tug's lines.
BERTHING:
Limitation of Draft:
Chuk Samet Port: Depth 32 ft. below LWOST or 36 ft. below MLW.
(1) For cruising in the channel
32 ft.
– 3 ft. for squat, tidal phenomena, etc.
– 2 ft. for under keel clearance
Draft = 27 ft. at LWOST
(2) For staying in port
32 ft.
– 2 ft. for under keel clearance
Draft=30 ft. at LWOST

(3) Draft of the vessel could be increased for the day of staying by adding the figure of the height of tide at low water of that day to the figure of draft in (2) above (30 ft.+Height of tide at LW).

Tungprong Port: Depth 29.8 ft. below LWOST or 33 ft. below MLW Draft of the vessel to be brought and stayed alongside is 27.8 ft. at LWOS.

	No. of Berths	*Max. LOA (ft.)*	*Depth (ft.)*	*Length (ft.)*	*Remarks*
Chuk Samet	4	600	36	2,400	General Cargo
	1	600	36	216	Tanker
Tungprong	3	600	—	—	Ammunitions

Cruise passenger ships are permitted to berth at Sattahip.
Map Pier: 1 berth, length 443 ft. Depth at MLW 38.8 ft.
STEVEDORES: Vessel to advise Agent 7 days prior to arrival. Text required in this cable are: flag, ETA, draft, tonnage of cargo aboard for port, number of crew/passengers, dangerous cargo/heavy lifts, gangs required.
MEDICAL: Hospital facilities available.
TANKERS: Diameter of shore lines are 6, 12 and 20 in.
DENSITY: 1021.
FRESH WATER: Limited, 200 tons per trip, addition 100 tons for boiler. Supply can be made by water trucks, advance notice of ETA required.
FUEL: Available, supply can be made by barges, advance notice of ETA required.
GANGWAY/DECK WATCHMEN: Necessary.
OPENING/CLOSING HATCHES: Carried out by stevedores without extra charge.
CUSTOMS ALLOWANCE: 200 cigarettes for each officer, 100 for each crew member for 3 days. One bottle each, wines and spirits, opened.
CARGO GEAR: Supplied by stevedores.
IDENTIFICATION CARDS: Required for all crew and officers.
REPAIRS: Only for minor repairs.
TIME: GMT plus 7 hours. Throughout the year.
POLICE/AMBULANCE/FIRE: Security centre 2187; Duty officer 2102 (after duty hours); Police 3180; Ambulance 116; Fire 117.
TELEPHONES: Available (U.S. military circuits).
SHORE LEAVE: Permitted.
DEVELOPMENTS: *Sattahip Deep-Sea port:* Since Laem Chabang deep-sea port (see "Bangkok") will take years to construct, the Cabinet approved the improvement of a part of Sattahip naval base, about 184 km. S.E. of Bangkok to be commercially used. The port of Sattahip is capable of accommodating 4 ships along the deep water quay of 11.9 m. MSL.
AUTHORITY: Port Director.

SRIRACHA: 13.07 N. 100.51 E.

DOCUMENTS:
For Customs
6 copies Crew List.
6 ,, Personal Belonging List.
6 ,, Provisions – Stores List.
6 ,, Foreign Currency List.
6 ,, Deck Stores List.
6 ,, Arms – Ammunition List.
6 ,, Opium List.
6 ,, Drug Store List.
6 ,, Bonded Store List.
6 ,, Passenger List (to be typed also if no passengers aboard).
For Immigration
3 copies No. 3, 4 Inward Form.
3 ,, No. 3, 4 Outward Form.
2 ,, No. 35 Immigration Form.
2 ,, Crew List.

The above forms No. 3 – 4 – 35 will be handed to Master by the Agent's representative on arrival.
For Quarantine
2 copies Vaccination List (Cholera–Smallpox).
1 copy Maritime Declaration of Health.
PILOTAGE: Not compulsory. The terminal will provide a Mooring Master to give assistance in berthing. Advance notice required 48 hours prior to arrival. No VHF communications between ship and terminal.

The Mooring Master boards off the berth in approx. position 13° 07′ N., 100° 50.5′ E.

It is reported that, when crossing the Bar with Ko Nok Islet abeam, distance 1.5 miles, vessel steering 048°T, least recorded depth approximately 56 ft. LW.

The Mooring Master acts as supervisor and liaison between ship and shore and remains on board until clear of berth.

Accommodation ladder required.
APPROACHES: The recommended courses approaching seaberth through the Southern part of Ko-Sichang are as follows:

from Junction point named "A"	Lat. 12° 43′ 00″ N. Long. 100° 44′ 36″ E.	TC=360°
to Junction point named "B"	Lat. 12° 56′ 14″ N. Long. 100° 44′ 36″ E.	
from Junction point named "B"	Lat. 12° 56′ 14″ N. Long. 100° 44′ 36″ E.	TC=022°
to Junction point named "C"	Lat. 13° 00′ 00″ N. Long. 100° 46′ 12″ E.	
from Junction point named "C"	Lat. 13° 00′ 00″ N. Long. 100° 46′ 12″ E.	TC=037°
to Junction point named "D"	Lat. 13° 06′ 20″ N. Lm. 100° 51′ 00″ E.	

from point "D" A/C to 000°(T) up to Anchorage Area or Point "E".

Point "E"	Lat. 13° 07′ 00″ N. Long. 100° 51′ 00″ E.

ANCHORAGE: Within 1 mile of position "E" in a depth of 12 fathoms. The bottom is mud.
RESTRICTIONS: Tankers berth in daytime only.
MAX. SIZE: Length 900 ft. max. draft 50 ft.
HEALTH: If vessel arriving from foreign port, cable required 48 hours prior to arrival at Quarantine Bangkok, stating number of crew and passengers, ETA, last port of call and date of sailing, any sickness or death arising during the voyage, otherwise confirming all well.

Vessels shall have derating certificates valid on arrival as well as all passengers' and crew members' valid vaccination certificates against cholera and smallpox.
RADIO:

Name of Station	*Frequencies*	*Remarks*
Bangkok Radio:		
HSA Long Wave	500 kc/c (for calling) 554, 512 480, 468 (for traffic)	operate 24 hours.
HSA Short Wave	8686 kc/s (for calling) 8450, 8420, 8400 8380, 8360, 8330, 8320 kc/s (for traffic)	operate 5 times a day every day beginning hours of 0900, 1200, 1500, 1800 and 2100 hrs.

Masters of all vessels proceeding to Sriracha are to notify their Agent by radio of their expected time of arrival at least 3 days prior to arrival. This notice shall be amended in the event of any change in the time of arrival.

In addition to the above, the ETA message shall be confirmed 24 hours before arrival. The first notice of arrival is to contain the following information:
Cargo grade and quantities to be discharged.
Discharging rates, barrels per hour.
Deepest salt water draft
Bunkers and water on arrival.
Urgent stores to be delivered on arrival, if any.
Bunkers and water to be delivered, if any.
Laundry service, if any.
Nature of any extraordinary repairs to be effected.
Any other matter to be attended to on arrival such as electronic equipment repairs, medical attention or hospitalisation, crew repatriation (in this case advise name, age, nationality, passport number).
Cash required, if any.
Crew liberty launch service, if any.
BERTHING: One buoy berth for tankers up to 50 ft. draft. Other berths where draft 43 ft. 6 ins. and 32 ft. 6 ins. Reducers available. No facilities for discharge of tank washing.

Each berth consists of 6 buoys – one at either bow and quarters, and inshore beam buoys abreast of focsle and poop breaks. The main berth is arranged to accommodate a tanker of 90,000 d.w.t. The required moorings are 2 ropes and a wire to each bow and quarter buoy, and 1 wire to each breast buoy. The offshore anchor is used (1.5 to 2 shackles) but only for purposes of dredging into the berth, and holding the vessel's bow whilst moorings are run out.

The discharge hoses connected to the vessels manifold are 2×12 in. being in turn connected to 2×16 in. hoses which leads into a common manifold on the sea bed. The submarine line to the shore is of 32 in. diameter and about 1 mile in length.

Maximum permissible discharge pressure at ships rail, approx. 110 p.s.i.

Upon completion of discharge and clearing berth, vessels proceed to an anchorage off the berths, in order to carry out the Immigration Clearance, which necessitates the signing of an Immigration Form by every Crew member in the presence of the Immigration Officer. After signing the form the vessel is free to sail.

MEDICAL: Hospital facilities available, advance notice of ETA preferred.

DENSITY: About 1021.

FRESH WATER: Can be supplied by barge. 24 hours notice required.

FUEL: Can be supplied by barge. 48 hours notice required.

CUSTOMS ALLOWANCE: 200 cigarettes for each officer, 100 for each crew member for 3 days.

Each man allowed 1 opened bottle wine/spirits.

IDENTIFICATION CARDS: Required for all officers and crew.

CONSULS: At Bangkok:

Argentina	36911 – 3	Korea	31940
Australia	35970	Laos	32010
Austria	58327	Malaysia	36927
Belgium	30840	Netherlands	53368
Brazil	59070	New Zealand	31318

AIRPORT: Situated about 25 km. from Bangkok, regular international services.

TIME: GMT plus 7 hours. No changes during the year.

DEVELOPMENTS: A project for a new deep-sea port at Sriracha has been approved and is under survey.

AUTHORITY: Director General.

NOTES

Please also advise Shipping Guides Ltd.

Togo Republic

KPEME: 06.12 N. 01.30 E. (See Plan Book)

PORT LIMITS: In accordance with the terms of Charter party a vessel is considered to be an "arrived ship" when she is anchored between 1 mile and 2 miles from the end of the jetty.

DOCUMENTS:

- 2 Crew Lists.
- 2 Stores Lists.
- 2 Private Property Declaration Lists.
- 2 Lists of last 2 Ports of Call.
- 2 Passenger Lists (if no passengers, 2 lists stating same).
- 2 Cargo Manifests (if no cargo for Kpeme, 2 lists stating same).

PILOTAGE: The limits of the port of Kpeme are fixed at 1 mile from all points of the jetty . Pilot boards out of the above limits. The Company Pilot remains on board while ship is berthed and disembarks when vessel cleared port limits. International code pilot signal used. At night, vessel should anchor between 110° and 180° at least 1 mile from the end of jetty.

VHF: Radio station, call "Kpeme pilot station" on Channel 16. Pilot boat grey motor boat without special signals.

APPROACHES: By day the extremity of the jetty (three artificial islands and two loading machines) forms an obvious landmark.

At night a white light (situated at the extremity of the jetty, 23 m. above the sea) all around horizon – light 3 sec., occulting 1 sec., light 1 sec., occulting 1 sec.

ANCHORAGE: Good holding ground (sand and mud) between 14 and 16 m.

RESTRICTIONS: Vessels should signal twice the date and probable time of her arrival. The first time 72 hours and the second time 24 hours prior arrival. Vessels berth in daylight only from 0530 to 1530 hrs. GMT. Unmooring can be effected day and night. Water approaches are clear. Any ship should have both fore anchor cables in perfect order and capable of being used in their entirety. Any ship should be able to leave immediately if she receives order to do so from Harbour Master. With this in mind, engines must be on standby. Ships are not authorised to cross port entrance without a Pilot on board. After winches in perfect order.

MAX. SIZE: Tankers up to 31 ft. draft on arrival. Bulk carriers up to 38 ft. draft on sailing. Bulk carrier up to 32 ft. max. on berthing. LOA up to 215 m., max. airdraft 12.20 m.

HEALTH: Send message for free pratique within 24 hours of arrival to Port Health Officer, Kpeme.

RADIO: Until vessel within 600 miles, communicate through Portishead Radio, Senlis Radio and Dakar Radio. Within 500 to 300 miles via Abidjan Radio TUA 487 kHz. and within 300 miles via Lome Radio 5VA 472 kHz.

VHF: VHF radio station, call "Kpeme Port" on Channel 16.

TUGS: No tugs available. 2 mooring launches of 150 h.p. each are at vessel's disposal.

BERTHING: Loading facility comprised of 3 artificial islands carrying conveyor belts (2) for loading phosphate only. They are breasted by a row of 4 dolphins. Vessel moors using port anchor and wires to 4 buoys which hold the ship parallel to the dolphins and about 20 m. off. Springs are run to the dolphins. Each loader delivers at a rate of 1,250 t.p.h. and 2 holds can be loaded at same time.

TANKERS: Moor at a special berth situated to the East at 0.4 miles away from the extremity of the phosphate pier. 1 submarine line 12 in. diameter, hose connection 8 in. diameter. At any time sufficient draft for securing and sailing, also fire hoses ready rigged on deck.

FRESH WATER: Not available. Vessel has to go to Lome.

FUEL: Not available.

MEDICAL: No facilities at Kpeme. In emergency, doctor obtained from Lome, about 25 miles away, or from Anecho, 7 miles away.

OPENING/CLOSING HATCHES: By ship's crew.

CONSULS: Nearest at Lome.

REPAIRS: No facilities available. Emergency repairs could be arranged in Lome.

CUSTOMS ALLOWANCE: 200 cigarettes or 2 oz. tobacco; one bottle of spirits. No Customs Authorities board the vessels or seal bonded stores.

REPATRIATION: No facilities exist for effecting crew changes. However, in emergencies repatriation can be arranged.

AIRPORT: Nearest Lome – 4 flights a week to Europe.

TIME: GMT.

TELEPHONES: Placed on board, charges included in stay-in-port tax.

SHORE LEAVE: Not allowed.

GENERAL: In the rainy season, high winds and swell may delay berthing operation.

AUTHORITY: Office Togolais des Phosphates, Lome.

LOME: 06.08 N. 01.17 E. (See Plan Book)

DOCUMENTS:

- 13 Crew Lists.
- 5 Kru-boy Lists.
- 5 Passenger Lists.
- 4 Lists Previous Port of Call.
- 1 Maritime Declaration of Health.
- 1 List of vaccinations.
- 3 Crew effects Lists.
- 1 List of arms and ammunition.

APPROACHES: The approach to the port, by night, is assisted by 3 lights:

(1) *Baguida* (position 06° 09.5′ N. and 01° 19.5′ E.) occulting white and red. Lt. 2.5 secs., occ. 0.5 sec. period 3 sec. Vis. 17 miles. Sector: red 042°, covers the breakwater as well as the old Lome Wharf (position 06° 07′ N. and 01° 13.5′ E.).

(2) *Lome Togo-Port* situated on head of West breakwater (position 06° 08′ N. and 01° 17.5′ E.). Qk. Fl. (4) white and red every 10 sec. Vis. 5 miles. Red light sector covers only old wharf and is not visible seawards.

(3) *Lome Light* situated near town of Lome (position 06° 07′ N. and 01° 13′ E.). Group Fl. (2) white every 10 sec. Vis. 15 miles all around horizon.

By day, large, light-coloured transit sheds and a high, grey water tower (position 06° 08.5′ N. and 01° 16.5′ E.) are the first indications of port from seawards.

PILOTAGE: Pilots available 7 days a week from 0600 to 2100 hrs.for vessels to enter. Sailing possible at anytime but if sailing after midnight Agent has to advise pilot station before 2200 hrs. Pilot station equipped radio and works 24 hours per day on Channel 16. Pilot boat green motorboat with orange superstructure and international flag "H". Pilot boards 0.5 mile to 1 mile S.E. of breakwater.

ANCHORAGE: Vessels which arrive during darkness should anchor about 0.5 to 1 mile South to S.E. of breakwater, in white sector of Baguida light in 8 fathoms, where good holding ground (sand) obtained. Northern boundary of anchorage is red sector of Baguida light.

RESTRICTIONS: Tankers may only berth during daylight hours but may unberth at anytime.

MAX. SIZE: Max. length 900 ft. (270 m.) and max. draft 31 ft. (9.5 m.). Tankers 39 ft. and bulk carriers 38 ft.

HEALTH: Health Inspector will board on arrival alongside and examine for cases of infectious diseases, after which will declare vessel free or not. Vessels entering must fly international quarantine signal "Q". Large hospital situated in Lome with doctors in attendance.

RADIO: Port operations carried out on VHF Channel 16,14 and 12, with range of approximately 30 miles. Aero beacon (position 06° 10.7′ N. and 01° 16.3′ E.) call sign "LME" on 379 kHz.

TUGS: 2 tugs, 960 and 3,200 h.p. available. For vessels of more than 500 g.r.t. tug is obligatory when berthing or unberthing.

BERTHING: See "Tankers" and "Shipmasters Report".

The port has a grain hopper and vacuvator in use.

STEVEDORES: Agent should be informed as soon as possible of ship's ETA, length, max. draft, tonnage to load and/or discharge and number of gangs required. Agents should advise pilot station of vessel's ETA.

TANKERS: Togo-Port has sea pipe-line belonging to the Societe Togolaise d'Entreposage. Tankers should moor at 3 large mooring buoys outside breakwater. Diameter of pipe-line 8 in. Discharging about 230 t.p.h. (depending on ship-pumps). Max. length which can be handled at buoys is 720 ft. (220 m.) max. draft 31 ft. (9.5 m.).

Societe Togolaise des Hydrocarbures:

Max. Size: LOA – 250 m. Draft 39 ft.
Dirty Ballast: Capacity 4,000 tons. Discharge rate 800 t.p.h.
Fresh Water: Available, 30 t.p.h.
Shore Gangway: Available.
Current: None.
Tidal Range: 0.90 m. – 1.50 m.
Nature of bottom: Sand.

Restrictions: Berthing and unberthing at any stage of the tide. Berthing during daylight hours only, unberthing anytime.

Cargo facilities:

Grades handled	*Pipe-line Reference*	*Length (m.)*	*Load/ d'charge Rate t.p.h.*	*Max. Pressure*	*Hoses No.*	*Hoses Size (in.)*
Ballast		1200			1	6
Crude Oil	Brown	4200	1100	7/9 kg/ cu.m.	1	8
Fuel Oil	Black-Brown	4200	1000		1	8
Kerosine	Yellow-Ash	4200	600		1	6
Benzine	Blue-Yellow	4200	800		1	8
Diesel Oil	Yellow-Orange	4200	900		1	8

DENSITY: Density 1025. Harbour open to sea.

FRESH WATER: Available at every berth except tanker Sealine. Delivery rate 45 t.p.h. Fresh water examined monthly for purity by Sanitary Authority.

FUEL: Diesel fuel available for small craft, such as fishing vessels, small motor-ships and tugs.

Gas oil available in any quantity.

FIRE PRECAUTIONS: No extraordinary precautions are required. Vessels with hazardous cargo should declare this on ETA telegram to Agent. During time in port these vessels should take necessary precautions themselves, and all fire hoses should be ready rigged on deck. By day international code signal "B" should be displayed and by night a red light should be shown at masthead or at an all-round visible place.

Smoking on berths and within sheds *strictly* prohibited. Infringements of fire regulations punishable by fine.

GANGWAY/DECK WATCHMEN: Gangway watchmen and hatch security watchmen available; they wear a distinctive uniform.

OPENING/CLOSING HATCHES: Either ship's crew or dockworkers.

CERTIFICATES: All normal ship certificates should be available for inspection.

CUSTOMS ALLOWANCE: Because Togo-Port is a Free Port, no individual declaration by Crew members necessary.

CARGO GEAR: No extraordinary regulations. No cranes available and ships' own gear used for discharging and loading.

IDENTIFICATION CARDS: Shore landing passes issued by port police and should be supplemented by personal ID-Cards.

CONSULS: Ambassadors or Consuls from nearly all major maritime nations at Lome.

REPAIRS: Minor repairs only.

DRY DOCKS: Not available at present, but a slip for small vessels is included in future development.

AIRPORT: Lome airport with daily flights to Europe.

SEAMEN'S CLUB: A modern Seamen's Club with swimming pool, bar and library situated 0.5 mile from port.
TIME: GMT throughout year.
HOLIDAYS: New Year's Day (1st January); Independence Day (27th April); Labour Day (1st May); Christmas Day (25th December). All other holidays will be worked in port with supplementary labour charges.
POLICE/AMBULANCE/FIRE: Push-button fire alarms situated in every shed and on exterior South wall of shed "B". Telephone for contacting Police, Fire-Station or Hospital available day and night in Harbour Masters office.
TELEPHONES: 3 public telephones within the port limits. No telephones on board.
SERVICES: No tank cleaning or compass adjusting available.
DELAYS: Ships berth in rotation of arrival at anchorage. Priority given to passenger ships as well as to vessels having less than 50 tons of cargo for discharge.
GENERAL: Distance from port to Lome city-centre is 4 miles. Taxis available at entrance of port.
DEVELOPMENTS: A second quay and a slip for small vessels.
SHIPMASTER'S REPORT: July 1978.
Documents: A mooring boat is available to Agents for the collection of documents on the roads given prior notice.
Max. Size: Berth No. 1 depth 7.5 m. Berth No. 2, depth 10.5 m. Berth No. 3 depth 9.5 m. Berth No. 4, depth 9.5 m. Berth No. 5, depth 11.5 m. Berth No. 6 (New oil pier), depth 12.0 m.

Allowance is made for swell hence the max. draft at No. 6 is 39 ft.
Health: Free pratique can be obtained from the roads if all documents are sent to Agents concerned with directions for distribution.
Radio: Lome Radio has been out of commision since May, 1978, and may continue thus until further notice unless spares are obtainable from France.
Tugs: There is an additional tug 3,000 hp, 42 ton bollard pull, fully equipped for fire and salvage. The smaller tug of 17 tons bollard pull, is also equipped for fire-fighting.
Tankers: Berth No. 6 on Western side of East Mole with a depth of 13.5 m. and max. draft allowed of 39 ft.
Fuel: Gas Oil available ex-road tankers at all berths but full range of fuels to be provided at new tanker berth (No. 6) by August, 1978.
Cargo Gear: While no fixed cranes are available, there is a range of mobile cranes 5×10 tonnes, 1×25 tonnes, 1×45 tonnes and a container tower crane of 70 tonnes. All capacities are reduced by reach and angle while freeboard may limit use still further. A grain hopper and vacuvator gear will be in use shortly (July, 1978).
Airport: Flights are frequent, mainly indirect, to and from Europe, with 1 weekly direct to New York.
Consuls: At present there is no British representation in Togo but a Consulate may be re-established. Accra is 3/4 hours drive from Lome.
Seamans Club: A large accommodation block offering various rooms and flatlets is part of the compound. Seamen have priority and at reduced rates. The Home is in the charge of a Dutch pastor and under German control and has a VHF set for communication with vessels on the roads. It is open to non-seafarers.
Hotels: A wide range of hotels are available including luxury type catering for the expanding tourist traffic which takes advantage of the unique climate for this part of the Gulf of Benin.
Delays: While there is no registration as such, certain vessels on regular trade, plus those with cargoes qualified as important, do get priority and all are subject to the daily (except Sunday) Port Captain's Meeting at which all elements are represented. The results are not available until 1300 hrs. after which most Agencies communicate by VHF to their vessels on the roads. Container ships have a priority.
Working Hours: Gangs work 0600 to 1400 hrs.; 1400 to 2200 hrs. and 2200 to 0600 hrs. daily except, there is no 2200 to 0600 hrs shift on Sunday nights. Each has a half hour break after 4 hours working.
Surveyors: The Port Captain and Senior Pilot, represents Germanischer Lloyd. There is no Lloyds representative.
General: Lome is the entry port for Niger and Upper Volta as well as Western Ghana so the road and rail traffic is considerable. The border with Ghana is on the Western side of Lome City. A re-entry visa is necessary when proceeding to Accra and takes 1 or 2 days to process. The Ghana Border Police can issue 1 day Visitors passes.
AUTHORITY: Port Autonome de Lome.
AGENT: Socopao Togo, B.P. 821, Lome. Tel. 5588/89; Telex 5330 (Maritime) and 5205. Cables, "Freight Lome".

NOTES

Tonga (Friendly Islands)

NUKU'ALOFA: 21.08 S. 175.12 W. (See Plan Book)

DOCUMENTS:

Immigration Dept.
- 2 Crew Lists.
- 2 Passenger Lists.

Customs Dept.
- 2 Crew Lists.
- 2 Passenger Lists.
- 1 Bond List.
- 3 Cargo Manifests.

Agents
- 1 Crew List.
- 1 Passenger List.
- 3 Cargo Manifests.

PILOTAGE: Order through Agents at least 24 hours prior to arrival. Pilot boat may be contacted on R/T 1 hour before arrival at Pilot station. This position is indicated on B.A. Chart (approaches to Nuku'alofa). There are 2 approaches, namely the Ava Lahi Passage and the Piha Passage. Vessels using Piha Passage are limited to a length of 500 ft.

Vessels may anchor in the vicinity of No. 1 Buoy if required to await Pilot, but this is not normally necessary as the Pilot is available as requested. Pilot boat carries usual signals.

ANCHORAGES: Vessels may anchor wherever they wish within the port, subject to the approval of the Harbour Master.

MAX. SIZE: Length unlimited, beam unlimited, draft 40 ft.

HEALTH: Radio pratique may be requested from "Tongamed", Nuku'alofa. Any suspected disease or fever must be reported by radio.

TUGS: No tug is required for berthing, but a tug is available in case of breakdown.

BERTHING: Queen Salote Wharf, only wharf in use. Vuna Wharf damaged by an earthquake in 1977 and as yet has not been repaired.

Queen Salote Wharf is expected to be extended by 1983.

STEVEDORES: There is a Master Porter employed by the Queen Salote Wharf Administration, who will supply whatever gangs are required. The number of hatches to be worked and the tonnage of cargo must be passed by the Agent to the Harbour Master at least 24 hours before vessel arrives.

MEDICAL: It is advisable to inform Agent in advance should medical attention be required. Hospital facilities are available. Vaccination certificates are required for visitors who are staying. Ship's crew do not require them generally.

DENSITY: 1025 at all states of tide.

FRESH WATER: Available ex Queen Salote Wharf at 25 t.p.h. delivery.

FUEL: A small quantity of light diesel fuel could be supplied, sufficient to enable a vessel to make the port of Suva.

GANGWAY/DECK WATCHMEN: Not necessary as entry to wharf is restricted.

OPENING/CLOSING HATCHES: This work is completely optional.

CERTIFICATES: Normal requirements. Harbour Master may require to inspect cargo gear record.

CUSTOMS ALLOWANCE: A reasonable quantity is allowed by Customs according to expected stay in port. There are heavy penalties for smuggling.

CARGO GEAR: Valid certificates issued by competent authorities are recognised.

IDENTIFICATION CARDS: Not necessary.

CONSULS: None.

REPAIRS: Repairs can be carried out in the Marine workshop.

REPATRIATION: No facilities.

AIRPORT: 14 miles from town. Flights to and from Suva on Tuesdays, Thursdays, Fridays and Saturdays. There are also flights to New Zealand, same days as Suva.

TIME: The local time is 13 hours fast on GMT.

HOLIDAYS: *No work of any description is permitted on the Sabbath. This is strictly enforced.* Official Holidays are: Christmas Day; Boxing Day; Good Friday; New Year's Day; Easter Monday; Anzac Day; Emancipation Day (June 4th); Constitution Day (4th November); H.M. Queen Elizabeth's Birthday; King's Birthday (July 4th).

POLICE/AMBULANCE/FIRE: Telephone numbers not necessary. Just ask for the Department required.

DEVELOPMENTS: Queen Salote Wharf to be extended to at least 600 ft. Land is to be reclaimed on the Eastern and Western sides of the Wharf.

OTHER PORTS: Pangai, Ha'apai Group; Neiafu, Vava'u Group; both these ports are suitable for any size of vessel at anchor. Service is by lighter. Vessels of 400 ft. in length with a max. draft of 22 ft. may berth at Neiafu.

AUTHORITY: Harbour Master, Nuku'alofa.

NOTES

Please also advise Shipping Guides Ltd.

BRIGHTON (Texaco Oil Terminal): 10.15 N. 61.38 W.

DOCUMENTS/HEALTH/CONSULS, etc.: Refer to "Port of Spain".
PILOTAGE: Compulsory.
ANCHORAGE: Good holding ground in roadstead. Loading pier situated 10° 15′ N. 61° 38′ W., extending in a N.W. direction for 2,010 ft.
RESTRICTIONS/MAX. SIZE: Outer Berth East, 29 ft. 6 in. MLWST; Outer Berth West, 24 ft. 6 in. MLWST; Centre Berth East, 21 ft. 6 in. MLWST; Centre Berth West, 21 ft. 6 in. MLWST; Inner Berth West, 21 ft. 6in. MLWST.
TUGS: Not used. Launch assists with lines.
STEVEDORES: Supplied by Agent if necessary for loading Asphalt in drums only.
FRESH WATER: Available only at berth. Pumping rate 15 to 20 t.p.h.
FUEL: All grades of fuel alongside or by barge. Fresh water.
GANGWAY/DECK WATCHMEN: Customs guard on 24 hours duty at ship's side.
CUSTOMS ALLOWANCE: 200 cigarettes and moderate amount of spirits.
IDENTIFICATION CARDS: Not required.
REPAIRS AND DRY DOCKS: At Chaguaramas.
MEDICAL: All facilities available.
REPATRIATION: Can be arranged.
AIRPORT: See "Port of Spain".
TIME: GMT minus 4 hours.
TELEPHONES: No facilities for telephones on board.
SHORE LEAVE: No restrictions.
DELAYS: Not usual.
AGENT: See "Port of Spain".

CHAGUARAMAS: 10.40 N. 61.39 W.

DOCUMENTS/HEALTH/CONSULS, etc.: Refer to "Port of Spain".
PILOTAGE: Compulsory. Pilots board in Chaguaramas Bay – 10° 46′ N., 61° 43′ W.
ANCHORAGE: Safe anchorage in Chaguaramas Bay between mainland and Gaspar Grande Island about 0.5 miles off the dock.
RESTRICTIONS/MAX. SIZE: No restrictions on night operations. 2 docks – main wharf with overhead cranes for loading and discharging bauxite – 960 ft. long, max. draft 32 ft. Smaller wharf – 400 ft., draft 25 ft.
TUGS: Not used. Launch assists in mooring.
STEVEDORES: Not necessary. All loading/discharging done by Chaguaramas Terminals employees.
FRESH WATER: Available from dock, 40 t.p.h. Also supplied by barge.
FUEL: Can be delivered from dock or supplied by barge.
GANGWAY/DECK WATCHMEN: Customs guards on duty at ships side.
CUSTOMS ALLOWANCE: 200 cigarettes and a moderate amount of spirits.
IDENTIFICATION CARDS: Not required.
CARGO GEAR: Loading – carried out with travelling tower, rate 1,000 t.p.h. Conveyor system. Discharging – carried out with travelling rig of 2×4 ton grabs. Conveyor system.
REPAIRS/FLOATING DOCK: Operated by Swan Hunter Docks. Displacing up to 11,380 tons, 560 ft. long vessels. Also good berthing alongside, draft to 35 ft., and a safe close anchorage, draft 50 ft. General extensive repairs undertaken.
MEDICAL: All facilities available.
REPATRIATION: Can be arranged.
AIRPORT: See "Port of Spain".
TIME: GMT minus 4 hours.
TELEPHONES: No facilities for telephones on board.
SHORE LEAVE: No restrictions.
AUTHORITY: Chaguaramas Terminals Limited.
AGENT: See "Port of Spain".

CRONSTADT ISLAND: 10.39 N. 61.38 W.

Terminal owned and operated by Baroid Trinidad Services Ltd., handling bulk barytes.

Vessels from abroad calling at Cronstadt are required to proceed first to Chaguaramas for clearance formalities.
DOCUMENTS/HEALTH/CONSULS, etc.: Refer to "Port of Spain".
PILOTAGE: Compulsory.
TUGS: One tug used for berthing if required.
RESTRICTIONS: Berthing/unberthing in daylight only.
MAX. SIZE: 400 ft. length. This size vessel would overhang wharf approx. 100 ft. fore and aft. Draft not limited as depth of water alongside is 60 ft.
BERTHING: Vessel moored with 2 springs, 3 head and stern lines to dock. Discharging carried out with shore crane grab bucket 3 tons capacity.
FRESH WATER: Available by barge.
FUEL: Available by barge.
AGENT: See "Port of Spain".

GALEOTA POINT: 10.05 N. 61.01 W. **(See Plan Book)**

LOCATION: Galeota Single Buoy Mooring Terminal is located 2.6 miles on a bearing of 208° from Galeota Point Lighthouse, and is an open unsheltered roadstead. Galeota Point is a narrow headland about 210 ft. high and located in Lat. 10° 08′ 00″ N., and Long. 60° 59′ 30″ W. The lighthouse, situated on top of the point, exhibits a light 240 ft. above sea level which flashes white every 5 seconds and is visible for 22 miles. The buoy itself exhibits a quick flashing, (1 flash per second), red light, 10 ft. high, and visible for 4 miles through 360°
DOCUMENTS:
Health Declaration (International Health Form to be filled out by Master on arrival.)
De-Rat Cert./De-Rat Exemption
Crew List (4).
Crew Customs Declaration (2).
Register.
Store List (2) (Signed by Master).
Passenger Manifest (2) (If any passengers are aboard).
Bonded Store List.
Clearance from last Port.
Manifest (if no cargo, a statement that vessel is in ballast).
ESSENTIAL REQUIREMENTS: MOST ESSENTIAL REQUIREMENTS TO BE MET BY TANKERS LIFTING OIL AT GALEOTA TERMINAL.
1. *Disposal of Ballast:* No dirty ballast will be pumped overboard. A separate ballast disposal line (16 in.) is available at the Terminal to pump ballast to a pit onshore where oil and water can be separated and disposal made.
2. *Notice of Arrival:* Incoming tankers must send ETA via commercial radio at least 72 hours before arrival at Galeota. Local time is GMT minus 4 hours and daylight saving (Summer Time) is not applicable.
3. *Arrival:* Company Loading Master and a Government Pilot if requested by the Tanker's Master will contact all incoming tankers about 3 to 4 miles from Galeota Point on a bearing of 220°/230° from the lighthouse, and will advise the ship's personnel in mooring and unmooring. If the buoy is occupied, or if arriving at night, vessels should anchor at least 1 mile South-west of the buoy.
4. *Tankers to have ready:* (a) 2 nylon or manila messenger lines of not less than 6 in. circumference and at least 300 ft. long, placed at the bow. (b) at ship's manifold there must be equipment capable of lifting the floating hoses. Weight of hose is about 3 tons.
5. *Crew Duties:* The tanker's crew will raise, rig, and operate vessel's derrick and winch for the hoisting of the floating hose. The Terminal crew will connect and disconnect loading hoses.
6. *Tanker's Valves:* Tankers valves must not be closed against incoming oil stream. At least 1 minute is required to shut down pumps and stop flow of oil from the Terminal storage.
7. *Communication-Emergency:* If ship-to-shore communications fail, a line launch is always alongside and has radio contact with the Terminal Control Centre.
8. *Responsibility:* The Tanker's Master is responsible at all times for the safety of all ship's operations. Galeota Terminal rules and regulations do not contravene International Safety rules such as SOLAS (Safety or Life at Sea) or other maritime regulations such as those of appropriate classification societies. In case of any conflict, the latter shall apply.
PILOTAGE: Vessels arriving should approach to within 3 to 4 miles of Galeota lighthouse on a bearing of 220°/230° and will be met by the Amoco Loading Master and a Trinidad and Tobago Pilot (if requested through vessel's Agent). The Pilot will be stationed on the bridge and will advise the vessel on the approach to the buoy. The Amoco representative will be positioned in a most advantageous position and will advise the ship's crew on picking up and making fast the floating nylon mooring lines.

Vessels are requested to make a proper lee and to have a pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach the Loading Master's launch. At night, adequate lighting must be rigged overside for the Loading Master to approach the side of the ship and climb the ladder safely.

Raising, connecting, disconnecting and lowering of floating hoses will be performed by the Terminal's crew with the assistance of the ship's crew as advised by the Amoco Loading Master, who will remain on board while the ship is secured to the buoy. The Loading Master will be in direct charge of the portable VHF ship-to-shore radiotelephone communications.

If, in the opinion of the Loading Master, the vessel is not equipped with adequate mooring or hose lifting facilities, he will so inform the vessel's Master, and in such event the vessel shall not be brought into the moorings until facilities, lines, or gear are deemed satisfactory.
APPROACHES:
Port Limits: Approaching vessels should never anchor to the East or North-east of Galeota Point. A submarine pipeline from a platform in Lat. 10° 10′ 24″ N., and Long. 60° 39′ 56″ W., enters the Galeota Point area about half a mile Northward of the lighthouse. Vessels should approach from the South-westward and never anchor less than 1 mile from the SBM or between the buoy and the coastline.
Navigational Aids: Galeota Point lighthouse is located in Lat. 10° 08′ 00″ N., and Long. 60° 59′ 30″ W., and exhibits a white flashing light every 5 seconds and is visible for 22 miles. The lighthouse is unattended and frequently does not operate. The SBM exhibits a quick flashing red light every second, and is located in Lat. 10° 05′ 47″ N., and Long. 61° 00′ 45″ W.
Landmarks: Galeota Point appears as an island when approaching from seaward, since it is connected to the island of Trinidad by lower land. Situated on this lower land about 0.5 mile Northward of the lighthouse is the tank farm and processing area.

There are 5 oil storage tanks and they are painted a grey colour.

A small boat harbour is located 0.5 mile due West of the lighthouse in Guayaguayare Bay. The sheet piling type jetty extends seawards, on a bearing of 245°, 1,900 ft. from a point at Lat. 10° 08′ 14″ N., and Long.

61° 00′ 00″ W. The seaward 300 ft. of this jetty has a controlling draft of 13 ft. at extreme low water.

Vessels approaching from a North through East direction will observe lighted drilling platforms with following locations:

1.	Teak "A"	Lat. 10° 10′ 24″ N., Long. 60° 39′ 56″ W.
2.	Teak "B"	Lat. 10° 11′ 41″ N., Long. 60° 39′ 55″ W.
3.	Teak "C"	Lat. 10° 10′ 29″ N., Long. 60° 40′ 36″ W.
4.	Teak "D"	Lat. 10° 02′ 12″ N., Long. 60° 38′ 54″ W.
5.	Teak "E"	Lat. 10° 10′ 26″ N., Long. 60° 39′ 55″ W.
6.	Samaan "A"	Lat. 10° 20′ 30″ N., Long. 60° 40′ 47″ W.
7.	Samaan "B"	Lat. 10° 19′ 46″ N., Long. 60° 41′ 04″ W.
8.	Samaan "C"	Lat. 10° 19′ 47″ N., Long. 60° 41′ 35″ W.
9.	Poui "A"	Lat. 10° 06′ 35″ N., Long. 60° 49′ 47″ W.
10.	Poui "B"	Lat. 10° 06′ 55″ N., Long. 60° 49′ 02″ W.
11.	Tesoro "A"	Lat. 10° 11′ 05″ N., Long. 60° 54′ 59″ W.

Vessels should exercise caution and keep well clear of these platforms because of unlighted buoys, small boat operations, submarine pipelines, and anchored test barges nearby.

The lighthouse 4 miles to the Southwestward of Manzanilla Point situated on Brigand Hill is an excellent landmark for vessels approaching from the Northward. The lighthouse is elevated 712 ft. and exhibits a group flashing (3) white light every 30 seconds and visible for 35 miles.

RESTRICTIONS: The Terminal operates 24 hours per day, 7 days a week. Ships are loaded and unmoored at any hour, weather and other circumstances permitting. Vessels are moored during daylight hours only, however an exception to this rule may be made at the discretion of the Terminal. The Terminal will never be closed due to holidays.

MAX. SIZE: 250,000 d.w.t. Depth of water 95 ft.

RADIO: *Long Range and Radio Communications:* Ships may send their cable(s) to the Amoco office through the commercial station, "North Post Radio/9YL", which is about 10 miles Northwest of Port of Spain. Upon receipt of such cable(s) North Post will immediately relay it to Amoco's office through their Telex system. Messages pertaining to oil liftings should be addressed to AMOCOTRI, Trinidad. If it is necessary to send messages through vessels' Agents or Owners via International Telex Service, then they may be sent to Amoco by using the Telex address "WG 287" (Amoco – Port of Spain).

Cable or Telex messages addressed to Galeota Terminal would undergo the same procedures, but upon receipt in Amoco's radio office in Port of Spain, they will immediately be relayed to Galeota Point by HF/SSB radio teletype channel.

Cables from Galeota Terminal to the ships would be given to Amoco, Port of Spain radio office on the SSB, which will be telephoned to North Post Radio Station.

The coast radio station transmits traffic lists at regular intervals listing the call signs of all ships for which they have traffic on hand. At the end of their traffic lists, the coast radio station starts searching for answers on the frequency bands listed below. Thus, any vessel hearing its call sign in the traffic list, will immediately start calling the coast station on its own working frequency in the same band on which the traffic list has been heard. The searching coast station radio operator would eventually pick up the signals from the calling ship and would pass her his traffic.

Listed below is information on "North Post Radio Station" – 9YL:

Station	*Call Sign*		*Frequency*	*Hours*
North	9YL	(H.F.)	17,184 kHz	1200 hrs. – 1530 hrs. (GMT)
Post		(H.F.)	12,885 kHz	1330 hrs. – 2050 hrs. (GMT)
Radio		(H.F.)	8,710 kHz	0100/0600/0900/1300 1500/1730 & 2130 hrs. (GMT)
		(H.F.)	6,470 kHz	2300 hrs.
		(M.F.)	476 kHz	0300 hrs. and every 4 hrs. thereafter.

Medium Short Distances: Ships may contact Galeota Terminal within 3 days before arrival on the marine HF frequencies. Galeota Point listens on 2182 kc/s and operates with Amoco's marine units on 2398 kc/s.

Ships equipped with FM/VHF radios may call Galeota Point on 156.8 mc/s=Channel 16 and/or Channel 8.

Advice of Arrival: It is important that ships establish radio contact with Amoco when 3 days distant from Terminal and maintain this contact until just prior to arrival at the Terminal. All ships should send a 72 hours ETA message to Amoco giving the best estimates of ship's arrival time at the Terminal. This ETA message should also include a definite statement of the details of any equipment required from shore for connecting submarine hoses to ship's manifold. Further ETA messages should be sent to Amoco when the vessel is 24 hours and 12 hours distant from Galeota Point and at any other time any appreciable change occurs in the original ETA or those subsequent thereto. The 12 hours ETA should include a positive statement regarding ship's readiness to load on arrival, and the number of hours that will be required to discharge ballast after the ship is berthed in mooring (see "Ballast").

Ship-to-Shore Communication: Ship-to-shore communication, while ships are in moorings, will be by portable VHF radiotelephone units. The Loading Master will advise Masters and Officers regarding the emergency whistle signals set up for use in event VHF radiotelephone units become inoperative. The use of the ship's radio station and/or battery charging equipment is prohibited during cargo transfer operations.

Ship's Radio Stations: The use of ship's radio equipment while ship is on anchorage in Terminal waters is prohibited by law, unless transmission is made through the local commercial station.

BERTHING:

Single Buoy Mooring: Tankers are loaded by means of a 42 in. pipe-line from shore to the SBM which is 2.6 miles offshore. The ballast water is pumped ashore through a 16 in. submarine line. The buoy piping consists of 2×20 in. diameter pipes for crude and 1×16 in. diameter pipe for deballasting with 2 by-pass valves. The loading hoses from the buoy to the tanker consist of 2×20 in. floating hoses, 755 ft. and 790 ft. long ending in 3×12 in. hoses of 90 ft. length. Valves are fitted in the buoy connectors so that the flow in one 20 in. diameter floating hose string can be diverted to the 16 in. diameter underbuoy hose string.

The SBM is designed for maximum tanker size of 250,000 d.w.t. and is located in 95 ft. water depth. The buoy is 11 m. in diameter, 4.80 m. high, and equipped with a navigation light and radar reflector. There is a skirt at the bottom of about 15 m. in diameter.

Ship's Gear: Vessels calling at the Galeota Point must be equipped with 2 nylon messenger lines of a minimum 6 in. circumference and at least 300 ft. long. These lines should be laid out free for running at the bow of the vessel. Warping winch or windlass should be in good working order and adequate to handle 12 in. nylon floating rope under heavy strain. Efficient stoppers must be available to transfer floating nylon from winch to bitts.

Vessels must be equipped to fit flanges on floating hoses which are ASA standards.

Ships must be adequately equipped with blocks, tackle and booms to hoist the floating hoses, each weighing about 3 tons, from the sea surface over the ship's port rail to the manifold, in a safe, efficient and expeditious manner. Ships must also have an adequate supply of nuts, bolts, gaskets, and wrenches to connect cargo/deballast hoses.

Ship's Alertness: The Terminal is an open roadstead, therefore, during the time a ship is moored at the Terminal, the ship's engines and gear must be ready with full power for immediate use.

Vessel at the SBM must be able to clear and shall clear immediately upon advice of the Loading Master or as directed by Amoco's Terminal Superintendent.

Ship's personnel should be at their stations and alert at all times during mooring, unmooring and cargo transfer operations.

Mooring Launches: Amoco maintains launches to assist in mooring and unmooring vessels.

BALLAST: It is the Shipmaster's responsibility to see that no oil (crude, diesel, bunker C, or bilge) is pumped or spilled overboard from the ship. Galeota Terminal has 2 ballast water pits which are equipped with oil skimming equipment to accommodate any ballast water. The tanker may discharge ballast as desired into the proper line as soon as all arrangements have been made for this action.

All precautions shall be taken to prevent any loss of oil overboard; drip pans must be in place and used when disconnecting oil hoses from manifolds. The waters in and adjacent to the Galeota Terminal, and Amoco's offshore platforms must *never be polluted.*

As soon as practical after arrival, all vessel's tanks will be inspected. If during first inspection or during loading, it is revealed that ship's tanks are not oil-tight, tanker will be rejected and refused further loading. Ship will not be accepted later for loading unless satisfactory evidence, duly certified by Lloyds, ABS Surveyors, or other authorised survey agency, of effective repair is submitted.

A vessel must have sufficient ballast for safe manoeuvring and usually one-third of its tonnage is adequate. However, by a careful watch of the weather information and berthing instructions and by a knowledge of the behaviour of his own vessel, a Master may desire to come to the Terminal with minimum ballast.

Shipmaster should be aware that at any time deballasting at sea occurs and has been reported or viewed by Amoco Trinidad Oil Company personnel, the offence will be documented, where possible, by Amoco personnel, and a report submitted to the proper Ministry of Trinidad and Tobago.

In addition to the lights usually displayed, vessels discharging ballast or loading cargo during darkness, will illuminate the area around the ship, to the satisfaction of the Loading Master, in order that any oil on the surface of the sea may be readily detected, and appropriate action taken. Vessels unable to illuminate the sea satisfactorily may not discharge ballast during darkness. Vessels should provide explosion proof flood lights for working on deck during night operations.

Loading and Deballasting Simultaneously: Vessels equipped with a separate system of ballast tanks will be allowed to discharge ballast and load oil simultaneously, providing approval is received from the Terminal Superintendent.

LOADING:

Rate of Loading: Maximum crude oil loading rate through 2×12 in. deck hoses is approximately 40,000 b.p.h. The flow is by pump and the line pressure will not exceed 100 p.s.i.

In order to save ship's time, it is requested that ballast water be pumped *as fast as possible* and that the tanker receives oil as fast as it can be delivered, both operations having due regard for safety. It is requested that any impediment (such as "Y's", strainers, or mud boxes) to the flow of oil be removed before arrival at the Terminal. Connections should be provided so that 12 in. ASA deck hoses may be used.

Berthing: Tenders to load crude oil cargo will normally be accepted and the berth will be assigned to vessels in order of arrival, provided vessels have nominations for cargo valid at the time and are in all respects equipped and ready to moor. In the event that the berthing is delayed on account of weather, vessels will keep their position in line. Vessels required to leave the port area on account of weather (port closed) should keep in contact with the Terminal via radio in order that they will be available when the weather moderates. Amoco reserves the right to load vessels "out of turn" following the return of good weather, to the extent that such loading "out of turn" does not materially delay the loading of other vessels in line. For example, in the event that weather makes it necessary for vessels awaiting berth to vacate the terminal and put to sea, Amoco may load another vessel which arrives first after the return of good weather, but before the return of the vessels waiting in line ahead of it. And further, Amoco reserves the right to decline to moor a specific vessel if its condition or facilities are unsafe for mooring or loading, even though the port may be open to other vessels.

Connecting Hoses: After the tanker is securely moored, the floating loading/deballasting hoses must be lifted to the rail with ship's equipment. The two 12 in. hose lifts weigh about 3 tons each. The flange connection on each hose is for a 12 in. manifold. Hoses are lifted individually by the ship's gear and are connected on the port side. The 12 in. hoses are connected direct to the manifold and tankers should have their manifold fittings available.

The Loading Master and the hose crew will sling and connect the hoses to the vessel's manifold. The ship's personnel are expected to operate the winch and assist where necessary. A deck officer should be present at all times.

Loading Readiness and Arrival Time: The Company will make every effort to load vessels upon arrival or as promptly as berth is available, weather permitting.

Notice of readiness will not be accepted as at time of arrival, unless the vessel is in all respects ready to load. Arrival time will be considered as the time the Loading Master boards the vessel or the time that vessel anchors, whichever occurs first.

Responsibility: The vessel is responsible for the deballasting and loading. The Company Loading Master will advise the vessel in respect to loading pressures and hazards, but will not direct the loading except as may be necessary to protect the terminal facilities. Manipulation of ship's valves is the direct responsibility of the ship's personnel.

Deballasting Control: As soon as the vessel is ready to deballast and the line connections have been made, the manifold valves should be opened and the shore notified. Upon advice from the Terminal, ship may begin discharging ballast into shore line. Line pressures should not exceed 120 p.s.i. This corresponds to a flow rate of 800/1,000 t.p.h.

Oil Valve Control: Caution: The incoming oil stream is controlled onshore, and it is extremely dangerous to close a ship's valve against the incoming stream. Such a procedure creates excessive pressure, which may damage hose, ship's piping, or Terminal facilities. Vessels will be held responsible for damage resulting from failure to observe this precaution.

A reduction in loading rate before topping the final tank or tanks may be arranged through the Loading Master by the ship's officer in charge and a normal standby warning should be given about 15 minutes before the shut down of loading operations per normal tanker practice. On advice from the ship a minimum of 1 minute is required to stop the flow of crude oil.

Emergency Signal: A battery-operated emergency shut down signal is expected to be installed in the near future.

Code Flag: During loading or deballasting the International Code Flag "B" shall be displayed from a topmost signal halyard during daylight hours. During hours of darkness, a red light shall be displayed. This light should be of a character such as to be visible at a distance of at least 1 mile, and show an unbroken light all round the horizon.

Shore Stops: Requests for the Terminal to stop the flow of cargo at a pre-determined tonnage will be made verbally to the Loading Master, and Amoco will not be responsible for any error, and in the case of overloading excess cargo will not be pumped back ashore.

Some delays are always incurred when such a shore stop request is made.

MEDICAL: Vessels requiring emergency medical assistance should immediately contact the Terminal, by marine VHF radio, and supply the necessary pertinent information which will be passed on to the vessel's Agent.

Neither medical nor hospital facilities are available at Galeota or provided by Amoco. Limited facilities are available in Mayaro, which is about 30 minutes drive and unlimited service is available in Port of Spain which is two hours drive.

FRESH WATER: Only available by barge from Port of Spain.

FUEL: Only available by barge from Port of Spain.

REPAIRS: Masters of vessels loading or discharging at Galeota Terminal are advised that this port is considered an "Open Roadstead", and under no circumstances may engines be shut down for repairs while their ships are moored to the SBM system. There are no facilities at Galeota Terminal for making vessel repairs, but arrangements may be made through vessel's Agent, to utilise the Port of Spain facilities. It is emphasised that all vessels at the SBM must be in readiness to clear immediately on instructions to do so.

SURVEYORS: Amoco maintains an inspection laboratory at Galeota Terminal and will inspect cargo on specific request of off-tanker companies.

Classification agencies are represented in Port of Spain as follows:

American Bureau of Shipping	Lloyds Register of Shipping
Grell and Company Ltd.,	Geo. F. Huggins and Co. Ltd.,
60 St. Vincent Street,	72 – 74 South Quay
Port of Spain	Port of Spain

TIME: GMT minus 4 hours, and daylight saving (Summer time) is not applicable.

CONSULS: There are no consulates at Galeota; however, consular or diplomatic representatives for most nations maintain offices in Port of Spain.

CUSTOMS ALLOWANCES: Each Crew member is allowed to retain in his possession 200 cigarettes and 1 bottle of spirits. The balance must be listed and will be sealed in a locker by the Customs.

SHORE LEAVE: Shore leave for personnel of vessels loading or unloading at the Terminal is arranged through the vessel's Agent. All personnel going ashore must land at the Amoco small boat harbour. Sufficient crew must be aboard at all times for letting go lines in order to clear the mooring immediately if necessary.

SAFETY: The vessel's personnel are responsible for the safety of the vessel and must take all necessary precautions, whether or not so advised by the Loading Master, having in mind, the hazards of the operation because of the product being handled, weather conditions and any other circumstances requiring special care or caution.

It will be well to remember that Amoco *does not have* any tug or floating vessel in the area equipped with fire-fighting apparatus.

While the vessel is moored or within the vicinity of the moorings, all vessel's personnel and vessel's operations must comply or be in accord with the following safety rules:

1. The ship's engines must remain ready with full power for immediate use.
2. The Loading Master may request the Master to extend the ship's "No Smoking" areas as conditions warrant. Masters are also requested to instruct their crew not to throw lighted cigar or cigarette butts over the side or out of the portholes. All alleyway doors to passage ways leading to deck areas are to be kept closed during cargo transfer operations.
3. Not less than 1 deck officer and 3 seamen shall be available on deck at all times while vessel is in the mooring system.
4. Power must be available at all times on all deck winches and on the anchor windlass while vessel is in the mooring system.
5. Explosion proof deck lighting must be available for night mooring and loading. A good floodlight will be required to illuminate the area around the cargo hose connections during cargo transfer operations. During the discharge of ballast at night, the sea area around the vessel is to be adequately lighted.
6. All deck scuppers must be plugged tight before connecting the floating and deck hose and remain plugged until all hoses are disconnected.
7. The presence of unauthorised craft alongside is extremely hazardous. Ship's Masters are requested to require all non-Amoco craft to clear ship's side as soon as personnel have been embarked or disembarked.
8. No stores may be handled on the weather deck while ship is loading cargo, discharging dirty ballast, or while any ullage hatches, loading hose, or tank tops are open.
9. No cargo will be loaded while tank tops or ullage hatches are open.
10. During the time a vessel is moored in the Galeota Terminal, a continuous and efficient fire watch must be kept on deck and in the engine room. Fire hose (at least 2 pairs) shall be left out for immediate use at all times while in the berth.
11. In the event of fire breaking out in any part of the vessel, however minor it may be, the fire alarm must be given immediately. This will consist of a succession of long blasts on the ship's whistle, together with a rapid and continuous ringing on the ship's bell.
12. A safety check-off list and Terminal rules for safety will be delivered by the Loading Master.

WEATHER:

Climate: The climate around Trinidad is generally very good, and is strongly influenced by the North-east trade winds. Visibility is usually excellent except during passing thunderstorms and the percentage of days with less than one mile visibility is very small.

Weather Data and Summary:

Average rainfall	60.0 in.
Mean maximum temperature	87°F
Mean minimum temperature	69°F
Extreme maximum temperature	101°F
Extreme minimum temperature	52°F
Average relative humidity (0700 hrs.)	92%
Average relative humidity (1500 hrs.)	67%

Winds: Winds are predominantly from the North-east and East (about 90% of the time). The mean velocity is about 8/12 knots and infrequently 30 knot winds may be experienced.

Tides: A tidal range on the East coast of Trinidad is 4 – 5 ft., and the tides occur 17 minutes later than Port of Spain.

Sea Conditions: As Trinidad is constantly under the influence of the North-east trade winds, the seas and swells are predominantly from the Eastern quadrant throughout the year. Wave heights average about 6 – 8 ft. and during a 2-year observation period waves of 11 ft. and higher occurred for as many as 20 days per year.

Currents flow to the North-west 53%, North 24%, and N.N.W. 14% The currents are not seasonable as currents of 2 to 3 knots are experienced during all months of the year. Average current velocity is about 1.5 knots.

Sea Temperatures: The surface temperature over coastal areas average about 75° to 80°F in the Winter months and 80° to 85°F in Summer.

General: Trinidad is an area where buildings have been damaged by earthquakes and the South-west tip has experienced mud volcanoes and disappearing islands. The rainy season occurs in late Summer and Fall at which time as much as 15 in. per month may be experienced. Hurricanes are seldom felt in Trinidad and Tobago since these islands are to the South of the storm track.

GENERAL:

Government Officials: Trinidad and Tobago Customs officials will be stationed at Galeota and in most instances the Customs officer will also handle the duties of the Quarantine and Immigration officers. Should Customs guards be stationed on board vessels while in the moorings, it is expected that ships will provide food for these guards and other officials.

Quarantine Regulations: The rules governing quarantine of vessels are the same found in other ports of the world.

Visitors: Visitors must obtain a special pass from the Amoco Terminal Superintendent and it is strongly recommended they be restricted to a minimum due to the hazards involved.

Supplies: Commissary supplies, as well as steward's stores are not available at Galeota Point, but a limited amount of fresh fruits and vegetables may be purchased at the market in Mayaro, which is 30 minutes drive from the shore terminal. Unlimited supplies may be purchased in Port of Spain and all arrangements must be made through the ship's Agent.

Bunkers, gas, oil, marine lubricants or potable water are not available at Galeota.

Flag: All vessels are required to fly the Trinidad and Tobago ensign on the foremast during daylight hours. TT flags may be obtained from ship's Agent.

Contraband: Amoco prohibits unauthorised craft from coming alongside ships while in the moorings.

To avoid the possibility of undesirable items getting aboard vessels, it is recommended that Masters discourage "bumboats" or similar craft, coming alongside while vessel is in the Terminal vicinity.

Small Boat Harbour: A sheet piling type jetty is used for the harbouring of mooring launches and supply vessels. The entrance is defined, by night, with a red flashing light mounted on the seaward end of the jetty.
Company's Terminal: The Company's Terminal and marine administrative offices, storage tanks and laboratory for testing stock are located onshore at Galeota Terminal.
Agency: Amoco does not perform any vessel agency functions. Owners of vessels calling at Galeota Terminal must arrange for their own Agent.
OPERATOR: Amoco Trinidad Oil Company.

AGENT: See "Port of Spain".

POINTE-A-PIERRE (Texaco Oil Terminal and Refinery): 10.19 N. 61.28 W.

DOCUMENTS/HEALTH, etc.: As for "Port of Spain".
Officials require accommodation ladder to be rigged, usually on port side, for boarding and clearance.
PILOTAGE: Compulsory. Pilot ordered by Agent after receipt of ETA. Pilot ladder conforming to International Safety Regulations to be supplied by vessel.
ANCHORAGE: Safe anchorage and good holding ground in the roadstead. On account of Pierre Shoal, a 21 ft. patch about 1.75 cables S.W. of the head of the main viaduct, vessels of moderate draft should approach with the main viaduct bearing more than 075°. The main viaduct consists of pipe-lines supported by reinforced concrete piling, located at 10° 20′ N. 61° 30′ W. and extends in a W.S.W. direction for 6,190 ft.
RESTRICTIONS: No entry restrictions by day or night. However, free pratique must be obtained, crew lists, stores lists, etc., to be presented to local Agents on arrival. Arriving vessels must contact Texmarine, Pointe-a-Pierre on VHF Channel 16 two hours prior arrival for berthing instructions, traffic information, cargo nominations etc.
MAX. SIZE:
No. 1 berth North: 40 ft. MLWST; 720 ft. LOA.
No. 2 berth North: 40 ft. MLWST; 775 ft. LOA.
No. 2 berth South: 35 ft. MLWST; 330 ft. LOA.
No. 3 berth North: 35 ft. MLWST; 640 ft. LOA.
No. 3 berth South: 20.5 ft. MLWST; 350 ft. LOA.
No. 4 berth North: 21 ft. MLWST; 350 ft. LOA.
No. 5 sea berth: 40 ft. MLWST; 900 ft. LOA.
No. 7 berth: 35 ft. MLWST; 700 ft. LOA.
No. 8 berth: 33 ft. MLWST; 570 ft. LOA.
Also see "Developments"
TUGS: Texaco Trinidad Inc. maintains three tugs to assist in berthing.
RADIO: Texaco Trinidad Inc. maintains their own radio station on frequency 2638 Mc/s. and VHF Channels 16, 13, 12, 11, 8 and 6.
DENSITY: 1025, (August to November approximately 1023).
FRESH WATER: Available alongside or by barge (if available and adequate notice given prior arrival).
FUEL: All grades supplied alongside or by barge. Also see 'Shipmaster's Report' dated August 1979.
REPAIRS: Almost all types of deck and engine repairs can be carried out.
DRYDOCK: Swan Hunter Shipyard located at Chaguaramas.
SURVEYORS: Lloyd's Register of Shipping, American Bureau of Shipping and Norske Veritas.
REPATRIATION: Facilities exist for effecting crew changes and arranging repatriation.
AIRPORT: Piarco International Airport is served by International Airlines and flights are regular, airport approximately 28 miles away from Pointe-a-Pierre.
SPECIAL PRECAUTIONS: Tankers loading or discharging.
Bonding: When a ship has docked, the bonding cable and hose shall be connected.
Weather: Loading and discharging of dangerous petroleum may be stopped during an electrical storm and ullage screens or ullage plugs must be put in place.
Emergency alarm: This safety device is conveniently placed on all docks and is under the control of the jetty personnel. This is used only in cases of emergency and has the effect of stopping all shore pumps immediately it is used. Loud-sounding horns are situated on the hose structures and are sounded by the jetty attendant when urgent attention from the ship is required.
Hose pressure: The max. discharge pressure allowed on the jetty hose is 130 lbs. Pressure of jetty hose for loading shall not exceed 130 lbs.
Hot work: No burning, welding or major repairs can be carried out in the harbour without permission. Repairs involving hot work may be started only if a permit has been issued and the necessary gas-free certificate granted by the Company's qualified inspector.
Hoses: Loading hoses are connected up by dock personnel, but must be supported by ship's tackle at the rail during loading or discharging. Ship's officers should keep a close watch on the hose during operations and stop loading and/or discharging operations if anything untoward happens to the hoses. A drip pan is to be placed under all hose connections in use. After loading fuel oil, Marine diesel or NOR, air is used for displacing hose contents into the vessel before being disconnected. For all other products the hose is drained into ship's tanks or jetty slop tank.
Towing wires: On completion of mooring on arrival, a suitable wire shall be hung over the bow and stern on the side away from the dock so that, in an emergency a tug can tow the ship off. The wire should be properly secured on board and it should be long enough to reach the water's edge at the ship's lightest draft.
No Smoking: Smoking is prohibited on all the piers and launches. Smoking on board ship is permitted only in those enclosed spaces that are specifically designated by the Master as "Smoking Areas".
Tank Lids: Tank lids must be closed while handling cargo, and at all other times if tanks are not free of gas. Flame screens must be in position on all open ullage plug holes.
GANGWAY/DECK WATCHMEN: An efficient watch must be maintained on deck and in the engine room of all ships in port, and a sufficient number of men must be on board at all times to move the vessel either for harbour operations or in emergency situations.
CUSTOMS ALLOWANCE: 200 cigarettes and moderate amount of spirits.
IDENTIFICATION CARDS: Not required.
MEDICAL: Advance notice of medical attention preferred. Modern hospital facilities.
TELEPHONES: On dockside and at all sea berths.
SHORE LEAVE: Crew not allowed ashore at Pointe-a-Pierre. Regular launch service from ship to San Fernando, 3 miles away.
DEVELOPMENTS: Dredging of the Pointe-a-Pierre harbour has not been fully accomplished and, therefore, the draft alongside the undermentioned berths has been restricted to the following depths until final completion of dredging (not yet commenced, October 1980).

SHIPMASTER'S REPORT: August 1979.
Bunkering:
Approach: (From Passage Book). Trinidad and Tobago Islands observed on radar at 48 miles, although echo masked by clouds, islands observed visually at over 40 miles. Marked by towering Cumulus clouds. Numerous tide rips and abrupt change of colour of water (green) at the 200 m. sounding line.
Good position obtained distance 35 miles from Galera Point and Scarborough using visual bearings of Galera Point and Little Tobago and distance off Granby Point.
North coast Trinidad current approximately 1.5 knots West going.
Chupara Point Light not conspicuous during daylight and not seen at night.
Chacachacare Light (Admiralty List of Lights No. 5846) good, seen at 35 miles.
Gulf of Paria can with moderate sized vessel be approached through any of the channels of Bocas Dragon. We used Boca de Huevos which was safe, no problems. Parallel Indexing very useful on Point au Diable, Point Braba and Cape Cola.
Serpents Mouth not recommended at night.
Gulf of Paria not very busy, many vessels anchored off Port of Spain.
An intense white light (Fl. ev. Sec.) is located on Chimney just South of South Pier at Pointe-a-Pierre (position 10° 18′ 38″ N., 61° 27′ 36″ W.). BA Chart No. 482 seen at 12 miles.
No appreciable current in Gulf of Paria.
VHF: Called "Texaco Shipping Office Pointe-a-Pierre" on Channel 16 about 5 miles North of Boca de Huevos Strait, contact reasonable. Working on Channel 13, very prompt.
Anchorage: General anchorage along parallel of 10° 19′ North from 3 miles West of No. 1 Buoy (10° 19′ 06″ N., 61° 29′ 18″ W.) to 0.5 mile off buoy.
We anchored with No. 1 Buoy 072°×1.0′, good position in 17 m.
For bunkers, oil company like vessel as close as possible to No. 1 Buoy, but not closer than 0.5 mile.
Immigration/Customs: Came out very promptly. No difficulties, forms as per "Guide to Port Entry". Must have gangway rigged. Pratique message sent, no answer received, given on arrival.
Bunkering: Texaco: Dumb barge of 1,500 tonnes capacity. Delays caused by waiting for harbour tug to bring barge alongside vessel also delay waiting for tug on completion of bunkering. Contact 'Shipping Office' Channel 16 well before barge finishes in order that they may call tug. We waited for tug for one hour before bunkering and 2 hours on completion.
Diesel 6 in. line, 150 ASA, ship's derrick required.
Rate: Up to 200 tonnes p.h. for diesel.
Films: Walport Films and Vidpack can be changed on prior notice to Agents.

SHIPMASTER'S REPORT: September 1979.
Approaches: Deep drafted vessels use Boca Grande to enter Gulf of Paria in which is situated the Pointe-a-Pierre Terminal. An area marked by dotted lines on the chart has been surveyed and declared safe for large vessels and this route should be followed up to the anchorage off Pointe-a-Pierre.
Anchorage: Texaco Shipping advise vessel where to anchor when making the approach and on this occasion we used two anchorages whilst waiting, first with the "SBM" bearing 083°T×2.4 miles and the second with La Luc Lt. bearing 334° and Radio Mast bearing 110°. At both anchorages vessel used 6 shackles on starboard anchor in about 60 m. of water. Bottom, heavy glutinous mud which gives good holding ground. The deepest draft vessel which arrived in the port was drawing 73 ft. and appeared to have no difficulty anywhere.
Navigational Restriction: VLCC's are required to advise Harbour Master, Trinidad, of their time of arrival off Boca Grande, 24 hours before arrival so that other vessels can be advised to give a clear berth. On approach to Boca Grande vessel can contact North Post Radio on VHF to confirm transit time and receive information of other movements. Our ETA was broadcast 3 hours out.
Port Officials: Customs and Immigration board with Agent and clear vessel inwards. No special requirements. Bond is sealed but Customs will board to make crew issues after each seven days if requested

through Agent. Port Health work is carried out by Agent and we renewed De-rat Certificate. Shore leave passes are issued by Immigration and are of two types, one for Officers which allows them to use the Pointe-a-Pierre jetty to land and also the Texaco Club and one for the crew which only allows them to land at San Fernando jetty.

Shore Leave: (Launch cost TT$8.00 per hour of stay). A fast launch calls at the ship every two hours, day and night, to take personnel to San Fernando. The launch can be contacted on VHF Channel 15 or 16. We found that by advising them of whether we had crew to go ashore before they arrived at the ship we got better service. Officers wanting to go to the club could get a separate launch arranged by Texaco Shipping (when available) direct to Pointe-a-Pierre.

Bunkers: Bunkers are supplied by barge of which there are two, one of 10,000 bbls. capacity and the other of 25,000 bbls. Pumping rate is very slow, we had 3 separate lifts and the average rate was about 120 t.p.h. The larger barge also has capacity to supply good fresh water if previously arranged through the Agent, which is more economic and better quality than in the official water barge.

Fresh Water: Normal source of supply is by barge from Port of Spain which requires about four days advance notice. Cost of supply is $3,000 TT no matter what quantity you require and we found the water supplied was heavily polluted with sea water giving a reading of 500 p.p.m. salt and also tasted oily. It is better to take water when bunkering (See "Bunkers").

Ship Chandler: Stores were expensive and many items unobtainable. All stores have to come through Pointe-a-Pierre jetty and the chandler has to make arrangements with the launch supervisors for transport to the ship. If large quantities involved, a barge and tug are used. We tried to get everything at one time but this was impossible. No canned beer or minerals are available and all bottles are returnable which increases the price.

Cargo Handling: We lightened into two vessels and discharged the balance of cargo at the SBM. The discharge plan was changed frequently during the waiting time. Discharge into the ships was via a 12 in. hose and only one pump was required to achieve the required discharge pressure and gave rates of 2,075 t.p.h for the first and 2,933 t.p.h for the second. Discharge to the SBM was via one 16 in. hose with a second hose connected in case of difficulties with the first, although not actually used, and a rate of 2,224 t.p.h. was achieved. All discharging was carried out using the port side manifold and derrick.

Before lightening, three lengths of hose were placed on board to be connected together and attached to the ship's manifold, then a string of four "Yokohama" type fenders were made fast alongside using the spring wires from forward of No. 1 and from between Nos. 8 and 9 holds to secure. We were instructed to keep the wires slack at all times to prevent the joining wires breaking. All the moorings from the lightening ships have to be fed through "Panama type" fairleads and no open leads used to prevent the rope/wire jumping out of the lead when the lightening ship is completely deballasted. Communications between vessels is via walkie-talkies supplied by Texaco and a co-ordinator from Texaco attends the vessel for liaising operations. Bunkering cannot be carried out while lightening but is acceptable at the SBM, we managed to complete it before any cargo operations started. No gangways are used between ships.

Mooring at the SBM was carried out with the assistance of one tug made fast on the starboard side of No. 1. A ship's line is sent away to connect with the SBM port line, as usual, this starting line should be two ropes joined together to ensure adequate length. Once the connecting line is brought on board (a 16 in. nylon) in sufficient quantity it is made fast on the bitts and the starboard connecting line picked up and secured. When connecting hoses, we found that our manifold flanges were too thin to accept their patent clamps and we had to fit 12 in. reducers to our manifolds and also to their pipe-lines to get a good fit. Ship's crew carry out all operations although there are personnel placed on board for mooring to the SBM to advise and assist.

Mooring and unmooring are usually carried out during daylight but for some reason we unmoored during the night, much to the surprise of the Pilot and co-ordinators, being the first vessel to do it for 6 years.

Personnel Changes: We carried out several changes of personnel over the period and in general, the joining people arrived on time without much difficulty but the personnel leaving, unless previously booked in advance, met with delays getting flights. A vessel which arrived the day after us, had eight men delayed ten days before flights were available. Non-crew personnel, such as technicians, who arrived and stated they were coming to do work on the ship were not allowed entry into the country without obtaining a work permit.

SHIPMASTER'S REPORT: February, 1980.

Documents: 5 Crew Lists, 2 copies of Crew Personal Effects, 2 Arrival Reports, 1 unmanifested Cargo List, 2 Report of Ship's Stores. All these on local forms except Crew Lists.

Anchorages: Usually given an anchorage position by Texaco, Trinidad, and normally use starboard anchor and require starboard accommodation ladder.

Tankers: Advise Agents time of transitting Bocas del Dragon and then North Post Radio will advise all ships. If using SBM, require forward 2 ship's lines to bring aboard 2×16 in. nylon lines which have to be heaved around drum ends. Sometimes have tug to assist.

AGENT: See "Port of Spain".

POINT FORTIN: 10.12 N. 61.42 W. (See Plan Book)

DOCUMENTS/HEALTH/CONSULS, etc.: Refer to "Port of Spain".
PILOTAGE: Pilotage is compulsory. Pilots board 0.5 miles off main jetty (Lat. 10° 12′ N. Long. 61° 42′ W.).
ANCHORAGE: There is safe anchorage 0.5 miles off the head of the jetty.
MAX. SIZE: Jetty 2 miles long with "T" head providing two outer berths of 700 ft. length and a depth of 38 ft. 1 inner berth of 300 ft. length and a depth of 35 ft. and other inner berths of 300 ft. length with a depth of 15 ft. 6 in.

1 conventional buoy mooring (6-buoy mooring) of 850 ft. length and a depth of 53 ft. situated 4,819 ft. North off jetty head.

TUGS: Required for berthing at outer berths for vessels of 30,000 d.w.t. and over and for unberthing vessels with a draft of 36 ft. or deeper. Also required for berthing and unberthing at conventional buoy mooring. Launch assists in berthing and unberthing.
BERTHING: Bottom alongside, mud; back pressure (hose), 100 lb; Current, flood S.W., ebb N.E. 2 to 5 knots; rise and fall tide, 4 ft.
FRESH WATER: Not available at CBM.
FUEL: Not available at CBM.
DIRTY BALLAST: No facilities available. Only small amount (approx. 200 tons) tank drainings acceptable on jetty and only if fluid at ambient temperature.
PRECAUTIONS: Normal oil terminal safety precautions applicable.
GANGWAY/DECK WATCHMEN: Customs guards on duty at ship's side.
CUSTOMS ALLOWANCE: 200 cigarettes, and a moderate amount of spirits.
IDENTIFICATION CARDS: Not required.
REPAIRS AND DRY DOCKS: At Chaguaramas.
MEDICAL: All facilities available.
REPATRIATIONS: Can be arranged.
AIRPORT: See "Port of Spain".
TIME: GMT minus 4 hours.
TELEPHONES: No facilities for telephones on board.
SHORE LEAVE: No restrictions.

SHIPMASTER'S REPORT: April 1977

The port of Point Fortin is situated in South-West Trinidad. The light beacon on the "T" pier head is in position Lat. 10° 12′ 05″ N., Long. 61° 42′ 06″ W. The port is owned and operated by the Trinidad and Tobago Oil Company Ltd. (TRINTOC), to serve the 100,000 bbls. per day refinery at Point Fortin. A 24 hour communications service is provided, telex via international lines (TRINTOC Point Fortin) or VHF 16 (Call sign: Point Fortin Shipping) working on Channel 11.

Pilotage is compulsory with the boarding area 1 mile seaward from the jetty head. There is 1×1,000 h.p. tug normally available for berthing vessels over 30,000 Summer d.w.t.

Tides in the area of Point Fortin vary in strength throughout the year with a max. rate of 3 knots. Masters are advised to check sea water density for corrected loadline readings. Water density varies throughout the year from salt to fresh.

Engine repairs which entail immobilisation of engines are not permitted when moored at the berths.

Vessel must arrive with clean ballast consistent with safe manoeuvring of the ship. A ballast condition of 25% of the vessels Summer d.w.t. is recommended.

Only clean ballast may be pumped overboard.

Notice of readiness is accepted when vessels' tanks are ready to receive cargo.

Bunkers and fresh water can be supplied at all berths except No. 5 (C.B.M.) Stores and laundry facilities are available on request. A diver is available. The only way of getting ashore is by means of a liberty launch. Walking the pipe-line bridge is strictly forbidden.

Inward Clearance is effected immediately on arrival by the Port Authorities; the following documents should be available for official use:

Clearance from Last Port.
Deratization Certificate
International Health Certificate
Declaration and Crew Vaccination Certificate
Cargo Manifest, if any
Bill of Lading, if applicable
List of unmanifested packages, if applicable
3 Copies arrival Report
7 Copies Crew List
3 Copies Store List
3 Copies Personal Effects
License for Dangerous drugs, if any aboard.

In the interest of reducing tanker port time, vessels' Masters are advised to request Pratique by Radio prior to their arrival.

Berths:

No. 1 – Draft 37 ft. 6 in. (Loading over tide 39 ft.).
Max. length 700 ft. – Max. berthing displacement 45,000 tons.
Grades handled: Crude oil, Fuel oil, Gas oil, Diesel oil, Kero, LDF, JP4, Platformate. All via 10 in. hoses. Napthanic Oil Residue via 4 in. hose.

No. 2 – Draft 36 ft. (Loading over tide 38 ft.).
Max. length 700 ft. Max. berthing displacement 25,000 tons.
Grades handled: Crude oil, Fuel oil, Gas oil, Diesel oil, Platformate, Kero, LDF, JP4, Mogas. All via 10 in. hoses. (Napthanic Oil Residue via 1×4 in. hose).

No. 3 – Draft 34 ft. 6 in.
Max. length 300 ft. max. berthing displacement 5,500 tons.
Grades handled: Fuel oil, Diesel oil, Gas oil, Kero, Mogas, all of them through 6 in. hoses.

No. 4 – Draft 14 ft. 6 in.
Max. length 300 ft. Max. berthing displacement 3,000 tons.
Berth port side to. Berthing at slack water and flood tide, unberthing at slack water tide and flood tide.

Grades handled: Fuel oil, Diesel oil, Gas oil, LPG, Bitumen, Emulsion (COLAS).

No. 5 – C.B.M., 6 buoys, max. draft 51 ft. max. length 850 ft. Berth either side. Daylight berthing only.
Grades handled: Crude oil, Fuel Oil via 2×16 in. hoses.

AGENT: See "Port of Spain".

POINT LISAS (FEDCHEM): 10.22 N. 61.29 W.

DOCUMENTS:
7 Copies Crew List.
2 Copies Ship's Stores List.
1 Copy Crew Stores List.
4 Copies Immigration arrival Report (supplied on arrival).
1 Declaration of Health (supplied on arrival).
Ship's Register.
Derat Certificate
Passports.

PILOTAGE: Pilots ordered through Agent; 48/24/12 hour ETA needed. Pilotage is compulsory. Pilots board at Head of Pt. Lisas Channel (10° 22′ 37″ N. 61° 39′ 38″ W.); Pilot ladder conforming to International Safety Regulations to be supplied by vessel.

Launch hire arranged by Dock Master to take out Pilot to vessels on arrival, and again take off Pilots from vessels on departure.

CLEARANCE: Point Lisas being a port of entry is equipped with resident Customs Officer and Guard. Ships arriving from abroad could proceed directly to Point Lisas as Customs officer acts for Harbour Master/Immigration/Port Health. Tel. 659 2221.

ANCHORAGE: Safe anchorage 0.25 miles off head of channel. On occasions, when port congested, vessels may be requested to anchor Port of Spain Roads (10° 41′ N. 61° 33′ W.) before proceeding Pt. Lisas.

RESTRICTIONS: No restrictions on night entry – departure.

MAX. SIZE: Point Lisas "Liquid Pier" (vessels handling bulk sugar, molasses, caustic soda and Anhydrous Ammonia in Liquid form), Maximum LOA: 550 ft. Maximum draft: 28 ft. LW.

Point Lisas "Solids Pier" (vessels discharging plant equipment, and loading sulphuric acid in drums and bagged and bulk fertiliser). Maximum LOA: 250 ft. Maximum draft: 20 ft. LWOST.

HEALTH: Crews of vessels arriving must have valid Vaccination Certificates, covering smallpox. If not in possession, Master should advise when giving ETA and Port Health Officer will vaccinate on arrival.

For quarantine if required, or authentication of vaccination certificate, Honorary Port Health Officer could be in attendance at short notice. Tel. 656 2311.

VHF: Pt. Lisas Dockmaster can be contacted on VHF Channels 16, 14 and 12.

TUGS: Molasses, bulk sugar and LPG carriers use a tug to assist in berthing and unberthing at Pt. Lisas "Liquid Pier". Tug will be ordered by the Agent.

STEVEDORES: If necessary will be ordered by Agents. No ETA to stevedores necessary.

FRESH WATER: Only by barge.

FUEL: All grades supplied by barge. At "Solids Pier" gas oil only can be supplied ex shore installation (Monday – Friday from 0800 – 1600 hrs.).

FIRE PRECAUTIONS: When loading LPG. No smoking on pier or on ship's deck.

GANGWAY/DECK WATCHMEN: Customs guards on 24 hours duty at ship's side.

OPENING/CLOSING HATCHES: Normally by crew.

CUSTOMS ALLOWANCE: 200 cigarettes and a moderate amount of spirits.

IDENTIFICATION CARDS: Not required.

CONSULS: At Port of Spain.

REPAIRS AND DRY DOCKS: At Chaguaramas 20 miles North of Pt. Lisas.

HOLIDAYS: New Year's Day (January 1st); Good Friday; Easter Monday; Whit Monday; Corpus Christi; Discovery Day (First Monday in August); Independence Day (August 31st); Diwali Day (late October/early November); Eid-ul-Fitr (December 21st – 22nd, approximately); Christmas Day (December 25th); Boxing Day (December 26th); Labour Day (June 19th); Republic Day (September 19th). Work is possible, except for Labour Day, Union Anniversary Day and Christmas Day, on these holidays.

POLICE/FIRE/AMBULANCE: Accidents – Police – Help, 62999; Fire – First Aid, 62998; Foreign Calls, 6216, 35900, 31913.

MEDICAL: Advance notice of attention required will assist. Modern hospital facilities available.

REPATRIATION: Crew changes and repatriation can be arranged.

AIRPORT: Piarco International Airport – 30 miles from Point Lisas. Daily flights to world-wide destinations.

TIME: GMT minus 4 hours.

TELEPHONES: No facilities for telephones on board.

SERVICES: Efficient maintenance gang available for normal work, tank cleaning, painting, etc.

SHORE LEAVE: No restrictions.

DELAYS: Due to congestion, sometimes delays are unavoidable, usually not more than 24 hours.

DEVELOPMENTS: Present depth of channel 28 ft. at MLW.

New port under construction 2 miles to the North of Point Lisas, it has not yet been named or commissioned.

AUTHORITY: Federation Chemicals Ltd.

AGENT: Melville Shipping and Trading Ltd., Steamship Operators and Agents, 18/20 London Street, Port of Spain. Tel. 62-54977, 52384, 54474. Telex 3265 and 3448. AB "Meltra". Cables "Meltra Trinidad W.1." Code: New Boe. Bankers: Royal Bank of Trinidad & Tobago Ltd. AO Tel. 662-5717, 62-44710, 62-41925.

PORT OF SPAIN: 10.39 N. 61.32 W. (See Plan Book)

DOCUMENTS:

For Immigration: On boarding, 3 Crew Lists and 3 Passengers Lists if passengers on board. Inspection of Derat. Certificate. Health Declaration and arrival report forms supplied by Immigration on boarding to be made up. Passengers and Crew must have valid smallpox certificates.

For Customs: 2 Crew Lists and 1 Passengers List if passengers on board, 2 Customs Ship's Stores Lists, 1 Crew's Stores List. Forms supplied on boarding.

Port doctor will board if calling from quarantine port. No forms required other than inspecting smallpox certificates of crew and passengers.

PILOTAGE: Not compulsory to Port of Spain anchorage but if required will attend from outside Bocas or where required through Agents in ETA message. Calling Pilot International Code Flag "H" by day and white light over red at night or International Code signal "G" on whistle.

Gangway or standard type pilot ladder with spreaders about 10 ft. apart. Ladder must be clean. It is desirable that 1 stanchion be securely fitted in the bulwalk at the top of the ladder.

Pilot station is situated on Port of Spain Wharf.

ANCHORAGE: Depends entirely on draft but should not be nearer than 0.5 miles from Grier Channel entrance, except in cases of vessels loaded with explosives; this anchorage is clearly defined on Chart.

Open roadstead in Gulf of Paria but can be considered as sheltered with choppy seas at times. Bottom shelves gradually from shoreline to 7 fathoms at Western end of harbour limits, increasing to 20 fathoms outside harbour limits Westward. Type of bottom, mud. Swinging area unlimited. No mooring buoy. Distance from anchorage to shore 2.25 miles at 5 fathoms to 5 miles at 7 fathoms, vessel will swing to the tide if loaded, and to the wind if light.

Currents 0.5 to 1.5 knots flood and ebb rise and fall of tides, variable minimum 1 ft. 5 in. maximum 4 ft. Rainy season June-December. Dry season December-June not always predictable. Rain squalls occur during months of July, August and September up to 30 to 40 knots unpredictable hurricane most unusual. Prevailing winds are mostly Easterly. Normally stronger during daylight.

RADIO: Advise through North Post wireless or telephone, call sign 9 YL. ETA 48 hours and 24 hours with other requirements.

RESTRICTIONS/MAX. SIZE: The Grier Channel, 350 ft. wide, leads to a dredged basin in which are the docks. No restrictions length, but maximum draft in channel, in basin and alongside is 32 ft.

HEALTH: Crews of vessels arriving must have valid Vaccination Certificates, covering smallpox. If not in possession, Master should advise when giving ETA and Port Health Officer will vaccinate on arrival.

TUGS: There are 3 tugs in Port of Spain to assist in docking operations.

BERTHING: *Container Terminal:* The new Container Terminal at Berth 6A includes 1,085 ft. of deep water berth which links King's Wharf and King's Wharf Extension. The total paved back-up area covers 15 acres and is used exclusively for the handling of containers. The Container Terminal is serviced by the existing Sheds 9 and 10 with a total covered space of 162,000 sq. ft. In addition, there are 27 acres of paved space designated for the handling of containers.

The Container Terminal is equipped with two 40-ton Paceco gantry quay cranes. The outreach of the cranes is 115 ft. with a backreach of 50 ft. In addition, 2 rubber tyred yard gantry cranes manufactured by Diamond Manufacturing Co. are available. These cranes are capable of straddling 5 rows of containers plus a truck lane.

It is estimated that the Berth 6A Container Terminal with its full back-up facilities is capable of handling 80,000 t.e.u.'s per annum.

King's Wharf: Length 3,900 ft. Berthing for 6 vessels with max. draft of 30 ft. 5 transit sheds available (Nos. 1 – 5). Apron width 50 ft.

King's Wharf Extension: Length 1,200 ft. Berthing for 2 vessels with max. draft of 30 ft. 2 transit sheds available (Nos. 7 – 8). Apron width 75 ft.

Large cruiser vessels berth at No. 5, 6 and 7. Vessels with length in excess of 525 ft. are unable to berth at No. 1 berth as width of basin is 700 ft.

STEVEDORES: Labour on Docks and labour on ships: Controlled by Port Contractors Ltd. Ordered by Agents. Gang size on Docks: 14 to 18 men. Gang size on vessels: 13 men, 1 gangman, 2 winch drivers, 8 hold men, 1 cooper, and 1 hatch foreman.

CARGO HANDLING: One berth on the Eastern side is an open wharf without a seafront warehouse. This berth is strictly used for containerised and passenger (cruise) vessels. The Eastern wharf is 3,300 ft. with five seafront warehouses. On the Western side the wharf is 1,200 ft. long with two seafront warehouses for general cargo, but at these two berths there are also facilities for receiving bulk cargo, i.e. grain, liquid oil, fats and molasses. These cargoes are usually discharged by vessel's equipment, but grain can be discharged by shore equipment at a slower rate.

There is now one floating crane, 60 tons capacity, one crawler crane of 160 tons capacity and also one 125-ton fork lift handling 20 ft. containers. There is also a trailer service for 20 ft. containers from dock to consignee's warehouse.

FRESH WATER: Supplied alongside all berths. Also available by barge.

FUEL: All grades supplied by barge.

GANGWAY/DECK WATCHMEN: Customs guards on 24 hours duty at ship's side.

OPENING/CLOSING HATCHES: This is handled by stevedores.

CUSTOMS ALLOWANCE: 200 cigarettes and a moderate amount of spirits.

CARGO GEAR: Vessels normally load and discharge with their own gear but shore cranes and heavy lift cranes available on the dock.

HOLIDAYS: New Year's Day (January 1st); Good Friday; Easter Monday; Labour Day (June 19th); Whit Monday; Corpus Christi; Discovery Day (August 5th); Independence Day (August 31st); Diwali Day (late October/early November); Eid-ul-Fitr (December 21st/22nd, approximately); Christmas Day (December 25th); Boxing Day (December 26th).

IDENTIFICATION CARDS: Not required.

CONSULS:

Germany	6251898		

REPAIRS AND DRY DOCKS: See "Chaguaramas'.

POLICE/FIRE/AMBULANCE: Accidents — Police, 62999; Fire — First Aid, 62998.

MEDICAL: Advance notice of attention required will assist. Modern hospital facilities available.

REPATRIATIONS: Crew changes and repatriation can be arranged.

AIRPORT: Piarco International Airport — 17 miles from Port of Spain. Daily flights to world-wide destinations.

TIME: GMT minus 4 hours.

TELEPHONES: No facilities for telephones on board.

SERVICES: Efficient maintenance gang available for normal work, tank cleaning, painting, etc.

Shipping Service: Three government-owned vessels, *Scarlet Ibis, Bird of Paradise* and *Tobago* operate a regular passenger and cargo service between Trinidad and Tobago.

SHORE LEAVE: No restrictions.

AUTHORITY: Port Authority of Trinidad and Tobago.

AGENT: Sprostons (Trinidad) Ltd., 29 Frederick Street, P.O. Box 8, Port of Spain. Tel. 62-34121-9 (nine lines). Telex SPROS WG286 Cables: "Sprostons", Port of Spain, Trinidad.

SOBO (Pitch Point): 10.15 N. 61.37 W.

Crude Oil Terminal operated by B.P. Trinidad Limited. Vessels from abroad calling at Sobo are required to proceed to Brighton for clearance formalities.

DOCUMENTS/HEALTH/CONSULS, etc.: Refer to "Port of Spain".

PILOTAGE: Compulsory.

TUGS: Not used. Launch assists berthing.

RESTRICTIONS: Berthing/unberthing only on flood tide.

MAX. SIZE: Controlled by depth alongside jetty — 29 ft.

BERTHING: Vessels moored with springs on jetty. Other lines to buoys.

FRESH WATER: Not available.

FUEL: Available by barge.

AGENT: See "Port of Spain".

TEMBLADORA (Alcoa Bauxite Terminal): 10.41 N. 61.35 W.

Also refer to "Port of Spain".

DOCUMENTS:

2 Crew Manifest/Stores List for Customs.
2 Ships Stores List for Customs.
3 Immigration Arrival Report.
8 Crew Lists.
1 Declaration of Health.
1 Stowaway List (even if no stowaways on board).

PILOTAGE: Pilotage is compulsory. Pilots board 0.5 miles off installation.

ANCHORAGE: Safe anchorage 0.5–0.75 miles off head of jetty.

MAX. SIZE: No. 1 (Western berth) for discharging, length of berth 976 ft. Max draft 23 ft.

No. 2 (Eastern berth) for loading. Length of berth 675 ft. Max. draft 36 ft.

RADIO: ETA should be given at least 36 hrs. before arrival via Northpost Radio " 9YL" or Barbados Radio "8PO" to Alcoa. Telex No. 221 (Alcoa 221 WG) Tel.: 637 3372/4. Mailing address: PO Box 609, Port of Spain.

TUGS: Alcoa maintain their own tug to assist in docking operations.

BERTHING: There are two wharves: No. 1 with a length of 976 ft. and No. 2 with a length of 675 ft.

STEVEDORES: Not necessary.

FRESH WATER: Supplied at both piers, also by barge.

FUEL: All grades by barge.

GANGWAY/DECK WATCHMEN: Customs guards on duty at ship's side.

OPENING/CLOSING HATCHES: Handled by crew.

CUSTOMS ALLOWANCE: 200 cigarettes and a moderate amount of spirits per man.

CARGO GEAR: As "Port of Spain". Loading: Carried out with travelling tower conveyor system, rate 1,200 t.p.h. Discharging: With travelling tower grab 5 tons capacity, rate 300 t.p.h.

IDENTIFICATION CARDS: Required. Vessel must issue I.D. cards to all onboard.

REPAIRS AND DRY DOCKS: At Chaguaramas.

MEDICAL: All facilities available. Advance notice of requirements should be given.

REPATRIATIONS: Can be arranged (Advance notice must be given for citizens from Eastern Block countries).

AIRPORT: See "Port of Spain".

TIME: GMT minus 4 hours.

TELEPHONES: No facilities for telephones on board.

SHORE LEAVE: No restrictions (except for citizens of Eastern Block countries who need visas or special permission).

AUTHORITY: Alcoa Steamship Company Inc,, Tembladora Transfer Station, Carenage, Trinidad.

NOTES

Please also advise Shipping Guides Ltd.

Tunisia

BIZERTE: 37.17 N. 09.54 E. **(See Plan Book)**

PORT LIMITS: Commence 0.5 mile from the Port.
DOCUMENTS:
5 Crew Lists.
5 Passenger Lists.
4 Crew Personal Effects Lists.
4 Ships Stores List.
1 Copy Exemption.
3 Copies Bill of Lading.
3 Copies Manifest.
Health Declaration.

PILOTAGE: Vessels approaching the port applying for Pilot by day by flying the flag "G". Advise Pilot of ETA 48 hours before arrival. Pilot vessel and pilot station may be contacted by VHF Channel 16. The Pilot boat exhibits the letters "P" & "H". The Pilot boards half a mile from the Southern fairway, vessels have to slow down to enable the Pilot to board. The anchorage for vessels awaiting the Pilot is half a mile from the Southern fairway.
ANCHORAGE: See "Pilotage".
RESTRICTIONS: Entry at night is forbidden for tankers.
MAX. SIZE: See "Berthing".
HEALTH: Free pratique normally given at the quays after mooring. Pratique is automatic for vessels coming from another Tunisian port. In case of suspected disease on board vessel will be ordered to quarantine anchorage.
RADIO: Bizerte Radio, call sign 3VWA. Frequencies: 2182, 1743, 1637, 2321 and 2506 kHz. Range 200 km.
VHF: Channels 16 and 14.
TUGS: The tugs join the vessel at half a mile from the fairway. The 2 tugs available are equipped with radar.
BERTHING: There are 10 alongside berths in the 3 docks at Bizerte and 3 alongside berths at Menzel Bourguiba. The water is salt. Length of the main quays: 360 m., depth 9.00 m.
Length of the oil handling berth "A": 200 m., depth: 8.50 m. Length of the oil handling berth "B": 150 m., depth: 8.50 m. Molasses handling berth, depth: 7.5 m. Berth in front of the silo: depth 8.50 m. Iron ore handling berth "Douaria": depth 8.50 m. Berth in front of the cement factory: depth 7.6 m. Wooden wharf No. 2 at Menzel Bourguiba: depth 8 m.

Load and discharge is carried out by ship's own gear.
CRANES: 1 travelling gantry crane, capacity 6 tons. 1 travelling gantry crane, capacity 3 tons. 1 crane car, capacity 6 tons. 1 fork lift, capacity 7 tons. 2 fork lifts, capacity 3.5 tons. 1 fork lift, capacity 4 tons. 1 fork lift, capacity 8 tons. 2 tractors with tipping wagons. 1 floating pontoon crane of 30 tons.
BULK HANDLING FACILITIES: Grain is handled on the main quay, if cargo in bulk it is loaded into bags. Fertilizer also handled in bags. Ore and coal is unloaded into lorries.
SPECIAL CARGO HANDLING FACILITIES: None.
BRIDGES: New bridge (mobile) in operation.
STEVEDORES: Minimum of 24 hours advance notice of ETA to Agent is required.
MEDICAL: Doctor available to board vessel. Hospital, private clinics and all facilities available. 48 hours notice required for Smallpox, Cholera, and Yellow Fever inoculations. Advise Agent of requirements.
TANKERS: Crude oil load/discharge line 20 in. diameter. Fuel oil load/discharge line 14 in. diameter. No slop discharge facilities. Tugs stand-by during cargo operations.
FRESH WATER: Available from the quay at most berths. Rate 20 cu.m.p.h.
FUEL: Not available.
FIRE PRECAUTIONS: The Petrol Harbour is equipped with fire hydrants. A tug of 1,600 h.p. is required to be permanently standing by when tankers are moored alongside the quay.
GANGWAY/DECK WATCHMEN: It is recommended to employ shore watchmen.
OPENING/CLOSING HATCHES: Carried out by stevedores.
CUSTOMS ALLOWANCE: Each crew member is allowed 1 carton of cigarettes and 1 opened bottle of wine or spirits. In case of a prolonged stay in port, Customs may renew these quantities.
IDENTIFICATION CARDS: Crew members' identification cards will be collected by the Immigration service and exchanged for shore passes while vessel is in port.
CONSULS: Italy Tel. 02.31.747.
REPAIRS: Some types of deck and engine repairs can be effected.
DRY DOCKS: There are 4 dry docks which are located at Menzel Bourguiba.

Dry Dock No. 1 & 4	length	190.90 m.
	higher width	30.25 m.
	lower width	26.50 m.
	draft	8.80 m.
Dry Dock No. 2	length	247.50 m.
	higher width	40.60 m.
	lower width	36.00 m.
	draft	12.00 m.
Dry Dock No. 3	length	84.10 m.
	higher width	14.78 m.
	lower width	13.00 m.
	draft	4.15 m.

SURVEYORS: Bureau Veritas.
REPATRIATION: Can be arranged.
AIRPORT: Tunis/Carthage airport is situated 70 km. from Bizerte. Served by international airlines.
TIME: GMT plus 1 hour all year round.
HOLIDAYS: There are 17 days official holiday during the year. Work can be carried out on all holidays except 1st May on payment of 100% overtime.
POLICE/FIRE/AMBULANCE: Police Tel. (02)31.200; Fire (02)31.022; Ambulance (02)31.422.
TELEPHONES: No arrangements exist.
SHORE LEAVE: Allowed.
AUTHORITY: Direction du Port de Bizerte.

GABES (Ghannouche): 33.57 N. 10.04 E. **(See Plan Book)**

LOCATION: The port is located in the Gulf of Gabes, 22 miles (approx.) South of the oil port of La Skhirra and 58 miles S.W. of Sfax.
APPROACHES: Landfall by day is easy by virtue of the landmarks and oases around the port.

One can distinguish:

To the South of the port: The Oasis of Sidi Abdeslem and a 30 m. high tank.

To the North, the Oasis of Ghennouch and the red and white chimney, 44 m. high, of the power station.

To the West, the mass of buildings and industrial installations with, at the rear, the grey mushroom of the water tower, 36 m. high, and the Oasis of Bouchemma.

Landfall by night is equally easy, the port approaches being indicated, for vessels coming from the:

Southeast: The lighthouse of Ras Turguness (white flashes, period 5 secs., range 24 miles) and then by the lighthouse of the Gabes fishing port (white with intervening dark sectors, period 12 secs., range 11 miles).

Northeast: And after coming round the belt of lights of the buoys of the Kerkennah Islands by the mooring buoy N.W. of the channel of the port of La Skhirra (flashing white light, period 10 secs., range 10 miles) and by the lighthouse of the fishing port of Gabes.

The Roads:

The roads are indicated by the mooring buoy N.W. of the port channel (isophase white light: on 3 secs. off 3 secs., range 12 miles) and by the lighthouse of the fishing port.

Access Channel:

The port is entered via an access channel 3,220 m. long and 130 m. wide, dredged to 13.5 m.

This channel runs S.W. – N.E. and is joined to the entry passage by a curve 1,200 m. long.

On its 2 banks, there are 5 pairs of fixed light buoys, except buoy No. 8 located in the curve of the channel.

At the breakwater entrance, there are lights placed on the heads of the North and South breakwaters.
ANCHORAGE: The roads generally offer anchorage with good holding, and it is advisable to anchor to the South of the channel.
MAX. SIZE: "See Berthing".
TUGS: One tug of 1,200 h.p. and 1 fast pilot launch.
BERTHING:
The Basins:

The water area of the port, covering 80 hectares, is enclosed by 2 breakwaters (North breakwater 2,642 m., South breakwater 1,400 m.) leaving between them a passage 350 m. wide of which 200 m. is dredged to a depth of 13.5 m. This water area is divided into 2 basins:

An outer basin (50 ha.) dredged to 12.5 m., and having a manoeuvring circle 600 m. in diameter.

An inner basin (30 ha.) dredged to 10.5 m.

The Quays:

For berthing of vessels, the port has available:

A quay 600 m. long (Berth Nos. 5, 6 and 7) running approximately N.N.W./S.S.E. and dredged to 10.5 m.

This quay will take vessels up to 25,000 tons.

A quay 260 m. long (Berth No. 8) perpendicular to the first, and dredged to 12.5 m.

This quay will take vessels up to 50,000 tons.

Port access is possible at all times to vessels with 33 ft. (10.06 m.) max. draft for berths Nos. 5, 6 and 7, and 39 ft. (11.86 m.) max. draft for berth No. 8.

Open storage areas:

The open areas for the storage of goods transiting through the port include in the public zone – a shed of 4,000 sq.m., open areas which are properly surfaced 70,000 sq. m., open areas of rolled earth: 100,000 sq.m.
CARGO HANDLING EQUIPMENT:
Public:

One gantry crane of 20 tons; Lift trucks from 4 to 10 tons; Crane on rails of 20 tons (on order); Crane on rubber tyres of 20 tons.

Private:

Cranes on rubber tyres of 10 to 25 tons; Lift trucks from 4 to 10 tons; Tractors and trailers.
FRESH WATER: Available.
FUEL: Not available.
REPAIRS: Possible.
WINDS/TIDES: The winds in the Gulf of Gabes present a seasonal variation with the character of a monsoon.

During the cold season (October – March) winds come from the land, from the West and North.

During the hot season (April – September) the winds come from the sea, from the East to S.E. The strength is then from force 3 to force 5, very infrequently reaching force 7.

Tidal currents are negligible and have no influence on navigation.

The characteristics of the tides are as follows:

High Spring Tide	2.45 m.
High Neap Tide	1.60 m.
Low Spring Tide	1.10 m.
Low Neap Tide	0.15 m.

DEVELOPMENTS: The port of Gabes has been essentially created to serve the chemical industries in the area which process the natural Tunisian phosphates coming from the S.W. of the country. There is some importation of sulphur for use in the various processes, likewise aluminium for production of aluminium fluoride. As the South of the country develops, traffic in various general cargoes, foodstuffs and capital equipment, is increasing.

The port is currently advanced in its fifth Development Plan, running from 1977 – 1981. The new infrastructural works comprise (all to be completed by 1981):

1. Transformation of the current quay No. 8 into a much lengthened version.
2. Construction of 320 m. length of new quays in the North area of the basin.
3. Construction of a service quay.
4. Surfacing and equipping of 50,000 sq.m. of open area for storage of goods.
5. A second tug of 1,200 h.p. will be acquired.
6. Fertiliser bulk loading unit of 500 t.p.h. capacity will be installed.
7. An electric crane, on rails, of 20 tons will be acquired.
8. Cranes on tyres of 15 to 20 tons will be purchased.
9. Fork lifts from 4 to 10 tons will be acquired.

SHIPMASTER'S REPORT: The following reports are from the same vessel. Vessel discharged ammonia at Gabes – Ghannouche.

May 1980:

Approaches: BA. 3327 and 372.

Approaching from the East good positions were obtained off Ile Djerba, keeping outside the 9 fathom soundings as the bottom shoals quite steeply.

The 'Fairway' buoy "O" showed up well on the radar at 8 miles and the channel buoys themselves at 5 – 6 miles. Details of the breakwater were also visible on the radar at this range.

There is a Radio Beacon at Gabes but this is not marked on either chart. ALRS Vol. 2 refers to this.

Caution: The positions of the outer and channel buoys should not be relied upon. New positions as at 22nd/24th May, have been marked on chart 372 and a tracing made. The current sets quite strongly across the axis of the channel and care is required when rounding the bend in the channel immediately before the entrance. The Pilot reported that channel buoys frequently break adrift.

Pilotage: Reportedly there is a 24 hour watch kept on VHF Channel 16 but we did not succeed in making contact until after we had anchored; time of arrival 0330 hrs. Even then reception was poor.

Fluency of English fair.

Pilot boards from a black hulled launch of about 10.0 m. length with white upperworks. Pilot ladder about 1 m. from the water. Pilot boards outside the fairway buoy.

Vessels with draft in excess of 10.0 m. must berth head in, port side to, owing to existence of 10.5 m. shoal in the Southern corner of the harbour. No night time pilotage for vessels of this size.

Only 1 tug is available and only of moderate power; on berthing he pushes according to hand signals and whistles from Pilot (no VHF). When unberthing he takes a ship's line from the stern to swing ship to port clear of berth.

Note: The Pilot reported that the tug's hook was suspect and personnel should keep well clear of the tow rope.

Berth: The berth is a concrete quay in the Southern corner of the harbour about 250 m. long with depths alongside of 11.3 m. (forward) 13.8 m. and 14.2 m. taken by ship's leadline. Communication with shore personnel was not very good with conflicting advice as to whether vessel was in position or not.

The quay is used for the export of fertilizer products which are loaded by means of a large travelling chute. Despite fears, the gangway when swung out should not foul the gantry.

Well fendered with round rubber fendering.

Mooring arrangements were reasonable but the bow lines have to be taken to the far wall to afford a good lead when in position.

The gangway is landed on the quay without any problems.

The berth is open to swells from the East through S.E and is not very well protected from winds, except from due South. Since the bow is close up to the quay, special care should be paid to backsprings and all moorings. Ensure that watchmen are warned.

Discharge: The shore plant has storage for about 10,000 tonnes and relies on these shipments to keep the fertiliser section in production. Should tanks be empty they will be warm and high back pressures may be expected – 9 bar. The facility uses about 7,500 tonnes per month.

They claim to be able to accept cargo at a maximum rate of 350 t.p.h. but is usually in the region of 200 – 250 t.p.h. Our overall rate this call was 220 t.p.h.

The discharge line consisted of an 8 in. pipe from which there was provision for up to 4×4 in. flexible hoses to be connected. Only 2 hoses were used at this call. The shore flange has 12 holes which do not match the pitch of our manifold and, despite cabling ahead, this was not apparent until berthing and some time was lost. Shore personnel connect and disconnect. Line taken on board using ship's derricks. Shore provided the converting spool piece. Ship blew through lines on completion.

No vapour return line.

No venting to atmosphere.

Surveyor: Redwoods Surveyor in attendance and all figures based on gauging of ship's tanks.

Surveyor used a strange vapour factor which was not familiar in any way and declined to give us copies or explain its origin.

General: Fresh water available. No fuel oil available, if required proceed to oil terminal at Sfax. Repatriation and relieving of personnel possible without difficulties. Good road and rail communication with Tunis, Sousse and Sfax. Good access to Gabes by taxi. Shore passes required – take Discharge Book to Immigration office and a pass will be issued. Collect Discharge Book inward.

Papers: 3 Crew Declarations.
3 Stores Lists, including Bonded Stores. Declarations on the contents of all Bars onboard (This is most important, Tunisia is largely Moslem)
2 Lists of ports previously visited.
Port Health Form – normal Health Declaration.

The Officials were very fair but very thorough in checking bonded stores. Fresh provisions available.

July 1980:

Discharge: The discharge rate at this call was only in the region of 177 t.p.h. (perhaps due to Ramadan) with a very high back pressure throughout in excess of 9 Bar.

Total delays this call amounted to some 28 hours 20 minutes.

General: IMPORTANT: Since our last call the authorities have instituted strict currency control regulations and a number of the crew were caught on arrival during cabin searches. Personnel must therefore be warned before leaving that *ALL* Tunisian currency has to be handed back. The penalty for non-compliance being confiscation of the currency and a fine of at least twice the value of the money discovered. Before arrival personnel should be warned accordingly.

All authorities subjected the ship to a much more thorough scrutiny than at last call.

Repatriating personnel were subjected to baggage searches either on board or ashore.

Fresh stores were taken at this call and were of good quality.

Freon "R22" available in small quantities.

Fresh water taken and treated with "Stabochlor" as a precaution.

November 1980:

Approaches: BA. 3327 and 372.

When rounding Kerkennah Banks the buoys should not be relied upon.

On the flood tide the current from Kerkennah to Fairway Buoy sets in a S.S.W. direction. Fairway Buoy shows up at about 8 miles on radar and Channel Buoys at 5 to 6 miles.

A number of oil rigs are found between Kerkennah Banks and Ile Djerbe, these should not be relied on for navigation fixes. Ile Djerbe gives good positions. Approaching the Fairway Buoy a 'Minaret' marked on BA. 3327 to North of port is conspicuous and Beida Mt. (902) to N.W. of port is conspicuous.

Breakwater is visible on radar at 15 miles but difficult to make out visually until very close too on account of haze. A radio beacon not marked on BA. 3327 is listed and operating as per ALRS Vol. 2.

Fairway Buoy is number "O" and named "Ghannouche" it is a tall red pillar buoy, its permanent position as per the alterations on BA. 372.

Channel buoys have been altered and are best seen from the changes to BA. 372. Pilot reports that all have new moorings and should be considered reasonably reliable. They are lifted about every 4 months, one at a time, so the official numbers as changes to BA. 372 do not always correspond to the actual number.

Anchorage: For large vessels about 1.0 – 1.5 miles East of Fairway Buoy and for small vessels to East of No. 2 buoy. Good holding ground.

Wind: The prevailing wind is from the East and is strongest during Winter months. Due to the harbour being open to the East a swell carries into the harbour making berthing and working of small vessels impossible at times.

V.H.F.: Call 'Gabes Port' on Channel 16, range limited (12 miles). English reasonable.

Berthing: No berthing if wind force over 4 to 5 and no unberthing over 3 to 4. Largest ship to use port 'Galconda' (LPG) gross 34,893 tonnes and deepest draft ship 'Hampshire' (LPG) gross 32,060 tonnes draft 11.2 m.

Channel: Minimum depth Chart Datum found to be 11.0 m. (36 ft.) plus 0.8 m. MHWN and 2.2 m. MHWS.

Liable to silting. Official depth is 41 ft. (12.5 m.) but last dredged 1974.

Pilot reports little current in channel, but reports suggest cross current can be encountered particularly near breakwaters. Channel dredged in box shape.

Pilot: Two Pilots employed by National Port Authority. Only senior Pilot handles large vessels. Good English spoken.

No berthing/unberthing of large vessels at night. Sunset to Sunrise only. Boards from black hulled 10 m. launch with white upperworks. Pilot ladder about 1 m. above water. Prefers gangway if weather suitable. Boards outside fairway buoy.

Tugs: Only one Port Authority tug of 1,200 h.p. with suspect towing hook. In November 1980 this tug was under repair and a Greek Construction Co. tug was being hired for port use as necessary. This tug (800 h.p.) would not work on a Sunday. When berthing, tug pushes; when unberthing, tug takes ship's line from starboard quarter. Pilot reports second tug in design stage.

Berthing/Moorings: All berths port side to.

Fertilizer/Ammonia/Phosphoric Acid Berth – Berth head in.

Sulphur and Grain berths – berth head North.

Vessels on all berths moored close together. Three large and 1 small vessel can moor on Sulphur/Grain berths.

Good back springs essential at all berths.

Moorings: 3, 2, 2. Forward head lines go to quay ahead of Ammonia berth, mooring boat used. On Ammonia berth our bow was about 3 m. off stern of vessel immediately ahead and at right angles to us.

Berths: Ammonia berth of concrete trestle construction with bollards and fenders on concrete projections proud of quay face. All other berths solid concrete construction.

Ammonia berth about 250 m. in length and 13.2 m. C.D. minimum. Other berths reported to be 10.5 m. alongside.

Density: 1029. (3 visits) May, July and November. Good fendering on all berths.

Cargo: Anhydrous Ammonia: Intake for fertiliser plant about 10,000 tonnes per month.

Loading/Discharge: Discharge rate varies but maximum claimed to be 350 t.p.h., in practice this has been 220, 177 and 233 t.p.h. over three visits with back pressure of 8.5 to 9.5 bars. No vapour return line. Two×4 in. flexible pipes join onto common manifold union with 8 in. coupling of odd size. The plant has a spool piece to fit standard 150 ASA connection on ships. Shore labour assists with connection.

For large LPG/NH3 carriers it is necessary to berth as far up quay face as it is safe to do so in order to be able to connect pipes. On this vessel the after end of gangway must be past travelling shiploader stowage position on quay. Generally 2 ship pumps are required. Shore tank capacity 9,800 tonnes.

Same berth is used for loading Ammonia Phosphate for export at about 30,000 tonnes per year and Phosphoric acid in liquid form at 60,000 tonnes per year.

Travelling shiploader for Ammonia Phosphate loads at 800 t.p.h.

The Sulphur berths nearest to Ammonia berth have 2 discharge cranes/gantry. The Grain berth at the Northern end is worked by ship's gear. Both these are import berths. Sulphur berth direct into fertiliser plant. It is planned to export Nitric acid in the near future.

Gangway: Can be turned out on all berths prior to berthing even though it seems due to shiploaders vessel cannot.

Communications: At Ammonia berth after connection there is little English spoken by personnel ashore. Two watchmen always onboard.

N.O.R.: Tender on arrival to SAEP GABES, accepted alongside berth.

Surveyor: SGS/Redwood in attendance. Does not always appear on arrival.

General: Fresh water available from quay, but salty. If fuel required go to Sfax. Personnel reliefs quite easy through Djerba. Direct flights to Frankfurt 3 times per week. Baggage may go missing. Road and rail communication with Tunis, Sousse and Djerba. STD International telephones. Holiday resort at Djerba.

Authorities: Immigration board first to check International Health Declaration and Vaccination List. If all in order 'Q' flag is pulled down – Quarantine Pratique granted and Customs and Agent can board. Port Health/Immigration: require all Cholera Certificates up to date, if not Port Health will carry out inoculation on board the ship.

Customs currency control is rigid – all currencies must be declared and all Tunisian currency drawn and not used handed back on departure. Bars are particularly subject to inspection. Customs also very carefully check Bars stocks, if any discrepancies a fine is levied.

Customs conduct cabin searches for undeclared articles. Master's safe is checked together with dangerous drugs which must be properly declared, every single item and amount of each. Personnel going ashore take their Discharge Books to main gate where a shore pass is issued and Discharge Book collected on return.

Papers required: 3 Copies Personal Effects Declaration (Make sure Jewellery is declared).
3 Copies Personal Currency Lists.
2 Stores Lists.
2 Drugs Lists.
2 Bond Lists.
2 Vaccination Lists.
6 Cargo Declaration Lists.

Chandler: Fresh provisions available and seem good and prices reasonable. Cable ahead for chandler as normally does not work at weekends.

Agent: Societe Tunisiene De Transit D'Agencies Et De Transports. Cable: STTAT GABES.

Have office just outside main gate. Good English and generally helpful and obliging. Crew transfers conducted without difficulty. Can telephone STD from office.

Developments: On North side of Harbour general cargo berths are being constructed. The retaining breakwater has been completed and the berth concrete caissons are being placed in position for completion 1982.

AUTHORITY: La Direction du Port de Gabes, Gabes and L'Office des Ports Nationaux, La Goulette.

LA GOULETTE (Including Tunis): 36.49 N. 10.18 E.

DOCUMENTS:

Required by Police:
2 Crew Lists.
2 Passenger Lists.

Required by Customs:
1 Crew List.
2 Passenger Lists.
2 Crew Manifests.

Required by Port Health:
1 Crew List.
1 Passenger List.

PILOTAGE: To call Pilot contact Goulette Radio station, call sign 3VW, 24 hour watch on 2182 kc/s. or VHF Channel 16. Pilot boats are in permanent direct contact with Goulette Radio. International code visual and sound pilot signals may be used on arrival at the sea buoy.

Pilot launches are stationed inside the port, and proceed on call to meet vessels about 0.25 mile beyond the sea buoy, i.e. the buoy No. 1 in the entrance channel to the port.

ANCHORAGE: Anchorages in the port roads are safe except during strong winds and heavy seas from the North or N.E.; good holding ground.

Larger vessels anchor about 0.5 miles N.E. of the sea buoy in depths of 12 – 14 m. Small vessels may anchor either North or South of the approach channel in depths of 7 – 9 m. in the vicinity of buoys Nos. 4 and 5 provided that they do not obstruct navigation in the entrance channel.

RESTRICTIONS: Tankers and ore carriers are not allowed to enter and leave port during the hours of darkness. Depth of water at low water is 32 ft.

MAX. SIZE: *La Goulette:* Up to max. draft 32 ft. Max. length 200 m. *Tunis:* Up to max. draft 21 ft. 6 in.

HEALTH: Master is required to complete Declaration of Health on arrival. Vessels which have previously called at another Tunisian port are given automatic free pratique except in time of epidemic.

RADIO: Tunis Radio 24 hour watch on 2182 kc/s, radio-telephone watch from 0600 to 2200 hrs. on 500 kc/s. Goulette Radio call sign 3VW 24 hour watch on 2182 kc/s. and VHF Channel 16.

TUGS: Are available to assist berthing as directed by the Pilot. Tugs join vessels in the vicinity of buoys Nos. 4 and 6, that is 400 or 500 m. from the berths. Vessels lines always used.

BERTHING: *La Goulette:* one ore berth, unloading rate 2,000 t.p.h.

STEVEDORES: Gangs are ordered before 0600 hrs. for morning work; before 1300 hrs. for the afternoon and before 2000 hrs. for night work.

MEDICAL: Preferable to advise Agent in advance if doctor required on board. Crew members should possess international vaccination certificates.

TANKERS: One berth is reserved for tankers with a max. draft of 27 ft. 6 in.

FRESH WATER: Hydrants are situated on the quays supplying fresh water at a rate of 12 – 15 cu.m.p.h. A water barge of 50 tons capacity can supply vessels at anchor.

FIRE PRECAUTIONS: A watchman has to be permanently employed on board tankers when alongside. A tug equipped with fire-fighting equipment is required to stand by tankers discharging.

GANGWAY/DECK WATCHMEN: The employment of gangway watchmen is necessary.

OPENING/CLOSING HATCHES: Are performed by ship's crew .

CUSTOMS ALLOWANCE: Each crewman is allowed two packets of cigarettes or 4 cigars or 50 gm. of tobacco and one opened bottle of alcohol.

CONSULS: Following countries are represented in Tunisia:
Algeria
Australia
Denmark
France
Great Britain
Greece
Italy
Morocco
Norway
Panama
U.S.A.
Venezuela

REPAIRS: Machinery and boiler repairs can be effected on board. For large repairs it is necessary to send part to the Shipyards of Soconema at Menzel Bourguiba 70 miles away.

DRY DOCKS: At Menzel Bourguiba 4 dry docks, the largest of which is 253 m. long, 41 m. wide, 10.5 m. depth.

REPATRIATION: Can be arranged.

AIRPORT: Situated 10 km. from the port. Regular daily flights to Europe and N. Africa.

TIME: GMT plus 1 hour. No alterations during the year.

HOLIDAYS: 20th March (Independence Day); 1st May (Labour Day); 25th July (Republic Day); 15th October (Evacuation Day). In addition there are 13 other holidays on which work is carried out on payment of overtime.

POLICE/FIRE/AMBULANCE: Tunis Police, tel. 5389; Goulette Police, tel. 275.028; Fire. 198; Ambulance 260.022.

TELEPHONES: Telephones can be connected on board vessels and are compulsory for tankers.

SHORE LEAVE: Crew members are permitted to go ashore after obtaining a pass from the Port Police.

AUTHORITY: Director of the Port, Office des Ports Nationaux.

LA SKHIRRA (Terminal Platform): 34.18 N. 10.09 E. (See Plan Book)

DOCUMENTS:
5 Crew Lists.
2 Lists of Crew Personal Effects.
2 Stores Lists.
5 Passenger Lists, if passengers carried.
Manifest of cargo on board.
Manifest of cargo in transit.

PILOTAGE: Compulsory for berthing alongside. Pilot employed by TRAPSA. ETA required 48 hours and 24 hours before arrival. Call Pilot by international code signals on arrival, or by VHF Channel 16. TRAPSA will advise if vessel required to anchor, or berth immediately. Pilot boards 2 miles off the terminal by black and white motor launch. If it is necessary (vessel without chart) Pilot will proceed outside the port limits.

ANCHORAGE: Vessels should anchor outside the prohibited zone which is limited to the South by the parallel of Buoy No. 5 and to the East by bearing 350° from the terminal platform light.

MAX. SIZE: Length 300 m. Draft 47 ft. 6 in. or up to 50 ft. at high water.

HEALTH: International Quarantine signals to be shown on arrival. Vessels normally receive free pratique at the quay after berthing. Suspect vessels must wait at anchor until pratique is given.

RADIO: TRAPSA operate coastal station Laskhirra Radio (3VP), vessels to make contact 48 hours before arrival. Messages for TRAPSA passed by other stations should be addressed Rapetrol Laskhirra.

VHF: The harbour office and loading terminal are equipped with VHF on the following channels: 156.8 Mc/s (calling), 156.6 Mc/s., 156.7 Mc/s., 156.55 Mc/s. Contact with tugs can be made on all 4 channels.

TUGS: Two tugs 1,500 h.p. each, normally used for berthing. Lines provided by tugs.

BERTHING: Two loading berths situated one each side of terminal platform connected by a gangway from the shore. For safe manoeuvring tankers are recommended to arrive with ballast up to 30% of summer deadweight. Mooring may need to be doubled during months of December to April, when sudden violent squalls sometimes occur. A vessel alongside requiring tug assistance may sound one long blast at frequent short intervals.

Depth alongside loading berths is 15 to 16 m. Loading platform is served by three 30 in. oil pipe-lines and 1 × 24 in. and 1 × 18 in. ballast

lines. Each berth equipped with four 12 in. flexible hoses. Max. loading rate 12,000 cu.m. per hour.
MEDICAL: Advance notice required of any medical assistance needed. Hospital facilities available. Crew members require valid vaccination certificates.
BALLAST: All ballast, except permanent, to be pumped to shore installation. Heavy fines for water pollution. Max. rate 6,000 cu.m. per hour.
FRESH WATER: Not available.
FUEL: Not available.
CUSTOMS ALLOWANCE: 2 packets cigarettes allowed each Crew member. No alcohol allowed.
CONSULS: Following countries are represented at Sfax: France, Sweden, Great Britain, Netherlands and Italy.
REPAIRS: There are no facilities for repairs. Nearest at Sfax.
REPATRIATION: Can be arranged.
AIRPORT: Nearest at Tunis 350 km. away.
TIME: GMT plus 1 hour all year round.
SHORE LEAVE: Not allowed in Trapsa installation. Can be arranged through Agent.
AUTHORITY: T.R.A.P.S.A.

SFAX: 34.44 N. 10.46 E.

DOCUMENTS: Within 24 hours of arrival Masters must submit a written declaration giving the name of ship and of the Master, Owner or Charterer, vessel's tonnage, draft, cargo, port of origin and destination, number of crew on board. Also required:
Customs Manifest.
Crew List for Police.
List of Dangerous Cargo.
Health Declaration.
PILOTAGE: Compulsory for all vessels over 100 gross tons. Pilotage commences at the outer buoys of the entrance channel. Day signals for Pilot, International Code Signal "P.T" or Code flag "S" hoisted alone or below code pennant. Night signals according to International rules. For entry at night, vessels must radio Harbour Master at the latest 1 hour before sunset to confirm their intention. Before boarding, Pilot will check that vessel does not exceed the max. authorised draft. If the "Entry Prohibited" signal is not hoisted at the port signal mast, vessel may await Pilot in the channel axis about 1 mile off the outer buoys. Pilot boards from a launch 11 m. long, displaying international pilot signals. Pilot may be contacted by radio through Radio Port de Sfax. Agent must give advance notice of vessels arrival to Harbour Master 24 or 48 hours beforehand.
ANCHORAGE: In immediate vicinity of the port, depths up to 15 m., good holding ground.
MAX. SIZE: Length 192 m., beam 26 m., draft 33 ft.
HEALTH: To request free pratique, hoist "Q" flag on arrival, or radio to Port Health Service. Pratique normally given at the berth after mooring. Suspect vessels are required to wait at anchor until pratique is given.
RADIO: Sfax. Port Call—call sign 3VW2, operating from 05.00-09.00 and 15.00-19.00 hrs. GMT.
Calling frequency 2182 kc/s., working frequency 1743 kc/s. CR3. Used only for communications with port services. Meteorological information provided on request.
TUGS: Join vessel at outer buoys or according to circumstances in the outer port.
BERTHING: N.E. Quay 820 m. long phosphate berth.
West Quay 150 m. long phosphate berth.
Petrol Pier 105 m. long Max. size: length 180 m., draft 33 ft.
Salicole Pier salt loading berth.
STEVEDORES: Available, arranged by Agent basis vessel's ETA.
MEDICAL: Advance notice preferred if medical attention required. Hospital facilities available. Vaccination certificates required for all crew.
DENSITY: 1025.
FRESH WATER: Hydrants fitted on all quays. Written request for replenishing water is required by Harbour Master.
FUEL: Available by barge.
GANGWAY/DECK WATCHMEN: Normally ship's crew. Available from shore if required.
OPENING/CLOSING HATCHES: Normally performed by crew.
IDENTIFICATION CARDS: Required by all crew.
CONSULS: Local representatives for France, Great Britain, Netherlands, Norway, Sweden, Denmark, Spain, Italy, Greece, Portugal and Belgium.
REPAIRS: Small engine repairs can be effected. Floating dock for vessels less than 350 tons.
REPATRIATION: Can be arranged.
AIRPORT: There is an airfield 7 km. from the city. No regular services.
TIME: GMT plus 1 hour.
HOLIDAYS: 1st January; 18th January; Aid El Kebir; Hegirian New Year; 20th March; 9th April; 1st May; Mouled; 1st and 2nd June; 25th July; 3rd August; 13th August; 3rd September; 15th October; Aid Es Seghir.
POLICE: Tel. 21-700.
SHORE LEAVE: Allowed.
DEVELOPMENTS: Entrance channel to be widened to 60 m. Dredging to 12.50 m. of channel and principal quays. These projects are under study.
SHIPMASTER'S REPORT: 1976.
Documents:
1 General Declaration.
2 Stores Lists.
3 Crew Lists.
1 List of Dangerous Cargo.
1 Health Declaration.
Pilotage: To be contacted on VHF Channel 16, between 0600 – 1000 hrs. local time and between 1600 – 2000 hrs. local time. Also Harbour Master may be contacted at the same hours on Channel 16. At other times the same Authorities may be contacted by radio 2182 kc/s.

My vessel had a draft of 26 ft. By the VHF the Harbour Master ordered me to enter the channel and continue up to the Outer Basin where a Pilot would embark on the Port side.

It was later confirmed both by the Pilot and Agent to be usual for ships up to 10,000 tons to enter the outer Basin without Pilot. Also upon our departure, the Pilot disembarked at the outer harbour Basin.

The Agent told me the channel was 34 ft. deep. Although no measurements have been taken for 10 years. Lately a ship with draft of 33 ft. has passed through the channel without any difficulties.

An unmarked wreck is situated in position 34° 37.5′ N., 10° 49.5′ E. The best way to approach the outer channel from S.W. or South, would therefore be to navigate to a position 6.5 miles S.E. of Tina's Lt. Tr., then change course for the outer buoys of channel.

The only Beacons illuminated around Kerkenah Banks were Beacon No. "1" and No. "8". All other buoys were in correct position, but extinguished.
Stevedores: Work in shifts from 0700 hrs. till 1300 hrs. and from 1400 hrs. till 2000 hrs. In case of sailing it is possible to arrange overtime up to 2100 hrs. It is also possible to have night gangs from 2100 hrs. till 0300 hrs.
AUTHORITY: Direction du Port de Sfax.

SOUSSE (Suza): 35.50 N. 10.38 E.

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
4 Crew Personal Effects Lists.
Health Declaration.
Manifest of Provisions on Board.
2 copies vessel's particular declaration.
PILOTAGE: Contact pilot station on VHF Channel 16 or Tel. 03.20.401.
RESTRICTIONS: Entrance to the port coming from the sea is East to West. Channel 820 m. long, dredged to 10.5 m. Depth in port area 7.80 m., height of tide 0.40 m.
MAX. SIZE: Max. LOA. 170 m.
HEALTH: Free pratique normally given at the quays after mooring. Pratique is automatic for vessels coming from another Tunisian port. In case of suspected disease on board vessel will be ordered to quarantine anchorage.
RADIO: Sousse Control "3VW4" 2182 kHz.
TUGS: One tug of 1,200 h.p.
BERTHING: One basin for ocean-going ships, yacht basin and fishing vessel harbour.
Length of quays 830 m. 8 berths.
South Basin Quay, length 140 m., dredged to 9.5 m.
CRANES: 1×18 tons and 2×10 tons.
STEVEDORES: Minimum of 24 hours advance notice of ETA to Agent is required.
MEDICAL: Doctor available to board vessel. Hospital, private clinics and all facilities available.
REPAIRS: No facilities.
GANGWAY/DECK WATCHMEN: It is recommended to employ shore watchmen.
OPENING/CLOSING HATCHES: Carried out by stevedores at the request of Masters.
CUSTOMS ALLOWANCE: Each crew member is allowed 1 carton of cigarettes and 1 opened bottle of wine or spirits. In case of a prolonged stay in port, Customs may renew these quantities.
IDENTIFICATION CARDS: Crew member's identification cards will be collected by the Immigration service and exchanged for shore passes while vessel is in port.
TIME: GMT plus 1 hour all year round.
HOLIDAYS: There are 17 days official holiday during the year. Work can be carried out on all holidays except 1st May on payment of 100% overtime.
AIRPORT: Skanes Monastir – 13 km. from the port.
AUTHORITY: Direction du Port.

Turkey

GENERAL:

On arrival off Canakkale, coming from the Aegean, or off Buyukdere, coming from the Black Sea, ships must stop for sanitary inspection. However, tankers with a d.w.t. over 100,000 tons proceeding to the Gulf of Izmit to discharge or load petroleum products may obtain pratique there without stopping at Canakkale, provided Agents are notified 96 hours in advance.

In the event of bad weather at Canak, vessels may be allowed to continue their voyage to Istanbul and undergo the sanitary inspection there. Permission to do so is notified to them by the Canak Sanitary Office with the signal "H.M." in daytime and three vertical lights (green, white, green) at night.

Pilotage through the Dardanelles and the Bosphorus is not compulsory. Pilot stations, equipped with VHF operating on Channel 16, are located at Canakkale, Istanbul and Telli Tabia (Upper Bosphorus).

Turkish Flag: All foreign ships are required to fly Turkish flag during their stay in Turkish ports or when passing through the Straits (Dardanelles and Bosphorus).

Sanitary and Port Inspections: On arrival at a Turkish port, every ship is boarded by a Sanitary Officer fo examination. Nobody may join or leave the ship before this inspection is completed.

The ship must produce the following documents:

Sanitary Declaration Form.
Deratisation Certificate.
Ship's Register.
Load-line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Cargo Ship Safety Construction Certificate.

Police Customs Controls: After obtaining free sanitary pratique, the ship must likewise produce:

(1) 3 Crew Lists together with every member's passport, discharge book or Z-card.
(2) 1 List of Provisions, Stores and Bunkers.
(3) 1 Declaration of all Monies or cheques carried in the ship's safe.
(4) Manifests of all cargo on board, whether for discharge at Turkish or foreign ports.
(5) 1 List of Passengers landing in Istanbul showing nationality, number, date and source of entrance visa (if such visa is required) together with the passports.
(6) 1 List of Transit Passengers together with the passports.

Documents covered by items 1, 2, 3, 4 and 6 as well as a list of passengers embarking at Istanbul are also required on departure.

Police and Customs Controls are effected at Istanbul when arriving from the Aegean and at Buyukdere when arriving from the Black Sea. However, vessels under 500 n.r.t. have to undergo control formalities at Canakkale, both inwards and outwards, apart from those to be effected at Istanbul. It is recommended to prepare the accommodation ladder to facilitate the boarding of officials.

Excepting the case of tourist vessels, the Customs Officers will seal stocks of provisions and tobacco, spirits, as well as any other items in bond. Sufficient quantities of the foregoing will be left unsealed for the needs of the ship during the stay in port.

If stores left unsealed are exhausted while a ship is in port, a request to the Customs Officers will ensure further withdrawal.

The seals must not be broken before the ship's exit from territorial waters or if sailing from one Turkish port to another Turkish port.

Special Rules for the Passage of the Bosphorus: Art. 35 of the "International Regulations for Preventing Collisions at Sea" does not apply to ships navigating in the Bosphorus. Ships proceeding up the Bosphorus must keep to the European side, and coming down must keep to the Asiatic side of the mid-stream; that is to say they must always keep to the left in so far as is consistent with safety.

During their passage through the Bosphorus, ships must regulate their speed, without exceeding the 10 knot limit over the bottom, so that piers, landing stages, etc., or other craft (sailing and rowing boats, etc.) may not be damaged by their wash. Further, they must take care not to hinder fishing and diving operations or to damage submarine telephone, telegraph or electric cables.

Sound Signals, Wireless Sets: It is forbidden to make use of sirens or steam whistles in the harbour, except for manoeuvring purposes as laid down in the regulations for the avoidance of collisions.

Wireless transmitters are not sealed on arrival of a vessel but it is recommended that their use in Turkish territorial waters be restricted to cases of emergency.

Refuse: No refuse such as garbage, ashes, polluted oil and the like can be thrown or pumped overboard, nor any scraping, cleaning of tanks and/or bilges can be effected inside port limits.

SHIPMASTER'S REPORT: 1978.
For outward clearance through the Dardanelles vessel has to produce: 1 Crew List, 1 Stores List, 1 Manifest and Customs Clearance.

SHIPMASTER'S REPORT: 1978.
Procedures for entering Dardanelles:
Send ETA to Agent at Istanbul and pilot station Mehmetoik 24 hours in advance or if sailing from Piraeus via Agent at Piraeus stating ETA Mehmetoik Bornu for Dardanelles and Bosphorus Pilot.

Approaching Dardanelles all communication with pilot station was on VHF Channel 14. Keep to South side (Kum Kale Bornu). Pilot ladder starboard side 3 ft. from the water.

When Pilot boards and vessel proceeds to Canakkale where Catering Officer boards the health launch via the accommodation ladder.

Requirements: Nett Tonnage; Gross tonnage; Last Port; Next Port; Cargo; Amount and type; One crew list with vaccination dates; De-rat certificate to be sighted; Ship's register sighted.

Other information: In consultation with Pilot; ETA Istanbul; ETA Buyukdere.

Pilot disembarks at Kavak Bornu but slows passing Buyukdere where sub-Agents launch comes alongside and passes aboard a small information sheet which requires ETA next port. It is 3.5 miles from where Pilot disembarks to the entrance to the Black Sea and extreme care has to be taken due to the multitude of fishing vessels which are working across the entrance to the Bosphorus in a zone clearly marked on the chart 6 miles by 4 miles which the caption reads "No fishing allowed". Due to other vessels disembarking Pilots, and also having to negotiate path through the itinerant fishing boats one is strongly advised to proceed at slow speed until approximately 2 miles clear on the mouth of the Bosphorus.

In the Dardanelles starboard hand rule applies but in the Bosphorus a local left hand rule applies. This is in order to aid the Southbound traffic to have the benefit of the continuous Southbound current which runs 1.5 to 3 knots depending on the time of the year.

The passage through the Dardanelles was approximately 3 hours and the passage through the Bosphorus was 2 hours. The same Pilot makes the complete transit, spoke good English and was very competent. Engines were on standby for the whole transit which was approximately 13 hours and for a period through the Sea of Marmara for 5 hours we were on full speed with 1 hour's notice. The narrows at Canakkale and passing Istanbul are two points which have to be navigated with extreme caution due to ships passing on bends and crossing ferries. The entrances at each end are also congested points and have to be navigated with caution.

It states in the Pilot Book (Volume 24 – The Black Sea Pilot) that Pilotage is not compulsory in the Dardanelles or the Bosphorus. This is a misnomer and in my opinion should be totally disregarded for practical purposes. Nowhere in the Pilot Book does it mention the fact that vessels taking a Pilot off Memetcik Bornu should keep to the South side of the entrance. This is important as the outgoing traffic which is mainly Russian have no Pilots and keep to the Northern side of the Dardanelles which is on their starboard hand. The Pilot informed me that they accept the fact that their pilot station is situated on the wrong side of the channel for inward bound vessels and their launch will make its way across to the South side where inside of Kum Bornu there is room to wait if a vessel finds no Pilot immediately available (not to anchor). Pilot station will give instructions on the approach of a vessel. Vessels proceeding South disembark their Pilots off Mehmetoik pilot station which presents no problem as it is on the starboard side of the channel.

SHIPMASTER'S REPORT: November 1979.
Dardanelles and Bosphorus:
Vessel bound for Odessa with a full cargo of corn. According to charterer's orders (Sovfracht Moscow), vessel had to encounter four to five weeks on anchor at Odessa Roads and for this reason had to take sufficient fresh water at Ahirkapi Roads on the West side of the Bosphorus.

The quantity (and quality) had to be ordered three days prior to arrival through Charterer's Agent (Bumeran) in Istanbul. Two days' notice and 24 hour notice were required.

The vessel also wished to make crew changes at the same time as taking water and this was arranged by husbandry Agent (Rammoc, Istanbul).

Vessel took a Pilot all through the Dardanelles and Bosphorus and he boarded at Mehmetoik (Mehmetcek) Point.

When passing Canakkale, vessel slowed down and an officer had to go down into the Sanitary Inspector's motorboat.

In addition to the sanitary boat another motorboat arrived, bringing the sub-Agent of the vessel's Istanbul husbandry Agent. The sub-Agent passed a message for Master with the latest information for Ahirkapi Roads to the ship's officer after vessel having received free pratique from the sanitary officer. This sub-Agent is acting for several Istanbul Agents, the address is as following:

Denizciler Shipping Agents, Isfendiyar Anafarta & Co., Carsi Cad. 10, Canakkale. P.O.B. 5, Canakkale. Cables: 'Denizciler'. Telephone: 1032-1878 after hours – 1055. Telex: 58128 dzck tr.

The information from the sub-Agent also included the kind and number of forms and lists required at Istanbul.

Lists and forms required by the Sanitary Control at Canakkale: Certificate of Registry, Deratisation Certificate (or exemption certificate), One Health Declaration, two Crew Lists and name of Agent in Istanbul.

Immediately upon letting go anchor in Ahirkapi Roads the motor launch with the Turkish Authorities arrived, some minutes later the Agent's boat arrived with the new crew members and some spare parts.

The Authorities required the following forms and lists:

Certificate of Registry.
Tonnage Certificate.
Loadline Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Transit Cargo Manifest.
3 Currency Lists of vessel's safe.
2 Personnel Effects Lists (Not officially required, but taken because at hand).
3 Stores Lists/Provisions.
3 Crew Lists.

There was no report of inspection, etc., given to the vessel by the Authorities and *no* written outgoing clearance was issued. When asking for an outgoing clearance, the officials stated it was *not* necessary in this case.

No special lists of crew changes were required.

The Pilot left at Ahirkapi Roads because the time for taking fresh water was expected to be five to six hours (60 m.t.p.h.)

One hour after arrival the waterboat arrived and the vessel took fresh water (drinkable quality!) as per order.

Half an hour before finishing pumping, Istanbul Pilots were called on

VHF Channel 16. The Pilot arrived on schedule and the vessel continued the voyage to Odessa.

On approaching Ahirkapi Roads from the West care has to be taken of numerous fishing boats and sand/gravel digging barges.

SHIPMASTER'S REPORT: October 1980.
Dardanelles and Bosphorus:
Dardanelles:
Pilotage: Optional, highly desirable Northbound due to the Sanitary Station at Canakkale. Southbound dependent on weather. Cable: 'Canakkale Pilot Station' 48 hours if possible in advance to be sure of obtaining Pilot. At present Pilots are in short supply due to an increase in traffic.

One Pilot for Dardanelles and Bosphorus.

Boards from grey hulled launch of about 8 knots speed from Sebbulbahir on Northern entrance.

VHF: Call 'Mehmetcik Pilots' on Channels 16 and 14.

Generally starboard side ladder or gangway.

Pilot gives Master form to fill in for Canakkale.

Control: Sanitary Control at Canakkale on Asian side of strait near narrows about 1 hour after Pilot boarding.

Two launches come out. One Agent, one Immigration.

Require: 2 Crew Lists, sight Ship's Register and Derat. Certificate. Officer has to go down to Immigration launch, no one boards.

Immigration Officer gives ship yellow form which is required to be shown next port.

Control only Northbound whether coming from overseas or a Turkish port.

Navigation: Forecastle manned at Canakkale.

In fine weather, Straits present no problems, but in poor weather and visibility it can be more difficult especially at Canakkale with other ships around where the vessel is nearly stopped. Also the narrows can be dangerous.

Pilots like maximum sea speed which is not possible.

Vessel passed through the narrows on manoeuvring speed.

Current S.W. flowing at 1 – 2 knots.

Transit takes about 3 hours, dependant on weather and delay at Canakkale.

Pilot hands over 'Control' at Inceburun, and takes over Southbound at the same place.

Sea of Marmaria: Good positions obtainable. Ship carries out navigation, no Pilot. Very busy but most traffic, apart from ferries and small craft, on straight course from Bosphorus through to Dardanelles and vice versa.

Keeping well to starboard is advisable.

Transit about 6 hours.

Bosphorus:
Pilotage: Optional. However overseas Masters should only attempt transit on their own in extreme cases.

If coming from the Dardanelles, Pilot takes over at 'Yesilkoy' or joins by launch at position South of Athirkapi Point. From the North (Black Sea) Pilot boards (and disembarks) at Tellitalya Point just below Kavak (about 4 miles South of Rumeli Point, the Western entrance to the strait).

Wait North of Rumeli Point until Pilot available. By the Montreux Agreement governing international transit of Dardanelles and Bosphorus, which will be renegotiated in 1982, pilotage will become compulsory.

Cable: 'Kavak' pilot station minimum of 6 hours notice. Generally boards starboard side (and disembarks). Pilot gives Master form to fill in for control.

Control: At Buyukdere North and South about 20 minutes from pilot station.

Control requires: 2 Crew Lists, sights Ship's Register and De-Rat.

Yellow Immigration form given to Master. An officer has to go down into launch. Two launches. Agent and Sanitary Inspector.

Navigation: No transit in fog. Forecastle manned for anchoring all transit. As per BA. 1198, International Rules change to port side of channel.

Probably the highest traffic density international waterway without compulsory pilotage and control in the world. Extreme vigilance is required on account of ferries, small boats, ships not under pilotage, strong currents, etc.

Transit time about 2 hours.

Signal Station: At Kavak on Asian bank just North of pilot station. Aldis lamp required.

Currents: Generally a 2 – 5 knot Southerly current, this can be pushed down by strong Southerly wind at Southern entrance at Istanbul.

Pilots advise that in these conditions transit for large bulk type ships is very hazardous on account of steering. Caution must be exercised in picking the Pilot up Southbound at Kavak due to Southerly current building up ship's speed.

ALIAGA: 38.50 N. 26.57 E. (See Plan Book)

Aliaga Refinery Terminal.
LOCATION: *Northern Point:* Lat. 38° 50′ N., Long. 26° 57′ 36″ E.
Southern Point: Lat. 38° 50′ 10″ N., Long. 26° 46′ 33″ E.
DOCUMENTS: See "Izmir".
PILOTAGE: Pilot boards 2 to 3 miles West of Tasli Burnu Light.
ANCHORAGE: The port itself is situated about 40 miles N.N.W. of Izmir on the Southern arm of the Gulf of Candarli and the anchorage is considered safe for large ships.
RESTRICTIONS: Water depth at entrance about 14 fathoms. Water depth at crude oil wharf 17-18 m.
MAX. SIZE: Crude oil berth designed for up to 100,000 d.w.t. Products berth designed for up to 40,000 d.w.t.
HEALTH: *Customs:* Customs post at refinery.
Immigration: None locally. Incoming and outgoing personnel have to be processed at Izmir and escorted under guard to and fro.
Health: No office locally. Officials have to be brought from Izmir.
RADIO: Cable address of Aliaga Refinery: "Petrol Izmir".

Four days prior arrival, Agents require notice of ETA (time and date) followed by any subsequent change.
TUGS: Two 2,400 h.p. tugs are on order. Meanwhile tug can be obtained, if free, from Port Monopoly Izmir at additional cost. Mooring boat also on order, meanwhile local boat available for hire.
BERTHING: Incoming tankers discharge at a "T" type oil jetty just South of Tasli Burnu Light. The jetty runs parallel to the coastline and is situated 39° 49′ 30″ N. 26° 57′ 30″ E. approximately. The outer arm of the jetty, 317 m. long, is designed for crude oil tankers of 75/100,000 d.w.t. on the outer side and for tankers of 25,000 d.w.t. on the inner. The outer S.E. arm is designed for products tankers of up to 22,000 d.w.t. and the inner berth for small tankers of up to 5,000 d.w.t.

The crude oil berth is roughly in the centre of the N.W. arm and has 4 loading arms. The jetty is protected by 4 pivotal concrete buffers.

The products berth is similarly in the centre of the arm and is equipped with flexible hoses. Crude oil pumping rate up to about 3,000 t.p.h.
FRESH WATER: Available.
FUEL: Available.
AIRPORT: Izmir is not an international airport and cargo is nearly always transhipped leading to unforeseen delays.
SUPPLIES: From local towns; adequate fresh fruit and vegetables and meat.
AUTHORITY: See "Izmir".
AGENT: See "Izmir".

BANDIRMA: 40.22 N. 27.59 E. (See Plan Book)

Port under construction.
BREAKWATERS: North Breakwater length 995 m. and West Breakwater length 250 m.
TUGS: 1 tug 970 h.p. and 1 tug 250 h.p. 2 mooring boats also available.
BERTHING: Berths with the following lengths and depths will be available on completion of construction.

Berth	*Length* (m.)	*Depth* (m.)
Ferry Terminal	130.00	8.25
1 Berth	324.00	10.00
1 Berth	130.00	10.00
Deep Water Berth	250.00	12.00
1 Berth	129.35	10.00
Cevher Rihtimi	203.77	10.00
Etibank Rihtimi	100.00	10.00
Komur Rihtimi	190.00	10.00
Etibank Rihtimi	182.22	10.00
Etibank Rihtimi	79.88	10.00
Etibank Rihtimi	180.00	8.25

Additional facilities with depths of 4.0 m. are available.

Cargo operations are affected by ships own gear.

Loading/discharging capacity per hold in 8 hours is of 100/150 tons for bulk, 70/100 tons for bale and 40/60 tons for mixed cargo.
FRESH WATER: Available. Rate 25 t.p.h.
SHIP'S OFFICER'S REPORT: August 1979.
Port Limits: From position 40° 21.8′ N. 27° 56.9′ E., South to shore and East to shore.
Documents: 6 Crew Lists, remainder as for Istanbul.
Pilotage: Pilotage is carried out day and night. There are 2 Pilots at the port and one Pilot is always on duty. The standard of pilotage is good. The Pilot joins the vessel outside (0.5 mile) the breakwater from a boat which has a black hull with white superstructure. The approaches to Bandirma are clear and free from obstructions. The pilot station has no VHF and Pilots should be ordered through the Agent. If the Pilot does not meet the ship on arrival he can be called by sounding the ship's whistle. Vessels awaiting Pilots anchored 2.5 cables off the breakwater.
Anchorages: Good anchorage in 30 m. 0.5 miles North of North breakwater light.
Restrictions: The only restriction that is known is max. draft 12 m.
Max. Size: Max. depth alongside 12 m.
Health: See "Istanbul".
Radio: Contact made through Istanbul Radio, TAH.
VHF: None.
Radar: None.
Tugs: There are 2 tugs available of 1,000 h.p. and 300 h.p., no VHF. Ship's lines are used.
Berthing: Vessels usually use 1 anchor when going alongside.
Cranes: There are at present no shore cranes available but installation is being carried out and shore cranes should be available from March 1980.
Bulk Cargo Facilities: No specialised equipment available, bulk cargo is loaded using ship's gear from skips carried on trucks. The average loading rate is 250 tons per shift/gang.
Stevedores: Shippers or receivers order stevedores 1 day in advance through the local union. The number of gangs available depends on the number of ships in port. The normal working hours are from 0800 – 2200 hrs. with 1 hour for lunch. The average loading rate for all bulk cargoes is 250 tons gang/shift.
Medical: Advance notice for serious cases advisable. Hospital and doctors available.
Tankers: No facilities.
Density: 1016.
Fresh Water: At present only available by 5 ton road tanker at a cost of $5 per ton. Fresh water should be available by pipe-line to all berths by March 1980.

Fuel: Not available.
Consuls: None.
Repairs: Only small repairs carried out in local workshops.
Dry Docks: None.
Surveyors: Nearest in Istanbul.
Gangway/Deck Watchmen: Carried out by ship's crew, service of watchman not required.
Hatches: Opening and closing carried out by ship's crew.
Customs Allowances: 200 cigarettes and 1 bottle on arrival. If the ship is in port for any length of time Customs will open the bond and make a new issue, usually once a week.
Cargo Gear: All cargo work carried out by ship's gear.
Repatriation: Carried out without any problems, a daily ferry connects Bandirma with Istanbul, taking about 4 hours.
Airport: Nearest is Istanbul.
Time: GMT plus 2 hours, GMT and 3 hours in Summertime.
Holidays: See "Istanbul".
Police/Ambulance/Fire: Police 3345. Ambulance 3536. Fire 1013.
Telephones: Not available.
Services: No special services are available.
Shore Leave: No restrictions.
Identification Cards: No shore passes issued, seaman's book is sufficient.
Regulations: No special regulations.
Delays: The only delays occur if the port is congested and ships have to wait at anchor. Ships are berthed on "first come first served" basis.
Developments: Bandirma is a new port and is not scheduled for official opening until March 1980, by this date all shore facilities should be available.
General: The prevailing wind is from the N.E. and this sometimes blows very hard down Bandirma Korfezi, this should be considered when mooring.
AUTHORITY: TCDD Liman Mudurlugu, Bandirma.

AGENT: See "Istanbul".

CANAKKALE: 40.08 N. 26.24 E.

DOCUMENTS: Vessels in transit through the Dardanelles must stop at Canakkale and produce following documents to boarding Officer.
Certificate of Registry.
Deratisation Certificate.
Crew List.
Name of Agent in Istanbul.
Vessels proceeding to a Turkish port will require in addition:
4 Crew Lists.
2 Personal Effects Lists.
2 Currency Lists.
2 Stores Lists.
PILOTAGE: Not compulsory for vessels proceeding to Istanbul. Compulsory for vessels over 1,500 g.r.t. proceeding to Canakkale. Vessels requiring a Pilot use International Code signals, or signal "G" by light or whistle. No advance notice required. Telegraphic address of pilot station, Kilavuzluk Canakkale, via radio station TAM 7. Pilot boards off Khepez lighthouse, where vessel should slow down but no need to anchor. In bad weather pilot boat will anchor in Gulf of Kilya.

Also see "Shipmaster's Report".
ANCHORAGE: Vessels may anchor in position 40° 9′ 00″ N., 26° 23′ 09″ E. in depths of 12 to 16 fathoms.
MAX. SIZE: Vessels of any size may navigate Canakkale Strait.
HEALTH: All vessels bound for a Turkish port must stop for Sanitary Clearance at Canakkale. Any suspected disease on board must be declared. Sick crew members may be landed for hospitalisation.

Also see "Shipmaster's Report".
RADIO: Radio station TAM 7 situated at local Post Office.
TUGS: One tug available, belonging to pilot station. Ship's tow lines always used.
BERTHING: Agents require at least 24 hours notice to arrange berthing at Canakkale Pier. Vessel may be required to shift anchorage to give place to Turkish passenger vessels which have priority.
STEVEDORES: Arranged by Agent on basis of Master's ETA.
MEDICAL: 12 hours notice required to arrange medical assistance. Hospital facilities available.
DENSITY: Salt water. No tide.
FRESH WATER: Only available from the pier, rate approx. 10 t.p.h.
FUEL: Marine grades not available.
GANGWAY/DECK WATCHMEN: Customs guard compulsory for vessels at the pier.
OPENING/CLOSING HATCHES: May be operated by crew or stevedores according to Charter Party.
CUSTOMS ALLOWANCE: Crew allowed to retain only quantities for personal consumption.
IDENTIFICATION CARDS: Required for crew members going ashore.
CONSULS: Italy, tel. 1008.
REPAIRS: Minor repairs can be effected.
REPATRIATION: Can be arranged if visa requirements are satisfactory.
AIRPORT: Situated 2 km. from Canakkale, internal services only.
TIME: GMT plus 2 hours, Summertime GMT plus 3 hours.
HOLIDAYS: Cargo work can be arranged on all holidays by agreement.
POLICE/FIRE/AMBULANCE: Police Tel. 1181; Fire 00; Ambulance 1098.
SHORE LEAVE: Allowed at all times.
DEVELOPMENTS: New installations and berths under construction.
SHIPMASTER'S REPORT: *Dardanelles and Bosphorus:* A pilot station has been established at Mehmetcik Point (Cape Helles); if the weather is too bad to embark the Pilot here, vessels should proceed to Canakkale. If a Pilot is required for both Dardanelles and Bosphorus, give 24 hours' notice through Istanbul Agent. Same Pilot remains on board for full transit, Sea of Marmara included, and this applies for both North and Southbound traffic. Pilots at Dardanelles and Bosphorus work VHF Channel 16.

Sanitary Control: White launch. Officers do not board but require Chief or 2nd Officer to go down into boat. Canakkale required Ship's register, Derat, Crew List and Quarantine Declaration of Health. It is also required to fill in a form giving details of ship, cargo, last port, number of crew and passengers, etc., also name of ship's Agent in Turkey.
AUTHORITY: Canakkale Liman Baskanligi.

AGENT: See "Istanbul".

DERINCE: 40.45 N. 29.49 E.

PILOTAGE: Pilotage in the Gulf of Izmit is compulsory for foreign flag vessels. The Izmit Gulf Pilot will disembark at harbour limits. Harbour Pilot also compulsory for all foreign flag vessels.
ANCHORAGE: Suitable anchorage at harbour entrance.
TUGS: Two tugs are available, 970 h.p. each.
BERTHING: Pier length 207 m., depths alongside vary from 5 m. up to 7.35 m.
BULK HANDLING FACILITIES: Two silos with storage capacity 5,000 tons each. Loading capacity 160 t.p.h., discharging capacity 120 t.p.h.
SHIPMASTER'S REPORT: Fresh water available in small quantities from fire engines but expensive.
AUTHORITY: General Directorate of Turkish State Railways.

AGENT: See "Istanbul".

EREGLI (Karadeniz Eregli), including Usunkum: 41.18 N. 31.27 E. (See Plan Book)

DOCUMENTS:
5 Crew Lists.
5 Passenger Lists.
3 Provisions Lists, including Bonded Stores.
3 Cargo Manifests.
3 sets Bills of Lading.
PILOTAGE: Pilotage available night and day for use in port under all weather conditions. Pilotage is carried out by qualified and experienced Pilots.

Compulsory for ships over 500 tons to have pilot service, and for ships over 1,000 gross tons to have pilot and tug-boat service.

Ships will take Pilots on board at a reasonable distance off the breakwater's red light. It is strongly advised that ships awaiting Pilot should avoid drifting South of the transit line of the green light on the breakwater ruin (Boshane Mendiregi) and the Citadel ruin which can be seen on top of the hill. (Transit direction is approximately 041° true.) The distance from the entrance of the port to the dock is approximately 4.6 cables, and the depth gradually decreases from 10 fathoms to 5 fathoms at the dock side.

In stormy weather, if the Pilots are unable to board, ships will proceed to a point in the Inner Port enabling the Pilots to board.
ANCHORAGE: Vessel waiting Pilot may anchor about 1 mile West of breakwater red light. The bottom of the port is muddy and sandy, and therefore ships can lay at anchor in any weather without fear of drifting.
RESTRICTIONS: *Eregli:* The depth of water in Outer Harbour is 15 m. (49.2 ft.) and Inner Harbour has 10 m. (35 ft.)

Usunkum: The length of Usunkum breakwater is 1,250 m. The depth of water is 42 ft. Under normal weather conditions ships up to 34 ft. (inclusive) can enter into the Inner Harbour and berth alongside the dock safely. Average tide is about 1 ft. The width of channel is 200 m. but safe lane is 144 m. wide.
MAX. SIZE: *Eregli:* Under normal weather conditions ships up to 35 ft. draft can enter Inner Harbour and dock safely.

Usunkum: Up to 34 ft. draft can be berthed.
Also see "Developments".
HEALTH: Pratique given after port doctor's visit on vessel's arrival. Crew vaccination certificates should be presented if required. Sanitary certificate required for any live animals on board.
RADIO: Istanbul Radio, TAH.
TUGS: Available. Normally join vessel outside the breakwater. Ships lines always used. Towing is done by one or two 600 h.p. diesel tugs. Towage is required for entering, leaving, berthing and shifting according to the size of the ship. Ships having a draft of over 20 ft. shall not use their own propellers in the Inner Harbour except in case of danger or absolute necessity.

Vessels with a draft greater than 30 ft. may be asked by the Port Authority to use a second tug at a very high cost.
BERTHING: *Eregli:* Inner quay is about 400 m. long for general cargo and 135 m. for coal loading.

The normal depth alongside quay is 30 ft. The docks have loading and unloading facilities, a railway track and open and closed warehouses at a very short distance. The railroad is a local system and is not connected to the Turkish railroad network. It has a length of approximately 16 km. for coal mine operations.

Buoys: There are four mooring buoys in the port 105 m. apart and at a distance of 170 m. from the breakwater at an average depth of 8 fathoms, buoys anchored with 50 tons concrete blocks and marked I, II, III and IV starting from the main breakwater head.

It is possible and safe to moor to the buoys with or without anchor and to moor to the breakwater by the stern (if the ship's length is adequate).

Usunkum: Usunkum has one loadout dock of about 280 m. length and one ore unloading dock about 220 m. length. Max. size 35,000 d.w.t. Max. draft 35 ft. Max. LOA 665 ft. Discharge rate 600 t.p.h. Coal also discharged, rate 600 t.p.h. also one small general-purpose quay for small ships.

See "Developments".

STEVEDORES: At least 24 hours notice required to order gangs.
MEDICAL: All details of any medical assistance required to be given to Agent with one hours notice. Hospital facilities available. Vaccinations can be arranged.
FRESH WATER: Can be delivered at 40 t.p.h.
REPAIRS: Small repairs such as lathing, levelling, welding, blacksmith work and woodwork can be effected ashore.
OPENING/CLOSING HATCHES: By either stevedores or crew according to Charter Party.
CUSTOMS ALLOWANCE: 200 grams tobacco and two bottles wine/spirits allowed each man per week.
IDENTIFICATION CARDS: Needed for crew going ashore.
CONSULS: No local representatives.
REPATRIATION: No facilities exist.
TIME: GMT plus 2 hours, Summertime GMT plus 3 hours.
HOLIDAYS: Cargo work can be arranged on all holidays.
POLICE/FIRE/AMBULANCE: Police tel. 28; Fire tel. 00; Ambulance tel. 500.
TELEPHONES: Cannot be connected on board.
SHORE LEAVE: Crew permitted to go ashore at all times.
DEVELOPMENTS: The channel at Usunkum is being dredged to 14 m. and the inner harbour to 13 m. It will be possible to berth vessels up to 60,000 d.w.t. in the near future.
AUTHORITY: Karadeniz Eregli Liman Baskanligi.

GEMLIK: 40.25 N. 29.06 E. **(See Plan Book)**

SHIPMASTER'S REPORT: July 1980.

VESSEL: L.P.G. Carrier – 32,000 g.r.t. vessel discharged ammonia.
FORMALITIES: Formalities were dealt with quickly. Bonded stores are sealed and remain sealed until clearing outward from last Turkish port. Application may be made to open under customs control and these applications were granted.

Travelling manifests of cargo and ship's stores are made up and accompany the vessel from port to port.

Papers required:

2 Stores Lists.
6 Copies Cargo Manifest.
6 Crew Lists.
2 Vaccination List.
1 List of Monies in ship's safe.
2 Health Declarations (including the clearance from Canakkale).
2 Lists of Ports of Call.
2 Crew Declarations.
3 Crew Currency Declarations.
2 Ship Particulars.

APPROACHES: Chart BA. 1005.

The inset on Chart BA. 844 does not quite cover the area in which the berth is situated. (Position of Ammonia section of quay – 40° 25′ N., 29° 06.5′ E.).

The approach itself presents no difficulty since good fixes are available both by radar and visually. Similarly, although care is needed, an approach may be made in poor visibility with complete confidence.

Fishing vessels, inter-island ferries and local trading craft must be expected through the island passages and fishing vessels will be met within Gemlik Liman. Some of these craft are very small although sea conditions are invariably smooth and they should show up well on the radar. Not all carry lights.

An anchorage position as near as 4 cables from the berth may be used although this should be chosen to Eastwards of the berth to keep the departure path clear for any vessels leaving.

The Pilot obtained for the Dardanelles passage, who will leave here however short a stay, will be able to give advice on choosing a suitable anchorage, should this be necessary.

PILOTAGE: The Pilot may be summoned by whistle and will board from a small, open fishing craft. Gangway or pilot ladder must be lowered to the water's edge.

No night time berthing. Unberthing may be carried out at night at the Master's discretion and presents no difficulty. The starboard anchor may be used for berthing (not on this call) and is used to heave the vessel off when leaving.

Unberthing is a long manoeuvre; 2 forward back-springs are lead as far astern as possible, the vessel hove astern about 30 m. (to ensure that the bow does not fall inside the line of the quay and foul the 'bridge' to the forward mooring dolphin), everything let go aft, hard to port and dead slow ahead on the engine until the vessel is at an angle of 45°. The vessel is then backed out, after which the Pilot leaves.

VHF: Not available.
TUGS: None available.
BERTHING: Vessel always berths port side alongside.

The berth consists of a large, substantial concrete structure, with large fenders standing proud of the main jetty. There is a berth for dry cargo vessels at the Eastern end and a vessel lying here may cause some problems when letting go.

When in position for the chicksan, the bow overshoots the jetty and provision is made for the forward mooring ropes to be taken to a large dolphin.

The gangway may be turned out prior to berthing.

Draft alongside 12.5 m.; there is a shoal reported astern which causes the Pilot much anguish on unberthing.

DENSITY: Varies, 1020 in December 1979. 1016 this call.
DISCHARGING: 2 chicksans; liquid line 10 in., vapour 8 in., both 150 ASA. Shore personnel make the connections.

Communications with personnel difficult due to language problems, but they appear to be familiar with procedure. Discharge rates: December 1979 – 640 t.p.h., July 1980 – 502 t.p.h.

Shore surveyor attended and his figures are taken as quantity discharged. No gauging of shore tanks. As in December 1979, this surveyor attended the vessel at subsequent Turkish ports.

FRESH WATER: Not available alongside but may be supplied by barge.
FUEL: Not available alongside but may be supplied by barge.
REPAIRS: No facilities.
SURVEYORS: With sufficient notice Lloyd's Surveyor may be ordered from Istanbul.
DOCTOR: Available, but has to travel a long distance.
REPATRIATION: Crew may leave and join vessel, however transport to Istanbul poses a problem.
SERVICES: Ship chandler available.

SHIPMASTER'S REPORT: September 1980.

The following is an update on the report above.
FORMALITIES: Customs officer stays onboard whilst vessel is in port.

Travelling manifests of cargo and ship's stores to be made up and accompany the vessel from port to port. For Cargo Manifests I use the U.S. Customs Declaration of Cargo Form with the U.S. Seal blanked out, authorities had no objection.

PILOTAGE: If vessel requires an outward Pilot through the Dardanelles remember to order in good time, 12 hours minimum order time is required, especially when the vessels stay in port is short.

There is 1 Pilot who is also the 'Lloyds' sub-Agent in Gemlik and is generally a useful person to know.

When unberthing make sure the Port anchor is home otherwise it will foul the quay.

BERTHING: Gangway may be turned out prior to berthing.

The quay consists of 2 berths, the Eastern berth for loading bulk or bagged fertilizer has 2 loading booms. This berth if it has another vessel on it may well cause some problems on leaving the Western berth which is the liquid ammonia facility. When the vessel is in position with the liquid chicksan, the bow overshoots the jetty and provision is made for the forward mooring ropes to be taken to a large dolphin, connected to the main quay by a catwalk with a *wooden* walkway.

Berths are very good being of large, substantial concrete structure with good fendering.

Minimum draft alongside 12.6 m.

There is an 8 m. patch at the Eastern end of the fertilizer berth which causes the Pilot problems.

Density varies: 1020 – December 1979, 1016 – July 1980, 1019 – September 1980.

DISCHARGING: 2 chicksans, liquid line 10 in., vapour line 10 in., both 150 ASA, both can be used for either liquid or vapour so be careful when connecting.

Discharge rates vary: December 1979 – 640 t.p.h.; July 1980 – 502 t.p.h.; September 1980 – 800 t.p.h., they can take it at over 1,000 t.p.h. depending on shore tank ullages.

2 shore tanks of 4,000 tonnes capacity each.

Fertiliser plant usage of raw ammonia presently 400 tonnes per day increasing in January 1981 to 600 tonnes per day. The actual production of ammonia is expected to commence in about five years time.

Shore surveyor attended and his figures taken as quantity discharged. Attends the vessel at subsequent Turkish ports by flying between ports, not allowed to stay with vessel. Very helpful. No gauging of shore tanks.

GENERAL: No fresh water and no fuel. Both available at great expense if brought from Istanbul or Izmit by barge or tank lorry.

All communications are dealt with by head office in Istanbul and then passed to Izmit thence by car to Gemlik which has no Telex.

Telephone to U.K. about 2 hour wait for connection, line clear.

Cables: Watship Izmit or sub-Agent: 'Kinay' Gemlik. For urgent messages. Cable address should be prefixed by the Turkish word 'Yildirim' – all ports.

Personnel repatriation is a problem due to the distance from Istanbul and the fact that the immigration post is not in Gemlik.

Chandler: Agent does the chandlering, good vegetables available September 1980, payment in cash only.
Doctor: Available at Bursa about 30 km. (30 minutes).
Dentist: In Gemlik, near Agents office.
Shopping: Best in Bursa about 30 minutes South of Gemlik along new dual carriageway. Agent will arrange transport. An hourly bus service runs from the plant into Gemlik. Curfew in operation midnight to 0500 hours.

SHIPMASTER'S REPORT: November 1980.

The following is an update on the September 1980 report above.
Berthing: If weather suitable berthing now undertaken at night. We eventually berthed at night in calm conditions with small coaster on fertilizer berth without any difficulties, proceed slowly. Unberthing at night.
Discharge: Very keen on correct discharge temperature.

Use forward liquid line, aft vapour line.

Shore tanks hold 40,000 tonnes total (20,000 tonnes each), not as previously quoted.

Fresh Water: Available but not potable.

At L400 per tonne (1.90 pounds). A fire tender is used as a pump at chicksan. I believe it is well water.

GIRESUN (Kerasunda): 40.56 N. 38.24 E. **(See Plan Book)**

PORT LIMITS: The Port of Giresun is the sea area contained in the inner part of the imaginary lines which joins 40° 56′ 40″ N., 38° 19′ 40″ E. and 40° 54′ 51″ N., 38° 26′ 10″ E., Aksu River mouth and the point 2,778 m. (1.5 miles) away from this mouth in an 019° true direction with the 40° 56′ 15″ N., 38° 27′ 00″ E. and 40° 55′ 10″ N., 38° 19′ 40″ E. Gure River mouth and the point 2,778 m. (1.5 miles) away in the true North direction.
PILOTAGE: Pilot ordered by Agent who requires 24 hours notice in advance of vessel's arrival. Compulsory for all foreign flag vessels.

Pilot service operates 24 hours a day and vessels may enter and leave at any hour on request.

ANCHORAGE: Good anchorage in Outer Harbour. Vessels should keep the entrance channel clear.

TUGS: Compulsory for all foreign flag vessels.

BERTHING: The port of Giresun is composed of 2 parts. These are the inner harbour and the outer harbour.

(a) The inner harbour is the sea area contained in the inner side of the line which joins the light at the end of the main breakwater with the light at the end of the auxiliary breakwater.

(b) The outer harbour is that part of the sea which remains between the port boundary and the inner harbour boundary.

The Inner Harbour

The berthing, tying-up and stern to shore anchoring places for the ships are given below:

A – The passenger quay is reserved for the berthing of passenger ships but when there are no passenger ships, cargo ships may berth here providing the Harbour Authority's permission is obtained. This quay is 150 m. long and the water depth is 8 m.

B – The cargo wharf: This is reserved for cargo ships. It is 250 m. long and the water depth is 7 m.

C – The small craft quay is 135 m. long and the water depth is 3 m. Small tonnage ships are berthed here.

D – Service wharf: This is 88 m. long and the depth of the water is 4 m. The service craft of the Harbour Authority berth here.

E – Providing that they obtain the Harbour Authority's permission, ships waiting their turn to berth may tie-up stern to shore, at the bollards on the main breakwater in such a way as not to impede the traffic.

F – The outer harbour is an unrestricted anchoring area but it is strictly forbidden to anchor or wait at the mouth of the breakwater. Anchoring is unrestricted 315° true North of and 2.5 cables away from the centre of the main breakwater North of the normal anchoring area.

STEVEDORES: Working hours normally 0800 to 1200 and from 1300 to 1700. Four gangs available.

CRANES: Mobile cranes available.

FRESH WATER: Available.

FUEL: Not available.

REPAIRS: No repair facilities.

AUTHORITY: Giresun Port Authority.

GOLLUK: 37.14 N.27.38 E.

DOCUMENTS: The following documents have to be prepared by Masters before arrival:

4 copies of Crew Lists.
2 copies of Store Lists.
1 copy Health Document.
4 copies of Passenger Lists.
3 copies of Customs Documents.
3 copies of Manifests for cargo destined to port.
1 copy of Manifest for all transit cargo aboard.

N.B. Ship's particulars Form is to be filled by Masters upon arrival and remitted to the Port Authorities.

RESTRICTIONS: Golluk is a well-protected natural harbour, not affected by winds from any direction. Deep water approaches to pier.

PILOTAGE: Pilot unavailable.

HEALTH: Vessels to show their Sanitary Certificate if available aboard and also their Registry. Presentation also of Vaccination Certificate of all the crew, if required by Sanitary Officials. Pratique is necessary on arrival even if vessel has called at another port in the same country. Sanitary Certificate is required for live animals aboard.

RADIO: Izmir radio station, call letters TAN2. Istanbul radio station, call letters TAH.

TUGS: Not available.

BERTHING: One pier 170 m. long used for handling emery ore in bulk. Depths alongside 39 ft. shelving to 20 ft. at 90 m. from seaward end.

CUSTOMS ALLOWANCE: 50 cigarettes for each member of crew going ashore. Aboard the vessel each member of the crew is permitted to have one carton out of Bond. One litre wine/spirits for each member of the crew in opened bottle is permitted out of Bond. However, this allowance is to be kept aboard the vessel.

TIME: Local time GMT plus 2 hours, Summertime GMT plus 3 hours.

HOLIDAYS: New Year's Day (from December 31st 1200 hrs. to January 1st 2400 hrs.); National Sovereignty Day (from April 22nd 1200 hrs. to April 23rd 2400 hrs.); Spring Day (1st May), Constitution Day (27th May); Sports Day (19th May); Victory Day (30th August); National Holiday (28th October 1200 hrs. to 30th October 2400 hrs.); Sheker Bayram (3 days movable); Kurban Bayram (4 days, movable).

GOLOVASI, Botas (Ceyhan) Terminal: 36.53 N. 35.56 E. **(See Plan Book)**

PORT LIMITS: The Botas (Ceyhan) Harbour is operated under the Authority of Iskenderun Harbour Master's Office and the harbour area is bounded by the following points:

(a) Point (A) on the shore, Latitude 36° 52′ 12″ N. and Longitude 35° 55′ 07″ E., to point (B) on the sea, Latitude 36° 49′ 30″ N. and Longitude 35° 56′ 40″ E.;

(b) and from point (B) to point (C) Latitude 36° 50′ 30″ N. and Longitude 35° 59′ 30″ E.;

(c) and from point (C) to point (D) on the shore Latitude 36° 53′ 25″ N. and Longitude 35° 56′ 41″ E.;

(d) and the shore line between points (A) and (B).

DOCUMENTS:

Sanitary declaration form
Exemption certificate
Ship's register
Load line certificate
Ship safety construction certificate
Safety radio certificate
Safety equipment certificate
Personnel list
Provisions, stores and bunker lists
Monies or cheques declaration list

PILOTAGE: Pilotage is compulsory for mooring and unmooring. Pilot will meet the ship 1 mile South of the pier in the anchorage zone

It is requested that pilot ladder be of an approved pattern and securely rigged.

ANCHORAGE: In the event of berth not being available on arrival, vessel must anchor in the anchorage zone (To the S.S.E. of the berth beyond the prohibited area). Terminal Shore Control will keep vessel advised of expected time of berthing etc., by means of VHF on Channel 16.

Prohibited Anchorage: Vessels on arrival shall not anchor within a radius of 1 mile from the light at the end of the jetty.

RESTRICTIONS: Berthing and unberthing possible at any time day or night, weather conditions permitting.

MAX SIZE: 300,000 d.w.t. at outer berths and 150,000 d.w.t. at inner berths.

RADIO: It is essential that tankers bound for the Botas Terminal, communicate with their Agent with at least 72 hrs., 48 hrs. and 24 hrs. before arrival and state ETA, cargo required, maximum loading rate, S.W.L. of derrick, manifold measurements and quantity of ballast on board. Vessel should request Agent to forward the information to BOTAS.

VHF: Botas Terminal Shore Control on VHF Channel 16.

Arriving vessels should make contact at least 4 hours before arrival at the anchorage in order to avoid delays.

TUGS: There are 4 tugs available to assist in berthing and unberthing. Three are 2,600 h.p. each and the other 1200 h.p. The tugs are all provided with fire fighting equipment.

BERTHING: Four loading berths available:

Berth No.	*Max. size*	*Depth Alongside*
1 (Outer East)	300,000 d.w.t.	72 ft. – 98 ft.
2 (Outer West)	300,000 d.w.t.	72 ft. – 98 ft.
3 (Inner East)	150,000 d.w.t.	66 ft. – 72 ft.
4 (Inner West)	150,000 d.w.t.	66 ft. – 72 ft.

LOADING:

Berth No.	*Max. Ldg. Rate cu.m.p.h*	*Loading Arms*	*Ballast Arms*
1	15,000	4×20 in.	20 in.
2	15,000	4×20 in.	20 in.
3	7,500	4×16 in.	16 in.
4	7,500	4×16 in.	16 in.

Maximum loading rates are dependent upon availability of loading lines on the ship

Terminal Port Operator is the adviser for all mooring, unmooring operations and communications with shore etc.

Derricks and Cranes: Derricks and cranes S.W.L. of (5) tons is recommended.

Loading operations and shore communication: Ship's tanks are inspected by an authorised inspector from Terminal and passed as suitable for loading.

Responsible ship's officer must certify to the Berth Operator that all ship's valves are closed or blanked except those required for loading and water circulation purposes, and that these Rules and Regulations are being and will be observed.

The Berth Operator will not transmit any loading instructions to the shore until the responsible ship's officer is satisfied that the hoses are connected correctly and that all valves have been set for receiving cargo.

Loading rates requested by the vessel or quoted by the Terminal will be the peak or maximum rate at any time during the loading period.

The Port Operator or Terminal Representative will advise the Master of the ship as to shore communication and any signal needed for local requirements.

Ship's crew with an officer in charge will assist in all operations as advised by the Port Operator or Berth Operator. This includes lifting, connecting, disconnecting, lowering of hoses and tending moorings.

Lighting: Manifold and mooring areas should be adequately lit to enable night mooring and loading operations to be carried out with safety. Sea area around the ship to be illuminated.

Notice of Readiness: Notice of readiness will be received by the Port Operator who is the Botas Representative. Provided the vessel is ready to load, lay time will commence in 6 hours after receipt of Notice of Readiness.

Deck Watch: A responsible ship's officer shall be on watch on board at a point near the ship's tanks which are receiving oil during the process of loading and NOTICE IS HEREBY GIVEN that the Terminal Representative have received instructions to stop loading immediately whenever this rule is disregarded.

Capable members of the ship's crew shall be stationed by the ship's tank valves which are receiving oil during the process of loading.

All pipe-lines and hoses shall, while rigged for loading crude oil be directly and continuously under supervision. No crude oil shall be allowed to escape or overflow.

BALLAST: Vessels should arrive with sufficient ballast for safe handling of vessel under prevailing weather conditions.

Vessels shall not discharge into the waters of the port any part of the content of their cargo, sloop, or ballast tanks or bilges which is liable to pollute these waters.

Ballast water must be declared and signed by the Master and delivered to the Terminal to this effect. Vessel's scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard.

It is an offence to discharge dirty ballast or pump out bilges.

MEDICAL: Master to inform Agent by cable if urgent medical assistance is required upon arrival, also indicating, if possible, seriousness of case in order that adequate steps may be taken. Hospital and doctor are available at Ceyhan 25 kms., Adana 75 kms., and Iskenderun 65 kms., distance from Botas (Ceyhan) Terminal

DENSITY: Salinity about 39 p.p.m.

FRESH WATER: Available at jetty. Rate 25 t.p.h. Arrangements to be made through Agent.

FUEL: Not available.

CONSULS: There are no Consuls at the port.

REPAIRS: Not possible.

SURVEYORS: There are no classification societies at the port.

GANGWAY/DECK WATCHMEN: There is no watchmen service.

CUSTOMS ALLOWANCES: 40 cigarettes for each crew member going ashore. On board the vessel each crew member may hold 200 cigarettes and 1 open bottle wine/spirits out of bond.

AIRPORT: Adana Airport, served only by domestic lines with routes to Istanbul and Ankara. Airport is situated 75 kms, from Botas (Ceyhan) Terminal. Twice daily service to international airport at Istanbul.

TIME: GMT plus 3 hours in Summer time, GMT plus 2 hours in Winter time.

HOLIDAYS: New Year's Day (from December 31st, 1200 hrs., to January 1st, 2400 hrs.), National Sovereignty Day (from April 22nd, 1200 hrs. to April 23rd, 2400 hrs.), Spring Day (May 1st), Constitution Day (May 27th), Sports Day (May 19th), Victory Day (August 30th), National Holiday from October 28th to October 30th, 2400 hrs.), Shakear Bairam (3 days movable), Kurban Bairam (4 days movable).

POLICE/AMBULANCE/FIRE: All information given after berthing.

TELEPHONES: Cannot be connected on board.

SERVICES: There are no special services.

SHORE LEAVE: Crew permitted to go ashore.

IDENTIFICATION CARDS: Seamen's book is sufficient.

REGULATIONS: In addition to Harbour Regulations all ship Masters are at all times responsible for the application of all safety precautions as prescribed in the international oil tanker and terminal safety guide.

GENERAL: The main engines of all vessels while at the berth shall be kept ready for immediate use. Deck power (steam) is to be maintained at all times and water pressure shall be maintained on the fire fighting system.

Repairs which may prevent the working of the vessel's main engines may only be undertaken in the Port with the written permission of Botas Representative.

The Master shall at all times retain on board sufficient crew to work the vessel.

No craft, other than one having on board the Pilot or Port Health Officer, may approach any vessel entering the Port and no other person may board until Free Pratique has been granted.

Whistle or siren to be available at all times.

Boarding of Vessel: The control of persons boarding vessel is the ship's responsibility. Boarding should be restricted to Botas employees on duty and to persons authorised by the Port Authorities as advised by vessel's Agent.

Stores/Provisions: It is forbidden for provisions or other items to be received or discharged whilst loading is in progress. Launches, other than the Botas's mooring launch, should not lie alongside the vessel.

Tanker Safety: Masters are at all times responsible for the application of all safety precautions as prescribed in the International Oil Tanker and Terminal Safety Guide.

I.O.T.T.S.G. Safety Check List: The tanker safety check list must be completed after inspection of each item prior to commencement of and during loading. The berth operator is authorised to stop all loading operations should he consider that the safety of lives and property is endangered by the infringement of safety rules.

Signals: The following signals must be shown when vessel is in the Port.

By day: Flag "B" of the International Code of Signals. At night: 1 clear red light visible all around.

Fire Fighting Equipment: Vessels must be adequately manned for fire-fighting and vacating the berth in case of an emergency.

The following fire-fighting precautions must be taken.

(a) Fire hoses must be run out fore and aft or monitors ready for use.
(b) Fire-mains must be under pressure.
(c) 1 dry chemical extinguisher must be stationed on either side of the ship's manifold.

Fire Fighting Equipment on each Loading Berth: Equipment is provided for fire fighting on the platforms or exposure protection for the platforms, and the tankers being loaded as follows;

(a) 2 elevated foam/water monitors are mounted on each access tower on the platform capable of delivering 3,550 i.p.m. (800 g.p.m.) of water or foam solution, and has a throw of 60 m. Each monitor is remote controlled from the control room and has flexibility of full horizontal rotation and vertical reflection.
(b) 2 deck level manual water spray monitors of 450 i.p.m. and 2 foam branch pipes of a capacity of 450 i.p.m. of foam delivery used to extinguish fires on the manifolds.
(c) A number of portable dry chemical and CO–2 extinguishers are located in various locations.
(d) Numerous numbers of foam pourers and water spray facilities located under the deck for water surface foam blanketing and fire smothering.
(e) Water curtain facilities are provided on the loading towers to prevent fire spread to and from the berths.

Action in Case of Emergency: In the event of a fire, oil spillage or other emergency on the vessel.

The Emergency and Fire Signal is:
1 or more blasts of the ship's whistle, each blast of not less than 10 seconds duration supplemented by a continuous sounding of general alarm system.

SHIPMASTER'S REPORT: 1978.

Documents: Turkish health form (supplied when vessel boarded), 2 stores lists, 2 crew declarations, 8 crew lists.

Pilotage: Compulsory. Pilot meets ship 1 mile South of the pier at the anchorage zone.

Anchorages: At least 1 mile South of Southern end of jetty.

Restrictions: Max. drafts 72 ft. to 98 ft. at berths 1 and 2 and 66 ft. to 72 ft. at berths 3 and 4.

Max. Size: 300,000 d.w.t.

Health: Free pratique granted at anchorage or when berthed.

Radio: Via Mersin.

VHF: Communicate with Botas Terminal Channel 16 at least 4 hours before arrival. Uses Channel 22 for talking.

Radar: None.

Tugs: 3 of 2,600 h.p. and 1 of 1,200 h.p. All provided with fire fighting equipment.

Berthing: Normally facing Southwards (bow to sea) for emergency purposes.

Cranes: 1 on each berth.

Medical: A doctor is available ashore but vaccinations not possible.

Density: 1025.

Fresh Water: Available at all berths, arranged through Agent.

Fuel: Not available.

Fire Precautions: I.O.T.T.S.G. safety check list is utilised.

Consuls: See "Iskenderun".

Repairs: Repairs to engines alongside may be permitted with written permission from Terminal Management.

Dry Docks: None.

Surveyors: None.

Gangway/Deck Watchmen: Not required.

Customs Allowances: 200 cigarettes and 1 bottle per man.

Repatriation: Possible via Iskenderun and Istanbul.

Time: GMT plus 3 hours in November 1978.

Services: Limited fresh stores available.

Shore Leave: Permitted.

Identification Cards: Shore passes issued.

Mail: To U.K. takes about 5 days. None received due late orders.

General: No large scale B.A. chart available but B.A. 2632 is adequate radar working. A Turkish Chart No. 334 is available. The position we anchored (2.1 miles South of jetty in 35 m.) was thick mud on bottom and good holding ground with wind from North about force 7. At present berthing only during daylight but sailing any time. Each berth is equipped with shore gangway. Dirty ballast can be accepted up to 40,000 tonnes and clean up to 60,000 tonnes at a rate of 4,500 t.p.h. Loading rates up to 20,000 cu.m.p.h. on berths 1 and 2 and up to 10,000 cu.m.p.h. on berths 3 and 4. S.G. about 0.8459 (API 35.78) at 60/60F. with a loading temperature (November) of about 80°F. The oil is Kirkuk blend crude from Iraq. There are facilities for storing about 1,000,000 tonnes. Berths 1 and 2 manifold 6×20 in. with reducers to 16, 18 or 20 in. if required. Berths 3 and 4 manifold sizes 16 in. with reducers to 12, 14 or 16 in. required. Automatic couplings may be used. At berths 3 and 4, 4 hoses can be connected if distance between ship's manifold centres is more than 150 cm. There is a Doppler approach system on jetties but it has not been calibrated. All moorings on quick release hooks and usually head, 2 breast and 2 back spring moorings for 140,000 d.w.t. tankers, same aft. For berthing 2 tugs make fast with their own lines, 1 tug at each end of main deck and 3rd tug stands by. For unberthing 1 tug makes fast to bow and stern with ship's rope (not wires) and 3rd tug stands by. Pilot will not use pilot hoist but requires accommodation ladder when in ballast and disembarks with pilot ladder. 7 Notices of Readiness and dry certificate required by Pilot, 1 of each and 1 ullage report required by Agent. Agent takes ashore certificates of Safety Construction, Safety Equipment, Safety Radio, Loadline and Class. No early departure procedure available and ship stays on berth up to hours after loading awaiting papers. N.O.R. is made out to I.N.O.C. – Bagdhad – Botas – Ceyhan. Pilot requires separate cabin as he acts as Loading Master, also cabin required for 1 Customs official and possibly Agent. Abnormal ship/shore differences appear to be usual as evidenced by the fact that when you handed them a letter of protest they hand you a reply at the same time.

Authority: Botas District Management.

SHIPMASTER'S REPORT: December 1980.

Botas and Toros Gubre Piers:

Approach: Situated in the Gulf of Iskenderun on the N.W. corner of the Gulf. The oil pier, which is the outlet from the "Kirkuk" oilfield in Iraq, is about 5 miles below the head of the Gulf on the Northern shore with the fertilizer pier 2 miles from the Gulf head.

The approach from the S.W. (Mersin direction) or South (Suez Canal) can be made without difficulty as the coast line provides very good fixes.

The lights marked on the piers do not exist. The oil pier light has been broken for six months and the Pilots say it will probably never be fixed, also the fertilizer pier light is not connected to the supply. The oil pier is visible at 24 miles (radar) and is well lighted at night by arc lamps. Generally there are a few anchored tankers lying off.

BA. 2632 is at present the only British chart available. There is a Turkish chart 334 which is considerably better.

VHF: The fertilizer pier has no VHF.

Botas oil pier uses Channels 16, 10, 24 (Duplex).

Channel 24 is used for intercommunication between various installations for transfer of figures. It can also be used to plug into the general telephone system to talk to the Toros fertilizer pier.

Call "Botas Terminal", 24 hour watch. In the early hours of morning no English spoken.

Anchorage: Toros Fertilizer: 1.0 – 1.5 miles S.E. of pier. Good holding.

Botas Oil Terminal: 1.5 – 2 miles S.E. of pier.

Both open to S.W. winds.

Pilot: Botas Pilot serves both terminals. Priority given to Botas.

A total of 6 Pilots are on 24 hour call.

Pilots board in anchorage area from black hulled and brown superstructure launch of about 10 knots.

They will also travel by car to Toros berth in about 15 minutes.

Berthing: Botas: 24 hours a day with wind speeds up to 25 knots.

Toros: Wind speeds up to 15 knots and then only if good forecast.

No berthing from 1 hour before sunset to sunrise. Unberthing throughout 24 hours.

Tugs: Botas fire fighting tugs on 24 hour stand-by, 4 available.

Kort Knozzles: 3 of 2,600 h.p. and 1 of 1,600 h.p.

When berthing push with bow line onboard. When unberthing use ships line which is doubled up.

Botas:	300,000 d.w.t.	– 4 tugs
	150,000 d.w.t.	– 3 tugs
Toros:		– 1 or 2 tugs

Pilot reports that they will operate with wind speeds up to 35 knots with large swell to take vessels off piers. Botas Terminal has priority.

Botas Berths: Nos. 1 and 2 at outer end of pier, No. 1 (East) and No. 2 (West), depths 27 m., loading rate up to 20,000 cu.m.p.h.

Nos. 3 and 4 at inner end of pier, No. 3 (East) and No. 4 (West), depths 18 – 19 m., loading rate up to 10,000 cu.m.p.h.

Weather: By observations and Pilots advice a low pressure to the North causes a large S.W. swell which coupled with a S.W. wind makes the Toros berth very dangerous.

N.W. winds up to force 6 cause no real problems as the berth is in the shelter of the hills and the swell is not apparent. With N.W. winds on the Botas berth, the Pilot says it can cause problems due to the berth not having much shelter.

During the Summer months, often strong S.W. winds are common between 1100 hrs. to 1500 hrs. each day, which in the Pilot's opinion could make the Toros berth untenable.

Forecast: The local television gives a weather report. Rome Nato, if on time, is the only area forecast in English. Watch the barometer.

Toros Berths: Discharge only at present.

Berth head out. Bulk – Port side too on West side. Liquid – Starboard side too on East side.

Extends about 0.5 miles from shore, the berthing section lying in a 194° – 014° direction. Liquid side in position 36° 54.60′ N., 35° 59.04′ E.

Both berths designed for max. of 30,000 d.w.t.

Bulk berth has 5 tonne grab crane. Liquid side Chiksan.

Depths each berth min. 12.5 m.

Mooring/Fenders: Toros: This can be a problem, and is dependant on length of vessel, particularly aft as the mooring dolphins do not go far enough astern.

As far as possible a 4, 2, 3 arrangement is required. With a swell, expect to part moorings, we parted six lines. Two good mooring boats from Botas Terminal used.

Fenders are 4 large flat plastic/steel faces on sprung rubber compresses. Unfortunately for a long vessel they are set too close together and need to be another 10 m. in each direction to give good coverage.

Jetty Dimensions/Gangways: Toros: Liquid side: Jetty face is 18 m. long and 9 m. above MLW.

Bulk side: 120 m. face and 7.5 m. above MLW.

For gangway purposes this means that on the bulk side the gangway can be used as long as the ship is not small.

On the liquid side a straight "B.O.T." type gangway will be necessary to land on the small pipe platform.

Discharge: Toros: Bulk side: 5 tonne capacity travelling grab crane which discharges into conveyor belt to the plant.

3 shifts of 8 hours worked, total 24 hours.

Liquid Ammonia: 6 in. Chiksan into 6 in. main line and 2 in. cooling line. Connection 6 in. 150 ASA – spool piece 12 in. – 6 in. provided. Shore labour connects/disconnects.

Sulphuric Acid: Connection on jetty of 10 in. 300 ASA.

Phosphoric Acid: Connection on jetty of 8 in. 150 ASA.

Lines South to North: Ammonia, Sulphuric Acid, Phosphoric Acid.

Ammonia is discharged into a refrigerated tank of 7,332 cu.m. equal to about 5,000 tonnes at a rate of 140 t.p.h.

The 6 in. loading line cascades into the top of the tank NOT bottom, therefore pressure problems can result.

Tank served by two Malcon compressors and usual condensers.

Sulphuric Acid tank is 3,420 cu.m.

Phosphoric Acid tanks (2) total 8,500 cu.m.

Air draught Ammonia about 18 m. maximum.

Air draught Acids length of ship's hoses.

It is proposed to import about 10,000 tonnes Ammonia per month and 12,000 tonnes Phosphoric Acid per month, plus small quantities Sulphuric Acid.

Bulk commodities are Urea and Potassium Chloride.

Water: From metered pipe at about 10 t.p.h. Water hard but potable. Price $3.97 per tonne. Pipe on liquid platform. Ship's hoses.

Agent: Agent comes from Iskenderun about 30 miles away.

Communications: At the time of our visit to Toros Gubre there were no telephones. The nearest centre is the Botas Oil Terminal about 3 miles away.

Chandler: From Iskenderun, very good, low prices, obliging.

Local produce, vegetables, salads and fruit which is wide ranging in Spring. End of Summer, August and September not so good.

All in kgs. Stores alongside, chandler provides labour.

December 1980: Vegetables $1 kg., fruit $2 kg., salad $1.50 kg., cheese (good) $3.00 kg. in tins of 25 kg.

To be paid for in cash drawn from Agent.

N.O.R.: Tendered in usual manner on anchoring, accepted as that time unless weather prevents berthing.

Customs: For Botas Terminal, reside in complex.

For Toros Terminal, Customs come from Iskenderun with Agent, which results in delay when clearing vessel outwards on completion.

Two Customs Officials reside on board – cabin required.

Money: If vessel coasting around Turkish ports money drawn at one Agency can not be deposited at another Agency in final port unless Customs clearance given from original port.

Personnel Changes: Nearest airport in Turkey is at Andana about 1 hour from Ceyhan Berths, but if waiting for ship have to stay in Iskenderun about 2 hours from airport.

Personnel travelling are advised to have Istanbul Agents Office and home telephone numbers.

The Agent says it is easier to fly direct to Damascus about 3 hours taxi ride from Iskenderun but he cannot meet personnel and clearance at Syrian border has to be done on ones own.

Note: (December 1980): It is not expected that the plant will be in full production until mid-1981, the pier being used for material imports and production going to a wide area of S.E. Turkey and Iraq.

AUTHORITY: Iskenderun Liman Baskanligi.

AGENT: See "Iskenderun".

ISKENDERUN: 36.35 N. 36.10 E. (See Plan Book)

DOCUMENTS:

5 Crew Lists.
4 Passenger Lists.
2 copies Transit Cargo Manifest.
3 copies Inward Cargo Manifest, of which one must be legalised by Turkish Consulate at loading port. If no consulate existing same to be certified by local Customs Officer or Authorities.
1 set Bills of Lading.
2 copies Cargo Stowage Plans.
Health Documents.
2 Stores Lists.
Ship's Certificates.

PILOTAGE: Compulsory. Ordered by Agent on basis of Master's ETA. International Code signals used to call Pilot who boards at harbour entrance. 2 pilot boats available.

ANCHORAGE: Safe anchorage in open roadstead at 0.5 to 0.75 mile from shore. Vessels over 30,000 d.w.t. work cargo at anchorage using ship's gear to lighters and pontoons. Vessels loading/discharging to lighter should anchor as close as possible to harbour entrance but not less than 800 m. from the pier.

MAX. SIZE: At anchorage, no limitations. Alongside pier, length 166 m., draft up to 30 ft. Also see "Tankers".

HEALTH: Pratique obtained on arrival. Master required to show vessel's Health Declaration and Certificate of Registry. Crew vaccination certificates to be produced if required. Sanitary certificate required if live animals on board.

RADIO: Istanbul Radio, call sign TAH. Izmir Radio, call sign TAN2.

TUGS: 4 tugs available of 300, 700, 970, and 1,200 h.p. respectively.

BERTHING: Jetty 509 m. long can accommodate 2 large vessels and several small vessels simultaneously.

Berth No. 1 at jetty head, 48 m. length, 35 ft. depth.
Berth No. 2, South side, 166 m. length, 28 – 32 ft. depth.
Berth Nos. 3 and 4, suitable only for tugs and small vessels.
Berth No. 5, North side, 166 m. length, 29 – 34 ft. depth.

Due to shelving depths vessels of 20,000 to 30,000 d.w.t. berth partly alongside and lighten cargo then shift once or twice further in.

The T.M.O. have a silo of 20,000 tons capacity which can deliver up to 300 t.p.h. Loading capacity of ore, 200 t.p.h. Unloading capacity for coal, 150 t.p.h.

Inner Port, used only by pontoons, lighters and tugs.

Priority given to Army, food relief and passenger ships.

STEVEDORES: 2 consecutive shifts of 8 hours each day. At anchor, approximately 100 tons can be handled each shift, for general cargo. Baled cargo, 125 tons per shift. Bagged cargo, 150 tons per shift.

Gangs secured by Agent through the Port Monopoly, 24 hours prior arrival.

MEDICAL: Master to inform Agent by cable if urgent medical assistance required on arrival, also indicating, if possible, seriousness of case in order to take adequate steps.

TANKERS: Two buoy mooring berths operated by Mobil Oil and Petrol Ofisi, suitable for vessels up to 50,000 d.w.t.

No slop reception facilities.

FRESH WATER: Supplied only by barge, 2 available each of 250 tons capacity.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Services of watchmen recommended. 3 shifts of 8 hours each. Extra tariff for Sundays and holidays.

OPENING/CLOSING HATCHES: May be opened/closed by ship's crew. May be performed by stevedores at tariff rates.

CUSTOMS ALLOWANCE: 50 cigarettes for each man going ashore. On board the vessel each man may hold 200 cigarettes and 1 open bottle wine/spirits out of bond.

IDENTIFICATION CARDS: Seamen's Book is sufficient.

CONSULS: Vice-consulates of Sweden, Norway, Netherlands, France, Greece, Italy and Iran.

REPAIRS: Welding and other minor types of repairs are possible.

REPATRIATION: Can be arranged.

AIRPORT: Adana Airport, served only by domestic lines with routes to Beirut and Istanbul. Airport situated 140 km. from Iskenderun. Twice daily service to international airport at Istanbul.

POLICE/AMBULANCE/FIRE: Police 1044; Ambulance 1443; Fire 1000.

TIME: GMT plus 2 hours, Summertime GMT plus 3 hours.

HOLIDAYS: New Year's Day (commencing 1200 hrs. Dec. 31st); National Sovereignty Day (April 23rd, half day April 22nd); Spring Day (May 1st); Constitution Day (May 27th); Sports Day (May 19th); Victory Day (August 30th); October 28th (half day); October 29th and 30th; Sheker Bayram (3 days, movable); Kurban Bayram (4 days, movable).

SHIPMASTER'S REPORT: Customs and health clearance is performed at anchor outside the port. Vessels should anchor about 0.5 miles North of the landing stage in the main part of the town. All Officials and Agents arrive by boat and when clearance is given the Pilot comes out. Vessels with cargo for the chemical works at Sariseki (3.5 miles North of the main port) the procedure is the same except that a Pilot is not required.

Customs, Immigration, and Health Officials require 4 crew lists on arrival. The Agent will require 2 more crew lists prior to the vessel's departure for clearance with the Harbour Master. On departure the vessel will anchor off again while outward clearance is obtained.

Summer time is in operation all over Turkey from 1st April until 30th September each year.

AUTHORITY: Harbour Master, Iskenderun.

AGENT: Gulf Agency Co. Ltd., POB 277, Iskenderun. Tel. 1277. Telex 68124. Cables: "GACSHIP" Iskenderun.

ISTANBUL: 41.01 N. 28.58 E.

DOCUMENTS: *Operating Vessels*

5 Crew Lists.
6 Passenger Lists.
3 Stores Lists.
1 Transit Cargo Manifest.
2 Inward Freighted Manifests.
2 Inward Non-freighted Manifests.
Copies of relevant Bills of Lading accompanying Inward Manifests, Ship's Certificates (Deratisation, Tonnage, Safety, Safety Radio, Class or Freeboard).
3 ship's safe money lists. (if there is no money on board, please issue three lists as follows: *There is no money on board).*
Harbour Masters Sailing Permit (which must be exchanged at each Turkish port and kept on board).

Transitting Vessels

Master to present only Tonnage and Deratisation Certificates during Sanitary Control at both Straits (Canakkale and Buyukdere).

PILOTAGE: For both operating and transitting vessels, Pilot secured by the Agent through the Port Monopoly Administration. Master to wire ETA notices 48 and 24 hours prior to arrival. Pilot boarding vessel with service boat hoisting red and white flag. Pilot boarding vessel off Haydarpasa and Seraglio or off Kavak. Pilotage for entering and berthing in harbour areas is compulsory. Pilotage through Bosphorus is optional. All Pilots can be contacted by VHF Channel 16.

Also see "Shipmaster's Report".

ANCHORAGE: Free and safe anchorage in roads off Marmara coast approach to Istanbul. It is however recommended to anchor as near as possible to the harbour. Anchoring at other anchorage areas is subject to special permission via Harbour Master. Good anchorage off Haydarpasa and off Yenikapi, Ahirkapi for large vessels and for smaller vessels there is a good anchorage between Dolmabahce Palace and Kurucesme.

RESTRICTIONS: Ships carrying hazardous cargoes (inflammable, explosives, corrosives, etc.) are not allowed to enter the harbours. Ships can anchor in roads outside the harbour at any time without Pilot. Ships to operate upon arrival at night can enter the harbours with Pilot and with special permission through the Port Monopoly Administration. 48 hours' notice has to be given to the Harbour Master of Istanbul for vessels calling at Istanbul and/or passing in transit through Bosphorus.

Vessels entering the Black Sea must keep to the European side and those leaving the Black Sea must keep to the Asiatic side of the fairway.

MAX. SIZE: No limitation of draft in open roadstead, at anchor. Max. draft in port alongside quay: 10 m. for dry cargo ships. Tankers up to 48 ft. draft can berth at Haramidere oil port.

HEALTH: Sanitary control of both transitting and operating vessels performed at the Straits entrance (Canakkale and Buyukdere). Ships entering from South must slow down at Canakkale and ships arriving from North must slow down at Buyukdere for Sanitary Control. In case of non-performance of such control due to bad weather, Master has to inform Agent in time and have to stop and wait at South Entrance of the Bosphorus until Sanitary Control is performed otherwise heavy fine would be levied.

Also see "Shipmaster's Report".

RADIO: Wirelesses to be routed to Agent via Istanbul Radio. Call sign of Istanbul Radio Station is THA. Frequency MW 500 m. Ships can also communicate with Agent by radio telephone on frequency 2182 kc/s. It is recommended that ships be on watch for any radio telephone call by Agent for any berthing and operation arrangement.

TUGS: Arranged by Agent. Tug-boat compulsory for vessels over 2,000 g.r.t., charged per hour or fraction of each operation.

2 of 970 h.p., 1 of 620 h.p. and 1 of 200 h.p. Lighters: 1 of 100 tons, 6 of 150 tons and 3 of 230 tons.

BERTHING: Priority to food and passenger ships. If no berth available then ships to wait for turn in roads at anchor.

Wharves:	*Length* *m.*	*Depth of Water* *m.*
Karakoy (ex Galata) exclusively for passenger vessels	520	7 – 10
Salipazari	600	10
Sarayburnu	240	6
Camialti and Haskoy (Golden Horn)	68	3 – 4

Haydarpasa. This port, protected by 2 breakwaters of an overall length of 1,709 m., has quays of 1,988 m. total length, that may simultaneously accommodate 6 medium-sized vessels and where cargo operations may be made direct to and from wharves or railway trucks.

The draft of water at the quays varies between 6 and 10 m.

Silos: 4 grain silos are available:

Capacity	*Delivery per hour*	*Intake per hour*
34,500 tons	200 tons	100 tons
20,000 tons	120/150 tons	90/100 tons
10,800 tons	120/150 tons	90/100 tons
5,280 tons	120/150 tons	90/100 tons

Equipment – Total number of cranes: 31.

Electrical Cranes along the quays:

3 of 1.5 ton capacity
10 ,, 3 ,, ,,
6 ,, 5 ,, ,,
1 ,, 6 ,, ,,
1 ,, 8 ,, ,, (coal winch)
1 ,, 25 ,, ,, (fixed with swinging boom)
1 ,, 25 ,, ,, (gantry crane on rails)

Rubber Wheeled Mobile Cranes:

6 of 5 ton capacity
1 ,, 8 ,, ,, with caterpillar tracks
1 ,, 10 ,, ,, ,, ,, ,,
1 ,, 18 ,, ,,

BULK HANDLING: Three grain silos are available:

One of 34,500 ton capacity with 200 ton delivery/100 ton intake per hour.

One of 10,800 ton capacity with 120 – 150 ton delivery, 90 – 100 ton intake per hour.

One of 5,280 ton capacity with 120 – 150 ton delivery, 90 – 100 ton intake per hour.

TANKERS: The oil port called Haramidere is a small bay open to Southern winds and 60 km. distant from Istanbul in the Sea of Marmara. There are buoys and an oil pumping platform in this bay. Tankers can berth by dropping 2 anchors and mooring by stern at these buoys or at platform. Average sea depth is 48 ft.

Ambarli: Position 40° 58′ N., 28° 42′ E. Max. size 250,000 d.w.t. Vessels moor by the stern to a dolphin platform (offshore).

BRIDGES: There are 2 bridges: Galata Bridge is between Eminonu and Karakoy: Ataturk Bridge is between Unkapani and Azapkapi. Both bridges are opened in the morning for vessels entering the Inner Harbour (Golden Horn). Vessels wanting to pass through the bridges have to give notice in due time to the Harbour Master of Istanbul.

STEVEDORES: Gangs of stevedores secured by the Agent through the Port Monopoly, 24 hours prior arrival. Average loading and discharging rates of about 150–200 tons per gang per shift depending also on the kind of goods. Discharging operations are generally performed alongside the wharves and loading operations at buoys; however, as stated above, can also be effected alongside simultaneously with discharging. Working hours: Monday to Friday 0800/1200 and 1300/1700 hrs; Saturday 0800/1200 hrs.

MEDICAL: Master to inform Agent by cable if urgent medical assistance is required upon arrival, also indicating, if possible, seriousness of case in order to take adequate steps.

DENSITY: Always variable due to strong currents, however, can be reckoned as 1015.

FRESH WATER: Supplied by barge and shore installation at the rate of 30–60 t.p.h.

FUEL: Diesel oil, gas oil and bunker fuel can be supplied by barge at transit cost, subject 48 hours pre-advice. Fuel supplied only against advance payment in foreign exchange (dollars, sterling or Swiss francs).

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Owners or Master to decide whether this work should be underaken by the stevedores or by the crew.

CERTIFICATES: Safety, Safety Equipment, Safety Radio, Class and Freeboard documents.

CUSTOMS ALLOWANCE: 40 cigarettes and 1 bottle wine/spirits per crew member.

CARGO GEAR: Generally shore cranes operating. However, ship using own means when such cranes are not available. Full lights to be supplied by ship.

IDENTIFICATION CARDS: Seaman's book is sufficient.

REPAIRS: At the Golden Horn are 3 graving-docks:

One 388 ft. length, 72 ft. width at entrance
Two 279 ft. ,, 62 ft. ,,
Three 600 ft. ,, 63 ft. ,,

At Istinye (in the Bosphorus) are:

1 floating dock 137.50 m. length, 21.25 m. width with 8,500 tons lifting capacity. 1 floating dock 67.82 m. length, 30.40 m. width with 5,000 tons lifting capacity. 1 floating dock 126.14 m. length, 34.0 m. width with 10,000 tons lifting capacity. In cases of necessity floating docks of 5,000 and 10,000 tons capacity can be united and be put in operation as single floating dock with 15,000 tons lifting capacity. Every kind of repair can be effected at Istinye docks.

At Fener (Golden Horn) is a dry dock for vessels up to 600 tons, and at Kaskoy (Golden Horn) is a dry dock for vessels up to 176 tons. There are also some privately owned. All kinds of repairs can be effected.

SURVEYORS: American Bureau of Shipping, Bureau Veritas, Germanischer Lloyd, Lloyd's, Norske Veritas.

REPATRIATION: Crew exchange and repatriation is possible for citizens of Italy, Great Britain, Benelux Countries, Sweden, Norway, West Germany, Austria, Switzerland, France, Ireland, U.S.A., Iceland, Pakistan, Monaco, Australia, Canada, Japan, New Zealand, Spain, Cyprus, Portugal, Tunisia, Kenya, Iran, Yugoslavia, Romania, Morocco. Citizens of other states not specified above are subject to a Turkish visa.

AIRPORT: Yesilkoy Airport is an international airport with daily connection to everywhere. Airport distant 15 km. from Istanbul.

TIME: GMT plus 2 hours, GMT plus 3 hours in Summertime.

HOLIDAYS: New Year's Day (Dec. 31st p.m. and January 1st); National Sovereignty (April 22nd p.m. and April 23rd); Spring Day (May 1st); Sports and Youth Day (May 19th); Sheker Bayram (3 days) (movable); Courban Bayram (4 days) (movable); Liberty/Constitution Day (May 26th p.m. and May 27th); Victory Day (August 30th); Proclamation of the Republic (Oct. 28th p.m. to Oct. 30th). In the event of a holiday ending on a Friday, the Saturday that follows is considered also as a holiday in full, and normal working starts as of Monday morning 0800 hrs.

POLICE/AMBULANCE/FIRE: Fire Istanbul 21 42 22, Uskudar 33 20 30; Police 27 45 00; Ambulance Istanbul 21 15 95, Beyoglu 44 49 98, Uskudar 33 04 01.

TELEPHONES: No installation for connection facility on board.

SERVICES: Tank cleaning (gas-free service), deratisation, compass adjusting carried out by experts of shipyards or Turkish Maritime Lines.

SHORE LEAVE: Crew members are allowed ashore at all times.

SHIPMASTER'S REPORT: *Dardanelles and Bosphorus:* If a Pilot is required for both Dardanelles and Bosphorus, give 24 hours' notice through Istanbul Agent. Same Pilot remains on board for full transit, Sea of Marmara included, and this applies for both North and South-bound traffic. Pilots at Dardanelles and Bosphorus work VHF Channel 16.

Sanitary Control: Required at Buyukdere, Ship's Register, De-Rat, Crew List and certificate issued at Canakkale North-bound.

AUTHORITY: Marmara Bulgesi Liman ve Denizisleri Mudurlugu.

AGENT: Gulf Agency Co. Ltd., POB 1230 – Karakoy, Istanbul/Turkey. Cables: "Gacshipping" – Istanbul. Telex 22213. Tel. 44 29 80, 457652.

IZMIR: 38.25 N. 27.09 E.

DOCUMENTS:

5 Crew Lists.
4 Passenger Lists.
2 Manifests of Transit Cargo.
3 Manifests of Inward Cargo, 1 of which must be legalised before arrival by Turkish Consulate at loading port.
1 set Bills of Lading.
2 sets Cargo Stowage Plans.
2 Stores Lists.
Health Documents.
Ships Certificates.

N.B. Ship's particulars form is to be filled in by Masters upon arrival at Izmir, and remitted to the Port Authorities.

PILOTAGE: Vessels are permitted to arrive and sail from Izmir by day and night. After entering the Gulf of Izmir, Masters who are not familiar with the waters, require a Pilot at Pelican Spit. The pilotage from Pelican Spit to Izmir is not compulsory and Masters must notify their Agents at least 12 hours in advance giving their ETA at Pelican Spit and ask for a Pilot.

Pilot can be contacted on VHF Channel 16.

ANCHORAGE: In the Outer Harbour, 300 m. outside Old Port breakwater, ample space for vessels to anchor. Cargo operations cannot be performed at anchor unless vessels have red label cargoes aboard for Izmir or in transit.

RESTRICTIONS: Docking of ships at the old port is not permitted during night, but ships can sail any time during night. At the new port, docking is permitted during night (weather permitting) also ships can sail any time during night. There are no tides at Izmir.

MAX. SIZE: Vessels of any size with a max. of 33 ft. draft can operate at Izmir. There is a pipe-line for oil-carriers in the Gulf of Izmir where tankers with a max. draft of 33 ft. can operate.

In Old Port, length restricted to 165 m., max. draft 8 m.

HEALTH: Vessels to show their Sanitary Certificate – if available aboard – also their Registry. Presentation also of Vaccination Certificate of all the crew, if required by sanitary officials. Pratique is necessary on arrival even if the vessel has called at another port in the same country. Sanitary Certificate is required for live animals aboard. If quarantine (fumigation) of the vessel is necessary, very considerable time is lost, and expense incurred because vessel must proceed to Fumigation Station at Klazomene, located at about 20 miles from Izmir (in the Gulf of Izmir) where fumigation can be effected and bad cases hospitalised.

RADIO: Izmir Radio Station: call letters TAN2. Istanbul Radio Station: call letters TAH.

TUGS: Tugs are compulsory for vessels of more than 2,000 g.r.t. At Harbour Master's estimation, 2 tugs will be used for vessels over 4,000 g.r.t. in case of bad weather. Dues will be collected for each tug.

Four tugs of 200, 300, 970 and 1200 h.p. continuously available.

BERTHING: *Old Port:* Location Lat. 38° 25′ N. Long. 27° 10′ E. Harbour entrance to port 130 ft. wide, depth 40 ft., harbour length 1,200 m., harbour width 700 m. (Pilots boards 0.25 mile off entrance).

Precautions to be taken against N.E. and South winds. Mooring stern to quay. Operations effected by means of lighters. Altogether 8 vessels can berth in Inner Harbour with a draft of 24 to 30 ft.

Alsancak: Located at a distance of about 2 miles from the old port. Depth alongside berths 22 to 33 ft. Pilot's board vessels outside breakwater old port. Presently 9 cargo vessels of various sizes (mainly medium and small sizes) otherwise 5 to 6 large vessels can operate at the new port. There is also a berth for 1 large passenger vessel or 2 small size vessels.

BULK HANDLING FACILITIES: Grain silo has capacity 40,000 tons. The conveyor can deliver between 2,500 and 3,000 tons in 24 hours.

Bulk ore loaded by grabs. Daily loading capacity per shift of 8 hours is between 750 to 1,000 tons.

STEVEDORES: Straight time 0800 – 1200, 1300 – 1700 hrs. Overtime 1800 – 0200, 1300 – 1700 hrs. (Saturdays). Sundays and holidays as well as Saturdays from 1300 hrs.: overtime charges 50% increase on S.T. charges.

For overtime discharging operations at the new port, handling charges (overtime) from ship's tackle to the Custom's warehouse, are for account of the ship.

9 men per gang aboard (6 labourers, 2 winchmen, 1 hatch tender) 3 lightermen or men on the Dock.

Extra men used to reinforce regular gangs and in hatches congested with cargo for discharge secures a quick despatch.

MEDICAL: Advance notice optional. There is a local English-speaking doctor for service on board vessels.

Hospitals: U.S. Military Hospital, French Hospital, Government Hospital (Memleket). Doctors available to board ships or patient to proceed to their clinics.

U.S. Military Hospital for emergency cases only.

TANKERS: Izmir is a discharge port for tankers. Socony Mobil Oil receives petroleum products in bulk through a pipe-line at a distance of about 1 mile from their shore installations. Depth at the end of the pipe-line is 33 ft. The pipe-line is of 12 in. and the pumping is effected through a flexible of 10 in. at an average of about 450/500 t.p.h.

British Petroleum, receives petroleum products at jetty where the tankers berth stern to with a max. draft of 23 ft. Pumping is effected by the vessel from her stern with a 6 in. flexible hose.

Petrol Ofisi receives petroleum products at their jetty. Vessels berthed stern to with a draft of 17 ft. Same procedure for pumping as for British Petroleum. The above three installations are located in the Gulf of Izmir opposite the new port of Alsancak.

FRESH WATER: Fresh water is available for drinking. The water is given both from dock or by barge. Water is supplied by Port Monopoly. Delivery at the dock about 20 t.p.h. By barge about 40 t.p.h.

Two barges each of 200 tons capacity available.

FUEL: All kinds of fuel available subject to 24 hours' advance notice. Fuel supplied only against advance payment in free foreign exchange direct to Agent of the vessel.

GANGWAY/DECK WATCHMEN: Services of the watchmen recommended. Three shifts of 8 hours per day.

OPENING/CLOSING HATCHES: This work can be carried out by crew. If carried out by stevedores the cost is charged to vessel.

CERTIFICATES:

Deratisation Certificate.
Registry.
Vaccination Certificates (if required).
Health Certificate.

CUSTOMS ALLOWANCE: 50 cigarettes for each member of the crew going ashore. Aboard the vessel each member of the crew is permitted to have one carton out of Bond. Wine and/or spirits: One litre for each member of the crew in an open bottle is permitted out of Bond. However, this allowance is to be kept aboard the vessel.

IDENTIFICATION CARDS: Seamen's Book is sufficient.

CONSULS:

Spanish Consulate (Honorary)	" 33689

REPAIRS: Ship's repair shops available: Denizcilik Bankasi (Turkish State-owned), Lui Tius (private). Deck and engine repairs are possible.

DRY DOCKS: No dry docks available.

REPATRIATION: All facilities available for crew changes and arranging necessary repatriation.

AIRPORT: Airport from dock – distance 30 kilometres. Airport is served by Turkish Airlines with 5 flights per day (local flights in connection with Istanbul International flights). Also one daily flight from Izmir to Athens (Greece) and back by Turkish Airlines.

TIME: Local time 2 hours ahead of GMT. Summertime GMT plus 3 hours.

HOLIDAYS: New Year's Day (from December 31st 1200 hrs. to January 1st, 2400 hrs.); National Sovereignty Day (from 22nd April, 1200 hrs. to April 23rd, 2400 hrs.); Spring Day (May 1st); Constitution Day (May 27th); Sports Day (May 19th); Victory Day (August 30th); National Holiday (October 28th, 1200 hrs. to October 30th, 2400 hrs.); Sheker Bayram (3 days) movable; Kurban Bayram (4 days) movable.

On these days offices are closed. Work in port is allowed by paying 50% overtime to the S.T. wages. The overtime for the National Holiday (Oct. 29th) is paid 100% on the total regular overtime, which makes 300%. On the first days of Sheker and Kurban Bayram work aboard is unlikely.

POLICE/AMBULANCE/FIRE: Police, tel. 22771; Ambulance, tel. 22319; Fire, tel. 22222.

TELEPHONES: It is possible to place telephones aboard vessels at the new port of Alsancak.

SHORE LEAVE: Crew members are allowed to go ashore.

REGULATIONS: Berths at the new port of Alsancak are obtained on basis of the time and date of arrival of each vessel. If the port is congested, vessels wait for their turn at anchor.

DELAYS: During the active export season, some delays occur varying 1 or 2 days.

DEVELOPMENTS: New port of Alsancak to be extended during the next five years by the construction of a breakwater, docks, warehouses totalling a berthing capacity of additional 5 to 6 cargo vessels.

AUTHORITY: Izmir Harbour Master.

AGENT: Gulf Agency Co. Ltd., POB 857, Izmir. Tel. 32755 and 32864. Telex 52371. Cables: "GACSHIP' Izmir.

MERSIN: 36.47 N. 34.38 E. (See Plan Book)

DOCUMENTS:

5 Crew Lists.
4 Passenger Lists.
2 Transit Cargo Manifests.
3 Inward Cargo Manifests, one of which must be legalised prior arrival by Turkish Consulate at loading port; if no Turkish Consulate, same to be certified by local Customs Authorities.
1 each of the Bills of Lading accompanying Manifests.
2 Cargo Stowage Plans.
Health Documents.
Ship's Certificates (Safety Equipment, Safety Radio, Class and Freeboard Documents).
2 Store Lists.

PILOTAGE: Agent orders Pilot through Port Monopoly Administration. Master to wire ETA notices 48 and 24 hours prior to arrival. Pilot boards vessel with service boat hoisting red and white flag. Sound signals: 2 long and 1 short blast. Pilot boards vessel outside main breakwater. Shipmaster can use VHF station according existing international frequencies.

ANCHORAGE: Safe anchorage in open roads outside main breakwater.

RESTRICTIONS: No particular restrictions. Ships can anchor in roads outside main breakwater at any time without Pilot.

MAX. SIZE: No limitation of draft in open roadstead, at anchor. Maximum draft in port alongside quay: 11.6 m. for tankers, 9 m. for other ships.

HEALTH: Clearance is effected on arrival. Vaccination Certificates to be presented if required. If suspected disease on board radio Agents full details before arrival.

RADIO: Istanbul Radio, call sign TAH, Izmir Radio, call sign TAM2, Mersin Radio TAM5. Wireless messages to be routed to Agent, preferably via Istanbul Radio. Port VHF service in operation.

TUGS: Tug boat compulsory for vessels over 1,000 grt. charged per hour or fraction of each operation. 4 tugs available up to 1,200 h.p.

BERTHING: Priority to Army, food relief and passenger ships. If no berth available then ships to wait for turn in roads at anchor.

	Length m.	*Depth m.*
Quay No. 1 (Passenger Quay)	175	10
Quay Nos. 2 and 3	274	10
Quay No. 4	150	10
Quay Nos. 5, 6 & 7	493	10
Quay Nos. 8 & 9	275 each side	10
Quay Nos. 10, 11, 12 & 13	577	6 to 8
Quay Nos. 18 & 19 (ore and coal)		10

BULK HANDLING FACILITIES: At Quay Nos. 8 and 9 there is conveyor system which can deliver 600 t.p.h. from each spout. Discharging rate 100 t.p.h. from each of the 2 suckers.

STEVEDORES: Gangs of stevedores secured by the Agent through the Port Monopoly, to be ordered 24 hours prior to arrival.

Generally 2 consecutive shifts of 8 hours per day. Discharging/loading rates average:

100 tons per shift general cargo.
200 tons per shift bagged cargo.
150 tons per shift baled cargo
175 tons per shift bulk ore

Max. rate for ore 400 tons per shift if grab loading.

MEDICAL: Master to inform Agent by cable if urgent medical aid is required upon arrival, also indicating if possible seriousness of case in order that adequate steps can be taken.

TANKERS: Quays No. 20 and 21, 350 m. long, berths on each side with depth of 12.5 m.

ATAS Refinery Terminal: Depth in harbour channel, 11.2 m. and, in approaches to channel, 12.3 m. Turning basin 1,148 ft. diameter, depth 42 ft. 8 in. Depth alongside berths 48 ft. 6 in.

Maximum length 229 m., draft 11.6 m. Tankers up to 12.19 m. draft have berthed.

Tankers in ballast up to 15,000 d.w.t. may berth/unberth at any time, day or night. Other vessels manoeuvre in daylight hours only.

One finger pier, berths for 2 tankers, 10-in. hose connections to 26-in. shore line. No facilities for slop disposal ashore.

Fresh water available from barge 100 tons each load.

DENSITY: Salt water 1025.

FRESH WATER: Fresh water supplied to tankers by barge but otherwise by shore installation at the rate of 30/35 t.p.h.

FUEL: Almost all kinds of fuel available in transit and facilities for delivery to ships.

GANGWAY/DECK WATCHMEN: Available and recommended.

OPENING/CLOSING HATCHES: Owners or Masters to decide whether this work should be undertaken by the stevedores or by the crew.

CUSTOMS ALLOWANCE: 200 cigarettes and 1 bottle wine/spirits per crew member.

CARGO GEAR: Generally shore cranes operated. However, ship using her own means when such cranes are not available. Full lights to be supplied by ship.

IDENTIFICATION CARDS: Seamen's Book is sufficient.

CONSULS: Lebanon, Italy, Norway and Sweden.

REPAIRS: Welding and other minor types of repairs are possible.

REPATRIATION: Repatriation can be arranged by air.

AIRPORT: Adana Airport served only by domestic line THY (Turkish Airlines) with routes to Cyprus (ERCAN), Ankara and Istanbul. Distance is 75 km. from Mersin. Twice per week to Cyprus (ERCAN), twice daily to Ankara and 3 times daily to Istanbul.

TIME: GMT plus 2 hours, Summertime GMT plus 3 hours.

HOLIDAYS: New Year's Day, 1.5 days (31st December 0.5 day. 1st January 1 day); National Domination 1.5 days (22nd April 0.5 day, 23rd April one day); Spring Day, 1 day (1st May); Youth and Sport Day, 1 day (19th May); Liberty and Constitution Day, 1.5 days (26th May 0.5 day, 27th May 1 day); Victory Day (20th August); Republic Day 2.5 days (28th October 0.5 day, 29th and 30th October); Ramazan Day 3.5 days (14th September 0.5 day, 15th, 16th and 17th September), every year 10 days earlier start; Kurbam Day 4.5 days (21st November 0.5 day, 22nd, 23rd, 24th and 25th November), every year 10 days earlier start; All Saturdays and Sundays.

POLICE/AMBULANCE/FIRE: Telephone numbers: Police 3439; Ambulance 3555; Fire 0000.

TELEPHONES: No installation for connection on board.

GENERAL: Two consecutive shifts every day, the first one starting 0800 – 1700 hrs. and the second one at 1700 – 2400 – 0100 hrs. Agent may provide extra men if necessary to help ship's despatch. Ships have to hoist a Turkish flag.

SHORE LEAVE: Crew allowed shore leave.

AGENTS: Gulf Agency Co. Ltd., PO Box 328, Mersin. Turkey. Cable Address: "Gacship" Mersin. Telex: 67141. Telephones: 1080, 3730.

NEMRUT BAY: 38.46 N. 26.55 E. (See Plan Book)

The Nemrut Port Complex consists of the Petkim Quays on the N.E. side of the bay, the EGE Gubre Quay on the South side of the bay and the METAS Quay on the S.W. side of the bay.

PILOTAGE: Pilots may be requested from Aliaga.

TUGS: 1 tug 1,050 h.p. available. Additional tug of 2,500 h.p. may be requested from Aliaga.

BERTHING:

Petkim: Petkim Petrochemical Factory Quays:

Quay No.	*Length (m.)*	*Depth (m.)*	*Remarks*
1	90	14.0	Naphtha
2	60	6.0	Caustic
3	190	6.0	Salt
4	338	7.0 – 10.0	Tanker
5	338	7.0 – 10.0	General Cargo.

Cranes: Mobile cranes of 5 tons – 200 tons capacity. Ro-Ro facilities available.

Metas: Scrap iron discharging quay, length 190 m. Depth 14.0 m. Two shore cranes 5/25 tons capacity.

Ege Gubre: Fertiliser Quay: Length 123.0 m. Depth 14.0 m.

Two installations for discharging/loading bulk cargo and one special arm for discharging acid type liquid material.

Also see "Shipmasters' Reports".

SHIPMASTER'S REPORT: July 1980.

Port of Foca: Vessel discharged ammonia.

Approach: Charts: BA. 1087, 1618.

The approach presents no real difficulties since good positions may be obtained from the coast either by radar or visual bearings. There was some haze on our approach but it did not pose a serious problem.

Approaching Nemrut Liman, the construction work and breakwater at 'Petkim' refinery on the North side of the bay is soon distinguished: there is a great deal of new construction, (not shown on the charts). On the high ground behind Petkim, large tank farms are being constructed but since they are (presently, at least) coloured brown they are not very conspicuous.

This was our first visit and without the benefit of Chart 1618, we were not really sure of the location of the ammonia facility which remains obscured until actually approaching the berth, being hidden by high ground. A silver pressure vessel marks the facility.

Tankers may be encountered both leaving Petkim and the refinery in Aliaga Liman, together with cargo vessels visiting the berth near to the ammonia plant (METAS).

Pilots: The Pilot was contacted on Channel 16 VHF only when about five miles off. On this occasion he boarded about one mile N.W. of Karacadogan Burnu from a tug. Pilot ladder or gangway therefore should be 2 m. or so from the water.

Two tugs in attendance on berthing, one of 1,250 h.p. and the other 2,450 h.p. Communication via VHF Channel 16.

Good standard of English spoken.

Vessels are not berthed in darkness but may sail from the berth.

Berthing is always carried out port side alongside; the starboard anchor is let go with the vessel approximately at right angles to the berth, swung by the tugs and landed alongside. A mooring boat is available for ship's lines. There are two large mooring buoys for the stern lines, one off the starboard quarter and one more or less astern. Buoys fitted with open hooks. On unberthing only one tug is necessary; all shore lines let go and heaved clear of the berth using the anchor and buoy ropes.

Length of inward pilotage just over one hour.

Berth: Consists of an "L" shaped with the jetty being 125 m. in length. Distance to the foot of the jetty being about 300 m. The jetty is of concrete construction, standing on pilings and is fendered throughout with large tractor tyres. Ample mooring posts, although arrangements are not good for a vessel of this size.

There is a conveyor belt running the length of the jetty and to the shore plant. Two loading hoppers on the jetty. The chicksan consists of a tall crane-like structure which is swung into position.

Connection: 6 in. 300 ASA. Shore provides 10 in./6 in. 150/300 reducer. The gangway may be swung out prior to arrival.

Density: 1028.

Discharge: Co-operation with the shore personnel very good, especially with the senior operators and managers. At a lower level language is the only problem. Shore personnel connect lines. A discharge rate of 150 t.p.h. was quoted on arrival but an overall rate of 230 t.p.h. was achieved although this cannot be guaranteed for future visits.

On completion the shore personnel drained their chicksan direct into the sea so deck personnel MUST have their gas masks handy and breathing sets should be worn by the officers in close attendance.

The facility has a storage capacity of about 3,000 tonnes and a monthly consumption of about 1,500 tonnes.

Phosphoric and sulphuric acids are also handled.

General: Fresh Water: Not available. (A vessel that visited at a later date reported that fresh water of good quality was available (metered) from a line amidships.

Fuel: Not available.

Officials: Officials come from Izmir, some 80 km. by road; the Agent therefore has to "keep hold" of them throughout discharge. The shore plant has facilities for sleeping in a hostel ashore.

The same cargo surveyor attends the vessel at Gemlik, Foca and Mersin.

Since this was the second port of call in Turkey the vessel is issued with a travelling manifest to cover cargo and a carrier for ship's stores. The procedure differs from port to port but ship's bonded stores are sealed from arrival Turkey to departure, although visiting customs enter on arrival at a port. We did not have any trouble requesting the bond to be opened prior to departure.

In addition to the travelling manifests other papers required were:

2 Stores Lists.
2 Crew Declarations.
7 Crew Lists.
1 Vaccination List.
1 List of cash in ship's safe.
1 Health Declaration.
2 Lists ship's particulars (their own form).
2 Lists of previous ports.
6 Copies of Cargo Manifest.

Doctor: Not available.
Repairs: Not possible.
Surveyor (Lloyds): Not available.
Chandler: Not available.

SHIPMASTER'S REPORT: September 1980.

Port of Foca:

To be read in conjunction with report above.

Approach: From the North (Dardanelles). 10 miles can be saved by going down 'Muslim Kanali' and 'Stenon Mitilimis' to the East of Nicos Lesvos (BA. 1665) instead of going to the West of Lesvos.

There is one narrow spot but in two transits during September 1980 presented no problems at full speed. There is little traffic.

Southbound: Keep to North side of Muslim Kanali about 0.5 miles off Turkish coast to avoid Muslim Kaya shoals (beware of Southerly set).

Northbound: Once past Muslim Kaya shoals, turn W.S.W. to avoid any Eastbound traffic round Baba Burnu then 3 miles off Baba Burnu as required.

A further 8 miles can be saved from Dardanelles to Foca by using the channel to the East of Boscadda Island (BA. 1608). The problem here is the shallow bank which may require a speed reduction. Not yet tried but the Pilots say quite safe. Approaching Nemrut Liman plenty of fixes can be obtained. With a Northerly or North Easterly wind the bay acts as a funnel and a considerable indraught occurs so care should be exercised so that the vessel does not get set in.

BA. Chart No. 1618 should be held.

Approaching Nemrut Liman the construction work and breakwater at 'Petkim' refinery on the North side of the bay is soon apparent although at present the earthworks and tanks tend to blend in with the rather barren landscape.

The whole peninsular between Nemrut Liman and Aliaga Liman is in the course of development for a very large Petrochemical complex.

On the South side of the bay is a general cargo berth to seawards and the fertiliser/ammonia facility at the head of the bay. This facility is marked by a silver-pressure vessel. The Ammonia facility remains hidden by high ground until near the berth.

The vessel can be turned round inside the bay with ease in winds up to N.E. 4.

Pilots: Available on 24 hour basis from Aliaga refinery. Boards either from tug or mooring boat. Gangway/pilot ladder should be 2 m. above water. Side depends on wind.

Pilot boards 1 N.W. of Karacadogan Burnu. He either drives across the peninsular to the new chemical berth and boards his boat there or comes by tug around the peninsular from Aliage refinery. On VHF Channel 16 when vessel expected. Reasonable English spoken. Pilotage one hour.

Tugs: Three tugs available. Two of 2,400 h.p. from Aliaga refinery and one of 1,200 h.p. at the new chemical berth.

If there is any wind at all in the bay, two tugs are required both for berthing and unberthing. These should be ordered well beforehand through the Agent.

In my opinion two tugs are required at all times. Ship's lines used.

Berthing: Although on a 24 hour basis, I would not be keen to berth at night especially in Winter months due to the strong Northerly wind pushing vessel onto the berth.

Can berth port or starboard side alongside. For this size vessel (32,000 g.r.t.) port side to is the most suitable as leaving the berth is not hazardous as possibly starboard side to would be.

Vessel headed into berth at 90° with bow onto the N.W. corner. When about 2 cables off starboard anchor let go and the stern pulled round by tug.

Make sure stern tug (when vessel parallel with quay) pulls on starboard side otherwise stern will strike quay (September 1980).

Moorings: (See Plan Book). Back spring first forward, starboard buoy line first aft. Mooring boat available.

Berth: The fendering arrangements are poor. Consisting of large tractor tyres. The main problem is at the corners or knuckles where the tyres are strung too low to stop the bow or counter flare hitting the concrete (September 1980).

Protest noted in September 1980 about fenders. Operators say they will raise fenders and offer protection at corners.

Maximum Air draft 14 m. in September 1980 call, we used the low loader, which was very beneficial.

Discharge: A discharge rate of 150 t.p.h quoted. Around the 200 t.p.h. is normal. July and September 1980.

On completion the shore personnel drain their line direct into the sea. All personnel engaged in uncoupling must wear full breathing sets. Cargo Engineeer and Officer of the Watch went through three bottles each. (September 1980).

The facility has a storage capacity of 2,800 tonnes and a monthly consumption of about 1,500 tonnes.

Phosphoric and Sulphuric acids are also handled.

General: If second or third port, vessel issued with travelling manifest from previous port to cover cargo and ship's stores.

Be careful to retain Turkish light certificate, if last port, for next Turkish call.

In addition to travelling manifests other papers required:

2 Crew Currency Lists.
2 Crew Declarations.
6 Crew Lists.
1 Vaccination List.
1 List cash in ship's safe.
1 Health Declaration.
2 Lists ship's particulars (Turkish Form).
2 Lists previous ports.
6 Copies Cargo Manifests (to be stamped at previous port if Foca second or subsequent port).

SHIPMASTER'S REPORT: November 1980.

Petkim Refinery:

Approach: Chart BA. 467.

Petkim is an Industrial complex at the entrance to the Gulf of Izmit, near Yarimca. It includes the refineries of Petkim to the North and IPRAS to the South. As far as can be gathered the railway line is the dividing line.

A wide range of oils, chemicals, gases and bulk fertilisers and chemicals are handled. The Products Pier which includes ammonia is in position at 40° 45.4′ N., 29° 45.1′ E., close by is a bulk handling berth with a solid quay face.

The area in general is one of the main trading areas for overseas shipping in Turkey.

To the North West of the Refinery at Yarimca is Hereke another important shipping complex.

Pilotage: Compulsory Pilot inwards at Darica Point. VHF contact may be possible. Izmit pilot office which is the control centre works on Channel 14 and 12.

Proceed to position off Darica Point and sound 'G'. Pilot boards from small tug and the ladder should be about 1 m. from the water.

The Pilot berths all vessels at all Gulf of Izmit ports.

Pilot departs either off berth or at Darica depending on other pilotage requirements and curfew. Pilotage operates 24 hours.

Tugs: Two Government tugs available, 1×2,000 h.p. and 1×2,500 h.p. If additional tugs are required they come from Istanbul. For IPRAS refinery only, there are 2 tugs of 2,500 h.p. Tugs generally use ship's line. Tugs rarely use all their power.

Berth: Berthing and unberthing throughout 24 hours. The berth is the usual type of tanker berth consisting of a 'T' shaped jetty at the end of a pipe-line roadway. There are dolphins connected by catwalk to main pier (Southern catwalk damaged in November 1980), plus further isolated mooring dolphins about 50 m. off inner dolphins.

Mooring arrangements are not very good with head lines virtually breast lines. (See Plan).

Dolphins have good fenders and ship's centre section stands off jetty face. After dolphin (if port side too) comes on counter. Generally port side to due to anchored vessels, making starboard approach difficult. But possible for starboard side alongside.

It is safe to swing gangway out before berthing. It should be on the end of a derrick as it has to be swung clear of lamp post on quay and landed at an angle of 45°.

Discharge: There are lines for naptha, benzene, butadiene vapour and liquid and ammonia vapour and liquid. Butadiene 8 in., ammonia 10 in., both sets chicksans, naptha and benzene use hoses. The ammonia connections are the Southerly set, ammonia coupling 10 in. 300 ASA to spool piece 12 in. 150 ASA. Shore personnel effect the connection. Vapour return line not used. Samples taken before discharge.

We used forward ships crossover which gives forward mooring lines a slightly better lead.

Communication with shore personnel difficult due language problems. Hut on quay with telephone.

Refinery seems to have limited tank capacity judging from our 2 visits and has to transfer product to other plant at re-liquefaction rate of around 50 tonnes per hour. Not able to ascertain actual tank capacity.

Due to above, discharge rate varies from about 300 t.p.h. to 500 t.p.h. with back pressure varying from 2.5 to 7 bar.

Surveyors as normal, travel around Turkey following ships so can be late in boarding if ship early, then refinery representative notes temperatures and ullages.

General: Fresh water available from quay at 40 t.p.h. metered at L.750 (November 1980 £3.60) per tonne. By barge is cheaper at L.30,000 (November 1980 £145) per 50 tonnes minimum but not always available.

Fuel by barge. Istanbul is fairly close so may be cheaper to go to anchorage there for fuel as available by barge but costly.

In November 1980 a curfew still operated 2400 hrs. to 0500 hrs. Travel outside Izmit District not allowed. Difficult to get into either Yarimca or Izmit.

Strict anti-pollution laws in operation.

Over many voyages to this port and Gemlik, air freight items from North Europe always get through.

Lloyds/Agent: Lloyds Surveyor from Istanbul also covers all Turkey but travel is expensive.

Sark Express have Sub-Agent 'Kinay' who is efficient, especially as communications are poor. They are Lloyds Sub-Agent.

SAMSUN: 41.19 N. 36.21 E.

PILOTAGE: Refer to "Canakkale" and "Istanbul".

Harbour Pilot compulsory for all foreign vessels. Ordered by Agent subject to vessel's advance notice of ETA.

ANCHORAGE: Good anchorage in the Outer Harbour.

TUGS: Tugs are available.

BERTHING: Harbour protected by two breakwaters, entrance width 300 m., depth 11.9 m.

One quay, 956 m. long, depth alongside from 6.5 to 11 m., providing 4 deep-water berths.

FRESH WATER: Available from the quay.

FUEL: Not available.

STEVEDORES: Working hours for general cargo: From 0800 to 2400 hrs. in 2 shifts.

For bulk cargo: 24 hours operations in 3 shifts.

TRABZON: 41.01 N. 39.46 E.

PILOTAGE: Refer to "Canakkale" and "Istanbul".

Harbour Pilot compulsory for all foreign flag vessels. Arranged by Agent subject to vessel's notice of ETA in advance.

ANCHORAGE: In the Outer Harbour off the breakwater.

MAX. SIZE: Vessels up to 29 ft. draft.

TUGS: Two tugs available. Towage compulsory for vessels over 550 tons.

BERTHING: Main wharf 410 m. long, depth alongside 10 m. Vessels may be loaded and discharged while moored stern to the breakwater.

FRESH WATER: Obtainable from the quay.

FUEL: Fuel oil obtainable in limited quantities.

STEVEDORES: Working hours from 0800 to 1200 hrs. and from 1300 to 1700 hrs. Overtime can be arranged.

REPAIRS: There are no repair facilities.

ZONGULDAK: 41.28 N. 31.49 E.

PILOTAGE: Refer to "Canakkale" and "Istanbul".

Harbour Pilots obtainable from Coaling Company, Pilot boards off port entrance by launch. Ordered by Agent subject to vessel's ETA given at least 24 hours before arrival.

ANCHORAGE: Good anchorage off the harbour in depth of 13 fathoms, sand and mud bottom.

Anchorage prohibited South of a line drawn in direction 292.5° distance 7.5 cables from head of the Northern breakwater. The Southern limit of this area is a line drawn in direction 262° from the head of the Northern breakwater to the shore.

RESTRICTIONS: Harbour entrance between breakwaters. Entrance width 600 ft.

Traffic signals displayed from signal mast on Northern breakwater, as follows:

2 black balls or 2 red lights, meaning "Harbour closed".

2 black cones or 2 green lights, meaning "Harbour open".

A black ball over black cone or red light over green light, meaning "Do not attempt to enter".

A black cone over a black ball or green light over a red light, meaning "No tug available".

A black ball between 2 black cones or red light between 2 green lights, meaning "Wait. You will be piloted into the harbour".

3 black balls, or 3 red lights, meaning "Because of unfavourable weather you cannot be piloted into the harbour".

TUGS: Available.

BERTHING: Coal quays length 1,650 ft. depth alongside 10 m.

Cargo quay length 500 ft. depth alongside 10 m.

Northern Breakwater, 2 berths, at inner end with depth of 7 m. alongside.

FRESH WATER: Available from the quays.

FUEL: Only coal bunkers available.

Tuvalu

FUNAFUTI: 08.31 S. 179.13 W.

DOCUMENTS:
Customs: Boarding of ships after radio pratique granted.
Clearance from the Last Port.
Crew List.
List of Passengers.
Stores' Lists.
Ship's Inward Report
List of Unmanifested Cargo.
Crews' Stores.
Manifest and Bill of Lading
Health: Radio pratique to be granted within 24 hours before arrival.
Vaccinations against Cholera.
Vaccinations against Smallpox (can be done).
Immigration:
Crew List.
Passenger List.
Next Port of Call.
Final Destination.
Passport.

PILOTAGE: No Pilots and no pilot boat. Local Master available on 1 month prior notice.
Chart: See Chart BA. 2983. Fongafale Anchorage main anchorage.
RESTRICTIONS: None
MAX. SIZE: See "Te Puapua Passage". Max. Depth 15 m. 250 ft. wide at low water.
HEALTH: Radio pratique available.
RADIO: Funafuti Radio (ZJU) on 6204 kHz.
TUGS: None.
BERTHS: None.
CRANE: Manual 3 ton crane on jetty.
STEVEDORES: Available on 24 hours notice, discharge rate low.
MEDICAL: Hospital radio advice available.
TANKERS: Must provide own discharge lines. No residue discharge facilities. Light diesel only available. No tanker berth.
DENSITY: Sea Water.
FRESH WATER: Max. 60,000 gallons in wet season, little or none in dry season, by tank on work boat.
FUEL: Light diesel only. Max. 5,000 gallons by drums (44 gallons).
FIRE PRECAUTIONS: No special precautions other than normal for tankers.
CONSULS: None.
REPAIRS: None.
SURVEYORS: None.
WATCHMEN: Not required.
HATCHES: By stevedores or crew.
CUSTOMS ALLOWANCE: 200 cigarettes and 1 bottle of spirit.
REPATRIATION: Air service to Fiji and Tarawa.
AIRPORT: 0.25 mile from jetty, fortnightly service. Special charters by arrangement.
TIME: GMT plus 12 hours.
HOLIDAYS: New Year (1st January); Public Holiday (3rd January); Good Friday (8th April); Easter Friday (9th April); Easter Monday (11th April); Queen's Birthday (11th June); Public Holiday (13th June); Bank Holiday (1st August); Tuvalu Day (1st October); Public Holiday (3rd October); Prince of Wales Birthday (31st October); Christmas Day (25th December); Boxing Day (26th December); Public Holiday (27th December).
POLICE/AMBULANCE/FIRE: No telephone. By messenger.
TELEPHONE: None.
SERVICES: None.
SHORE LEAVE: Allowed after clearance.
IDENTIFICATION CARDS: Not required.
REGULATIONS: No sullage, ballast, tank residue, etc., to be discharged in lagoon.
DELAYS: Unpredictable, depending on whether other ships in port.
DEVELOPMENTS: A new concrete on pile wharf is being constructed. It will have 2 berths 50 m. and 40 m. long with LW depths of 8 m. and 5.5 m. Provision is being made to supply diesel fuel and fresh water to the berths.
AUTHORITY: No independent Port Authority. All enquiries should be made to *Ministry of Home Affairs.*

Union of Soviet Socialist Republics

GENERAL: ALL PORTS:

(a) List of Soviet ports and port roads opened for foreign vessels:

I. Arctic Ocean Ports

1. Murmansk
2. Onega*
3. Archangel
4. Mezen
5. Naryan-Mar
6. Igarka

*Since 1971 the port of Onega is closed for foreign vessels from 1st September to 31st December early.

II. Baltic Sea Ports

1. Leningrad
2. Vysotsk
3. Vyborg
4. Tallinn
5. Pyranu
6. Riga
7. Ventspils
8. Klaipeda

III. Black Sea Ports

1. Reni
2. Izmail
3. Kilia
4. Belgorod-Dnestrovsky
5. Illyichevsk
6. Odessa
7. Kherson
8. Novorossiysk
9. Tuapse
10. Poti
11. Batumi
12. Yalta
13. Sochi
14. Sukhumi
15. Yuzhnyy (Grigorevsky)

IV. Azov Ocean Ports

1. Zhdanov
2. Berdyansk

V. Pacific Ocean Ports

1. Nakhodka
2. Aleksandrovsk-Sakhalinsky
3. Makarevsky (or Due) Roadstead
4. Octyabrsky
5. Shakhtersk
6. Uglegorsk
7. Kholmsk
8. Nevelsk
9. Makarov Roadstead
10. Poronaisk

(b) Addresses and telephone numbers of V/O "Sovfracht", V/O "Sovsudopodyom" and V/O "Soyuzvneshtrans":
V/O "Sovfracht" is the only broking company in the U.S.S.R. for chartering Soviet tramp ships.

V/O "Sovfracht" charters Soviet and foreign dry cargo tonnage as well as tankers on behalf of Soviet and foreign charterers and shipowners.

V/O "Sovfracht" are also general Agents for Soviet shipowners on whose behalf they negotiate and sign Agency, stevedoring, bunkering and other agreements with regard to Soviet flag vessels in foreign ports.

Within the U.S.S.R. V/O "Sovfracht" co-ordinate the activities of "Inflot" maritime agencies who are representing the interests of foreign flag vessels in Soviet ports.

Postal Address:
V/O "Sovfracht",
1/4 Zhdanov Str.
Moscow 103759, U.S.S.R.
Cables: "Sovfracht Moscow".
Telex: 7168, 7169, 7170.
Telephones: 226 – 11 – 18.

Vsesoyuznoe Obyedinenie "Sovsudopodyom" performs offshore and deep-sea salvaging, ship-raising and underwater engineering works, deep-sea towage and dredging.

Postal address: 7 Shabashevsky Lane, Moscow, 125315, U.S.S.R.

Tel. 151 – 02 – 32. Cables "Sovsudopodyom Moscow". Telex 7197.

Vsesoyuznoe Obyedinenie "Soyuzvneshtrans" – handles transportation and forwarding of export and import cargoes on Soviet territory as well as transit of goods via the U.S.S.R.

Postal address: V/O "Soyuzvneshtrans", 32/34 Smolenskaya-Sennaya Square, Moscow, 121200, U.S.S.R.

Tel. 244 – 39 – 51. Cables "Soyuzvneshtrans Moscow". Telex 7266, 7291.

(c) Guiding principles to comply with when calling at U.S.S.R. ports: When calling at U.S.S.R. ports Masters of all foreign flag vessels are requested to comply with the Instructions and Provisions of the Government of the U.S.S.R. published annually in issue No. 1 of the U.S.S.R. Notices to Mariners, Special Instructions for vessels calling at U.S.S.R. in each particular sea basin published by the General Department of Navigation and Oceanography of the Ministry of Defence of the U.S.S.R. (GDNOMD).

All vessels calling at U.S.S.R. ports must also abide by the Customs and Obligatory Harbour Regulations of each particular port of call which are obtainable through the local Inflot agencies, viz. shipping agents for foreign flag vessels at U.S.S.R. ports.

(d) Ship/shore radio link: Ships' communication with ports of call is usually maintained through the local port radio stations, some information of which is given in the respective entries for the ports.

Ships' radio stations and/or radio-telephones (excluding VHF), must not be operated when the vessel navigates or lies at anchor within the limits of the port boundaries as well as when calling at or leaving the port, except in emergency, e.g.:
when giving distress signals;
when rendering assistance to other vessels in distress;
while making way through the ice;
after having obtained special permission of the Harbour Master.

Note: Superiority in use of radio communication means is given to an icebreaker when leading a convoy of ships through the ice; in case there are two or more icebreakers in a convoy – to a leading icebreaker.

Vessels equipped with VHF radio-telephones must keep them operated in the calling Channel stipulated by the Obligatory Harbour Regulations when navigating within a port limit.

(e) Notice of arrival: At first 48 hours and later 2 hours prior to arrival at a port (roadstead) of destination (in case of tankers and ships carrying perishable goods – 72 and 12 hours respectively) Masters must give through the Inflot Agency notice to the Port Administration about vessel's ETA.

According to Charter Parties, Sale Contracts and other documents stipulating conditions of carriage of goods by sea, Masters should give necessary information to additional addresses at stipulated time.

The Port of destination Authorities should be immediately informed by the Master about all unforeseen delays during the voyage.

In the preliminary notice the Master should state the following information:
Name and Nationality (flag) of the ship;
Port of departure (last port of call);
Draft fore and aft; cargo carrying capacity, volume of holds. Measurements of hatches, number and location of tween decks, etc.;
Nature and total quantity of cargo and stowage plan; heavy lifts (over 3 tons) be shown separately;
Amount and position of water ballast (for tankers only);
Failure of cargo handling gear, if any;
Whether vessel requires supply of electric power from shore for the lighting purposes;
Health and sanitary conditions of the ship;
Request for port services.

Vessels calling at ports for bunkers, fresh water, provisions, etc., only, should advise their ETA, etc., to the Port Administration as per details shown above.

The Port of Call Administration should provide Masters of calling vessels with all necessary information regarding anchorage, berthing and handling of cargo not later than 2 hours prior to vessel's arrival.

All possible damages to a vessel which may occur either for lack of all relevant details mentioned above or due to untimely and/or incorrect information given by the Master to the Port Authorities when advising ETA, etc., are to be for the vessel's account.

Since for some ports time and terms of giving Notice of Arrival are different from those mentioned above, Masters are advised to look for the precise information in the entry for the particular Port of Call.

(f) Pilotage: Pilotage is compulsory for all vessels when calling or leaving U.S.S.R. sea ports, as well as when mooring and unmooring. In addition the Pilots perform shifting berths and other duties related to the harbour operations.

A Pilot having boarded a vessel shall be advised by the Master of the precise draft and other particulars necessary for safe pilotage of a vessel.

According to the Merchant Shipping Code of the U.S.S.R. the Master of a vessel shall be obliged to pay a fine in an amount of double the rate due as pilotage fee for incorrectly declaring the draft, length or breadth of a vessel or its net registered tonnage, irrespective of the liability established by law for the consequencies which may occur as a result of the incorrect information.

A Pilot should be ordered through the local Inflot Agency 12 hours prior to vessel's arrival at the Pilot boarding place. More accurate information should be given 4 hours prior to arrival unless otherwise stated in the Obligatory Harbour Regulations.

(g) Anchorages: A vessel approaching the Port of Call and not having been boarded by a Pilot immediately on arrival, or for any other reason, shall anchor in the anchorage area specially designated for the purpose and under no circumstances let its hull go across the boundaries of this area or prevent other vessels from using the leading lights, navigation marks or lights.

No anchorage is allowed in the prohibited zones shown on the charts, in special manuals for navigation and/or in the Obligatory Harbour Regulations as well as those announced in the appropriate Notices to Mariners.

No anchorage is allowed at a distance of less than 1.5 cable length off fairways and leading lines as well as in depths not providing a vessel with a safe anchorage while drifting on the anchor chain.

No vessel shall anchor within the water area of a shipbuilding yard after being refused to carry out repairs.

It is prohibited to change a vessel's anchorage by drifting.

Vessels carrying explosives or inflammable liquids must anchor in the areas recommended for them only.

All vessels when at anchor shall carry the lights or the marks as to the International Regulations for prevention Collisions at Sea. Apart from that every vessel by night, when at anchor, shall be illuminated from stem to stern with additional lights placed so that the hull be as far as possible visible from the surface of the water.

Vessels using a kedge anchor shall, in addition to the lights and the marks as to the International Regulations for Prevention Collisions at Sea, conspicuously display by night a white light and by day a red flag lowered from the stern by the anchor chain to the extent of half of the side's height.

In restricted visibility whether by day or night, every vessel when at anchor shall use sound signals conforming strictly with the International Regulations for Prevention Collisions at Sea.

All vessels when in port must hoist their national flags on the stern's flagstaff.

During Winter months all vessels when in Arctic ports must hoist their national flags daily until they are visible and during Summer from 0800 to 2000 hrs.

Masters of all vessels when at anchor are not allowed without the Harbour Master's consent, except in emergency, and/or in case of Port and Boarding officials, to give anybody permission to come alongside in a private launch or a small rowing boat whether under oars or sail and board a vessel.

Swimmers must not be allowed to come on board a ship.

Should, in case of emergency, swimmers have been taken on board or strangers have been discovered aboard a vessel, the Master of such ship shall forthwith without delay report the fact to the Harbour Master and shall later hand those people over to the Representatives of the Port Administration.

(h) Regulations for entering and leaving U.S.S.R. ports: When approaching U.S.S.R. ports all vessels must follow the recommended courses announced in issue No. 1 of the U.S.S.R. Notices to Mariners.

All vessels when approaching a port or a Pilot's boarding place as well as when leaving a port during the daytime must keep their National flags hoisted. A vessel's National flag must be kept hoisted on the stern flagstaff from 0800 hrs. in the morning up to sunset, and the U.S.S.R. National flag on the fore mast. In arctic ports during a prolonged period of light time National flags must be kept hoisted from 0800 till 2000 hrs.

Every vessel coming from abroad shall hoist Quarantine Signals of the International Code of Signals depending on health and sanitary conditions on board.

For entry permit a vessel must contact the Port Control service either by VHF radio-telephone or by means of visual signals, viz, by day, hoisting her call-sign, and by night, making call-sign signals in Morse Code by searchlight or by Morse-lamp.

No ship shall enter the Harbour until the proper signal has been hoisted at the signal station or by a pilot boat authorising such entry.

No vessel is allowed to enter the Harbour until the prohibition signals hoisted at the signal station shall have been lowered down.

If entry is refused a vessel must immediately slow down, alter course and if possible leave the fairway, and drift or drop her anchor in the recommended area.

Turn of entry to the Harbour is controlled by the Port Administration with regard to tonnage of vessel, nature of cargo, weather conditions in the port area, readiness of the port to start cargo operations and other circumstances.

Simultaneous entry of two or more vessels to the Harbour or vice versa is not allowed in the majority of ports.

In all cases a vessel entering the Harbour must give way to the outgoing one not preventing her manoeuvrability.

(i) Sanitary and Quarantine requirements: It is prohibited by law to contaminate inner and territorial waters of the U.S.S.R. with any kind of substances which are considered to be unhealthy for people or harmful to live resources of the sea. It is also prohibited to discharge into the sea oil contaminated, faecal, washing waters and oil residues; no rubbish, waste foodstuff shall be thrown into the water. The list of harmful substances is published annually in issue No. 1 of the U.S.S.R. Notices to Mariners.

Not later than 6 hours before arrival Masters of all vessels coming from foreign countries to the U.S.S.R. ports should advise Quarantine Authorities by radio through Inflot Agency giving full details of health conditions on board as well as sanitary conditions at the last port of call.

If medical assistance is required on board Master has to contact Inflot Agency. All vessels with open sewage system are prohibited to call at ports of the U.S.S.R.

No shore connection is allowed to a vessel until free pratique is obtained.

Foreign vessels are granted free pratique after the arrival formalities have been accomplished by the Boarding Officials, viz, Health Authorities, Customs and Immigrations.

Masters are advised to ask a Sanitary Officer for inoculation, vaccination, fumigation, de-contamination, etc., if required, whilst he is on board a ship together with the other Boarding Officials.

Veterinary Certificates of Good Health are required for the livestock, all kinds of meat, animal food and raw meat stuff brought to the U.S.S.R. ports from abroad. Certificates should be issued by the proper authorities of the country from which the cargoes have been exported.

Masters should have a Phytoquarantine Certificate for the goods of vegetable nature.

It is prohibited to take ashore fruit, vegetables, grain seeds, plants, plant products, etc., without a certificate issued by a local branch of the U.S.S.R. Agricultural Quarantine Inspection; animals and birds are also not allowed to be brought ashore without a Veterinary Certificate.

(j) Documents:

Upon arrival at a U.S.S.R. port: The following ship's documents should be produced by the Master to the representative of Inflot Agency for further examination by the boarding officials upon arrival at a U.S.S.R. port (Also see "Annex 2" below):

Ship's Patent.
Measurement Certificate.
Load-line Certificate (or International Load-line Exemption Certificate).
Passenger Ship Safety Certificate.

Upon arrival at the port of destination the Master must fill in the following standard IMCO shipping documentation forms:

General Declaration, 2 copies.
Cargo Declaration, 4 copies.
Ship's Crew Personal Effects Declaration, 2 copies.
Crew List, 4 copies.
Passenger's List, 4 copies..

In Addition the ship's administration should declare to the Inspector of the Health Authorities the following documents:

Ship's Health Certificate;
Deratisation Certificate;
International Certificates of Vaccination;
Maritime Sanitary Declaration.

The Master fills in a form of the Master's Declaration (Shipowner's address, cargo, cases of illnesses on board, if any, etc.) with the Agent's assistance.

In accordance with article 38 of the Merchant Shipping Code of the U.S.S.R. a foreign flag ship which, on calling at a U.S.S.R. port, raises doubts as to her meeting the requirements of safe navigation may, irrespective of whether she possesses the necessary ship's papers mentioned above, be subjected to an examination by way of technical survey on the same basis as ships sailing under the State Flag of U.S.S.R.

The Obligatory Harbour Regulations to be complied with fully during a vessel's stay at a U.S.S.R. port should be handed over to the Master either by Pilot or by representative of the Harbour Master's Office, or by Agent.

ANNEX 2

The Memoranda for Masters of Foreign Vessels calling at Soviet Ports.

1. On arrival of the ship the Master is to submit to the representatives of the port authorities the following documents (IMCO forms) duly signed by ship's administration:

General Declaration (Form I). Filling in of points 8 and 11 is not compulsory (5 copies).

Cargo Declaration (Form II). (4 copies). Filling in of point 6 is not compulsory; points 7, 8 and 9 are to be filled in only for:

a) cargoes for which Bills of Lading were not issued (names of Shippers and Consignees to be stated);
b) transit cargoes;
c) cargoes for other Soviet ports;
d) cargoes of agricultural origin;

Ship's Stores Declaration (Form III) – not required.

Crew's Effects Declaration (Form IV). Amount of Captain's and Crew members' valuables (gold, silver, platinum, jewellery, bonds, travel checks, etc.), personal firearms and cartridges (ammunition), explosives and narcotics are to be stated in point 2 (2 copies).

Crew List (Form V) (4 copies).

Passenger List (Form VI) (4 copies).

2. The Master of a ship is to instruct all members of the ship's crew that in accordance with the Rules in force in Soviet ports:

Exportation and importation of Soviet currency is forbidden;

No articles are permitted to be taken ashore or brought on board the ship without permission of the Custom House Authorities;

Articles taken ashore or brought on board the ship and concealed from Custom's control shall be regarded as smuggled goods liable to confiscation with a fine imposed;

Likewise, the sale of any articles of foreign origin on the territory of the U.S.S.R. will be regarded as smuggling;

No wastes shall be thrown into the water or on the quay; the discharge of oil contaminated water and/or oil residues is prohibited;

All mooring ropes must be fitted with rat-guard plates;

Only one gangway must be led ashore at night when loading or discharging is not carried out;

It is prohibited to take ashore grain, seeds, plants, plant products, soil, etc. as well as animals and birds;

Violation of the above-mentioned rules will entail penalty in accordance with the laws of the U.S.S.R.

Upon sailing from a U.S.S.R. port: No other documents apart from those mentioned are required in order to obtain the authorisation to leave the port.

No vessel is to get under way without having obtained the permission of the Harbour Master.

The authorisation to leave the port shall be given after a vessel herself and her draft shown in the Master's Statement have been checked by a Port Authorities' representative.

The Harbour Master may not allow a vessel to leave the port, if:

(1) The Cargo Loading Regulations have not been fulfilled, *i.e.* a vessel is considered overloaded or wrongly loaded in case:

a) a vessel's load lines corresponding to the maximum depth to which she should have been loaded are under water without any list;
b) the cargoes loaded in the holds and/or on deck have not been made fast in a proper manner or have not been made fast at all;
c) a vessel has a bad list* caused by faulty loading or her stability does not correspond with the ship's documents;
d) a vessel loaded with bulk or liquid cargoes has not used the necessary materials or accommodations to prevent cargoes from shifting or overflowing in case of vessel's pitching and rolling;
e) the deck cargo is considered as danger to the safety of a vessel and the safety of life on board caused by faulty loading;
f) the corresponding regulations for loading of dangerous cargoes or cattle to be carried by vessel have not been broken;
g) other loading regulations have not been abided by in the course of loading.

(2) Under other circumstances which may cause a danger to the safety of a vessel and the safety of life on board, as well as in case when the ship's documentation regulations have been infringed.

(3) When the port dues, tolls and fines have not been paid.

All expenses which may occur due to a vessel's possible delay in the port in connection with the reasons stated above are to be for the Owner's account.

Note: *According to the Harbour Regulations a vessel is not allowed to leave a port if her list exceeds 5° or she has a trim by bow which was not specified by her construction.

(k) Customs Regulations and Allowances: Commodities and articles not designed for the port of call are not allowed to be taken ashore and should be sealed by a Customs Officer, if necessary, immediately after the clearance formalities have been accomplished or after the part of the delivered cargo loaded and stowed at the same place has been discharged.

In all U.S.S.R. ports alcohol and tobacco articles are allowed to be taken ashore in small quantities and for personal consumption only.

(l) Berthing: Berthing can only be effected with tug assistance and a State Pilot on board. Likewise, no vessel shall leave or shift berth without employing the services of a Pilot authorised by the Port Administration to make the voyage in question.

Vessels must take up the berths assigned to them and conform strictly to the Obligatory Harbour Regulations in force.

A Pilot or the Agent shall provide the Master with all necessary information as regard to depths, tugs, conditions in the Harbour, etc., before mooring and shifting berth starts.

The responsibility for the safety of a vessel during her manoeuvring and berthing as well as for possible damages to a berth or other port facilities shall always rest with the Master.

No vessel is allowed to change berth due to handling of cargo or for any other reason unless the main engines, the mooring winches, the steering gear, etc., are in good working order and there is sufficient number of the members of the crew to ensure shifting berth when required.

It is strictly prohibited to work with vessel's propellers when lying alongside berth. To avoid damage to the underwater parts of a berth while mooring or unmooring every vessel must have the main engines going "dead slow" until her stern is 10 m. from the quay.

When berthing, Masters should use strong and reliable mooring lines and make them fast over the quay pile-moorings and bollards only. It is strictly prohibited to make fast mooring lines over any part of the quay equipment which has not been intended for that purpose.

When lying alongside berth, every vessel must have a gangway or a gangway board with a lifeline secured along, led ashore and made fast. There should be a life net under the gangway platform and a lifebuoy nearby. Gangways must be sufficiently illuminated at night.

(m) Stay in port at berths: When lying alongside berths, all vessels to be moored by long safe ropes which are to be kept fast at all times, and constant watch should be kept by day and at night.

All mooring ropes must be fitted with rat-guard plates.

From sunset to sunrise all vessels' decks, cargo decks and gangways must be illuminated.

Every vessel, whether in the outer roads or in the harbour, must always have on board a sufficient number of crew to be able to ensure both the ship's safety and her everyday routine. Vessel's fire-fighting and life-saving equipment must always be ready for use on board or to render assistance to other vessels or shore objects in case of emergency.

When in port, no vessel is allowed, without having obtained the Harbour Master's permission, to make repairs to the main engines or to the ship's auxiliary equipment thus depriving her of the opportunity to shift berth at short notice in case of emergency.

It is not allowed, without the permission of the Port Administration, to use vessel's boats, underwater oxygen and any underwater apparatus of other types.

No vessel is allowed to clean boilers or discharge any sort of chemicals or organic products into the water, giving off smoke and sparking from vessels' funnels.

(n) Ship's movement in the harbour and shifting berths: No vessel shall leave or shift berths without the permission of the Port Authorities. In case there are no provisions in the Contract of Carriage of Goods by Sea or in the Bill of Lading, a vessel shall accomplish one shifting from berth to berth during the course of her loading and shifting upon unloading to the loading berth at the Owners' risk and expense. Any subsequent shifting shall be at the expense of the goods.

All shiftings in the port connected with a vessel's needs, viz. bunkering, loading supplies and/or provisions, making repairs, etc., shall be at the expense of the vessel.

All haulings both during the course of loading and unloading shall also be at vessel's expense.

(o) Tugs assistance: Tugs, if necessary, are usually ordered by the Master according to a Pilot's advice.

In some ports use of tugs during mooring and shifting berths is compulsory due to the heavy conditions of navigation.

Masters shall be charged for tug assistance, if required, according to the current port rates. Time for use of tugs shall be counted from the moment of leaving their usual berthing place up to the moment they return.

Notes: In all the U.S.S.R. ports 1 hour time is fixed for passage of a tug-boat to a vessel from her usual berthing place and vice versa after she has accomplished her assistance, except the port of Archangel where 2 hours time is applied. For detention of a tug-boat a vessel shall be charged as per usual working time.

For cancellation of a tug, a vessel shall be charged full rate, including detention time and time of passage of a tug from the berth to the vessel and vice versa.

When ordering a tug for unmooring, Master should fill in and sign a special application form given by the Agent. The actual time of completing the towage shall be approved by the Master of a towed vessel.

In ports where the towage is compulsory when mooring and shifting berths, the Master shall be charged for the tugs' assistance whether used or not, and having refused tugs shall be held responsible for the consequences thereupon.

(p) Notice of readiness: In case there are no special provisions in the Contract of Carriage of Goods by Sea, the Master shall, during the established office hours upon the accomplishment of Customs formalities and having obtained free pratique, deliver through his Agent in the port, viz. Inflot Agency, a notice of the ship's readiness for loading or unloading to the consignee or the shipper.

The notice of the vessel's readiness shall be considered accepted if she is actually ready to load the cargo into or unload it out of all the vessel's holds or tanks.

(q) Handling of cargo: All cargo handling areas in the ports are under control of the Port Administration which shall provide vessels with labour, tally staff, sheds and warehouses, employees, etc.

To ensure successful handling of cargo the vessel shall, when required by shippers or consignees, receive or discharge cargo day and night, as well as on Sundays and holidays, furnishing free of charge all necessary cargo handling gear. Though in most ports the cargo handling is done by port cranes both from the quays and lighters, a vessel shall, in some ports, use her own cargo handling equipment, which has to be in good working condition.

In the latter case, the Master shall produce to the Agent the Cargo Equipment Certificate which must be valid.

Loading or unloading time is calculated as to the rates stipulated in a Charter Party or according to the Customs of the Port in the absence of same.

Should the port labour participate in the opening or closing of hatches, a vessel's administration shall be responsible for the rules of safety engineering to be complied with.

Opening and closing of mechanised ship's hatches shall always be done by the ship's crew.

Should shore cranes be used for loading or unloading instead of a vessel's cargo-handling equipment, the Master shall beforehand remove aerials, aerial halyards, stay rods, wires, etc., crossing the air space over a ship's hatches and preventing the shore cranes' derricks from free circulation.

The vessel's derricks shall not project over the sides.

(r) Agency: All foreign vessels upon arrival at the U.S.S.R. ports are attended by the maritime agencies Inflot.

Inflot Agencies provide foreign vessels with the following services:

Inform the Port Authorities and other organisations about vessels' expected time of arrival (ETA), nature and quantity of cargo to be handled, expected time of loading or discharging, etc.;

Render assistance to the Masters in obtaining Pilots, tugs, berths, launches, etc.;

Perform all the necessary formalities connected with the vessels' arrival and departure;

Ensure that Masters are acquainted with the Port Rules, Obligatory Harbour Regulations as well as other documents and instructions issued by the Port Authorities;

Give advice to the Shipowners and other interested parties regarding vessels' movement and the prospects for the handling of cargo;

Render help in speeding up cargo handling operations;

Provide vessels with supervisors and tallymen;

Prepare time sheets and submit them to the Masters, Port Authorities and Shippers (Consignees) for their further approval;

Sign on Masters' behalf cargo and other documents;

Arrange bunkering, delivery of fresh water, provisions, technical supplies and all kinds of ship-repairs;

Render help to the members of the crews in obtaining medical assistance;

Make payment of dues, charges, fines (if any), etc., on behalf of the Shipowners and for their account;

Take all necessary measures for improvement of the handling of cargoes and ships' services;

Look after the Court (Arbitration) cases and cargo claims on behalf of the Shipowners;

Make Sea Protests as well as translation and duplicating of any documents on Masters' requests;

Repatriate members of the crews from the U.S.S.R. to their home ports;

Invite surveyors qualified by the U.S.S.R. Register of Shipping to conduct vessels' surveys;

Make extension of ships' documents;

Render help to the Shipowners in delivering and redelivering of their vessels on time charter;

Assist in arranging cargo fumigation on board;

Perform any commissions on the instructions of the Shipowners in regard to the ships' services and protection of their interests before any Authorities.

It is in the interest of the Master to advise Inflot Agency timely information as regard to a vessel's name and flag, ETA, gross register tonnage; draft fore and aft; position of cargo in hold (stowage plan); number, weights and location of heavy lifts, number and length of oversized (over 9 m.) pieces and Owners' cable address and telex number thus putting the Agent in a position to calculate the approximate sum of the disbursement expenses and ask the Shipowners to remit same (disbursement accounts are to be paid before vessel's departure).

Note: Bearing in mind the fact that most of the shore offices are closed on Sundays and holidays, the Master shall cable to Inflot Agency well in advance his order for bunkers, repairs, technical supplies and cash to enable the Agent to make necessary arrangements.

All branches of Inflot Agency work round the clock, including Sundays.

Cable address of any branch of Inflot Agency is "Inflot", e.g. "Inflot Leningrad".

(s) Fire safety measures: Fire safety measures at U.S.S.R ports must comply with the provisions of the International Code for the Carriage of Dangerous Goods by Sea. Every vessel upon arrival at a port must keep constant fire watch day and night and have fire-fighting and life-saving equipment always ready for action. Members of the crew must keep strictly to the Fire Safety Regulations especially during vessels' stay at oil and timber berths. Giving off smoke out of the funnels is strictly prohibited. In all the U.S.S.R. ports a fire brigade could be called over the phone by dialling 01 in case of fire.

(t) Medical assistance: Medical assistance, if required, is available, including vaccination and inoculation as well as dispensary and hospital treatment in all the U.S.S.R. ports. In case of emergency an ambulance or a doctor should be called for by telephone – 03 in all the ports.

(u) Customs of the ports: Customs of the ports should apply in case:

(1) there is no Contract of the Carriage of Goods by Sea at all;

(2) there are no provisions in a Charter Party or in the Bills of Lading in respect of items covered by these Customs;

(3) a Charter Party or a Sale contract and/or any other Contracts of the Carriage of Goods by Sea specially refer to these Customs of the Ports.

(v) National and general holidays of the U.S.S.R.: National and general holidays in the U.S.S.R. are fixed.

5 days working week with 2 holidays has been introduced for most of the industrial enterprises, government and commercial offices and other institutions. Saturdays and Sundays are weekly holidays in the U.S.S.R.

The other holidays are:

1st January (New Year's Day); 8th March (International Women's

Day); 1st and 2nd May (Days of International Workers' Solidarity); 9th May (World War II Victory Day); 7th and 8th November (Anniversary of the Great October Socialist Revolution, 1917); 7th October (U.S.S.R. Constitution Day).

Places of Recreation for foreign seamen: In the majority of the Soviet commercial sea ports foreign seamen can spend their spare time in the International Seamen's Clubs which can offer concerts by professional and amateur actors and singers, evenings of public hearing of the recorded Russian and foreign music.

Soviet and foreign films, etc. The sightseeings are usually organised by the local excursion bureaux.

ARCHANGEL: 64.32 N. 40.31 E.

LOCATION: A White Sea port. Archangel is situated at the mouth of the Severnaya Dvina river, in the S.E. corner of Dvina Bay. A part of the harbour is situated at the Northern end of the Povrakulsky Island, at the junction of the Maimax river and the Kuznechikha river, and is called the Economia Avant-port. The total length of the port area is about 30 miles.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. Notices of ETA in accordance Soviet Wood Charter Party. Pilot boat located in area of the light buoy "Mudyugsky I". VHF Channel 16. Pilot boat is tug-boat with word "Pilot" on wheelhouse. Vessels awaiting Pilot may anchor at safe distance to North from pilot boat location. In event bad weather pilot boat goes to shelter, being available by VHF radio.

While waiting for a Pilot, vessels may lie at anchor at a safe distance to the North from the pilot boat location.

In the event of bad weather a Pilot shall board a vessel at a sheltered place shown by him.

When a Pilot is not able to board a vessel due to weather conditions, a pilot boat is usually situated on the Southern side of the Mudyug Island. In this event vessels should anchor at the entrance of the channel from seaward and wait for a Pilot's arrival.

ANCHORAGES: There are several places which can be used by foreign vessels for anchorage. They are:

(1) The outer roads with depths from 10.0 m. to the North and N.W. from the reception buoy "Mudyugsky I".

(2) The Chizhovsky roadstead with depths of 7.0 – 9.0 m. is used by all vessels while the Customs formalities are carried out both before entering and leaving the port.

(3) The Solombala roadstead with depths of 5.0 – 9.0 m. is used by vessels for anchorage while awaiting a berth for loading cargo.

(4) The roadstead of the Maimaksansky timber port with depths of 5.0 – 9.0 m. is used by vessels while awaiting a berth for loading cargo or when awaiting good weather for going to sea being fully loaded.

(5) The Lower-town roadstead with depths of up to 6.0 m. is used for anchorage by coastal traders.

(6) The Town roadstead with depths of 6.0 – 9.0 m. is used for anchorage by vessels while waiting for bunkering or time for passage under the railway bridge.

(7) The Krasnoflotsky roadstead with depths of 9.0 m. is used for anchorage by vessels awaiting a berth for loading or a passage time under the railway bridge. The ground at all roadsteads – mud and sand; anchoring is performed according to the Pilot's recommendations.

RESTRICTIONS: Ice breaks up in April. Port area open from end of April through to November.

During the time of high water vessels can enter the port through the approach channel Berezovy Bar if having length not more than 160 m. and draft not exceeding 7.9 m. Changes of passage drafts are published in the U.S.S.R. Notices to Mariners. Vessels going to timber mills No. 2 and No. 3 as well as to the cargo area Bacariza pass through the central draw span of the railway bridge once during 24 hours (0100 – 0330 hrs.). During bad visibility (less than 5 cables) movement of vessels within the port is not allowed.

HEALTH: All vessels coming from foreign countries inspected by Sanitary Office. If no diseases vessel obtains free pratique. If vessels entering after calling at another U.S.S.R. port, pratique automatic.

RADIO: All information from sea may be routed through Murmansk Radio (UMN) and Archangel Radio (UGE), A1 500 kc/s., A3 2182 kc/s.

All vessels when approaching the port of Archangel should establish radio contact through the coastal "Archangel Radio" station which operates 24 hours per day on the following frequencies:

Call Sign	*Frequencies*		*Type of trans-mission*	*Time*	*Remarks*
	working (kc/s)	*calling* (kc/s)			
UGE	500	500	A1	H24	
UXN	6237	6268.5	A1	H24	Operates from 05 mins. – 15 mins. each hour.
	8610	8362	A1	H24	
	12795	12540	A1	H24	
	16867.5	16726	A1		
Archangel Radio	2182	2182	A3	H24	During navigation only
	13119.5	—	A3H		
	(mHz)	(mHz)			
"Port" (Port control)	156.80	156.80	F3	H24	„
"Lotswakhta" (Pilots' watch)	156.80	156.80	F3	H24	„
"Inflot" (Inflot agency)	156.80	156.80	F3	HX	„

The storm signals station is situated in the Solombala area on the embankment of the Severnaya Dvina River named after George Sedov (64° 35′ N., 40° 30′ E.).

Storm signals are shown by the International Code of Signals by day and by Morse system at night.

Masters of vessels proceeding to the port of Archangel should advise ETA and all necessary information to the Inflot Agency as per conditions of the "Soviet Wood" Charter Party.

24 hours prior to arrival advise ETA to Inflot Agency. Four hours prior to approaching the "Mudyugsky I" Masters should advise more precise time of arrival.

TUGS: If necessary ordered 2 hours before arrival and normally join vessel near berth. Usually use ship's lines.

BERTHING: To certain extent depends upon tides. 37 berths available with depths alongside up to 8.5 m.

There are a large number of berths in the port along the river front, as well as at the Economia Avant-port.

Berths are equipped to handle timber, wood-pulp, paper, machinery and general cargo. There are enclosed warehouses and concrete floor sheds in the port.

CARGO HANDLING FACILITIES: Berths of the commercial port are equipped with mobile electric cranes of up to 20 tons capacity. Loading of timber from berths of timber mills is effected by shore cranes and vessels' cargo gear. There are also floating cranes from 5 to 100 tons capacity as well as other cargo handling equipment and interport transport means.

BRIDGES: Vessels proceeding to load cargo at sawmills 2 and 3 have to pass under bridge which is opened once a day at midnight.

STEVEDORES: No particular ETA advices to stevedores/shippers required except those mentioned in Soviet Wood C/P. Loading rates, etc., also stipulated by Charter Party.

Mobile electric cranes of up to 20 tons capacity are operated on the quays. There are also floating cranes of up to 50 tons capacity, other cargo handling equipment and intra-port transport facilities. Sometimes, cargo handling is by vessels' gear.

MEDICAL: If any medical attention or prompt assistance required, Master has to contact Agent. No advance notice required. Clinic and hospital available.

DENSITY: Fresh water practically throughout port.

FRESH WATER: Usually delivered by self-propelled barges (minimum charge for 15 tons). A few berths equipped with shore water lines.

FUEL: Bunkers (gas oil and marine diesel fuel) can be taken from barges stationed in the Town roadstead or can be delivered by lighters.

FIRE PRECAUTIONS: While lying alongside timber berth vessel to take maximum fire precautions.

GANGWAY/DECK WATCHMEN: Not available from shore. Usual watch kept by ship's crew.

OPENING/CLOSING HATCHES: Normally carried out by ship's crew.

CERTIFICATES:

Seaworthiness.
Measurement.
Loading Line.
Cargo Equipment.
Safety Equipment Certificates.
Deratisation Certificate.

CUSTOMS ALLOWANCE: Tobacco/wine: No quantity limits, but not allowed to be brought ashore.

IDENTIFICATION CARDS: Only Seamen's Books required.

CONSULS: No Consuls in Archangel.

REPAIRS: All types of repairs possible, also underwater surveys.

DRY DOCKS: There are floating docks with capacity up to 7,000 tons.

REPATRIATION: Repatriation and crew changes require visa formalities.

AIRPORT: Airport near town. Served by regular airlines.

TIME: GMT plus 3 hours (All year).

HOLIDAYS: General holidays: all Sundays and Saturdays: January 1st (New Year's Day); March 8th (World Women's Day); May 1st, 2nd (World Labour Day); May 9th (Victory Day); October 7th (U.S.S.R. Constitution Day); November 7th, 8th (Great October Socialist Revolution Day). Cargo work on these days at shippers' discretion.

POLICE/AMBULANCE/FIRE: Police 02; Ambulance 03; Fire 01.

TELEPHONES: Can be arranged on board.

SERVICES: Compass adjusting, radar and radio repairs, etc.

SHORE LEAVE: Each crew member properly signed in Ship's Articles and having valid seamen's Book allowed ashore.

DELAYS: On account of rain when loading timber.

NAVIGATION: Masters proceeding for loading timber should bear in mind that the swing bridge on their way to timber mills No. 2 and No. 3 is open once daily at midnight.

All vessels with drafts of less than 3.6 m. especially when engaged in towing timber rafts, should keep out of the way of deep-drafted vessels when passing through narrow places and approaching channels both at sea and in the river, and should not hamper their safe passage in such places. They should also safely pass vessels engaged in dredging of a channel.

When approaching a bend in a channel, every vessel should beforehand give a signal by 1 prolonged blast on her whistle or siren, reduce her speed and when it is safe and practicable, keep to that side of the channel which lies on the starboard side of such vessel.

Every Master when passing through a narrow channel, or approaching a bend in a channel should take positive early action prescribed by the International Regulations for Preventing Collisions at Sea to avoid a risk of collision with a vessel approaching from the other direction.

Deep draft vessels shall not overtake each other when navigating in the channel of the Beresovy Bar. A vessel proceeding to the port along the course of the channel must keep out of the way of another vessel leaving the port.

No vessel shall navigate in the port harbours in restricted visibility when navigational lights, marks, leading lights, buoys, etc. are not visible.

Ice: At the head of Dvina Bay drift-ice extends as far as 12 miles from the shore by the end of November. The Severnaya Dvina estuary usually gets frozen over at the beginning of November. At Dvina Bay the ice usually breaks up in April and at the Severnaya Dvina estuary – at the beginning of May. Thus, navigation in the port area lasts between 6 – 7 months from May till October.

Powerful ice-breakers, ice-strengthened vessels and tugs are maintained by the Port of Archangel Authorities to assist in navigation of the Dvina Bay waters and off the coast when ice conditions prevail.

Tide: The tidal range at the head of Dvina Bay reaches 0.8 m. – 1 m. and at Mudyug Island 0.1 m. – 0.5 m.

The in-going flood stream is usually stronger and about 1 hour longer in duration than the out-going ebb stream.

Sometimes the in-going stream at the bar of Severnaya Dvina may be hardly observed, being reduced to a few minutes of slack water. It may run steadily for some time then gradually attains its usual strength and goes on to set up to the time of high water.

The tidal streams in the Severnaya Dvina are considerably influenced by both strength and direction of the wind.

Moderate Northerly and Westerly winds increase the height of the tide and hold the fall of the water.

Only the in-going flood streams have been observed at the Severnaya Dvina estuary at springs. The extreme tidal range of the water level observed there is about 4 m.

DEVELOPMENTS: For the immediate future no draft increase expected. Some berths under reconstruction and cranes being installed to load timber.

AUTHORITY: Harbour Master.

AGENT: Shipping Agency “Inflot”, Archangel. Tel. 35874, 34040. Telex: 242115, 242231.

BATUMI: 41.39 N. 41.38 E. (See Plan Book)

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. Batumi situated in South of Black Sea Caucasian coast, at head of Batumi Bay. Navigation is year round. Navigational range marks to note when approaching port are: Batumi beacon, Burun-Tabia light, Batumi light buoy with siren and Batumi leading light marks. When proceeding Batumi, Master should give 96 hours notice prior arrival, advising Port Controller and “Inflot” Agency: time of arrival, description and quantity of cargo brought in, location, ship's draft and length, as well as declare services required. 4 hours prior to approaching port, Master shall advise more precise time of arrival. Inflot will arrange Pilot.

Pilot boards vessel either at the Receiving Buoy or in the outer port roads. Watch is kept by a pilot boat day and night.

ANCHORAGES: The port harbour is protected by a mole from the seaward and provides a safe anchorage except at times when S.W., West and N.W. winds blow and the “Tyagun”, strong variable current with surge is formed.

At the time of “Tyagun” vessels are recommended to stop cargo handling operations and go out to sea.

During S.W. winds which are considered particularly dangerous and usually accompanied by heavy surge, Masters should observe special precautions and take all necessary measures to avoid impact with the mole.

The outer roads of the port with depths of about 9 – 20 m. and 0.5 cable in width, extend for a distance of about 1.5 miles to the E.N.E. from the Batumi light buoy along the edge of the shoal. The bottom is mud and sand.

The inner roads are situated between the Western coast of the Batumi Bay and the shoal extending from the Southern and S.E. coasts of the Bay. Depths in the inner roads are between 25 m. – 11.5 m.

The anchorage in the inner roads is exposed to North winds. However it is not safe during strong winds blowing from other directions.

Every vessel when in the inner roads must take necessary measures so as not to drag her anchors.

The recommended anchorage is in the outer roads at a distance of 7.8 cables to N.N.E. from the Eastern side of Batumi Point, depths 9 – 14.4 m.

In the outer roads vessels may anchor only after having obtained the Harbour Master's permission and according to Pilot's recommendation.

In the inner roads vessels may obtain anchorage only Eastward of the entrance leading line. It is strictly prohibited to lie at anchor both on the leading line and to the West of it.

BALLAST: In case of stormy weather, in Autumn and Winter particularly, vessels without cargo must enter the port with ballast water on board, having ensured fore draft not less then 1.5 – 1.8 m.

Ballast water should not be contaminated with oil residues.

RESTRICTIONS: Vessels may enter and leave the port at any time of day and night. All vessels when entering or leaving the port must have keel clearance of not less than 0.3 m. (1 ft.).

In the event of stormy weather vessels approaching the port at time of S.W. and N.W. winds particularly, should obtain Harbour Master's entry permit. Vessels coming to the port without cargo are obliged to enter the port with ballast water taken in such a way that bow draft should not be less than 1.5 – 1.8 m. Ballast water must be clean. If due to the “Tyagun” vessels are not allowed to enter the harbour, they should anchor either in the outer or inner roads.

All necessary information as regard to changes of wind, possibility or turn of entry to the port for vessels at anchor in the outer roads, is given by the Harbour Master over the VHF radio-telephone or by the signal station by flags of the International Code of Signals, in Morse Code or by semaphore signals.

MAX. SIZE: For oil carriers: Berth No. 1, 175 m. LOA 31.6 ft. draft; Berth No. 2, 165 m. LOA 30.5 ft. draft; Berth No. 3 165 m. LOA 30.5 ft. draft; Berth No. 4, 150 m. LOA 29.5 ft. draft: Berth No. 5, 212 m. LOA 29.5 ft. draft. For Cargo ships: Two berths where vessels may discharge. Maximum draft 32.5 ft.

RADIO: All vessels when approaching the port of Batumi should establish radio contact via Batumi Radio port radio station operating 24 hours per day on the following frequencies:

Call Sign	*Frequencies (kHz.)*		*Type of Trans-mission*	*Time*
	Working	*Calling*		
UHK	8695	8366	A1	H24
“Batumi-Radio”	2182	2182	A3	H24
“Udarnik – 2” (Port Control)	156.8*	156.8	F3	H24
“Usluga” via CPR**	156.8*	156.8*	F3	H24

*Frequencies are given in mHz. **CPR – Central Port Radio Station.

Shore signal station is situated 1.6 cables W.N.W. from Batumi Point. International Code signals, and sometimes storm signals, are hoisted at the mast of the signal station.

BERTHING: The berths of the port with depths alongside of up to 10.5 m. are equipped to handle crude oil and oil products, bulks (coal, grain, ores) and general (machinery and mechanical equipment) as well as passenger shipping. There are covered warehouses and concrete floor sheds in the port.

A vessel should lie at a berth with her bow directed to the port entrance and with her anchor dropped from the proper side. Berthing in the harbour may only be effected with tugs' assistance.

A vessel may be berthed at the outer side of the Oil Jetty after having obtained the Harbour Master's permission.

Vessels entering or leaving the harbour are not allowed to pass vessels loading at the outer (Northern) side of the Oil Jetty at a distance of less than 80 m.

The berths of the port are equipped with electric cranes of up to 10 tons capacity. There is also a floating crane of 100 tons capacity. Other cargo handling equipment, covered warehouses and concrete floor sheds are available.

TANKERS: Mooring buoys are placed to the North of the oil jetty and a pipe-line for loading tankers of up to 40,000 d.w.t. is led up to them. Mooring of such tankers is effected with tug assistance under control of the Senior Port Pilot. Vessels moored to these buoys should drop 2 anchors from the bow with 7 – 8 shackles of anchor chain and strong mooring lines should be lead to mooring buoys from the stern and made fast.

When lying at mooring buoys a vessel should keep a 24 hour VHF watch on receiving Channel and observe corresponding rules of the Port.

TIDE: The range of water level in the port area is small and is due to the effects of strong winds. The maximum range observed 0.6 m.

MEDICAL: Medical attendance in local seamen's hospital. Masters to advise by radio prior arrival of medical attendance required on board.

DENSITY: 1018.5.

FRESH WATER: Supplied ex-shore to ship directly. Maximum pressure 20 t.p.h. Also supplied ex water barge. Maximum quantity delivered by barge is 650 tons. Rate about 60 – 80 t.p.h.

FUEL: Bunkers may be taken at the oil berths and can also be delivered by bunkering vessel to a ship handling non-dangerous cargo. In the latter case fire precautions must be strictly observed by the vessel taking bunkers.

FIRE PRECAUTIONS: No special precautions. There is 1 fire-fighting boat.

OPENING/CLOSING HATCHES: According to Charter Party and contract.

CUSTOMS ALLOWANCE: Tobacco. No restrictions. Wine and/or spirits. No restrictions.

IDENTIFICATION CARDS: Not required.

CONSULS: Turkey.

REPAIRS: Only minor repairs are possible.

AIRPORT: Batumi connected by airlines with different towns in Soviet Union. Airport situated about 5 km. from port.

TIME: GMT plus 4 hours (All the year round).

HOLIDAYS: New Year's Day; 8th March (Women's Day); 1st May; 7th October; 7th – 8th November; but port works on those days.

SHORE LEAVE: Crew members allowed ashore till midnight.

SHIPMASTER'S REPORT: There is now a sea-loading berth at this port immediately outside the harbour, the vessel lying to 2 anchors and stern on close to the breakwater and close Eastward of the harbour entrance.

The stern is secured to 2 buoys, using ship's ropes, 5 to a port quarter buoy and 3 to a starboard quarter buoy.

The bow is in about 60 ft. of water and the stern in about 42 ft., and vessels of up to about 40,000 tons d.w.t. are loaded there, this vessel loading safely to a draft of 37 ft. 6 in.

Two 10-in. pipe-lines are connected on the starboard side, 1 for discharging ballast ashore and 1 for loading at a rate of about 1,600 t.p.h. The charge for discharging ballast ashore is 7 kopeks per ton and it is not permitted to discharge any ballast into the harbour.

1 copy of a money list was required.

AUTHORITY: The Port of Batumi Authority.

AGENT: The port of Batumi Main Maritime Agency “Inflot”, postal address: 5 Gogebashvili Street, Port of Batumi, U.S.S.R. Cables: Inflot Batumi. Tel. 9-24-15.

BELGOROD-DNESTROVSKY: 46.12 N. 30.21 E.

GENERAL: The commercial sea port of Belgorod-Dnestrovsky is situated on the North-Western part of the Black Sea coast, on the right side of the Dnestrovsky Estuary (the Southern Basin), at a distance of 80-90 km. to the S.W. of the port of Odessa. Navigational season lasts all the year round, with powerful (600-1,200 h.p.) tug assistance during severe Winters. The Tsaregradsky Lighthouse and the Tsaregradsky Leading Line should be used as guiding points when approaching the port.

Vessels should approach the port along the channel of the Dnestrovsky Estuary which is provided with a good navigational marks system.

PILOTAGE: A Pilot usually boards vessel at Reception Buoy No. 1 (Lat. 46° 04′ N. Long. 30° 30′ E.) situated 1.2 miles to the S.E. of the Tsaregradsky Lighthouse.
ANCHORAGE: The port outer roads with depths of up to 14 m. are situated 0.5 mile to the S.E. of the Reception buoy. The holding ground is good. There are 2 inner roadsteads. One situated on the beam of the Bugas port area and well protected from wind from all directions but Southern is used for anchorage while awaiting lifting of the bridge. The second inner roadstead is situated within the port area of the protecting mole.
RESTRICTIONS: Vessels are allowed to navigate along the channel during daytime only. The port can be entered by vessels with draft of up to 5.2 m. and the maximum height (from the water level) of 26.5 m. Vessels having draft more than 4.5 m. should follow the channel at a speed not more than 5 knots.

During bad visibility vessels which are not equipped with radar are not allowed to navigate along the channel. Vessels are piloted under the bridge 2-3 times daily (during daytime only).
RADIO: Communication is effected through the port radio station "Belgorod-Dnestrovsky-Radio"

Call sign	*Frequencies (kHz)*		*Kind of transmission*	*Time of work*
	working	*calling*		
"Belgorod-Dnestrovsky-Radio"	156.8	156.8	F3	H24

Notice of Arrival: When approaching the port of Belgorod-Dnestrovsky Masters of vessels should not later than 48 hours prior to arrival advise the Harbour Master of ETA, draft, maximum height of a vessel in ballast (from the water level up to the top of a mast), kind and quantity of cargo, services required to the vessel. 24 and 4 hours prior to arrival the Master should advise more precise ETA.
TUGS: If necessary, are ordered by the Master after having consulted the Pilot.
BERTHING: The berths of the port have depths alongside of up to 6.5 m. and are equipped to handle timber, containers, generals (rubber, non-ferrous metals, pipes, tinned products, fresh vegetables, fruit and citrus fruit) and other cargoes. There are covered warehouses and open concrete floor sheds in the port.

A port area Bugas is situated 14 km. to the South of the port, at the mouth of the Estuary.

Vessels fully laden with ballast water are as a rule allowed to moor at berths if winds do not exceed force 6. A vessel of a smaller size may be turned broadside to a loaded vessel of a bigger size but not vice versa. It is strictly prohibited to turn a third vessel broadside on to another 2 vessels having been turned broadside earlier.

Opening and closing of mechanised hatches is usually performed by the vessel's crew. Opening and closing of ordinary hatches is carried out by the crew on arrival and departure of a vessel and by the dockers during cargo handling operations. On the berths and on the port territory there are cranes of 10 tons lifting capacity.
FRESH WATER: Available at berths.
FUEL: Diesel oil available.
REPAIRS: Only minor repairs possible.
CONSULS: None.
TIME: GMT plus 3 hours all year round.
AUTHORITY: The Port of Belgorod-Dnestrovsky Authority.

AGENT: The port of Belgorod-Dnestrovsky Maritime Agency "Inflot". Postal address: 81, Shabskaya Street, 272300 – Belgorod-Dnestrovsky, the city of Odessa, region, U.S.S.R.

Cables: Inflot Belgorod-Dnestrovsky. Telephone: 2-21-01; 2-56-73. Telex: 232717.

BERDYANSK: 46.45 N. 36.48 E. (See Plan Book)

DOCUMENTS: Also refer to beginning of U.S.S.R. section.
5 Crew Lists
5 General Declarations
4 Cargo Declarations
2 Crew's Effects Declarations
1 Master's Declaration
1 Master's Declaration about arrival at a Commerical Port of the U.S.S.R.
2 Stores Lists
1 Maritime Declaration of Health.

For discharging vessels also: Manifests, Bills of Lading and Cargo Plan.

For all vessels, necessary to have all Ship's Papers and Ship's Certificates.
APPROACHES: The port of Berdyansk is situated in the N.E. part of Berdyansk Bay, on the Northern coast of the Azov Sea.

Inner roads and port facilities are protected from Southern and S.E. winds by a mole and a breakwater.

Navigation in the port is all year round, but in Winter ice-breaker assistance is necessary for about two months.

Vessels should proceed to the harbour through the approach channel, with a least depth of 7.0 m.
PILOTAGE: Pilotage is compulsory in Azov Sea. Kerch Pilot meets vessel near the entrance to the Kerch Strait and takes vessel to Berdyansk. Berdyansk Pilot meets vessel at Reception Buoy No. 14. Telegraphic address of pilot station is: "Harbour Master Berdyansk". Vessels bound for Berdyansk should cable "Inflot Berdyansk U.S.S.R."/Ship's Agents/advance notice of ETA: ETA Berdyansk (date shown in group of four figures and if possible GMT of arrival); draft, flag, b.r.t., n.r.t., length, if for loading or for discharging, kind of cargo should also be advised. After which Inflot arranges pilotage through Kerch Channel. First notice of ETA to be sent after leaving last port and then 72, 48 and 24 hours notice of ETA.

For contacting pilot station use VHF Channel 16. Pilot boat has a white hull with black writing on her side: "Pilot-29". Vessels wait for the Pilot at the outer road anchorage.
ANCHORAGE: Vessels may obtain good anchorage with depths up to 7.0 m. in the port of Berdyansk outer roads situated on both sides of the approach channel leading into the harbour.

The outer roads are well protected from Northerly winds, but during Southern and S.W. winds the anchorage is troublesome.

At time of strong S.W. swell ships in the outer roads are usually effected by heavy pitching and rolling, and plenty of cable should be paid out on both anchors. Holding ground in outer roads is shell and mud.
RESTRICTIONS: Vessels can enter and leave at any time of day and night.
MAX. SIZE: The max. permitted draft for entry to the port is 6.7 m. and max. length 160 m.
HEALTH: To obtain pratique it is necessary to complete 1 Maritime Declaration of Health and hand it in for doctor. In the event of any disease or fever contact Agents.
RADIO: *Notice of arrival:* 48 hours prior to arrival at the port Masters should advise the port administration via the local Inflot Agency time of arrival and the maximum draft of a vessel. Not later than 4 hours prior to approaching reception Buoy No. 14, placed at the beginning of the approaching channel, Masters should advise more precise ETA to the Harbour Master.

Vessels should establish radio contact through "Berdyansk Radio" port radio station operating 24 hours daily on the following frequencies:

Call Sign	*Working*	*Calling*	*Type of transmission*	*Time*
UBH	500/418 kc/s.	500 kc/s.	A1	H24
UBN	4230 kc/s.	4181.4 kc/s.	A1	H24
Berdyansk-Radio	156.8*	156.8*	F3	H24

*Frequencies are given in mHz.

RADAR/VHF: There is no port radar service in Berdyansk. Use VHF Channel 16 initally and further communication on another Channel on agreement.
TUGS: Join vessels in inner roads, usually 2 tugs. Vessel's lines usually used. No extra charge for tug lines.
BERTHING: Berth Nos. 1 – 2: Length 380 m. These berths are for general cargo. Berth Nos. 3 – 4: Length 270 m. These berths are for bulk cargoes (ores, minerals). Berth No. 5: Length 194 m. This berth for scrap iron. Max. permissible draft 22 ft. Load/discharge is by shore equipment. Berth Nos. 6 – 7: Under construction. Berth Nos. 8 – 9: Length 300 m.
CRANES: All quays are equipped with electric cranes. Berth Nos. 1 – 2 are equipped with SOKOL type crane, of up to 32 tons capacity. Berth Nos. 3 – 4 – 5 are equipped with Albatros type crane, of up to 20 tons capacity. Berth No. 8 crane type SOKOL.
SPECIALISED CARGO-HANDLING FACILITIES: None.
BRIDGES: None.
STEVEDORES: Provided by the Port of Berdyansk. Tel. Manager: 392 – 565.
MEDICAL: Medical attendance possible. All members of the crew must have sanitary (yellow) book indicating vaccinations, fever, etc. One hospital available.
TANKERS: No facilities available.
DENSITY: Approximately 1008. Salinity is 11.9.
FRESH WATER: Supplied at berths. Price 0.45 Rbls. per ton.
FUEL: Available in limited quantities. Supplied by special tanker.
CONSULS: No consuls in Berdyansk.
REPAIRS: Only minor hull and machine repairs.
DRY DOCKS: No dry dock in Berdyansk.
SURVEYORS: Inspection of the Registry of the U.S.S.R. Branch Office; Tel. 393 – 452.
GANGWAY/DECK WATCHMEN: Not compulsory or necessary.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCE: Tobacco, wine, spirits are free of Bond.
CARGO GEAR: There are cargo-handling equipment and intraport transport facilities. No heavy lift crane.
REPATRIATION: Possible.
AIRPORT: Distance 15 km. Internal Soviet airlines only.
TIME: GMT plus 3 hours. All year round.
HOLIDAYS: New Year's Day (1st January); International Woman's Day (8th March); World Labour Days (1st – 2nd May); Victory Day (9th May); Constitution Day (7th October); Anniversary of the Great October Socialist Revolution (7th – 8th November). Cargo work can be arranged on above days.
POLICE/AMBULANCE/FIRE: Police 02; Ambulance 03; Fire 01.
TELEPHONES: Not possible to place telephones onboard.
SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.
IDENTIFICATION CARDS: Not required. Only seaman's passport.
DEVELOPMENTS: Berth Nos. 6 and 7 are under construction. Completion expected in 1982.
AUTHORITY: The Port of Berdyansk Authority.

AGENT: Maritime Agency "Inflot" at the port of Berdyansk. Postal address: 9 Uritsky Street, 332440-Berdyansk. U.S.S.R. Cables Iodyanfl. 3-34-42, 3-92-639.

IGARKA: 67.24 N. 86.30 E. (See Plan Book)

GENERAL: A sea and river port, Igarka is situated about 344 miles Southward of the mouth of the Enisei river which flows into the Enisei Gulf of the Kara Sea.

The port is open for navigation about (130 – 135 days) from July till mid-November. Ice first begins to form in the second half of October.

No tidal range is observed in the port waters.

The port of Igarka specialises in timber exports.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Pilotage is carried out round the clock. Master of a vessel approaching the port of Igarka from seaward has to order Pilots via the Chief of the Igarka Hydrobase and the Master of the Pilot boat 48 hours prior to arrival to the Oshmarino Point where the river Pilots usually meet vessels. Confirm ETA 24 and 6 hours before arrival.

In case of bad weather, Pilot boards a vessel at a place as directed by the Pilot boat. Since the distance of pilotage from the Pilot station up to the port of Igarka is about 360 miles, 2 Pilots are usually required for the service.

The Master of a vessel should use VHF radio-telephone (calling frequency 156.8 mHz) or radio-telephone (calling frequency 500 kHz) for establishing the radio contact with a pilot boat in order to check the time and the place of boarding/unboarding of a Pilot.

ANCHORAGE: Information on best location of anchorage, if required, will be given by the pilot boat.

The anchorage in the outer roads is bounded on the East by the leading lines of Igarka and Northern Igarka leading marks, on the West by the leftbank of the Enisei river, on the North by the beam line of the buoy of Igarka Oseryodok, on the South by the leading line of Port of Igarka entrance leading marks.

In the event of bad weather or main engine trouble a vessel should lie at anchor in a place as directed by a river Pilot, who shall advise a Master all necessary data about the anchorage.

RESTRICTIONS: Vessels can enter or leave the port 24 hours per day.

To ensure safe passage across the Lipatnikovsky and Turushinsky bars of the Enisei river, vessels proceeding to the port of Igarka must have draft not exceeding 7.3 m. (see "Max. Size").

MAX. SIZE: Max. LOA 160 m. Also see "Restrictions".

HEALTH: Not later than 4 hours before arrival, Master to radio "Inflot" advising health condition on board. International code quarantine signals to be shown on arrival at port limits. No one, except Pilot and Port Authorities, may board or leave the ship until free pratique is given after port health inspection.

RADIO: Radio communication is effected through the "Igarka Radio" port radio station operating on the frequencies given below.

	Frequencies (kHz)		*Type of*	*Time of*	
Call sign	*working*	*calling*	*transmission*	*work*	*Remarks*
UFR	500	500	A1	H24	Operates during navigation only
"Sever" (Port)	156.65*	156.8*	F3	H24	

*Frequencies are given in mHz.

Notice of arrival: As per conditions of the "Soviet Wood" Charter Party.

TUGS: Normally join vessel with Harbour Pilot on approaching port. Vessels at anchor order tugs through "Inflot". Ship's tow lines used.

BERTHING: Tug assistance for berthing is compulsory. A berthing Pilot boards a vessel from a tug either in the outer roads or in the port. Depths alongside berths are up to 7.5 m.

After having approached a berth at a safe distance, a vessel, in most cases, should cast 2 anchors and then with tug assistance, turn stern to the Island and moor with 3 mooring ropes led from the stern. When mooring, a vessel should have ready on board 4 mooring ropes each not less than 100 m. in length (3 ropes to be led ashore and 1 prepared for a tug.).

Vessels moored in the inner roads must have strong ropes which should be made fast over the pile moorings only.

If 3 or 4 vessels are moored at the quay, the outside ones should have a red light exhibited in the middle of each mooring rope led ashore.

Notice of readiness and other conditions of loading – as per the "Soviet Wood" Charter Party. Opening and closing of hatches by ship's crew.

When a vessel is moored in the inner roads, stern to the Island, loading is by floating cranes; when at berth – ship's derricks are used.

Loading is done by ship's wire strops, with a test label attached to every strop.

MEDICAL: Medical assistance is free, hospital facilities available – all arrangements made by "Inflot".

DENSITY: Fresh water.

FRESH WATER: May be taken from the river in places indicated by the Pilot, but not in the port area.

FUEL: Not always available.

GANGWAY/DECK WATCHMEN: Ship's crew to provide watchmen services.

OPENING/CLOSING HATCHES: By ship's crew.

IDENTIFICATION CARDS: Required for crewmen going ashore.

CUSTOMS ALLOWANCE: Only reasonable quantities for personal consumption may be taken ashore.

REPAIRS: Only minor repairs.

REPATRIATION: No facilities.

AIRPORT: Situated 1.5 km. away, 1 daily flight to Krasnogarsk.

TIME: GMT plus 7 hours (all the year round).

HOLIDAYS: No official holidays are observed during the navigation season.

POLICE/AMBULANCE/FIRE: Police, tel. 0-02; Ambulance, tel. 0-04; Fire, tel. 0-01.

TELEPHONES: Telephones cannot be connected on board vessel.

SHORE LEAVE: Permitted during 0600 – 2400 hrs. subject to police control.

GENERAL: It is forbidden for crew to swim in the harbour.

AUTHORITY: Port of Igarka Authority.

AGENT: "Transflot". Cables: "Transflot" Igarka.

ILICHEVSK: 46.20 N. 30.39 E. (See Plan Book)

GENERAL: The port of Ilichevsk is situated on the N.W. coast of Black Sea, on the right bank of the Sukhoi Liman, about 15 miles S.W. from Odessa City.

The Sukhoi Liman is divided by dams into 3 parts called Basin No. 1, Basin No. 2 and Basin No. 3.

A part of Basin No. 1 bounded by the leading line of the Port of Ilichevsk leading lights, thence by the S.W. coast of the Liman, thence by the Southern Sand Headland, is called the Inner Roads of the port.

The berths for large sea-going vessels are along the Western side of the Southern Sand Headland, thence along Southern and S.W. sides of Basin No. 1.

The berths of the Western side of Basin No. 1 are used by fishing trawlers.

Navigation in the port is year round. Ice usually begins to form in the second half of December and finally disappears in February. Ice-breaker assistance is required in severe Winters for about a 30 day period.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: A Pilot usually boards a vessel in the outer roads at the approach light mid-channel buoy. (Lat. 46° 18′ 24″ N., Long. 30° 43′ 30″ E.). In the event of bad weather the place of embarkation or disembarkation of a Pilot can be changed with a Master's approval.

Vessels proceeding to ports of Kherson and Yuznyi take Pilot in the Outer Roads of Ilyichevsk (Lat. 46° 15′ 06″ N., Long. 30° 56′ 01″ E.).

APPROACHES: The approach channel leads from seaward into Basin No. 1. Depths in mid-channel are 13.5 m. Strong Easterly and Southerly winds may cause heavy surge in the channel influencing a vessel's manoeuvrability.

ANCHORAGES: A good anchorage can be obtained in the outer roads situated at a distance of 2 miles off the coast between the parallels of 46° 17′ N. and 46° 21′ N. The outer roads are open to all winds blowing from N.E. via S. up to S.W.

The anchorage (on charts marked as No. 24) is situated about 1.2 mile to the S.E. of the port entrance.

The holding ground is grey mud and clay. Depths in the roads are 19.2 – 25.5 m.

RESTRICTIONS: Entry to the port can be effected day and night.

In the night time movement of the vessels with length more than 200 m. is subject to special permission of the Harbour Master.

Vessel's speed should not exceed 5 knots when navigating along the channel.

MAX. SIZE: The maximum permitted draft is 11 m. length 260 m.

Vessels drawing over 11 m. must obtain the Harbour Master's permit for entry to the port.

HEALTH: Foreign vessels granted free pratique when berthed alongside and all arrival formalities accomplished by the boarding officials, irrespective whether day or night. If berthing delayed, under certain circumstances vessel may be granted free pratique at roads where anchored. Event suspected disease Master shall inform Agent by radio. When arriving from another Soviet Black Sea port, free pratique automatic.

RADIO: Channel 16 (156.80 mc/s) for radio-telephone used for calling only, with subsequent switch to any other Channel. All information addressed to ship's Agent, Cable address "Inflot Ilichevsk", Telex No. 232448. Port Radio UEH.2.

Radio contact can be established through the port radio station "Ilichevsk Radio" operating 24 hours daily on the following frequencies:

	Frequencies (kHz)		*Type of trans-mission*	*Time of Work*
Call sign	*Working*	*Calling*		
"Ilichevsk Radio"	2535	2535	A3	H24
"Ilichevsk Radio-10" (CPR**)	156.8*	156.8*	F3	H24

*Frequencies are given in mHz

**CPR – Central Port Radio Station.

The port radar station gives all possible information to all vessels navigating in restricted visibility and in the absence of floating marks, from the point of a Pilot's embarkation up to the port.

Radar navigation is controlled by a Pilot.

A signal post for regulating the movement of vessels is situated at the Northern side of the entrance to the port.

RADAR: Port Radar Station gives all possible technical information to any vessel navigating within Station's broadcast zone, if requested. Navigation in channel controlled by Port Radar Station. Communication between Station and vessels established by radio-telephone on international frequencies.

TUGS: Normally join vessel when approaching mooring berth. Ship's lines used. Number of tugs required for berthing shall be ordered by the Pilot with the Master's consent.

In case Harbour Master grants permission for vessel to stay at anchorage in the Inner Roads to get bunkers, provisions, or for any other purpose a tug should be ordered by ship's Master for the whole period of stay in the Inner Roads to ensure safety of manoeuving of the other vessels in the port. All expenses on ships account.

BERTHING: Quays with depths alongside of up to 11.5 m. are equipped to handle oil, general, bulk and other cargoes. There are mechanised warehouses and open concrete floor sheds.

Electric cranes of up to 41 tons capacity are operated on the quays and by the warehouses. There are floating cranes with lifting capacity of up to 300 tons, other cargo-handling equipment and inter-port transport means.

Opening and closing of mechanised hatches is always done by the ship's crew.

In case vessel is moored at the Inner Road buoys the following requirements should be complied with:

1. Two towing ropes to be kept ready at bow and stern lowered 2 m. over the water surface.
2. To avoid picking up of mooring anchors ropes should be slacked with free board increase whilst discharging.

3. Vessel must be equipped with good pudding fenders to protect her boards and floating facilities alongside.

TIDE: The range of the water level caused by strong winds may reach 1 m. The rise of the water level is due to Northerly winds and the fall of the water level to Southerly winds.

The changes of the water level caused by variation in atmospheric pressure ("Seish" phenomena) are observed periodically. This phenomena can last from a few minutes up to several days and the range of the water level may reach 0.6 m.

STEVEDORES: 12 days notice is required.

MEDICAL: Medical assistance rendered immediately when requested. Hospital facilities available. Particular inoculations required prescribed by International Sanitary Regulations.

DENSITY: Average density 1.010.

FRESH WATER: Available at quays and by barge.

FUEL: Bunkers available.

GANGWAY/DECK WATCHMEN: Watch carried out by crew.

OPENING/CLOSING HATCHES: Mechanical hatches by crew.

CUSTOMS ALLOWANCE: No restrictions. Free use on board.

CARGO GEAR: No additional requirements. Cargo work usually carried out by means of shore cranes.

IDENTIFICATION CARDS: Required.

CONSULS: None.

REPAIRS: Good facilities. All kinds of repairs for vessels of up to 60,000 d.w.t. can be carried out.

DRY DOCKS: Docking arrangements settled with Black Sea Steamship Co. of Odessa, Lastochkina 1 Street. A floating dock, 250 m. length, 18 m. depth. There is a new floating dock with a lifting capacity of 15,000 tons.

AIRPORT: The distance from Odessa Airport about 30 km.

TIME: GMT plus 3 hours. (All year round).

HOLIDAYS: Official Holidays are Sundays and following Calendar dates: January 1st, March 8th, May 1st, 2nd, 9th, October 7th, November 7th, 8th.

POLICE/AMBULANCE/FIRE: All mentioned services easily obtained through Agent.

TELEPHONES: Can be placed on board.

GENERAL: Shipowners recommended deposit funds for disbursements prior to arrival. All bank operations carried out by Vneshtorgbank of Moscow.

SERVICES: Ship chandler's supplies, technical equipment supplies, laundry, car hire.

SHORE LEAVE: Permitted.

DELAYS: Vessels berthed at specialised berths depending upon cargo. Delays if berths occupied. Normally no delays in bunkering.

DEVELOPMENTS: At present port only partially constructed. Work of further development being carried out.

AUTHORITY: Port of Ilichevsk Authority.

AGENT: The Port of Ilichevsk, Maritime Agency "Inflot". Postal address: The Port of Ilichevsk, Odessa Region, U.S.S.R. Cables "Inflot Ilichevsk". Tel. 628-658, 628-661, 628-556. Telex 232448, 232245.

IZMAIL: 45.20 N. 28.51 E. (See Plan Book)

GENERAL: A sea and river port, Izmail is situated on the left bank of the Kiliiskoe Ghirlo (Kilia Mouth) of the Danube river, between the 92nd and 94th km.

Navigation in the port lasts about 317 days per year. The Danube river usually becomes frozen over at the end of December or early January. In the more severe Winters navigation can be effected with ice-breaker assistance.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. Pilot should be ordered through "Inflot" before leaving the port of Sulina giving vessels ETA at Izmail. Alterations in ETA whilst vessel is navigating the Sulinsky channel should be advised to "Inflot". Also refer to Sulina, Romania.

Navigation in the Kilia Mouth up to the port of Izmail is allowed with a Port of Izmail Pilot on board, who should be ordered through Inflot Agency after leaving the port of Sulina. ETA at the Chatal of Izmail should be stated in the message. Masters should keep the Port of Izmail Harbour Master informed of all delays in the Sulina Channel and, if necessary, advise alterations in ETA at the Chatal of Izmail.

ANCHORAGE: Vessels can obtain anchorage in the roads situated in the area between 91.4 km. and 92 km. Depths in the roads from 5 m. – 15 m., the holding ground is soft mud.

RESTRICTIONS: Izmail port is situated on the left bank of the Kilia channel, channel depths are 10 – 20 m. Reni port is situated on the left bank of the Danube, channel depths are 10 – 20 m. Ice-breakers assistance is available during periods when the Danube is frozen. Draft and length of the vessel entering the port of Izmail should be the same as of vessels navigating through the Sulina Channel.

HEALTH: International code quarantine signals are to be shown on arrival and free pratique is given by the quarantine doctor who will board the vessel to examine Master's Health Declaration.

RADIO: Vessels can establish radio contact via the port radio station Izmail Radio operating 24 hours per day on the following frequencies:

	Frequencies (kHz)		*Type of*	*Time of*
Call sign	*Working*	*Calling*	*transmission*	*work*
UJO-3	472	468	A1	HX
UJO-5	12966	12552		
	8586	8361		
	4227	4886		
"Izmail"-Radio" (CPR)**	156.6*	156.8*	F3	HX

*Frequencies are given in mHz. **CPR – Central Port Radio Station.

TUGS: Tugs shall be ordered by the Master as directed by the Pilot.

BERTHING: Vessels drawing up to 8.25 m. can enter the port and moor at berths with same depths alongside.

Quays are equipped to handle general and bulk cargoes, metals, chemicals, timber and passenger shipping.

There are enclosed warehouses, open concrete floor sheds and a grain elevator.

Simultaneous berthing and shifting berth of two or more vessels at neighbouring berths is not allowed. On the quays there are electric cranes of up to 15 tons capacity. There are floating grain elevators, floating cranes with lifting capacity of 15 tons and other cargo handling equipment and machinery.

FRESH WATER: Available in unlimited quantity.

FUEL: Bunkers available.

GANGWAY/DECK WATCHMEN: Gangway watchmen compulsory, carried out by ship's crew.

OPENING/CLOSING HATCHES: According to the customs of the port opening and closing of hatches is usually by ship's crew but it can also be done by stevedores for vessel's account.

CUSTOMS ALLOWANCE: No restrictions on crew consumption tobacco and alcohol on board. It is prohibited to take these items ashore.

IDENTIFICATION CARDS: Required for crewmen going ashore.

REPAIRS: Hull and machine repairs can be effected.

REPATRIATION: Can be arranged.

AIRPORT: Regular connections with internal services.

TIME: GMT plus 3 hours all the year round.

TIDE: Changes of water level in the river are due to effects of the wind and seasonal increase and decrease of the amount of water brought down from the shore. In Winter; rise of water level is due to the ice piling up. Max. range of the water level is about 4.0 – 6.0 m.

Max. rise of water level is in April, May and June, usually caused by Easterly winds. The least water level is observed in August September and October, due to Westerly winds.

HOLIDAYS: New Year's Day (1st January), National Women's Day (8th March); Worker's Day (1st and 2nd May); Victory Day (9th May); Anniversary of October Revolution (7th and 8th November); Soviet Constitution Day (5th December).

POLICE/FIRE/AMBULANCE: Izmail – Police, tel. 316; Fire, tel. 524; Ambulance, tel. 600. Reni – Police, tel. 205; Fire, tel. 210; Ambulance, tel. 203.

SHORE LEAVE: Allowed up to midnight.

AUTHORITY: The Port of Izmail Authority.

AGENT: The Port of Izmail Maritime Agency "Inflot". Postal address: 14 Port Street, Izmail, U.S.S.R. Cables "Inflot Izmail". Tel. 9-01-81, 9-05-29.

KHERSON: 46.37 N. 32.37 E. (See Plan Book)

GENERAL: The sea and river commercial port of Kherson is situated on the right bank of the Dnieper River and on the left bank of the Koshevaya River.

The port is open for navigation all the year round but in severe Winters ice-breaker assistance is required.

Ice at the estuary of the Dnieper finally disappears in the first half of March.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

APPROACHES: The port is accessible for sea-going vessels. The approaching channel is very well marked by navigation marks; therefore, there are no difficulties in navigating a vessel along it when entering or leaving the port.

PILOTAGE: Compulsory. Navigational range marks, leading marks of Stanislov, Adjigolsky beacons, Verbchansky and Maliy Kasperovsky leading light buoys, and spar buoys. Master advises Port Controller and Inflot Agency ETA minimum of 96 hours prior notice.

Masters of vessels proceeding to the port of Kherson must advise ETA to the Harbour Master and Inflot Agency at the Port of Ilichevsk 24 hours prior to arrival at the point of 46° 15′ 06″ N., 30° 56′ 01″ E. More precise time should be given 6 hours before approaching the said point.

After having embarked a Pilot at the said point, vessels proceed to the port of Kherson. Upon passing the Port of Ilichevsk, Master should advise ETA to the local Inflot Agency at the port of Kherson.

ANCHORAGES: A part of the Dneiper river from the Northern border of the town of Kherson, nearly up to the Maly Potemkin Island, is considered as the Port of Kherson Roads.

The anchorage for foreign flag dry cargo vessels is situated in the area restricted by 2 imaginary lines of the leading marks located on the left bank of the Dnieper River, upwards from the mouth of the Konka River and lower of basin (creek) No. 2.

The recommended anchorage for foreign flag tankers is situated in the area stretching down the river from the oil piers towards leading line No. 7, S.W. of the upper leading marks clearing the place where a submarine cable is laid.

RESTRICTIONS: The permitted draft for passing through the channel is 7.8 m. but it may vary depending on weather conditions.

In the Summer the channel is open for navigation 24 hours a day.

Speed of vessels having draft over 5 m. should not exceed 10 knots whilst navigating through the channel.

There are no length restrictions for vessels entering the port.

Navigation through the channel in restricted visibility is strictly prohibited.

HEALTH: No automatic pratique.

RADIO: Ship-shore radio link can be established through the port radio station operating 24 hours on the following frequencies:

Call sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time of work*
ICI	6430	6314.2	A1	HX
UHZ	500	500	A1	H24
"Kherson Radio"	2182	2182	A3	H24
"Mesyats" (CPR)**	156.8*	156.8*	F3	H24

*Frequencies are given in mHz.

**CPR – Central Port Radio Station.

BERTHING: 9 berths, depths up to 8.4 m.

Mooring is effected with port Pilot assistance. Number of tugs required for mooring is determined by Pilot with Master's consent, ships lines used.

Cranes of up to 10 tons capacity are operated on the quays and by the warehouses. There are floating cranes with lifting capacity of up to 100 tons and other cargo handling equipment, intra-port transport included.

Berths of the port, with depths of up to 8.25 m. alongside are equipped to handle general and bulk cargoes (ore, chemicals, building materials), metals, grain, timber, cotton, cement, food products, etc., as well as passenger traffic. There are enclosed warehouses, a grain elevator and open concrete floor storing spaces without roofs. There is a refrigerated warehouse at No. 4 berth. Cargo is generally loaded/unloaded by shore cranes but ships derricks are always to be ready for use.

TIDE: Changes in the water level observed in the port are due to the effect of the wind and variation in atmospheric pressure. The maximum range of the water level caused by winds may reach 2 m.

The changes of the water level due to variation in atmospheric pressure ("Seish" effect) are observed at times. They may last from a few minutes up to several days and may reach 0.58 m.

MEDICAL: Hospital facilities available.

FRESH WATER: Available alongside.

FUEL: Available.

OPENING/CLOSING HATCHES: Opening and closing of hatches is usually done by the ship's crew. It may also be done by port workers for vessel's account.

REPAIRS: Only minor repairs can be carried out. There are no dry docks in the port.

TIME: GMT plus 3 hours (all year round).

AUTHORITY: Port of Kherson Authority.

AGENT: The Port of Kherson Maritime Agency "Inflot". Postal address: U.S.S.R. 325004, Kherson-4, Petrenko St. 11, MA "Inflot". Cables "Inflot Kherson". Telex 232721. Tel: 29-13-51, 29-14-41.

KHOLMSK: 47.03 N. 142.03 E. (See Plan Book)

GENERAL: The seaport of Kholmsk is situated on the Western coast of Sakhalin Island, in the Tartarsky Strait of the Japan Sea and at the head of Nevelskoy Bay.

The port is open for navigation all the year round but starting from January up to the middle of March drift ice and sludge can appear in the harbour and on the coast line during Westerly winds making the navigation more complicated.

The outer roads of the port are bounded by an arc of 7 cables length radius, the centre of which is marked with a light located on the Southern mole of the Commercial Harbour.

The port is divided into 3 parts: The Kovsh (a basin), The Commercial and Fishing Harbours. The Commercial Harbour is situated in the centre of the port area. It is protected by the Southern and Northern moles. The entrance to the Harbour 150 m. wide, is situated between these 2 moles. Due to shoal water along the coast, there is not much space for vessels manoeuvrability in the Commercial Harbour. Cargo berths are situated in a basin (The Kovsh) of the Southern part of the Harbour.

The Port of Kholmsk, due to its position, size and weather conditions in the area, cannot be used as a sheltering port.

During Westerly and N.W'ly gales, particularly in the Autumn and Winter (October — March) the heavy sea swell penetrates into the Kovsh (mainly from the N.W.) causing the variable current with surge (the "Tvagun"). Due to this phenomena the stay in port is not safe therefore Masters of all vessels are recommended to leave the port for sea after having received a storm warning of a gale coming from Westerly or N.W. directions.

All vessels proceeding to the port of Kholmsk in the Autumn and/or Winter must have available on board a sufficiency of fuel, fresh water, provisions and strong manila ropes, be seaworthy in all respects, thus ensuring vessel's safety during a possible stay in the open sea roadstead.

In case there are no vacant berths in the port, vessels are not allowed to enter the harbour without prior permission.

It is also prohibited to enter the harbour after a storm warning has been received by vessel despite the fact that there are vacant berths in the port.

PILOTAGE: Pilot meets a vessel in the outer roads. In the event of bad weather, when Pilot is unable to come on board, vessel should follow in the wake of pilot boat.

ANCHORAGES: There are no anchorages protected from the wind in the Nevelskoy Bay.

During off-shore winds vessels may anchor in the outer roads situated opposite the port entrance. The outer roads are open to Westerly winds.

Masters should bear in mind that during the period of navigation fish nets are usually laid in the outer roads. The seaward side of the border of the fish nets, situated about 8 cables length off-shore, is usually marked by wooden buoys with flags.

Anchorage in the outer roads may also be obtained at 4 – 6 cables length off shore. Depths are from 18 m. to 20 m. Holding ground sand and stone.

A vessel should proceed to the anchorage along the leading line of the port of Kholmsk leading lights. At a distance of half a mile off the port entrance, a vessel should steer off the leading line at 2 – 3 cables length and then drop anchor.

The holding ground is better in the Southern part of the outer roads than in the Northern part.

When at anchor, a vessel may not approach the leading line closer than 1.5 cables length.

RESTRICTIONS: Vessels may enter the port at any time of day or night.

MAX. SIZE: The maximum permissible draft for entry to the port is 6 m. length – 100 m. Since depths in the channel may vary at times, the Port Authorities shall undertake to advise the Masters of incoming vessels accordingly.

RADIO: Ship-shore radio link can be established through the port radio-station Kholmsk Radio operating 24 hours a day on the following frequencies:

Call sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time of Work*
UHO	500	500	A1	H24
Kholmsk Radio	4361.6	4063	A3	HX
Kholmsk Radio	–	4066.1	A3	HX
	2182	2182	A3	H24
UQB Port	8675	8370	A1	H24
UQB	3605	4186	A1	H24
Kholmsk Radio "2" (Harbour Master)	156.8*	156.8*	F3	H24
Kholmsk Radio	156.8*	156.8*	F3	H24

*Frequencies are given in mHz.

The port signal station is situated at the Southern mole base. There is also a radar station in the port.

BERTHING: Berths with depths up to 8.5 m. alongside, are equipped to handle general and bulk cargoes, metals, timber, food products, etc., as well as passenger traffic.

Number of tugs required for assistance is usually agreed between Pilot and Master.

Cranes of up to 37 tons capacity are operated on the quays. There are also other cargo-handling equipment and inter-port transport facilities. There are enclosed warehouses and open concrete floor sheds.

FUEL: Not available.

FRESH WATER: Available.

REPAIRS: Only minor repairs can be carried out. There are no dry docks in the port.

TIDE: Changes in the water level are of small account. They are mainly due to the irregular diurnal tides. The maximum range of the water level observed is 0.4 m.

TIME: GMT plus 11 hours. (All year round).

AUTHORITY: The Port of Kholmsk Authority.

AGENT: The Port of Kholmsk Main Maritime Agency "Inflot". 6 Morskaya Street, Port of Kholmsk, Sakhalin Island 649620, U.S.S.R. Cables "Inflot Kholmsk". Tel. 22-86; 20-80. Telex 412613 SSC SU.

KILIA: 45.26 N. 29.17 E. (See Plan Book)

GENERAL: The port of Kilia is situated on the left bank of the Kilia inlet of the Danube River, 47 km. from the estuary. The depths of the water within the port area vary from 3 m. up to 22 m. The holding ground is clay and mud. The season of navigation in the port area lasts from March till December depending on time when the Danube River is getting frozen over.

Sea-going vessels with the draft up to 7 m. are loaded/ discharged with the use of buffer barges.

Berths of the port are equipped to handle general and bulk cargoes, metals and timber. There are open concrete floor sheds and a covered warehouse.

PILOTAGE: Carried out by the Pilot service of the port of Izmail.

ANCHORAGE: Allowed in the 48 km. post area, in 5 m. depths according to the Pilot's instructions.

RESTRICTIONS: Vessels can enter or leave the port at any time of day or night. Movement of vessels during fog is not allowed.

RADIO: Communication can be effected via the port radio station the "Kilia-Radio".

Call sign	*Frequencies (mHz)* *working*	*calling*	*Type of trans-missions*	*Time of work*	*Remarks*
UJM-3	—	—	A1	H8	Radio communication with the shore only
Kilia-Radio – 1	156.8	156.8	F3	H12	

Notice of Arrival: Masters of vessels going to the port from the seaward via the Kilia inlet should advise the port of Izmail Harbour Master their ETA 24 hour prior to arrival at the Reception buoy area. More precise time of arrival should be advised at a later time.

TUGS: Approaching and shifting berth is performed without tug assistance.

BERTHING: The berth is equipped with 5 ton caterpillar cranes. There are also floating cranes, other cargo handling equipment and interport transport means.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: Not possible.

TIME: GMT plus 3 hours all year round.

CONSULS: None.

AUTHORITY: The Port of Kilia Authority.

KLAIPEDA: 55.43 N. 21.07 E. (See Plan Book)

GENERAL: A Baltic seaport, Klaipeda is situated in a narrow strait called the Morskoi Canal, which connects the Kursky Gulf with the Baltic Sea.

The port of Klaipeda comprises the Morskoi Canal consisting of 2 harbours: the Zimnyaya and Zavodskaya, the Fishing Port and the Dane river quays situated by the roadway-bridge.

The Southern half of the Kurshsky Gulf and a part of the Dane river some distance up from the estuary become frozen over every Winter for quite a long time. A part of the port situated to the North of the Dane river mouth gets frozen over very seldom but the entrance to the Morskoi Canal may be packed by the drift ice in the course of a few days.

The port is open for navigation all the year round but in the Winter time ice will be managed with ice-strengthened tugs' assistance.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

APPROACHES: The width of the approaching channel to the port is 100 m. and depth 11.5 m. Depths of the channel at a distance of 400 – 600 m. from the entrance to the Sea Canal are subject to changes due to lots of sand and mud brought down from the Kursky Gulf by the Spring floods, in particular. The entrance to the Sea Canal is protected by the Northern and Southern moles.

The length of the fairway of the Morskoi Canal from the entrance up to the Secluma-Kyaules-Nugara shoal at the entrance to the Kursky Gulf is 4 miles, width varies from 180 m. to 300 m. and the depths are from 6 m. to 9 m. at the mean water level.

The permissible drafts for vessels navigating along the Morskoi Canal are as follows: Up to 7 m. from the canal entrance up to the Zimnyaya (Winter) harbour, but further up to the Fishing Port situated 1.5 miles to the South of the Dane River estuary – not more than 6.0 m. from the Fishing Port up to the Timber Harbour – not more than 5.0 m.

PILOTAGE: A Pilot boat usually meets a vessel at light buoy No. 7 (Lat. 55° 44′ N., Long. 21° 00′ E.). It carries the Pilot flag by day and lights prescribed for a Pilot boat by night.

Pilot's watch is kept 24 hours a day except in periods of dense fog and strong N.W. winds over Force 7 Beaufort Scale.

On the Harbour Master's decision agreed with the Master of a vessel the pilotage can be performed up to the entrance of the port with the assistance of the coastal radar station.

The Pilot station is situated between Oil Pier No. 1 and berth No. 15.

ANCHORAGE: A good anchorage can be obtained in the outer roads at receiving light buoy No. 1 (55° 44′ N., 21° 00′ E.).

The outer roads are situated at a distance of 2 miles to W.N.W. from the entrance to the Morskoi (Sea) Canal. Depths are from 19 m. – 23 m.

The holding ground is sand and clay. Anchorage in the outer roads is not safe during heavy seas caused by Westerly winds.

RESTRICTIONS: Day and night entrance. Max. permissible draft 8 m. Anchorage at inner roads limited to vessels under 100 m. length.

MAX. SIZE: Length and breadth unlimited. Max. permissible draft for all vessels entering the port, 9 m.; and for tankers loading at installations outside main port area, 10 m.

RADIO: Vessels can establish radio contact through the port radio station Klaipeda Radio operating 24 hours per day on the following frequencies:

	Frequencies (kHz)		*Type of trans-mission*	*Time of work*
Call sign	*Working*	*Calling*		
UNM-2	500	500	A1	H24
	455	454	A1	H24
	4229	4183	A1	HX
	6427	6275.25	A1	HX
	8701	8370	A1	HX
	12703	12552	A1	HX
Klaipeda Radio	2182	2182	A3	H24
Klaipeda Radio (CPR)**	156.8*	156.8*	F3	H24
Dispatcher (Port Control)	156.8*	156.8*	F3	H24
Ocean (Pilot Service)	156.8*	156.8*	F3	H24
Neltegavan (Oil Harbour Port Control)	156.8*	156.8*	SRZ	

*Frequencies are given in mHz
**CPR – Central Port Radio station.

Vessels' traffic in the roads and harbours is controlled by the signals exhibited at the signal stations situated at the entrance to the port.

Storm signals are shown at the same stations and also at the Fishing Port signal station.

TUGS: Ordered by Pilot if necessary. Mooring and unmooring of large sea-going vessels can be effected with tugs' assistance only. Number of tugs to be ordered depends on the weather conditions and can be agreed upon between Master and Pilot. Master should order tugs by radio well in advance.

BERTHING: No specific requirements. Vessels allocated berth according kind of cargo to be loaded/discharged and their turn.

The quays of the port with depths alongside of up to 10.8 m. are equipped to handle general, bulk and liquid cargoes as well as passenger shipping. There are enclosed warehouses and concrete floor sheds.

Cranes of up to 40 tons capacity are operated along quayside and by warehouses. There are also other cargo handling facilities including a coal loading installation and floating cranes up to 50 ton capacity.

STEVEDORES: Report 48 hours, then 12 hours prior arrival giving ETA, and 72 hours then 12 hours prior arrival advising perishable goods, characteristics of vessel, gross capacity, number and measurement of hatches, tween-decks, shelter-decks, description and quantity of cargo, stowage plan, heavy lifts, pieces of above 3 tons each especially indicated. Day and night loading/discharging operation, Sundays and holidays included.

MEDICAL: Master to advise by radio prior arrival if medical attendance required on board.

TANKERS: Three berths. Max. draft 9 m. Shore facilities for discharge of ballast.

FRESH WATER: Most berths supply by shore installations, otherwise barge.

FUEL: Deliveries only by bunker barge.

GANGWAY/DECK WATCHMEN: Compulsory for gangway checking. Guard net and life buoy required.

OPENING/CLOSING HATCHES: Normally by crew.

CONSULS: No Consuls at Klaipeda.

REPATRIATION: No facilities for crew changes. Arranging any necessary repatriation at Captain's request effected by Immigration Authorities.

AIRPORT: At Palanga (25 km. from Klaipeda), served by regular lines; Palanga-Moscow, Palanga-Leningrad, Palanga-Riga. Airport at Klaipeda – some regular flights per day: Klaipeda-Vilnius, Klaipeda-Kaunas, Klaipeda-Kaliningrad.

POLICE/AMBULANCE/FIRE: Tel. Police, 02; Ambulance, 03; Fire, 01.

CERTIFICATES: All ship certificates required on every call.

CUSTOMS ALLOWANCE: Cigarettes and wine/spirits on board limited by personal requirements; take ashore max. 2 packets cigarettes, no wine/spirits.

REPAIRS: All kinds of repairs for vessels of 10,000 d.w.t. can be effected.

TIME: GMT plus 3 hours. (All year round).

TIDE: There are periodical alterations in the water level, chiefly due to the effects of the wind. In general, strong Westerly, Northerly, N.W. and sometimes S.W. winds raise the water and Southerly and Easterly winds lower it.

The water level usually begins to rise suddenly. It rises very quickly but lasts for a very short period of time. The max. difference between high and low level is usually observed in Autumn and Winter.

Sometimes the changes in the water level can be caused by the considerable variation in atmospheric pressure ("Seish" effect).

TELEPHONES: May be arranged on board.

SHORE LEAVE: Crew members allowed ashore with shore-pass obtainable from Immigration Authorities.

GENERAL: In case of stormy weather or dense fog vessels are lying at Outer Roads until entering permitted by Harbour Master. In such cases vessels lying alongside berth to be shifted to Inner Road.

AUTHORITY: The Port of Klaipeda Authority.

AGENTS: "Inflot" Agency. Address: Klaipeda 235801, ul. Platchioy 18. Tel. 6-42-70, 6-32-36. Cables: Inflot, Klaipeda. Telex: 179 and 159.

LENINGRAD: 59.56 N. 30.18 E. (See Plan Book)

GENERAL: A Baltic Sea port, Leningrad is situated on the islands of the Neva Delta, at the head of the Nevskaya Guba (Neva Bay), in the Eastern extremity of the Gulf of Finland. Year-round navigation is possible with ice-breaker assistance from the end of November until middle of April. Ice first begins to form in the middle of November, when usual Winter frosts come, and in January (time varies with the season) all the area becomes completely covered with fast ice.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

APPROACHES: The Kronstadt Korabelny Farvater (Kronstadt Ship's Channel) which is about 12 miles in length, extends from the port of Leningrad Entrance light buoy to the Leningrad Morskoi Canal, which is about 15 miles in length, and leads to the entrance of the sea commercial port of Leningrad. The least bottom width of about 80 m. is in the part of the Canal which is protected by 2 dams (moles).

PILOTAGE: Pilots usually board and disembark vessels at the port of Leningrad approaching light buoy (Lat. 60° 02′ N., Long. 29° 26′ E.). In case of bad weather a vessel should follow the pilot boat up to the Kronstadt Roads where a Pilot will come aboard the ship.

Leningrad pilot boat on VHF Channel 16 and 9 throughout 24 hours. Call sign "Leningrad Pilot".

ANCHORAGE: Vessels approaching the port from seaward should take anchorage off the port of Leningrad Entrance light buoy. The depths in the Roads are between 20 – 25 m. and the holding ground is mud and sand.

Vessels anchored at Outer Roads and berthed in the port are requested not to operate VHF on Channels 6, 8, 9, 11, 12, 13, 14 or 26 for intership communications.

RESTRICTIONS: No restrictions on night entry, no tide in Leningrad. Vessels with drafts 8.5 m. and more, and length 170 m. and more, must be towed when proceeding in the Leningrad Morskoi Channel from the Lesnoi Mole Roads (Timber Mole Roads) up to the Neva Gates.

All vessels navigating within the port must keep strictly to the following regulations:

(a) Vessel's speed should not exceed 10 knots when navigating in the Kronstadt Korabelny Farvater and in the open part of the Leningrad Morskoi Canal (from the entrance up to the moles).

(b) When navigating in the channel between the moles of the Leningrad Morskoi Canal as well as in the Bolshaya Neva River from the Neva Gates up to Lieutenant Schmidt Bridge and also in the Ekateringofka River, vessels speed should not exceed 6 knots.

(c) In the Inner Roads and in the port harbours, Masters should navigate with a speed ensuring the safety of vessel but never exceeding 6 knots.

MAX. SIZE: Draft restriction 10.8 m. No restrictions as to the length of a vessel.

HEALTH: Master coming from foreign port shall report every sick passenger or crewman; Health Authorities board together with Customs and Immigration and if find all in order grant free pratique. Each vessel shall produce Deratisation Certificate and Sanitary Patent.

RADIO: Cable Agent "Inflot" ETA, draft and other data, information required via Leningrad Radio Station. All vessels when approaching the port of Leningrad should establish radio contact via the Leningrad Coastal Radio Station operating 24 hours a day on the following frequencies:

Call sign	*Frequencies (kHz)*		*Type of trans-mission*	*Time of work*
	Working	*Calling*		
UDB	500	500	A1	H24
	484	480	A1	H24
URD	6,425	6,273	A1	H24
	8,687.6	8,365		
	12,693	12,546		
Leningrad-Radio	13,175.5	12,396.5	A3	HX
Leningrad-Radio	2,182	2,182	A3H	H24
Leningrad-Radio	8,767	—	A3A	HX
Leningrad-Radio	—	8,236.4	A3A	HX
Leningrad-Radio (Port Control via CPR**)	VHF Channels 16 and 26		F3	H24

**CPR – Central Port Radio Station.

Port radar station gives all possible information to any vessel navigating in the Kronstadt Korabelny Farvater and Leningradsky Morskoi Canal during restricted visibility, from the Leningrad entrance light buoy (Lat. 60° 02′ N., Long. 29° 26′ E.) up to the dams (moles) of the Leningrad Morskoi Canal. Navigation is usually controlled by a Pilot on board the vessel.

Signals for vessels approaching the entrance to the Commercial Port of Leningrad from seaward are hoisted at the pilot vessel.

Traffic prohibition signals, when the pilot vessel is absent from her usual position may be exhibited at a vessel specially designated for this purpose.

RADAR: Pilot in contact with radar service.

TUGS: Tugs up to 1,200 h.p. are available. Normally join incoming vessels at Inner Road. Ships lines usually used.

The number of tugs a Master should order for inward and outward towage as well as for shifting berths in the harbour depends on Pilot's advice.

BERTHING: Berths of the port, with depths alongside of up to 11.5 m. are equipped to handle general and bulk cargoes (coal, ores, grain, building material), sugar, metals, timber products, etc. There is also a passenger and container terminal, warehouses, cold stores and concrete floor sheds.

Opening and closing of hatches is usually done by the ship's crew, otherwise according to the charter party conditions.

The port of Leningrad is equipped with modern cargo-handling facilities. There are floating cranes up to 300 tons, container handling, fixed and mobile shore cranes, fork lifts and other mechanical equipment.

TIDE: Considerable rises of water level may be caused by strong Westerly winds – and falls by Easterly winds. Usually the changes in water level are greater during the Autumn and Winter months. During Autumn and Winter the range of level may reach 1.2 m. from the MWL and sometimes even more.

During Spring and Summer it is never more than 0.5 m. The greatest rises in the water level are observed in the Neva Bay. The extreme difference in level between the maximum rise and the minimum fall of these seasonal changes observed is about 3.5 m. At the mouth of the Neva River the greatest changes in the water level are caused by the S.W. Autumn gales. The difference in level usually reaches 0.2 m. – 0.3 m. and only sometimes up to 1 m.

STEVEDORES: Ordered by Agent.

MEDICAL: Masters to advise Agent prior arrival if medical attendance required aboard.

DENSITY: Fresh water in port area.

FRESH WATER: Most berths supplied by shore installations, otherwise barges.

FUEL: Bunkers available, usually delivered by lighters.

FIRE PRECAUTIONS: No smoking allowed in port area, except in places specially allocated.

GANGWAY/DECK WATCHMEN: Not compulsory.

OPENING/CLOSING HATCHES: According to charter party.

CERTIFICATES:

Passenger Ship Safety.
Safety Equipment.
Safety Radiotelephony.
Safety Radiotelegraphy.
Exemption Certificate.

CUSTOMS ALLOWANCE: No restrictions on board.

IDENTIFICATION CARDS: Needed, will be given on arrival.

CONSULS: The Consulates of Czechoslovak Socialist Republic, German Democratic Republic, France, German Federal Republic, Iran, Japan, Polish People's Republic, People's Republic of Bulgaria, Republic of Cuba, Sweden and United States of America are situated in Leningrad.

REPAIRS: All types of repairs for vessels of up to 10,000 d.w.t. can be carried out in the port.

DRY DOCKS: Available.

TIME: GMT plus 3 hours, no alterations during year.

POLICE/FIRE/AMBULANCE: Police 9692; First-Aid from Port 503; from Town 03; Port Fire 8509, 8536, 8973; Town Fire 01.

AUTHORITY: Port of Leningrad Authority.

AGENT: Main Maritime Agency "Inflot". Postal address: 1 Gapsalskaya Str., Leningrad 198035, U.S.S.R. Tel.: 251-12-38; 251-28-77; 216-99-77. Telex: 505, 506.

MEZEN: 65.50 N. 44.04 E.

GENERAL: A commercial seaport, Mezen is situated at a distance of 22 miles to the South of the mouth of the Mezen river flowing into the head of the Gulf of Mezen, in the White Sea.

The port area is bounded on the North by a line connecting the Ryabinov and the Nerpinsky points and on the South by the parallel of 65° 50′ N., Northward of the town of Mezen. The anchorage at the Kuloi river mouth is also included at the port of Mezen area.

Drift ice in the Gulf of Mezen appears in the first half of November. By the middle of February the Bay becomes completely frozen over. Ice finally disappears in the first half of May.

The port is open for navigation about 5 months of the year, starting from the end of May or beginning of June.

Ice-breaker assistance cannot be effected in the outer roads in the event of fast ice.

Tidal streams are observed in the Mezen river. The tide is semi-diurnal with two high waters and two low waters a day.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. A Pilot meets a vessel at an anchorage buoy, at the Mezen river bar (Lat. 66° 12′ N., Long. 44° 04′ E.), at a distance of 22 miles off the port of Mezen. In the event of bad weather a Pilot at his discretion, may board a vessel in the outer roads.

Pilotage cannot be effected at night.

A Pilot cannot board a vessel earlier than 2 hours before the high water in the Semzha river, and a vessel may be piloted into the port not later than 1 hour before the water in the river reaches its high level.

Pilots do not board vessels in rough water (if the wind is over Force 6 Beaufort scale).

In case Pilot cannot embark a vessel in the outer roads, Master should follow in the wake of pilot boat up to Tolstic Point (Lat. 66° 04′ N., Long. 44° 05′ E.) where a Pilot will board ship. After leaving the port Master should disembark Pilot on to pilot boat at Tolstic Point and then follow it up to the outer roads of the port of Mezen.

ANCHORAGE: Anchorage can be obtained in the outer roads and in certain places of the Mezen river situated between the outer roads and the Kamenka settlement.

The outer roads are situated at the Mezen river mouth. They are bounded on the South by a line connecting the Ryabinov and the Maslyany Points.

Vessels in the outer roads are subject to effects of the N.W. and N.E. winds and heavy waves caused by them. The depths in the outer roads are about 7 m. The holding ground is sand, mud and rocks. Anchorage can be obtained in the inner roads with depths at low water of up to 4.5 m. – 5 m. (length of area is 1.5 mile and width up to 150 m.).

The inner roads are situated opposite the Kamenka settlement. A good anchorage can be obtained there by two vessels simultaneously. The anchorage at Burnovsky Point with depths from 4.5 m. – 5.5 m. can be used by two loaded vessels drawing up to 4.2 m.

RESTRICTIONS: Vessels may enter port only in daytime on high water. Masters have to pay full attention to Pilot's advice as river has varying bends.

MAX. SIZE: The permitted draft for the entry to the port is announced monthly by the Port Authorities. It should not exceed 3.9 m. – 4.2 m. The maximum permitted length is 70 m.

HEALTH: As for "Archangel".

RADIO: Vessels can establish radio contact through the port radio station Mezen Radio operating 24 hours a day on the following frequencies:

Call sign	*Working*	*Calling*	*Type of trans-mission*	*Time*
UZT	500 kc/s	500 kc/s	A1	HX
Dispatcher (Port Control)	160.65 mc/s	156.80 mc/s	F3	H24
Port (Harbour Master's Office)	156.70 mc/s	156.80 mc/s	F3	HX

BERTHING: The floating dams are used as mooring berths in the port. The depths alongside at low water are about 3.5 m. Vessels drawing 3.9 m. – 4.2 m. are usually grounded while loading at low water.

The port of Mezen specialises in timber exports but other cargoes are also handled at berths. Covered warehouses and open concrete floor sheds are available.

Tug assistance for mooring berths is not compulsory. Berthing is usually done in the daytime. Tugs, if necessary are ordered by Master according to the Pilot's instructions.

Rendering of Notice of Readiness and opening and closing of hatches are usually done in accordance with the "Soviet Wood" charter party.

Loading of timber is done by ship's winches.

TIDE: The difference between two successive high waters and low waters is small but the range of the tide changes considerably. At the Kamenka settlement the mean range of the tide is 2.8 m. and the mean range of the spring tide is 3.1 m. At the Semzha river the mean range of the spring tide reaches 7.7 m. Everywhere in the Gulf of Mezen the differences in the duration of falling and of rising water are big and in some places of the Gulf of Mezen they may reach 5 hours.

Considerable changes in the water level are observed in the Spring. They are usually caused by the seasonal increase in the amount of water (due to melting snow) brought down by the rivers.

REPAIRS: Only minor repairs can be effected. There are no dry docks in the port.

FUEL: Supplies not guaranteed.

FRESH WATER: Fresh water can be supplied from the berths.

TIME: GMT plus 3 hours (all year round).

AUTHORITY: The Port of Mezen Authority.

AGENT: A branch of the Port of Archangel Main Maritime Agency "Inflot" at the Port of Mezen.

Port – "Inflot", Kamenka Settlement, 164650- Mezen, Archangel region, U.S.S.R. Cables "Inflot Mezen-Kamenka". Tel. Exchange – 94391. Harbour Master – 94081. Inflot – 94126.

MURMANSK: 69.00 N. 33.03 E. (See Plan Book)

GENERAL: A Barents Commercial Seaport and Fishing Port, Murmansk, is situated at the Eastern coast of the Southern elbow-shaped bend of the Gulf of Kolsky, between the Zeleny (Green) and Khaldeev Points. It is the last unfrozen port of the Northern seas route.

In very severe Winters the Southern and middle elbow-shaped bends of the Gulf get frozen over for a short period of time in February or March, during calm and frosty weather. In mild Winters drift ice is observed. The Northern part of the Gulf never gets frozen over. The port of Murmansk is open for navigation all the year round. In the event of ice conditions in the Gulf of Kolsky, ice-breaker assistance will be effected in compliance with the Harbour regulations in force.

The port area occupies nearly all Southern elbow-shaped bend of the Gulf of Kolsky. The port of Murmansk consists of 2 harbours: the Commercial and the Fishing Harbours. The Commercial Harbour is divided into 4 areas: The Rudny (Ore), The Ugolny (Coal), The Central, and Passenger Terminal.

The Fishing Port extends to the South of the Passenger Terminal.

DOCUMENTS: Also refer to beginning of U.S.S.R. section.

Muster roll, 6 copies (IMCO form)
Crew List, 2 copies (IMCO form)
Passenger List, 6 copies (IMCO form)
General declaration, 5 copies (IMCO form)
Cargo Manifest, 2 copies (IMCO form)

PILOTAGE: Compulsory. Pilot station is situated at Tuva-Goobay in Kolsky Bay, position 69° 11′ 09″ N., 33° 34′ 08″ E. ETA to be given to Agents 96, 48, 24 and 12 hours before arrival. It is vital that ETA be sent thus if vessel is to obtain the services of a Pilot. Pilot launch is distinguished by word "Pilot" in black letters on both sides. Pilots can be contacted on VHF Channel 16. Every vessel should drift whilst waiting for Pilot since depths in the Pilot station are too big to permit anchorage.

During rough sea Pilot is not able to board a ship at the Pilot station area. In this event vessel should follow the Pilot boat in the wake of it up to the Salny Island and embark a Pilot Southward of the Island at a place indicated by Pilot boat.

ANCHORAGE: At the Pilot station depths are too great to permit anchorage, but there is sufficient sea room for vessel to await Pilot with engines stopped. Anchorage with depths from 20 m. – 35 m. is situated in the Southern elbow-shaped bend of the Gulf of Kolsky, Westward of the Kievaraksky leading line (the port outer roads). The holding ground is good.

Every vessel waiting for mooring berth should anchor Westward of the Kievarasksky leading line but not obstructing other vessels' traffic.

It is strictly prohibited to lie at anchor Eastward of the Kievaraksky leading line. If, in case of emergency, a Master has to lie at anchor in the prohibited area, he should immediately report the fact to the Harbour Master of the Commercial port of Murmansk.

RESTRICTIONS: Vessels can enter the inner roads of the port at any time of day or night.

The speed of vessels navigating within the limits of the Gulf of Kolsky is restricted by the following limits:

(a) It shall not exceed 14 knots in the area bounded by the parallels of the Letinsky Point and the Northern side of the Salny Island.
(b) It shall not exceed 10 knots in the area bounded by the parallels of the Northern side of the Salny Island and Pinagory Point.
(c) It shall not exceed 6 knots in the area Southward of Pinagory Point.

MAX. SIZE: Vessels up to 39 ft. max. draft for berthing.

HEALTH: International quarantine signals to be used on arrival. No later than 6 hours before arrival at the inner area Master should radio Agents giving full details of state of health on board, and requesting pratique which will be given on arrival.

RADIO: Murmansk Radio operating 24 hours on 2182 kHz. Coastal radio station UMN operating 24 hours on 500 and 472 kHz. Coastal radio station UMV operating 24 hours on 13080 kHz.

Radio contact can be established through the port radio station Murmansk Radio, operating 24 hours a day on the following frequencies:

Call sign	*Working*	*Calling*	*Type of transmission*	*Time*
UMN	500	500	A1	H24
	472	468		
UMV	12,730	12,555	A1	H24
UMV	6,400	6,274.5	A1	HX
	8,690	8,368		
	*1660	16,716		
Murmansk-Radio	2,182	2,182	A3	H24
Murmansk-Radio	8,757.6	—	A3H	HX
"Radio-11" (Radar & Pilot Service)	161.50 mc/s	156.90 mc/s	F3	H24
	161.70 mc/s	157.10 mc/s	F3	H24
"Radio-10" (CPR)* (Pilot Service)	160.95 mc/s	156.35 mc/s	F3	H24
	161.90 mc/s	157.30 mc/s	F3	H24
	161.95 mc/s	157.35 mc/s	F3	H24

*CPR – Central Port Radio Station

The pilot service operates through the "Port" (CPR) and "Rascat" (CPR) – Central Port Radio Station.

Radar/VHF link:

In the South circular bay, movement of all vessels is severely controlled by coastal radio station "RASCAT" (VHF Channels 13, 18 and 22). All vessels under way must make contact with BRLC and carry out the recommendations received.

All vessels when at anchor or navigating in the Gulf of Kolsky must keep constant radio watch.

The port radar station gives all possible information to any vessel navigating in the Gulf in the restricted visibility. Radar navigation is usually controlled by a Pilot on board a vessel.

Storm predictions are transmitted on Channel 16 VHF for vessels in the vicinity. Vessels at moorings are warned through the Agent "Inflot".

Notice of Arrival: Every foreign vessel on approaching the Gulf of Kolsky must ask for entry permission into the Gulf from the Toros Island signal station by exhibiting her International Code letters by day and at night her call sign should be made in Morse code by searchlight.

VHF: Port VHF maintains contact between Pilots and ship within harbour limits, and between ship and shore. Calling on Channel 16 working channel will be according to instructions from shore.

TUGS: Normally join vessel in the inner area of the port. Tug's lines are used.

BERTHING: Main berths, depth alongside 32 ft. at low water. Average height of tide about 3.9 m. Vessels berth port or starboard side alongside at Master's and Pilot's discretion. The berths of the Commercial Harbour with depths alongside of up to 10.5 m. are equipped to handle general and bulk cargoes, metals, machinery, chemicals, foodstuff, etc.

There are enclosed mechanised warehouses for apatite including open concrete floor sheds.

It is prohibited to approach a berth without sounding a prolonged blast of the whistle. Same signal should be sounded when leaving an outer berth and the inner basin, as well as when passing a vessel lying at anchor in the outer roads.

Berths of the port are equipped with mobile electric cranes of up to 40 tons capacity. There are floating cranes with lifting capacity of up to 90 tons, and other cargo handling equipment and intra-port transport. Since loading/unloading is usually done by the port cranes, there are no specific requirements to vessels cargo gear.

STEVEDORES: Arranged by Agent on basis of Masters ETA. Loading and unloading is carried on throughout 24 hours a day including holidays.

MEDICAL: Hospital and medical facilities available. Vaccination can be arranged. If doctor required on board Master should inform Agents by radio or VHF.

DENSITY: At the berth varies between 1006 and 1025.

FRESH WATER: Available from most berths, otherwise supplied by barge. To avoid delay recommended to order before arrival.

FUEL: All grades available. Delivered by barge. Advance notice required.

GANGWAY/DECK WATCHMEN: Not obligatory.

OPENING/CLOSING HATCHES: Usually performed by ship's crew.

CERTIFICATES: At first Russian port of call certificates of tonnage and those required by International Convention will be required for examination.

CUSTOMS ALLOWANCE: No restrictions on crew's consumption of tobacco and alcohol on board. It is forbidden to take these items ashore.

CONSULS: There is no local representation.

REPAIRS: All kinds of repairs can be carried out for vessels of up to 40,000 dwt.

DRY DOCKS: Large dock; length 225 m., width 45 m. Small dock; length 141 m. width 30 m.

TIDE: Changes of the water level in the Gulf are due to the tides. The tide is semi-diurnal with two high waters and two low waters a day. The difference in time of high and low water is about 6 hours. The range of the tide at mean neap is about 2.4 m. and at mean spring 4.5 m. The extreme range of water level is usually observed during the Autumn months and the lowest during Spring.

TIME: GMT plus 3 hours.

TELEPHONES: Ambulance, tel. 003, 2395 and 2422; Fire service, tel. 2252 and 2524.

DEVELOPMENTS: Reconstruction is being carried out in order to speed up loading of iron-ore and other cargoes.

AUTHORITY: Murmansk Sea Trade Port.

AGENT: The Port of Murmansk Main Maritime Agency "Inflot", 19 The Port Settlement, Murmansk 24, U.S.S.R. Cables "Inflot Murmansk". Tel. 2-56-66; 2-51-97. Telex 128.

NAKHODKA: 42.47 N. 132.52 E. (See Plan Book)

GENERAL: A commercial port, Nakhodka is situated in Nakhodka Bay, in the N.W. part of the Japan Sea.

Sometimes America Bay is covered with sludge which is frequently driven out by winds into the sea.

From the beginning of January to March the Nakhodka Bay is usually covered with thin ice which can easily be broken by vessels and driven out into the sea by favourable winds.

The port is open for navigation all the year round.

Changes of the water level in the Nakhodka Bay are of small account but the rise of the water level caused by strong Southerly winds blowing for considerable periods of time, may reach quite a high level.

The Northern part of the Nakhodka Bay from the entrance up to the line connecting the Lindgolm and Basnin Points is occupied by the Commercial port. The fishing port is situated Southward of this line.

The most dangerous wind for vessels lying in the Nakhodka Bay is the strong Southern wind of long duration caused by typhoons. The wind usually gives rise to the water level and produces waves of up to 3 m. height in the Bay.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Pilotage in the port of Nakhodka is compulsory for all vessels irrespective of nationality and ownership with the exception of the local coasters.

Foreign vessels proceeding to the port from the seaward should first make course to the approaching point, Lat. 42° 27′ 2″ N., Long. 132° 57′ E. All vessels are recommended to approach this point by following the course 350.5° within the 1 – 2 mile wide traffic lane leaving the traffic separation zone on the port side.

From the approaching point a vessel should follow the course 000° for 8.2 miles within the 1 mile wide traffic lane leaving the traffic separation line on the port side at the entrance to the area of the "circular motion".

After having entered this area a vessel should steer anti-clockwise within the 2 mile wide traffic lane. Upon leaving the area of the "circular motion" a vessel should keep on the Vkhodnoi leading line of the lighthouses of the Nakhodka Bay and follow this course up to area No. 176 (the quarantine anchorage and the Pilot boarding area).

Vessels approaching the Novitsky Bay should follow the Vkhodnoi leading line up to area No. 177 (the Quarantine anchorage).

Foreign vessels leaving the port of Nakhodka and/or the Novitsky Bay should follow the opposite course. After having entered the area of the "circular motion" vessels should steer anti-clockwise in the 2 mile wide traffic lane.

Having left this area a vessel should follow course 180° steering 8.2 miles within the 1 mile wide traffic lane leaving the traffic separation line on the port side, she should then turn and follow the course 190.5° within the 1 – 2 mile wide traffic lane up to the exit point of the traffic separation area leaving the separation zone on her port side.

To avoid damage to a vessel and/or any port installation vessels should be moored/unmoored by the method of parallel mooring (unmooring) with tug assistance.

Being at 10 m. distance from a berth a vessel is allowed to use her main engine in case of emergency only.

ANCHORAGE: A safe anchorage can be obtained in the area "A" with depths from 13.0 m. – 20.0 m. and in the anchorage "D" area with depths from 18.0 m. – 28.0 m. The holding ground in both anchorages is mud, sand, sand with mud, stone.

The "A" area is a quarantine anchorage which serves as the Pilots' boarding place and an anchorage for deep sea-going vessels over 3,000 d.w.t.

The "D" anchorage area (No. 177) is an anchorage for tankers proceeding to the oil port situated in the Novitsky Bay. Boundaries of the anchorages are shown on the chart.

To lie at anchor in the Nakhodka Bay, in the fairway and in the dredged harbours, except in emergency, is strictly prohibited.

RESTRICTIONS: Vessels can enter or leave the port at any time of day and night. There are no size restrictions for entry to the port, except for vessels having the maximum permitted draft.

Anchorage for tankers is allowed only in the "D" area (area No. 177).

MAX. SIZE: The permitted draft for vessels proceeding to the Commercial port is 9.10 m. for the Fishing port and the Passenger Terminal 8.0 m.

Vessels drawing over the permitted draft must obtain Harbour Master's permission prior to entry to the port.

HEALTH: Advise "Inflot" by radio in advance if there is any case of quarantine illness on board the ship. Smallpox vaccination is compulsory for all crew members. If vessel is arriving from a cholera area, then cholera inoculations are also required.

RADIO: Radio communication can be effected via the radio station of the Primorsk Shipping Company – "Nakhodka-Radio" some data of which is given in the table below.

	Frequencies (kHz)		*Type of transmission*	*Time of work*
Call sign	*Working*	*Calling*		
UKI	500	500	A1	H24
UKK – 3	8510	8448	A1	
	12990	12627	A1	HX
"Port – 5"	156.8*	156.8*	F3	HX
"Lotos" (Port Control)	156.8*	156.8*	F3	H24
"Golos – 1" (Port Service & Pilot Watch)	156.8*	156.8*	F3	H24

*Frequencies are given in mHz.

The traffic and storm signals are exhibited at the Signal Station situated 2.5 cables Westward of Shefner Point.

TUGS: Tug and mooring launch assistance.available. Tugs join the vessel in America Bay as directed by Master or Pilot. Ship's tow lines are used.

BERTHING: May be effected at any time of day or night. In daytime vessels mooring position will be marked by a flag and at night by a red lantern. These signals mark the point where the ship's bow should be at the mooring.

The berths of cargo handling port area No. 1 have depths alongside from 8.6 m. up to 10.2 m. and are equipped to handle potassium salt, grain, equipment, cables, wire ropes, metals, phosphorus, etc.

The berths of cargo handling port area No. 2 have depths alongside from 9.5 m. up to 10.2 m. and are equipped to handle grain, coal, cement, foodstuff and general cargoes.

The berths of cargo handling port area No. 3 have depths alongside from 8.8 m. up to 11.8 m. and are equipped to handle timber, sawn timber, 20 ft. and 40 ft. ISO containers, equipment, machinery and other cargoes.

Passenger vessels are handled at two berths with depths alongside 8.8 m. and 6.1 m.

Electric cranes of up to 41 tons capacity are operated on the quays. There are also floating cranes with lifting capacity of up to 300 tons and other cargo handling equipment, intra-port transport included.

Loading and/or unloading is usually done in accordance with conditions and rates stipulated by Charter Parties and Sales Contracts.

STEVEDORES: Arranged through "Inflot".

MEDICAL: Medical service is free. All requirements should be ordered in advance through "Inflot".

FRESH WATER: Can be supplied at the berth or by barge.

FUEL: Available.

TANKERS: Slop reception facilities are available.

OPENING/CLOSING HATCHES: Can be carried out by stevedores.

CUSTOMS ALLOWANCE: No restrictions on tobacco and alcohol on board ship. Only tobacco required for personal consumption may be taken ashore.

CONSULS: North Korea, tel. 55310. Japan, tel. 56360.

WIND: The most dangerous wind for vessels lying in Nakhodka Bay is the strong Southern wind of long duration caused by typhoons. The wind usually gives rise to water level and sends heavy waves of up to 4 m. height into the Bay.

REPAIRS: All kinds of repairs for vessels of up to 25,000 dwt. can be carried out.

REPATRIATION: Can be arranged during the Summer months provided passport and documentation in order. During Winter months there are no facilities for foreigners to reach nearest international airport so repatriation is only possible via infrequent passenger ships to Japan.

AIRPORT: Nearest international airport is at Khabarovsk, 1,000 kilometres away. Vladivostok is now closed to foreigners or international traffic, though sometimes used for air freight.

TIME: GMT plus 10 hours all the year round.

SHORE LEAVE: Permitted subject to police control.

DEVELOPMENTS: Constructing new port at Urangel, 8 miles from Nakhodka, having: Coal pier, annual capacity 10 million tons. Coal conveyor, annual capacity 5 million tons. Wood chip conveyor system, annual capacity 800,000 tons. Container system.

AUTHORITY: The Port Authority of Nakhodka.

AGENT: The Far Eastern Main Maritime Agency: "Inflot". Postal address: 692900 USSR Primorski Kray, Nakhodka, ul Leninskaia 2. Telegraphic address: Inflot Nakhodka. Telephones: 5-62-33, 5-61-55.

NARYAN-MAR: 67.38 N. 53.00 E.

GENERAL: A commercial port, Naryan-Mar is situated in the S.E. part of the Barents Sea, at a distance of 70 miles from the Pechora river mouth on the right bank of the Gorodetsky Shar Creek.

The port is open for navigation for a period of 100 – 110 days in the year.

In the Pechora river inlet first ice usually begins to form between 20th and 25th October, but sometimes appears at the beginning of the month.

The inlet becomes completely frozen over at the middle of December. Ice finally disappears at the end of June or sometimes beginning of July. Changes in the water level in the Pechora Inlet, due to melting of ice in Spring, have not been observed.

The formation of ice in the rivers flowing into the Pechora Inlet usually depends upon the time of the appearance of ice in the Inlet itself. Rivers, as a rule, become frozen over by the middle of October. The ice in the rivers usually breaks up earlier than it finally disappears in the Pechora Inlet.

The Pechora river at the Kuya settlement area becomes frozen over at the end of October, and the ice there finally disappears by the end of May.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. Besides information stipulated in Soviet Wood Charter Party, vessels approaching pilot buoy may contact Port Authorities or Pilot in first 15 minutes of any odd hour from 0700 till 2300 hrs. (Moscow time), frequency 2182 kc/s. Signals for Pilot to be given in accordance with International Code. Pilot boat wooden, standard type, white painted, with word "Pilot" in black letters on wheel-house. Pilot usually boards vessel at the Pilot Anchorage light buoy (Lat. 68° 30′ N., Long. 54° 32′ E.). In case of bad weather, and in extraordinary circumstances Pilot shall embark vessel in the Srednevskie Islands area. In this event a vessel approaching the port from seaward should follow pilot boat in the wake of it, up to the Srednevskie Islands leading line where Pilot will be able to board ship.

Master of a vessel proceeding to the port of Naryan-Mar should order a Pilot through the Harbour Master 24 hours prior to arrival at the Pilot Anchorage light buoy and advise more precise ETA not later than 4 hours before approaching it.

Master should order Pilot not later than 2 hours prior to shifting berth and/or leaving the port.

ANCHORAGE: A recommended anchorage for foreign vessels is situated in the area with the central point 68° 30′ N., 54° 33′ E. The depths in the anchorage are from 5.4 m. – 6.6 m. Also Inner Roads where anchorage will be indicated by Pilot.

An anchorage can be obtained at the right bank of the Pechora river off Urpinsky leading line No. 24. Depths are from 4 m. – 17 m. The bottom is sand and mud.

Good anchorages with depths from 5 m – 10 m. can also be obtained opposite Zakhrebetny Bay and N.E. of the town of Naryan-Mar.

All vessels arriving from abroad or leaving the port for abroad, must anchor opposite Zakhrebetny Bay for the performance of port formalities.

RESTRICTIONS: Vessels can enter or leave the port at any time of day or night.

The permitted draft for entry to the port is about 4.5 m. but it is usually advised by the Port Authorities at the beginning of navigation. The maximum permitted length of a vessel is 110 m.

The entrance to the port is by the fairway leading from the Pilot Anchorage light buoy across the Pechora river bar.

The bar itself is the extensive shoal water area extending Northward of the Bolvansky Nos. Point. Three channels are dredged across the bar: The Receiving Channel, the Bar Channel and the Povorotny Channel. The last one serves as turning-point from the Receiving Channei into the Bar Channel. Vessels drawing not more than 4.9 m. can pass across the bar only at high water level.

It is prohibited to enter or leave the port through the Bar Channel and/or Receiving Channel as well as to navigate in the port area during dense fog, heavy rain and snow falls, strong winds of over Force 6 and absence of floating marks.

With the appearance of ice in the Pechora Inlet and in the Pechora river, entry to the port is not allowed without Harbour Master's permission.

The speed of a vessel navigating from the Pilot Anchorage light buoy through the Receiving Bar Turning, Alekseevsky, Polovsky, Kuisky, Urpinsky and other Channels shall not exceed 6 knots, with the exception at the part of the Pechora river between the Zakhrebetny and Srednevsky Channels where it is allowed to navigate with speed not exceeding 12 knots.

When passing floating cranes nearby, lighters and vessels lying alongside the port quays, every ship should proceed at dead slow speed.

MAX. SIZE: Draft declared by Port Authorities after being checked in the beginning of the season, and is about 15 ft.

HEALTH: Vessels inspected by sanitary officer. If no diseases, vessel obtains free pratique. Pratique automatic when vessel arrives from another Russian port.

RADIO: Naryan-Mar Radio.

	Frequencies (kHz)		*Type of*	*Time*	
Call sign	*working*	*calling*	*trans-mission*	*of work*	*Remarks*
UOY	500	500	A1	HX	
Naryan-Mar-Radio 1	156.8*	156.8*	F3	HX	Operates during period of navigation only

*Frequencies are given in mHz.

Storm warnings for vessels' traffic in the Pechora Inlet area for the coming 24 hours are transmitted via both the Central Port Radio and VHF radio.

Notice of Arrival: Should be given in accordance with the "Soviet Wood" Charter Party conditions.

BERTHING: The port of Naryan-Mar specialises in timber exports. Depths at the berths are up to 6.5 m. There are enclosed warehouses and open concrete floor sheds.

The necessary number of tugs for entering or leaving the port as well as for shifting berth shall be agreed upon between Pilot and Master.

A mooring berth is usually indicated by a Pilot. Shifting berths without having obtained Harbour Master's permission is not allowed. Ship's tow lines are usually used during towage.

Diesel portable cranes of up to 6 tons capacity are operated on the quays. There are also track-laying cranes of up to 12 tons and floating cranes with lifting capacity from 35 – 40 tons.

STEVEDORES: As per "Soviet Wood" Charter Party.

MEDICAL: No advance notice required. Clinic and hospital available.

DENSITY: Fresh water irrespective of tide.

FRESH WATER: Delivered by tanker.

FUEL: Not guaranteed.

GANGWAY/DECK WATCHMEN: To be provided by vessel.

OPENING/CLOSING HATCHES: According to "Soviet Wood" charter party.

CERTIFICATES:

Seaworthiness.
Measurement.
Load line.
Cargo Equipment.
Safety Equipment.
Deratisation Certificates.

CUSTOMS ALLOWANCE: Tobacco/Wine. No quantity limits.

IDENTIFICATION CARDS: Only Seamen's Books.

CONSULS: No Consuls.

REPAIRS: Small repairs only.

DRY DOCKS: None.

REPATRIATION: Repatriation and crew changes require visa formalities.

AIRPORT: Airport served by regular lines and situated near town.

TIME: GMT plus three hours. No seasonal alterations.

TIDE: Changes in the water level in the port area depend upon tides and effects of the wind.

The tide is semi-diurnal with two high waters and two low waters a day. The range of the tide varies from 0.9 m. – 1.8 m. Changes in water level are caused by the effects of the wind and may reach 1 m. – 1.5 m.

HOLIDAYS: See "Archangel".

POLICE/AMBULANCE/FIRE: Police 02; Ambulance 03; Fire 01.

TELEPHONES: Can be arranged on board.

SHORE LEAVE: Each crew member properly signed in ship's Articles and having valid Seaman's Book is allowed ashore.

DELAYS: Caused by rains, when vessel loading cargo of sawn goods.

AUTHORITY: The Port of Naryan-Mar Authority.

AGENT: A branch of the Port of Archangel Main Maritime Agency "Inflot" at the Port of Naryan-Mar. Pechora Timber Mill Khatanzeisky, the Port of Naryan-Mar, Archangel Region, U.S.S.R. Cable "Inflot Naryan-Mar". Tel. "Inflot" via the timber mill switchboard 30-70, 31-05.

NEVELSK: 46.40 N. 141.51 E. (See Plan Book)

GENERAL: The sea fishery port of Nevelsk is situated in the Tatarsky Strait, in the Southern part of the Nevelsky Bay. The port is open for navigation all the year round.

Changes of the water level are mainly caused by in and off-going tidal floods.

The port consists of two parts. The Outer part includes a part of the Nevelsky Bay water area with the imaginary boundaries drawn by an arc of 1.5 mile radius from the light mark installed on the Southern point of the Western breakwater. The Inner port consists of the harbour of the fishing port, the Small and the Northern Scoops. The boundary of the Inner is the line connecting the points of the Southern and the Western breakwaters.

The Master of a vessel when entering the port should keep on the leading line of the green leading light marks located at a distance of 5.5 cables to the North of the Southern point of the Naga reef. The true direction of the Leading line is 259° 2' – 079° 2'.

The port of Nevelsk bearing in mind its position, size, weather and hydrological conditions is not and cannot serve as a sheltered port as it is only partially protected from the effects of the sea swell and winds blowing from South, West and N.W. directions and is not protected from S.W. winds at all. Therefore deep sea-going vessels cannot be allowed to enter the port during storm warnings. it is dangerous to stay in the port when heavy S.W. winds are expected.

PILOTAGE: Effected round the clock. The Master of a vessel should order a Pilot via the Harbour Master's office.

ANCHORAGE: Situated in the Outer port to the South of the leading line and to seaward of the 20 m. contour. The anchorage is not protected from West and North winds and waves. The bottom is sand. The anchorage in the inner area is dangerous as the ground there (stone plate) does not hold anchors well.

RESTRICTIONS: The permitted draft is determined by the Harbour Master. Vessels having draft over 5.8 m. are allowed to enter the port after having obtained the Harbour Master's permission.

TUGS: Tugs ordered by the Master for mooring and unmooring meet vessels within the boundaries of the Inner port.

RADIO: Communications can be effected through the port radio station "Nevelsk-Radio".

	Frequencies (kHz)			
Call sign	*Working*	*Calling*	*Type of trans-mission*	*Time of work*
"Nevelsk-Radio – 1"	2740	2740	A3	H24
"Nevelsk – 31"	156.8*	156.8*	F3	H24

*Frequencies are given in mHz.

BERTHING: All vessels entering the port are moored to the berths according to instructions of a port controller.

The berths of the port with depths alongside from 5.8 m. up to 6.5 m. are equipped to handle general, bulk liquid and other cargoes.

There are closed warehouses, open concrete floor sheds and a cold store in the port.

It is recommended to use manilla mooring ropes due to insufficient protection of the port from effects of winds, waves and strong variable current with surge (so called the "tyagun".).

Opening and closing of hatches is usually done by the crew. All deep draft vessels are loaded/unloaded in the roads.

The berths of the port are equipped with 5 ton portal cranes. There are other cargo handling facilities and intraport transport.

FRESH WATER: Available in limited quantities.

FUEL: Diesel oil available.

TIME: GMT plus 11 hours all year round.

REPAIRS: Possible for vessels up to 4.0 m. draft.

CONSULS: None.

AUTHORITY: The Port of Nevelsk Authority.

AGENT: Sakhalin Main Maritime Agency, Inflot, at Kholmsk, Sakhalin Island, U.S.S.R.

NOVOROSSIYSK: (Including Sheskharis-Oil Harbour) 44.43 N. 37.47 E. (See Plan Book)

GENERAL: The port of Novorossiysk is situated in the N.E. part of the Black Sea, in the Bay of Novorossiysk, 60 miles S.E. of the Kerch Strait.

The port is open for navigation all the year round. Ice very seldom appears in the port area. Sometimes, in the very severe Winters particularly, a very narrow strip of thin ice (so called "Zabereghi") may be formed on the coast line.

In Winter, strong, gusty N.E. winds (called "Bora"), reaching hurricane force at times, blow from the coastal mountains. Due to these winds, vessels lying at anchor in Novorossiysk Bay may very quickly become covered with ice when the temperature of the air is cooled below freezing-point.

It is impossible to enter the port when "Bora" blows, therefore, all vessels are recommended to leave Novorossiysk Bay for the open sea beforehand or lay at anchor in the Yuzhnaya Ozereika roads, at a distance of 8.5 miles Westward of the entrance to the port of Novorossiysk or in Anchorage area No. 77, to the South of the Doob Point, until the weather improves.

The range of water level in Novorossiysk Bay caused by the effect of the winds, does not exceed 0.6 m. The changes of water level, due to variation in atmospheric pressure ("Seish" effects), are observed at times. The "Seish" may last up to several days. The maximum range of water level, due to the "Seish", observed in Novorossiysk Bay is 0.6 m.

The port consists of 2 harbours – the Dry Cargo Harbour and Oil (Sheskharis) Harbour.

The inner roads are situated at the head of Novorossiysk Bay are divided from the outer roads by the Western and Eastern Moles. The outer roads are situated between the moles and the Southern border of the port.

The Dry Cargo Harbour situated inside the inner roads is protected by 2 (Western and Eastern) moles.

Two passages, the Western and Eastern, divided by Penaisky Shoals, lead to the inner roads through the port area. The Western passage is wider in comparison with the Eastern, and vessels may enter outer roads passing through it by one course.

DOCUMENTS: Refer to beginning of U.S.S.R. section

Shipmaster's Report: (1975) Notwithstanding the instructions for documentation for all U.S.S.R. ports referred to at the beginning of the section, the Novorossiysk Port Authorities require the following:

General Declaration (IMCO FAL form 1)	3 copies
Cargo Declaration (IMCO FAL form 2)	2 copies

Ship's Stores Declaration (IMCO FAL form 3)	2 copies
Crew Effects Declaration (IMCO FAL form 4)	2 copies
Crew List (IMCO FAL form 5)	6 copies
Passenger List (IMCO FAL form 6)	4 copies

PILOTAGE: Compulsory: 96 hours prior arrival cable Inflot giving ETA, name vessel, gross tonnage, exact draft, type of engine. Flag sound and Morse signal G. Pilot meets vessel at 44° 37′ N., 37° 52′ E. Movement of vessel within inner harbour – only under Pilot guidance. If Pilot is not available vessel should anchor in area No. 52, opposite the Kabardinka settlement, recommended as an anchorage, and wait until Pilot arrives.

ANCHORAGE: Anchorage in the outer roads of the port is allowed almost everywhere but most convenient places for the purpose are to be considered the following 4 areas. The first one is area No. 52 situated to the North of the Doob Point.

Depths there vary from 12 m. to 27 m., the holding ground is mud. In the event of winds blowing from seaward Masters of all vessels are recommended to leave this area for the open sea. Areas No. 16 and No. 63 are the second and the third anchorage places situated, respectively, 2.5 and 8 cable lengths Westward of the Penai Point. Depths there are from 13 m. to 27 m., the holding ground is mud and mud with shell. The fourth place is area No. 51 situated 6 cable lengths South-eastward of the port entrance. Depths there are from 16 to 24 m.

Vessels approaching the port of Novorossiysk with N.E. gales ("Bora") blowing, or caught by the storm whilst lying in the outer or inner roads, or after having received storm warning, should use every opportunity to proceed to sea or lay at anchor in the Yuzhnaya Ozereika Roads, having the main engines ready and keeping constant anchor watch.

Under the circumstances, every vessel should keep regular radio contact with port radio station.

Masters of vessels lying at anchor in the outer roads and/or in the port, are usually warned beforehand about the forthcoming N.E. winds. Since these winds may reach hurricane force during a very short period of time, particularly in Winter, all Masters lying at anchor in Novorossiysk Bay are recommended to pay careful attention at every change of the weather, to watch position of vessel to be able to prevent her drifting about anchor and proceed to sea in due time.

RESTRICTIONS: No restrictions on night entry into the Inner Roads. Mooring and/or unmooring, both in the Dry Cargo Harbour and the Sheskharis Oil Harbour cannot be effected during Southerly or N.E. winds over 17 m.p.s.

MAX. SIZE: The permitted length for entry into port is 250 m., draft 11 m. for dry cargo vessel.

Tankers: 250,000 d.w.t., 19 m. max. draft.

HEALTH: Free pratique automatic for vessels coming direct from U.S.S.R. port. From other countries, usual procedure of sanitary inspection applies.

RADIO: Vessels can establish radio contact through port radio station Novorossiysk Radio operating 24 hours a day on the following frequencies:

Call sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of transmission*	*Time of work*
UDN	500	500	A1	H24
Novorossiysk-Radio	2,182	2,182	A3	H24
UFN	8,663	8,358	A1	H24
UFN	13,040	12,555	A1	H24
	16,890.5	16,730	A1	HX
"Novorossiysk-Radio – 9-12" (CPR)**	156.8*	156.5*	F3	H24

*Frequencies are given in mHz

**CPR – Central Port Radio Station.

All vessels passing through the traffic controlled zone and/or anchored there have to keep constant VHF radio watch on Channel 16.

The port signal station is equipped with radar which gives all possible information for ensuring safe pilotage, and also helps Pilots in shifting vessels within the port inner roads.

TUGS: The following number of tugs and their power are stipulated for mooring operations in accordance with size of vessels to be berthed:

Ship's length	*Number of tugs and power*
from 50 to 100 m.	1 tug, from 150 i.h.p. to 600
from 101 to 160 m.	2 tugs, from 600 i.h.p. to 1,200
from 161 to 200 m.	2 tugs, 1×2,300 i.h.p., 1×1,200 i.h.p. or 3×1,200 i.h.p.
from 201 to 250 m.	3 tugs, from 2,300 i.h.p. to 5,000
over 250 m.	4 tugs, from 2,300 i.h.p. to 5,000

Notes:

1. Exceptions to the above regulations are possible if the Ship Master consents to deviations and the Harbour Master grants permission for the same. But the deviations should not affect the safety of mooring operations.

2. While manoeuvring ships to the Sheskharis Berths two more tugs of 150 i.h.p. are engaged regardless of the ship's size in view of the constructive features of the berths.

BERTHING: When proceeding in inner harbour vessels must keep both anchors ready to let go; ships to be moored by safe ropes which to be kept tight at all times. Also be ready to use anchor chain over bollard according to Pilot's recommendation. Strictly prohibited to work with propellers lying alongside berth. All mooring ropes must be fitted with rat-guard plates.

The quays of the Dry Cargo Harbour with depths alongside of up to 11.5 m. are equipped to handle general and bulk cargoes (coal, ore), metals, timber, sugar, grain, cement, fruit and vegetables.

Berths of the port are equipped with modern cargo handling facilities There are portal cranes of up to 40 tons capacity, floating cranes with lifting capacity of up to 100 tons, automatic and electric cargo lifters and other equipment.

Opening and closing of hatches is usually done by ship's crew with the help of portal cranes at dry cargo berths, if ordered by Master, grain berth excluded.

Ores are loaded in compliance with the Temporary Regulations for Carrying Ores handed over to the Shipmaster by Inflot Agents during inwards clearance.

Following are the basic requirements of above Regulations to the ores being loaded *(a)* moisture contents not higher than 12% (if other percentage is not stipulated by Charter Party); *(b)* angle of repose is not less than 35°.

Grain and other bulk cargoes are to be loaded in strict conformity with the International Convention.

STEVEDORES: All necessary services including stevedoring work available under Port Authority guidance. Port cargo-handling regions where ships berth managed by Port Authority and used for stevedoring tallymen service, storage, etc. On the matters connected with services available, foreign vessels have to apply to Port Authority through Maritime Agency "Inflot".

MEDICAL: In case of accident (emergency), medical attendance rendered at any time. Hospital facilities available. Also inoculation vaccination, etc.

TANKERS: Bearing in mind N.E. gales, oil carriers lying alongside oil pier must have boat-ropes lowered to water and illuminate them at night All scupper holes on main deck must be closed tightly. Master responsible for overflow of oil in the vicinity of harbour and has to bear harbour cleaning costs. No repair work can be done on tankers lying alongside oil pier. No ballast water may be pumped out, no garbage or refuse thrown overboard. Ballast water to be pumped into shore slop tank.

The Sheskharis Oil Harbour is situated in the Eastern part of the outer roads, 2.2 miles N.E. of the Penai Point. It is protected by a mole from the South and oil jetty from the North. The base of the jetty is used as a berth for fire-fighting boats.

Since it is not safe to stay alongside berths in the Sheskharis Oil Harbour during strong winds blowing from any direction, all tankers after having received a storm warning should take urgent measures to leave for sea.

Depths at the berths of the Sheskharis Oil Harbour are from 9.5 m. up to 19.0 m.

To ensure safe loading/unloading of oil products as well as to expedite the vessel's turn around time, every tanker should be equipped with cargo manifolds capable of fitting 8 – 12 in. shore-loading connections

These manifolds should allow the upward connection with shore cargo flanges of not less than 1 m. in height and located on deck at 3 m. – 5 m. length from side of vessel.

Deepwater Berth No. 1: Accepts vessels of 80,000 to 250,000 d.w.t Arrival and departure draft not to exceed 19.0 m.

DENSITY: About 1010 – 1014.

FRESH WATER: Available from shore; minimum quantity invoiced at 15 tons.

FUEL: Most grades available. Fuel for tankers can be supplied ex-shore. Bunkers for dry cargo vessels are usually delivered by lighters.

FIRE PRECAUTIONS: All operations involving open fire and sparks are prohibited on oil pier. Two fire-extinguishers, thick felt and sand must be ready beside hose connection.

GANGWAY/DECK WATCHMEN: Gangway watch compulsory and carried out by crew.

OPENING/CLOSING HATCHES: Normally by crew, otherwise according Charter Party.

CUSTOMS ALLOWANCE: No quantity limits but nothing allowed to be taken ashore.

IDENTIFICATION CARDS: Crew members get shore passes.

CONSULS: No Consulates in port or its vicinities.

REPAIRS: All kinds of repairs for vessels of up to 60,000 d.w.t. can be carried out.

Cargo Superintendent's Report: 1975.

The Novorossiysk Shiprepair Yard is capable of carrying out any ship repairs, and is equipped with 3 floating docks. I was unable to obtain information on the size of these docks, but estimate they are capable of handling vessels in the 100,000 ton range.

REPATRIATION: No facilities exist for effecting crew changes. A crew member may be repatriated due to family reasons or sickness but repatriation requires visa formalities.

AIRPORT: Nearest airport (Krasnodar) served by regular internal lines is situated at 150 km. from port.

Cargo Superintendent's Report: 1975.

Novorossiysk has its own airport, connected to the regular inland line's service. There are daily services to and from Moscow via Kharkov.

TIME: GMT plus 3 hours; no alterations during year.

HOLIDAYS: New Year's Day, 8th March (World's Women's Day); May 1st, 2nd (Labour Day); May 9th (Victory Day); October 7th (U.S.S.R Constitution Day); November 7th, 8th (Great October Socialist Revolution Day). Cargo work can be arranged on those days.

POLICE/AMBULANCE/FIRE: Police, 02; Ambulance, 03; Fire, 01.

TELEPHONES: Can be arranged to be fitted on board.

SHORE LEAVE: Crew members are allowed ashore. Crew members of foreign vessels get shore passes which grant them permission to stay ashore till 2400 hrs. Crew members who lose their shore passes as well as those late from ashore, are not granted shore leave any longer in conformity with local regulations.

AUTHORITY: The Port of Novorossiysk Authority.

AGENT: Main Maritime Agency "Inflot", 13 Portovaja Str., Tel. 6-22-49, 6-22-85, 6-26-78. Cables: "Inflot" Novorossiysk. Telex: 8217.

ODESSA: 46.30 N. 30.46 E. (See Plan Book)

GENERAL: The port of Odessa is situated on the N.W. coast of the Black Sea in the S.W. part of Odessa Bay.

The port is open for navigation all the year round, but with ice-breaker assistance in severe Winters about 30 days of the year. Ice first begins to form in the second half of December and finally disappears in February. After ice has formed it is often broken up by strong winds and stormy weather. In mild Winters ice has not been observed in Odessa Bay.

Range of water level caused by winds depends on force and periods they blow, and may reach 0.6 – 1.0 m.

Atmospheric pressure has also a direct influence on the water level ("Seish" effect), but is weaker than effects of the wind. The "Seish" may last from a few minutes up to several days causing change of water level up to 0.58 m.

DOCUMENTS: Refer to IMCO forms.

PILOTAGE: Compulsory. Arranged through Inflot, but vessel to give 12 days, 96, 24 hours and 6 hours notice through Odessa radio. Pilot boat recognised by international pilot flag. Vessel requiring Pilot shows international flag "G".

Vessels leaving the port of Odessa for the port of Kherson should proceed there under control of a State Commissioned Pilot.

Area limited by a circle with a radius of 3 miles with its centre at the Vorontzov lighthouse, as well as anchoring place No. 64 are announced to be "Traffic control zone". Vessels approaching zone from the sea must communicate with "Odessa Port Control" on VHF, Channel 14 (156.7 mHz.) and act in accordance with its instructions.

ANCHORAGES: The Outer Roads, between the port and Severny Odessky Cape, depths up to 14 m. Open to winds from N.E. to S.S.E. Good holding ground.

On arrival at the outer roads, vessels should lie at anchor whilst waiting for a berth at the anchoring place No. 64 in accordance with instructions given by "Odessa Port Control".

RESTRICTIONS: Vessels enter only with Pilot and should have lights according to Pilot's instructions. Vessels berthed depending on kind of cargo carrying or loading.

Vessels can enter and leave the port at any time of day or night.

Medium size vessels when entering or leaving port must have keel clearance not less than 1 ft.; large vessels not less than 2 ft.

Vessels are allowed to moor at berth only after having obtained Harbour Master's permission.

The speed of a vessel shall not exceed 4 knots when passing through the channel and/or in the port water areas marked by navigational marks.

Large vessels laden with ballast water only, are allowed to moor to berth if winds do not exceed Force 6. A vessel of small size may be turned broadside on to a loaded vessel of a larger size, but not vice versa.

MAX. SIZE: The maximum permitted draft is 11.5 m. Length up to 230 m.

HEALTH: Free pratique given on berthing or at the anchorage. In case of suspected disease Master must inform Inflot by cable. Free pratique cannot be granted automatically.

RADIO: Vessels can establish radio contact through the port radio station Odessa Radio operating 24 hours a day on the following frequencies:

Call sign	*Working*	*Calling*	*Type of trans-mission*	*Time*
UDE	500 kc/s.	500 kc/s.	A1	H24
UFB	8,685 kc/s.	8,361 kc/s.	A1	H24
	12,950 kc/s.	12,535.5 kc/s.		
Odessa Radio	2,182 kc/s.	2,182 kc/s.	A3	H24
	3,310 kc/s.	3,180 kc/s.	A3	H24
	17,258.5 kc/s.	—	A3H	HX
	—	16,463.5 kc/s.	A3	HX
	22,706 kc/s.	—	A3H	HX
	—	22,080.5 kc/s.	A3	HX
	4,364.7 kc/s.	—	A3H	HX
Odessa Radio	—	156.80 mc/s	F3	H24
Odessa Port Control	156.70 mc/s.	156.70 mc/s.	F3	H24
Odessa Pilot	156.70 mc/s.	156.80 mc/s.	F3	H24
Odessa Inflot (Shipping Agency)	166.65 mc/s.	156.00 mc/s.	F3	H24

Traffic and storm signals are given by "Odessa Port Control" on VHF Channels 14 and 16.

RADAR: Shore-based radar provides positioning and radio-assisted pilotage in poor visibility for inward and outward going ships, on request.

TUGS: Tugs meet vessel in place indicated by Master through Pilot.

BERTHING: 38 berths available with depths alongside from 7 m. up to 11.5 m.

STEVEDORES: Portal electric cranes of up to 45 tons capacity are operated on the quays by the warehouses. There are grain-loaders and floating cranes with lifting capacity of up to 100 tons, other cargo handling equipment and intraport transport.

Opening and closing of mechanised hatches is always done by the ship's crew.

Opening of hatches on arrival and closing of non-mechanical hatches after loading of cargo has been completed, is done by ship's crew.

Opening and closing of non-mechanised hatches in the course of loading or unloading is done by port workers.

MEDICAL: Advance notice for medical attendance required. Notice should be given to Inflot. Hospital facilities available in case of emergency.

TANKERS: No reducing pieces necessary. Oil slop facilities available. The Oil Harbour is situated in the Northern part of the port (the inner roads), Northward of Rabochaya Harbour which is formed by a "T"-shaped mole extending E.S.E. off-shore. The bottom of the Eastern side of the mole is dangerous, therefore vessels are recommended not to approach it closer than 100 m.

DENSITY: Average density 1.0012 varying with season.

FRESH WATER: Fresh water may be supplied ex shore or ex water barge. Minimum quantity ex barge 15 tons.

FUEL: Bunkers can be supplied, and to be ordered 72 hours before arrival.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: See "Stevedores".

CUSTOMS ALLOWCE: Tobacco. No limits on board vessel, but when going ashore not more than 1 or 2 packs. Wine and/or spirits not to be taken ashore.

CARGO GEAR: All cargo gear must have certificates for maximum weight capacity.

IDENTIFICATION CARDS: Necessary.

CONSULS:

Bulgarian Consulate General tel. 66 – 60 – 92
Indian Consulate General tel. 22 – 43 – 33
Cuban Consulate General tel. 25 – 14 – 69.

REPAIRS: All types of deck and engine repairs can be carried out.

DRY DOCKS: Available.

REPATRIATION: Can be arranged through "Intourist".

AIRPORT: Distance to airport 10 miles. Direct airlines with several socialist countries and with the rest of the world through Moscow. Planes fly to Moscow 4 times a day.

TIME: Local time GMT plus 3 hours.

HOLIDAYS: Work can be arranged on below mentioned holidays through Sovfracht, Moscow, at special rates. Holidays: 1st January, 8th March, 1st and 2nd May, 9th May, 7th October, 7th and 8th November.

POLICE/AMBULANCE/FIRE: Police (Militia), 02 from town; 902 from port. Ambulance: 03 from town, 903 from port. Fire: 01 from town, 901 from port.

TELEPHONES: Telephones may be installed on board.

SERVICES: Tank-cleaning equipment available.

SHORE LEAVE: Crew members allowed to stay ashore till midnight. Master without limitation.

DELAYS: Vessels berthed in turn.

AUTHORITY: The Port of Odessa Authority.

AGENT: The port of Odessa Main Maritime Agency "Inflot". Postal address: 1 Vakulenchuk Square, Odessa, V–4 U.S.S.R. Cables "Inflot Odessa". Tel. 22-39-02, 293-37-81, 293-38-01; Telex 232824.

ONEGA: 63.54 N. 38.06 E. (See Plan Book)

GENERAL: The port of Onega is situated on the right bank of the Onega river (3 – 4 miles up from the mouth), flowing into Onezhsky Bay off the White Sea.

Port open for navigation for about 6 – 7 months per year, starting from May. In Autumn, when the river is covered with ice, assistance of ice-breaker is required but may not be rendered regularly.

Opening and closing of the port for navigation as well as turn and order of entering the port is usually regulated by the Port Authorities.

Changes of water level in the river depend on tide, spring floods and effects of the wind.

The tide is semi-diurnal with two high and two low waters a day. At the Onega river mouth the range of the tide at mean springs may reach 2.7 m.

The rises of the water level are due to North-Westerly, Northern and North-Easterly winds. The falls of the water level are usually caused by South-Easterly, Southerly and South-Westerly winds.

The Onega river becomes frozen over at the beginning of November. Ice begins to form in October and usually breaks up at the end of April or early May.

A vast area of shoal waters is situated at the mouth of the Onega river.

Access into the Onega river is by the Karelsky Fairway. Vessels drawing up to 6.1 m. may pass through it at high water.

Since depths in the river vary, Masters are recommended to get in touch with the Harbour Master to make enquiries about the existing least depth in the fairway before entering the river.

The port specialises in timber exports.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. A Pilot should be ordered by the Master 24 hours prior to arrival at the Letny Orlov pilot station. A Pilot meets a vessel at a distance of 0.7 mile Westward of the Letny Orlov Point.

ANCHORAGE: Vessels drawing up to 2.4 m. can obtain anchorage in the Town roadstead below the Severoles wharf. The roadstead situated opposite timber mill No. 32 – 44 can be used as anchorage by vessels drawing up to 3.55 m.

During winds blowing from the N.W. vessels are recommended to anchor in the Petchak area of the Solovetskie Islands, with depths of 10 m. at 1 mile distance offshore.

During Southerly winds of 5-6 force, a safe anchorage with depths of 10 m. can be obtained in the Konyukhov Inlet, 1 mile offshore.

In case of North-Westerly storms, vessels lying on the Karelsky roads should anchor in the Purnema area with depths from 6 m. to 10 m. where an anchorage light buoy is installed (64° 20′ N., 37° 27′ E.).

The recommended anchorages for vessels proceeding to the port of Onega along the fairway are situated in the following places:

1. On the line of the Town of Onega leading marks and on the beam line of the front mark of Pikhnemsky No. 2 leading line. Depths are from 3.7 – 4 m., the bottom – mud and small stone.
2. In the area of the Onega river, a short distance Northward of the town of Onega leading marks, opposite the Export quay. The least depth in the area is 4 m., its length – 700 m., the bottom is mud and small stone.
3. Southward of the Pristansky (Quays) leading line but not passing over the line of the Pristansky Sekushchy (Quays Crossing) leading

marks to the Eastward of it. The depths are from 3 – 3.7 m., the holding ground – mud, small stone and stone.

RESTRICTIONS: Vessels having draft not more than 3 m. may enter port at any time, but with draft more than 3 m. only 1 hour before high water.

The speed of vessels having the maximum draft should not exceed 8 knots. The movement of vessels within the port area is not allowed during restricted visibility.

MAX. SIZE: The maximum permitted draft is usually announced at the beginning of the navigation season after sounding of the fairway has been accomplished. It varies from 5.1 – 6.4 m. Maximum permitted length is 124 m.

HEALTH: Alongside or on the Roads all vessels coming from abroad inspected by Sanitary Office representative. If no diseases, vessel obtains free pratique. If vessel enters directly after calling at another Russian port, pratique automatic.

RADIO: Besides Murmansk and Archangel, Onega Radio (UZS), 500 kc/s.; VHF of pilot office at port of Onega (Channel 16).

Vessels can establish radio contact through the port radio station Onega Radio operating 24 hours a day on the following frequencies:

Call sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time of Work*	*Remarks*
UZS	500	500	A1	H24	
"Onega-Radio – 1" ("Inflot Agency")	156.8*	156.8*	F3	H24	Operates during navigation only
"Onega-Radio – 2" (Port Control)	156.8*	156.8*	F3	H24	On request
"Onega-Radio – 3" (The Harbour Master's Office)	156.8*	156.8*	F3	H24	Operates during navigation only

*Frequencies are given in mHz.

The Onega storm signals station is located on the roof of the Harbour Master's office. Day signals warning about forthcoming storms and strong winds in the Onega Bay area are exhibited at mast of the signal station.

TUGS: The number of tugs required for mooring/unmooring and shifting berths is determined by the Master after having consulted the Pilot. Tugs should be ordered 6 hours prior to leaving the port for sea.

BERTHING: Depths at the port berths are up to 6.5 m. There are enclosed warehouses and open concrete floor sheds. Loading of timber usually by ship's gear.

STEVEDORES: No particular ETA advices to stevedores/shippers. Loading of timber usually carried out by ship's winches at average rate of 24 stds. per hatch per working day.

MEDICAL: Doctor and hospital facilities available.

FRESH WATER: Available. Usually delivered by tankers.

FUEL: Availability not guaranteed.

GANGWAY/DECK WATCHMEN: Usually by ship's crew.

OPENING/CLOSING HATCHES: In accordance with "Soviet Wood" charter-party conditions.

CUSTOMS ALLOWANCE: No restriction on quantity, but nothing to be taken ashore.

IDENTIFICATION CARDS: Only Seamens Books required.

REPAIRS: Small repairs only.

REPATRIATION: Subject to visa formalities.

AIRPORT: Nearest at Archangel.

TIME: GMT plus 3 hours. (All the year round).

HOLIDAYS: See "Archangel".

SHORE LEAVE: Allowed up to midnight.

AUTHORITY: The Port of Onega Authority.

AGENT: A branch of the port of Archangel, Main Maritime Agency "Inflot" at the port of Onega. Postal address: 164880 – The Port of Onega – Archangel Region, U.S.S.R. Cables: "Inflot Onega". Tel. Timber Mill Switchboard 33-33, "Inflot".

POTI: 42.09 N. 41.39 E. (See Plan Book)

GENERAL: The port of Poti is situated 2 miles North of the Rioni river mouth and on the S.E. coast of the Black Sea.

Port open for navigation all the year round.

Changes of the water level in the port area are caused by the winds and usually reach 0.6 m.

The max. range of the water level observed in the river is 0.9 m.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. Radio 96, 48 hours prior arrival to Port Controller and Inflot Agency advising ETA, description and quantity of cargo, location and weight of heavy lifts, if any, number of passengers, ship's length and draft, as well as any services required. Confirmation of ETA required 4 hours prior arrival. Inflot will arrange Pilot basis above information.

Pilot will board vessel in the outer roads at 5 cables length from the Poti light buoy. (42° 09′ N., 41° 37′ 07″ E.).

The Harbour Master will give the Master of a vessel appropriate instructions if the Pilot is not able to disembark in the outer roads due to stormy weather or heavy waves.

ANCHORAGE: In outer port which is protected by Novy Severny, Yuzhny, and Zapadny Moles, and by Zapadny Breakwater. Safe anchorage for deep drafted vessels, except in periods when "Tyagun", a strong variable current with surge, occurs, with winds from N.W., W., and S.W.

The outer roads are bounded by 2 parallels – 42° 12′ N. and 42° 08′ N., by the meridian of 41° 35′ E. and the coast line.

The roads are open to winds blowing from the sea. Therefore, in the event of stormy weather vessels are recommended to leave anchorage in the outer roads for sea.

Protected by the New Northern, Southern and Western moles the port ensures a good anchorage for deep-drafted vessels, except periods when N.W., West and S.W. winds form a strong, variable current with surge ("Tyagun"). Strong Westerly, S.W. and Easterly winds make the entry to the port more difficult.

A good anchorage with depths of 10 m. to 30 m. can be obtained at a distance of 1.3 miles N.W. and 1.1 mile West of the head of the Western mole.

Vessels are prohibited from anchoring in the S.W. part of the Southern Harbour and in the centre of the Inner Basin.

RESTRICTIONS: Vessels are prohibited from entering the port when the entrance and the leading lights are covered with fog.

Vessel's speed shall not exceed 4 knots in the port areas marked by navigation marks.

There are no restrictions for night entry.

MAX. SIZE: The max. permitted draft for entry to the port is 9.4 m. and the length from 170 m. to 190 m.

HEALTH: Free pratique automatic for vessels from another U.S.S.R. port. Other vessels are boarded on arrival.

RADIO: Vessels can establish radio contact through the port radio station Poti Radio operating 24 hours on the following frequencies:

Call sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time*
UVB	500/421	500/425	A1	H24
"Palmira" (Port Control)	156.8*	156.8*	F3	H24
"Fontan" (CPR)	156.8*	156.8*	F3	H24

*Frequencies are given in mHz.

**CPR – Central Port Radio Station.

Traffic signals for vessels entering and leaving the port are exhibited at the signal mast located at the head of the Northern mole.

BERTHING: The port of Poti comprises tnree harbours: the Yuznaya (Southern), Severnaya (Northern) and Vnutrenniaya (inner) harbours. 15 berths in port, with depths up to 8.35 m. alongside.

Berthing in the port can be effected with tug assistance only.

The berths of the port, with depth alongside up to 9.75 m., are equipped to handle general and bulk (ore, coal) cargoes, mineral oil products, metals, fruits, vegetables, etc., as well as passenger traffic.

Portal electric cranes of up to 20 tons capacity are operated on the quays. There are also floating cranes with lifting capacity of up to 100 tons.

MEDICAL: Qualified medical service is available free of charge, including dispensary and hospital treatment.

STEVEDORES: Arranged by Inflot.

DENSITY: About 1015, variable with season.

FRESH WATER: Fresh water supplied ex shore to ship directly or ex water barge in boundaries of port.

FUEL: Bunkers in small quantities are available. Fuel in quantities over 500 tons will be supplied if an order is placed not less than 5 days prior to a vessel's bunkering. Bunkers are delivered by barges.

CUSTOMS ALLOWANCE: No restriction on quantities but nothing to be taken ashore.

CONSULS: See "Odessa".

REPAIRS: Only minor repairs can be effected. There are no dry docks in the port.

AIRPORT: Nearest at Odessa.

TIME: GMT plus 4 hours all year round.

HOLIDAYS: 1st January (New Years Day); 8th March (International Women's Day); 1st, 2nd May (Workers' International Solidarity Day); 9th May (Victory Day); 7th, 8th November (Anniversary of October Revolution); 5th December (U.S.S.R. Constitution Day).

POLICE/FIRE/AMBULANCE: Police service, tel. 0-2; Ambulance, tel. 0-3; Fire Service, tel. 0-1.

SHORE LEAVE: Crew members allowed ashore up to midnight.

AUTHORITY: The Port of Poti Authority.

AGENTS: The Port of Poti Maritime Agency "Inflot". 52 Lenin Street. 384691 – Port of Poti, U.S.S.R. Cables: Inflot Poti. Telephones: 9-32-27; 9-33-48.

PYARNU: 58.23 N. 24.29 E.

GENERAL: The port of Pyarnu, a sea fishing port, is situated in the N.E. part of the Riga Bay, at the estuary of the Pyarnu river falling into the Pyarnu Lakht.

Vessels, with a draft of 4.5 m. can reach the port by the channel about 2.5 mile long and about 60 m. wide.

At the estuary of the Pyarnu river the channel is protected by two moles extending S.W. from the shore. Depths at the berths are of up to 5 m. Changes of the water level within the port aquatorium are due to tides caused by winds.

Vessels proceeding to the port by the channel are recommended to have sufficient keel clearance bearing in mind requirements of good sea practice. The pilotage is carried out with due regard to the existing water level compared usually with the mean water level at the Kronstadt tide-gauge. Data of the exact depth of the channel can be obtained from the Harbour Master's office. The harbour of the port is usually frozen over from November till April. During mild Winters the port is open for navigation all the year round.

PILOTAGE: The port of Pyarnu has no special Pilot service. In view of this Pilots for entry or leaving should be ordered at the port of Tallinn Harbour Master's office through maritime agency "Inflot" at the port of Tallinn. Pilots embark at the port of Pyarnu roadstead.

ANCHORAGE: The port of Pyarnu roadstead occupies the whole of the middle part of the head of the Pyarnu Lakht limited by the 5 m. line.

When in the roadstead vessels may anchor on both sides of the Pyarnu-Morskoi leading line, beyond the boundaries of the fishing areas. The holding ground is good. The roadstead is sheltered from winds of all directions, except those blowing from the South and S.W.

Masters should bear in mind that there are a lot of fish nets laid in the Pyarnu Lakht. The boundaries of the fish net prohibited areas for navigation of merchant vessels are marked on the charts.

RESTRICTIONS: All traffic of vessels both in the harbour and in the approaches to the port is controlled by the Harbour Master's office, by a Master on duty.

Navigation in the approaching channel is allowed day and night, in turn, but only in one direction at one time.

It is prohibited for vessels to pass by each other and pass by vessels keeping the leading marks of the approaching channel in line as well as to cross the channel.

The priority to navigate in the channel is given to vessels leaving the harbour. In this case vessels proceeding to the port must give way to outgoing vessel not preventing her manoeuvring. The turn of movement in the channel is stipulated by the port controller but the traffic of vessels itself is controlled by the Harbour Master's office.

Vessels navigating both in the channel and in the harbour must proceed at a moderate speed to avoid the possibility of causing waves.

If winds over force 6 Beaufort scale entry to the port, leaving the port and shifting berths is allowed by the Harbour Master or a person in charge only.

RADIO: Communication can be effected through the port of Pyarnu radio station.

Call sign	Frequencies (kHz)		Type of transmission	Time of work	Remarks
	working	calling			
RKDF	500	500	A1	00.01 – 06.00 –	12.00 – 13.00 –
	487	—	A1	20.00 – 21.00 –	
"BASIS"	1650	1650	A3	H24	From 15 to 15 min. of every hour

Notice of arrival: All vessels proceeding to the port from the seaward should advise their ETA to the Port Controller. Masters should also advise vessels' particulars and the purpose of visit.

TUGS: Tugs should be ordered through the Port Controller's service. Towage of vessels within the port is prohibited if wind over force 6.

BERTHING: Vessels having draft over 4.5 m. cannot berth. During S.W'ly and Westerly winds force 8 and over, when in the port, the Master or his Chief Mate must be on board and have sufficient number of the crew on board in order to secure the vessel safely.

Berths of the port are equipped to handle vessels loaded with fish and fish products, salt, timber, rod metal and some other cargoes. There is a closed warehouse and an open concrete floor shed for storage of salt. The Port Authority plans to build a new cold store with administrative buildings.

TIME: GMT + 3 hours all year round.

AUTHORITY: The port of Pyarnu Authority.

AGENT: Tallinn Maritime Agency "Inflot".

RENI: 45.26 N. 28.18 E. (See Plan Book)

GENERAL: The port of Reni is situated at a distance 25 miles up from the Izmail Chatal Point on the left bank of the Danube river.

The port is open for navigation for about 317 days of the year. In severe winters ice-breaker assistance is required.

The Danube river and Kilia Mouth become completely frozen over only in severe winters, at the end of December or early January. Ice finally disappears in February or early March.

Changes of the water level are due to effects of the wind and spring floods.

Maximum rises of the water level are usually observed in April, May and June, maximum falls August, September and October.

Maximum range of the water level observed in the river is 4 m. – 6 m.

DOCUMENTS: Refer to beginning of U.S.S.R. Section.

PILOTAGE: Compulsory. All vessels proceeding from the Izmail Chatal Point up to Reni and vice versa must navigate under control of a State Commissioned Pilot.

ANCHORAGE: Vessels should anchor in the port roads with depths from 10 m. to 20 m. The holding ground is clay and mud.

RESTRICTIONS: There are no time restrictions for the entry to the port. Both draft and length of vessels are limited by depths and width of the Sulin channel.

RADIO: Vessels can establish radio contact through the port radio station Reni Radio operating 24 hours per day on the following frequencies:

Call sign	*Frequencies (kHz)*		*Type of transmission*	*Time*
	Working	*Calling*		
IJN–3 (Port)	489	468	A1	HX
"Reni Radio – 1" (Port Controller's Office)	156.8*	156.8*	F3	H24

*Frequencies are given in mHz.

BERTHING: Tug assistance is not compulsory. Tugs are available if requested by Master.

The port is accessible for large ships. The berths with depths alongside of up to 8.25 m. are equipped to handle general and bulk cargoes, crude oil and oil products, grain and food products.

Cranes of up to 10 tons capacity are operated on the quays. Also there are floating cranes with lifting capacity of up to 100 tons and other cargo handling equipment.

FUEL: Available.

FRESH WATER: Can be supplied ex shore and by barges.

OPENING/CLOSING HATCHES: According to the custom of the port, opening and closing of hatches is carried out by the crew. But it can be carried out by the port workers for vessel's account, if required by the Master.

REPAIRS: Only minor hull and engine repairs can be carried out. There are no dry docking facilities.

CONSULS: None.

TIME: Local time: GMT plus 3 hours all the year round.

AUTHORITY: The Port of Reni Authority.

AGENT: The Port of Reni Maritime Agency "Inflot". Postal address: 192 Dunai Street, The Port of Reni, U.S.S.R. Cables "Inflot Reni". Tel. 21835, 26226, 26616, 26309. Telex: 876

RIGA: 56.58 N. 24.06 E. (See Plan Book)

GENERAL: A Baltic seaport, Riga is situated at the mouth of the Daugava (Western Dvina) River falling into the Gulf of Riga.

The water area of the port is formed by the lower part of the Daugava River from the mouth up to a railway bridge, thence by the Milgravis Channel and Sarcandaugava Creek.

The roadstead of the port is situated at the mouth of the Daugava River.

The entrance channel with depths of 10 m. – 11 m. leads across the river bar into the port.

The port is open for navigation all the year round, but ice-breaker assistance is required about 4 months of the year.

The Gulf of Riga is frozen over for quite a long time. On the coast of the Gulf, ice first appears in December and finally disappears in April. The middle part of the Gulf gets frozen over only in severe Winters and for a short period. Usually ice in this area is mostly drift ice.

Considerable changes of the water level may be caused by strong winds and variation in atmospheric pressure ("Seish" effects).

The range of the water level caused by winds depends on the force of the wind, direction and period of time it blows.

Most sharp rises and falls of the water level are observed at the mouth of the Daugava River. They may reach at times 1.3 m. – 1.8 m. higher and 0.9 m. – 1.1 m. lower than the datum at Kronshtadt.

The level of the water in the port usually depends on the ordinary water level in the Daugava River.

The max. rise of the water level caused by winds may reach 2 m. higher and fall – 1 m. lower than the mean water level observed over a period of many years.

The entrance channel is available for ships with maximum draft 12.5 m. from Light Buoy No. 1 "Daugavgriva" to the inner road situated 3 miles from the Daugava River.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. Inflot will arrange Pilot on receipt of ETA at Daugavgriva Buoy, which to be given 96, 48, 24 and 4 hours prior arrival. Also advise with ETA details of cargo, last port of call, passengers if any, ship's draft and length.

Pilot meets vessel at Receiving Light Buoy No. 1 Daugavgriva (57° 06′ N., 23° 57′ E.). In case of bad weather, when Pilot is unable to come aboard, vessel should follow in the wake of a pilot boat, up to the mouth of the river, where Pilot will board vessel.

4 hours prior to arrival at this buoy the Master should advise his ETA by VHF, Channel 14, via CPR.

Vessels leaving the port should navigate under Pilot control to Receiving Buoy No. 1 Daugavgriva.

Ships going to the port of Riga may receive a Pilot for the passage of the Irben Strait at the roads of the port of Ventspils. ETA to Inflot-Riga 2 days prior to arrival at Ventspils Roads.

The order for the Pilot from Riga to Ventspils Roads must be given to Inflot-Riga 1 day prior to sailing.

Pilotage in the Irben Strait is not compulsory but it is recommended for the ships with a large draft.

The Pilot assistance will be particularly useful during Winter when navigation is effected as a rule with an icebreaker in the convoy.

ANCHORAGE: The best anchorage can be obtained in the port of Riga Roads, at a distance 4 miles off the Daugavgriva lighthouse, bearing 310° Westward of Light Buoy No. 1. Depths in the anchorage are from 22 m. to 35 m. The bottom is mud and sand. It is not recommended to come closer to the shore without a Pilot on board.

The port of Riga Roads are situated N.W. of the entrance to the mouth of the Daugava River.

The roads are open to winds blowing between S.W. and N.E.; therefore, in Autumn, when these winds prevail, anchorage there is unsafe.

In periods when heavy waves in the roads are caused by fresh Northerly winds, vessels are recommended to leave the roads for shelter in the port or go to the open part of the Gulf of Riga.

The depths in the roads are from 15 m. to 30 m. Holding ground is good.

RESTRICTIONS: Permitted draft for the entry into port is between 7.5 m. – 9.5 m. at the mean water level.

Entry to the Daugava River and the port of Riga is accessible for vessels having drafts ensuring safe passage across the river bar.

As a rule, vessels passing along the channel are requested to have keel clearance not less than 0.45 m.

The speed of vessels navigating in the Daugava River should not exceed 6 knots.

There are no restrictions as to length of vessel and time of entry to the port.

Large vessels laid up with ballast water are not allowed to shift berth during winds force 6 Beaufort scale and over.

Passage of the Daugava River is prohibited for ships having anchors under water.

The speed of the Daugava water stream in a low-flow period is insignificant, but it may sharply rise at the time of discharge of water through the overflow weir of the Riga hydro-electric power station.

The operational schedule of the station requires such discharges:

To avoid damages to the underwater parts of a berth while mooring or unmooring, every vessel must have the main engines going "dead slow" until her stern is not less than 15 m. from the quay.

MAX. SIZE: Max. permitted draft for vessels going to berths of the port for discharging is 9.75 m. in fresh water, if the water level is "O" datum at Kronshtadt.

Vessels having draft more than 9.75 m. are being discharged into barges in the inner road which has 3 mooring buoys, 3 miles from the mouth of the river. Max. permitted draft for vessels going to the inner road for lighterage is 12.50 m. in fresh water, if the water level is "O" datum at Kronshtadt.

Also see "Shipmaster's Report".

HEALTH: Pratique obtainable after vessels mooring when Health Officials visit vessel with Immigration and Customs Officers. Health Inspector to be informed of any medical assistance required.

RADIO: *Notice of Arrival:* In Winter when the Irben Strait and the Gulf of Riga are completely frozen over and ice-breaker assistance is required, vessels proceeding to the port of Riga should advise Harbour Master their ETA to the edge of the ice, vessel's ice classification and estimation in days for the expenditure of fresh water and fuel available on board to the moment of approaching the edge of the ice.

Vessels can established ship-shore radio contact via the port radio station Riga Radio, operating 24 hours a day on the following frequencies:

Call sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time of Work*
UKB	500	500	A1	H24
UKB	489	468	A1	H24
UDH	4,236	4,184	A1	H24
	8,506	8,367	A1	H24
	13,070	12,547.5	A1	H24
"Riga Radio"	—	4,066.1	A3	HX
"Riga Radio" (CPR-Central	4,364.7	—	A3H	—
Port Radio)	156.8*	156.8*	F3	H24

*Frequencies are given in mHz.

TUGS: Use of tugs is obligatory. The number of tugs depends on length of the vessel and place of berthing.

BERTHING: Berths of the port with depths up to 9.7 m. alongside are equipped to handle general and bulk (ore, coal) cargoes, metals, timber, grain, food products and passenger traffic.

Number of tugs to be ordered for entry assistance or for shifting berth is decided by Master in accordance with Pilot's recommendation.

Cranes of up to 45 tons capacity are operated on the quays and by the warehouses. Also, there are floating cranes with lifting capacity of up to 100 tons, other cargo handling equipment and intra-port transport.

Opening and closing of hatches is usually done in accordance with conditions of Charter Party.

SPECIALISED CARGO HANDLING FACILITIES: Berth Nos. 16 – 19 are suitable for handling of ships type Ro-12.

In 1981 a new berth for handling of ships type Ro-12, Ro-30, Ro-60 is expected to be put into operation.

BRIDGES: Minimum height of electrotransmission line crossing the Daugava River is 51 m.

MEDICAL: All medical assistance available.

STEVEDORES: Arranged by Inflot who should be given necessary information in advance.

DENSITY: About 1002.

FRESH WATER: Only available ex-berth.

FUEL: Fuel is usually taken at the oil jetties. Bunkers may also be delivered to the roads or supplied by lighters at a berth during loading/unloading of non-inflammable cargoes.

GANGWAY/DECK WATCHMEN: Recommended. These duties normally performed by crew.

OPENING/CLOSING HATCHES: Normally by ship's crew.

CUSTOMS ALLOWANCE: No restriction on quantities, but nothing may be taken ashore.

IDENTIFICATION CARDS: Seaman's Book required.

CONSULS: None.

REPAIRS: Repairs possible for hull, machinery, radio and navigational equipment. Floating crane available, capacity 100 tons. All kinds of repairs for vessels up to 30,000 d.w.t. can be carried out.

REPATRIATION: Only subject to visa restrictions.

AIRPORT: International airport not available. Internal communications between Riga and most cities of the USSR is possible.

TIME: GMT plus 3 hours all year round.

HOLIDAYS: 1st January, 8th March, 1st and 2nd May, 9th May, 7th October, 7th and 8th November.

POLICE/FIRE/AMBULANCE: Advise Inflot.

TELEPHONES: Installed on vessels alongside at Master's request. Installation charge Rbls. 8.0 and Rbls. 2.50 per day or part thereof.

SHORE LEAVE: Crew allowed ashore.

SHIPMASTER'S REPORT: 1976:

On approaching the area where Irbenskiy Lt./VL should have been placed, it was found that the Lt./VL and buoys had been removed for the Winter season and replaced by spar buoys, although these could not be observed on the radar or visually due to the adverse weather.

Two other vessels were waiting for daylight transit of the channel, I also decided to wait for daylight due to a 5 fathom bank being recorded on the chart.

On entering the channel it appears to be very much wider than indicated on the chart also where the chart has the channel buoys in a straight line this was not so, although the alteration of the channel could have been due to the use of the Winter buoys.

In Baltic Pilot Vol. II vessels are allowed to enter at 26 ft. 3 in. This is incorrect as the maximum draft is now 32 ft. Vessels up to 37 ft. were at the anchorage, where they are lightened up to 32 ft. before proceeding into the harbour.

Two berths were being used for the discharge of grain, by shore cranes into wagons.

In the early hours of Sunday morning, 4th January, the temperature being −14°C, a thin film of ice formed in the harbour, this had disappeared by mid-afternoon. Except for this occasion no ice was seen at all in the Baltic, although the climate was very cold.

The Bond was not put under seal, but they were very strict on currency list, 3 copies being required, also the total amounts of each different currency is required.

SHIPMASTER'S REPORT: October 1979:

The buoyed channel is safe to use night and day as each headland has Raymarks on it.

We had 33,000 m./tons of wheat for Riga and our arrival draft was 38 ft.

We were at anchor for 5 weeks and alongside for 9 days.

Our main problem at the anchorage was shortage of fresh water, the port can only supply small amounts brought by tug, charge 1.4 rubles per ton, no charge for the tug. In 5 weeks we were supplied with 90 tons so vessels should try to arrive with plenty of water if they expect long periods at anchor.

During our stay there was always 18-20 grain ships waiting and this situation is expected to continue.

Each week (on Mondays if weather permits) the Ship Chandler will come out with supplies which must be ordered through Riga Radio.

Mail and Telexes can be sent ashore with the Chandler.

Sick crew members will be taken ashore when transport is available, but ships boats are not allowed to be lowered.

When in port I found the Inflot Agency very helpful.

Telexes can be sent without delay but phone calls are difficult.

AUTHORITY: Port of Riga Authority.

AGENT: The Port of Riga Main Maritime Agency "Inflot". Postal address: 6 Vilis Latsis Street, 226180-Riga, U.S.S.R. Cables "Inflot Riga". Tel. 33-15-37; 33-97-03. Telex 1157.

SOCHI: 43.34 N. 39.43 E. (See Plan Book)

GENERAL: The port of Sochi is an ice-free port, situated at the mouth of the Sochi river, S.E. of the Uch-Dere Point, in the Eastern part of the Black Sea.

The port is protected by the Caucasian chain of mountains from cold N.E. winds but it is open to winds blowing from Southerly and Westerly directions when heavy waves may roll over the port moles causing heavy swell in the harbour.

The port mostly handles passenger traffic.

There are passenger terminals, one of which serves hydrofoil ships only. About 3 million passengers visit the port yearly.

A cargo pier is equipped to handle fruit, building materials and cars. There are enclosed warehouses on the cargo pier and on one of the passenger terminals.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Pilot boat usually meets vessel at a distance of about 1 mile from the port. In the event of bad weather or restricted visibility, vessel should anchor or drift at a safe distance from the port until Pilot arrives.

ANCHORAGE: Deep drafted vessels may obtain anchorage in the outer roads Westward of the Northern mole. The depths in the roads are from 11 m. to 13 m.

Some distance Westward, in depths 20 m. – 23 m., there are mooring buoys which can be used during vessels' stay in the roads.

Anchorage can also be obtained at 1.3 – 1.5 mile distance S.S.W. of the Sochi lighthouse. Depths there are about 29 m. The bottom is mud with sand, and small stone closer to the shore.

Anchorages are open to winds blowing from the sea.

RESTRICTIONS: There are no time restrictions for entry to the port.

In case of stormy weather entry to the port is difficult due to the swell caused by heavy waves in the approach and in the narrow entrance to the port.

In the event of heavy surf vessels must anchor in the outer roads since entry to the port is impossible.

Entry to the port is not allowed during heavy waves over force 4 and winds over force 6 as well as during bad visibility.

During the Autumn-Winter period the port of Sochi cannot be used as shelter port, because lying in the port is dangerous due to the strong variable current ("Tyagun") usually caused by gales blowing between S.E. and N.W.

Under these circumstances the Port Authorities cannot guarantee safety to a vessel which, after having received a storm warning, did not make for sea, and bear no responsibility for the consequencies.

MAX. SIZE: The max. permitted draft is 8 m., length 190 m.

RADIO: Vessels can establish ship-shore radio contact through the port radio station Sochi Radio, operating 24 hours a day on the following frequencies:

Call sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time of work*
UZB	500/516	500	A1	H24
"Smena" (Port Controller)	156.8*	156.8*	F3	H24
"Sochi-Radio" (Radio Operator of the Port Controllers' Office.)	2,310	2,310	A3A	0800 – 2300

*Frequencies are given in mHz.

A signal station is located at the Sochi lighthouse from which visual signals are shown.

BERTHING: A vessel intending to enter port with tug assistance should keep the Sochi mid-channel leading marks in line ahead and stop the main engines in due time to allow vessel to come to the state of "no motion" at a distance of 1 mile from the port entrance. Only under these conditions is a tug allowed to approach a vessel and receive or cast off the tow rope.

Due to a small port area and heavy water streams caused by vessels' propellers Masters of vessels of 2,000 g.r.t. and over must order 1 tug for entering and leaving the port; for vessels of 4,000 g.r.t. and over 2 tugs are required. Shifting berth is allowed during winds not exceeding force 5 Beaufort scale. Opening and closing of hatches on dry cargo vessels is carried out by the crew; on passenger vessels cargo hatches are opened and closed by the port workers.

There are two portal cranes of 5 and 10 tons lifting capacity, 10 ton caterpillar cranes, fork-lifts and other cargo handling equipment.

FUEL: Not available.

FRESH WATER: Can be supplied by pipe-lines at nearly all berths.

REPAIRS: Not available.

TIME: GMT plus 3 hours all the year.

AUTHORITY: The Port of Sochi Authority.

AGENT: A branch of the port of Novorossiysk Main Maritime Agency "Inflot" at the port of Sochi. Postal address: 1 Voykov Street, Sochi, 354000, U.S.S.R. Cables "Inflot Sochi". Tel. 99-05-86; 996-62-70. Telex 128.

SUKHUMI: 42.57 N. 41.00 E. (See Plan Book)

GENERAL: A Black Sea passenger port Sukhumi is situated at the head of the Sukhumi Bay, 2 miles E.N.E of the Sukhumi Point. The port is open for navigation all the year round. Both the port itself and the Gulf are open to winds blowing from the sea.

Several berths of the port are equipped to handle passenger traffic.

The port area is bounded by the shore line and the imaginary line connecting the Sakhumi Point and the mouth of the Kelasuri river.

The port is visited by regular and cruise passenger vessels.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: A Pilot meets vessel in the outer roads. Compulsory for foreign flag vessels.

ANCHORAGE: Anchorages are situated in the outer roads on the Northern coast of the Sukhumi Bay, opposite the mouth of the Beslet river.

A good anchorage can be obtained at the line of the Sukhumi leading light marks. Depths are from 12 m. to 50 m. The bottom is mud.

Master should watch carefully the Sukhumi leading light marks when approaching the anchorage and cast anchor only at the moment when the leading light marks are in line or some small distance closer to the shore.

At 2 cables length seaward of the leading line, the depths increase sharply and reach 130 m.

Whilst waiting for a berth vessel should lie at anchor at the line of the Sukhumi leading light marks. This anchorage is unsafe during gales blowing from the sea.

RESTRICTIONS: Vessels may enter or leave the port at any time of day or night.

MAX. SIZE: The max. permitted draft is 7.6 m., length 180 m.

RADIO: Ship-shore radio contact can be established via the port radio station Sukhumi Radio operating 24 hours a day on the following frequencies:

	Frequencies (kHz)		*Type of trans-*	
Call sign	*Working*	*Calling*	*mission*	*Time*
UFF	500/450	500/454	A1	H24
"Sukhumi Radio"	2182	2182	A3	H24
"Privet" (Port Control)	156.8*	156.8*	F3	H24

*Frequencies are given in mHz.

Storm signals are exhibited at a signal mast located on the roof of the Port Authority's office.

BERTHING: Vessels of up to 190.0 m. in length are allowed to moor at the new passenger pier. The permitted draft is restricted by the depth of water (7.8 m.). Vessels are not allowed to moor to berths during dense fog and in restricted visibility when navigational lights and the current indicator on the passenger berth are not visible. In this event vessel should anchor and disembark passengers in the outer roads.

When mooring, Master should bear in mind the direction of the current and the effect on the mooring angle of vessel.

By day, the direction of the current indicated by a sparbuoy located at the head of the passenger pier, and at night, by lights exhibited from the elevation of the front leading light.

A green light shown lower than the front leading light indicates Easterly current, and a red light, current of Westerly direction.

The rate of the current is usually determined by the Master himself.

Due to the constant influence of the current, mooring is usually effected without tug assistance.

Masters of vessels moored at the port berths should keep the main engines ready bearing in mind the fact that the outer roads of the port are not protected from the effect of winds.

There are no portal cranes on the passenger pier. Handling of cargo is done by caterpillar with lifting capacity of 12 tons.

FUEL: Can be supplied by lighters.

FRESH WATER: Supplied ex-shore.

REPAIRS: Not possible.

TIME: GMT plus 4 hours all the year.

AUTHORITY: The Port of Sukhumi Authority.

AGENT: A branch of the Port of Batumi Main Maritime Agency "Inflot" at the Port of Sukhumi. Cables: "Inflot Sukhumi".

TALLINN: 59.26 N. 24.43 E. (See Plan Book)

GENERAL: A Baltic seaport situated in Tallinn Bay. Year-round navigation is possible. Tallinn Bay is usually frozen over in severe Winters only. In the Winter months (1st February – 31st March) the port of Tallinn is kept open for navigation by ice-breakers. The tidal range in Tallinn Bay is of very small account. The difference of the water level in the Bay is due solely to the effects of the wind. A rise of the water about 0.4 – 0.5 m. from mean water level is observed during N.W. and Westerly winds. The fall of the water is caused by S.E. and Easterly winds. It usually reaches 0.2 – 0.4 m. below the mean water level.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. 24 hour Pilot service is available. Pilots board vessels at 59° 37.5′ N., 24° 38′ E. In case of stormy weather vessels should follow pilot boat to a sheltered position where Pilot is able to embark/disembark or use the àssistance of the shore radar station. Pilot should be ordered by VHF through the "Inflot" Agency not later than 2 hours prior to arrival at the Pilots' boarding place.

ANCHORAGE: Anchorages are situated between Tallinn leading lights and Cape Paljassaare. Depths up to 25 m.

RESTRICTIONS: Vessels can enter or leave the harbour through the Northern or Southern entrances. Entry to the port through the Northern entrance can be used by vessels having draft of up to 8.5 m. The Southern entrance can be used by vessels having draft of up to 7.0 m. Depths of water in the Southern entrance area can vary due to the movement of deposits. Vessels can enter or leave the port at any time of day and night.

MAX. SIZE: LOA 160 m., width 22.0 m. and draft 8.5 m.

HEALTH: International quarantine signals to be used on arrival. No later than 6 hours before arrival at the inner area Master should radio Agents giving full details of state of health on board, and requesting pratique which will be given on arrival.

RADIO: All vessels when approaching the Port of Tallinn should establish radio contact via Tallinn Radio port radio station which operates 24 hours a day on the following frequencies:

	Frequencies (kHz)		*Type of trans-*	
Call sign	*Working*	*Calling*	*mission*	*Time*
UNS	500	500	A1	H24
UAH	6485	6276.75	A1	H24
UAH	8476	8369	A1	HX
	12723	12541.5	A1	HX
	17077	16732	A1	HX
	4285	4185.5	A1	HX
"Tallinn Radio"	2182	2182	A3	H24
"Tallinn Port"	156.8*	156.8*	F3	H24

*Frequencies are given in mHz.

The movement of vessels within the port and in the outer roads is controlled by the Traffic Control Post located at the Port of Tallinn Authority building.

TUGS: Tugs assistance available for berthing subject to Pilots advice. Tugs can be ordered through Agents. Ship's lines normally used. When tugs are ordered in advance the cost will be charged to the vessel whether tugs are used or not. For vessels with length over 120 m. tug assistance is obligatory.

BERTHING: Vessel will not be allowed to berth unless main engines and steering mechanism are in good working order. All vessels in port are required to fly their national flags between 0800 hrs. and sunset. On holidays and special occasions vessels may be expected to dress their ships if requested by Port Authorities.

The berths of the port with depths alongside up to 9.0 m. are equipped to handle general bulk and liquid (chemical products) cargoes, sugar, cement, metals, foodstuff, etc., as well as passenger traffic. Covered warehouses with mechanical equipment and concrete floor sheds are available.

STEVEDORES: Arranged by Agent on basis of Master's ETA. Loading and unloading is carried on throughout 24 hours a day including holidays.

CRANES: Loading and unloading is usually done by shore mobile electric cranes of up to 32 tons capacity, by floating cranes of up to 100 tons capacity and by other cargo handling equipment.

TANKERS: Tankers moor at berth No. 17, length 130 m., depth alongside 9 m. No slop facilities available. Tankers are normally required by the charter party to reserve a slop tank on board.

FRESH WATER: Supplied by pipe-lines at all berths.

FUEL: Bunkers are available and can be taken from the quays or delivered by lighters.

FIRE PRECAUTIONS: Masters of tankers are presented with a copy of Safety Regulations by the Agent on arrival.

GANGWAY/DECK WATCHMEN: Compulsory to maintain a gangway watch by ship's crew.

OPENING/CLOSING HATCHES: Normally opened and closed by ship's crew.

CUSTOMS ALLOWANCE: No restrictions on crew's consumption of tobacco and alcohol on board. It is forbidden to take these items ashore.

CONSULS: No local representation.

REPAIRS: Only minor repairs may be effected at machine shop ashore.

TIME: GMT plus 3 hours all the year round.

HOLIDAYS: All holidays are worked by stevedores.

TELEPHONES: Connection on board vessels can be made at berths number 5, 12 and 17.

AUTHORITY: The Port of Tallinn Authority.

AGENT: The Port of Tallinn Shipping Agency "Inflot". 54-a Tuukri Street, 200106 – Tallinn, U.S.S.R. Cables: "Inflot", Tallinn. Telephones: 430518, 430508. Telex: 173273.

TUAPSE: 44.06 N. 39.04 E. (See Plan Book)

The port of Tuapse is situated between the mouths of rivers Tuapse and Pauk and the depths of 40 m. Year round navigation.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory in and out, possible at any time. Vessels await Pilot at anchorage. Pilots board and leave vessels in the outer roads behind the Pervomaisky Breakwater if the sea (swell) up to force 4. When leaving harbour during bad weather Pilot leaves vessels in the inner roads. Communication with Pilots on VHF channel 12.

ANCHORAGE: Depths up to 40 m. Position of anchorage, bearing to the entrance red light and distance is radioed by Harbour Master through Agent to each vessel prior to arrival (unless berth available). When at anchor, vessel shall keep VHF watch on VHF Channel 16.

MAX. SIZE: See "Berthing".

HEALTH: Sanitary officer boards on arrival or when berthed. No automatic free pratique. In the event of fever or any suspected epidemic disease onboard Masters shall inform the sanitary service immediately on arrival.

RADIO: All messages to Agent via Tuapse-Radio, call sign UVW, calling frequency 500 kHz, working 430 kHz, A1, H24. VHF call sign "Tuapse-Radio", calling 156.8 mHz (Channel 16), A3, H24, working frequency according to indication by shore radio operator. Phone connections to any port service.

Warning: Use of ship's MW and SW radio transmitters within 12 miles from the port is prohibited, except for distress, emergency and safety signals. When VHF unavailable, communication with UVW on MW band is allowed.

Arrival Advice: Masters shall send 96/72/48 and 24 hours ETA notices to "Inflot" agency, advising also quantity of ballast onboard and time required for deballasting ashore. Masters shall also advise quantity and grade of cargo, stowage plan, LOA and maximum draft, number of passengers, health condition of crew.

TUGS: Tugs are compulsory for berthing/unberthing or shifting, as well as when lying at inner anchorage. Tugs normally join vessels at the buoy marking the Pervomaisky breakwater. Ship's lines.

BERTHING: At any time with winds up to 12 m/sec. The port consists of 2 harbours, with 3 berths for dry-cargo ships (max. draft 11 m. (brackish water), LOA up to 220 m.) and 6 berths in the oil harbour for tankers (max. draft 12 m. (brackish water) LOA up to 250 m.). Oil harbour, shore cargo manifolds diameter 250/400 mm. All dry-cargo berths are equipped with portal cranes of 10 tons capacity. Loading/unloading usually by shore cranes. The port is not sheltered for vessels during strong S.E./S.W. winds. During strong gales from these directions lying in port is dangerous due to strong swell, especially the one called "tyagun". In this event vessels must leave harbour when recommended by the Port Authority. When lying in port the main engines shall not be immobilised without special permission by Harbour Master.

MEDICAL: First medical aid at any time; hospital facilities available.

DENSITY: 1011/1015.

FRESH WATER: Available from any berth, road delivery not possible.

FUEL: Fuel oil and gasoil available at oil berths or ex-lighters. Masters giving 72 hours notice.

FIRE PRECAUTIONS: Conventional rules for oil ports.

POLLUTION: Marine pollution shall be avoided by all means, specially due to proximity of health resort area. Any pollution is subject to heavy fines.

OPENING/CLOSING HATCHES: Normally by crew.

GANGWAY/DECK WATCHMEN: Not required. Gangways shall be lighted up and protected by nets.

CUSTOMS ALLOWANCE: No restrictions. Export/import of Soviet currency is forbidden.

IDENTIFICATION CARDS: Seaman's books are sufficient.

CONSULS: None.

REPAIRS: Emergency repairs. Floating docks subject to special arrangement.

REPATRIATION: Possible in emergency.

AIRPORT: Sochi – 120 km. Served by regular airlines.

TIME: GMT plus 3 hrs.

HOLIDAYS: 1st January, 8th March, 1st, 2nd May, 9th May, 7th October, 7th, 8th November. Work during holidays can be arranged.

TELEPHONES: Available for all vessels.

SURVEYORS: Leading world classification societies are represented by the Register of the USSR.

GENERAL: Deballasting or discharge of tank-washings facilities, craft for discharge of bilge water. Food waste and garbage, etc. shall be collected into special containers placed on board upon berthing. Laundry facilities. No boats, rafts, etc. shall be launched from vessels without special permission. All mooring ropes to be provided with rat-guards immediately upon mooring or shifting berths. Local representative of the Insurance Company of the USSR (Ingosstrakh) Ltd., and experts of the USSR Chamber of Commerce and Industry.

SERVICES: Compass adjusting and radar repairs.

SHORE LEAVE: Crew allowed ashore until midnight.

FIRE/AMBULANCE/POLICE: Telephones: Fire – 301; Fire-boat – 231; Ambulance – 003; Militia (Police) – 002. *Office hours:* 8 a.m. to 4 p.m., Saturday 8 a.m. to 2 p.m.

DEVELOPMENTS: Reconstruction works including dredging underway.

AUTHORITY: Tuapse Port Authority.

AGENT: "Inflot," Maritime Agency, 25, Gagarin Str., 352800, Tuapse. Cables: Inflot. Telex: 865. Phones: 71322, 71836, 71832, 71288, 71427.

VENTSPILS: 57.24 N. 21.32 E. (See Plan Book)

GENERAL: A Baltic Sea port, Ventspils is situated at the mouth of the Venta River. Navigation is all year round.

There are periodical alterations in the water level of the Venta River, chiefly due to the effects of the wind. The rise of the water level is usually due to moderate Westerly winds, and the fall is caused by Easterly winds.

The maximum rise of the water level in the Venta River is at the time of Spring floods.

The port of Ventspils comprises the Ventspils Sea Channel and a water area from the mouth of the Venta River up to the railway bridge. The port harbour can be entered by vessels with the maximum permitted draft in the bar approaching channel of 10.6 m. – along leading line No. 1 and 12 m. – along leading line No. 2 (at the datum at Kronshtadt for fresh water).

Since after strong gales depths of the approaching channel at the port entrance vary considerably due to alluvial of sand, the fairway of the channel is dredged from time to time.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Pilotage is compulsory both for entering and leaving the port.

Pilots board and leave vessels in the areas of Reception Buoys "Ventspils-1" and "Ventspils-2". Pilot service is available round the clock when entering and leaving the port.

ANCHORAGES: Anchorage in the outer port road for vessels loaded with explosive or inflammable cargoes is allowed in area No. 86-a, for all other vessels – in area No. 86. Both areas are announced by the U.S.S.R. Notices to Mariners. Depths in the anchorage are from 15 m. to 18 m., the bottom is sand.

The Master of a vessel has to inform the Port Administration of the exact position of the anchorage stating the bearing and the distance from the North breakwater lighthouse.

The anchorage in the outer road is not safe during strong Westerly winds therefore vessels are recommended to drift while awaiting entry to the port or to go to sheltered places situated in the areas of the Kolkasrags Point and the Gotland Islands.

RESTRICTIONS: The maximum permitted length for vessels piloted through the Venta River Channel is 185 m. when the draft is not more than 7.5 m. When a vessel's draft exeeds 7.5 m. her length should be not more than 160 m.

When proceeding along the fairway and in the Venta River from the entrance to the Avant-port up to the railway bridge speed not to exceed 5 knots.

HEALTH: Pratique obtainable after mooring. Sanitary Inspector visits vessel after mooring together with Immigration and Custom House Officer. If medical care required the Sanitary Inspector has to be informed.

RADIO: Radio contact should be established via the Ventspils Radio port radio station which operates 24 hours a day on the following frequencies:

Call sign	*Frequencies (kHz)*		*Type of transmission*	*Time of work*
	working	*calling*		
UNI	500	500	A1	H24
"Ventspils-Radio"	2182	2182	A3	H24
"Ventspils-Radio" – 7	156.8*	156.8*	F3	H24
"Nadzor"	156.8*	156.8*	F3	H24

*Frequencies are given in mHz.

Vessels' traffic both in the roads and in the harbours is controlled by signals exhibited at the Signal Station located on the pilot tower, at the base of the Southern mole.

TUGS: Use of tugs for vessels of 70 m. in length and over and gas carriers of 60 m. when mooring and unmooring at berths situated in the Venta River, as well as oil piers, is compulsory.

Normally tugs join vessels within the port area.

BERTHING: Berthing of vessels and shifting berths is carried out round the clock. Vessels having length over 140 m. and draft over 7.6 m. when approaching the port through the Venta River Channel are allowed to enter or leave the port, moor and shift berth during the day only and when winds do not exceed Force 5.

Cargo berths with depths alongside up to 9.4 m. situated on the right bank of the Venta River are equipped for handling general and bulk cargoes, metals and timber. Berths of the Avantport are equipped for handling crude oil and oil products. They can receive vessels with the maximum permitted draft of up to 12 m. (at the datum at Kronshtadt). There are covered warehouses and open concrete floor sheds in the port.

There are enclosed warehouses and open concrete floor sheds.

Quays are equipped with electric cranes of up to 45 tons capacity. There are floating cranes of up to 100 tons capacity, cargo handling equipment for bulk cargoes and machinery.

Opening and closing of hatches is normally done by the ship's crew.

STEVEDORES: Master's and/or shipowner's information of cargo details, stowage – especially for ships with inward general cargoes – is required in proper time. Information has to be addressed to Inflot Ventspils.

MEDICAL: Hospital facilities available. Advance notice desirable, however depends on kind of sickness. Particular inoculations, vaccination/fever certificates etc. not required.

TANKERS: All grades oil loaded by shore loading hoses in diameter of 200, 250, 280, 300 and 350 mm. Total 6 berths all fitted with deballasting installations for slops. Max. draft from 33 ft. up to 39 ft. 04 in.

There are 2 new berths for gas/chemical carriers, max. draft Berth No. 34 – 8.2 m. and Berth No. 36 – 12.0 m.

DENSITY: In port about 1002.

FRESH WATER: Fresh water available, delivered from shore or by barge.

FUEL: All grades available subject to prior inquiry. Bunkers can be taken from the oil jetty or supplied by lighters.

GANGWAY/DECK WATCHMEN: Service of watchmen recommended; however, Captain's option.

OPENING/CLOSING HATCHES: Opening and closing of hatches is normally carried out by crew; however, at the Master's request may be carried out by shore men.

CERTIFICATES: Required to be on board:
International Tonnage.
International Class.
Load-line.
Safety Equipment.
International Radio.
Certificates of Deratisation.

CUSTOMS ALLOWANCE: There is no restriction for crew use and bond locker is not sealed.

IDENTIFICATION CARDS: Seaman's Book required.

CONSULS: No Consulates.

REPAIRS: Small deck and engine repairs can be carried out.

DRY DOCKS: None.

REPATRIATION: Repatriation of crew left behind by a vessel in hospital is arranged by other tramp-ships with Master's consent. No facilities exist for effecting crew changes.

TIME: GMT plus 3 hours. No alterations during year.

HOLIDAYS: 1st January (New Year's Day); 8th March (International Women's Day); 1st and 2nd May (May Day Holidays); 9th May (Victory Day); 7th and 8th November (The Great October Socialist Revolution Day); 7th October (The U.S.S.R. Constitution Day). Cargo work never stopped on holidays.

POLICE/AMBULANCE/FIRE: If required have to be called through Maritime Agency "Inflot".

TELEPHONES: No arrangements exist for placing telephones on board.

SERVICES AVAILABLE: Tankers' deballasting installation for slops; service for radar and VHF repairs; compass adjusting; workshop for ordinary deck and engine repairs; ship chandler service; bunker supply.

SHORE LEAVE: Crew members allowed ashore.

SHIPMASTER'S REPORT: 1976.

Anchorages:

Tanker: bounded by positions,

57° 28.4′ N.	21° 27.3′ E.
57° 29.7′ N.	21° 29.2′ E.
57° 28.2′ N.	21° 31.2′ E.
57° 27.2′ N.	21° 29.3′ E.

Cargo:

57° 25.3′ N.	21° 26.8′ E.
57° 28.0′ N.	21° 26.4′ E.
57° 26.1′ N.	21° 29.0′ E.
57° 26.7′ N.	21° 25.8′ E.

Buoyage:

No. 2 B.W. Conical Fl. 5 sec. (Approx. position 57° 25.7′ N. 21° 29.85′ E. to be expunged.

New Buoys:

No. 2 Fl.W. 5 sec. in position 57° 25.6′ N. 21° 28.3′ E.
No. 3 Fl.W. 3 sec. in position 57° 24.1′ N. 21° 30.65′ N.
No. 4 Fl.R. 3 sec. in position 57° 25.16′ N. 21° 30.82′ E.

In harbour; No. 4 Fl.R. Con. and Red Conical Buoy about 2 cables E × S to be expunged.

Oil Piers: 3 in number.

No. 1 pier, berths Nos. 28 and 29 – light outer end Qk. Fl.W.
No. 2 pier, berths Nos. 30 and 31 – light outer end Qk. Fl.Or.
No. 3 pier, berths Nos. 32 and 33 – light outer end Qk. Fl. Blue.

Depths alongside:	Berth 28:	10.10 m.
	Berth 29:	10.00 m.
	Berths 30/33	12.00 m.

After dredging in channel is completed to 12.5 m., depth at berths 32 and 33 will be 12.5 m.

Oil Pier No. 3 (Bearings, distances and positions here not confirmed). Existing dock face continued 24.5° approx. 1,100 ft. to join Northern breakwater.

No. 3 runs 283° for 1,100 ft. from position 24.5°, 2,000 ft. from Fl. R.Lt. in 57° 01′ N. 21° 33.5′ E.

Northern Breakwater: Inner extension from position 57° 24.69′ N. 21° 32.2′ E. 012° for 890 ft. to join main breakwater.

Under Construction: 3 berths for Petro-chemical industry along inner face of Northern breakwater.

Small harbour beside pilot station, Southern side, completed and in use by small craft and fishing vessels. Small repairs in operation. Depth said to be 3.5 m. – 4 m.

Port operation in foggy weather said to be controlled by radio and millimetre (aircraft) type radar installation, one scanner of which is situated on tower near root of Southern breakwater.

Tugs: Alleged that 5 are available; 1 icebreaker type of 2,500 h.p. 2 medium size, and 2 small, 1 at least of which was propelled by Voith-Schnieder gear of about 750 h.p.

Pilots: To call Pilots, use Channel 16 and call Ventspils Radio who make arrangements with Harbour Office and Agents (Inflot).

During time vessel de-ballasting and loading; any problems can be resolved by call to Agents through Ventspils Radio.

Regulations: Fire Officers demand that suitable bonding wire be fitted (supplied by ship). No shore facility available.

Facilities: No. 1 pier has (building) tower crane for handling hoses. Nos. 2 and 3 berths are fitted with loading arms hoses and towers. Fresh water available. Bunker fuel available but not necessarily marine diesel.

Cargo Berths: There are believed to be 8 dry cargo berths, within the river port area, some with cranes, suitable for general cargo, together with storage buildings. Refrigerated/chilled cargoes have been handled regularly.

Max. Size: Pilot stated that tankers of up to 60,000 tonnes displacement were possible at present, and that after dredging it should be possible to take up to 100,000 tonnes displacement.

To contact Agents, call Ventspils Radio on Channel 27 and they make arrangements.

SHIPMASTER'S REPORT: May 1980.

Vessel: LPG carrier of 10,000 g.r.t.

Landfall/Approaches to Pilotage: Approaches clearly defined by radar, Decca coverage good. Vessels anchored in dry cargo anchorage provide a good guide. Two approach channels with tankers generally using the Southern channel. Pilot boarded close to Buoy A (fairway buoy for South channel).

Pilotage: ETA notification 96, 48, 24 and 4 hours before arrival to "Inflot Ventspils" (Agents), thence further communication by VHF calling Channel 16, then working Channel 9. Answered to "Ventspils Pilots" and not "Nadzor" as stated in Radio Signals Volume 6. Pilots will advise instructions, in this case, to proceed to Buoy A (fairway buoy for South approach channel). Pilot cutter/launch (speed 6 knots) proceeds from inner harbour. Pilot ladder on appropriate side for weather conditions rigged 1 m. above water. Pilotage time to berth approximately 40 minutes. On this visit, despite Pilot boarding at Buoy A, vessel entered using North channel.

Upon departure, Pilot arranged by Agent upon completion of documentation. Southerly channel used for departure with Pilot disembarking mid-channel.

NOTE: LPG vessels are not permitted to enter or leave port during the hours of darkness.

Anchorage: Tanker anchorage lies to N.E. of Northerly channel.

Tugs:

a. Inbound: Tugs join vessel close to breakwater entrance. Three tugs used for berthing (standard port cost for tugs whatever the number used – five tugs available). Made fast on port bow and quarter using ship's lines with one tug pushing. Vessel berths port side alongside – strong Northerly winds (off-shore) on this visit.

b. Outbound: Tugs join vessel at berth – one tug made fast on starboard bow using ship's line. Second tug in attendance. Tugs gone and clear before clearing breakwater.

Berth: (Ammonia only – see Plan Book). Modern fendered concrete quayside with depth alongside 13 m. to 14 m. No tidal range but atmospheric conditions affect Baltic water level – density alongside 1001 g/ml.

Vessel generally berths port side alongside. Berth equipped with 12 in. 150 ASA liquid and vapour chicksans. Ship's reducer used on vapour manifold. Ship's gangway used.

Cargo: Anhydrous ammonia received at −33° Celcius. Loading rate agreed before commencing loading (in this case requested 650 t.p.h.) and increased to over 1,000 t.p.h. after officially requesting for increased rate through Inflot agency. The rate agreed prior to loading is expected to be maintained throughout loading with usual reductions for topping off as required. Average rate for 10,230 tonnes loaded was 714 t.p.h.

Vapour return line connected but not required or used – high back pressure on line. Documentation slow – cargo documentation cannot commence until ship cleared and chicksans not connected until cargo documentation completed. Shippers "Sojuzchimexport" require quality certificate for cargo heel onboard – accepted ship's declaration of purity. Also require cargo plan showing 100% tank volume for each tank – to prevent overloading. Bill of Lading quantity = cargo as measured onboard by shore surveyor (accompanied by interpreter).

Bunkers/Water/Chandler: None required but all available.

Agents: Inflot, Ventspils. Tel. Nos. 61213, 51233, 51350. Cable address: "Inflot Ventspils". Telex No.: 122 INF VNT SU.

Efficient and friendly service. All representatives speak perfect English and very helpful in dealing with Authorities. Inflot require ship information, cable 24 hours prior to arrival with following information:

a. Ship's name, signal letters, nationality.
b. Last port.
c. Draft forward and aft, length, gross and nett tonnage.
d. Cargo requirements.
e. Owner's name and telex number.
f. Bunkers, water and provisions required.
g. Number of crew and health declaration.
h. ETA at pilot station.

If Agents are required in port, call "Ventspils Radio" on Channel 16 and ask for connection to Inflot Agency.

Authorities:

Customs: Usual Bond Declaration required but unconcerned with bonded items onboard and bond locker not sealed in port.

Currency Declaration most important. Customs are not interested in personal cash holdings but must have a "TOTAL Cash Onboard Declaration" and the currencies involved. This total to include personal cash, bar cash, safe cash, etc.

Persons going ashore MUST obtain receipts for all expenditure which are then compared with the total declaration prior to departure.

Immigration: Usual Crew Lists required plus Discharge Books or Passports of all onboard. These are taken ashore, stamped and returned onboard. Persons going ashore will then be required to exchange Discharge Book for shore pass with guard at bottom of gangway. Prior to departure, all personnel must report to Immigration onboard for an identification check.

There is a strict CURFEW after 2400 hrs. and all personnel must be onboard before that time.

Port Health: Doctor boarded on arrival but formality only. Cursory inspection of storerooms only.

General: Time in port was 26 hours 48 minutes. Time loading was 14 hours 20 minutes (documentation 10 hours). Total disbursement for visit was U.S.$9,630.

SHIPMASTER'S REPORT: November 1980.

Pilotage: Pilotage is compulsory. 12 Pilots available. Pilot boards at fairway buoy at the beginning of the old entrance channel and disembarks at Buoy No. "A" in the new deep water channel. Docking and undocking without the aid of a Pilot is not allowed.

Restrictions: Vessels can enter and leave port during hours of darkness at any stage of the tide, however, vessels are not allowed to manoeuvre in fog or at times when the wind is strong. Shore radar is used at night and in fog for berthing.

Max. Draft: Vessels max. draft on sailing was 11.6 m. (FW).

Tugs: 4 tugs available.

Radio: Ventspils Radio, call sign "UNI", on 500, 2182 and VHF Channel 16.
VHF: Pilot uses Channels 9 and 13 after initial call on Channel 16. Port Authority and Agent on Channels 16 and 27.
Documents: As per "Guide to Port Entry".
Facilities: The following are available: Fresh water, fresh provisions, small repairs, small machine shop, airport (with connection to Riga only), Lloyds Surveyor, Salvage Surveyor (Lloyds), laundry service, bunker fuel oil, diesel oil, small stock of lubricating oils, Doctor and hospital, groceries and meats, slop tanks – there is no slop storage – slops are segregated during discharge.
Tankers: There are 6 berths at the oil terminal at 3 piers (Berth Nos. 28 – 33).

Vessel berthed at No. 31. Ballast is required when arriving or sailing in a light condition (clean ballast may be discharged into the sea with permission from shore).

The tanker terminal exports crude oil, nafta and gas oil but no petrol. Fuel oil is exported from Klaipeda, 100 miles to the South. Ships hoses are used. 2×12 in. lines are connected direct to the ship's manifold. No shore booster pump available. Max. pressure 5 kgs.
General Cargo Facilities: There are facilities for handling bulk cargo. Large number of cranes available.

Ro-Ro facilities are not yet ready. There is a floating crane with a 100 ton capacity. There is equipment for handling 20 ft. containers only, however, there is very little storage space available for containers.
Fuel: There are 2 barges, capacity 400 tons each for fuel and diesel oil.
Fresh Water: There is 1 water barge, capacity 100 tons.
AUTHORITY: The Port of Ventspils Authority.

AGENT: The Port of Ventspils Maritime Agency "Inflot". Postal address: 18 Dzintaru Street, Ventspils, U.S.S.R. Cables: "Inflot Ventspils". Tel. 6-12-13; 5-13-69. Telex: 822.

VOSTOCHNY: 42.44 N. 133.03 E.

New port being constructed. Log-loading berth understood to be in operation and a chip berth completed. Container berths to be constructed, depths up to 17 m. Vessels of 150,000 d.w.t. handled.

VYBORG: 60.43 N. 28.44 E. (See Plan Book)

For Saimaa Canal see Index.

GENERAL: A Baltic Sea port Vyborg is situated at the head of the Gulf of Vyborg in the N.E. part of the Gulf of Finland.

The port area consists of a harbour protected from the North by the Castle bridge passing over the strait nearby the Castle of Vyborg and by the Smolyanoy point – from the West.

The port is open for navigation from April up to the middle of December. Ice in the Gulf of Vyborg begins to form normally about the middle of November. The Gulf usually becomes frozen over by the middle of December and the last ice finally disappears in April.

Whilst tidal range in the Gulf of Vyborg is of small account, considerable changes in the water level may be caused by strong winds (up to 1.6 m.), variation in atmospheric pressure (up to 1 m.), and the seasonal increase of the amount of water brought down from the land. The rise of the water level is usually caused by South, S.W. and sometimes by North winds. The maximum range of the water level in the Gulf is about 2.0 m.

The Vyborg Fairway (least depth 7.3 m.) leads from the entrance to the Gulf of Vyborg across the Transund roadstead up to the entrance of the Inner Vysotsky Roads. The Vyborg Sea Channel (least depth 6.5 m.) leads from the Inner Vysotsky Roads into the port, situated at the head of the Gulf. Both of these and the Fairway and the Channel, are open for navigation any time of day or night.
DOCUMENTS: Refer to beginning of U.S.S.R. section.
PILOTAGE: Pilotage in the port area is carried out round the clock. It is compulsory for all types of vessels. Pilots board and disembark vessels in the following places:

1. At the port of Vyborg;
2. At the Reception buoy, 5.1 cables Westward of the Northern point of the Mayachny Island (pilot station of the Vikhrevoy Island);
3. At the Brusnichnoe Lock berth or in the Lock itself.

In the case of rough weather when safe boarding or disembarkation of a Pilot at the Reception buoy of the Vikhrevoy Island pilot station is impossible, a vessel, with the Master's consent, may follow a pilot boat, in the wake of it from the Reception buoy up to the Large Transund Roadstead or as the case may be, from the Large Transund Roadstead up to the Reception Buoy.

The radio communication between pilot boat and vessel is effected through VHF radio, Channel 12.

In case the Master of a vessel does not agree to follow a pilot boat, he can:

(a) When approaching the port from the seaward lie at anchor at the Reception buoy area until the weather changes for the better;

(b) When leaving the port for sea, anchor at the Large Transund Roadstead at a place indicated by the Port Administration and wait until Pilot is able to disembark at the Reception buoy area.

Vessels approaching the port from seaward should order a Pilot at the same time as they notify the Port Administration of the time of their arrival at the point of meeting a pilot boat.
ANCHORAGES: There are 5 anchorages at Vyborg Fairway and at Vyborg Sea Channel areas.

Two are situated at the Large Transund Roadstead area, one – at the Small Transund Roadstead, one – S.E. and one – N.W. of the channel. Anchorage positions are shown on the chart.

The holding ground in the anchorages is sand, mud, stone and clay. The depths are from 11 to 17 m.
RESTRICTIONS: Vessels are allowed to enter or leave the port when winds do not exceed force 6. During daytime, when a vessel's length is not more than 125 m. and her draft does not exceed 6.5 m. (at the Kronstadt datum);

At night time, when a vessel's length is not more than 105 m. and her draft does not exceed 6.1 m. (at the Kronstadt datum).

Before entering or leaving the port Masters of vessels having length and draft exceeding those indicated above must obtain the Harbour Master's permission.
HEALTH: International code quarantine signals to be shown on arrival. Vessels placed in quarantine will be instructed where to anchor by the pilot station.
RADIO: Radio contact can be established through the Vyborg Radio port radio station operating 24 hours daily on the following frequencies:

Call sign	*Frequencies (kHz)*		*Type of trans-mission*	*Time of work*
	working	*calling*		
UNN	500	500	A1	H24
	444		A1	H24
"Vyborg-Radio" (Port Control	156.7*	156.8*	F3	H24
"Vyborg-Radio" (pilot service of the Saimaa Canal)	156.6*	156.8*	F3	HX
"Ostrov Vikhrevoy" ("Whirlwind Island") pilot station	156.6*	156.8*	F3	HX
"Zaliv Novinskogo" ("Gulf of Novinsky") pilot station	156.6*	156.8*	F3	HX
"Vyborg-Radio" (Inflot Agency)	156.6*	156.8*	F3	H24

*Frequencies are given in mHz.

Every vessel whilst proceeding along the Fairways and the Channel must have VHF radio-telephone in good working order, being able to ensure a reliable radio contact with the port of Vyborg and between vessels. If a vessel is not equipped with VHF radio, a Master can hire a VHF portable radio-set from a pilot station (via Pilot) for a fixed charge.
TUGS: Available, ordered through "Inflot".
BERTHING: Can only be effected with Pilot on board. Berths of the port with depths alongside of up to 7.8 m. are equipped to handle general and bulk cargoes, timber, etc., as well as passenger traffic. There are enclosed warehouses and open concrete floor sheds.

Berths are equipped with electric cranes of up to 10 tons capacity. There are floating cranes of up to 15 tons capacity and other cargo-handling equipment and machinery.

Opening and closing of hatches is usually done by the ship's crew, but if required it can be done by port labour for vessel's account.
MEDICAL: "Inflot" to be advised in advance if any medical attention required.
DENSITY: Salinity 5%.
FRESH WATER: Available. Can be supplied by pipe-lines at all berths or delivered by barges.
FUEL: Not available.
GANGWAY/DECK WATCHMEN: Not required.
OPENING/CLOSING HATCHES: Usually opened and closed by crew. Can be operated by stevedores on request.
CUSTOMS ALLOWANCE: No control on board the vessel. It is forbidden to take alcohol off the ship.
REPAIRS: Minor repairs can be effected.
TIME: GMT plus 3 hours all year round.
HOLIDAYS: Cargo operations can be carried out on all holidays.
TELEPHONE: Connection to vessels is not possible.
SHORE LEAVE: Permitted subject to police control.
AUTHORITY: The Port of Vyborg Authority.

AGENT: The Port of Vyborg Maritime Agency "Inflot". Postal address: Inflot, PO Box 40, Vyborg, U.S.S.R. Cables "Inflot Vyborg". Tel. 52-01, 12-85 and 12-86. Telex 121521.

YALTA: 44.30 N. 34.12 E. (See Plan Book)

GENERAL: An ice-free Black Sea passenger and commercial port, Yalta is situated at the head of Yalta Bay and on the Southern coast of the Crimea Peninsula.

The port is open for navigation all the year round.

The port is formed by a harbour protected by a mole. Depths in the harbour are up to 10 m.

Yalta is mainly a passenger port, but it is equipped to handle dry cargo vessels.
DOCUMENTS: Refer to beginning of U.S.S.R. section.
PILOTAGE: Pilot meets vessel in the outer roads, at a distance of 1 mile S.E. of Yalta Lighthouse.
ANCHORAGES: The port outer roads are situated in Yalta Bay:

E.S.E. 6 cables off the head of the mole with depth of about 30 m. for large vessels and E.N.E. with depths, about 10 m. for small vessels (tugs boats ect.).

They are open to winds blowing between E.N.E. and S.W. At times vessels may be turned broadside to waves caused by Southerly winds.

The bottom is mud and sand.
RESTRICTIONS: Vessels may enter or leave the port at any time of day or night. Vessels entering or leaving the port must have keel clearance of not less than 0.6 m.
MAX. SIZE: Permissible draft is 8.5 m., length 215 m.

RADIO: Ship-shore radio contact can be established through the port radio station Yalta Radio operating 24 hours a day on the following frequencies:

Call sign	Frequencies (kHz)		Type of transmission	Time of Work
	Working	Calling		
UCD-9	500	500	A1	H24
Yalta Radio	2490	2100	A1	HX
Lazur (Port Control)	156.8*	156.8*	F3	H24

*Frequencies are given in mHz.

BERTHING: Cranes of up to 7 tons capacity are operated along cargo quays.

Handling of cargo at the passenger terminal is usually done by ship's cargo gear. A 5-ton shore crane may be ordered, if necessary.

TUGS: Tug assistance for mooring is compulsory. Masters of vessels entering the port must order at least 1 tug when mooring.

Masters of deep-drafted vessels must order a tug-boat when unmooring from Berth Nos. 1, 3 and 5 if it is impossible to leave berth by drifting with the assistance of off-shore blowing wind.

FUEL: Not available.

FRESH WATER: Can be supplied by pipe-lines at all berths.

REPAIRS: Not available.

TIME: GMT plus 3 hours. (All year round).

AUTHORITY: The Port of Yalta Authority.

AGENT: A branch of the Port of Odessa Main Maritime Agency "Inflot" at the Port of Yalta. Postal address: 5 President F. D. Roosevelt Street, 334200 Port of Yalta, U.S.S.R. Cables: "Inflot Yalta". Tel. 32-82-89. Telex 185.

YUZHNYY (Grigorevsky): 46.36 N. 31.00 E.

(See Plan Book)

PORT LIMITS: The temporary water area of the port is the waters of Adzhalykskiy Liman and the sea area bounded by the arc of a circle with a radius of 2 miles from the coast radar station. (46° 36.1′ N., 31° 01.4′ E.)

ANCHORAGE: It is prohibited for ships to anchor in the inner roadstead. Ships proceeding into Port Yuzhnyy wait in the anchorage for the port of Odessa. (46° 29′ N., 30° 51′ E.)

Anchorage Nos. 90 and 91: For gas carrying ships and are 3.4 miles S.S.W. and 1.7 miles South of the West entrance point of Adzhalykskiy Liman. The depth in anchorage No. 90 is 14 m. to 21 m., and in anchorage No. 91, 19 m. to 21 m. The seabed is sand, mud and shells.

The limits of the anchorages are shown on the charts.

BERTHING: On the West coast of Adzhalykskiy Liman quay Nos. 1, 2 and 3 have been built. The general length of the quays are about 600 m. Quay No. 3 is for loading liquid ammonia and pumping superphospherous acid.

A quay for auxillary ships has been built on the North side of the East entrance point of the inlet. The length of the quay is 155 m. and the depth alongside it is 6.4 m.

GENERAL: Port Yuzhnyy is found in Alzhalykskiy Liman, and is 4.2 miles E.N.E. of Mys. Dofinovskiy. At the present time the first stage of the port has been built on the West coast of the inlet. Three quays have been constructed. Further work is being carried out in the port with the construction of quays on the East coast of the inlet.

The water area of the port opposite the constructed quays has been deepened to 5.4 m. – 13.4 m.

From seaward an approach channel, 1.6 miles long has been cut through. Leading light beacons lead along it. The least depth in the channel is 12.6 m. (October 1978)

The entrance to the port is protected by 2 moles: The Western about 400 m. long and the Eastern about 540 m. long. The moles are 6 m. wide.

Areas with special navigation systems: Off the coast there are areas in which navigation is temporarily prohibited; an area dangerous for navigation; area No. 185, prohibited for anchoring and fishing, and area No. 14 for bombing.

The limits of the areas are shown on charts.

Mys. Dofinovskiy: (46° 34′ N., 30° 55′ E.) lies 4.3 miles E.N.E. of Mys. Severnyy Odesskiy. Mys. Dofinovskiy protrudes insignificantly into the sea. Four cables West of the headland stretches the village of Novodofinovka, in which there are conspicuous white buildings.

Spoil Grounds: 1.7 and 2.5 miles East of Mys. Dofinovskiy a former spoil ground and a spoil ground are situated respectively. In these areas depths may be less than shown on charts.

A wreck with a depth 9.8 m. over it is situated 2.7 miles E.S.E. of Mys. Dofinovskiy.

A light buoy marks the wreck with a depth of 9.6 m. over it.

Banks with depths of 7.6, 7.2, 8.4 and 9.4 m. are situated respectively 3.5, 3.8, 3.6, and 3.7 miles E.S.E. of Mys. Dofinovskiy. The are marked by light buoys.

A bank with a depth of 9 m. is situated 3.3 miles E.S.E. of Mys. Dofinovskiy.

Conspicuous Points: On the West coast of the entrance to the inlet in the village of Grigor'yevka is a conspicuous smoke chimney, and on the West coast of the inlet opposite the quays can be seen large metal reservoirs and towers.

Navigational Aids: The entrance to the channel and its edges are marked by light buoys. On the moles stand lights and beacons; on the East coast of the inlet there are leading light beacons.

Station: On the East entrance point to Adzhalykskiy Liman stands a coastal radar station. Radar pilotage is carried out under the direction of a Pilot. The pilotage is of a consultative nature. Responsibility for manoeuvres, fulfilling requirements of MPPSS-72 (International Regulations for Prevention of Collisions at Sea) and the navigational regulations of the port, rests with the Master of the vessel.

There is a signal post on the building of the coastal radar station.

Caution: Bearing in mind the possibility of the destruction of the edges of the approach channel, depths in it may be less than shown on charts.

Underwater Pipe-line: Runs in a S.W. direction from the village of Grigor'yevska. The position of the pipe-line is shown on charts.

Roadsteads: There are 2 roadsteads in Port Yuzhnyy: outer and inner. The outer roadstead is situated in the approaches to Adzhalykskiy Liman. The seaward limits of the roadstead are coincidental with the outer limits of the port. The depths in the South part of the outer roadstead are up to 22 m. The inner roadstead occupies the water area of the South part of Adzhalykskiy Liman opposite the quays.

Grigor'yevska Light Beacon: Stands 3.8 miles E.N.E. of Mys. Dofinovskiy. Appearance of the beacon: white round concrete tower on the upper part of which stands a black cylinder, the lower part of the cylinder becomes a truncated cone. Height of the beacon is 14.8 m.: height of the light is 60.1 m.

Vkhodnoy Leading Light Beacons: Stands on the East coast of Adzhalykskiy Liman and lead along the approach channel to Port Yuzhnyy. Its direction is 193° – 013°.

The front beacon stands 2.7 miles N.N.E. of the entrance to the inlet. Appearance of the beacon: 4-sided metal framework tower on which has been erected a black rectangular target with a white vertical stripe in the centre. The height of the beacon is 17 m.; height of the light is 47 m.

The rear beacon stands 6 cables from the front one. Appearance of the beacon: 4-sided metal framework tower, on which has been erected a black rectangular target with a white vertical stripe in the middle. The height of the beacon is 29 m.; height of the light is 69 m.

REGULATIONS: The following are some of the port regulations. The numerals have no significant meaning.

1. Gas carrying ships proceed into port and leave it in company with a fire tug, which goes ahead of the gas carrying ship at 8 – 10 cables and will notify on VHF radio all ships of the necessary measures and precautions to be taken.

2. Requests for pilotage and tugs for mooring ships at the quays are made to the Port Director of Odessa not later than 48 hours before reaching the outer roadstead of the Port of Odessa, and requests for an accompanying fire tug, not later than 24 hours before.

3. In the port there is a control office for regulating ship movements. Ships entering the port, request permission for entry 2 hours before, and ships leaving the port, 30 minutes before.

5. Pilotage for all foreign ships is obligatory.

6. Pilotage for ships into Port Yuzhnyy begins at the anchorage (46° 29′ N., 30° 51′ E.) of Port Odessa.

7. Pilotage into Port Yuzhnyy is carried out only in daylight and when visibility is not less than 4 miles.

8. When a gas carrying ship is entering or leaving the port the entry or exit of other ships is prohibited.

(a.) 2 hours before entering or leaving the port the Master of a gas carrying ship must inform all ships on VHF radio on Channel 16 of the route he will be following. With the arrival on board of the Pilot such information will be given every 15 minutes and if the circumstances require it, more often.

(b.) The mooring of any kind of floating object to the side of a gas carrier while it is at quay No. 3 is prohibited.

9. The max. draft for ships proceeding into Port Yuzhnyy temporarily stands at 9 m. (See Shipmasters Report: April 1979)

10. The max. speed for ships in the channel is 6 knots, but in the inner roadstead it is 4 knots.

11. The movement of ships in the channel is only in one direction.

12. The mooring of gas carrying vessels and vessels carrying chemicals is carried out with the aid of not less than 3 tugs, the power of 2 of which must be 882 kV (1,200 l.s.) and one 1,692 kV (2,300 l.s.). Leaving the mooring is carried out with the aid of not less than 2 tugs of which one has a power of 1,692 kV (2,300 l.s.) and the other 882 kV (1,200 l.s.) The wind speed when mooring and leaving moorings must not exceed 7.0 m./sec.

The mooring of gas carriers with a length of more than 180 m. is carried out with the aid of 4 tugs; the power of each of them must not be less than 882 kV (1,200 l.s.). Unberthing will be carried out with not less than 3 tugs with the same power. The speed of the wind during mooring and leaving moorings must not exceed 7.0 m./sec.

13. Communication between tugs and ships will be carried out on VHF radio on Channel 6.

14. Communication with ships is carried out on VHF radio on Channel 13, call on Channel 16. The VHF call sign for Port Yuzhnyy is "Portnadzor-Yuzhnyy" (i.e. Port Director – Yuzhnyy).

15. During the mooring and un-mooring of gas carriers from the quays, a representative of the Odessa Port Factory, military guard, office of the Harbour Master and also an inspector of the port will be present.

The mooring of foreign ships at the quay and un-mooring may be carried out only with the permission of the representative of the control point of the frontier force.

16. Mooring at the quay, moving on a quay or leaving the quay are to be carried out under the directions of a Pilot.

17. When the speed of the wind is above 9 m./sec., the moving of gas carriers along the quay is prohibited.

18. Navigation of ships along the channel, of not more than 20,000 tons displacement is permitted without tugs when the wind speed is less than 7 m./sec. and the cross current has a speed not more than 0.5 m./sec.

Entry to the channel when visibility is less than 3 miles is prohibited.

When there is a strong cross current or current along the channel, tugs will lead ships into the approach channel.

The mooring of ships at the quay will be carried out in the following manner, after the tugs have turned the bows towards the exit and parallel to the quay at a distance of 80 m. – 100 m. from the quay, the tugs, maintained the plane of the ship parallel to the quay, and will move the ship towards the quay. The speed of approach must not exceed 10 cm./sec.

The ship moorings will be carried ashore by launches. From the bows and stern 2 nylon mooring ropes of not less than 200 mm. (8 in. circumference) are to be used.

19. The main engines of gas carriers must be in constant readiness to move the ship during the whole period in the port.

20. The formalities of customs and quarantine and other formalities will be carried out in the anchorage of the Port of Odessa in 46° 29′ N., 30° 51′ E.

Restrictions in Port Yuzhnyy: The area along the recommended track 070.4° – 250.4° between meridians 31° 04′ E. and 30° 52′ E. for a width of 5 cables on both sides of it, comprise the regulated area of the port. All ships approaching this area must request permission from the control office regulating traffic, to enter this area. The request is made on VHF radio on Channel 16, working on Channel 13, call "Portnadzor-Yuzhnyy". Without the permission of the traffic regulating post entry of the regulated area of the port must not be made.

When gas carriers are entering the port and also when leaving it, all other ships must observe precautions and not hinder its movement or its chosen route. These ships must not close a gas carrier within a distance of 10 cables.

The fire fighting tug on duty keeps a round the clock watch on VHF radio Channel 16.

The use of steel moorings on gas carriers is prohibited.

The Harbour Master of Port Yuzhnyy has the right to depart from the present position on questions connected with the safety of mariners.

Lack of knowledge of the requirements of the present temporary obligatory regulations established for the port will not absolve the Master of a vessel from responsibility for non-observance of these regulations.

SHIPMASTER'S REPORT: April 1979.

This new port is now called Yuzhnyy (Although it is still known as *Grigorevsky* on the B.A. chart).

The Pilot for Yuzhnyy boards at the usual Odessa pilot station. The departure draft is being reconsidered each time for every vessel. Our official sailing draft was 10.20 m. both times, meaning our fully loaded draft. But according to the Pilots, vessels have already sailed with much deeper drafts. 1 tug is now permanently available, while the other tugs have to come from Odessa, which can cause some delays. In due time 2 more tugs will be permanently stationed at Yuzhnyy.

Notices: Received from Agent (February 1979):

According to the information which we received from the Harbour Master of the Port of Yuzhnyy, the max. allowed sailing draft for your good ship on the 3rd February 1979, is 10.20 m.

Signed – INFLOT

Received from Agent (April 1979):

According to the information which we received from the Harbour Master of the Port of Yuzhnyy, the max. allowed sailing draft for your good ship on the 18th April 1979, is 10.20 m.

Signed – INFLOT

SHIPMASTER'S REPORT: September 1979.

Vessel: 32,000 g.r.t. LPG Carrier.

General: This port is situated on the Western bank of what was once Lake Ajalik, about 0.5 miles from the entrance to the bay. The port has been created by dredging the barrier that separated the lake from Odessa Bay. On BA. chart 2212 this entrance is situated about Lat. 46° 35.6′ N., Long. 31° 00.4′ E. Breakwaters of prefabricated concrete sections extend about 500 m. into the bay, and the approach channel is marked by conical buoys and pillar buoys for a distance of about 2.5 miles beyond this. The approach channel lies on an axis of about 010°T – 190°T. Depth in this channel were not less than 16 m. by ship's echo sounder, both on entering and leaving.

The small town of Grigor'yevska is marked on BA. 2212, lake Ajalik is not marked on this chart.

The port has been created to serve the massive and newly constructed chemical plant on the Western shore of the lake. At the time of this visit it consisted of dry bulk handling berths of about 700 m. in length, and a liquid handling facility for the discharge of superphospheric acid and the export of anhydrous ammonia. The liquid handling berth lies to the North of the dry berths, about 0.8 miles from the breakwaters.

There are plans to create dry cargo berths on the Eastern shores of the lake, immediately inside the entrance. Some work is already in progress.

Vessels of up to 14 m. draft can be handled and there are 3 medium sized tugs available.

The chemical plant is not yet fully completed, a second stage has only been operating since the beginning of this year. In 1980 there are plans to export 2 million tons of ammonia.

Approach: Vessels approaching fom the Bosporus must make use of the traffic separation schemes South of Odessa Port.

Odessa Port Control may be contacted on Channel 14, but reception at this time was very poor. Port control will give orders to anchor off Odessa port, usually immediately to the East of the anchorage area marked on BA. 2212.

Agents: "Inflot" may be reached on Channel 16, with a working Channel 13 available. Again reception was not too good.

Pilot: Two Pilots will board at the anchorage, plenty of warning was given. The launch is about 20 m. long and painted orange. Pilot contacted vessel on Channel 16.

Berthing: Vessel berthed starboard side alongside, swinging immediately South of the berth with the aid of 2 tugs (the third was late in arriving) moored fore and aft, port side.

The berth itself consists of a concrete jetty projecting from the main jetty, some 110 m. in length and about 40 m. proud of the main jetty.

There are 5 chicksans, 2 for the discharge of acid, and a group of 3, 2 liquid 1 vapour return, for the loading of ammonia. The chicksans have hydraulic couplings and appear to be of an awkward size, about 325 to 330 mm.

On this visit there was only 1 liquid line available for use together with the vapour return line. Claimed loading rate is said to be some 2,000 tonnes p.h. With the 2 liquid lines in use, this would indeed be possible. Our overall load rate was 1,115 t.p.h., including initial and final slow rates. During loading hourly rates in excess of 1,500 t.p.h. were maintained.

Communications with the plant operators was quite good but obviously hampered by language. There were no problems with slowing down for topping off.

Samples: Were taken on arrival and at several times throughout the loading, sample cock on chicksans.

Fresh Water: Available from the jetty.

Fuel: May be supplied and arrives by barge. Bunkering cannot be undertaken whilst loading cargo and on this call the bunkering had to be completed before being allowed to load, despite this leading to a big delay.

Moorings: Three lines, 2 breast and 2 springs, fore and aft. Ratguards must be fitted. Mooring boat in attendance.

No problems with landing gangway on the quay and it may be turned out quite safely before arrival alongside.

Guards: On the quay, 1 at the gangway (discharge books required before being allowed to read drafts, etc.) and 1 each end. At night there was a 'guard' boat lying off our port side.

Officials: Polite and quite firm.

Papers required:

5 Copies General Declaration. (ship's particulars etc.).
4 Copies Cargo Declaration.
2 Copies Crew's Effects.
4 Copies Crew's Lists.
4 Copies Passenger List.
2 Copies Crew Currency Declaration.
1 Copies 'Clean' Ballast Declaration.

No certificates were sighted.

Shore Leave: Granted until 2400 hrs. Masters allowed unlimited shore leave. There is a bus service into Odessa some 24 miles away (2 hour journey)

Toilets/Pollution: Vessels not fitted with sewage treatment plants must seal their toilets and use the shore facilities at the end of the quay. A statement to this effect must be signed.

A very strict control of pollution of all types is maintained and this includes ALL drainings from the maindeck. Scuppers must remain plugged right up to the moment of departure. Hoses used to de-ice the liquid line must NOT be allowed to drain overside.

Papers: Allow at least 3 hours for paperwork before and after working cargo.

Cargo Lines: Were blown through by the shore plant on completion of loading. Vapour return lines was used throughout and there is no charge for its use, vapour apparently being returned to the shore tanks.

Cargo loaded was at about −32°C.

SHIPMASTER'S REPORT: October 1980.

The following is an update of the September 1979 report above.

General: The port has been developed East of Odessa to handle overspill from Odessa and to develop bulk handling facilities.

In about 10 years in terms of tonnage handled, it is expected to be the largest in the Southern U.S.S.R. open to overseas vessels.

It has been in operation for 2 years and is 0.6 miles East of Grigoryeko light. This is conspicuous black white.

The port has been constructed from a fresh water lake. West breakwater head is in position 46° 35.80′ N., 31° 00.70′ E. East breakwater head is in position 46° 35.80′ N., 31° 01.03′ E. The port extends at present to the bulk liquid ammonia berth in position 46° 37.08′ N., 31° 00.80′ E.

Port regulations are at present in Russian only, and English text should be available shortly (October 1980).

No actual chart is obtainable. Chart 907 of Odessa only extends to Grigoryeko Light. I am told a Russian navigational chart will not be produced until port is properly developed.

Approach: Separation scheme to Ilyichevsk Turning Buoy position 46° 15.25′ N., 30° 55.75′ E.

Sea Pilot boards about 1 mile North of this position. Then follow new line of centre channel buoys course 002°, leaving buoys to Port in positions Fl. R. RW. Pillar. 46° 18.70′ N., 30° 56.15′ E. Fl. W. 5 Sec. BW. Pillar. 46° 22.80′ N., 30° 56.20′ E. Fl. W. 5 Sec. B.W. Pillar. 46° 27.25′ N., 30° 56.25′ E. Fl. R. RW. Pillar. 46° 32.20′ N., 57.25′ E. Vessel turns to starboard before the last red and white Northerly buoy and anchors in No. 90 anchorage.

Approaching the Russian coast soundings once the 100 fathom bank has been crossed tend to be flat and give little indication of position.

The outer separation scheme buoy was observed on radar at 9 miles and visually at 7 miles.

The coast is identifiable on radar at 30 miles.

D/F beacons are generally reliable and as ALRS, out of 12 checked in September 1980 3 were not operating on the West coast of the Black Sea.

Notices:

	72 hours	*48 hours*	*24 hours*	*6 hours*

Port:		Grigorjeka Odessa	*	*

Note: All through Odessa Radio.
* denotes send, but do not expect replies.
"Vneshtrans" is cable address for 'Sojuznestrans' shippers.

Pilot: Order Sea Pilot Ilyichevsk as notices.

Contact by VHF Channels 16 and 14 about 15 miles away from turning buoy. Old whale catcher named 'Bravvy' pronounced 'Prowy', has good fendering and comes alongside vessel. Pilot boards from either old harpoon platform or platform on starboard side forward of his bridge. Stationed about 1 mile North of Ilyichevsk turning buoy Fl. G.

Pilotage compulsory from here to port. Pilot speaks reasonable English and requires about 13 knots.

If anchoring at Yuzhnyy anchorage, he positions vessel under control from Yuzhnyy Radar Station position 46° 36.05′ N., 31° 01.3′ E.

The pilot cutter in the anchorage is a very bad sea boat and has great difficulty in getting alongside. I believe the normal boat is undergoing repair.

On departure the Harbour Pilot leaves the vessel in the anchorage area and the sea pilot cutter 'Bravvy' guides vessel down channel to 'Ilyichevsk' turning buoy, his speed is 11 knots.

Anchorage: For large LPG ships anchorage No. 90 is used, centred on 46° 32.5′ N., 30° 58.25′ E. with a radius of approximately 0.6 mile.

Depth 20 m., bottom mud and sand. Density 1024.

All anchoring is under control of Yuzhnyy radar station which gives the Pilot directions.

The Odessa waiting anchorage has moved 1.5 miles to the S.E.

Berthing: There is no night berthing or unberthing, although the buoyage and leading lights are lighted, this seems to be for dredgers working. It would seem the hours are 0800 to 1700 hrs. (with possible extension in Summer months) with no vessels in the harbour or channel underway before or after these times. (We made it outwards in 12 mins. (Oct. 80)).

Visibility must be over 4 miles before berthing or unberthing operations take place. It may seem clear out at the anchorage but the weather in the harbour can be very different. This has been born out from observations. We noted a temperature rise of 8° Celsius in 1 hour whilst moving out of port to anchorage.

Channel: The channel width is 118 m. and least depth of 14 m. (Checked by echo sounder). Pilots advise that there is a patch of 13.5 m. but this was not found. Bottom sand and mud. The shape is in the form of a 'V' so it is necessary to keep to centre of channel.

Buoys commencing seawards at Nos. 13 (starboard) and 14 (port) terminate in the harbour itself at Nos. 3 and 2.

The leading line is 013° to 193°.

Buoys (entering), black to starboard and red to port with Fl. W. & R. lights respectively. Channel length 1.3 miles from breakwater heads.

South of the channel are two shoals one 1.6 miles S.S.W. marked by 2 white pillar buoys Fl. W. and isolated by 1 white pillar buoy about 1.5 miles S.W.

Confused cross currents from wind and the rivers emptying out nearby are apparent. Generally the surface current is Westward and sub-surface Eastward. Apart from causing navigation problems these currents cause much silting up.

Vessels enter the channel from the anchorage between the 2 shoal areas on an approximate course of 080° then turn hard to port when in line with the channel to bring leading lights in line before entering channel. On leaving much the same is done, except a more Easterly course is resulted.

In the harbour itself in calm conditions there is a noticable Southerly current of 0.5 knots.

The dredged channel at present terminates just astern of the ammonia berth marked by 2 buoys.

Leading marks, white and orange in colour are situated on raised ground N.E. of the harbour, and at night exhibit fixed white lights under which are neon like strip green lights.

Vessel is swung short round to port off ammonia berth, berthing starboard side to head out. On fertilizer berths there seems to be no accepted side to.

The breakwaters consist of concrete blocks piled haphazardly on top of one another. Immediately to the East are the ruins of 2 other small breakwaters. At the foot of the Eastern breakwater there is a large concrete radar and Port Radio Control Tower. This is conspicuous in good visibility but would benefit from being painted white or orange to assist identification in conditions of haze which seem to be prevalent.

Just below this tower on the harbour side is a small boat pier for use of Port Authority craft.

The harbour offices themselves are in a large concrete building at the Southern end of the fertilizer quay where Customs, Agents, police, doctor, chandler, etc., reside.

Tugs: Four tugs are available. All ships lines. 2 of 1,200 h.p., 1 of 2,500 h.p. (Tigris) and 1 of 4,500 h.p.

The large tug of 4,500 h.p. painted orange hull is a large coastal tug normally stationed at Ilyichevsk and unsuited for harbour towage duties. All tugs have icebreaking capability.

It is essential that the larger tugs have double lines. They use the lines out of the centre lead bow and stern with the 1,200 h.p. tugs pushing.

Outwards (October 1980) we dispensed with 4,500 h.p. tug's services and used 1,200 h.p. tug to tow us.

1,200 h.p tugs accompany vessel down channel to No. 10 buoy with larger tugs to anchorage area.

Berths: Presently 4 berths in operation, 3 for bulk Urea and packaged goods, with 4 travelling loading gantries (manufactured by PHB of Germany) and liquid ammonia and phosphoric acid berth with minimum depth of 14.9 m. alongside. The fertilizer berths I believe range in depth from 13.5 m. to 16 m.

Gangway can be turned out beforehand.

The ammonia berth is 125 m. long and 43 m. (measured) proud of the main dock face, it leads in a 171° – 351° direction. The other berths are offset and leading in approximate 005° – 185° direction.

The fendering is excellent with long rubber tubes and corners well protected on all berths.

Bollards are plentiful.

Moorings: Ammonia berth 3, 2, 2, each end with bow/stern and breast lines leading to main dock face and springs to 'T' section.

Springs first out and last in.

As usual aft have to compromise. We put breast lines from main deck and springs from aft, both to 'T' section. Mooring boat in attendance, bow first docking and undocking.

Unberthing, vessel pulled laterally clear of berth, about 100 m., by tugs before moving ahead down harbour.

Loading: Ammonia: 2 loading and 1 Vapour Chicksan. Max. rate about 2,000 t.p.h. total (2×1,000 t.p.h.).

No charge for Vapour Return Line (VRL).

Shore personnel connect and disconnect.

Hydraulic couplings.

VRL ships 8 – 12 to shore 12 – 12 150ASA/300ASA.

Liquid shore spools 150ASA/300ASA.

No emergency stop except by watchmen in hut under chicksans, who speaks little to no English. Essential whistle signal agreed.

On visit (Sept./Oct.) 1980 shore tanks were low on product with max. rate at 700 t.p.h. Sometimes down to 200 t.p.h.

Samples frequently taken from cock on chicksan.

Temperature warm at −32° Celcius on all visits. Note protest.

Loading programme to be agreed before commencement.

Surveyor with interpreter, takes about 2 hours for figures. Plant has to be off whilst readings taken.

Acid: Forward (South) of ammonia chicksans – 2 arms.

Shippers: 'Sojuznestrans'.

Statement of fact is compiled by the Master during loading on official form which is an advantage.

Tank atmosphere tested prior to commencement.

No purging or cooling alongside, has to be done at anchor.

Plant: Total storage capacity 100,000 tonnes with about 18 tanks of 5,500 tonnes each. Four tanks can be seen from the ship, the remainder are behind.

The anhydrous ammonia plant was built by the Pullman Kellog company of U.S.A. and fertilizer section by PHB of Germany.

The tank pumps 'Carter' loose suction with 1,000 tonnes heel in tank. Approx. 2,000 tons per day of ammonia is produced at the plant with about 7,000 tons per day being pumped in by pipe-line from the Volga region.

The storage capacity of phosphoric acid was estimated to be 12,000 in 6 tanks just behind the berth.

All prime quality anhydrous ammonia is exported mainly to Italy and U.S.A. with the lower grades being used locally.

Pollution: VERY strict. Be VERY careful.

Scuppers to be plugged. Make sure decks washed down prior to arrival and that no lube oil is washed overside.

Make sure ballast and pumps clean.

Ships not fitted with sanitary tank system must have their toilets locked up and all crew use toilets astern of vessel. The sanitary system is checked.

No pumping of ballast in anchorage or in harbour without Port Authority permission. (A Greek ship was fined for pumping ballast at anchor).

Do not have fire hoses draining overside, we had them draining into ballast tanks.

Be very careful when disconnecting that no hose water drains overside.

Agent: State Agent 'Inflot'. Yuzhnyy office telephone 59-38-75. Yuzhnyy office has been in operation for about a year.

Main office still in Odessa where all telex messages have to pass through.

Office is in port building at end (South) of fertilizer quay. Good English and very co-operative.

Night staff, 2000 hrs. – 0800 hrs., good.

Can be contacted by VHF at anchorage or alongside by Channel 13 to Port Authority who will telephone Inflot and then talk direct on Channel 8.

Also telephone at bottom of gangway with guard but no success. Order money (which all unused must be handed back on departure) 24 hours beforehand. If shorter notice given Agent will give you what he has in office safe.

Accepts Notes of Protest on behalf of receiver.

Cable address 'Inflot Odessa' or 'Inflot Yuzhyy'.

A minimum of 2 days is required for a telephone call to U.K. (Can also apply to parts of Russia, the Agent told me).

Medical: Through Agent.

Every day except Sunday a doctor attends the clinic in the port building, 0900 hrs. to 1300 hrs. We had 1 crew member with a fractured hand who was checked by doctor and taken immediately to Odessa for X-Ray, then brought back to the ship plastered up, all in 3 hours, with full English report.

Outside these hours a nurse is on duty.

Water: Fresh water available from quay. Agent will send waterman. Metered. Ship hoses international connection flange. $0.70 per tonne,.

Chandler: Two. Technical and produce.

Some local produce available, basically vegetables. No salads.

The produce chandler in port building deals in curios, champagne, vodka and caviar, only excepts dollars.

We obtained from Technical chandler a Russian chart of Odessa – 2 days wait.

Suggest any requirements ordered well in advance.

Films: Walport films can be changed with suitable ships in port. Agent very co-operative in this respect, finding out for us if a Greek ship had Walport films which she did and like ourselves wanted a change. Agents and customs officer with one of our seamen changed the boxes – no difficulties encountered.

Fuel: In short supply and long waits. By barge to Odessa waiting anchorage. October 1980 – 3 day wait for diesel at $358 per tonne.

Repairs: Very difficult – see Port developments.

Radar/Wireless: Not sealed or checked. Bridge and radio room not inspected. Radar use seems to depend on Pilot and guards. From anchor to berth we had to turn off radar. On last visit guards made ship turn off before sailing.

This visit no problem, radars tested prior to sailing and left on.

Guards: At bottom of gangway and at bow and stern. One at bottom of gangway takes discharge book when person steps ashore, even for draft.

There is a tug anchored off vessel at all times but this is for fire duties.

Formalities: Very good and quick, as long as procedure followed. Everyone has to muster in front of Immigration Officer on arrival and departure, and is checked against discharge book.

Required:
1 Copy Personal Effects Declaration Form (very strict on this, require all jewellery to be declared).
1 Copy Currency List – crew. (Again very strict and check up frequently in port on amount drawn by individuals).
2 Copies Health Form.
2 Copies Vaccination List.
5 Copies Crew List.
5 Copies General Declaration (IMCO Standard form).
2 Copies List of Drugs in Master's care.
1 Copy Clean Ballast Declaration and request to pump in port.
3 Copies Loading Instructions.
2 Copies Cargo Requirements.
1 Copy Statement to Port Captain, all Safety Equipment in good order.
1 Copy Statement of type of Sanitary System and in use.
No Stores List required.
Bond not sealed.

Port Captain boards vessel soon after arrival and fills in long safety questionaire with Master. If certificates dates in doubt will want to sight.

Agent says Port Captain will allow ship to sail with Safety Certificate up to 2 days before expiry with clearance for Bosphorus.

Allow 2 hours for papers before cargo commences and after completion.

Seamen's Facilities: A seamen's club has been established just outside main gate. Roubles only taken.

Bus service to Odessa every hour, takes about 45 minutes at about $2 in roubles. A free bus goes at end of shift from port building, takes longer as it goes round housing estates.

Curfew, except for Master, at 2400 hrs.

Port Developments: Container berth under construction East side of harbour. Dredging under way astern of ammonia berth to extend channel.

Very large bulk complex for coal and ore envisaged during next 10 years.

A repair facility is in the planning stage for the North end of the harbour with a floating dock up to 100,000 tonnes.

Two floating cranes presently being used for construction work of 11/25 tonnes (2 hooks) and 19 tonnes will be available for general lifts.

The channel depth is planned for an increase to 18 m. with width being widened to 150 m. in stages over 6 years.

ZHDANOV: 47.03 N. 37.31 E. (See Plan Book)

GENERAL: A sea port of Azov port, Zhdanov is situated 14 miles Northward of the entry into the Taganrog Gulf, at the Western end of it and at the mouth of the Kalmius River.

All-year round navigation is possible but during 30 – 90 days period of ice conditions with ice-breaker assistance for ice-strengthened vessels only.

Ice usually begins to form at the end of November or the beginning of December, and 3 – 4 weeks later the Gulf becomes completely frozen over. The increase of fast ice usually lasts up to the first half of February. As a rule the ice usually breaks up in the middle of March. It finally disappears at the end of March or, as an exception, in the first half of April.

The port of Zhdanov consists of the Outer and Inner Roads, the Ugolnaya (or the Coal) Harbour, the Grain Harbour, the Ship-repairing Basin, the Schmidt Harbour at the mouth of the Kalmius River, and the port of Azovstal situated Eastward of the mouth of the river.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. Inform Kerch Harbour Master ETA 24 and 6 hours, off Kerch Strait. On arrival Kerch Pilot Buoy No. 75 (Lat. 45° 13′ 37″ N. Long. 36° 27′ 45″ E.), drop anchor and await Pilot; also keep continuous radio watch.

Not later than 4 hours prior to arrival at the mouth of the Coal Harbour approach channel, Buoy No. 16, a Master should order a Harbour Pilot.

ANCHORAGE: A good anchorage can be obtained in the Outer Roads of the port of Zhdanov situated opposite the port entrance. The depths in the roads are from 5 m. – 7 m. the holding ground is mud mixed with sand and shell.

RESTRICTIONS: Vessels can enter or leave the port at any time of day and night. All vessels entering or leaving the port should have keel clearance not less than 0.5 ft. (15 cm).

The max. allowed speed in the approach channels is 4.5 knots and in the part of the Coal Harbour approach channel, protected by a wooden dam, only 3 knots.

The speed of a vessel may be increased in case of necessity to keep her course along the leading line or prevent her drifting off the channel due to the effect of current or wind.

MAX. SIZE: Draft 8 m., length/breadth no restrictions.

HEALTH: After presenting Vaccination Certificates free pratique obtained. After proceeding from one port of U.S.S.R. to another free pratique obtained automatically.

RADAR: The port of Zhdanov radar station gives all possible information to any vessel navigating along the Coal Harbour approach channels in the restricted visibility and during the absence of the floating navigation marks.

Radar navigation is controlled by a Pilot in charge.

Storm signals are exhibited at a signal mast located at the Dividing Pier.

RADIO: Vessels approaching the port of Zhdanov should establish radio contact through Zhdanov Radio port radio station operating 24 hours daily on the following frequencies:

Call sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time of work*
UDC	500	500	A1	H24
UBN	12732	12550.5	A1	HX
	17085	16734		
	22365.5	22247.5		
UBN	8620	8363	A1	H24
"Zhdanov-Radio"	2182	2182	A3	H24
"Port-Control"	156.8*	156.8*	F3	H24
"Port-Nadzor"	156.8*	156.8*	F3	HX

*Frequencies are given in mHz.

TUGS: Available. Use ship's lines. Tug assistance for shifting berths is compulsory. Number of tugs to be ordered shall be advised by Pilot.

BERTHING: The berths of the port with depths of up to 8.5 m. are equipped to handle general, containers, bulk and liquid cargoes, timber, metals, food stuff, fruit, vegetables, etc., and passenger shipping as well. There are enclosed warehouses, open concrete floor sheds and a grain elevator.

On the quays there are electric cranes of up to 15 tons capacity, coal and grain loaders. There are floating cranes with lifting capacity of up to 100 tons and other cargo handling equipment.

The Grain Harbour is bounded by two piers – by the Dividing Pier from S.W. and by the Eastern Pier from N.E.

It is protected from S.E. winds by the Inner Roads Breakwater. There are numerous piles and dolphins along the Eastern Pier. The depths in the central part of the Grain Harbour are from 8.7 m. to 9.1 m.

The Schmidt Harbour is situated at the right bank of the mouth of the Kalmius River, at the S.E. outskirts of the town of Zhdanov. It is used by small vessels. The access to the Schmidt Harbour is by an approach channel dredged in the coastal shoal water. Navigation along the channel is ensured by leading lights.

Storm signals are shown at the station situated Southward of the entry to the Schmidt Harbour.

When proceeding to the Inner Roads through the shoal water vessels should use approaching channels leading to the Coal Harbour and the Avant-port.

The Coal Harbour approach channel is the main fairway for entry to the port of Zhdanov. It passes through a coastal shoal then enters the Southern part of the Coal Harbour.

Navigation along the Avant-port and the Coal Harbour approach channels is also ensured by leading lights, light buoys and spar buoys.

The access to the port of Azovstal is by a channel branching off N.E. of the Coal Harbour approach channel.

MEDICAL: Masters to advise by radio prior arrival of medical attendance required on board. Hospital facilities available. Vaccination Certificates to be presented.

DENSITY: About 1005.

WEATHER: The changes in the water level is mainly caused by effects of the wind observed here all the year round. The fall of the water level is usually caused by Northerly and N.E'ly winds but rises of the water level are due to S.W'ly winds.

The range of the water level observed in the Gulf is about 1 m.

Changes of the water level can also be caused by variation in the atmospheric pressure, so called "Seish" effect. The "Seish" usually starts during calm weather and can last, on average, for about 24 hours.

The maximum range of the water level due to the "Seish" effect observed in August is about 0.6 m.

FRESH WATER: Delivered at berth. Also delivered by lighters.

FUEL: Delivered by lighters.

OPENING/CLOSING HATCHES: Crew allowed open and close, stevedores placing beams.

CERTIFICATES: Registered Tonnage Certificates required.

CUSTOMS ALLOWANCE: No quantity restrictions. Nothing to be taken ashore.

IDENTIFICATION CARDS: Not required.

CONSULS: None.

REPAIRS: The ship-repairing Basin is situated in the Northern part of the Inner Roads. It is bounded on the S.W. by the Eastern Pier and on the East by the Eastern Dam. The entrance to the Basin is situated between the heads of the Eastern Pier and the Eastern Dam. The depths in the Basin are from 6.1 m. to 6.5 m.

All kinds of repairs for vessels of up to 9,000 tons d.w.t. can be carried out.

DRY DOCKS: 2,500 and 5,000 tons.

REPATRIATION: All facilities for repatriation subject to visa formalities.

AIRPORT: 15 km. from port with regular airlines.

TIME: Local time GMT plus 3 hours (All year round).

HOLIDAYS: 1st January; 1st, 2nd, 9th May; 7th October; 7th, 8th November.

AMBULANCE/FIRE: Ambulance 003; Fire 01.

TELEPHONES: Can be placed on board.

AUTHORITY: The Port of Zhdanov Authority.

AGENTS: Zhdanov Main Maritime Agency "Inflot", 89 Admiral Lunin Prospect, 341010, Zhdanov, Donetsk Region, U.S.S.R. Tel. 5-10-34, 5-81-98. Cables: Inflot Zhdanov. Telex: 115124.

United Arab Emirates

ABU AL BU KHOOSH: 25.26 N. 53.08 E.

(See Plan Book)

OPERATORS: Total ABK – Abu Dhabi. Telex AH 22347.

Total ABK do not act as Agents. Vessels must have an Agent in Abu Dhabi in case of injuries or illness.

LOCATION: The terminal is bounded by the following co-ordinates South of Sassan Oil Field.

(a) 25° 31′ N. 53° 05′ E.
(b) 25° 29′ N. 53° 12′ E.
(c) 25° 26′ N. 53° 05′ E.
(d) 25° 26′ N. 53° 12′ E.

Anchoring is prohibited within this area.

DOCUMENTS:

Early departure procedure: At the Master's option, he may, in order to expedite the turn-round of vessels and avoid undue delays caused by weather or other circumstances, use the early departure procedure. In this case Masters are requested to sign blank cargo documents.

Normally completed cargo documents required by the Master will be placed on board prior to sailing. If this is not possible without incurring delays of undue nature, the relevant documents will be airmailed to the Master to await the vessel's arrival at discharge port.

The official cargo, quantity loaded, will be transmitted by radio whilst unmooring. In the event of a dispute, the receipt of a letter of protest will be acknowledged by the Mooring Master.

Any protests by the Master concerning the quality of cargo should be made before departure and any resulting investigation should be made before the vessel sails.

Outward clearance: A tanker will be considered clear to depart Total ABK Terminal when the crude oil loading documents have been delivered to the Master, or in the case of E.D.P., clearance will be given through the Mooring Master.

Mail: Official ship's mail and the crew's personal mail will be handled by Total ABK and shipowner's debited accordingly.

PILOTAGE: Compulsory within the Terminal limits. Vessels to be moored at Total ABK Terminal will be boarded by a Total ABK Mooring Master in the anchorage area. The Mooring Master will advise the ship's Master on approaches to the storage tanker, mooring and unmooring, connecting and disconnecting hoses and all other operations within the Terminal area including all manoeuvring of the vessel. A qualified deck officer must be on watch at all times while the vessel is alongside the storage tanker.

ANCHORAGE: An area immediately South of Terminal limits is designated as the Anchorage Area, centred on position: 25° 26′ N., 53° 08′ E. This co-ordinate represents the centre of a circle with a radius of 0.5 mile which must be used by vessels requiring to wait at anchor. Anchoring within the Terminal limits is strictly prohibited.

NAVIGATION AIDS: The S.P.M. is fitted with a white light flashing the morse letter "U" every 30 seconds visible for a distance of 5 miles.

Two new platforms are installed:

"AK 41" : 25° 29′ 10″ N., 53° 05′ 50″ E.
"AK 51" : 25° 29′ 10″ N., 53° 08′ 50″ E., without lights at present.

The platform "AK W" 25° 30′ 02″ N., 53° 07′ 40″ E., shows letter "U" every 30 seconds.

The platform "AK 31" 25° 30′ 16″ N., 53° 06′ 55″ E., shows no lights.

MAX. SIZE: Max. 270,000 d.w.t. Depth of water 29 m.

RADIO: Initial communication between vessels and Total ABK should be via Bahrain Radio (call sign GOU) which operates on a 24-hour basis. ETA in GMT to be sent 72, 48 and 24 hours prior arrival, through Bahrain Radio.

Communications within 60 miles of Terminal: Once ships are within 60 miles of ABK Terminal, communication may be established by radio telephone on International Marine VHF Channel 8. This frequency is monitored continuously.

Once contact has been made on Channel 8, further conversation should be conducted on either Channel 14 (156.7 mc/s), Channel 12 (156.60 mc/s) or Channel 15 or 17.

Communications after Total ABK Mooring Master has boarded: A Total ABK Mooring Master will board incoming tankers in the anchorage area and will bring with him portable VHF radio telephone units. From that time onwards, all and any communications between ship and the storage vessel will be conducted by the Mooring Master.

Radio transmissions for advice of tanker arrivals: Telegram to be sent by the storage tanker to the export tanker about 80 hours before her arrival:

Please advise your ETA in GMT 72, 48 and 24 hours before arrival to Total ABK Abu Dhabi, Telex AH 22347, via Bahrain Radio stop Cargo requirements stop Deballasting time if any stop Maximum loading rate acceptable stop Distance in metres from bow to manifold stop Flange dimensions of vessel's manifold connection stop 50 miles before arrival please contact terminal by VHF Channel 8 to receive berthing instructions stop Total ABK.

Mooring instructions: If vessels are obliged or instructed to anchor, they should do so in the recommended area about 3 nautical miles from the storage vessel.

TUGS: Two tugs, each with 100 tons bollard pull are employed by the export tanker when berthing alongside the storage tanker.

READINESS: After arrival at the anchorage area and when the tanker is ready in every respect to load, the Master may tender his notice of readiness.

Notices of readiness will be accepted provided one or other of the following events shall have transpired: (a) the Master shall have received the Mooring Master on board, or (b) the Master shall have dropped anchor in the anchorage area.

Port closed: Notices of readiness will not be accepted during periods when the port is closed. The port is closed when the weather is such that it is too rough for incoming tankers to berth. The decision regarding the opening and closing of the port will rest with the ABK Terminal Superintendent or his deputy.

MOORING: Weather permitting, Total Abu Al Bu Khoosh Terminal operates only from sunrise to sunset, 7 days a week. Vessels moor port side to the storage tanker "Jaranda" equipped with 5 Yokohama fenders on her starboard side, which is moored to the S.P.M. Launch may assist in berthing vessels under the direct control and supervision of the Mooring Master.

Preparation for mooring: Vessels are requested to have, on their starboard side, a pilot ladder and/or pilot hoist or accommodation ladder safely and securely rigged for immediate use and long enough to reach the Mooring Master's launch. Vessels will provide a lee for the Mooring Master on the starboard side both when boarding and leaving.

For vessels with a freeboard of 30 ft. or more, the accommodation ladder shall be rigged out, lowered down so the platform is not more than 10 ft. from the water level and a short pilot ladder, rigged to cover the access to the platform. Tankers are requested to have ready on the forecastle, 2 head lines, polypropylene if possible.

Tankers are requested to have ready on the port side amidships a derrick rigged and ready to pick up the hoses (16 in. diameter).

Hoses: The hoses are hoisted by flow boom system, connection by storage tanker crew. The Mooring Master will advise the ship's officer in charge concerning lifting techniques.

LOADING: All communications relative to the loading of the vessel shall be routed through the Mooring Master who will remain in contact with the storage tanker constantly via portable VHF units. In case of temporary breakdown of the portable VHF circuit, contact may be continued on International Marine Channels 15 or 17.

Failure of communications: Should all communications with the storage tanker fail, loading will cease immediately.

Emergency shut down: An emergency cessation of loading may be effected by use of the ship's VHF Channel 16.

Loading rates: Maximum loading rate will be 9,000 m.t.p.h.

Gases: ABK crude oil contains H_2S (sulphurated hydrogen). This gas quickly deadens the sense of smell so that a dangerous concentration cannot be detected by odour. During loading, gas should be vented off through the tanker's normal venting system. Personnel engaged in ullaging tanks should keep to windward and avoid breathing fumes as much as possible. Resuscitators, breathing apparatus and life-lines should be readily available.

Valve closure against high-speed loading: No valve which will stop or seriously impair or reduce the flow rate of oil from the storage tanker are to be operated without prior agreement with the Mooring Master. The practice of throttling back on the ship's cargo valves is to be avoided. If a lower rate is required, the storage tanker is to be advised and the pumping rate will be reduced to the required level. The Master will be held liable for any damage arising from the sudden cessation of flow caused by default of the ship. It cannot be over emphasised that to do so can be extremely dangerous and cause extensive damage to equipment.

BALLAST: Due to the exposed location of the crude oil loading berth, vessels are required to carry sufficient ballast for safe handling, having due regard to existing weather and sea conditions. A vessel found by the Mooring Master to be not adequately ballasted will be rejected.

Clean ballast: As there are no ballast discharging facilities, vessels must arrive at the Terminal with clean ballast, ensuring that all pipelines, pumps and strainers have been flushed out prior to arriving. The Mooring Master will inspect ship's ballast on boarding and has the power to reject any vessel that he thinks would cause pollution of the sea area, in which case vessel must proceed to sea and return only when ballast is completely free of oil. Any vessel rejected because of dirty ballast will automatically nullify its Notice of Readiness and will lose any priority of position for loading. Ballast discharge should not be commenced without the prior agreement of the Mooring Master.

Inspection during loading: At night the sea around the vessel shall be adequately lit, as frequent inspection by the Mooring Master will be made during the discharge of ballast. Any pollution whatsoever will be cause for rejection. Similarly, any hull leaks causing pollution during loading will be cause for rejection and the vessel will not be re-accepted unless satisfactory evidence of repairs has been certified by a qualified surveyor.

MEDICAL: Medical and dental services are not available at the Terminal. In emergencies requiring hospitalisation, the patient will be hoisted to the helideck on the storage tanker and flown by helicopter to Dubai or Abu Dhabi.

FRESH WATER, FUEL, ETC.: Bunkers, fresh water, stores, boats for hire, repair facilities, facilities for changing ship's crew are not available at the Terminal.

SHORE LEAVE: Not possible.

GENERAL:

Radio equipment: Radio, radar or other electric equipment must not be energised while the vessel is alongside the SPM except VHF radios, telephone and communications equipment approved by the Terminal.

Repairs: While berthed at the Terminal, the ship's boilers, main engine, steering machinery and other equipment essential for manoeuvring shall be maintained in a condition to permit the ship to move away from storage vessel at short notice. Repairs or other work which may immobilise the ship should not be undertaken without prior arrangement with the Terminal.

Port Charges: Every vessel loading in the Abu Dhabi areas has to pay Abu Dhabi Government Port Dues. These are calculated according to Abu Dhabi Law.

SHIPMASTER'S REPORT: 1977: The following information may be of value to other Masters:

a. The holding ground in the anchorage is very bad, this vessel dragged her anchor (10 shackles out) in a Force 5 from the N.W.
b. Only documents supplied on departure were Bills of Lading, *no* port clearance documents supplied.

c. No Customs or Immigration Officials at terminal therefore no documents required.
d. Storage tanker holds 220,000 metric tons. She loads at a rate of 11,000 tons per day from the SPM.

SHIPMASTER'S REPORT: 1978: The storage tanker is about 800 ft. long (244 m.). On this vessel the centre of the manifold was 129.6 m. from the bow. We berthed with our bows level which meant our stern overhung the other vessel and we were not able to use our first ropes ashore leading from the after end of the poop.

Forward: (SV=Storage Vessel). 2 headlines to SV. 1 spring to SV. 1 rope from SV with end to be turned up on own vessel's bits forecastle head. 2 more headlines to SV and 1 spring from SV.

Aft: 2 sternlines to SV. 1 backspring to SV. 1 backspring from SV, eye on bitts. 2 more stern lines to SV.

AGENT: National Shipping, Gulf Agency Co. (Abu Dhabi) Ltd. P.O.B. 377, Abu Dhabi, U.A.E. Cables: "Confidence", Abu Dhabi. Tel. 334300 (10 lines). After office hours Tel. 362820, 366665, 341728, 362942. Radio: Marine VHF radio, stand-by on Channel 16 (156.8 mHz) and Marine HF, standing by on 3539 kc/s. Call sign "Confidence, Abu Dhabi". Telex 22248 ("GACAUH EM").

ARZANAH ISLAND: 24.47 N. 52.33 E.
SBM: 24.46 N. 52.31 E. (See Plan Book)

PORT LIMITS: *Port Area:* Contained within the following co-ordinates:

"A"	Latitude 24° 50′ 12″ North,	Longitude 52° 29′ 24″ East
"B"	Latitude 24° 50′ 12″ North,	Longitude 52° 37′ 12″ East
"C"	Latitude 24° 43′ 48″ North,	Longitude 52° 37′ 12″ East
"D"	Latitude 24° 36′ 48″ North,	Longitude 52° 34′ 36″ East
"E"	Latitude 24° 37′ 00″ North,	Longitude 52° 29′ 24″ East

LOCATION:
Port Area and Terminal: Arzanah Island is located at Latitude 24° 47′ North, Longitude 52° 33′ East and is the base for export of crude oil by the Company. The Port of Arzanah is the area defined above.

A tanker terminal and another berth on Arzanah Island, for vessels destined to other than the tanker terminal, are located within the port area.

PILOTAGE: Conduct and movement of vessels within the port area are controlled by the Harbour Master. A Company designated Mooring Master is required for the berthing and unberthing of vessels at the Storage Tanker.

Mooring Master: Pilotage is compulsory within the "Port Area" and no vessel may enter or depart the port area, berth or unberth at the Storage Tanker or conduct any other manoeuvres of the vessel without prior notification to the Harbour Master and without the assistance of a Company designated Mooring Master unless otherwise ordered by the Harbour Master. The Company designated Mooring Master for vessels bound for the Storage Tanker will board the vessel at Khor Fakkan (Latitude 25° 22′ North, Longitude 56° 22′ East). The Company designated Mooring Master for vessels bound for the Shore Berth will board the vessel at Khor Fakkan or such other location approved by the Harbour Master upon request of the vessel made in the first notification. (See "Radio").

The Mooring Master's function will be to advise the Master of the vessel for the above stated purposes. The Master of the vessel always remains responsible on behalf of the vessel's owner for the safety and proper navigation of the vessel. The vessel must remain at Khor Fakkan or such other location approved by the Harbour Master until the Mooring Master is aboard.

ANCHORAGE: Anchoring of vessels is prohibited within the port area and terminal area. An area 3.5 miles West of the Storage Tanker in the vicinity of latitude 24° 46′ North, longitude 52° 27′ East is designated as the anchorage area.

RESTRICTIONS: See "Berthing".

MAX. SIZE: *Sailing Draft:* The draft of loaded vessels leaving the Storage Tanker is controlled by the water depth between Dalma Light Float and the No. 1 buoy in the outer channel. Minimum under keel clearances recommended by the Mooring Master are as follows:

D.w.t.	*Minimum Keel Clearance*
Up to 100,000	3 ft.
100,000 to 220,000	4 ft.
220,000 and over	5 ft.

Sailing drafts should always be agreed upon with the Mooring Master prior to starting to load.

RADIO: The Company cable address is "Amerhess – Abu Dhabi" and telex number is 949 – 22275. The Company also maintains radio watch on International Marine VHF Channels 16, 23, 81 and 82.

Notice of Arrival:

A. Vessels bound for the *STORAGE TANKER* must advise the Company as follows:

72 HOURS: Not less than 72 hours prior to arrival at Khor Fakkan vessels will send a cable or telex to the Company and cable to "Lamnalco Khor Fakkan" or telex to "Lamnalco" (telex number 89034 Pilotkf) providing the following information:
(a) Estimated time of arrival at Khor Fakkan.
(b) Estimated fore and aft draft upon arrival at the port area.
(c) Quantity of oil to be loaded.
(d) Distance from the bow to the cargo manifolds.
(e) Size, number and type of cargo connections.

48 HOURS: Not less than 48 hours prior to arrival at Khor Fakkan vessels will send a cable or telex to the Company and to Lamnalco reconfirming or giving any changes in the 72 hour notice.

24 HOURS: Not less than 24 hours prior to arrival at Khor Fakkan vessels will send a cable or telex to the Company and a cable or telex to Lamnalco reconfirming or giving any changes in the 24 hour notice. The 24 hour notice must be as accurate as possible and thereafter should there be any change in the ETA by more than 2 hours notice of such change must be given promptly to the Company and Lamnalco.

Nor less than 24 hours prior to the vessel's ETA at Khor Fakkan the vessel must maintain a radio watch on R/T frequency 2182 and at least 12 hours prior to arrival at Khor Fakkan must maintain a radio watch on VHF Channel 16.

Other frequencies available are:
HF: 2638, 2738, 3270, 3710, 4136.3
VHF: Channels 1 to 28 – 60 to 74 and 77 to 88
Call sign for Lamnalco base is "Gulf Pilot Khor Fakkan".

B. Vessels bound for the *SHORE BERTH* must advise the Company as follows:

48 HOURS: Not less than 48 hours prior to arrival at Khor Fakkan or such other location at which permission is requested of the Harbour Master for the Mooring Master to be on board, vessels will send a cable or telex to the Company and a cable to "Lamnalco Khor Fakkan" or telex to Lamnalco (telex number 89034 Pilotkf), providing the following information:
(a) Estimated time of arrival at Khor Fakkan or such other location where it is requested the Mooring Master board.
(b) Estimated fore and aft draft upon arrival at the port area.
(c) Cargo to be loaded or unloaded.
(d) Request for permission for Mooring Master to board at other than Khor Fakkan (if applicable).

24 HOURS: Not less than 24 hours prior to arrival at Khor Fakkan vessels or such other approved location, vessels will send a cable or telex to the Company and a cable or telex to Lamnalco reconfirming or giving any changes in the 48 hour notice. The 24 hour notice must be as accurate as possible and thereafter should there be any change in the ETA by more than 2 hours, notice of such change must be given promptly to the Company and Lamnalco.

Not less than 24 hours prior to the vessel's ETA at Khor Fakkan the vessel must maintain a radio watch on R/T frequency 2182 and at least 12 hours prior to arrival at Khor Fakkan must maintain a radio watch on VHF Channel 16.
Other frequencies available are:
HF: 2638, 2738, 3270, 3710, 4136.3.
VHF: Channels 1 to 28 – 60 to 74 and 77 to 88.
Call sign for Lamnalco base is "Gulf Pilot Khor Fakkan".

TUGS: *Tugs and Launches:* The Company will have available a tug for berthing or unberthing and standing by a vessel at the Storage Tanker as may be required by the Master of the vessel or the Mooring Master for which a charge will be made by the Company, whether or not used. Should the Master of a vessel require more than 1 tug for the above purposes such must be separately arranged by the Master sufficiently in advance of the vessel's arrival at the port area to avoid delay in the berthing or unberthing of the vessel and any delay occasioned thereby will be charged to the vessel.

A line handling boat under the direct control and supervision of the Mooring Master will assist in berthing or unberthing of vessels.

BERTHS: The tanker terminal in the port area consists of the VLCC "Tropical Lion" ("Storage Tanker") connected to a single buoy mooring system located at Latitude 24° 46′ North, Longitude 52° 31′ East, 1.25 miles West of Arzanah Island.

The berth at Arzanah Island ("Shore Berth") consists of a 700 ft. long earth filled pier with facilities required to load and unload diesel oil and desalinated water. Fire protection facilities on the pier include a firewater line and firewater monitors.

BERTHING:
Berthing–Unberthing: Berthing will normally take place only during daylight hours, weather permitting. Unberthing will take place at anytime (day or night), weather permitting. Manoeuvring power must be available on the main engine during berthing and unberthing operations. Mooring Masters will not berth vessels if not properly equipped with satisfactory mooring lines, or if deck equipment is inoperable or if steering gear, telegraphs or whistles are not in efficient condition or if insufficiently or improperly ballasted in the opinion of the Mooring Master. The vessel's Master is required to advise the Mooring Master if any such defects exist or any peculiarities of the vessel. The vessel will be responsible for the handling of lines and the connection and disconnection of the loading arms with the vessel's crew.

Mooring: Mooring arrangements shall be to the satisfaction of the Mooring Master. Vessels must at all times remain properly secured alongside the Storage Tanker or the Shore Berth. Moorings must at all times be attended by the vessel's crew, avoiding slack lines or varying tensions on the lines. The use of constant tension winches for automatic self-tensioning to attend mooring lines is prohibited. The Harbour Master may suspend loading or unloading should there be any failure by the vessel's crew to attend mooring lines as above stated.

Ballast Drafts: Vessels destined for the Storage Tanker should arrive with propeller completely submerged and 8 ft. to 10 ft. trim by the stern. The Mooring Master may refuse to permit berthing of vessels not in compliance with this requirement until the vessel takes on sufficient ballast or changes ballast to meet the requirement.

BALLAST: There are no facilities available for the off-loading of dirty ballast. Only clean or segregated ballast will be permitted to be discharged overboard. The vessel must keep a constant watch on the side of the vessel from which ballast is being discharged while clean or segregated ballast is being discharged overboard. Discharge of ballast must be immediately suspended should there be any indication of discoloration or sheen and immediately reported to the Harbour Master. An investigation shall be carried out by the vessel and the findings immediately reported to the Harbour Master. Deballasting shall not recommence without the permission of the Harbour Master.

LOADING: *Crude Oil Cargo Loading:* Loading operations cannot commence until permission has been granted by the Harbour Master. All operations after such permission is granted in connection with the starting of loading, switching of tanks and topping off on the vessel will be the responsibility of the vessel. At all times while the vessel is alongside the Storage Tanker there shall be a responsible licensed deck officer of the vessel on deck in charge of all operations on deck.

Prior to loading a pre-transfer conference will be conducted by the Harbour Master and a responsible deck officer of the vessel who will be in charge of the loading of the vessel. The purpose of the pre-transfer conference is to formulate a transfer plan and ensure that the Storage Tanker and the vessel are ready for safe loading and handling of the cargo.

The Harbour Master may suspend cargo operations if any of the applicable laws and safety regulations set forth herein are not complied with, the pre-transfer plan is not complied with or if the Harbour Master believes or becomes aware of the existence of any other danger which in his opinion requires suspension of loading.

The vessel's crew will be responsible for handling the loading arms on board the vessel, furnishing and making adaptor connections, removing blind flanges and guiding the loading arms (Chiksans) to the appropriate manifold connections. As a convenience to the vessel the Harbour Master will furnish advice and guidance in connecting the loading arms to the ship's manifolds.

Crude Oil Cargo: The crude oil to be loaded contains hydrogen sulphide. Breathing the vapours vented from this cargo could be hazardous. Vessel's crew should review the instructions issued by the vessel's Owner regarding this subject. The Company assumes no liability, with respect to loading crude oil bearing hydrogen sulphide.

General Cargo Loading–Unloading: Loading or unloading operations cannot commence until permission has been granted by the Harbour Master. All operations after such permission is granted in connection with the loading and unloading of the vessel will be the responsibility of the vessel. At all times while the vessel is alongside the Shore Berth there shall be a responsible licensed deck officer of the vessel on deck in charge of all operations on deck.

The Harbour Master may suspend cargo operations if any of the applicable laws and safety regulations are not complied with or if the Harbour Master believes or becomes aware of the existence of any other danger which in his opinion requires suspension of loading.

POLLUTION: The Petroleum Ports Law prohibits the discharge into the water of oily water, garbage, waste or other objectionable materials. The Petroleum Ports Law also requires immediate reporting to the Harbour Master of any leakage or spillage by the vessel. The Law is strictly enforced and violators may be subject to fine and imprisonment.

The vessel's Master is responsible that no oil is pumped or spilled overboard from his vessel in the vicinity of the Port Area. In the event of any spillage or loss of oil from the vessel as the result of any act or omission of the vessel, such as, but not limited to, the pumping of oily water overside from ballast or bilges, or oil spilt during loading. The vessel shall be responsible for all costs and expenses of clean up, and for any damages to property or injury to persons resulting from such spillage or oil loss.

The Company reserves the right to take all reasonable measures to clean up any resulting pollution or contamination on land or sea, but only as a contractor acting on behalf of the vessel or its owner, and will charge the vessel for all costs and expenses incurred thereby.

SAFETY REGULATIONS:

Safety: The Petroleum Ports Law, recommendations contained in the I.C.S. International Safety Guide for Oil Tankers and Terminals covering the loading and discharging of tankers and the safety regulations set forth herein will be strictly enforced while the vessel is in the Port area.

Smoking: Smoking is strictly prohibited on the vessel or the Storage Tanker and Shore Berth except in places specified by the Master which shall not be outside of any of the accommodation areas. The Master is responsible for ensuring that all on board are informed of the selected areas for smoking and for posting suitable notices. Matches and lighters for personal use shall not be carried while outside designated smoking areas and personnel shall be so instructed.

Fire Fighting Equipment: The vessel's fire fighting equipment must be ready for instant use while the vessel is moored. Fire hoses of sufficient length to reach all parts of the vessel must be strung out and connected to hydrants. If the vessel's fire fighting equipment is rendered inoperative for any reason this must be reported to the Harbour Master immediately.

Fires: The only open flames allowed while the vessel is moored at the Storage Tanker or the Shore Berth are those in the vessel's boilers and galley equipment. All other open flames are prohibited. Sufficient fire extinguishers must always be provided near the galley.

Engine Room/Boiler Room Precautions:

a) Combustion equipment – burners, tubes, uptakes, exhaust manifolds, and spark arresters shall be maintained in good working order and kept clean.
b) Blowing tubes – funnel uptakes and boiler tubes will not be blown while a vessel is moored at the Storage Tanker.
c) Cleaning solvents – highly volatile cleaning solvents shall not be used in the engine room for any purpose whatsoever.

Doors, Ports: All doors and ports opening onto decks must be kept closed while the vessel is moored. Any doors open for access other than the pumproom doors must be closed immediately after use.

Cargo Tank Openings: All cargo tank hatch covers and ullage port covers are to be kept closed. If tanks must be hand sampled or ullaged the ullage openings must be kept closed except while sampling or ullaging cargo.

Sea Valves: All sea and overboard discharge valves are to be closed and sealed shut prior to the start of any cargo loading operation.

Inerting Tanker Cargo Tanks: All empty cargo tanks or tanks carrying cargo must be over pressured and fully inerted with gas having an oxygen content of less than 8% prior to the commencement of loading. The oxygen content of the tank blanket will be checked throughout the loading and loading will be stopped anytime the oxygen level rises above 8%.

Insurance (Towing) Wires: Towing wires of at least 50 m. long are to be secured to mooring fittings and run out at the bow and stern on the vessel's outboard side and held in place on short stoppers with the eye about 1.5 m. above the water so they are readily available to a tug in an emergency.

Bonding Cable: The bonding cable from the Storage Tanker or the Shore Berth must be attached to the vessel before the loading arms are connected and removed only after the loading arms are disconnected from the vessel.

Electrical Storms: All cargo or ballasting operations shall be suspended during electrical storms in the vicinity of the vessel.

Engine Status: The vessel's main engine, steering machinery and other essential manoeuvring equipment must be kept in readiness at all times to permit the vessel to unberth on short notice. No engine or propulsion machinery repairs may be carried out while the vessel is moored alongside the Storage Tanker. At all times while the vessel is alongside the Storage Tanker there shall be a responsible licensed engineer of the vessel on duty in charge of all operations in the engine room.

Radio–Radar: The vessel's main radio and radar equipment and radar set must not be energised while the vessel is handling cargo or ballast alongside the Storage Tanker or the Shore Berth. The use of intrinsically safe VHF radios for cargo handling and safety operations is permitted.

Scuppers and Drains: All main deck scuppers must be sealed shut and adequate drip pans provided where necessary on deck prior to the start of any cargo operations.

Tug and Small Craft: No tug or small craft are permitted to be alongside the vessel during cargo or ballasting operations without the express permission of the Harbour Master.

Portable Lamps Electrical Equipment: The use of portable lamps, naked lights or electrical equipment on extension cords is prohibited. Only approved intrinsically safe self-contained flash lights are permitted on deck.

Communications and Deck Watch: A deck watch under the direction of a responsible deck officer equipped with a VHF radio is to be on duty at the cargo manifold of the vessel at all times during the cargo and deballasting operations.

Fire and Emergency Signal: In case of fire or emergency on the Storage Tanker or the Shore Berth or the vessel, the vessel shall immediately suspend all cargo operations and blow a series of short, rapid blasts on the ship's whistle until aid arrives.

Rat Guards: Rat guards are required only if a vessel is coming from a plague infected area.

Safety Check List: A safety check list shall be completed and signed by the Master or Senior Deck Officer on duty on both the vessel and the Storage Tanker or the Shore Berth before deballasting and starting the transfer of cargo.

Responsibility for Safe Operations: While a vessel is berthed at the Storage Tanker the Master will ensure and be responsible for adherence to all safety regulations generally followed in the Marine Industry as well as those contained herein. It is the responsibility of the Master to maintain safe and efficient conditions aboard his vessel and to ensure that there is at all times on duty an adequate and proper crew under the supervision of licensed officers for the safe and effective operation of the vessel and compliance with these instructions and regulations.

FACILITIES: There are no facilities at Arzanah Island or the Storage Tanker for receiving or storing supplies for vessels, bunker or fresh water supply, launch service, etc., excepting vessels servicing the Company's operations in the port area.

TIME: GMT plus 4 hours.

GENERAL: *Regulations:* Shipping operations at Arzanah are governed by the Abu Dhabi Petroleum Ports Law No. 12 of 1973 (Petroleum Ports Law).

Agency: The Company does not provide any ship agency services and there are no ship agencies within the port area. Such services must be separately arranged for by the vessel.

AUTHORITY: Amerada Hess Oil Corporation of Abu Dhabi.

AGENT: See "Mina Zayed".

DAS ISLAND: Abu Dhabi, 25.09 N. 52.52 E.

(See Plan Book)

Conduct and movement of vessels within the port are controlled by the Harbour Master (Abu Dhabi Petroleum Ports Law No. 12 of 1973).

DESCRIPTION: Das Island lies some 100 miles N.W. of Abu Dhabi City, in the State of Abu Dhabi, largest of the United Arab Emirates. The island is the base for the export of crude oil by Abu Dhabi Marine Operating Company (ADMA-OPCO), and liquefied gas and by-products by Abu Dhabi Gas Liquefaction Company Ltd (ADGLC).

DOCUMENTS:

Bills of Health for Ports visited on voyage.
2 Crew Lists.
3 Manifests (1 original and 2 copies).
1 International Maritime Declaration of Health.

APPROACHES AND PROHIBITED ANCHORAGES: Umm Shaif and Zakum drilling areas situated some 20 miles East and 48 miles S.E. of Das Island. Bundug oil field lies approximately 15 miles West of Das Island. Together with their associated pipe-lines to Das are marked on the Admiralty Charts. Only selected towers equipped with lights, all other wellheads, drilling rigs and towers within drilling areas are unlighted. Unburied pipe-lines from wellheads to Island also in this area and *it is essential* that vessels do *not* steam into or anchor in it. Cautions have been issued in Notices to Mariners warning vessels against entering both Umm Shaif and Zakum areas and against anchoring in vicinity of Zakum Pipe-line.

Southern Route. Vessels should normally approach port from South and must pass not less than 3 miles South of drilling rigs and towers in Umm Shaif area, thence towards S.E. corner of Island. Vessels must leave port by this route unless they have to use Northern buoyed channel.

Northern Route: Using N.E. Buoyed Channel.

Is via buoyed channel, recently re-routed, details of the buoy stations and positions are:

(a) Deep Water Channel: (I.A.L.A. System)

Buoy No. & Name Plate	*Colour and Daymark*	*Position:*	*Light Characteristic:*
Das Channel Approach	R.W.V.S. Pillar Spherical Top mark	25° 27.0′ N 53° 20.0′ E.	LFl. W. ev. 10 sec.
1	Green Conical	25° 25.2′ N. 53° 12.4′ E.	Qk. Fl. G.
2	Red Can	25° 24.7′ N. 53° 17.2′ E.	Gp.Fl. (2) R. ev. 10 sec.
3	Green Conical	25° 23.9′ N. 53° 10.6′ E.	Fl. G. ev. 5 sec.
4	Red Can	25° 24.2′ N. 53° 12.7′ E.	Fl. R. ev. 2 sec.
5	Green Conical	25° 20.6′ N. 53° 04.85′ E.	Qk. Fl. G.
6	Red Can	25° 21.9′ N. 53° 10.0′ E.	Fl. R. ev. 5 sec.
7	Green Conical	25° 14.25′ N. 52° 56.8′ E.	Gp. Fl. (3) G. ev. 8 sec.
8	Red Can	25° 19.1′ N. 53° 06.0′ E.	Fl. R. ev. 2 sec.
9	Green Conical	25° 09.8′ N. 52° 54.1′ E.	Fl. G. ev. 2 sec.
10	Red Can	25° 14.8′ N. 52° 58.9′ E.	Fl. R. ev. 3 sec.
12	Red Can	25° 11.2′ N. 52° 55.1′ E.	Qk. Fl. Red

(b) Das South Shoal Buoy:

The Y.B. Pillar buoy is established in position 25° 04.0′ N., 52° 53.0′ E. Qk. Fl. (6) + L.Fl. W. ev. 15 secs. (South Cardinal Buoy).

(c) Tanker Berth Lights:

(i) At the tanker berths No. 1 & No. 2, the extreme Northern and Southern mooring dolphins carry a fixed single red navigation light. There are two fixed green lights on each end of the berth operating platform. Each pair of lights is arranged vertically, the lower being 6 ft. and the upper 12 ft. above the platform deck, they stand about 10 ft. back from the face of the platform. The height of the platform deck of No. 1 Berth is 38 ft. above chart datum and that of No. 2 Berth, 45 ft. above chart datum.

(ii) No. 3 berth in Lat. 25° 08′ 53″ N., Long. 52° 54′ 07″ E. is fitted with a red flashing light of 5 secs. duration eclipse 4.5 secs., with a range of 4 miles, a radar reflector is also fitted.

(iii) At No. 4 berth the extreme Northerly and Southerly mooring dolphins carry fixed single red navigation lights. There are two fixed green lights on the Southern end of the liquid berth and the Northerly end of the Sulphur Berth, these lights being approximately 10 ft. back from the berth face, the lower being approximately 6 ft. above the platform deck and the higher 6 ft. above the lower one, the height of the LNG platform deck is 52.5 ft. above chart datum and the Sulphur platform deck is 43 ft. above chart datum.

(d) Flares:

To the North of the Island (0.7 miles approx. offshore) a series of 6 flares are located in a semi-circle. These flares are brought into use as necessary. The Northern perimeter of the dangerous zone is marked by a green conical buoy flash green every 5 secs. (25° 11.5′ N., 52° 52.2′ E. approximately).

An additional flare is sited on a small jetty extending 400 ft. from the shore, 0.4 miles N.W. of Berth No. 4, this flare is also brought into use as required.

(e) Pipe-line Buoy:

A black conical buoy fitted with radar reflector and light is situated between Berth No. 2 and Berth No. 4., this buoy is to mark the pipe-lines running between the two berths.

Approx. position: 25° 09.1′ N. 52° 53.5′ E.

In addition to the buoys in the channel an additional buoy has been established approximately 1.6 miles North of Jazirat Das to mark the oil flare pipe complex. Details are:

Flare	Green Conical	25° 11.5′ N. 52° 52.3′ E.	Fl. G. ev. 5 sec.

Two yellow painted marker buoys have been established on the Western side of Das Island to mark effluent discharge diffuser towers on sea bed.

North Marker Buoy: 25° 08′ 55″ N., 52° 51′ 09″ E. Fl. Y. 6 secs.

South Marker Buoy: 25° 08′ 44″ N., 52° 51′ 20″ E. Fl. Y. 10 secs.

Northern Route – Approach Das Island from Northwards. Keeping 4 miles to Westward and 5 miles to Southward until arrival Pilot station situated 2 miles S.E. of Southern loading terminal. Beware of submerged wreck with least depth 35 ft. over it in 25° 04′ N. 52° 52′ E.

PILOTAGE: Berthing Master will undertake pilotage, berthing and unberthing of tankers save that Master shall remain solely responsible on behalf of owners for safety and proper navigation. Berthing Master will normally board vessels approaching Das Island by Southern Route approximately 2 miles S.E. of Southern loading terminal (Berth 1). When approaching Das Island by Northern Route via buoyed channel Berthing Master will board from position between Nos. 12 and 11 Channel buoys. If adverse weather prevents boarding in this position Berthing Master will board in lee of Das Island. Vessels requested not to navigate at greater distance than 1.5 miles off Das Island when passing through cautioned area Eastwards of Das Island where anchoring is prohibited.

ANCHORAGES: Main anchorage for dry-cargo vessels is in about 40 ft. of water, approximately 0.5 mile from Harbour entrance South of tanker loading berth. Other anchorages for dry-cargo vessels lie to S.W. and West of the Island. Tankers should normally anchor approximately 1.5 to 2 miles S.E. of the Southern loading platform, should a berth not be immediately available.

Vessels should avoid anchoring in vicinity of submarine pipe-lines established to Eastward of Das Island.

Sea bed all round Island is rock, covered with a few inches of loose sand. Holding is poor and vessels are advised to pay out at least 60 fathoms of chain. Vessels at anchor, awaiting berths, lighters or any services provided by the port must at all times keep a listening watch using Channel 16 where possible. If a vessel is not equipped to operate on this Channel then any of the frequencies may be used by arrangement.

MAX. SIZE: No. 1 Tanker Berth is suitable for berthing tankers in ballast condition up to 90,000 Summer d.w.t. and when fully loaded up to 50,000 d.w.t. Minimum depth of water alongside the berth is 54 ft.

No. 2 Tanker Berth is suitable for berthing tankers in ballast condition up to 260,000 Summer d.w.t., fully loaded tankers of up to 130,000 d.w.t. and partially loaded tankers of up to 165,000 tons displacement with mean draft not exceeding 56 ft. Minimum depth alongside is 67 ft.

No. 3 Tanker Berth is suitable for berthing tankers in ballast condition up to 410,000 d.w.t. and with a loaded draft not exceeding 79 ft.

No. 4 LNG/LPG Tanker berth is suitable for berthing vessels up to 100,000 tons displacement with a mean draft not exceeding 47 ft.

Minimum depth of water alongside is 49 ft. The liquid part of the loading platform has 16 in. loading arm and an 8 in. bunkering point.

LNG loading rate 4,000 t.p.h. max. through 2 lines.

LPG loading rate 2,000 t.p.h. max. through 1 line.

Pentane Plus loading rate 2,000 t.p.h. through 1 line.

There are 7 mooring dolphins fitted with triple release hooks.

There are 6 berthing dolphins fitted with double release hooks. Each hook being of 100 metric tons capacity.

WEATHER AND TIDE: Prevailing winds are from the N.W. The rise of the tide can be up to 5 ft., usual variation is 3 ft.

HEALTH: Vessels arriving at Das must carry the usual Bills of Health for ports visited on the voyage. Masters of vessels are requested to inform Abu Dhabi Marine Operating Company (ADMA-OPCO) if there is any person ill on board or if there has been sickness within the week prior to arrival. Pratique is granted by the Port Medical Officer through the Berthing Master or Agency Clerk.

Health Certificate with valid smallpox inoculation is compulsory and cholera inoculation (if coming from cholera-infected areas).

RADIO: Das Marine listens on VHF Channel 16.

Ship-to-Shore Radio communication from visiting vessels is channelled through Das Marine via. VHF Channels 6, 8, 9, 11, 12, 13, 14, 16, 18, 20 and 22. All other communication other than terminal VHF should be directed through Bahrain's Cable and Wireless Station.

All vessels bound for Das Island should give 72 hours notice of ETA via Cable & Wireless Bahrain.

Das Island Radio Mast: A new radio mast has been installed on Das Island.

Geographical: Latitude 25° 08′ 30.396″ N.
Longitude 52° 52′ 43.903″ E.

Red lights visible all round the horizon have been established on the top of mast.

The original radio mast on the N.E. corner of Das Island has been demolished.

Arrival Messages: In the event of difficulties this information should be transmitted to Das via the Cable Wireless Station at Bahrain. As soon as direct contact is established between a vessel and Abu Dhabi Marine Operating Company (ADMA-OPCO) Radio Station, the latter will advise the route to be followed in approaching the Island.

Tankers when arriving to berth at the SBM from N.E. Buoyed Channel will receive from Das Marine a cable worded as follows:

"Approach Das Island via. N.E. Buoyed Channel and when clear of Inner Buoys proceed direct to Pilot station situated 2 miles S.E. of South loading platform. Ship's derrick should be rigged on the portside. Advise soonest SWL of hose handling derrick or crane also confirm that you have a suitable fairlead forward of at least 24 in.×18 in. Have ready on forecastle head one ships mooring rope, 120 fathoms in length. Ship's manifold should be ready to connect 2 × 16 in. BS cargo hose and 1 × 10 in. BS bunker hose.

Boat rope required along portside at manifold position. Accommodation ladder rigged starboard side. Mooring and hosing up by ship's crew. We request that cabin is available for Berthing/Loading Master who will remain on board throughout period in port. Mooring and hosing equipment is lifted on board when Berthing Master boards. Please ensure crew and port derrick ready and good lee is given. VHF Channel 16 available".

TUGS: Tugs provided by Abu Dhabi Marine Operating Company (ADMA-OPCO) must be used by all tankers when berthing and unberthing.

BERTHING: Full power must be available on main engines during berthing operations. Berthing Masters will not berth vessels if not properly equipped with satisfactory mooring lines, or if deck appliances inoperable, or if steering gear, telegraphs and whistles not in an efficient condition. Master should notify Berthing Master of any defects or peculiarities of vessel.

No. 1 Berth: No. 1 Tanker Berth approximately 0.75 mile off East coast of Das Island is served by submarine pipe-line from tankage on Island. Tankers berth against 4 flexible dolphins which protect berth operating platform. Six mooring dolphins are each provided with twin bollards. Hooks for backsprings located on operating platform are each equipped with 48 ft. length of 18 in. cable-laid manilla spring. Loading installation comprises 4 booms each equipped with 10 in. bore flexible hose for loading crude oil. Two similar booms available for loading and discharging bunkers. Fittings available to connect these hoses to 8 in., 10 in. and 12 in. manifolds to ASA 150 or BS 1560 – 1968, ASA 300 or BS. "H" details.

No. 2 Berth: No. 2 Tanker Berth is sited to the North of No. 1 Tanker Berth. It is of similar construction to No. 1 berth except that quick release hooks are provided on the mooring dolphins and on the breasting dolphins for securing vessels' backsprings. The loading installation comprises 4×16-in. booms with 16-in. hoses for crude oil loading, and 2×12-in. booms with 10-in. hoses for bunker loading. Fittings are available to connect to 4-in., 5-in., 6-in., 8-in. and 10-in. manifolds for crude oil loading with flanges to BS., ASA and metric standard details.

No. 3 Berth: No. 3 Berth is a Single Point mooring buoy and is situated approximately 7,500 ft. East of the East coast, in position Lat. 25° 08′ 53″ N., Long. 52° 54′ 07″ E.

The moorings for tankers are comprised of 2×15-in. circumference floating nylon ropes, terminating in a 3.75 in. dia. stud link chafing chain which is secured to the tankers forward mooring bitts using a 15-in. circumference nylon snotter. This equipment is provided by the Company.

The loading installation comprises 2×20-in. diameter floating hose strings terminating in 16-in. diameter tail hose for crude loading. For bunker loading and discharge 1×16-in. floating hose string, terminating in 1×10-in. tail hose, is provided. The flanges are to BS 1560.

Vessels using this berth will be required to be fitted with a bow fairlead on or near the centre line to accept the chafing chain. The minimum aperture dimensions are 24 in. horizontally and 18 in. vertically to permit direct connection. Alternative arrangements are provided for mooring vessels with smaller size apertures. However, this could result in delay, subject to weather conditions.

Vessels also require a derrick or crane capable of plumbing at least 2 ft. outboard of the ship's side over the entire length of the port manifold (including the bunker connection if required). SWL of the crane/derrick to be in accordance with the following requirements:

Less than 45,000 tons Summer d.w.t.	7 tons SWL
45,000 – 100,000 tons Summer d.w.t.	8 tons SWL
Over 100,000 tons Summer d.w.t.	10 tons SWL

Berths cannot be occupied during adverse Easterly weather. Loaded tankers only berthed at discretion of Port Officer and delays from tidal conditions, awaiting daylight, etc., may be incurred. Minimum acceptable length overall 525 ft. Vessels other than craft must not approach nearer than 2 miles to premises without a Berthing Master on board unless otherwise instructed by Port Officer. In approaching and leaving berths it is essential to avoid anchoring in area of submarine pipe-lines which run in approximately East and West direction some 2,500 ft. North of No. 2 berth. Weather and other conditions permitting, tankers can berth and unberth at all times. Every vessel berthing must fit adequate rat guards to all mooring ropes and wires.

GENERAL CARGO OPERATIONS:

(a) Declaration of Dangerous Cargo: Any dangerous cargo, whether intended for Das Island or not, must be declared to the Harbour Master, on arrival.

(b) Discharge or Loading of Dry Cargo: Cargo vessels discharge in the anchorage into barges using their own gear, and should arrive with derricks rigged.

A series of dumb barges (average capacity 120 d.w.t.) are normally available for landing all cargo. Charges are usually made for stevedoring services up to under ship's tackle and for supplying tally clerks on board the vessels.

For the handling of cargo, a labour force of up to 50 men is usually available.

Whenever possible, the island craft will come alongside immediately a vessel anchors and the Cargo Superintendent will board and discuss handling procedure with the Chief Officer. Discharge of cargo is carried out continuously provided weather and other conditions permit.

Vessels may be asked to provide winchmen.

(c) Cargo Manifests: 1 original and 2 copies of general cargo manifests are required.

LOADING: 2 grades of crude are available on each berth. Zakum Crude average API 40.5 and Umm Shaif Crude with average API 37.5.

Loading: Loading will not commence until the ship's loading officer reports the ship ready for loading and the shore loading staff are satisfied with the connections and preparations made for loading.

Loading and Discharging Rates:

No. 1 Berth

Crude oil loading maximum 5,000 t.p.h. with a maximum of 1,250 t.p.h. through each hose

Bunker discharging	1,800 t.p.h. approximately
Bunker loading	650 t.p.h. approximately

No. 2 Berth

Crude Oil loading	10 – 12,000 t.p.h. approximately
Bunker discharging	2,000 t.p.h. approximately
Bunker loading	750 t.p.h. approximately

No. 3 Berth

Crude Oil loading	10 – 12,000 t.p.h. approximately
Bunker discharge	2,000 t.p.h approximately
Bunker loading	1,000 t.p.h. approximately

The permissible maximum loading rate is entirely at the Company's option and will vary according to the circumstances and the type of tanker concerned, subject always to the Master's over-riding discretion.

Pumping Signals: Pumping Operations are controlled by a cable signalling system between the berth operating platform and the Control Room on the Island. The platform is also linked to the Island Automatic Telephone Exchange.

At No. 3 Berth, pumping operations are controlled by portable VHF radio telephone between the vessel and the Control Room on the Island.

BALLAST: There are no facilities for receiving vessels ballast ashore for treatment. All vessels must have clean ballast for over-board discharge.

Vessels using No. 3 Berth will be required to deballast and load simultaneously so that in normal circumstances they will not be flying light whilst moored at the buoy. It is therefore essential that the Company be promptly informed should the vessel be unable to deballast and load simultaneously without risk of admixture.

MEDICAL: Medical Officer resident on Island and Abu Dhabi Marine Operating Company (ADMA-OPCO) maintain small hospital. Medical attention only available in case of serious illness or emergency.

FRESH WATER: Not available.

FUEL: Medium fuel oils available from shore storage. Average API 17.5 and maximum viscosity 1,500 seconds Redwood.

FIRE PRECAUTIONS: Three fire-fighting tugs available.

GANGWAY: Shore gangways provided on No. 1 and No. 2 Tanker Berth and the new LNG/LPG berth.

CUSTOMS ALLOWANCE: No restrictions for tobacco. Conveyance of alcoholic liquor from any vessel to the shore or from the shore to any vessel, or from one vessel to another, is prohibited.

CONSULS: HBM Hon. Consul, Marine Department, Abu Dhabi Marine Operating Company (ADMA-OPCO), Das Island, Abu Dhabi. Tel. 546, Cables, Admarine Das Bahrain.

REPAIRS: Not available.

DRY DOCKS: None.

REPATRIATION: Not allowed unless an extreme medical case.

AIRPORT: ADMA operated private Airport.

TIME: GMT plus 4 hours.

POLICE/AMBULANCE/FIRE: Tel. Police 385; Ambulance 300; Fire 400.

SHORE LEAVE: Not permitted.

AUTHORITY: Marine Superintendent Das, Abu Dhabi Marine Operating Company (ADMA-OPCO), Das Island.

AGENT: *Dry Cargo:* See "Mina Zayed".

Tankers: National Shipping, Gulf Agency Co. (Abu Dhabi) Ltd. act as protecting Agent only.

DUBAI (Including Khor Dubai and Hamriya Port): 25.16 N. 55.18 E.

ALSO SEE "PORT RASHID".

COURTESY FLAG: UAE and Dubai.

PROHIBITED AREA: Work on the construction of the Dubai dry dock has commenced and all shipping is warned to keep clear of an area contained within a line drawn from Port Rashid Main Light (Lat. 25° 16.0′ N., Long. 55° 16.2′ E.) to a position (Lat. 25° 16.2′ N., Long. 55° 15.1′ E.) i.e. 272-1,850 m. from this light thence to the shore line on a Bearing of 180°. This has been declared a prohibited area.

Small craft, dredgers and hooper barges will be operating within this area. The main breakwater will consist initially of an island with the breakwater extending both seawards and shorewards from it.

White flashing beacons will be positioned at 400 m. intervals along the breakwater and in addition various construction lights will be exhibited.

Legal steps will be taken against any negligence whatsoever from Masters.

DOCUMENTS: Following should be airmailed to Agent prior ship's arrival: 6 copies Dangerous Cargo List, Stowage plan in duplicate, Hatch list in duplicate, 7 copies of cargo manifests, 1 copy of each Bill of Lading. On arrival, 3 crew Lists required.

APPROACHES: Open roadstead. Cargo discharged into barges.

ANCHORAGE: Marked by light buoy in position 310°, 1.06 miles from Nayif Tower. Recommended anchor to N.E. of light buoy in approx. position 25° 17′ 4″ N., 55° 16′ 16″ E. Depth 36 to 40 ft., holding ground considered poor, bottom sand and coral. The closer ships are able to anchor to the buoy, the faster turn-around on barges will be attained. *Warning:* Occasional strong N.W. winds, known as "Shamal" will make discharging impossible and *it is very important* that ships have engines on "stand-by" during such times. Ships allowed enter and leave anchorage at any time of day or night. Launch service through Agent's ship to shore from anchorage, and ship's own boats can also be used without Authorities' permission.

PILOTAGE: None.

RESTRICTIONS: All cargo discharged into barges at anchorage. Coasters with drafts of 11 ft. 6 in. or less can enter creek and discharge alongside. Such vessels usually require a tug boat to pilot them into the creek. Tugs available through Agent. Importation of artificial pearls is prohibited. Purchase of liquor forbidden except by permit.

HEALTH: Prior arrival, Masters are required to send a cable to the Port Health Dept. addressed "Quarantine-Municipality-Dubai" on the following lines:

(Vessel's name). . . ETA . . . Hour . . . Date . . .
Crew all healthy request free pratique
Master

Normally all vessels declared healthy by the Master are automatically allowed to berth immediately on arrival, and Health Dept. personnel will board vessels after berthing.

Arrival: Ships boarded immediately upon arrival weather permitting, and Masters then have to complete a short Arrival Report. No formalities of any kind with Port Authorities and ships allowed to arrive and sail at any time.

Departure: No port clearance is issued in Dubai. A letter will be issued by Agent which may be produced at next port of call instead of usual departure clearance.

RADIO: No port radio station. Cables from vessels outside Gulf may be routed through Muscat Radio, and from inside Gulf through Bahrain Radio. Vessels should advise Agent of ETA 72, 48 and 24 hours prior arrival. Some Agents also equipped with VHF calling Channel 16. Ship's radio station may be operated at anchorage.

Nearing Dubai and approximately 8-10 hours prior to arrival, vessel should switch on VHF Channel 16 and call Agent. On contact, change to one of Channels 14, 13, 12, 9 or 6 for further communication. Regular contact then maintained until departure from Dubai.

DISCHARGE TURN: Priority of discharge given to ships carrying mail and/or passengers for Dubai. Ships carrying less than 100 weight or measurement tons have priority and are supplied with one barge for discharge of cargo immediately on arrival, whether turn is in force or not. Should there be congestion, Agents require Stowage Plan showing clearly that all Dubai cargo is freely available and Master's signature on a request for discharge turn. Based on this, vessels will be registered for turn. Registration can only be performed during office hours.

After confirmed registration, at which will be given a deadline for turn, ships may proceed to other ports for discharge, but must return Dubai prior time and date given, otherwise turn is lost. Particular cargoes for H.H. The Ruler have priority, This should be evidenced by Manifests which will be produced to Customs Authorities in Dubai for approval. The cargoes must be accessible for immediate discharge, which should be verified by stowage plan.

BERTHING:

Khor Dubai: Khor Dubai Corniche Beacon 25° 16′ N., 55° 18′ E.

Approaches: Dredged to 5.5 m. The channel running parallel with Port Rashid lee breakwater.

Restrictions: Breakwaters will be lit shortly.

Draft at Berths: 4.5 m.

Tugs: May be arranged by Agent if required.

Fuel: Caltex supply fuel. Also Shell and BP.

Hamriya Port: Main Breakwater Light 25° 18′ N., 55° 20′ E.

Flag: UAE and Dubai Emirate.

Documents: The following should be airmailed to Agent prior to ship's arrival.

2 Dangerous Cargo Lists.
2 Stowage Plans.
2 Hatch Lists.
2 Freight Manifests.
7 Cargo Manifests.
1 Copy of Bill of Lading.
4 Crew Lists required (on arrival).

Approaches: Dredged to 6 m. between breakwaters. Breakwaters are lit.

Pilotage: Pilots can be obtained from Port Rashid by arrangement.

Restrictions: Vessels will not be allowed to remain alongside the quay when not working cargo if other vessels are waiting.

Draft at Berths: There are no berth numbers. However, there are 3 quays. One measuring 300 m. in length with a draft of 4.5 m., 1 – 160 m. and 1 – 900 m., the last 2 with draft of 6 m.

Tugs: May be arranged by Agent if required.

Radio: The Port Signal Station (call sign: "Khor Dubai" equipped with VHF and M/F SSB is situated near the entry to Dubai Creek. Vessels should contact the station by VHF Channel 16 or 12 or on RT 2182 K/cs. Signal station is manned 24 hours.

Pratique: Not applicable.

Berthing: Berthing is reported to Khor Dubai Report Station.

Fresh Water: Presently available at one point only. The supply is made by Port & Customs Office and vessels may directly order their requirement or through Agents.

Fuel: Caltex supply fuel. Presently from one point only.

Cargo Handling: Port is not involved in the cargo discharge operation.

There is no equipment available in the port such as cranes, forklifts etc. and if required, to be arranged by Agent.

Neither shed nor yard is available and therefore cargo is accepted on direct delivery basis only.

Stevedores: No stevedoring company in the port, labour is arranged by Agent.

Telephones: No connections at the quays. However, there are telephones in the adjacent Customs Office.

Lighterage: Available.

Shore Pass: After berthing, all passports and Seaman's books should be surrendered to the Customs Office situated in the port area with 3 copies of crew list against which shore passes issued. Before sailing of the vessel, a clearance should be obtained from the Port & Customs Office (Launch Section) and produced to the Customs Office for releasing the Seaman's Books/Passports.

Authority: Port and Customs, Dubai.

STEVEDORES: Loading/Discharging Rates: Stevedores, tally clerks, supervisors, etc., will be supplied from shore at the same time as ships are supplied with barges. These people working under vessels' supervision and responsibility.

First Shift: from 0800 hrs. to 1800 hrs. Second shift: from 1800 hrs. to 2400 hrs. Third Shift: from 0000 hrs. to 0800 hrs. Very difficult to get stevedores to work third shift unless ship will complete within a reasonable time into the third shift. First 2 shifts always worked.

Drinking water must be supplied by ship free of charge to all men from shore but food to supervisors, tally clerks, watchmen and foremen.

Expected outturn working three hooks:

Bagged cargo	400 – 500 tons
Cased cargo	150 – 200 tons
Timber on deck	300 – 350 tons
Timber in hatches	200 – 250 tons

Usually 5 ships can work at one time.

MEDICAL: Qualified doctors available ashore and also a hospital. Most medicines available at fairly low prices. Dentist also available. Walking cases should be brought ashore *in the morning* for treatment, but in emergency, a doctor will board the ship.

TANKERS: See "Port Rashid".

FRESH WATER: Can be supplied at Dubai anchorage at following rates (approx.): quantities 600 tons, 75 tons, or 25 tons at one time.

FUEL: See "Port Rashid".

FIRE FIGHTING: No facilities available at anchorage.

CUSTOMS ALLOWANCE: *Tobacco:* 1,000 cigarettes or 200 cigars or 1 kilo of tobacco. *Perfumes:* 1 litre of toilet water (Eau de Cologne) and not more than 150 grams of perfume. *Currency:* Unlimited.

CONSULS:

Egypt	Kuwait	Qatar
India	Great Britain	Saudi Arabia
Iran	Pakistan	Sweden
Iraq	Norway	Switzerland
Italy	Netherlands	USA

Additional Embassies/Consulates in Abu Dhabi.

REPAIRS: Fully equipped engineering workshops, radar and radio technicians capable of carrying out extensive repairs available. Underwater cleaning, repairs and other works connected with this also available. See also Dubai Dry Dock under "Port Rashid".

DRY DOCK: See "Port Rashid".

REPATRIATION: Visa is required for non UAE citizens visiting Dubai for a period exceeding 7 days. Agent can assist provided complete passport details given well in advance. Excepted are British Subjects with right of abode in the UK who are permitted to remain in UAE without visas for a period of 1 month. For temporary visitors of other nationalities the Agent can arrange under its sponsorship transit visa valid for 7 days provided the person holds a ticket showing a confirmed flight out of UAE. However, person must leave UAE via airport through which he entered.

AIRPORT: Regular international scheduled flights. Also domestic flights within Gulf area.

TIME: GMT plus 4 hours.

HOLIDAYS: *Public Holidays in 1979:* 1st January; 10th February; 23rd June*; 6th August*; 25th August*; End of Ramadan 3 – 5 days holidays. End August. 1st November*; 21st November*; 2nd December; 25th December.

*Not fixed.

SHORE LEAVE: Officers and crew may come ashore during daylight hours for shopping and recreation. They shall then carry a valid passport, ID-card or Seaman Book, which will be placed at the Immigration Office when landing. The passport, ID-card or Seaman Book will be returned upon returning to ship. No alcoholic beverages allowed to be brought ashore.

GENERAL: Dunnage – not available. Heavy lifts – not available at anchorage. Shore cranes have lifting capacity up to 30 tons.

Weather: Summer months in the 40's Centigrade and humid. Winter months in the 20's Centigrade and dry.

Alcoholic Beverages: Allowed to be stored and consumed on board also in port, while sale of this and pornographic materials is strictly forbidden.

Accommodation: Construction of many hotels completed and rooms in all price ranges are now readily available in Dubai on both the Deira and Dubai side.

Business Office Hours: Normally 0800 to 1300 hrs. 1600 to 1800 hrs. Government offices: 0800 – 1200 hrs. Banks: 0800 – 1200 hrs.

LAUNDRY: Available but about 2 – 3 days required.

PROVISIONS: Fresh vegetables, frozen stuff, bonded stores, etc., available. Requirements should be given immediately on arrival. (The liquor and beer prices are high.).

SURVEYORS: Lloyds.

AUTHORITY: Port and Customs Dept. Dubai Port Authority.

AGENT: Gulf Agency Co. (Dubai) Pvt. Ltd. P.O.B. 2404, Dubai, U.A.E. Cables: "Confidence", Dubai. Tel: 421300. (12 lines, 24 hour service). After hours: 442163, 445221, 443070, 459147, 443650, 441544. Telex 45448, 45809 ("GACDB EM"). Radio: Marine VHF radio, stand-by on Channel 16 (156.8 mHz) Callsign "Confidence, Dubai".

Operators of ship-servicing and supply organisation: Crew-changes, mail spares and/or delivery of provisions undertaken at sea without deviation to serviced vessel.

FATEH TERMINAL (offshore Dubai). (See Plan Book)

Oil Loading Terminal of the Dubai Petroleum Company.

Note: All tankers loading Fateh Terminal cleared by Dubai Petroleum Company, taking care of all necessary documentation concerning cargo. DPC does not charge owners/operators for this service. However, for all other agency services DPC refers owners/operators to regular shipping Agents in Dubai.

According present oil company regulations vessels not allowed receive any deliveries or any launch alongside while loading at Terminal. Deliveries of mail, spare parts and performance of crew changes will, therefore, take place at Terminal anchorage, Dubai anchorage, or at a rendezvous point.

Weather permitting, Fateh Terminal operates 24 hours a day, 7 days a week and provided berth not occupied, tankers will be berthed upon arrival, day or night.

LOCATION: Fateh Terminal consists of the crude oil production and export facilities of the Fateh and S.W. Fateh Fields offshore Dubai, United Arab Emirates. The Terminal Limits are bounded by the following co-ordinates:

(1)	25° 40′ N.	54° 30′ E.
(2)	25° 40′ N.	54° 26′ E.
(3)	25° 33′ N.	54° 15′ E.
(4)	25° 30′ N.	54° 15′ E.
(5)	25° 28′ N.	54° 17′ E.
(6)	25° 28′ N.	54° 30′ E.

Within this area the anchoring of vessels is prohibited and the Terminal Safety Regulations have effect.

NAVIGATIONAL AIDS: Both SPMs are fitted with a white light flashing the Morse letter "U" every 30 seconds visible for a distance of 5 miles.

The three submerged oil storage tanks, platforms, bridges and production units exhibit light flashing "U" in Morse and are also equipped with foghorns sounding "U" in the Morse Code every 30 seconds. Various working lights are also shown.

The oil storage vessel "Majmaa II" is fitted with a white light flashing the Morse letter "U" every 30 seconds visible for a distance of 5 miles.

Each vessel is also equipped with a continuously operating foghorn sounding the letter "U" in Morse at intervals of 30 seconds.

The Central Production and "A" Platforms exhibit lights flashing "U" in Morse and a foghorn every 30 seconds sounds the letter "U" in Morse.

Various working lights are also shown from the well platforms within the area. All are fitted with a white light flashing the Morse letter "U" every 30 seconds.

Each well platform is fitted with foghorns sounding "U" in Morse Code every 30 seconds.

Four flares in position:*

(1)	25° 35′ 50″ N.	54° 25′ 50″ E.
(2)	25° 35′ 56″ N.	54° 25′ 20″ E.
(3)	25° 35′ 48″ N.	54° 25′ 18″ E.
(4)	25° 29′ 44″ N.	54° 18′ 29″ E.

(*may be extinguished May 1980, as gas to be pumped to Jebel Ali).

The flares give an orange light which may be visible from the Terminal, depending on atmospheric conditions, in addition the flare structures show a white light flashing "U" in Morse every 30 seconds visible for 5 miles.

Numerous small unlit buoys for the use of working craft may be encountered within the Terminal area.

APPROACHES: On approaching Terminal, Masters of incoming tankers should head for Anchorage Area (see "Anchorage") where, under normal conditions, their vessel will be boarded by a DPC Mooring Master.

ANCHORAGE: An area immediately East of Terminal Limits is designated as the Anchorage Area, centred on position as follows:

25° 36′ N.	54° 31′ E.

This co-ordinate represents the centre of a circle with a radius of approximately 1 mile which must be used by vessels requiring to wait at anchor. Anchoring within the Terminal limits is strictly prohibited. For reference purposes, the anchorage area bearing from Port Rashid (Dubai) Light is 298° true, distance 44.6 miles and from Jazirat Sirri Light 187.5° true, distance 17.5 miles.

If a tanker is not scheduled to berth on arrival (e.g. another vessel is in the berth, or the port is closed on account of adverse weather conditions, etc.) Masters will be advised by radio and requested to anchor.

FACILITIES: For the export of crude oil 2 single point mooring buoys have been installed in positions:

(1)	25° 35′ 11.5″ N.	54° 25′ 47.7″ E.
	Bearing 261° true 4.8 miles from anchorage.	
(2)	25° 35′ 12.6″ N.	54° 24′ 36.6″ E.
	Bearing 262° true, 5.7 miles from anchorage.	

READINESS: After arrival at the Anchorage Area and when the tanker is ready in every respect to load, the Master may tender his Notice of Readiness.

Notices of Readiness will be accepted provided one or other of the following events shall have transpired:

(a) The Master shall have received the Mooring Master on board or;
(b) The Master shall have dropped the anchor in the Anchorage Area.

Port closed: Notices of Readiness will not be accepted during periods when the port is closed. The port is "closed" when the weather is such that it is too rough for incoming tankers to berth. The decision regarding the opening and closing of the port will rest with the Fateh Terminal Superintendent or his Deputy.

Order of Berthing: Vessels will normally berth in order of arrival.

DOCUMENTATION: *Documentation and ship's Agency:* In the normal course of events, DPC acts as tanker Agent and prepares all crude oil loading documents. For these services no charge is made.

Early Departure Procedure: At the Master's discretion. In order to expedite turn-round of vessels in this port and avoid undue delays caused by weather or other circumstances, Masters of vessels on arrival are requested to sign blank cargo documents.

Normally, completed cargo documents required by the Master will be placed on board prior to sailing. If this is not possible without incurring undue delays, the relevant documents will be airmailed to the Master to await the vessel's arrival at her discharge port.

The official cargo, i.e. quantity loaded, will be transmitted by radio whilst unmooring. In the event of a dispute, the receipt of a Letter of Protest will be acknowledged by the Mooring Master. Any protests by the Master concerning the quality of cargo should be made before departure and any resulting investigation should be made before the vessel sails.

Outward Clearance: A tanker will be considered clear to depart Fateh Terminal when the crude oil loading documents have been delivered to the Master, or in the case of early departure, clearance will be given through the Mooring Master.

Mail: Official ship's mail and crew's personal mail will be handled and shipowners debited accordingly.

PILOTAGE: Pilotage is compulsory within the Terminal limits. Vessels to be moored at Fateh Terminal will be boarded by a DPC Mooring Master in the Anchorage Area. The Mooring Master will advise the ship's Master on approaches to the SPM, mooring and unmooring, connecting and disconnecting hoses and all other operations within the Terminal area including all manoeuvring of the vessel. The Master or one of his qualified deck officers must be on the bridge at all times while the tanker is being manoeuvred.

The services of a Mooring Master are provided without charge, upon the express understanding and condition that when any Mooring Master furnished by DPC goes aboard a vessel for the purpose of assisting such a vessel, he becomes for such purposes the servant of the owners of the vessel and DPC shall not be liable for any damage or injury resulting from the advice or assistance given or made by such Mooring Master while aboard or in the vicinity of the assisted vessel.

MAX. SIZE: SPM No. 1. Max. d.w.t. 200,000. Max. draft, no restriction. Depth of water 135 ft.

SPM No. 2. Max. d.w.t. 300,000. Max. draft, no restriction. Depth of water 150 ft.

RADIO: *Communications with DPC:* Cable Address: Dupetco, Dubai. Telex: 45557 DPC EM.

Initial Communication: Initial communication between ships and DPC should be via Bahrain Radio (call sign GOU) which operates on a 24 hour basis.

Communications within 60 miles of Terminal: Once ships are within about 60 miles of Fateh Terminal communication may be established by radio telephone on International Marine VHF Channel 16 (156.8 mc/s.). This frequency is monitored continuously. Once contact has been made on Channel 16, further conversation should be conducted on either Channel 14 (156.7 mc/s.), Channel 13 (156.65 mc/s.), Channel 12 (156.60 mc/s.), or Channel 8 (156.40 mc/s.).

Communications after DPC Mooring Master has Boarded: A DPC Mooring Master will board incoming tankers in the anchorage area and will bring with him portable VHF radio telephone units. From that time onwards all communications between ship and platform will be conducted by the Mooring Master via the portable VHF units, unless owing to failure of portables it is necessary to revert to mains VHF Channels.

Advice of Tanker Arrivals:

Initial Estimated Time of Arrival (ETA): When a tanker bound for Fateh Terminal is within 72 hours of arrival at Fateh Terminal, the Master should notify DPC by cable via Bahrain Radio giving the following information:

(a) Name of tanker.
(b) ETA in GMT (Dubai time is GMT+4 throughout the year).
(c) Quantity of cargo required.
(d) Maximum loading rate.
(e) If the ship's hose connections are different from 16 in. or 12 in. standard ASA 150 lb. type, the size should be stated.
(f) Deballasting time (if any).
(g) Distance in feet of SMIT bracket (if fitted) from bow fairlead.

Subsequent ETAs: Sections *(a)* and *(b)* of the above message should be repeated via Bahrain Radio when the tanker is within 24 hours and again when within 12 hours of arrival at the Fateh Terminal.

Unreasonably insufficient or inaccurate ETA messages may alter the order of berthing of ships to the disadvantage of those ships giving sufficient and accurate ETA messages.

Radio Telephone Communication when Approaching Fateh Terminal: When about 60 miles off the Terminal contact may be made by radio telephone on International Marine VHF Channel 16, and communications should continue via this method until a DPC Mooring Master boards.

MOORING: *Preparation for Mooring:* Vessels are requested to have pilot ladder, hoist and/or accommodation ladder safely and securely rigged for immediate use and long enough to meet the Mooring Master's launch. Vessels will provide a lee for the Mooring Master on the port side both when boarding and leaving.

For vessels with a freeboard of 40 ft. or more, the accommodation ladder shall be rigged out, lowered down so the platform is not more than 10 ft. from the water level and a short pilot ladder rigged to cover the access to the platform.

Tankers are requested to have ready on the forecastle head the following:

(a) 2 towing ropes, polypropylene if possible.
(b) 2 messenger ropes, minimum lengths of 300 ft.

Tankers are requested to have ready on the port side amidships the following:

(a) Derrick rigged and ready to pick up from a launch.
(b) Mooring shackles.
(c) Wire strops and hose connection gear.

Securing of the Terminal's Nylon Ropes: On the near approach to the buoy, a launch will attach a ship's line to one of the Terminal's floating nylon ropes. This will be hove aboard and secured to the towing bracket if the ship is so fitted, or otherwise secured by a ship's or Terminal mooring wire previously passed aboard. The same operation will be repeated with the second nylon rope.

LOADING: *Lifting Hoses:*

SPM I: Two 16 in. diameter hoses will be lifted by ship's gear on the port side. Each lift is 9 tons.

SPM II: Two 16 in. diameter hoses will be lifted by ship's gear on the port side. Each lift will be 9 tons.

The hoses shall be hoisted and connected by ship's crew. The Mooring Master will advise the ship's officer in charge concerning lifting techniques.

Sundry Hose Connecting Equipment: Tankers shall be equipped with the necessary blocks, tackle, wrenches, gaskets, bolts, nuts, etc., to efficiently effect the hose connection.

Flange sizes: 16 in. – 12 in. reducers will come on board the tankers with the mooring gear thus enabling tankers with either 16 in. or 12 in. ASA 150 lb. flanges to connect directly to the Terminal hoses. Flange size 16 in. – 12 in., 16 in. – 10 in. reducers with ASA 150 lb. flanges are available if required to enable tankers with 12 in. – 10 in. manifold connections to connect to the Terminal hoses.

Communications During Loading: (See "Radio"). All communications relative to the loading of the vessel shall be routed through the Mooring Master who will remain in contact with the Production Platform constantly via portable VHF units. In case of temporary breakdown of the portable VHF circuit, contact may be continued on International Marine Channels 16, 14 or 8 if the vessel is so fitted.

Failure of Communications: Should communication with the Production Platform fail, loading will cease.

Emergency Shut down: An emergency cessation of loading may be effected by the ship's VHF Channel 16.

Loading rate: At SPM No. 1 the maximum loading rate will be 40,000 barrels per hour. At SPM No. 2 the maximum loading rate will be 100,000 barrels per hour.

BALLAST: *Precautions Regarding Pollution:* It is the responsibility of the ship's Master to see that no crude oil (or bunkers', diesel or bilge) or dirty ballast is pumped or spilled overboard from his ship whilst in the area. Drip pans should be used, especially when disconnecting hoses in order to prevent spillage overboard.

Scuppers to be Plugged: Before loading commences, all overside scuppers shall be made oil-tight.

No facilities for Receiving Dirty Ballast: At Fateh Terminal there are no slop tanks or facilities for receiving dirty ballast. Tankers must arrive with clean ballast. In the event a tanker does have dirty ballast it will not be allowed to be pumped overboard. The dirty ballast will be collected into one tank, measured and left aboard.

Discharging Ballast at Night: During the discharge of ballast in darkness, the sea shall be adequately lighted in the area of discharge.

MEDICAL: At Fateh Terminal medical and dental services are not available. In emergencies requiring hospitalisation, the patient will be taken by boat from the tanker to the Production Platform, hoisted to the upper deck of the platform and flown by helicopter to Dubai. The shipowner will be charged for all expenses incurred.

FUEL: Bunker "C" is available at the Fateh Terminal Anchorage from an awaiting bunkering tanker, providing sufficient notice has been given. Arrangements should be made through local shipping Agents in Dubai.

GENERAL: The following are not available at Fateh Terminal: fresh water, stores, boats for hire; repair facilities; facilities for changing ship's crew.

There is no shore leave.

AUTHORITY: Dubai Petroleum Company.

AGENT: Gulf Agency Co. (Dubai) Pvt. Ltd., P.O.B. 2404, Dubai, U.A.E. Cables: "Confidence", Dubai. Tel. 421300, (12 lines, 24 hours service). Telex 45448, 45809 ("GACDB EM").

VHF Radio: standing by on Channel 16 (156.8 mHz) communicating on Channels 14, 12 or 6, call sign "Confidence Dubai".

SSB Radio: standing by on 6910 mHz lower side band, communicating on frequencies 3539, 6910 and 7010 mHz. Call sign "Confidence Dubai".

FUJAIRAH: 25.07 N., 56.18 E.

Port under construction:

LOCATION: 3 km. North of Fujairah town and 20 km. South of Khor Fakkan.

SHIP SERVICING: Gulf Agency Co. operate ship servicing along the Latitude of 25° 10′ N.

DEVELOPMENTS: Facilities will include 10 berths for containers. Roll-on/Roll-off and general cargo. Depth alongside 10 m. No length restrictions. Also 4 berths for coasters with depth alongside of 7 m.

AGENT: Gulf Agency Co. (Fujairah) Ltd., P.O. Box 590, Fujairah, U.A.E. Cables: "Confidence", Fujairah. Telex: 89046 ("GACFUJ EM"). Tel: 23300, 23301.

KHOR FAKKAN: 25.22 N. 56.22 E. (See Plan Book)

PORT LIMITS: See Plan of Khor Fakkan on B.A. Chart No. 3518.

DOCUMENTS: The following documents must be in the possession of the ship's Master on arrival, or must be forwarded to ship's Agent prior to arrival:

Immigration:
- Crew Lists (2 copies)
- Passenger Lists (2 copies)

Customs:
- Crew Lists (2 copies)
- Passenger Lists (2 copies)
- Cargo Manifests (2 copies)
- List of Alcoholic Beverages (2 copies)

Port Operator:
- Certificate of Registry (1 copy) on request
- Classification Certificates (1 copy) on request

The following documents should be handed to the Port Operator by the ship's Agent at least 24 hours prior to the vessel's arrival.
- Cargo Plan (1 copy)
- Discharge List (1 copy)
- Transhipment List (1 copy)
- Dangerous Cargo Manifest (1 copy)
- Refrigerated Container Manifest (1copy)

PILOTAGE: Pilotage is compulsory for all ships proceeding beyond the fairway buoy. Port Khor Fakkan will operate a 24 hour, 7 day a week pilotage service. Vessels approaching the Port should await Pilot to seaward of the fairway buoy. The extremity of the breakwater (25° 21′ 28″ N. 56° 22′ 43″ E.) is marked by a white occulting light visible 10 miles.

ANCHORAGE: A limited number of vessels may anchor in Khor Fakkan Bay to the North of the fairway with the prior approval of the Port Operator.

MAX. SIZE: Max. draft entering and leaving is 39 ft. range max. 3.0 m. – height of wharf at HW 1.8 m.

No restrictions on LOA.

HEALTH: Normal quarantine regulations apply. Radio pratique will be granted on receipt of radio message from Master via his Agent, stating that no serious illness has occurred during the preceding 30 days.

All crew members must be in possession of valid smallpox and cholera certificates. The Health Officer will board when the vessel is alongside.

RADIO: *Notice of Arrival:* Vessels should advise their Agent ETA Port Khor Fakkan, giving draft, LOA and intended cargo operations to be performed at least 72 hours prior to arrival.

Agents should arrange berthing and labour with the Port Operator. Vessel should contact Port Khor Fakkan signal station on VHF Channel 16 when within range.

VHF: Khor Fakkan Harbour Office can be contacted on Channel 16. All movement in and out of the harbour shall be notified to the control and permission to proceed obtained for each movement.

TUGS: 1 tug, 800 h.p.

BERTHING: Length of berth 430 m. Depth alongside 12.0 m. at LW. Mooring gangs and berthing launches are provided.

Port Equipment: 2×40 ton Mitsubishi gantry cranes; 4×40 ton electric transtainers; 6 straddle carriers; yard tractors and trailers. Additional equipment such as forklifts, mobile cranes, pallets and barges available on request from the Port Authority.

Storage Facilities: The terminal comprises an area of 100,000 sq. m. and is capable of handling 150,000 t.e.u.'s per year.

Container Freight Station: A container freight station is available at Port Khalid, Sharjah close to the main highway linking Sharjah with its West coast neighbours.

Priority: Given to Container and Ro-Ro vessels.

STEVEDORES: *Working Hours:* The port will work on a 24 hour, 7 day a week basis ashore and afloat. Additional charges will apply outside normal working hours which are defined as follows:

Saturday to Thursday except Public Holidays (0600 – 2200 hrs.).

Normal working hours are subject to change during Ramadan when working hours will be at the discretion of the Port Operator. Requirements for port labour must be submitted by ship's Agent to the Port Operator by 1600 hrs. previous day.

MEDICAL: Upon application to ship's Agent, medical examination of crew members can be arranged. Personnel will either be sent to private doctor or to Public Health Department as circumstances dictate. Serious cases will be referred to Government Hospital Doctor.

FRESH WATER: Fresh water is obtainable. Agents must notify the tonnage required 48 hours prior to ship's arrival.

FUEL: Limited gas oil facilities only at present.

REPAIRS: Marine engineering workshops capable of handling most repairs are available.

SURVEYORS: Services are available upon request.

REPATRIATION: Proximity of the new Sharjah International Airport will permit efficient crew changes and repatriation. Offshore crew changes facilities can be arranged.

Transit visas are not required for crew changes. Ships passengers require a valid visa for transit or temporary stay.

AIRPORT: Sharjah and Dubai.

TIME: GMT plus 4 hours. Permanent.

SHORE LEAVE: Shore leave is permitted.

GENERAL: *Pollution:* The provisions of the Khor Fakkan Maritime Law shall apply with respect to the operation of vessels in Khor Fakkan coastal waters.

Garbage disposal services are provided by the Port Operator and are compulsory.

Ships' Chandlers: Complete chandlering facilities are available, handling provisions, laundry and bonded stores.

Water for Labour: A supply of potable water is to be made available to port labour working on board a vessel.

DEVELOPMENTS: A new ro/ro platform 60 m.×40 m. is positioned off the South end of the berth. It will enable two large ro/ro vessels to operate twin stem ramps at the same time, whilst the quay gantry cranes operate cargo from both upper decks. The pontoon will have a 12 m. wide shore connecting bridge.

AUTHORITY: Khor Fakkan Port Authority. *Managing Agents:* Marine Transport International (UAE) Ltd., Khor Fakkan.

AGENT: Gulf Agency Co. (Sharjah) Ltd., P.O.B. 10304, Khor Fakkan, U.A.E. Tel: 070-85095. Telex: 89048 ("GAC KFN"). Cables: "Confidence", Sharjah (stating for Khor Fakkan).

MINA JEBEL ALI, Dubai: 25.08 N., 54.55 E. (See Plan Book)

FLAG: U.A.E. and Dubai Emirate.

LOCATION: The port of Jebel Ali is a major port situated some 30 km. S.W. of the town of Dubai.

There will be a 14.6 km. (from 2.4 km. to 17 km. off-shore) 16 m. deep and 280 m. wide approach channel leading in or out of the port when all dredging is completed. The approach channel alignment is 315° – 135°. The approach channel is the continuation of the entrance channel which will be 15 m. to 16 m. deep, 300 m. wide and extending from 0.0 to 24 km. off-shore. Its alignment is 340° – 160°; i.e. there is a 25° bend to be negotiated from the approach channel into the entrance channel.

The outer basin is 2.3 km. long and some 600 m. wide with depths 14 m. to 11.5 m. and the main axis of this Basin is also 340° – 160°.

All channels, basins and docks' bottoms are sandstone.

Tankers and LPG ships will use the dual purpose berth situated in the Outer Basin and will generally be berthed starboard side alongside.

In all other berths ships can secure port or starboard side too.

DOCUMENTS: The following documentation should be forwarded to the ship's Agent, for delivery to Terminal Manager, at least 48 hours prior to vessel's arrival.

Stowage Plans	2
Cargo Manifest	9
Dangerous Cargo List	3
Bill of Lading	1
Hatch List	2
Crew lists are required on arrival	3

MINIMUM REQUIREMENTS:
In the interest of avoiding delays, all vessels programmed for Jebel Ali should comply with the following minima and be fitted with:

(i) Fully operational Radar.
(ii) Fully operational VHF Radio with Channels 9, 10, 16, 20.
(iii) Sufficient crew to handle tugs' lines and moorings efficiently.
(iv) Efficient propulsion and deck machinery.
(v) Efficient and adequate moorings to secure vessel safely.
(vi) Efficient signalling equipment.
(vii) Fully operational Tachometer, Rudder and Helm indicators.
(viii) Efficient mooring stations communications systems.
(ix) An efficient anchor windlass and anchors.

If any of the above requirements cannot be complied with, the Harbour Master of the port of Jebel Ali should be advised prior to arrival via "Jebel Ali Port Control".

APPROACHES: Ships should make for "Mina Jebel Ali" light float in position 25° 10′ 30″ N., 54° 52′ 15″ E. (Gp. Fl.3 every 15 secs. 15 miles). This float lies on the axis of the channel leading into Jebel Ali Port i.e. from this float vessel should steer 135° to approach Pilot Boarding Area.

Vessel should await Pilot in the area North of the seaward end of channel marked by Green and Red buoys, numbered 5 (temporary measure) and showing Qk. Fl. Gr. and Qk. Fl. R. Centre of this waiting area, with a radius of 1 mile, is 25° 09′ N and 54° 54′ E.

When dredging is completed in mid-1981, the 16 m. buoyed channel will extend seaward of the breakwaters for approximately 10 miles to Green and Red Buoys No. 1, in position 25° 08′ 12″ N., 54° 54′ 50″ E.

PILOTAGE: Other than for excepted ships, pilotage is compulsory for the entire Jebel Ali Port channel and harbour areas. Excepted ships should signal their arrival at the channel entrance to "Jebel Ali Port Control" or signal their intended departure in a similar manner. They should not enter the channel from seaward or leave their berth to proceed to sea without first having obtained permission to do so from "Jebel Ali Port Control". Vessels are advised that all VHF traffic is recorded.

All ships other than excepted ships, navigating whether by entry, leaving or moving within Mina Jebel Ali shall be under the charge of a Pilot.

The following ships will be excepted ships:—

(a) Warships.
(b) Pleasure Craft
(c) Ships of less than 150 n.r.t.
(d) Tugs, dredgers, barges or similar vessels whose ordinary course of navigation does not exceed beyond the Gulf.
(e) Tenders of M.E.N.A.S.
(f) Country Craft.

Pilots: Duly licensed Pilots are available on a 24-hour basis. Ships requiring a Pilot should call "Jebel Ali Port Control" on VHF Channels 16/17. Pilots board from launch "Murshid" or "Laila" also equipped with VHF, watch also kept on Channel 16.

Vessels requiring a Pilot should give at least 2 hours notice of arrival in the Pilot Boarding Area.

Pilot Boarding Areas: The Pilot boarding area is located North of the channel entrance. The centre of this area is in position 25° 09′ N and 54° 54′ E. with a radius of 1 mile.

Pilots will normally meet and embark incoming vessels at the above mentioned Pilot boarding area.

Masters are reminded to provide a safe lee.

Pilot Ladder Requirements: The following points are stressed:

(i) The rigging of pilot ladders and the embarkation and disembarkation of Pilots thereby shall be supervised by a responsible officer of the ship.
(ii) Every pilot ladder shall be secured in a position clear of any possible discharges from the ship, and so that each step rests firmly against the ship's side.
(iii) Every pilot ladder shall be secured in a positon where the Pilot can gain convenient access to the ship after climbing not less than 5 feet and not more than 30 feet.
(iv) Whenever the distance from the water to the point of access to the ship exceeds 30 feet, access from the pilot ladder to the ship shall be by means of an accommodation ladder or equally safe and convenient means.
(v) A light shall be provided at night so that the pilot ladder overside and also the position where the Pilot boards the ship shall be adequately lit.
(iv) Lifebuoy and heaving line should be available at the ladder.

Pilot Hoists: When a pilot hoist is provided as the method of access, it must be of an "approved" type.

An approved pilot hoist is considered to be one which complies with the recommendations of the "European Maritime Pilots Association".

ANCHORAGE: The holding ground is poor, ships are recommended to use more chain than usual. The anchorage area is centred on postion 25° 08′ N. and 54° 49.5′ E. with a radius of 2.5 miles. Ships will anchor here in a depth of approximately 16 – 20 m. (9 – 11 fathoms).

Pipe-line: All ships are warned that an untrenched pipe-line lies East of the channel. This line comes ashore in position 25° 01′ N., 55° 04′ 30″ E. From this position it lies in a direction of 345° for approximately 10 miles, thence assumes a direction of 313° towards the "Fatah Field" i.e. it is from 2 to 5 miles East of the buoyed entrance channel. Ships should **not** anchor near this pipe-line, nor should they approach the area with anchors walked back or trailing.

MAX. SIZE: LOA 225 m. Max draft 12.5 m.

RADIO: *ETA requirements and communications:*
Vessels arriving at the Port of Jebel Ali are required to provide the Harbour Authority with the following estimated times of arrival:

(i) At least 48 hours prior to arrival or on leaving the last port, whichever is later, via Bahrain Radio.
(ii) Confirm the vessel's estimated time of arrival at least 24 hours before arrival at the designated pilotage area and thereafter notify any significant change in excess of 1 hour.
(iii) On coming within VHF range of "Jebel Ali Port Control" establish VHF contact for the purpose of updating the estimated time of arrival and at least 2 hours notice of arrival in the Pilot Boarding Area. VHF watch is kept on Channel 16.
(iv) The port radio station maintain continuous listening watch on VHF Channel 16 and 17. On coming within VHF range of "Jebel Ali Port Control", vessels should establish VHF contact for the purpose of updating the estimated time of arrival, and at least 2 hours' notice of arrival in the Pilot Boarding Area should be given.

Continuous watch is maintained on HF radio frequency 2182 kHz. The station is also equipped with SSB radio and a listening watch is kept on frequency 12429.2 kHz. or 16587.1 kHz. at 1200 hrs. GMT for approximately 10 minutes daily. Vessels are urged to contact the port on these frequencies as early as possible before arrival.

Notice of Arrival: Agents should arrange berthing and stevedoring with the Terminal Manager at least 48 hours prior to the vessel's arrival.

Pre-Arrival Information: Prior to arrival, all vessels calling at the Port of Jebel Ali should provide "Jebel Ali Port Control" with the following information:

(i) Name of vessel
(ii) Port of Registry
(iii) Name of Master
(iv) Gross Tonnage
(v) L.O.A.
(vi) Draft
(vii) Cargo to discharge or load
(viii) Pilot boarding arrangements
(ix) Number of crew
(x) Health information
(xi) Last port of call.

VHF: See "Radio" and "Pilotage".

RADAR: To be installed in 1980.

TUGS: Two tugs with bollard pull of approximately 30 tons are available in the port at all times, watch maintained on VHF Channel 16. Extra tugs can be made available if needed.

Mooring boats: Two mooring boats, the "Dina" and the "Wafa" are available at all times. These boats are also equipped with towing hooks and VHF.

BERTHING: The approach channel is still being dredged, limiting the draft of vessels entering for any berth, to 12.5 m., however the following berths and water depths are available or will be available during 1980.

Berth No.	*Opening date*	*Depth*
1 – 2	Open	– 14.0 m.
3	Open	– 14.0 m.
4 – 13	Dec. 1980	– 14.0 m.
14 – 17	Open	– 14.0 m.
18 – 19	Open	– 11.5 m.
20 – 22	March 1981	– 11.5 m.
23 – 45	Open	– 11.5 m.
47 – 66	Open	– 11.5 m.

Moorings: Bollards on Quays Nos. 1 – 2 and 3 are of 100 ton strength, spaced 27 m. apart, on Quays 4A – 4B and 10 are of 70 ton strength and 30 m. apart.

Cross currents of up to 1.75 knots may be experienced in the approach channel. These currents are wind and tide induced.

Fresh winds are frequently experienced in the port, however, during evening, night and morning hours light S.E'ly winds prevail, veering to N.W'ly by noon and freshening to Force 4 – 5.

It is essential that whilst alongside quays, moorings are tended carefully and regularly and conform with recommended mooring patterns appropriate for ship sizes. The average rise and fall is 1.14 m.

Storage: Four transit sheds each provide 80,000 sq.ft. of covered storage. There is a large amount of paved open storage. The 70 ft. wide general cargo aprons provide for easy direct delivery.

Equipment: The Port Authority will provide a comprehensive stevedoring service from break bulk quay and warehouse area to a fully mechanised Ro-Ro – Container Terminal.

The general cargo areas are located on quay 10 with 20 m. of concrete apron, 5 transit warehouses of 80,000 sq. ft. and open storage areas and truck delivery and receiving docks. There are 2 berths for open storage cargo. A 35 ton fixed jib derrick is available for barge or shallow draft ship loading, and an adequate supply of supporting cargo handling equipment to complement a general cargo operation.

The container terminal is situated at berths No. 15 to 17, with 60 m. wide concrete apron 800 m. in length. The back up area serving these 3 berths can accommodate up to 6,000 TEU's.

The container terminal is equipped with two × 3rd generation Mitsubishi container cranes with 100 ft. track gauge, 110 ft. outreach past the fender system and a 49 ft. backreach. Telescopic spreaders to accommodate 20 ft., 35 ft., and 40 ft. containers plus the appropriate fittings to handle over height and flat rack container units. The cranes have a S.W.L. of 30.5 tons under the spreader.

To service the vessel during a grounding operation, the back-up area will have 2 Raygo Wagner container handling top loaders with a rated S.W.L. of 31 tons under their telescopic spreader which also can accommodate 20 ft., 35 ft. and 40 ft. as well as having the fittings to handle flat racks and over height units.

As well as the above container handling equipment, the terminal has to supplement any vessel operation: Flat bed trailers, low bed trailers, tractor units, mafi goose-necks and an assortment of forktrucks to handle general cargo from Ro-Ro vessel as well as handling cargo in the proposed L.T.L. warehouse.

The Port has experienced personnel to handle the various types of vessels which will come to this port. The complete operation from Pilots, Stevedoring, Documentation, Warehousing and Port Security, will be handled by the Port Authority.

The Port Authority also offers a trucking service on an optional basis.

Flat-top crane barge with 25 ton S.W.L. available within the limits of the port.

CONTAINER FACILITIES: Also see "Berthing".

The Terminal comprises of Berths Nos. 15, 16 ,17, totalling 900 m. with water depth of 14 m. The specifications of the container cranes are as follows:

Mitsubishi 41 ton electric container cranes. Distance from face of rubber fender to centre line of container at maximum outreach – 34 m. (112 ft.).

Top of container at maximum lift is above top of rail – 26 m. (85 ft. 4 in.).

Top of rail is 2 m. above highest tide and 4 m. above lowest tide.

Top of container at lowest position is below top of rail – 16.5 m., (54 ft. 6 in.).

Container crane travel – 900 m.

Container track gauge – 30.48 m. (100 ft.).

Container crane reach behind back rail – 15 m. (49 ft.)

Maximum weight of 20 ft., 35 ft. and 40 ft. container handled by spreader is 67,250 pounds.

Maximum heavy lift with spreader removed is 90,405 pounds.

100 ton bollards are spaced at 30 m.

Refrigerated container plugs: 60×380 volt Kheops, 60×380 Crouse Hinds, 40×220 volt Mipco.

Container freight station 100,000 sq. ft.

Depth of water alongside 14 m. (46 ft.).

Container cleaning available.

Track scale capacity 50 tons.

STEVEDORES: By Port Authority of Jebel Ali.

Normal Working Hours:

0700 – 1200 hrs, 1300 – 1600 hrs. Twenty-four hour working can be arranged with Terminal Manager.

DENSITY: 1032.

MEDICAL: There are free medical facilities provided in Dubai Hospitals – arrangements can be made through the Agent. In any emergency, medical services are available in Jebel Ali village, telephone No. 56489.

FRESH WATER: Fresh water will be available on all berths on completion of the port, but for the time being, is available on Quay 3, 10 and 4A and can also be supplied by barge or road tanker if adequate notice is given.

An additional charge may be made for delivery by road tanker and/or barge.

FUEL: Can be made available through prior arrangement with the Agent from Dubai who can deliver direct by barge or in smaller quantities by road tanker from Dubai. Charges on application. Bunkers ex-barge may be available within the Port during 1981.

Lubricating Oils: Available in drums, transported by road.

TANKERS: This berth is now open for product tankers as well as L.P.G. and condensate carriers. Two loading arms have been commissioned to handle Product tankers through 8 in. connections with reducers available. On the L.P.G. half of the jetty, there are 3 loading arms with 16 in. connections. Two vapour return lines are also fitted, 1 for propane and 1 for butane with 14 in. connections. Various reducers and straight pieces are also available. The depth of water in the berth is – 15 m. but the controlling depth at the moment is that of the Approach Channel, i.e. – 12.5 m.

Vessels are warned that no dirty ballast discharge will be allowed within the limits of Mina Jebel Ali.

Also see "General".

REPAIRS: Berths are available for afloat repairs to be done by local contractors. Lay-up Berths for long and short periods can be arranged for vessels up to 400,000 d.w.t. with draft up to 11.5 m. Special bollards are installed on Quays 4A and 4B to handle large vessels.

Marine engineering firms with specialised workshops in Dubai, undertake engineering repairs. Agents will make necessary arrangements.

Repairs to radar, radios, echo sounders and other electronic navigational and communication aids are available by major manufacturers' Agents, i.e. Marconi, Decca, Kelvin-Hughes, Telefunken, etc., being represented in Dubai and sets serviced by trained engineers. Agents will advise.

SURVEYORS: Lloyds, B.V., A.B.S., N.V. and N.K. as well as other private qualified cargo, hull and engine surveyors and consultants, i.e. Murray Fenton-Cullen Incorporated (telephone Dubai 441662) and Cleghorn, Wilton & Associates (telephone Dubai 435402).

Surveys: The following surveys and certification can be carried out in Jebel Ali: Loadline, Safety Equipment, Safety Construction, Radio.

CONSULS: Embassies and Consulates in Dubai.

Embassies:

Federal Republic of Germany	Tel.: 231013
United Kingdom	Tel: 431070

Consulates:

Egypt	Tel.: 434417	Netherlands	Tel.: 225156
France	Tel.: 232441/2	Norway	Tel.: 436833
India	Tel.: 220201/2	Pakistan	Tel.: 433163/431412
Iran	Tel.: 431150/431915	Qatar	Tel.: 221216/223568
Iraq	Tel.: 664650	Saudi Arabia	Tel.: 222163/4
Jordan	Tel.: 667735/667097	Sweden	Tel.: 432566
Kuwait	Tel.: 221900/221525	Switzerland	Tel.: 431789
Lebanon	Tel.: 442831	U.S.A.	Tel.: 229003/229007

The foregoing are Embassies and Consulates situated in Dubai. Most countries maintain diplomatic missions/embassies, etc., in Abu Dhabi – some 120 kms. from Mina Jebel Ali.

SHORE LEAVE: The following is the standard procedure for shore leave as dictated by the Port Immigration Department.

1. The Captain, Chief Officer or Purser is to hand over all seamen's books to the Port Immigration.
2. Crew members wishing to go ashore are to report to the Port Immigration Office (Agent to arrange) and collect a "Marine Landing Permit" which should be carried at all times. On returning to the ship, the permit should be handed back to the Port Police. The process is to be repeated on every subsequent shore leave.

TELEPHONES: Ship board telephones not available. Telephones on a temporary basis are available in the Port and Cargo Administration Supervision Offices.

Important Telephone Numbers are:

Port Control and Harbour Master	Jebel Ali 56578/56789
Police	Jebel Ali 56111
Port Health	Dubai 431405
Customs	Dubai 431076
Terminal Operations	Jebel Ali 56439
Security	Jebel Ali 56578

GENERAL: *Dirty Ballast and Refuse:* All vessels are warned that no dirty ballast, bilges, etc., should be pumped out in or in the vicinity of the Port of Jebel Ali. Offenders will be prosecuted and the U.A.E. and Dubai police maintain maritime and helicopter patrols to ensure no dirty ballast is discharged and no refuse is thrown overboard.

These rules apply while vessels are alongside and the Harbour Master may instruct offending vessels to leave or bar them from returning to Mina Jebel Ali.

Skips can be hired for refuse collection. Arrangements must be made through the Agent or the Port Authority. Hire rates will be given on application.

Ballast Requirements: For the purpose of safe manoeuvring, the Harbour Master requires all vessels to maintain a reasonable ballasted condition.

Vessels should carry sufficient ballast so that the propellor can have maximum immersion whilst maintaining a reasonable stern trim.

Fumigation: Fumigation can be carried out by specialist firms.

Ships Chandlers, Ship Supplies: All types of provisions – fresh and dry, and all types of fresh and frozen meat are available ex-Dubai. Arrangements through Agent and/or through direct VHF contacts with ship chandlers and provision merchants. Paints, ropes, etc., available as well as charts. Laundry services are also available.

Immigration: An Immigration Office has been established in the port. The service is available 24 hours a day. However, Masters should advise their Agents that the ship may leave outside normal office hours and that the Agents should check that Immigration Officials will be available to clear the vessel outward. This also applies to public holidays.

Shops: A small supermarket is open in the port. Hours of work are: 0800 – 1300 hrs. Saturday to Thursday inclusive.

Bank: The British Bank of the Middle East maintains a branch in the port. Hours of work are: 0800 – 1200 hrs. Saturday to Thursday inclusive for counter staff. 0800 – 1400 hrs. Saturday to Thursday inclusive staff in attendance for other bank business.

Seamen's Recreational Facilities in Dubai:

International Seamen's Club (Tel: 435551)
Norwegian Seamen's Mission (Tel: 470561/3)

Transport: Arrangements for taxis can only be made through the Agent.

Charts and Publications:

Charts:

British Admiralty Chart 3237 (to be published)
British Admiralty Chart 2889 (to be published)
British Admiralty Chart 3737 (to be published)
British Admiralty Chart 3738 to be published in approximately November 1980.
German Hydrographic Institute Chart 729.

Pilot Books: Admiralty Sailing Directions and Sailing Direction for Persian Gulf, (Defence Mapping Agency) Publication No. 62.

Tidal Stream Atlas.

Lights: Admiralty List of Lights Volume F. United States List of Lights Publication No. 112 (Defence Mapping Agency).

Additional Charts and Publications relevant to Mina Jebel Ali may be published in the future.

Radio Aids:

British: Admiralty List of Radio Signals (B.A.) and
American: Radio Navigational Aids (Defence Mapping Agency) Publication No. 117B (Pacific/Indian Ocean Area).

SHIPMASTER'S REPORT: December 1980.

Approach: Make for Jebel Ali Light Float. Racon observed at 20 miles. Positions no problem with Decca, numerous oilfields and Dubai all showing up clearly.

The new Chart of Approaches to the port (BA.3738) is good. Minimum depth in channel to ILWS was found to be 14.2 m. not 16 m. as advised but dredging still underway.

Anchorage: Anchorage to West of Light Float. Poor holding ground.

Pilot: VHF Channel 16, manned 24 hours a day.

Pilot will not berth or unberth tankers at night at present until port works completed.

Port Control Tower (Conspic.) at berth No. 66 not yet completed.

Pilot boards from launch of about 15 kts. In rough weather a tug is used. It takes about 45 minutes to come out from the pilot office at berth No. 15.

Tugs: Two Port Authority tugs of 2,500 h.p. (30 tonne bollard pull) and very manoeuverable. One tug on 24 hr. standby. Numerous other tugs available from dredging company and oil rig companies.

Berths: Port not yet completed but several berths in use. The tanker berth inside the East breakwater handles products and exports LPG (from Fateh Field). It is in full operation with 15 m. draft. Vessel berthed starboard side alongside.

Berths No. 15 to 19 on No. 3 Quay are for containers, berthing starboard side alongside.

Berths No. 12, 13, 14, on Quay No. 3 are for ships under repair. Berthing starboad side alongside.

Moorings: 3, 2, 2.

Facilities: Fresh water will be available on all berths, of berths in commission not available at No's 12 and 13. Good quality at $1.50 per tonne. Prompt service.

All facilities available from Dubai about 30 minutes away.

Repair firm 'Teams' good. Chandler 'Gulf Supply' good and good prices.

Airport at Dubai, good for crew changes.

Minibus available from Agent for crew to Dubai. Does not operate after 2300 hrs. from Dubai. £35 per round trip.

No Customs. Immigration board immediately on arrival.

Landing Permit: Shore leave only granted if holding landing permit which Agent issues. Photograph must be attached (either do your own – 2 copies, or get photographer). Immigration takes all Discharge Books until vessel is ready to depart.

AUTHORITY: Port Authority of Jebel Ali.

AGENT: Gulf Agency Co. (Dubai) PVT Ltd., P.O.B. 2404. Dubai, U.A.E. Cables: "Confidence", Dubai. Tel. 421300 (12 lines – 24 hour service). Telex: 45809 and 45448 ("GACDB EM"). Radio Marine VHF, stand-by Channel 16. Call sign: "Confidence Dubai". RT: 2182 kc frequency.

MINA JEBEL DHANNA, Abu Dhabi: 24.11 N. 52.38 E. (See Plan Book)

COURTESY FLAG: Vessels calling at ports in the State of Abu Dhabi should fly the flag of the United Arab Emirates.

APPROACHES: *(Inward Passage).*

Outer Route between Jazirat az Zarqa and Ghasha Tower Beacon marked by 2 light floats and 4 buoys. The 2 light floats are both port hand marks, and the buoys starboard hand, as indicated by shape, colour and light characteristics.

Inner Channel, from Ghasha Tower to berths at Jebel Dhanna marked by 21 light buoys. Least depth in this channel is 46 ft. and min. width of 800 ft. between Nos. 7 and 10 buoys.

(Outward Passage)

After clearing berth an outward bound vessel should steer to pass midway between Nos. 13 and 20 buoys, leaving Alaq Island to starboard. From Nos. 13 and 20 buoys the same track is followed as for inward passage.

Navigation in shallow waters: The navigation of deep drafted vessels at high speeds in shallow waters introduces certain hazards. Masters of ships should be guided by the following:

Due consideration should be given to the effect of draw down at speed on vessel's draft in shallow water, bearing in mind vessel's trim

If possible, confirm actual height of tide against predictions and if not, bear in mind that after strong winds the actual height of tide may be reduced and extra caution must be exercised for a few days during and after bad weather.

Ensure accuracy of vessel's draft reading, including the midship draft, having in mind the tendency of vessels to sag and the adverse effect of a small list.

Reduce to minimum safe speed to pass over and near shoal areas.

Reduce to a minimum safe speed when negotiating turns in order to reduce heel under helm.

Note that list can mean an appreciable increase in draft.

When strong tidal streams are running across a channel, extra vigilance is required, and allowance made for set, particularly at reduced speed, to ensure vessel proceeds along mid channel.

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
2 Manifests.
1 International Maritime Declaration of Health.

READINESS TO LOAD: If an accepted Tankship arrives at the Port of Jebel Dhanna and tenders Notice of Readiness to Load.

(i) Within its Set Range then running hours shall commence, berth or no berth, either six hours after such Notice of Readiness or at the time of connection of cargo loading hoses, whichever is the earlier.

(ii) Prior to the commencement of its Set Range then running hours shall commence at 1400 hrs. on the first day of its Set Range, berth or no berth, notwithstanding the fact that loading may have commenced for any reason prior to 1400 hrs. on the first day of its Set Range; or

(iii) After expiry of the Set Range, then running hours shall commence at the time of connection of cargo hoses.

Running hours shall finish at the time of disconnection of cargo loading hoses.

The Company will make every effort to load the tanker on arrival provided a berth is available and weather permitting.

EARLY DEPARTURE PROCEDURE: Early Departure Procedure is not available.

PILOTAGE: Pilotage from Ghasha Tower inward and outward compulsory for all sea-going vessels. Give 48 hours notice of ETA, etc., to Agent via Cable and Wireless, Bahrain. On confirmation of ETA on VHF Channel 16 either to "Jebel Dhanna Radio" or "Jebel Dhanna Pilots", Pilot will board inward bound ship to West of Ghasha Tower Beacon and will conduct through Inner channel to berth. Pilots act as Mooring Masters and direct loading operations. Pilots disembark off Ghasha Tower outwards.

TIDES: In outer approaches, i.e. from Zarqa to Ghasha Tower, tides almost purely diurnal, but semi-diurnal effect becomes more evident as Dalma is approached and is (comparatively) most marked at Jebel Dhanna. However, this semi-diurnal effect not of great significance and for all practical purposes it can be taken that there is only one high water and one low water per day throughout length of approach and at Jebel Dhanna, but times of high and low water at various control points are not coincident.

High water at 01 buoy occurs on average about 1.5 hours before high water at Jebel Dhanna, but differences may be from about half-an-hour up to 2.5 hours.

Tidal Streams. In berth area, streams generally do not exceed 0.25 knot and are predominantly confined to S.E. and S.W. quadrants. In outer approaches, streams appear to attain a maximum of 1 knot approximately along line of route, but this information should be regarded with caution as it depends on limited observation.

ANCHORAGES: If berth not available, or if ships cannot sail immediately after loading, they can anchor in an area South of Buoys Nos. 13 and 20 and North of Berths. This area marked by No. 15 buoy to West, No. 22 buoy to East and by berths to South. Alaq Island lies in the middle of this area and is marked by 2 buoys No. 17 and N. Alaq and by S. Alaq Beacon.

RESTRICTIONS: Vessels must receive clearance from Jebel Dhanna Port Control to enter channel. This is to ensure that all outward-bound vessels are aware of traffic movements in channel. Mooring, loading and unmooring carried out by day and night.

MAX. SIZE: (Also see "Berthing"). Vessels up to 330,000 d.w.t. and max. LOA 1,200 ft. can berth at Jebel Dhanna.

Note: Draft of laden tankers leaving Jebel Dhanna controlled by depth in Inner Channel between Nos. 7 and 10 Buoys. This is 46 ft. below Chart Datum and Zero of predictions. An allowance of 3 ft. under keel is considered sufficient for vessels up to about 100,000 tons. 4 ft. for vessels between 100,000 d.w.t. and 225,000 d.w.t., and 5 ft. for vessels greater than 225,000 d.w.t.

With 3 ft. under keel general limitations as follows:

(a) Ships drawing 44 ft. may sail at any time on any day.
(b) Ships drawing 45 ft. will rarely have to use tides.
(c) Ships drawing 46 ft. will usually have to use tides.
(d) Ships drawing 47 ft. will *always* have to use tides.
(e) Ships drawing 48 ft. will *occasionally be neaped.*
(f) Ships drawing 49 ft. will be neaped 294 days ± per year. The best months are June, July and August. Meteorological conditions may reduce the tides by up to 1 ft.

EQUIPMENT: Port and Starboard anchors to be fitted with anchor buoys and sufficient line to facilitate recovery of anchor in the event of loss.

4 good mooring lines of not less that 120 fathoms each and of a suitable size for the vessel. 2 additional 120 fathoms lines securely tailed to the first lines for occasions where 120 fathoms may not reach the stern buoys initially.

For vessels of 50,000 d.w.t. and larger, power mooring winches with 200 fathoms wire mooring rope are recommended.

Suitable new rope stoppers to be available forward and aft.

2 good stoppers for use on 40 mm. diameter wires. Preferably patent carpenter's stoppers.

2 good boat ropes 4.5 in. circumference of at least 200 ft. long.

A clean, safe pilot ladder of adequate length battened so as to prevent turning. A suitable line to be ready for hauling gear on board, such as hose clamps, reducers and elbows. A lifebuoy should be placed handy to this ladder.

Tankers of 40,000 d.w.t. and over should have rigged, when in ballast, an accommodation ladder lowered to about 12 ft. above water. This can be adjusted to suit the conditions. A pilot ladder should be rigged immediately abaft the accommodation ladder, to within 2 ft. of the water. This will enable the Pilot and others when the vessel is moored to ascend the pilot ladder clear of the launch and then step on to the lower platform of the accommodation ladder.

Deck machinery must be available at all times.

Whistle or siren must be available at all times.

Adequate deck lighting should be provided for night-time operations, with special emphasis on the following areas:

1. Overside at boarding position for Pilot.
2. Overside abreast of manifold, for hose lifting.
3. Working area around manifold.
4. Poop working area, for handling mooring ropes and wires.

Note: "Aldis" type signalling lamp to be available when mooring.

HEALTH: International Maritime Declaration of Health. In case of suspected disease Agent to be informed on VHF Channel 16. Smallpox and cholera inoculation required.

RADIO: Vessels bound for Jebel Dhanna should give 48 hours notice of their ETA Ghasha Tower Beacon to their Agents via Cable & Wireless Bahrain, also advise the quantity of cargo required, SWL of derricks, number of hours ballast and maximum loading rate.

A continuous listening watch is maintained on Channel 16 – 156.80 Mc/s. by the Terminal at Jebel Dhanna, call sign "Jebel Dhanna". Vessel's ETAs should be confirmed using Channel 16.

The ship's Agents and "Jebel Dhanna Pilots" also maintain a listening watch on Channel 16. By calling "Jebel Dhanna Pilots" before arrival, arrangements can be made by radio regarding mooring, loading hose connections, etc., so that unnecessary delays to the vessel may be avoided.

TUGS: No tugs available.

BERTHING: Berthing is by mooring to 2 anchors and stern buoys. Arrangements in advance by contacting Jebel Dhanna Pilots on Channel 16.

Berths are approached on W.S.W. course passing S.E. of Alaq Island. Leading lights have been established which will lead ships on the line of the 2 anchors when in berth. A small marker buoy has been established to assist the Mooring Master in placing starboard anchor in correct position. Vessels berth heading N.W. Holding ground good. Bottom consists of clayey silt.

Sea Line Loading Berths. 4 sea-line berths Nos. 1, 2, 3 and 4. Nos. 1 and 2 supplied by single 36-in. lines, and Nos. 3 and 4 supplied by 42-in. lines, each terminating in a header which passes under vessel in berth.

Berth	*Draft Accept-table* (ft.)	*Approx. d.w.t.* accept-able*	*Max. loading rate* (t.p.h.)	*Strings of flexible hoses*	*Length of sea line* (ft.)
No. 1	45	83,000	6,000	2×12 in., 2×16 in.	16,269
No. 2	46	85,000	6,000	2×12 in., 2×16 in.	16,427
No. 3	49	90,000	8,500	4×16 in.	19,000
No. 4	49	90,000	9,500	2×16 in.	17,200

*Deadweights shown for vessels loading full cargoes. Part Cargoes may be greater. Nos. 2, 3 and 4 Berths can accommodate VLCC's but No. 2 berth is restricted to vessels having a max. LOA of 1,100 ft.

Least depth of water available in berth, and swinging circle, after deducting 6 ft. for height above sea bed of sea line cradle is as follows: No. 1 Berth, 51 ft.; No. 2 Berth, 52 ft.; Nos. 3 & 4 Berths, 55 ft.

Swinging circle defined as 1.5 ship's lengths from dropping position of ship's inshore anchor.

The approximate draft limits quoted above are based on an underkeel clearance in the berths of 6 ft. Rising tides permit deeper loading in berths.

Seawards ends of pipe-lines, terminate in 12 in. or 16 in. flexible hoses, there being 4 such strings of hoses at each berth. 2 taken up on one side of vessel.

Additional information obtainable from Jebel Dhanna Pilots on Channel 16 prior to vessel's arrival.

HOSES: Derricks or cranes must be capable of lifting a string of hoses from the sea-bed to a height of 30 ft. above the deck. For lifting 16 in. diameter hoses, the lifting gear should have a SWL of not less than 10 tons and for 12 in. diameter hoses a SWL of not less than 5 tons.

Gear should be rigged on both sides of the vessel in order to lift hoses on either side or both sides simultaneously as required.

It may be convenient to handle blank flanges, reducers, etc., with the derrick or crane. Reducers or adaptors should be bolted to the ship's flanges, so as to take 12 in. or 16 in. hose as may be necessary.

Note: Where a vessel has 2 or more loading connections, those used should not be less than 7 ft. apart.

Hose Hang off bitts are required at about 10 ft. from the ship's rail at the loading manifold to secure the submarine hoses on both sides.

LOADING: *Flash Point:* The flash point of Murban Crude is below 32° F.

Crude Oil Temperatures: While every effort will be made to keep the loading temperatures of export crude below 150° F., there may be times when this temperature is exceeded.

Whenever possible Masters will be advised when this temperature increase is likely to occur, but in Jebel Dhanna the temperature ashore varies according to loading rate, production rate, changes in production pattern from the field, tank levels, etc., and the temperature difference between shore and ship varies according to loading rate, quantity of cargo taken, berth occupied and when last used, etc., thus the ship's temperature obtained on a previous voyage may be substantially different to that obtained on the current voyage and the previous vessel's temperature can be taken as an approximate guide only.

ADCO will not accept any responsibility for the failure by the Master of any tanker loading at Jebel Dhanna to take appropriate action to receive hot oil, prevent any damage to his vessel and/or injury to his crew.

H_2S Content: Murban crude contains concentrations of H_2S (Sulphuretted Hydrogen). Hydrogen sulphide has a disagreeable odour characteristic of rotten eggs which quickly deadens the sense of smell so that a dangerous concentration may be present which cannot be detected by odour. It is, therefore, important that when the presence of the gas is detected the area or compartment concerned should be left with all possible despatch until adequate ventilation can be carried out. The combustible gas indicator may not detect this type of gas. The foregoing must be dealt with in the light of experience where large quantities of crudes of this type have been carried without accident and we do not wish to exaggerate the dangers. However, the under-noted precautions have been evolved as necessary to provide against a possible accident and should be strictly observed.

During loading gas should only be allowed to escape via the agreed venting arrangements.

When ullaging or sampling, personnel should stand facing at right angles to the wind direction and so avoid inhaling gas. If H_2S is inadvertently inhaled the man should leave the area and not return until his sense of smell has been restored which means that at least two people should attend the operation.

No one should enter any pump room or any compartment where gas could collect unless another person is standing by.

Life lines, breathing apparatus and resuscitator should be readily available.

As a precautionary measure, the gas ejector for pump room should be put into operation at any time entry is made into this space whilst the possibility of H_2S gas entering pump room from cargo or empty tanks exist.

Loading Operations: The advice from the vessel which states she is ready to receive cargo is considered as final, and as indicating that every operation necessary aboard the vessel has been completed. As soon as possible after such a signal has been received, and without further advice, loading will commence. Damage to hoses can occur if ship's valves are not open at the start of loading. The Mooring Master will not transmit any loading instructions to the shore until the officer-in-charge of the deck has satisfied him that the hoses are connected correctly and that all valves have been set for receiving cargo.

While in berth, ships should be ready to move under their own power in the event of their breaking adrift, catching fire, fire in adjacent berths or other emergency. No repairs are to be carried out while in berth which would immobilise the ship or impair her fire-fighting efficiency.

The Mooring Master will instruct the Master of the Ship as to any signals needed for local requirements.

The Mooring Master will bring a portable radio to the ship.

The radio may not be used for private conversation. Use of the ship's radio while at the loading berth is strictly prohibited.

When loading, the cargo being received shall be frequently measured, thereby preventing loss of oil through a leaking hose. This particularly applies at night, as seepage of oil is practically invisible on the water during darkness.

Caution: The oil loading rates to ships are controlled on shore and an extremely dangerous situation can arise if a ship's valves are closed against the flow of oil.

Particular care must be exercised by ship's personnel to ensure that the Terminal is given timely advice should any reduction be required in the loading rate and adequate "Stand-by" notice must be given before the Final "Stop". At all times the Terminal must be advised when an increase in the loading pressure can be expected due to switching tanks, topping up, etc. To prevent excessive pressure from surge on ship/shore connections, ship's valves should be closed slowly.

The Terminal facilities at Jebel Dhanna have been designed so that tankers can be loaded by turbine driven loading pumps at max. rates up to 6,000 t.p.h. in berths 1 and 2, 8,500 t.p.h. in berth 3, and 9,500 t.p.h. in berth 4. Availability of max. loading rates is dependent on the number of berths occupied and operational circumstances.

If vessel is unable to accept the max. loading rate available, then ADCO will be grateful if you will give a brief explanation of the reason for the limitation and we suggest some of the reasons which may govern your restrictions:

(a) Inadequate venting system.
(b) Condition of ship's lines and valves.
(c) Inexperience of crew.

and there may be other reasons.

We are anxious to obtain this information in order to assist in formulating plans for future development.

The quantity of cargo received on board is the responsibility of the ship and no overage may be sent back ashore.

When loading is completed, hoses will be disconnected and lowered to the sea bed, under the supervision of the Mooring Master.

Ships will then proceed to an anchorage allocated by the Port Authority or direct to sea.

BALLAST: No facilities for disposal of slops or dirty ballast.

When a vessel enters port waters in ballast, the ballast water for overside discharge must be clean and a declaration signed by the Master and delivered to the representative of the Terminal to this effect. Ashes, oil, oily water or other refuse must not be discharged overboard in port waters. Vessel's scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard whilst in port waters.

It is essential that vessel is adequately ballasted to ensure safe handling and manoeuvring. Please comply with the Mooring Master's requests as to ballast quantity and disposition.

Jebel Dhanna is an open roadstead and subject to sudden changes in weather. On occasions it is of great advantage to commence loading whilst discharging ballast or prior to completely deballasting to avoid having the vessel in a flying light condition.

There must be no cleaning of boiler tubes whilst ship is in port.

DENSITY: 1031.

FRESH WATER: Not available.

FUEL: Bunkers are not available at Jebel Dhanna. A vessel proceeding to a nearby bunkering port should repeat her ETA to Jebel Dhanna Terminal for information.

If ADCO have sufficient information concerning expected arrivals, taking into consideration time taken to bunker, they will advise Masters when they consider that probable delay at Jebel Dhanna can be avoided by the vessel loading cargo before proceeding to the bunkering port.

Similar advice may be given in exceptional circumstances when there is a possibility that unduly large stocks of oil may necessitate shutting down the field.

FIRE PRECAUTIONS: As laid down in the Abu Dhabi (Petroleum Ports) Law No. 12 for 1973 and IOTTSG Safety Guide.

GANGWAY/DECK WATCHMEN: Not necessary.

CUSTOMS ALLOWANCES: Tobacco: No restrictions in quantity on board but must not be conveyed ashore or from one vessel to another without appropriate written permit from Customs Authorities and Port Officer. Wine and/or Spirit: Conveyance of alcoholic liquor from any vessel to the shore or from the shore to any vessel, or from one vessel to another, prohibited without appropriate written permits from Port Officer.

Shipmaster's Report: 1978

All alcoholic liquor must be under bond and sealed.

IDENTIFICATION CARDS: Not required.

CONSULS: None.

REPAIRS/DRY DOCKS: No facilities.

REPATRIATION: With sufficient notice Agents will assist in any repatriation. Landing permit is required for all sign on/sign off personnel for which Agent requires full name/nationality/seaman book/passport number and also 4 to 5 working days to process same. However, facilities are limited and if possible crew changes should be made at other ports.

Shipmaster's Report: 1978

Immigration Authorities require at least 4 days notice and preferably 7 days notice via Agent.

AIRPORT: One mile distant, air strip owned by ADCO for private use. Nearest International Airport is Abu Dhabi the capital of the State.

TIME: Local time GMT plus 4 hours. No alterations made to clocks during year.

MEDICAL: A male nurse can occasionally be obtained from Abu Dhabi Petroleum Ports Operating Company, upon request of ship's Agent, but in case of extreme emergency an aeroplane can be chartered from Abu Dhabi to pick up the patient at Jebel Dhanna for transfer and treatment in Abu Dhabi.

POLICE/AMBULANCE/FIRE: No Fire or Ambulance facilities available.

The Abu Dhabi Defence Force, Oilfield Security Section maintains a police post at Jebel Dhanna and is responsible to act in case of accident or other emergency, whether ashore or in territorial waters.

TELEPHONES: Jebel Dhanna is connected to the international telephone system.

SERVICES: None.

SHORE LEAVE: Crews not allowed ashore.

REGULATIONS: The Abu Dhabi (Port of Jebel Dhanna) Regulation 1967.

SHIPMASTER'S REPORT: December 1979.

Anchorage: Ghasha Anchorage apparently has good holding ground, bottom is sand with a little clay.

VHF: Call on Channel 16 or 9 (continuous watch). All operations carried out on Channel 9.

Medical: Any injury requiring treatment ashore necessitates having the following documents ready before the injured seaman can be transported to Abu Dhabi hospital.

1. Extract of Ship's log.
2. Master's report of the incident.
3. Two eye witness reports (if possible).
4. Pilot's report.
5. Letter from Master accepting responsibility for the injured man.

He must also take his Seaman's Book/Passport with him and all the above documents must be signed and ship's stamped by Master.

Gangway: Accommodation ladder usually port side but best to wait until vessel is nearly moored in order to determine best lee side.

Customs Allowances: Customs can be very strict. All alcohol must be locked up before arrival and they will then give an issue.

AUTHORITY: Abu Dhabi Company for Onshore Oil Operations (ADCO).

AGENT: National Shipping, Gulf Agency Co. (Abu Dhabi) Ltd., Jebel Dhanna, U.A.E. Cables: "Confidence" Abu Dhabi. Telex: Abu Dhabi 22248 ("GACAUH EM"). Tel.: Jebel Dhanna 05-71026. Radio: Marine VHF radio, stand-by Channel 16 (156.8 mHz) call sign "Confidence Jebel Dhanna".

MINA SAQR: 25.59 N. 56.03 E. (See Plan Book)

PORT LIMITS: "Mina Saqr" and its limits include all waters, installations and the creek of Hanna bounded within 3 mile radius to seaward from the main breakwater light in position Lat. 25° 58′ 48.35″ N., Long. 56° 02′ 43.7″ E.

POSITION: Port Saqr is situated 15 miles by sea and 22 km. by road North of Ras Al Khaimah. On chart BA. 2888 it is 1 km. North of Hanna Creek in Lat. 25° 58′ N., Long. 56° 03.5′ E. Jubail Al Harim (6,843 ft.) overlooks the port, and is 10 miles East. The port is bounded by main and lee breakwater.

DOCUMENTS: Following documents to be forwarded to the Agents at least 7 days prior to the vessels arrival:–

3 copies Dangerous Cargo List.
2 copies Stowage Plans.
2 copies Hatch List.
6 copies Cargo Manifests.
1 copy each of Bills of Lading.

On vessels arrival, 4 copies of Crew Lists, 4 copies of Vaccination Lists, Crew Health Certificates, Ships Certificates, etc. to be kept ready for inspection by the officers.

PILOTAGE: Pilotage is compulsory. Pilot may board from launch or by tug at approach buoy (B and W pillar buoy Int.Qk.Fl.) in position 26° 00′ N., 56° 02′ E. and in all cases a pilot ladder should be provided and a lee given. Pilot boards from 0600 hrs. to 2359 hrs., though generally vessels not wishing to work cargo immediately will not enter the port outside daylight hours. Vessels may leave up to 2359 hrs. or later by arrangement with the Harbour Master in special cases.

Master to contact "Ras Al Khaimah Port Control" on VHF Channel 16 at least 2 hours prior to arrival. ETA cables to be sent to the "Harbour Master MINASAQR Ras Al Khaimah" and also to Agents. Vessels to keep listening watch on VHF Channel 16 and await instructions from port.

ANCHORAGE: The area bounded by the port limits and to seaward of the main breakwater has been reputed as an area with good holding ground. Depths are from 11 to 14 m.

RESTRICTIONS: Vessels may enter or leave the port between 0600 and 2359 hrs. or later by arrangement with Harbour Master in special cases. No restrictions on entering during tides.

MAX. SIZE: No restrictions on breadth of a vessel but length not to exceed 800 ft. for easy berthing. Permissible draft in all the berths is 38 ft. Range of tide is maximum 1.6 m.

HEALTH: Normal quarantine regulations apply and pratique is granted subject to Port Health Authorities approval. The Health Officer boards the ship only when vessel alongside. Suspected disease or fever on board vessel to be reported to Harbour Master by cable prior arrival and await instructions.

RADIO: All cables to be routed through Bahrain Radio. Vessels should cable their Agent, at least 72 hours prior to arrival, the ETA, LOA, expected draft on arrival, cargo and hatchwise stowage.

VHF: Port equipped with VHF Radio standby Channel 16 with many other working Channels. Port Signal Station is at present manned between 0700 hrs. to 1400 hrs. only but can be contacted from 2 hours prior to vessels arrival if advance ETA notice is given to the Authority. Vessels should report the ETA, LOA, draft, details of cargo to be discharged, stowage, etc.

RADAR: Presently port not equipped with radar.

TUGS: Tugs join the vessel at anchorage, the practice being to secure alongside, using ship's lines. Derricks should be swung in and gangways hoisted. Tugs are fitted with VHF.

BERTHING: The harbour and entrance channel is 40 ft. MLWST. A draft limit is imposed of 38 ft. The harbour provides 165 acres of sheltered water and is enclosed by main and lee breakwaters. Deep water quays totalling 1,490 m. in length will provide berthing facilities for 7 ships. Included in this are 2 Ro/Ro ramps and 2 of the berths will be available for container traffic. Plans are now being developed for the installation of a container crane and supporting equipment.

The small boat harbour and fishing harbour provide a further 725 m. of quay, and offer a dredged depth of 15 ft.

All the 7 berths, including 2 Ro/Ro berths are now in operation.

Distance between quay and water level maximum 3.8 m. at LW and 2.2 m. at HW.

Discharging to be carried out using ships gear. All berths are general cargo berths. Berths Nos. 3 and 5 have ramps for Ro/Ro vessels.

Also see "Developments".

CRANES: No shore cranes available at berths therefore vessels calling should be self-sustaining. Mobile cranes of various capacities available locally for hire if required. No floating cranes available at present.

BULK CARGO FACILITIES: No special berth allocated for discharge of bulk cargo. Bulk cargo handled at present are Iron Ore, Gypsum and Bauxite and vessels with this cargo are allotted any of the general cargo berths subject to availability. No conveyor system or special equipment exist at present and as such cargo is discharged using vessels derricks and suitable slings.

SPECIALISED CARGO-HANDLING FACILITIES: Have 2 berths, Nos. 3 and 5 with ramps to accommodate Ro/Ro vessels. Port has plans for installation of a container crane and supporting equipment.

BRIDGES: Nil.

STEVEDORES: Advance ETA cable to be sent by Master to the vessels' Agents to order required gangs to work on board vessels. Labour gangs are supplied by a labour contractor, holding monopoly, and the gangs work on board the vessel directly under the supervision of the vessel's officers and the stevedoring company accepts no responsibility whatsoever for any damage either to the vessel or its cargo. Subject to proper stowage and vessels capability average rate of discharge per gang per day of 3 shifts working would be as follows;–

General cargo	Approx. 60/80 tons
Steel/Timber	Approx. 140/180 tons
Bagged cargo	Approx. 250/300 tons
Bulk Iron ore	Approx. 250/300 tons
Bulk Gypsum/Bauxite	Approx. 180/200 tons

Working Hours: 0700 – 1400 hrs. and 1600 – 2200 hrs.

MEDICAL: Advisable for Agents to receive at least 24 hour's advance notice of required medical attention but can also attend to this at short notice. Hospital facilities are available. Officers/Crew should have valid Smallpox, Cholera and Yellow Fever Certificates.

TANKERS: No tanker berth in port or offshore. Tankers will discharge at any berth, through bunker line – this will be fuel and diesel oils only.

DENSITY: 1027.

FRESH WATER: Fresh water available in Berth Nos. 1 to 6 with 2 points to service tanks fore and aft as required on a 24 hour basis. Cost of water will probably be Dh. 7/– per ton.

FUEL: Shell Markets (ME) Ltd. hold monopoly to supply bunkers (Fuel oil max. viscosity 1500 sec., Marine Diesel oil and Gas oil) to vessels in port. All sizes of reducers are available and the pumping rate is: Fuel oil 200 t.p.h.; Gas oil 250/300 t.p.h, subject to vessel's receiving capacity. Presently there are 6 bunker points in Berth Nos.1, 2 and 3. Owners requiring bunker supply should stem nomination through Shell, London.

Marine lubricants of all brands can also be supplied provided nomination through the suppliers received sufficiently in advance.

FIRE PRECAUTIONS: The port has its own auxiliary fire brigade and, when required, the services of the Ras Al Khaimah fire brigade are available. The harbour tugs are fitted with fire fighting hoses and monitors.

CONSULS: None at this port but most of the consulates can be contacted at Abu Dhabi or Dubai.

REPAIRS: Few facilities are available at present but planned for the future. Fully equipped engineering workshops capable of carrying out fairly extensive repairs operate a 24 hour maintenance or repair service and are available from Dubai.

DRY DOCK: No drydock in Mina Saqr. The nearest drydock is the one under construction at Dubai which is expected to be ready in 1980.

SURVEYORS: Lloyds, ABS, NV and representatives of various classification bureaux and private surveyors reside in Dubai.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

HATCHES: Opening/closing of the hatches to be carried out by the crew with the assistance of the stevedores, if necessary.

CUSTOMS ALLOWANCE: Normally, bonded stores are not sealed by the Customs Authorities. However, only limited stock should be left with the officers/crew for their consumption on board vessel and the rest should be kept locked under the custody of the Master. Sale of bonded stores is strictly prohibited and persons indulging in this will be punished according to local custom.

REPATRIATION: Efficient crew changes and repatriation can be carried out on receipt of advance information.

AIRPORT: Ras Al Khaimah International Airport, situated about 45 kms. South of Mina Saqr, operate daily flights to various destinations.

TIME: Local time is GMT plus 4 hours.

HOLIDAYS: Normal Muslim holidays during which time port working hours will be restricted. Fridays are the weekly holidays.

POLICE/AMBULANCE/FIRE: Telephone numbers are:– 29351 for Police. 21251 for Ambulance. 21212 for Fire.

TELEPHONES: No arrangements for placing telephones on board vessels but each shed in the port is provided with a telephone and can be used for making local calls only.

For international calls, Agents offices situated outside port area

should be used. Ras Al Khaimah has excellent communication to most countries as it has its own earth satellite station.
SERVICES: Ship chandlers, laundry, exchange of films, etc. available in Ras Al Khaimah. Radio/Radar repairs, tank cleaning equipment, scamping facilities, etc. can be arranged from Sharjah/Dubai.
SHORE LEAVE: Can be granted and for this purpose the Agents should hand over a crew list to the Immigration Department who will issue shore passes in exchange for seaman's book or passport. Prior to vessel's departure, Master to ensure that all shore passes are handed over to the Agents who will surrender them to the Immigration Department, seaman's books/passports will then be returned. Agents should advise Immigration Department by letter if any crew changes to be effected.
REGULATIONS: None.
DELAYS: No berthing delays.
DEVELOPMENTS: A bulk cement loading facility is being constructed at No. 7 berth which will be completed in early 1981. Length of berth will be 200 m. and max. draft alongside 11.5 m.
AUTHORITY: Port Manager, Ras Al Khaimah Port Services.

AGENTS: International Shipping Agencies (Ras Al Khaimah) Ltd., P.O. Box 5162, Ras Al Khaimah, U.A.E. Cables: "ISASHIP", Ras Al Khaimah. Telex: 99226 ("ISARAK EM"). Tel: 21266, 21966. After office hours 21929.

MINA ZAYED (Abu Dhabi): 24.32 N. 54.23 E.

(See Plan Book)

COURTESY FLAG: Vessels calling at ports in the State of Abu Dhabi should fly the flag of the United Arab Emirates as a courtesy flag.
DOCUMENTS: 10 copies of Cargo Manifest are required, with full cargo particulars, such as Bill of Lading number, marks/numbers, description, weight and measurement and IMCO class if any. It is essential that all this information against consignee/notify parties name, full contact address is given on the manifest for each consignment, the manifests should reach the Agent prior to arrival of vessel in order to be submitted to the Port/Customs Authorities 48 hours before the ship is berthed.

Also stowage particulars should be given in order that the Agent may advise the Port Authorities of the equipment and labour required for efficient handling of the vessel.

Customs Require:
1 Copy Crew List
1 Copy Stores List.
Immigration Require:
2 Copies Crew List
2 Copies Passenger List, if any.
Quarantine Require:
Crew List
International Health Certificate.
Vaccination List.
Other Requirements:

Last port clearance, ships log must be kept in order, 1 passport size photograph of each crew member for gate pass.
PILOTAGE: Pilotage in Port Zayed is compulsory for all ships proceeding beyond the Fairway Buoy. Pilots will board incoming vessels 0.5 miles West of the Fairway Bouy. Ships should wait for Pilots in the area stated above and not to enter the channel unless instructions to the contrary are given. Pilotage 24 hours. Under the provision the ship's Agents provide mooring gang, pilot boat; and tug(s) if necessary; at the discretion of the Harbour Master.
ANCHORAGE: The area enclosed by a 2 miles radius between West and North of the Fairway Buoy in position 24° 34.1′ N., 54° 19.8′ E. Good holding ground; water depth – 10.0 m. A.C.D. Deep draft vessels find lightering anchorage West and North of "A.D. Delta" light buoy.
RESTRICTIONS: The channel is 152 m. wide, marked by red and black light buoys on port and starboard sides. The channel presently has a depth of 9.2 m. Tides are diurnal; tidal ranges are: max. 2.04 m. (6.7 ft.) – min. 0.09 m. (0.3 ft.) during Spring and Neap tides, respectively.

Also see "Pilotage".
MAX. SIZE: Max. LOA 600 ft. However the Port Authorities may consider allowing entry to larger vessels if they are equipped with any of the following:

1. Bow thruster
2. Twin screws
3. Variable pitch propellers.

RADIO: Vessels are to give their ETA's by cable through Muscat or Bahrain Radio, addressed to "Port Authorities – Port Zayed, Harbour Office". Telex 22731 Portex EM, at least 72 hours prior arrival.
VHF: Port Zayed Port Control work 24 hours a day, information to be given on VHF Channel 16 and 67 as required by Port Control.
TUGS: 2 tugs are required on every ship when berthing. 4 harbour tugs available, 2×2,400 h.p. and 2×1,600 h.p.
BERTHING: At present 21 berths; Nos. 1 to 2 for Container Terminal depth 10.5 m., Nos. 3 to 9 depth 9.5 m., Nos. 10 to 13 depth 3 m. to 5.8 m., Nos. 14 to 19 depth 11.5 m., No. 20 for ro/ro depth 10.5 m., No. 21 for tankers depth 10.5 m.

Total length of Deepsea berths 3,350 m.

Tower crane for discharging available, mobile cranes of sizes varying from 5 tons capacity to 75 tons, 6 electric cranes are available, 5×5 tons, 1×10 tons. Also forklift trucks, etc., are available.

STEVEDORES: Arranged through Agent, labourers work under direct supervision of vessel and her officers. Normal working hours for stevedore labour are from 0700 to 2230 hrs. No floating cranes for heavy lifts but mobile crane of 75 tons capacity available for hire for shore work. Reasonable tariff for handling container, ro/ro, car-carrier also priority for berthing container, ro/ro, car-carrier vessels. Skilled manpower available for all kinds of cargo operations.
MEDICAL: Fully equipped Government hospital. Qualified personnel, and most medicines available.
TANKERS: See "Das Island" and "Jebel Dhanna".
FRESH WATER: Available at all berths in moderate quantities.
FUEL: Diesel oil and gas oil is available by barges.
FIRE PRECAUTIONS: The harbour tugs are fitted with fire-fighting equipment and in addition Port Zayed Fire Brigade are available 24 hours a day.
LAUNDRY: Reasonably good laundries available at moderate rates.
PROVISIONS: May be arranged subject 48 hours notice to Agent.
AIRPORT: Regular scheduled international flights, also domestic flights within Gulf area.
TIME: GMT plus 4 hours.
HOLIDAYS: Friday is weekly holiday. Otherwise usual Muslim holidays observed. Cargo work generally not affected by holidays.
SHORE LEAVE: Permitted. A permit can be obtained from Immigration Department. Absolutely necessary that every crew member be in possession of valid seaman's book.
GENERAL: *Vessels discharging cargo at anchorage:* Anchorage ETA required: The Port Authority should like to draw the attention of all shipping agencies in Abu Dhabi, to supply the Traffic Department with the date of arrival of ships which are going to discharge their cargo at anchor.

To enable the Traffic Department to take the necessary action and to render the required facilities, it is necessary that manifests, documents relating to cargo and the date of arrival should be forwarded 48 hours before the actual arrival of ships.
CLEARANCE: Port clearance must be obtained prior to departure.
DEVELOPMENTS: Container terminal will be equipped with the latest container cranes and equipment, 1 berth for ro/ro ramps. Completion mid 1980.

Dredging channel to 13 m.; construction of a new dhow harbour West of Port Zayed for small craft and for fishing boats depth 20 ft. with 2,000 m. of new quays.
AUTHORITY: Government of Abu Dhabi, Abu Dhabi Sea Port Authority.

AGENT: National Shipping, Gulf Agency Co. (Abu Dhabi) Ltd. P.O.B. 377, Abu Dhabi, U.A.E. Cables: "Confidence", Abu Dhabi. Tel. 334300 (10 lines). After office hours Tel. 362820, 366665, 341728, 362942. Radio: Marine VHF radio, stand-by on Channel 16 (156.8 mHz) and Marine HF, standing by on 3539 kc/s. Call sign "Confidence, Abu Dhabi". Telex 22248 ("GACAUH EM").

MUBAREK TERMINAL: 25.49 N. 55.11 E.

(See Plan Book)

LOCATION: The Mubarek Oil Terminal is situated off the island of Abu Musa, and is under the jurisdiction of the Emirate of Sharjah and operated by the Crescent Petroleum Company.
DOCUMENTS: One Crew List and valid Health Certificate.
EARLY DEPARTURE PROCEDURE: In force. Vessel's Agent signs all documents on behalf of the Master.
PILOTAGE: Vessels to be moored, anchored or manoeuvred at Mubarek Oil Terminal will be boarded by Company Mooring Master in the close vicinity of the suggested anchorage area. Vessels must not enter the restricted limits of the terminal unless a Company Mooring Master is on board.

Ships are requested to have a pilot ladder safely and securely rigged and ready for immediate use and long enough to reach the Company Mooring Master's launch. A combination of pilot ladder and ships accommodation ladder so arranged that personnel can first use pilot ladder until part way up the vessel's side and then transfer to the accommodation ladder is recommended, especially on very large ships. A light line should be ready to take aboard the Company Mooring Master's portable radio. There should be adequate lighting at night. Vessels will provide a lee for the Company Mooring Master's launch when boarding and leaving.

The Company Mooring Master may require the vessel to anchor at any time he deems it necessary for the safety of the vessel or moorings or both or for infringement of the terminal regulations.

The Company Terminal Superintendent shall be the sole authority as to when the terminal is open or closed for normal working due to weather conditions.
NAVIGATION AIDS: A floating barge named *Baraka 1* (82,000 d.w.t.) 546 ft. long, used for storage of crude oil and for accommodation and headquarters of terminal personnel lies permanently moored in position 25° 49′ 43″ N., 55° 11′ 49″ E. approximately 065°×6,000 ft. from the terminal's single buoy mooring. *Baraka 1* is equipped with normal navigational warning lights and aids as required by convention and in addition, a Racon beacon in position 25° 49.7′ N., 55° 11.8′ E.

A permanent fixed oil production platform, incorporating crude oil treating facilities, rises approximately 50 ft. above water at 25° 50′ 43″ N., 55° 11′ 49″ E., approximately 000°×6,079 ft. from the aforementioned *Baraka 1*. Said structures are equipped with 1 clear light flashing "U" code on each corner and a fog horn operating 2 seconds on and 18 seconds off. A permanently fixed flare structure (tripod) rises 150 ft. (flare tip) above water at 25° 50′ 56″ N., 55° 12′ 00″ E., approximately 037°, 1,716 ft. from the oil production platform.
READINESS: Notice of Readiness will not be accepted at time of arrival unless the vessel is in all respects ready to load. Arrival time will be considered the time the Company Mooring Master boards the vessel, or the time the vessel is within the approved anchorage area, whichever occurs first. Notice of Readiness is to be in English.
ANCHORAGE: An anchorage area diameter 6,000 ft. has been established with the centre in position 25° 46′ 45″ N., 55° 13′ 13″ E.

When arriving by day display flag "Q"; by night display Red Light over White Light for Quarantine Service.

RESTRICTED AREA: A restricted area of approx. 38 sq. miles has been established with a boundary formed by an imaginary line from:

(a) 25° 54′ 26″ N. 55° 13′ 49″ E. in a W.S.W. direction
(b) 25° 15′ 14″ N. 55° 07′ 19″ E. thence in a S.S.E. direction to
(c) 25° 46′ 33″ N. 55° 09′ 37″ E. thence in a E.N.E. direction to
(d) 25° 49′ 44″ N. 55° 16′ 08″ E. thence in a N.N.W. direction to the position above.

RESTRICTIONS: Max. distance bow to manifold – 560 ft.

MAX. SIZE: 350,000 d.w.t.

HEALTH: Customs, Federal Police and Immigration Officials will board the vessel as soon as possible after arrival to give inward clearance and "pratique" service. When arriving fly "Q" flag by day. And red over white light at night.

RADIO: Initial communication by radio between ship and Crescent Petroleum Company should be via Bahrain Radio, call sign "A9M", which operates on a 24 hours basis.

Company Mooring Master will have sole control of radio installations during the period a vessel is manoeuvring or moored, and no radio transmissions will be permitted on board ship except by the express permission of the Mooring Master in each case, only the Mooring Master may transmit on Channels 12 and 6 during the period he is on board. He will have a VHF radio telephone with him.

Mubarek Oil Terminal Radio Station call sign "Crescent – 2" particulars are as follows:

Operated by Crescent Petroleum Company, Sharjah, position Lat. 25° 49′ 43″ N., Long. 55° 11′ 49″ E.

Frequencies: Channels 69 and 73 on VHF.

Hours of operation: 24 hours per day.

Mubarek Oil Terminal Control Centre keeps continuous watch on VHF radio telephone Channel 69. Vessel approaching the terminal not having Channel 69 will be contacted on Channel 16 when the terminal will request her to switch to an alternate channel.

Channel 73 is reserved for communications between ships in moorings and Mubarek Oil Terminal Movements Control Centre. This is a safety measure since oil flow to ships is controlled through Channel 73, which therefore must be clear at all times in case of need to stop oil flow for any cause.

Channel 16 is for calling and safety use only.

In emergency failure of Radio and/or Radio Telephone communication daylight lamp signalling may be used with the Oil Movements Control Centre located on *"Baraka 1"*.

It is most important that ships establish communications with the terminal not less than 72 hours prior to arrival at the terminal giving ETA. Further ETA signals should be sent when the vessel is 24 hours, 12 hours and 4 hours distant, or any time a change of 1 hour in original ETA occurs. These messages should state specifically whether ETA is given in GMT or Local Time. The 72 hour signal should include the following:

ETA.
Last Port of Call.
If any Sickness on Board.
If vessel has Clean Bill of Health.
Cargo quantity and Grades expected to be lifted in long tons.

The 12 hour signal should include definite indication as to whether the vessel is ready to load or not and should also include information on the time she will require to discharge ballast after arrival. Precise time of arrival should be given when the ship is 4 hours distant from the terminal.

Unreasonable insufficiency or inaccuracy in ETA messages may alter the order of berthing of ships to the advantage of those ships giving sufficient and accurate ETA messages. Acceptance of Notice of Readiness will also be affected by such insufficiency or inaccuracy.

On receipt of first signal from a vessel, terminal will transmit a message to her giving preliminary requirements of terminal. Masters are urged to comply with this in all details in order to facilitate vessel turnaround and government formalities.

TUGS: The Company maintains launches to assist in mooring and unmooring vessels. These are under the direct supervision and control of the Company Mooring Master.

BERTHING: Vessels to load crude oil cargo will be normally accepted and berthed in chronological order of arrival provided such vessels have current nomination for cargo valid at the time of tender, carry clean ballast if any, and have cargo tanks in a fit condition to receive cargo. Also, they must be in all respects properly equipped and ready to moor. Should berthing be delayed on account of bad weather, vessels will keep their position in line.

Vessels required to leave the terminal area on account of bad weather should keep in contact with the terminal via the Company radio station at Mubarek Oil Terminal, call sign Crescent-2, in order that they may be available when the weather is fit for resumption of operations. The Company reserves the right to load vessels out of turn following the return of good weather, to the extent that such loading "out of turn" does not materially delay the loading of other vessels in line. Further the Company reserves the right to decline to moor a specific vessel if its condition or facilities are unsafe for mooring or loading even though the terminal may be open to other vessels.

The Company Terminal Superintendent's decision on this will be final.

S.P.M.: The single point buoy mooring berth (SBM), 11 m. in diameter and located in 163 ft. of water, is designed to handle tankships in the 350,000 d.w.t. class, but fitted at present with hoses for vessels of 250,000 d.w.t. ASA 150 pound flanged connections and one 20 in. floating hose, reduced to 12 in. Tanker Rail Hose for connection to export tanker's loading manifold, the length of hose being 940 ft.

Average loading rate is 16,000 b.p.h. The SBM is also provided with one permanently attached 21 in. circumference synthetic fibre floating mooring line.

EQUIPMENT: Vessels must have suitable winches or capstans in good operating condition on the forecastle deck. Constant tension type winches may not be used except when they can be solidly locked and the constant tension feature not used.

All vessels should have ready messenger lines on forecastle head for bringing the mooring line aboard from single point mooring (SBM).

Mooring winches on forecastle head for handling one 12 in. circumference synthetic fibre floating pick-up line from SBM.

Adequate chafing gear to prevent damage to mooring line.

Adequate mooring bitts to secure mooring line.

Hose lifting winch, derrick and gear rigged for 7.5 tons.

HOSES: After the vessel is securely moored the cargo hose will be hoisted on the port side. The hose is lifted by ship's gear and crew, and all connecting of the hose will be done by them. The lifting derrick, equipment tackle, etc., should be topped off and ready on arrival. Terminal loading hose is fitted with ANSI 150 pound flat face 12 in. "camlock" coupling and ships should have adapters and fittings to enable this hose to be connected to the ship's manifold. The Company Mooring Master advises the ship's personnel in hose lifting and connecting procedure; however, a deck officer must be present and must direct the ship's crew in all handling. The Company Mooring Master may reject a ship for unsatisfactory hose handling.

Do not close valves against crude flow.

Emergency flow stop signal if all communications fail will be a continuous sounding of the ship's whistle from either export tanker or *Baraka 1*.

CARGO SPECIFICATIONS:

Approx. Mubarek crude specifications:

Gravity	37 A.P.I. (approx.)
Sulphur	0.6%
B.S.&W.	Two tenths of one per cent or less by volume.
Metals	Not in excess of trace (100 PPM).
Viscosity	52 SSU at 120° F.
Flash Point	Below ambient temperature.
Pourpoint	30° F.
H_2S	Present

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: Various consulates are located in Abu Dhabi and Dubai.

REPAIRS: No repairs, painting, etc., are to be made while berthing unberthing or in the berth.

CUSTOMS: Cigarettes, cigars, tobacco, matches, spirits, wines, beers, perfume, arms, ammunition and possibly other items have to be locked up under Customs seal from time of arrival of ship until time of leaving territorial waters.

TIME: Local time is GMT plus 4 hours throughout the year.

SERVICES: No supplies of any kind and no medical services (except in case of emergency and subject to a doctor being available), or other services are available at Mubarek Oil Terminal.

SHORE LEAVE: Not permitted.

GENERAL: *Light Dues:* The Middle East Navigation Aids Service (MENAS) charges light dues according to the size of the vessel and the number of visits to the Gulf during the year.

Positively no provision is made for dirty ballast: Any ship arriving with dirty ballast will be rejected and all costs accruing therefrom will be to the ship's account. Notice of Readiness shall not be accepted until vessel returns with clean ballast and tanks fit to receive cargo. She will on second arrival tender a new notice of readiness to load.

Fire towing wires required fore and aft.

No swimming permitted whilst vessel in berth.

No fishing permitted at the berth or within the restricted navigation area.

SHIPMASTER'S REPORT: December 1979.

Pilotage: Pilot flies out from Sharjah by helicopter and he carries out all entry procedures. He will also take mail ashore for delivery to vessel's Agents. Mail must be placed in one envelope, addressed to Agents and marked ship's mail.

Tankers: Loading rate commences at 1,000 t.p.h. and when everything satisfactory increased to max. 2,000 t.p.h. Normal parcel is 350,000 bbls. ±0.0% If vessel requires a plus % then give a Note of Protest to the Pilot.

AUTHORITY: Crescent Petroleum Company.

AGENT: Gulf Agency Co. (Sharjah) Ltd. P.O.B. 435, Sharjah, U.A.E. Cables "Confidence", Sharjah. Telex 68019 ("CONFID EM"). Telephone: 22163, 23503. After office hours 355676, 354249.

MUBARRAS ISLAND, Abu Dhabi: 24.26. N. 53.32 E (HALAT AL MUBARRAS) (See Plan Book)

FLAG: All vessels calling at Mubarras are required to fly the national flags of Abu Dhabi which are available from ship's Agent.

LOCATION: Mubarras Island is located approximately Lat. 24° 28′ N., Long. 53° 22′ E., some 55 miles West of Port of Abu Dhabi.

The island constitutes export terminal of crude oil produced by Abu Dhabi Oil Company Limited (Japan). Crude oil produced from the Company's Mubarras oilfield is transported to Central Facilities Platform (CFP) situated approximately 19 miles E.N.E. of Mubarras Island by 4 in. to 14 in. flowlines, thence relayed by a 18 in. transmission line to the Island. The Company has tank storage for 1,548,000 barrels of crude oil on the island.

Tanker loading is accomplished by means of a single-buoy-mooring (SBM) system installed about 8 miles offshore East of the Island.

Average API Gravity of crude oil to be located is 38° and flash point is below 35° Fahrenheit.

PORT LIMITS: The port area of Mubarras and its approaches cover the area bounded by straight lines connecting the following points:

(a)	24° 30.0′ N.	53° 36.0′ E.
(b)	24° 24.0′ N.	53° 36.0′ E.
(c)	24° 24.0′ N.	53° 27.0′ E.
(d)	24° 26.7′ N.	53° 21.7′ E.
(e)	24° 30.0′ N.	53° 21.7′ E.

Masters of all vessels entering the Port must follow instruction from the Company's Port Master as to approaches, anchoring, berthing and unberthing.

APPROACHES: *Approaches to Mubarras:* Japanese Charts No. 3173 and No. 3174 cover the approaches to Mubarras. For tankers arriving at Mubarras without necessary charts full information shall be given by telegram if a request is sent to "Confidence" Abu Dhabi via "GNV" Bahrain radio a few days before arrival.

Alternatively, if the vessel has VHF, the buoy positions shall be given to her upon request to "Mubarras Terminal" as she approaches but prior notice of requiring this service should be given in the vessel's arrival message.

Charts: The following charts are recommended for use in Abu Dhabi waters:

Japanese Chart Nos. 3173 and 3174
British Admiralty Chart Nos. 3733, 3734, 2889 and 3716.

Approaches to Mubarras – Navigational Aids:

Buoy Nos.	*Latitude North*	*Longitude East*	*Colour*	*Light Character*
Mubarras Approach	24° 57.00′	53° 18.39′	Red	Fl. R. ev. 5 sec.
Mubarras Entry	24° 52.34′	53° 18.42′	Red	Fl. R. ev. 10 sec.
1	24° 49.44′	53° 17.29′	Black	Fl. W. ev. 10 sec.
3	24° 43.89′	53° 21.60′	Black	Fl. W. ev. 5 sec.
4	24° 42.01′	53° 27.38′	Red	Fl. R. ev. 3 sec.
5	24° 38.56′	53° 31.68′	Black	Fl. W. ev. 3 sec.
6	24° 31.87′	53° 40.58′	Red	Fl. R. ev. 2 sec.

			261	3.10
9	24° 25.70′	53° 33.05′		
			Total Distance:	46.25

Anchorage Position	24° 26.80′ N.	53° 34.00′ E.
S.B.M. Position	24° 25.98′ N.	53° 31.54′ E.

Navigation in Shallow Waters: There are some shoals with depth of 14.9 m. (49 ft.) in the area between Buoy No. 14 and No. 15. Masters of outgoing vessels should pay due consideration to the effect of draw down at speed on vessel's draft in the shallow water, bearing in mind vessel's trim.

Conspicuous Marks: Quick flash White navigation lights (visibility range 5 miles) are fixed on following platforms and the flare stacks adjacent to each platform are visible from distance:

MR-6 Platform	24° 35′ 44″ N.	53° 43′ 53″ E.
CFP	24° 30′ 09″ N.	53° 42′ 09″ E.
AA Platform	24° 26′ 15″ N.	53° 39′ 53″ E.

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
2 Manifests.
1 International Maritime Declaration of Health.

PILOTAGE: Pilot is provided by the Company free of charge at the request of the vessel's Master based on express understanding and condition that he is aboard the vessel for the purpose of assisting the Master and becomes, for such purpose, the servant of the owners of the vessel.

It is recommended that the Master of the vessel calling at Mubarras for the first time requests Pilot to go aboard the vessel for both inward and outward passage of the channel. The Pilot will normally board the vessel in the vicinity of No. 5 Buoy and will advise the Master on approaches to the berth and he will remain on board to act as Mooring Master and direct loading operations.

Mooring Master: The Mooring Master provided by the Company will undertake pilotage, mooring and unmooring of the tankers.

The Mooring Master shall board vessels to be moored at SBM in the anchorage area or in the vicinity of No. 17 Buoy. The Mooring Master will advise the Master of vessel on approaches to the SBM, mooring, unmooring, connecting and disconnecting hoses and all other operations within the port area. All manoeuvring of vessels within the port area shall be done only in accordance with the advice of the Mooring Master, subject to the understanding that in all cases and circumstances the Master of the vessel shall remain solely responsible for the safety and proper manoeuvring of the tanker. Master or one of his qualified deck officers must be on the bridge at all times while the vessel is being manoeuvred.

ANCHORAGE: The tanker anchorage is within 0.5 miles radius of Lat. 24° 26.8′ N., Long. 53° 34′ E. Depth of water varies from 15.5 to 18 m. (50 to 59 ft.) The sea bed all around the anchorage is coral with approximately 6 ft. of loose sand. Holding is poor and a vessel is advised to pay-out at least six shackles of chain.

Vessels will be advised by radio of a suitable anchorage if both anchorage and the berth are not immediately available. Vessels should under no circumstances anchor or wait at the South area of Lat. 24° 57′ N. without obtaining prior approval of the Port Master.

Anchorage for Dry-cargo Ships: Anchorage for dry-cargo ships is directed by Port Master by VHF radio.

Prohibited Area for Navigation and Anchorage: The area within 1.15 miles radius from CFP is prohibited for navigation and anchorage. No vessels shall anchor within the range of 1.5 miles from submarine pipe-lines.

MAX. SIZE: See "Approaches" – depth over shoal areas; also see "Tides".

HEALTH: Vessels arriving at Mubarras Terminal must carry the usual Bills of Health for ports visited on the voyage. Masters of vessels are requested to inform the Company if there is any person ill on board or if there has been sickness within the week prior to arrival.

Pratique is usually granted by Port Medical Officer through the Mooring Master or Agency Clerk.

RADIO: *Notice of Arrival:* Vessels should advise their ETA Mubarras at least 72 hours and again 24 hours before arrival through normal radio service. As an alternative to the route through Bahrain Radio Station (GNV) vessels may send their first message through Singapore or Bombay.

Confirmation of ETA should be made a few hours before arrival at "Approach Buoy" by calling "Mubarras Terminal" on Channel 16 VHF. After anchoring, vessels should advise their time of anchoring through VHF and thereafter maintain a continuous listening watch on Channel 16 until the Company's Mooring Master boards.

Tankers bound for Mubarras should advise their ETA and other information 72, 48 and 24 hours before arrival.

Vessels may find it helpful to route their first message through Singapore, Bombay or Bahrain Radio Station. All cables should be addressed to the Company through ship's Agent.

The first message should be sent according to the following form, but any items which are the same with a recent previous voyage to this port may be omitted.

(1) ETA Mubarras.
(2) Last Port.
(3) Next Port.
(4) Deballasting time.
(5) Quantity of cargo required.
(6) Maximum loading rate.
(7) Diameter of cargo manifold.
(8) Distance from manifold to ship's side.
(9) Derrick capacity.
(10) Diameter of fairlead.
(11) Name of Master.
(12) Number of crew.
(13) Whether Pilot is required or not.

Radio Station in Mubarras Terminal Office.

Short-range communication to Mubarras Terminal Office can be made by calling "Mubarras Terminal" on VHF radio telephone. Vessels should inform the office with their ETA preferably when they pass the Strait of Hormuz. After anchoring, vessels should advise anchoring time and maintain a listening watch on Channel 16 until Mooring Master boards.

Call Sign: "Mubarras Terminal".

Frequency:	*Reception*	*Transmission*
F3	Ch. 16	Ch. 10, 12, 14

Operating Periods: Round the clock.

BALLAST: All vessels arriving at this port are required to have on board sufficient clean ballast to give a safe draft for manoeuvring purposes. Vessels arriving with insufficient ballast may be required to increase the quantity, should the Mooring Master consider that it would not be safe to berth the vessel for loading. As a general rule, vessels shall not start discharging ballast until mooring is completed.

Upon completion of deballasting the Mooring Master will inspect the tanks. If the tanks are not satisfactory, he may require further pumping until such time as they meet the required standard.

It is strictly prohibited to discharge oil, oily water or other refuse that may result in pollution of the sea. International oil pollution regulations must be strictly observed by all vessels. *The terminal does not have facilities to receive oily ballast.*

TUGS: Following vessels are always available for use for marine operations at this port.

Name of Vessel	*G.R.T.*	*B.H.P.*	*Spd. (kt)*
No. 1 Union (Tug/workboat)	499	1,120×2	12
No. 2 Union (Passenger boat)	50	480×2	14
No. 3 Union (Mooring boat)	25	195×2	11

BERTH: *Position of Buoy:* Lat. 24° 25.98′ N., Long. 53° 31.54′ E. *Depth of Water,* 15.5 m. (50.85 ft.).

The berth is a single-buoy-mooring system consisting of a buoy 44.32 ft. (13.5 m.) in diameter, moored to 6 pendant legs of 3 in. high strength chain shackled to anchor piles at a radius of 855 ft. (260 m.), and having a rotating deck carrying the pipe-line and mooring connections.

One 32 in. crude oil line has been laid approximately 52,500 ft. (16 km.) from the shore to a position close under the buoy. From the underwater manifold the crude oil goes to the buoy through a 20 in. underwater hose. The connection between turntable piping of SBM and tanker manifold consists of 1 hose string composed of 24 in. and 20 in. (Length 770 ft.) floating hoses and 2 hose strings composed of 16 in. (Length 120 ft.) tail hoses.

LOADING: The maximum loading rate of crude oil is 40,000 bbls./hr. or 6,400 kl./hr.

Notice of Readiness: The Master of each vessel should present a Notice of Readiness to load to the Company's Mooring Master who will sign it on behalf of the Company.

The Notice of Readiness should be tendered at the time of the vessel's arrival at the tanker anchorage area, which is, in principle, understood to be either the time of dropping the anchor in the anchorage, or, if the vessel does not anchor, the time that the Mooring Master boards to commence berthing.

The vessel, however, is prohibited from berthing unless she reaches No. 5 Buoy at least 5 hours before the sunset, and Notice of Readiness will not be accepted until the next sunrise even if the vessel has already anchored in the tanker anchorage area.

Notice of Readiness will not be accepted during periods when the port is closed. The port is "closed" when the weather is such that it is too rough for incoming tankers to berth. The decision regarding the opening and closing of the port will rest with Port Master.

When the vessel is ready in all respects for loading the ship's officer must inform the Mooring Master who will transmit the necessary messages to the control room on shore. Mooring Master is authorised to control all the loading operations.

All cargo documents and shore figures are usually prepared on board and the Mooring Master will sign the documents on behalf of the Company.

MOORING: The Company reserves the right to refuse to accept for berthing or loading any vessels considered unsuitable by reason of inadequate or unsatisfactory mooring equipment, insufficient derrick capacity, unusual manifold connection, inability to comply with the Safety Regulations, or any circumstances which would create unusual risk to the Company's berth, facilities, personnel and equipment whatsoever.

Preparation: Before Mooring Master boards, vessels should have ready the following:

(a) Jacob's ladder on lee side.
(b) Hawser 1 each at fore and aft deck, polypropylene if possible.
(c) 1 steel crowbar.
(d) Port derrick with double wire rigged for minimum lift 5 tons.

After vessel is anchored, the Company's mooring and hose connection crew will board and pick up mooring and hose connection materials from tug/workboat. Vessel is requested to provide windlass and winch operators.

Mooring at Berth: Unless pilotage is required the Mooring Master will board the arriving vessels in the anchorage area. Vessels are requested to have pilot ladder safely and securely rigged ready for immediate use and long enough to meet the Mooring Master's launch. Vessels should have their crew standing by ready to receive mooring and hose connection materials and should maintain a lee until this is completed. Mooring Master will instruct the crew in the setting up of the forward mooring.

2 bollard ropes are made fast round the port bitts with their attached shackles about 5 ft. inboard from the fairleads as far forward as possible. The size of the fairlead opening should be at least 300 mm. (12 in.) to prevent chain from jamming in the fairleads.

Attached to the mooring connections on the buoy are two 18 in. nylon ropes (144 mm. dia., breaking strain 250 tons). These ropes are 50 m. long, and have at their free end a length of stud link chain which includes enlarged end link for receiving the shackles used on the deck of the tanker. From the outer end of this chain there are connected 2 mooring lines consisting of pick-up wires, pick-up ropes and a towing rope (port side only). The nylon rope is supported by "doughnut" floats and the chain is hung by large plastic buoys 5 ft. in diameter and coloured red and yellow.

Hose Connection: After completion of mooring the boat which has been holding the hoses clear during berthing will bring the floating hose to the ship's side and connect the derrick runner to the balance buoy. These are lifted aboard one by one and connected by distance piece which was already connected to vessel's manifold by hose connection crew during mooring operation.

Unmooring: After the hose disconnection is completed, mooring ropes are slacked off and then dropped into the water. Tug/work-boat will come alongside either before or after the vessel backs off the berth, whichever is convenient, and will receive mooring and hose connection materials.

TIDES: The maximum tidal range in this area is 6 ft., the average tidal range at the Spring tide 3 ft. and the Chart Datum is 0.7 ft. below ISLW. Tidal stream is variable according to the place and the lay of the land. But the flowing tide usually runs South-Eastwards and ebbing tide North-Westwards. Speed of a current is around 2 knots at the highest.

"Tide and Current Table" is published annually by the Company, applicable to Mubarras and the surrounding area, and will be obtained on application to the Company.

WEATHER: Local weather at Mubarras is almost similar to that of Jebel Dhanna and Abu Dhabi City, being extremely hot and humid in Summer. Temperature sometimes soars as high as 50° Centigrade with almost 100 per cent humidity in July and August.

MEDICAL: The Company does not operate a clinic and hospital at Mubarras. But when necessary, Master may obtain medical attention for ship's personnel from the ship's Agent who may in the case of serious illness or injury recommend treatment at the Abu Dhabi government hospital. The ship owner will be charged for all expenses incurred.

FRESH WATER: Not available at Mubarras except in case of extreme emergency.

FUEL: Not available.

CONSULS: No consular business is available at Mubarras. However, various countries have representations in Abu Dhabi.

REPAIRS: There are no repair facilities at Mubarras. However, radar and electronics repairs are available in Abu Dhabi and technicians can be sent to Mubarras for repairs through notifying the ship's Agent.

SURVEYORS: Lloyds, ABS, Veritas surveyors are available in Bahrain and they can be brought in if ample notice is given to ship's Agent.

CUSTOMS: Under normal circumstances Customs Officers do not board tankers at this port but upon arrival the Master is required to submit to the Customs through the ship's Agent a manifest of any cargo to be landed at Mubarras.

After loading is completed the Mooring Master will sign on behalf of Customs an outward manifest and issue the port clearance. These will be handed to the Master by the Agent.

REPATRIATION: Repatriation of ship's personnel may be accomplished by special arrangements through the ship's Agent who should be informed well in advance of the vessel's arrival. Launch or helicopter fare in case of repatriation will be charged to Owners.

TIME: Local standard time at Abu Dhabi is GMT +4 hours throughout year.

FIRE-FIGHTING: Tug/workboat "No. 1 Union" stationed at Mubarras Island is equipped for fire fighting. She is capable of pumping 1,700 gallons of water per minute from 3 nozzles and is usually on emergency stand-by during tanker loading operations.

GENERAL: *Engine:* The main engines and all gear must be in an operable condition and in a state of immediate readiness whilst the vessel is on the berth.

Stores: Provisions and deck stores not available.

Divers: The services of the Company diver may be available to vessels where it is essential that a diver's services are required to enable a vessel to sail. All requests for such services should be routed through the ship's Agent to the Port Master.

Currency: All currencies approved except Israeli.

Mail: Mail can be received and sent through ship's Agent.

Dry Cargo Discharge: A "T" shaped jetty at Mubarras Island can accommodate a vessel with maximum 12 ft. draft. Discharge of dry cargo must be arranged well in advance through ship's Agent in Abu Dhabi who will supply labour and barges from Abu Dhabi. No gear whatsoever is available at Mubarras.

SAFETY:

No Smoking: Smoking on board the ship is strictly prohibited except in the smoking room situated in the aft accommodation and which has been jointly agreed between the Mooring Master and the Master.

The responsibility for the strict observance of the safety of these rooms rests with the ship, and the Company reserves the right to prohibit smoking in these rooms also should situation require at any time.

Accommodation: All accommodation doors, port holes and ventilators must be closed during loading operations, and doors and openings to machinery spaces in vicinity of ship's tanks are also to be closed.

Galley and Boiler Fires: As a general rule, the use of galley and boiler is not permitted. However, those appropriately equipped are considered safe for use, and their use will be mutually agreed between the Master and the Mooring Master.

Radio Equipment: Radio. radar or other electronic equipment must not be energized while the ship is on the berth.

Air-conditioning Units: For safety, it is preferable that these units recirculate the air within the accommodation but their use when drawing air from outside the accommodation may be permitted provided that the Master and the Mooring Master agree that no danger exists. Should any gas be detected within the accommodation or should there be any danger of gas within the accommodation these units must be stopped and the intakes closed. Window-type air-conditioners are forbidden at all times.

Ship's Fire-fighting Equipment: This equipment must be in constant readiness at all times with sufficient people on board for its efficient operation.

Fire Watches: While the vessel is within the port area a continuous and efficient fire watch shall be maintained on deck and in the engine room by the ship's crew. Fire-fighting equipment shall be in instant readiness throughout the vessel and additional extinguishers must be available at the loading manifold while hoses are being connected and disconnected. Water should be available on deck service lines at all times and fire hoses connected at all fire stations for immediate use.

Swimming: No swimming in the sea berth area is permitted while vessels are on berth.

AUTHORITY: Abu Dhabi Oil Co. Ltd. (Japan).

AGENT: National Shipping, Gulf Agency Co. (Abu Dhabi) Ltd. are appointed by Abu Dhabi Oil Co. Ltd. (Japan) as exclusive shipping Agents for all vessels calling at Halat Al Mubarras Terminal. The address particulars are as follows:

National Shipping, Gulf Agency Co. (Abu Dhabi) Ltd., POB 377, Abu Dhabi, United Arab Emirates, Cables: "Confidence", Abu Dhabi. Telex: 22248 ("GACAUH EM"). Tel.: 334300 (10 lines). After office hours 362820, 366665, 341728, 362942.

ETA messages shall be sent to National Shipping, Gulf Agency Co. (Abu Dhabi) Ltd., cable address: "Confidence", Abu Dhabi, via Bahrain Radio.

Vessels can otherwise communicate with NSGAC, Abu Dhabi, over Marine Radio HF, frequencies: standing by on 3539 kc/s. and transmitting on 2170, 2301, 2368, 2738, and 3539 kc/s., call sign "Confidence", Abu Dhabi.

Vessels equipped with SSB radios can also communicate with NSGAC, Abu Dhabi, on the frequencies, standing by on 6910 mHz lower side band and transmitting on 3539 and 6910 mHz, call sign "Confidence", Abu Dhabi.

Under favourable weather and transmitting conditions communication can also be performed over the VHF radio on the following frequencies: standing by on Channel 16 (156.8 mHz) and transmitting on Channel 9, 10, 12, 13 and 14, call sign "Confidence", Abu Dhabi.

PORT RASHID, Dubai: 25.16 N. 55.16 E.

(See Plan Book)

FLAG: U.A.E. and Dubai.

DOCUMENTS: The following should be airmailed to Agent prior to ship's arrival.

6 Dangerous Cargo Lists.
2 Stowage Plans.
2 Hatch Lists.
7 Cargo Manifests.
2 Freighted Manifests.
1 each Bill of Lading.
4 Crew Lists required (on arrival).

APPROACHES: Black and white Pillar Buoy, flashing every 10 secs. in position Lat. 25° 21′ N. Long. 55° 14′ E. Marked "Dubai Approach".

Main light in position Lat. 25° 13.3′ N. Long. 55° 17.3′ E. (Situated on top of the Dubai Trade Centre) Group Flash (W) 2 every 30 secs. 157 m. above MHWST. Visible 30 miles.

Main breakwater light flashing (G) twice every 6 secs. elevation 30 ft. visibility 5 miles. Lee breakwater light flashing (R) every 2.5 secs. elevation 30 ft. visibility 5 miles.

PILOTAGE: Compulsory. Pilot will board 24 hours a day, from a launch or by tug and a Pilot ladder should be provided and a lee given. Large vessels calling at the dry dock should provide an accommodation ladder with its lower platform within about 12 ft. of the waterline and a pilot ladder rigged on ship's side adjacent to the accommodation ladder platform.

The Master must sign the indemnity form provided by the Pilot before entering the harbour.

ANCHORAGE: Vessels should contact Dubai Port Control VHF, Channel 16 shifting to a working Channel as instructed. Failing instructions they should anchor approximately 1.5 miles from the port entrance. Holding ground – Generally poor.

RESTRICTIONS: Minimum depth in channel 13 m. Max. rise and fall 2.0 m.

Vessels not working cargo immediately on arrival will not enter the port. Vessels may leave at any time.

MAX. SIZE: Depth alongside at Port Rashid container terminal is 13 m. and the tide is not expected to go as low as zero height on average more than 55 days in any one year. Therefore, Dubai Port Services are prepared to berth vessels up to 42 ft. draft, at minimum speed at all times. Provided vessels can discharge in such a manner as not to trim so as to cause an increase in maximum draft.

Maximum draft at general cargo berths is 37.7 ft. subject to prior notice. Depths of water at general cargo berths varies from 30.5 ft. – 37.7 ft.

Dubai Port Services consider that keel clearance is at the Masters discretion, and are prepared to berth vessels with minimum keel clearance of six inches.

No restriction on length or beam.

TUGS: Two 2,000 h.p. and one 1,300 h.p. are available the practice being to secure alongside with 2 tug ropes therefore gangway and derricks should be secured in-board.

Tugs are fitted with VHF. Contact should be made via Dubai Port Control or the Harbour Master.

RADIO: The Port Signal Station (call sign 'Dubai Port Control') is fully equipped with VHF radio and watch is maintained 24 hours per day on Channel 16, switching to Channels 14, 12, 9, 6, 67, 32 port operations are controlled on Channels 65A and 66A; the Signal Station is fitted with VHF direction finding and recording equipment to assist in prosecuting stations contravening international radio procedure and regulations.

The Signal Station is situated at the seaward end of No. 1 berth at a height of 57 ft. above sea level.

Vessels should contact the signal station by VHF Channel 16 and request berthing instructions.

Vessels should advise their Agents the arrival time, LOA, draft and position of bunkers, connections if bunkers are required and advise amended ETA where possible by VHF. They in turn will pass the information on to the Port Authority.

HEALTH: Normal quarantine regulations apply and pratique can be given by the Pilot on cargo vessels, always subject to the Health Authorities approval. Health Authorities only board when the vessel is alongside, except in the case of a suspected ship.

BERTHING: Vessels should advise their Agents of their ETA, length overall and draft by VHF if possible. Agents should also be advised of any explosives or hazardous cargo on board to determine if it should be offloaded before berthing or otherwise.

35 deep water berths with 26 storage sheds (each 400 ft.×200 ft.) adjacent are available as well as 4 berths restricted to vessels with less than 6.10 m. (20 ft.) draft. Extensive hard surfaced yard storage areas. Each berth provided with forklift trucks and trailers. Cargo is discharged direct to sheds or to storage areas where mobile cranes from 5 to 25 tons capacity operate or by direct delivery to consignee's vehicles. 2 container cranes of 35 ton capacity are available on berth No. 33 and 2×40 ton container cranes on berths Nos. 34 to 35 together with Karrilift, Karricon and other associated container handling equipment operating in a controlled container terminal. Refrigerated containers – electricity connections available.

A restricted number of vessels may anchor within the harbour breakwaters under instructions from the Harbour Master if so required, and may discharge/load ex-lighters.

Depths at Berths: No. 1 berth 10 m. (33 ft.), No. 2 berth 9.7 m. (32 ft.), No. 9 – 10 berth 10 m. (33 ft.), No. 3 – 16 berths (except No. 9 – 10) 9.3 m. (30.5 ft.), No. 16 to 32 berths 11.4 m. (37.5 ft.), No. 33 to 35 berths 12.95 m. (42.5 ft.).

FRESH WATER: Available at all berths. Rate 20 t.p.h. per hose.

FUEL: Shell Bunker Fuels are available at berths Nos. 1 to 4, 6 to 9 and 17 to 38 in addition to Tanker Berth and include fuel oil, thin fuel oils, diesel and gasoil, pumping rate 300 t.p.h.: 48 hours' notice should be given to local Agents or Shell Markets (M.E.) Ltd., P.O. Box 307, Dubai, Tel: 450451; Telex: 5478 DB; Cables: Shell Dubai. Marine Lubricants and chemicals are available for delivery to the ship.

Delivery of fuel oil and gas oil at the Petroleum Jetty via 12 in. loading line at up to 500 long t.p.h.

TANKERS: Berth operated by Shell Markets (M.E.) Ltd. Capable of taking vessels up to 260 m. long. Max. draft 11.3 m., vessels of 11.3 m. but not over 11.6 m. draft may be berthed by arrangement with the Harbour Master at HW.

CARGO HANDLING: *Working hours:* Saturday – Thursday, 1st shift: 0700 – 1400 hrs. Special shift: 1400 – 1600 hrs.; 2nd shift: 1830 – 0030 hrs. Special shift: 0030 – 0530 hrs.

Working hours are at the discretion of the Port Manager.

Cargo is handled on Fridays and most Public Holidays. The Port Manager may require full night work or special shifts in the interest of the Port.

Each berth is provided with fork-lift trucks and trailers. Pallets to assist cargo handling are available without charge. Cargo is discharged direct to sheds (400 ft. by 200 ft.) or to storage areas where mobile cranes varying from 5 to 25 tons lift operate.

Ship: Ships gangs are available for distribution to vessels through Agents, vessels should advise their requirements before arrival. The gangs board and operate under the supervision of ship's officers. No quay cranes are provided, so ship's derricks/cranes must be used, together with cargo handling equipment. A close liaison should be maintained with the Cargo Superintendent or Shed Supervisor at all times.

Lighterage; When berths are fully occupied, vessels may discharge/load ex-lighters at anchorage.

STEVEDORES: Gangs available, ordered by Agent before vessel's arrival. Gangs board and operate under supervision of ship's officer. Ship's gear used. Working hours: See "Cargo Handling".

MEDICAL: Qualified doctors and hospital available at Dubai, also Dentists.

AIRPORT: International airport, 3.2 km.

SURVEYORS: Lloyds Agents, Lloyds Register of Shipping. American Bureau of Shipping. Germanischer Lloyds.

DRYDOCK: *Dubai Drydock:* (Opening date not yet known). A complete ship repair facility East of Port Rashid. Vessels up to 1,000,000 d.w.t. can be docked. Approach areas dredged to 11.5 m. enclosed by breakwater.

Dock No. 1 370 m.×66 m. (350,000 tonnes)
No. 2 525 m.×100 m. (1,000,000 tonnes)
No. 3 415 m.×80 m. (500,000 tonnes)

Dockside Cranes:

2×120 tonnes Safe working load at 65.5 m. radius.
1× 25 tonnes Safe working load at 80.0 m. radius.
2× 15 tonnes Safe working load at 70.0 m. radius.

REPAIRS: Galadari Engineering; P.O. Box 355, Dubai; Tel: 660803, Telex: Gabros DB 5443; Al Nasr Engineering Co. P.O. Box 1106, Dubai; Tel: 223624; Telex: 5638 DB; Cables: Alnasr – Dubai, and the services of the large Dry Dock Complex capable of accepting vessels up to 1,000,000 d.w.t.

Round the clock service which ranges from major boiler repairs to repair of main diesel engines and auxiliaries, underwater welding, shot blasting hull cleaning and diving services. Gulf Lux Marine Services Ltd., offer a wide range of in-water service including scraping, blasting and recoating. Technical Engineering and Marine Services (TEAMS) have 1 slipway which can accommodate vessels up to 1,000 tons. They are also able to handle all kinds of engine and hull repairs.

OFFSHORE SERVICES: Crew changes, delivery of ship's mail, stores, spares, etc., can be effected by service boats off Dubai or Fujairah. This service is carried out by Gulf Agency Co. (Dubai) Pvt. Ltd. See "Agent".

JOINING/REPATRIATION: Arriving crew holding valid seaman's book can be cleared from the airport and placed on board on the strength of a guarantee letter from the Agent to the Immigration Office.

Repatriating crew can be brought ashore with a similar guarantee tendering the airticket to the Port Immigration Office. They must be picked up from the ship 24 hours prior to departure.

TELEPHONES: Situated in sheds, no connection made to vessels.

SHORE LEAVE: Agents collect all passports on vessel's arrival, together with 3 copies of crew list. Temporary shore leave passes are issued by the Immigration Office against passports and Crew Lists.

GENERAL: Refer to "Dubai" for all general information.

AUTHORITY: General Manager. Dubai Port Services.

AGENT: Gulf Agency Co. (Dubai) Pvt. Ltd. P.O.B. 2404, Dubai, U.A.E. Cables: "Confidence", Dubai. Tel: 421300. (12 lines 24 hours service) After office hours 442163, 445221, 443070, 459147, 443650, 441544. Telex 45448, 45809 ("GACDB EM") Radio: Marine VHF radio, stand-by on Channel 16 (156.8 mHz) Callsign "Confidence, Dubai".

Operators of ship-servicing and supply organisation: Crew changes, mail, spares and/or delivery of provisions undertaken at sea without deviation to serviced vessel.

Owners and Masters should contact G.A.C. Dubai by cable or telex regarding servicing requirements. Rendezvous positions are selected by Shipmaster as follows: Off Dubai, at any Latitude along meridian 55 East, or off Fujairah at any Longitude along parallel 25.10 North.

RAS AL-KHAIMA: 25.45 N. 56.01 E.

There is a jetty, length 100 m., suitable for berthing smaller vessels, which is protected by a breakwater, and development plans include dredging the inlet to enable vessels with a draft of up to 25 ft. to berth.
DEVELOPMENTS: See "Mina Saqr".

AGENT: See "Mina Saqr".

RUWAIS: 24.09 N. 52.45 E.

Proposed temporary anchorage for construction cargo vessels is located between 24° 11′ N., 52° 44′ E. and 24° 10.6′ N., 52° 45′ E.

Approximate location of construction wharf is 24° 08.6′ N., 52° 45′ E.

Total length of the jetty 200 m. (completed). The jetty will be able to bear loads of 4 tons per sq. ft. A separate Ro/ Ro jetty with a drive off ramp is also completed. The width of the opening where the Ro/Ro vessel will berth is 50 m. and the length 100 m. The height of the jetty at high water level is approx. 1.3 m. and chart Datum level 3.1 m. There is a temporary "L" shaped jetty with max. depth of 4 m. and length of between 60 – 70 m. for discharging cargo from barges.

Labour supplied by ADNOC's Sub-contractors.

Vessels proceeding to Ruwais must pass through Jebel Dhanna Tanker Channel where Abu Dhabi Petroleum Ports Operating Co. will be handling vessel up to anchorage.
AUTHORITY: Abu Dhabi National Oil Co. (ADNOC).

AGENT: See "Mina Zayed".

SHARJAH: (Mina Khalid) 25.22 N. 55.24 E.

(See Plan Book)

DOCUMENTS: The following documents must be in the possession of the ship's Master on arrival or must be forwarded to ship's Agent prior to ship's arrival:

Immigration:
2 Crew Lists.
2 Passenger Lists.

Customs:
2 Crew Lists.
2 Passenger Lists.
2 List of Alcoholic beverages.
2 Cargo manifests.

Port Operations:
2 Cargo Manifests.
2 Dangerous Goods List.
2 Stowage Plans.
Certificate of Registration.
Classification Certificates.

PILOTAGE: Pilotage is compulsory for all ships entering and leaving the deep water harbour. On entry, Pilots will board to seaward of the fairway buoy; a pilot ladder should be provided. Port Khalid will operate a 24-hour, 7-day week pilotage service. Notice is required before 2200 hrs. for pilotage requirements between 2400 hrs. and 0600 hrs.
ANCHORAGE: The fairway buoy in position Lat. 25° 22.9′ N. Long. 55° 20.85′ E. is a black pillar buoy flashing white every 1.5 seconds. Vessels approaching should await Pilot to seaward of fairway buoy, anchoring if necessary.

Protected Anchorage:

A limited number of vessels may anchor at moorings within the deep water harbour with prior approval of the Port Operator.
MAX. SIZE: Max. draft entering and leaving is 8.7 m. (28.5 ft.). Tidal range 1.2 m. (4 ft.). Deep water channel to berths Nos. 6 and 7 maximum draft is 9.5 m.
HEALTH: Normal quarantine regulations apply.

Radio pratique will be granted on receipt of radio message from Master, via his Agent, stating that no serious illness has occured during the preceding thirty days. All crew members must be in possession of valid smallpox and cholera certificates. The Health Officer will only board when the vessel is alongside.
RADIO: *Notice of Arrival:*

Vessels should advise their Agent ETA Port Khalid, giving draft, L.O.A., and intended cargo operations to be performed, at least 72 hours prior to arrival.

Agents should arrange berthing and labour with the Port Operator. Vessels should contact Port signal station on VHF Channel 16 (call sign "Sharjah Port Control") when within range. Working Channels 6, 9, 12, 13, 74 and 67.
TUGS: Tug services are available for all ships entering the deep water harbour. At the discretion of the Port Operator ships may be obliged to use the services of a tug or tugs.

Tugs are fitted with VHF.

The harbour tugs are fitted with fire fighting hoses and monitors and foam tanks.
BERTHING: Arrangements made with Harbour Master by ship's Agent for necessary berthing as required.

Berth No.	Depth at LW	Usage
1	28 ft.	Containers
2	28 ft.	Containers
3	28 ft.	General Cargo
4	28 ft.	General Cargo
5	28 ft.	General Cargo/Ro-Ro
6	31 ft.	General Cargo/Ro-Ro
7	31 ft.	Ro-Ro
8	28 ft.	Reefer
9	28 ft.	General Cargo
10	28 ft.	General Cargo
11	30 ft.	General Cargo

Total length No. 1 and 2 berths 1,192 ft. (363 m.). Total length No. 3, 4, 5, and 6 berths 2362 ft. (720 m.).
Deep water berth No. 6 – 274 m. (900 ft.) No. 7 berth 220 m. (722 ft.). Total length berths 8 and 9 – 360 m. (1,181 ft.). Berth 10 – 210 m. (689 ft.). Berth 11 – 195 m. (640 ft.).
Equipment Available: The Sharjah Container Terminal (SCT) which comprises berths 1 & 2 in the deep water harbour is equipped with Tango gantry cranes. These berths are also equipped with specialized equipment to handle containers in the storage area. Each berth is provided with fork lift trucks, trailers and yard hustlers to facilitate the movement of cargo. Pallets are available to assist cargo handling. 2 heavy lift mobile cranes of 40 and 90-ton capacity are available on request from the Port Operator. Other equipment, including cranes, trailers, etc., will be made available upon request to the Port Operator with 24 hours notice.
Lighterage; Lighterage services are available.
Storage Facilities: Storage facilities consists of 11 sheds (2 of which are located in the Container Terminal area) having an area under roof of 28,000 sq.m. (300,000 sq.ft.). In addition, hard surfaced yards and Sharjah Container Terminal Stacking/Packing area provide extensive storage capacity.
Cold Store: A 4,800 ton capacity cold store (frozen and chilled) is located at Berth 8 with mechanical handling from ship's hold to store.
STEVEDORES: The port will operate on a 24-hour, 7-day week basis ashore and afloat. Additional charges will apply outside normal working hours which are defined as follows:

Saturday to Thursday except public holidays.

First shift	0600 to 1400 hrs.
Second shift	1400 to 2200 hrs.

Normal working hours are subject to change during Ramadan, when working hours will be at the discretion of the Port Operator. Requirements for port labour must be submitted by ship's Agent to the Port Operator by 1600 hrs. for work during the first shift on the following day and by 1100 hrs. on the same day for work during the second and third shifts.
MEDICAL: Upon application to ship's Agent, medical examination of crew members can be arranged. Personnel will either be sent to private Doctor or to Public Health Department, as circumstances dictate. Serious cases will be referred to Government Hospital Doctor.
TANKERS: Tanker jetty situated in harbour on main breakwater. Draft alongside 31 ft. Limited bunkering facilities.
DENSITY: 1025/1028.
FUEL: Deliveries of fuel oil, gas oil or blends may be arranged through vessel's Agents. Marine lubricants will be delivered to ship's side. Both services require 48 hours notice.
FRESH WATER: Fresh water is obtainable at all berths.
REPAIRS: Good facilities for repairs.
DRY DOCKS: None.
SURVEYORS: Services are available upon request.
REPATRIATION: Proximity of the new Sharjah International Airport will permit efficient crew changes and repatriation. Off-shore crew changes facilities can be arranged.

Transit visas are not required for crew changes. Ships passengers require a valid visa for transit or temporary stay.
AIRPORT: Dubai and Sharjah.
HOLIDAYS: The following are days that will be observed as public holidays. Premium tariff rates will apply on these days.

1st January	New Year's Day
8th February	Prophet's birthday (Mawlid al Nabi)
21st June	Ascension of Prophet (Lailat al Miraj)
*23rd August	Id al Fitr
*24th August	
*25th August	
*26th August	
*29th August	Waqfa
*30th October	Id al Adha
*31st October	
*1st November	
*19th November	Moslem New Year
2nd December	National Day
25th December	Christmas

*Dates approximate – may vary by 1 or 2 days from year to year.
TIME: GMT plus 4 hours. Permanent.
SHORE LEAVE: Shore leave is permitted for crew members provided identification card or seaman's papers are deposited with Immigration office situated in the port and collected upon return.
GENERAL: *Pollution:* The provisions of the Sharjah Maritime Law shall apply with respect to the operation of vessels in Sharjah Coastal Waters. Garbage disposal services are provided by the Port Operator and are compulsory.
Ships Chandlers: Complete ship chandlering facilities are available, handling provisions, laundry and bonded stores.
AUTHORITY: Sharjah Port Authority.

AGENT: Gulf Agency Co. (Sharjah) Ltd., P.O.B. 435, Sharjah, U.A.E. Cables: "Confidence" Sharjah, Tel.: 22163, 23503. After office hours 355676, 354249. Telex 68019 ("Confid EM"). Radio: Marine VHF radio, stand-by on Channel 16 (156.8 mHz). Call sign: "Confidence" Sharjah.

Air-freighted spare parts and ships' mail to Sharjah should be addressed to GAC Sharjah, but sent to Sharjah International Airport or Dubai Airport marked "Ship's Stores In Transit for M/S . . ." Certificates of Origin should follow the air waybill or in cases of emergency be sent to GAC Sharjah, soonest after shipment. Cable "Confidence" Sharjah, of flight details and Air Waybill number.

UMM AL QAIWAIN: 25.35 N. 55.35 E.

(See Plan Book)

LOCATION: Approx. 20 miles North of Sharjah.
PILOTAGE: Service not available at the present time.
RESTRICTIONS: Depth of channel is presently 10 m., width 100 m., tidal range +0.2 m. – +1.7 m.
MAX. SIZE:

Details of shipping able to berth at individual wharves:

Town Wharf:

Ship	*Size*	*Draft(m.)*	*Length (m.)*
Passenger ship	500 gross tons	4.0	50
Freighter	700 d.w.t.	3.6	52
Freighter*	1,000 d.w.t.	4.1	60
Tanker	700 d.w.t.	3.8	54
Tanker*	1,000 d.w.t.	4.2	61

Deep Water Wharves No. 3 and No. 4:

Ship	*Size*	*Draft(m.)*	*Length (m.)*
Passenger ship	30,000 gross tons	9.5	210
Freighters	17,000 d.w.t.	9.8	173
Container	16,900 d.w.t.	9.8	200
Tanker	20,000 d.w.t.	9.5	164
Ore Carrier	25,000 d.w.t.	9.8	176

*Dependent on state of tide.

BERTHING: *Town Wharf:* This wharf is 800 m. long providing berthing facilities for ships with a max. draft of 4 m. A guide to the size of ships able to berth at this wharf is given under "Max. Size". Bollards are located at 12 m. intervals and timber fenders and rubbing strips have been incorporated. The capping beam level is +2.66 m. above Admiralty Chart Datum and the minimum dredged level adjacent to the wharf is −4.0 m. Steps have been incorporated at the Western end of the wharf to enable loading of small local boats. The allowable surcharge loading adjacent to the wharf is 2.0 tonnes/sq.m.

The channel in front of the wharf is 100 m. wide and is dredged to a minimum depth of −4 m. The channel extends from the Eastern end of the wharf along its full length and for a distance of approximately 3 km. along the Western shore of the creek. At the Western end of the wharf the channel has been widened to form a turning circle. The channel has been marked with standard buoys and beacons in accordance with International Regulations.

The area behind the wharf is a minimum of 50 m. wide, the boundaries being the wharf and the existing road. This area has been reclaimed using dredged fill and surfaced with local materials. Other reclaimed areas exist along the Western bank of the channel and opposite the existing fish market. Both these areas have been reclaimed to a surface level of +3.0 m.

Deep Water Wharf:

This wharf is divided into four sections:

Wharf No. 1	130 m. long	Dredged depth – 5.5 m.
Wharf No. 2	115 m. long	Dredged depth – 7.5 m.
Wharf No. 3	200 m. long	Dredged depth – 9.5 m.
Wharf No. 4	400 m. long	Dredged depth – 10.0 m.

Wharves No. 1 and No. 2 are similar to the Town Wharf previously described but with increased dredged depths. Wharves No. 3 and No. 4 provide berthing facilities for ships with a max. draft of 9.5 m. and 10.0 m. respectively and a max. length of 200 m.

A guide to the size of ships able to berth at these wharves is given under "Max. Size". Bollards are located at 22.4 m. intervals and rubber "V" type fenders have been incorporated on Wharf No. 4. The capping beam level is +2.66 m. and the allowable surcharge adjacent to the wharf is 2.0 tonnes/sq.m.

A 30 m. wide concrete hard standing is provided behind all 4 wharves and the entire wharf area is lit by 400 watt H.P.S. High Mast Lighting. Potable water facilities have been installed together with provision for future fuel bunkering and connection to the local telephone exchange.

The entrance channel to Umm Al Qaiwain Port is a minimum of 100 m. wide increasing to 160 m. wide at the Northern end of Wharf No. 4 and connects with a 500 m. diameter turning circle at the Southern end of Wharf No. 3. The channel and turning circle are both dredged to a minimum depth of −10.0 m. and are marked with standard buoys and beacons in accordance with International Regulations.

Navigational information for entering the Port of Umm Al Qaiwain can be found on Admiralty Chart No. 3714.

AGENT: See "Dubai".

ZIRKU ISLAND (Jazttzarakku Island): 24.52 N. 53.04 E.

(See Plan Book)

The following information was issued in October 1980 and applies mainly to contractors.

GENERAL: 2 SPM's for loading of tankers will be installed around mid 1981 and located approximately 25° N., 53° E., about 9 nautical miles N.N.W. of the Island.

Bunker storage located in the vicinity of these SPMs is being studied at the moment.

A third SPM may be installed later.

No deballasting facilities will be available.

New port limits will be issued before starting up of production and exportation expected at the beginning of 1982.

LOCATION: Zirku Island is located at 24° 52′ N., 53° 04′ E. approximately 75 nautical miles W.N.W. of Abu Dhabi.

It is 5 km. long and 2.5 km. wide.

A zone of very rugged hills with ridges is located on the N.N.W. centre with an elevated point of 163 m. and a low flat sandy and dusty zone in the S.S.E. where the airport lies.

PORT LIMITS: During the construction stage and pending further information to be laid down for the future Zirku Oil Terminal the port limits of the Zirku Island Harbour are defined temporarily as follows:

One nautical mile in open sea from the Island coasts or jetties (present and future).

NAVIGATION: *Manoeuvring and Navigation:* All vessels should manoeuvre and navigate within the port in accordance with the International Regulations for the prevention of collision at sea.

Lights and Shapes: All vessels should exhibit such lights and/or daytime marks as defined by International Regulations to prevent collision at sea.

Special attention should be paid by vessels, barges or tugs moored or anchored in the vicinity of the jetties which should show at night the lights defined in these regulations.

High Tide Manoeuvres: Deep draft vessels and barges will be berthed at high tide only.

Shallow Water: While proceeding to the jetties, Masters should pay sharp attention to navigation due to the presence of shallow water existing in the vicinity.

Caution: Masters should consider the possibility of having less water than predicted by tide tables after a long period of bad weather.

Harbour Facilities: No tugs or mooring launches are presently available, accordingly vessels calling at Zirku harbour, should have very good manoeuvrability.

NAVIGATIONAL AIDS:

a. Lighthouse (Zirku, Zarakuh or Zarqa) located on top of the hill. Height 157 m. Visible at 22 nautical miles. Position 24° 53′ N., 53° 04.2′ E. One flash every 10 seconds. Visible 025°–360° (335°). Obscured within 2 miles 223°–264°.

b. *Aero lights* (Occasional):

(i) Located on the Airport Control Tower (green). Position 24° 51.6′ N., 53° 04.6′ E.

(ii) Located on the hill (red). Position 24° 52.5′ N., 53° 04.1 E., Height 67 m.

c. Flashing lighthouse at the end of the main jetty. Position 24° 52.3′ N., 53° 05.5′ E. Flash-fixed, and flashing, 1 every 10 seconds, height 11 m., colour green, obscured approximately 70°–150° (80°).

ANCHORAGE: *Anchorage Berths and Moorings:* Every vessel or barge entering the port should occupy such anchorage berth or mooring as may be directed by the Port Authority or Traffic Superintendent and shall move to any other anchorage, berth or mooring as and when required by these authorities.

No vessel or barge shall shift or change anchorage, berth or mooring allotted without port authorization except if instructed to do so.

Waiting Anchorage: Small vessels and barges waiting for a berth alongside the main jetty can anchor 0.5 miles S.S.E. of the end of jetty in water approximately 7 m. in depth.

Vessels and barges waiting for a berth on the temporary jetties "A" and "B" shall anchor at least 0.5 miles from them.

Private mooring lines are located temporarily about 0.5 miles South of the main jetty. Private mooring lines are located temporarily in the vicinity of temporary jetties "A" and "B".

Sharp look must be kept when navigating in these areas.

Prohibited Anchorage Areas: To avoid the underwater oil pipe-lines being damaged, prohibited anchorage areas are defined as follows:

0.5 nautical miles on each side of the M.O.L. (Main Oil Line) input line.
0.5 nautical miles on each side of the loading lines.

M.O.L. input line from Zakum field comes ashore on the middle of the East Coast.

Loading lines to the oil terminal SPM's leave the Island from the N.N.W. point of the Island.

RESTRICTIONS: No berthing will be allowed during night-time.

RADIO: Permanent watch is maintained by "Zirku Island" radio room on Channel 8.

Temporary watch is maintained by Zirku Marine during movement of vessels on Channels 8 or 69.

ARRIVAL ADVICE: *Notice of Arrival:* Vessels and barges calling at Zirku harbour should advise their ETA at least 48 hours before their arrival through normal radio service or telex to Zirku Marine.

In case of change of the scheduled ETA by more than 6 hours Zirku Marine should be informed by the same way.

Confirmation of ETA should be sent a few hours before arrival at Zirku as soon as a radio link can be set up on VHF Channel 8 with "Zirku Island" radio room or "Zirku Marine".

Berthing prospects will be given to incoming ships by "Zirku Marine" at this time. If the vessel is instructed to anchor, she must keep a permanent watch on VHF Channel 16.

During berthing operations contact will be set up with "Zirku Marine" on VHF Channel 8 or 69.

Arrival Message: The first message should be sent according to the following form but any items which are the same with a recent previous voyage to this port may be omitted.

Name of vessel (tug or barge):
ETA Zirku.
Type of vessel
Length.
Width.
Max. draft on arrival.
Cargo loaded (briefly).
Contractor charterer.
Name of Master.
Coming from and ETD.

BERTHING: Zirku Island Harbour is a private port, hence only vessels and barges chartered by the Company Zadco (Zakum Development Company), acting on behalf of ADNOC (Abu Dhabi National Oil Company) and its contractors through Manager and Engineering Companies, are allowed to moor alongside the jetties.

Jetties: The main jetty located on the East coast of the Island is allotted to the general supplying of the Island and the transit of equipment for the plant's construction.

Temporary jetty "A" (on the South of the Island) is more particularly allotted to the traffic operations of the part "A" (plant).

Temporary jetty "B" (on the West of the Island) is more particularly allotted to the traffic operations of the part "B" (living area).

Both of them can be used by other ships when necessary as ordered by the Port Authority.

Vessels: Contractors shall charter suitable barges, tugs and ships in accordance with the dimensions and characteristics of these jetties they built themselves in order that vessels may enter, moor and unload in safe conditions.

Emergency use: Other craft may use this harbour only in emergency and must immediately report their arrival to the Port Authority.

All craft using the harbour are subject to the control of the Port Authority (Zirku Marine Superintendant or his deputy).

Berth Occupancy: The Port Authority will define the allocation of berth in accordance with the Company's requirements of priority upon Manager's recommendations.

Contractors should start discharging as soon as vessel or barge is berthed and should unload until all the cargo has been thoroughly discharged.

Contractors should not store their cargo on the jetty. They must remove it as unloading proceeds. Vessels and barges should leave as soon as the handling of cargo is completed in order to free the quays. The Port Authority can order vessels and barges to leave the quay at any time (even though not completely unloaded), so they must be able to move, therefore barge shall keep a tug alongside during the whole time of unloading.

BERTHING FACILITIES: *Main Jetty:* The main jetty located on the East coast of the island is approximately 1,200 m. long and orientated N.W./S.E.

The quay at the end of the main jetty has a water depth of 2 m. and is 12.5 m. long (41 ft.) at the inward end; 2.3 m. × 40.5 m. long (132 ft.) in the centre and 3 m. × 57 m. long (187 ft.) at the seaward end (water depth is calculated under chart datum C.D.)

The quay is fitted with 8 × 30 ton bollards, 12 pairs of rubber fenders from a level of 1.50 below C.D. to top of quay level and 3 steel ladders running from a level of 1.50 m. below C.D. to the top of quay level.

The quay available for berthing is 110 m. long (360 ft.) orientated N.W./S.E. as is the main jetty breakwater.

At the inward end a 20 m. long quay orientated S.W./N.E. is available for small launches though badly equipped with mooring points.

Temporary Jetty "A": Allotted to Civil Work Contractors part "A" located on the South of the Island near the Airport.

The quay available for berthing is about 50 m. long (164 ft.).

No accurate survey on water depth in the vicinity and alongside, following information should be used very cautiously.

About 2.50 m. water depth under C.D. alongside but there is shallow water in the access channel from West.

Vessels and barges going to this jetty with a 2.0 m. draft should proceed only on high tide.

Temporary Jetty "B": Allotted to Contractor part "B", (under construction, planned to be completed shortly).

Located on the West Coast (North of the airport), in the alignment of the two 1,000,000 barrels reservoirs.

The jetty will be 400 m. long (1,311 ft.) orientated E./W. with a 50 m. quay available for berthing at the seaward end. The water depth is about 3.50 m. under C.D. alongside. No accurate survey being made, vessels and barges should proceed very cautiously.

CRANES: No fixed crane or permanent lifting equipment for unloading is available on the jetties.

Contractors have to supply the Island with their own mobile equipment to discharge vessels and barges.

As soon as the unloading is completed Contractors should remove their mobile equipment to keep the jetty area clear.

Location of Cranes: The main quay can bear anywhere a 30 tons crane (up to 45 tons for exceptional cases). For heavy loads two locations are defined as follows:

100 tons crane: one rectangle of which axle is situated at 15 m. from the inward end of the quay.

300 tons crane: the centre of the crane must be situated at 15 m. from the edges of the jetty seaward end.

TANKERS: Fuel unloading.

Main Quay: Connection pipe and booster pump are located on the inward end of the quay.

Due to shallow water existing alongside, ships unable to moor at this berth should be fitted with sufficient length of hoses to be connected to the Island pipe end from the seaward berth. This pipe is used to fill up the two 200 cu.m. tanks supplying the camp utilities.

Jetty "A": Two small temporary tanks are located to Southward of the jetty for storage of fuel or diesel oil supplying the civil work Contractors part "A".

At the same end of the jetty there is a connection with the water pipe supplying the water tank located in the civil work Contractor's area part "A".

Jetty "B": (to be completed shortly). For supplying Contractor part "B". Five small temporary tanks are located in the middle of this jetty.

MEDICAL: A medical officer is resident on the Island for emergency cases only. The Company maintains a small hospital.

SAFETY: *Reporting of emergency:* Should any vessel be in danger through fire, explosion, collision or whatsoever cause, the Master should immediately report the fact to the Port Authority by VHF radio Channel 8.

When alongside the main jetty they can report through the shore/port telephone system located at the inward end of the quay.

Phone Numbers: Day and Night: Radio Room 22 or 33
Day: Safety Fire Brigade 70
Sea rescue 70
Medical assistance 20 or 30
Safety Engineer 35
Field Manager 42

Safety equipment on the Island:
Fire fighting vehicle: Can reach any jetty in a few minutes on emergency call.

Water tank – 2,500 litres
Foam compound – 300 litres
Motor pump – 100 cu.m/hrs. at 11 bars
Monitor output – 1,250 litres/min.
or
Foam output – 10 cu.m./min. effective range 35 m.
Dry powder equipment – 100 kg. of dry powder
Output 150 kg./min. effective range 8 m.
Plus small equipment for rescue and fire fighting.

Fire fighting equipment: Only mobile extinguishers are available on the 3 jetties.

Ships fire fighting equipment: This equipment must be in constant readiness at all times with sufficient skilful personnel on board for its efficient operation.

Particular safety requirements for vessels unloading inflammable products:
All cargo/bunker tank lids must be closed.

A fire fighting hose must be ready for use and supplied in water near the piping and connection on the deck.

In the same way extinguishers must be disposed on the deck. Cargo/bunker hoses must be properly rigged without leakage.

Cargo tanks being discharged and open to atmosphere must be fitted with an agreed venting system.

Foam and/or dry powder monitors, if fitted, shall be ready for use.

Portable fire extinguishers, shall be conveniently placed for use near the ships hoses connection.

EMERGENCY: *Emergency moving of vessels:* In case of accident vessels shall be able to move quickly, so no repairs to engines are allowed when alongside for self propelled vessels and barges shall keep a tug alongside during the whole time of unloading.

WEATHER: *Winds:* Four kinds of winds on the Island:
The most frequent (54% of the time) are named Shamals they blow from W.N.W. to N. principally in Winter. From N.N.E. to E.N.E. come 20% of the time the Noshi. Local effects of Monsoon, the Kaus blows from E. to S. 17% of the time.

Finally, during the Winter only, and 9% of the time blows from W.S.W. to W. the Suhaili.

Tides: Around Zirku Island the tide is of mixed type with small diurnal predominance, however this semi diurnal effect is not of great significance and for all practical purposes it can be taken that there is only one high water and one low water per day.

The mean spring tide range is approximately 1.2 m. The maximal range would be of about 1.4 m. The mean usual range would be 0.9 m.

As there is no specific tide prediction table for Zirku Island, use those published for Das Island.

Tidal Currents: At Zirku Island tidal currents are semi diurnal roughly flow runs from West to East and Ebb runs from East to West. Eddies are created at vicinity of any obstacle, (breakwater, jetties etc.) especially close to the South sandy end of the island. Currents can reach a speed of 2 knots. It is expected that these data are profoundly changed by winds, especially Shamal.

SHORE LEAVE: No person may go on shore without authorisation from the Zirku Police Authority and only if handed a shore leave or permanent authorisation card.

GENERAL: *Marks:* Name or number and draft marks should be readable from the jetties.

Unsuitable vessels: The port officer reserves the right to refuse berthing and unloading of any vessels considered unsuitable by reason of inadequate or unsatisfactory mooring equipment, insufficient derrick capacity, insufficient fender protection, overloading, inability to comply with the safety regulations or any circumstances which would create unusual risk to the Company's jetties, quays, facilities, personnel and equipment whatsoever.

Prevention of sea pollution: It is strictly prohibited to discharge or throw overboard oil, oily water, chemicals, ashes, bilge water or other refuse within the port limits that may result in pollution of the sea.

International oil pollution conventions must be strictly observed by all vessels or crafts.

The Master of any vessel contravening this rule so as to cause pollution shall be charged with an offence against these rules and upon conviction be liable to a fine and shall be incurred in the removal of such pollution.

The harbour users, Contractors and all vessel Masters, before leaving and/or sailing should make sure that jetty area is clean and all their refuse has been removed.

National courtesy flag: All vessels calling at Zirku are required to fly their national flag and the national flag of Abu Dhabi.

Swimming & diving: No person shall swim or dive from or near any vessel or alongside quay or berth.

No person shall engage in diving with the assistance of breathing apparatus within the above mentioned areas without the permission or instruction from the Port Authority.

OPERATORS: Zakum Development Company

AGENT: See "Mina Zayed".

United Kingdom

HEALTH—ALL PORTS:

PORT HEALTH (The Public Health (Ships) Regulations)

1. Simpler procedures for health clearance of ships arriving in the United Kingdom came into operation with effect from 1st April 1978.

2. Under these new rules the Master of a ship arriving from a foreign port must report to the port health authority†

(1) The occurrence on board during the voyage* of
- (a) death, other than by accident,
- (b) Illness where the person or persons concerned
  - (i) has or had a temperature of 38°C or greater which was accompanied by a rash, glandular swelling or jaundice, or persisting for more than 48 hours;
  - (ii) has or had diarrhoea severe enough to interfere with work or normal activities, or

(2) the presence on board of
- (a) a person suffering from an infectious disease or who has symptoms which may indicate the presence of infectious disease
- (b) any animal or captive bird of any species including rodents and poultry, or mortality or illness among such animals or birds.

(3) any other circumstances which are likely to cause the spread of infectious disease.

If there is nothing to report under any of these headings the Master has no need to obtain health clearance unless an authorised officer otherwise directs. A proportion of ships will be boarded and checked. If any of the conditions in (1)a (1)b and (2)a or (3) have occurred permission (free pratique) from an authorised officer will be necessary before disembarkation or commencing operation.

3. If the Master has something to report under 2 above he must—

(1) send a radio message not more than 12 hours and where practicable not less than 4 hours before arrival, giving the relevant information, to the port health authority† or, if the ship is not equipped with a radio transmitter, notify the port health authority†, wherever practicable before arrival and otherwise immediately on arrival;

(2) show or give the appropriate day or night signal when the ship enters the jurisdiction of the port health authority† (the codes are set out below);

(3) Until "free pratique" for health purposes has been given see to it that no person, other than Pilot, Customs officers, Immigration officer or authorised officer boards or leaves the ship without the permission of the medical officer;

(4) complete a Maritime Declaration of Health and arrange for it to be handed to the authorised officer.

In relation to the presence or illness of animals on board etc., the requirements at (2), (3) and (4) do not apply but where plague has occurred or is suspected amongst rats or mice or there has been abnormal mortality among them, a Maritime Declaration of Health should be completed.

The requirement at 3(4) above does not apply to a ship which has come directly from a port in the expected area of the Council of Europe i.e., Belgium, France, Greece, the Irish Republic, Italy, Netherlands, Spain and the United Kingdom.

4. Where it is necessary to obtain "free pratique" for health purposes the Master should have already to hand the authorised officer, a list of passengers and crew leaving the ship together with the addresses they are going to in the United Kingdom.

5. An authorised officer may, in circumstances other than those set out above, direct that the Master shall complete a Maritime Declaration of Health and that the Master shall apply restrictions on boarding or leaving the ship.

6. The Master of a ship that has met another ship, which has proceeded from a foreign port, or has met an off-shore installation, is required to comply with the rules in paragraphs 2—3 (but if the ship has proceeded from an excepted port a Maritime Declaration of Health need not be completed).

7. If the port health authority† is satisfied that the Master of a ship was aware, or should have been aware, of conditions and failed to report them then action may be taken under the Public Health legislation which may result, on summary conviction, to a maximum fine of £100 plus £50 per day.

INTERNATIONAL CODE OF SIGNALS
PRATIQUE MESSAGES

ZS	My vessel is "healthy" and I request free pratique	Q
	I require health clearance	QQ
ZT	My Maritime Declaration of Health has negative answers to the six health questions.	
ZU	My Maritime Declaration of Health has a positive answer to question(s)......... (indicated by appropriate number(s)).	
ZV	I believe I have been in an infected area during the last thirty days.	
ZW	I require Port Medical Officer.	
	ZW1 Port Medical Officer will be available at (time indicated).	
ZX	You should make the appropriate pratique signal.	
ZY	You have pratique.	
ZZ	You should proceed to anchorage for health clearance (at place indicated).	
	ZZ1 Where is the anchorage for health clearance?	
	I have a doctor on board.	AL
	Have you a doctor?	AM

*By night, a red light over a white light may be shown, where it can best be seen, by vessels requiring health clearance. These lights should *only* be about 2 m. (6 ft.) apart, should be exhibited within the precincts of a port, and should be visible all round the horizon *as nearly as possible.*

ABERDEEN: 57.09 N. 02.03 W. (See Plan Book)

DOCUMENTS:

1 Maritime Declaration of Health.
1 Crew's Effects List.
2 Ship's Report by Master.
1 Home Office Form 1B6.
1 Stores List.
1 Certificate of Deck Cargo Tonnage.
1 Light Certificate.
1 Port Dues Certificate.
Ship's Certificate of Registry.
Mercantile Marine Office Certificate – for British ships only.
Load-line Certificate.
Safety Equipment Certificate.
Lloyds Certificate.
Derat Certificate.
Ship's Register.
Light Bills.
Safety Radio Certificate.

In addition, Manifests and Bills of Lading are usually sent to Agent direct from loading port.

PILOTAGE: Aberdeen has a compulsory pilotage district and there are 10 licensed Pilots. Boatage service, although not compulsory, is available. There are 8 licensed boatmen.

There is a Navigation Control Service equipped with harbour surveillance radar which is operated by Navigation Control officers who operate on a 24-hour basis.

RESTRICTIONS: Navigation channel. max. designed width 110 ft., max. designed depth at HWOST 34 ft. Traffic signals regulate the movement of vessels in the Navigation Channel.

Entrance to Victoria Dock, depth at LAT 21 ft., clear width at entrance 140 ft.

MAX. SIZE: The port can normally accommodate a vessel of up to 525 ft. in length, 80 ft. beam and drawing 30 ft. 6 in. of water, and at the various berths in tidal waters can handle expeditiously bulk containers and general cargoes. A vessel of length 545 ft. has been handled.

HEALTH: Foreign arrivals to complete Maritime Declaration of Health. They are cleared immediately on arrival by either a port doctor or an officer of H.M. Customs depending on where the ship comes from and whether there is sickness on board.

Vessels arriving from ports within accepted area (N. European ports) and coastal arrivals need not present Declaration in all cases; when there is sickness on board the Port Health Authority must be informed preferably not more than 12 hours and not less than 3 hours before arrival.

Also see "Health – All Ports" before first UK port.

RADIO: There is a VHF radio communications system which operates on Channels 6, 11, 12 and 16.

BERTHING: Tidal:

Tidal Harbour	Length	3,461 ft.	Depth	26 – 34 ft.	HWOST
Albert Basin	,,	5,586 ft.	,,	25 – 29 ft.	,,
River Dee (Navigable)	,,	1,884 ft.	,,	25 – 28 ft.	,,
River Dee Dock	,,	1,398 ft.	,,	28 – 31 ft.	,,
Upper Dock	,,	1,950 ft.	,,	18 – 30 ft.	,,
Victoria Dock	,,	4,326 ft.	,,	22 – 28 ft.	,,

Deep-water Berths:

No. 1 Atlantic Wharf. This is 480 ft. long with 30 ft. water at low tide and 42 ft. 9 in. at HWOST. Two-storey transit shed. Two 3-ton electric portal cranes. Excellent road and rail connection.

No. 2 Pacific Wharf. This is 525 ft. long with 32 ft. of water at low tide and 44 ft. 9 in. at HWOST. Open quay. 2 × 6 ton and 1 × 50 ton electric Portal cranes capable of handling heavy lifts and containers. Roll-on/Roll-off service operated by P&O to Shetland.

FRESH WATER: This service is provided by the Grampian Region Water Services and is available at all quays.

REPAIRS: Ship-repairing facilities and shipping supplies are offered by a number of private firms and individuals with premises beside the harbour.

DRY DOCKS:

	Overall length (ft.)	*Breadth at entrance (ft.)*	*Depth on blocks (ft.)*	*Lifting capacity*
No. 1	180	29	16	700 tons
No. 4	180	38	18	1,000 tons

There are also 2 privately owned slipways and 1 drydock.

MEDICAL: Doctors and hospitals facilities available. Agents should be advised in advance of any medical attention required.

CUSTOMS ALLOWANCE: At the discretion of Local Customs Inspector. Normal allowances are equivalent to 8 oz. of tobacco per man and equivalent to 1 bottle of wine per man. Allowances may be halved for home trade vessels. Vessels in port for more than 3 or 4 days may receive extra allowances.

CONSULS:

Belgium	G. D. G. Mackinnon, 23 Market Street
Denmark	R. P. H. Pirie, 62 Marischal Street
Finland	D. G. R. Stroud, 62 Marischal Street
France	G. D. G. Mackinnon, 23 Market Street
Germany	A. H. S. Lewis, 186 Albert Quay
Iceland	D. G. R. Stroud, 62 Marischal Street

Norway	D. G. R. Stroud, 62 Marischal Street
Spain	D. G. R. Stroud, 62 Marischal Street
Sweden	R. P. H. Pirie, 62 Marischal Street

AIRPORT: International airport nearby at Dyce. There are frequent daily jet services to London operated by British Airways, and in addition British Airways also operate services to Edinburgh, Glasgow, Prestwick, Wick, Orkney and Shetland. There are also services to Manchester and Birmingham.

Air U.K. operate direct services from Aberdeen to Amsterdam,

Bergen, Stavanger, Edinburgh, Jersey, Leeds/Bradford, Newcastle, Norwich, Isle of Man and Teesside.
TIME: BST is GMT plus 1 hour. GMT during Winter months.
HOLIDAYS: 1st and 2nd January; Spring Holiday (variable date); Summer Holiday (variable date); September Holiday (variable date); Christmas Day (25th December).
POLICE/AMBULANCE/FIRE: Dial 999 from any telephone and ask for service required.
TELEPHONES: There are berths at which GPO telephone service can be made available to vessels. All operational posts are linked by telephone network.
AUTHORITY: Aberdeen Harbour Board.

AMLWCH: 53.27 N. 04.20 W. (See Plan Book)

PILOTAGE: Compulsory. Pilot boards in the vicinity of the S.B.M.
ANCHORAGE: Good anchorage available 3-5 miles East of Point Lynas in 15-18 fathoms.
APPROACHES: Clear and unimpeded from East or West.
RESTRICTIONS: Berthing may be delayed because of strong tidal streams, particularly during period of Spring tides.
MAX. SIZE: No restriction on length, breadth or deadweight. Max. draft 92 ft. (28.04 m.).
HEALTH: See "Health – All Ports" before first UK port.
RADIO: Advise ETA 72 hours prior to arrival, and confirm again 24 hours before arrival.
VHF: Port operates on Channels 16, 10, 12, 19 and 46.
TUGS: Tugs not used for mooring, however 1 tug employed towing astern once mooring completed. Tugs wire used. 2 mooring launches each 1,150 h.p. One is in attendance throughout discharge. Launches equipped with VHF Channels 16, 6, 9, 10, 12, 13, 14, 25 and 26.
BERTHING: *SBM Location:* Lat. 53° 26.7′ N. Long. 4° 19.8′ W. Standard mooring connections using terminal equipment twin 18 in. nylon grommet moorings with 3 in. chafing chains.
Water Depth: Approaches 32.80 m. Berth 31.15 m. (LLW). UKC: For 'B' Class 3.11 m.
Hose System: 2×24 in.×354 m. surface strings, terminating into 2×20 in. rail hoses with 150 ASA flanges.
Line System: 2×40 in.×1.8 miles (sub-marine); 2×40 in.×3 miles (shore booster pumps to tankfarm).
Max. discharge rate: 20,000 cu.m. per hour.
Position of Cargo Hose Connections: Amidships starboard-side.
DENSITY: 1025.
MEDICAL: Only in an emergency.
FRESH WATER: Not available.
FUEL: Not available.
BALLAST FACILITIES: None.
LIGHTERAGE FACILITIES: None.
SERVICES: Small quantities of fresh provisions only in an emergency. No tank cleaning or dirty ballast facilities available.
REPAIRS: Repairs possible only in an emergency.
REPATRIATION: Not possible.
GENERAL: Responsible Crew member on watch on fo'c'stle head throughout period on the mooring.

Whilst on the berth, no immobilisation of main engines or steering gear is permitted as ship's main engines must be continuously available on short notice to avoid contact with the SBM. Engines used astern to keep clear of the buoy at each slack water period.

Five shore personnel, namely 2 berthing supervisors and a support group of 3 men will remain on board while the ship is moored at the SBM.

The most stringent precautions must be taken to ensure no spillage of oil occurs.
SHORE LEAVE: Not possible.
OPERATORS: Shell Oil.

ARDROSSAN: 55.38 N. 04.49 W. (See Plan Book)

DOCUMENTS: Normal documents required:
Customs Documents.
Health Documents.
Crew List.
Passenger List.
Ship's Papers, etc.
PILOTAGE: Pilotage compulsory. Operated by Clyde Port Authority. Telegraphic address – "Harbour" Ardrossan. VHF Channels 16, 14 and 12. Signals for Pilot – flag, lamp or sound letter "G". Pilot taken on board approximately 0.75 miles S.W. of Breakwater Light.

24 hours notice required and amendment if ETA changes.
ANCHORAGE: In 12 to 15 fathoms 1 mile S.W. of breakwater.
RESTRICTIONS: Two balls by day, or two red lights vertically by night, from a flagstaff at Montgomerie Pier, at elevations of 66 ft. and, 60 ft. indicate that vessels must not enter.
MAX. SIZE: Eglinton Dock approx. 420 ft. by 57 ft. by 16 ft./18 ft. (depending on tide). North Montgomerie Pier Tanker Berth – max. length 575 ft., max. draft, up to 70 ft. beam, 23 ft./26 ft.; over 70 ft. beam, 22 ft./25 ft.
HEALTH: All vessels requiring attention of Medical Officer shall show flag signal ZW by day, or between sunset and sunrise, either morse signal ZW by lamp, or a red light over a white light, not more than 6 ft. apart. Other vessels shall show flag signal "Q" by day, or between sunset and sunrise either morse signal Q by lamp or a red over a white light, not more than 6 ft. apart.

Certificate of Pratique will be issued by Customs Boarding Officer on receiving a satisfactory and fully completed Maritime Declaration of Health. No further formalities required at subsequent ports of call in the U.K.

Also see "Health – All Ports" before first U.K. port.
RADIO: VHF Channels 12, 14, and 16. Radio telephone via Portpatrick.
TUGS: On application to Clyde Tug Owners.
BERTHING: No special requirements except with draft over 16 ft. when vessel may be delayed waiting for tide.
STEVEDORES: Orders to be given by 1130 hrs. previous day.
MEDICAL: No advance notice required unless medical attention is necessary immediately on vessel's arrival. No hospital facilities in Ardrossan, nearest hospital being at Irvine, 6 miles and Kilmarnock 16 miles.
TANKERS: Hoses 8in. Berths (1) Up to 3,000 d.w. (2) Up to approximately 20,000 d.w. Max. draft 22 ft./26 ft. depending on beam and tide.
DENSITY: Sea water 1025.
FRESH WATER: Available continually at all berths.
FUEL: Marine oils available ex pipeline, or by road tanker.
FIRE PRECAUTIONS: Patrolman required for hazardous cargoes.
GANGWAY/DECK WATCHMEN: Recommended.
OPENING/CLOSING HATCHES: Opened and closed by crew.
CERTIFICATES: Following Certificates are requested: Load Line, safety radio, safety equipment, safety construction, deratisation, and Current Trinity House Light Bills.
CUSTOMS ALLOWANCE: Standard U.K. allowances.
IDENTIFICATION CARDS: Not required.
CONSULS: Norwegian Vice Consulate, Danish Vice Consulate: R. L. Alpine & Co. Ltd., Winton Buildings, Ardrossan. Tel. Ardrossan 3065.
REPAIRS: Limited repair facilities.
REPATRIATION: Customs Boarding Officer acts for Immigration Dept. and arrangements for repatriation can be arranged in conjunction with ship's Agent.
AIRPORTS: Prestwick 18 miles. Glasgow 25 miles.
TIME: BST, that is GMT plus 1 hour. GMT in Winter months.
HOLIDAYS: 1st and 2nd January; Easter Monday; Third Monday in July; First Monday in October; and Christmas Day. Cargo work may be available on certain holidays by special arrangement.
POLICE/AMBULANCE/FIRE: Police tel. Saltcoats 63966; Ambulance, Fire: Ask telephone operator.
SHORE LEAVE: No restriction.
DEVELOPMENTS: Roll-on/roll-off berth for specialised traffic.
AUTHORITY: Ardrossan Harbour Company Limited.

AYR: 55.28 N. 04.38 W. (See Plan Book)
TROON: 55.33 N. 04.40 W. (See Plan Book)

DOCUMENTS:
Customs Require:
2 copies Form XS1.
Ship's Register.
Load-line Certificate.
Safety Radio Certificate.
Passenger List.
Crew List.
Port Health require:
Derating Certificate.
Agents require:
1 copy Form XS4.
Bills of Lading.
2 copies Manifest.
PILOTAGE: 24 hours notice of ETA required for Pilot via Agent or Dock Authority. Pilots listen on Channel 16 and work on Channel 14 VHF.
ANCHORAGE: To Pilot's advice. E'ly winds Ayr Bay, W'ly gales anchor East side of Arran Island.
RESTRICTIONS: Draft restriction at LW. Enter on Pilot's advice.
MAX. SIZE: 300 ft. in length and 18 ft. draft – depending on berth. River berth – Max. draft 21 ft. 06 in. No length restriction.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Local station, call sign GPK on 2381 kc/s. VHF radio only, operating on Channel 14 and listening on Channel 16.
TUGS: No tugs available.
RADAR: No radar station.
BERTHING: *Ayr:* Length of operational quays 1,450, depth 21 ft.
Troon: Length of operational quays 5,700 ft, depth 24 ft.
CRANES: One heavy lift crane, 5×5 tonne and 1×6 tonne mobile cranes.
BULK CARGO FACILITY: Three mobile conveyors, one fixed high capacity coal appliance.
STEVEDORES: 24 hours notice of ETA should be given to stevedores.
MEDICAL: Hospital facilities nearby in town.
DENSITY: Varies according to weather.
FRESH WATER: Available at all berths, rates upon application.
FUEL: All grades available, 24 hours notice.
GANGWAY/DECK WATCHMEN: Deck watchman required; may be supplied by arrangement with stevedores.
OPENING/CLOSING HATCHES: Performed by ship's crew.
CUSTOMS ALLOWANCE: 0.25 lb. of tobacco or equivalent cigarettes, and one-sixth of a gallon wine/spirits per man.
IDENTIFICATION CARDS: Seamen's identity cards should be carried.
REPAIRS: Most engine and deck repairs available.
DRY DOCKS: Two at Troon, max. length 400 ft., breadth 50 ft.
AIRPORT: Nearest at Prestwick, 7 miles away, mostly International flights.
TIME: GMT plus 1 hour, reverting to GMT in Winter months.

HOLIDAYS: Official holidays: First 2 working days in January: Easter Monday; Spring Bank Holiday (1978 – May 29th); Ayr Races (2 days in third week in September); Christmas Day. No work at all on these days.
POLICE/AMBULANCE/FIRE: Dial 999, and ask for service required.
TELEPHONES: No connection on board vessel.
SERVICES: Special arrangements can be made for tank washing and compass adjusting through Glasgow.
SHORE LEAVE: No restrictions on shore leave.
AUTHORITY: British Transport Docks Board.

BARROW-IN-FURNESS: 54.07 N. 03.14 W. (See Plan Book)

PORT LIMITS: The seaward boundaries of the port are a line joining Westfield Point (Lat. 54° 05′ 33″ N., Long. 03° 11′ 10″ W.) with Scar End Point on Walney Island (Lat. 54° 03′ 31″ N., Long. 3° 12′ 17″ W.).
DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
Health Declaration.
Ship's Certificates and Cargo Documents.
PILOTAGE: Pilot boards at Lune buoy, using Pilot cutter, usually 2 or 3 hours before high water.

The Heysham Lake Pilot vessel listens on 2182 kHz (MF) and is also equipped with VHF listening continuously on Channel 16. The working frequencies are 2241 and 2246 kHz and Channels 6, 12 and 14 respectively. Ships which are suitably equipped should pass their ETA through any United Kingdom Post Office Coast Station to their Agent 24 hours before arrival.
ANCHORAGE: At Lightning Knoll Buoy, depth of 10 m. at LW. In adverse weather conditions vessels proceed to Ramsey Bay, 16 km. away, for shelter. Piel Harbour to North of Piel buoy.
RESTRICTIONS: No docking after HW. Tidal range 6.4 m. – 9.76 m. Deduct 0.5 m. from height of high water to allow for invert at dock entrance. Access to the port, which is protected from the prevailing Westerly winds by Walney Island, is gained from the Irish Sea through the harbour along the well-defined Walney Channel. The depth of water on the Ramsden Dock entrance sill can range from 10.06 m. at high water springs to 6.4 m. at high water neaps.
MAX. SIZE: Length 183 m. Beam 23 m. Draft according to tide.
HEALTH: Vessels arriving from abroad are given pratique by Customs Boarding Officers. In case of suspected disease or fever on board notify Agent prior arrival. Agent will advise Port Health Authorities.

Also see "Health – All Ports" before first U.K. port.
RADIO: Local stations: Anglesey Radio, and/or Port Patrick Radio.
VHF: Port VHF service. Call sign 'Ramsden Radio'. Channel 16 (156.8 mHz) Calling and Safety. Channel 12 (156.6mHz) Port Operations.
TUGS: Liverpool tugs available on request. Notice required.
BERTHING:

Docks	*Water area in Hectares*	*Width of entrance*
Ramsden	24.8	30.48 m.
Buccleuch	12.6	30.48 m.
Devonshire	12.0	24.4 m.

Walney Channel Deep-water Berth: 259.10 m.×30.48 m.×10.06 m. depth.

Ramsden includes: Ramsden Dock Basin with 3 berths with a total quayage of 378 m., taking vessels of up to 9.15 m. draft, and Anchor Line Basin with three berths 256 m., 152.4 m., and 274.3 m., long respectively, taking vessels of up to 7.3 m. draft. Anchor Line berth equipped for Ro/Ro traffic.
DENSITY: Salt water 1025.
FRESH WATER: Available from quayside hydrants.
FUEL: No stocks at Barrow. Can be supplied by road or coastal tanker.
GANGWAY/DECK WATCHMEN: Compulsory.
OPENING/CLOSING HATCHES: Handled by ship's crew.
IDENTIFICATION CARDS: Seaman's Book or Passport required by non-British crew.
CONSULS: Netherlands, Norway, Portugal, Spain. Tel. Barrow 22323.
AIRPORT: Nearest at Manchester, 100 miles distant. Flights to all parts. Local Airport facilities by arrangement.
TIME: As for other UK ports.
HOLIDAYS: As for other ports in England, plus New Year's Day (1st January).
POLICE/AMBULANCE/FIRE: Police: Tel. Barrow 24532; Ambulance: Tel. Barrow 24201, 21035 and 21363; Fire: Tel. Barrow 21363.
SHORE LEAVE: No restrictions.
AUTHORITY: Docks Manager and Harbour Master.

BARRY: 51.24 N. 03.16 W. (See Plan Book)

DOCUMENTS: See "Cardiff".
PILOTAGE: Telegraphic address of pilot station: S.E.W.P.A. Pilots, Pier Head, Barry Docks. Amount of advance notice of ETA required: 24 hours. Final confirmation to be given by VHF or RT when within 2 hours of pilot station. VHF channel or frequency to be used when contacting pilot boat or pilot station: VHF Channel 16 thence working Channels 6, 8, 10, 11, 22.

Pilot boat: motor launch black hull with "S.E.W.P.A. Pilot" in white on same. White superstructure. Light or sound signals to be made by vessels requiring a Pilot: flag "G" over numeral "6" flown by day, or "6" sounded on whistle or siren; flashed by lamp at night.

Exact area where pilot boat is located normally between Nash Point and Breaksea Lanby Buoy. Smaller vessels may be boarded in Barry Roads.
ANCHORAGE: Barry Roads, 10 fathoms, safe anchorage. Large vessels should anchor West of Breaksea Lanby Buoy. Small vessels 0.75 mile S.E. of Barry Dock Entrance.
RESTRICTIONS: Entrance only 4 hours before HW to 4 hours after HW.
MAX. SIZE: 575 ft. × 75 ft. × 31 ft. draft.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Barry Docks Radio, Channel 22.
VHF: Channels 16, 10, 11 and 22.
TUGS: Join vessel at Barry Road. Tug's or ship's lines utilised.
BERTHING: The port is fully equipped to receive all types of oil chemicals, including LPG. Also modern facilities exist for handling all types of bulk as well as conventional cargoes. A roll-on/roll-off berth is available. Container traffic is not a feature of the port.
BRIDGES: Bridge swung to vessel's requirements.
STEVEDORES: An early ETA essential. Enables planning to be effected in conjunction with other work in port.
MEDICAL: Hospital facilities available. Advance notice desirable.
TANKERS: 6 tanker berths, maximum draft 28 ft.
DENSITY: Density 1020.
FRESH WATER: 15/20 t.p.h. per hose.
FUEL: By barge or road transport.
GANGWAY/DECK WATCHMEN: The services of watchmen provided at discretion of Shipowner or Agent.
OPENING/CLOSING HATCHES: Work normally undertaken by ship's crew but the port will, if requested, provide a crane to assist in this work on completion of a "Hatch beam form". Riggers may be employed on this work at request of shipowner.
CUSTOMS ALLOWANCE: 1.5 oz. tobacco per day per man. 0.185 litre wine or spirits per day per man.
IDENTIFICATION CARDS: Not needed by Port Authority.
CONSULS: None. Many located at Cardiff 8 miles East of Barry.
REPAIRS: All types of repair undertaken by private ship repairers.
DRY DOCKS: One 940 ft. × 78.5 ft.
REPATRIATION: All facilities available.
AIRPORT: Cardiff (Wales) Airport, 4 miles, served by regular airlines.
TIME: GMT, except March-September when British Summertime (GMT+1 hr.) is in operation.
HOLIDAYS: Bank Holidays. Arrangements made to work if essential.
POLICE/AMBULANCE/FIRE: Call operator by dialling 999.
TELEPHONES: At main berths.
AUTHORITY: British Transport Docks Board.
AGENT: Lambert Brothers Ship Agencies Ltd., The Exchange, Cardiff, CF1 6RX. Telex: 49384. Cables: Lambert Cardiff. Telephone: 0222 25201.

BELFAST: 54.36 N. 05.56 W. (See Plan Book)

DOCUMENTS:
1 Passenger and Crew List for Immigration.
1 Crew Declaration C142 (for H.M. Customs).
1 List of Ship's Stores (for H.M. Customs).
1 Maritime Declaration of Health.
1 Cargo Manifest.
PILOTAGE: Pilot station is situated on end of East pier at Carrickfergus. It is manned continuously. Vessels requiring a Pilot should give as much advance notice as possible of ETA, but in any case not less than 1 hour. Pilots may be ordered through:
(i) Pilot Station Carrickfergus, tel. Carrickfergus 62329.
(ii) Port Operations Station, tel. Belfast 34422 Ext. 330, or Belfast 38506.
(iii) Belfast Harbour Office, tel. Belfast 34422 Ext. 225, 0900 – 1700 hrs. Monday-Friday.

There are two motor launches servicing Pilots. "Pilot Boat I" is 33 ft. long and "Mabel Helen" is 46 ft 8 in. long. Both vessels are painted black with word Pilot in white letters on each side.

Pilot launches may be contacted on VHF Channel 16 and working frequency Channel 6.

Usual international signals should be made for a Pilot. Pilots board from 1.5 to 2 miles S.E. of Carrickfergus. In poor visibility the pilot launch makes a sound signal of 4 short blasts. Vessels may be led into calm water before boarding.
ANCHORAGES: Safe anchorages, according to draft and size of vessel are available through Belfast Lough East of a line from Carrickfergus to Grey Point.
RESTRICTIONS:

Intended depths in the entrance channels: Victoria Channel, sea to Refinery berths – 30 ft. below datum. Refinery to Thomson wharf – 26 ft. below datum.

Musgrave Channel, 21 ft. below datum.
Herdman Channel, 21 ft. below datum.
MAX. SIZE: Vessels' size is restricted only by depth of water available. See "Restrictions", "Berthing", and "Tankers".
HEALTH: Use International Code quarantine signals. Master of a ship approaching a port in Northern Ireland from a foreign port other than an excepted port must ascertain state of health of all persons on board, and must fill in and sign Declaration of Health. It should be completed and ready to deliver to the Customs Officer, or authorized officer of the Port Health Authority, whichever first boards the ship.

If any suspected diseases on board, free pratique will not be granted by Her Majesty's Customs until the ship has been visited by the Port Medical Officer. Therefore in these cases notify PORTELTH BELFAST by radio in advance.

Also see "Health – All Ports" before first U.K. port.
RADIO: The best station for messages, cables, etc., is Port Patrick call signal GPK.

VHF: Belfast Port Operation and Information service is situated at the head of Clarendon Dry Dock. A continuous watch is maintained on VHF R/T on Channel 16. Working Channel is 12. Call sign is Belfast Harbour Radio.

TUGS: Tugs are owned by Cory Ship Towage Ltd., Tel. No. Belfast 743278. They are fitted with VHF Channels 16, 14, 12, 8 and 6. Tugs normally meet inward bound vessels in vicinity of number 20 beacon. Use of tugs' lines is optional. Charge for use of each tug line is £5.

BERTHING: The following berths are equipped for handling containers or drive-on, drive-off traffic:

Berth	*Max. draft (ft.)*
Donegall Quay 2 (1×25 tonne derrick crane)	14
Donegall Quay 4 (2×7.5 tonne portal crane)	14
Donegall Quay 5 (No cranes)	14
Donegall Quay 6 (No cranes)	18
Ballast Quay & Spencer Dock (2×25 tonne derrick cranes)	18
York Dock A (No cranes)	24
York Dock 1 (1×35 tonne derrick crane)	24
Herdman Channel West (2×30 tonne transporter cranes)	18
Gotto Wharf (2×30 tonne transporter cranes)	21
Stormont Wharf 2 (200 tonne cantilever crane)	28

Unitank Storage Co. Ltd. have constructed a bulk liquid terminal for the storage of petroleum, chemical products, etc. Special tankers ship liquid gas to the storage installation of Calor Kosangas (Northern Ireland) Ltd. at Musgrave Channel.

STEVEDORES: Two schooling times per day for stevedoring gangs – 0800 and 1300 hrs. Gangs for all week–end work are schooled at 1300 hrs. on Fridays.

MEDICAL: All kinds of medical treatment are available. Agent should be given as much notice as possible for arrangements to be made. International vaccination certificates for smallpox are required.

TANKERS: Tankers have to observe (i) Belfast Harbour Commissioners By-Laws for loading, discharging, etc., of petroleum spirit. (ii) Chamber of Shipping Tanker Safety Code.

Capacity for 6,000 tons of tank washings to be processed at B.P. Refinery.

Tanker berths: B.P. oil refinery 35 ft. Oil berth No. 1 – 28 ft. Oil Berth No. 2 – 30 ft. Oil Berth No. 3 – 30 ft.

DENSITY: Average density of water in Inner Harbour is about 1012, and Outer Harbour is about 1024.

FRESH WATER: Available at almost all berths. Delivery is by hose at a rate of approx. 30 t.p.h. Arrangements can be made through Dept. of Environment (Water Services Division). Tel. 749402.

FUEL: All grades of fuel oil are available. 48 hours advance notice of requirements should be given.

FIRE PRECAUTIONS: Ships have to observe (i) Belfast Harbour Commissioners By-Laws for regulating the use of fires, lights and electrical apparatus. (ii) Chamber of Shipping Tanker Safety Code.

Special precautions for vessels carrying petroleum, explosives, calcium carbide and dangerous goods are set out in the appropriate by-laws. A copy of general port fire notice, delivered to all ships on arrival.

GANGWAY/DECK WATCHMEN: Normally, a member of ship's company acts as watchman. Shore watchmen may be obtained through Agent.

OPENING/CLOSING HATCHES: Conventional beams and hatches and slab hatches are opened and closed by stevedores. McGregor or patent steel hatches are worked by ship's personnel. Ship's personnel required to work all types of hatches at grain silos.

CERTIFICATES:

Register. Radio Certificate. Load Line Certificate. Safety Equipment Certificate. Safety Construction Certificate. Light Bills. Passenger Certificate if applicable. Chain Register. Derat Certificate.

CUSTOMS ALLOWANCE: Tobacco: 8 oz. tobacco are permitted per man and issues are made at 8 day intervals. Wine and/or Spirits: Wine, beer and spirit issues are made, in moderation, at 4 day intervals.

IDENTIFICATION CARDS: Seamen's identity cards required.

CONSULS:

Belgium	Hillsborough 682671
Denmark	Belfast 30581
Dominican Republic	Belfast 30321
France	Belfast 660325
Germany	Ballymena 41412
Italy	Belfast 778353
Netherlands	Belfast 43126
Norway	Belfast 42242
Spain	Belfast 27571
Sweden	Belfast 30581
Switzerland	Carrickfergus 61195
U.S.A.	Belfast 28239

REPAIRS: All types of deck and engine repairs are possible.

DRY DOCKS: Belfast dry dock, length of floor 1,100 ft. breadth of floor 167 ft., breadth of entrance 165 ft., level of sill 26 ft. 6 in. below datum.

Harland and Wolff building dock, length of floor 1,825 ft., breadth of floor and entrance 305 ft., level of sill 16 ft. 10 in. below datum.

Five other dry docks available.

REPATRIATIONS: Crew may be changed and repatriations arranged. Immigration must be informed.

AIRPORT: Aldergrove Airport is approximately 17 miles from Belfast. There are daily flights to all parts of United Kingdom.

TIME: British Standard Time is kept, that is GMT plus 1 hour. Reverting to GMT in Winter months.

HOLIDAYS: Stevedore holidays are 1st January, 17th March, Easter Monday and Easter Tuesday, 12th and 13th July and 25th and 26th December.

POLICE/AMBULANCE/FIRE: All can be contacted by phoning 999 and ask for services required. Additionally: Fire Brigade Belfast 22222; Ambulance Belfast 41212; Harbour Police Belfast 23555; *or* through Belfast Harbour Radio on VHF/RT Channels 16 and 12.

TELEPHONE: Telephone can be placed on board at certain berths.

SERVICES: All principal makes of radio, radar and gyro equipment can be serviced. Compass adjusting and D/F calibration can be carried out.

SHORE LEAVE: Normally no restrictions on shore leave.

AUTHORITY: Belfast Harbour Commissioners.

BLYTH: 55.08 N. 01.30 W. (See Plan Book)

DOCUMENTS:

Certificate of Registry.
Load Line Certificate.
Wireless Telegraphy and/or Safety Radio Certificate.
Safety Equipment.
Ship Construction.
Light Dues Payments.
Bills of Lading, Manifest and Stowage Plan usually sent in advance of vessel.
List of members of crew (of ship arriving in U.K.) who are aliens or were engaged outside U.K. (Home Office Form I.B.6A). Passenger form to be completed when reporting vessel's arrival from foreign ports.

PILOTAGE: Call by R/T when within 50 miles of port, and VHF when approx. 1 hour off port. Pilot boats black hull with words "Pilot" on Hull or Superstructure. Letters in white. Fly international Pilot Flag at masthead and at night show international light signals for pilot boat on station.

Vessel requiring Pilot sounds 2 short and 3 long blasts or exhibits International Code Flag "G". By night flashes International Code Signal "G" or "PT". Pilot boats operate and will board within radius of 2 miles of East Pier Lighthouse, or further, weather permitting. Pilots board at Pier end area during adverse weather.

ANCHORAGES: No anchorages within harbour – in good weather vessels can anchor off port East of Fairway Buoy.

RESTRICTIONS: No night restrictions. Entry according to draft. Channel dredged to 7.7 m. LAT and approaches 8.6 m. LAT. Upper River and South Harbour 6.8 m. LAT. Rise of tide 4.3 m. springs, 2.1 m. neaps.

MAX. SIZE: Bulk carriers up to 22,500 d.w.t. discharge at Alcan (U.K.) Limited Terminal. Max. draft 9.8 m.

For other berths max. length 190.5 m., draft 8.5 m.

HEALTH: International quarantine signals to be used. Pratique will be granted by Customs or Port Health officer if Maritime Health Declaration is clean. If suspected diseases on board radio "PORTELTH BLYTH" in advance advising details.

Also see "Health – All Ports" before first U.K. port.

RADIO: Cullercoats Radio.

VHF: Details of movements within port given over VHF from port control office. Calling Channel 16, working Channel 12.

TUGS: Normally join vessel at harbour entrance. Extra charge for use of tugs lines.

BERTHING: Alcan Bulk Alumina Terminal, depth alongside 10.4 m. LAT.

North Quay, South Harbour, depth alongside 8.5 m. LAT. Coal-loading berths and waiting berths, 5.2 m. to 8.6 m. LAT. West Quay, dredged depth 5.2 m. LAT. South Side Berths, dredged depth 8.6 m. LAT. Wimbourne Quay dredged depth 6.8 m. LAT.

STEVEDORES: Blyth Harbour Commission, Traffic Department. South Harbour, Blyth. Tel. Blyth 3611/2. ETA requested day before arrival.

MEDICAL: Notice not necessary but advisable. Hospital facilities available. Inoculation, vaccinations and/or certificates not specifically required.

DENSITY: Sea water. Fresh water effect negligible.

FRESH WATER: Obtainable from shore hydrants. Rate of delivery approximately 10 t.p.h.

FUEL: BHC operate a bunkering Agency on behalf of Shell UK Ltd. 24 hours notice usually required. Grades – gas oil and marine diesel.

GANGWAY/DECK WATCHMEN: Not usually employed as these duties are carried out by the crews.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCE: Tobacco: 50/250 grammes. Wine/Spirit: Wine up to 0.75 litres. Spirits up to 0.375 litres.

IDENTIFICATION CARDS: Seaman's Book or Passport desirable.

CONSULS: Denmark, Norway, Netherlands.

REPAIRS: All types of deck and engine repairs possible.

DRY DOCKS: 3 dry docks available.

	Length (m.)	*Breadth (m.)*
No. 1	94.8	14.0
No. 2	103.3	13.7
No. 3	142.6	18.5

REPATRIATION: Can be arranged by H.M. Immigration Office, Blyth.

AIRPORT: 24 km. Served by regular airlines.

TIME: BST is GMT plus 1 hour. GMT in Winter months.
